Mr. HOWARD. Mr. Speaker, S. 1311, as amended, would authorize the Board of Regents of the Smithsonian to construct the Charles McC. Mathias, Jr., Laboratory for environmental research at the Smithsonian Environmental Research Center located at Edgewater, MD, at a cost of $1,000,000. This Research Center would house Smithsonian scientific research programs currently being conducted in commercially owned leased space in Rockville, MD.

The programs to be relocated include plant physiology, environmental engineering, and a visiting scientist laboratory.

Section two of the bill would designate that the U.S. Courthouse and Customhouse at 601 West Broadway, Louisville, KY, be known as the Gene Snyder United States Courthouse and Customhouse. As my colleagues are aware, in November 1962 and again in November 1966 GENE SNYDER was elected to the 90th Congress from the Fourth District of Kentucky and has served in each succeeding Congress and plans to retire at the end of this Congress.

Mr. Speaker, I urge enactment of S. 1311.

Ms. OAKAR. Mr. Speaker, S. 1311, as amended would provide for the construction of the Charles McC. Mathias, Jr., Laboratory for Environmental Research at the Smithsonian Environmental Research Center located at Edgewater, MD. Senator MATHIAS has been a leader in areas of science and technology, the arts and humanities and civil rights for many years, therefore, it is most fitting that we honor Senator CHARLES MCC. MATHIAS, JR., in this fashion.

In addition, the legislation would designate that the Federal building located in Louisville, KY, be named after the distinguished gentleman from Kentucky who plans to retire at the end of this Congress, Hon. GENE SYNDER.

I would like to commend the distinguished gentleman from New Jersey, [Mr. HOWARD] for the splendid work he has done on legislation relating to the Smithsonian Institution. In the past I have had the pleasure of working with Mr. HOWARD and his able staff of the Committee on Public Works and Transportation. His assistance and cooperation is always appreciated and warrants high praise from myself and my fellow colleagues on House Administration.

As the distinguished Chairman, Mr. HOWARD, is aware, the Committee on House Administration through its task force on libraries and memorials has jurisdiction over policy and administrative matters relating to the Smithsonian Institution and shares joint referral of S. 1311 with the Committee on Public Works and Transportation.

The Committee on House Administration will not have the opportunity to take further action on this legislation before adjournment and thus defers to the Committee on Public Works and Transportation for House consideration today.

This action, however, should not be construed as precedent for relinquishing jurisdiction of the Committee on House Administration over this and any future related matters. Once again, I urge my support of this bill and thank the distinguished Chairman, Mr. HOWARD for managing this bill on the floor.

Mr. SHAW. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1311

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Smithsonian Institution is authorized to plan, design, and construct facilities for the National Air and Space Museum at Washington Dulles International Airport.

SEC. 2. (a) The Smithsonian Institution is authorized to develop a master plan for expansion of the National Air and Space Museum at Washington Dulles International Airport as will not interfere with the operations of such airport.

(b) There are hereby authorized to be appropriated for fiscal years 1987 and 1988 a total of $1,000,000 to the Smithsonian Institution for master planning activities as provided in subsection (a).

SEC. 3. No federal funds are authorized for the construction of any facilities provided for by section 1 of this Act.

SEC. 4. (a) The Board of Regents of the Smithsonian Institution is authorized to construct the Charles McC. Mathias, Jr. Laboratory for Environmental Research.

(b) The Charles McC. Mathias, Jr. Laboratory for Environmental Research shall be located at the Smithsonian Environmental Research Center, a bureau of the Smithsonian Institution, located at Edgewater, Maryland.

(c) Effective October 1, 1986, there is authorized to be appropriated to the Board of Regents of the Smithsonian Institution $1,000,000 to carry out the purposes of this section.

(d) Any portion of the sums appropriated to carry out the purposes of this section may be transferred to the General Services Administration which, in consultation with the Smithsonian Institution, is authorized to enter into contracts and take such other action, to the extent of the sums so transferred to it, as may be necessary to carry out such purposes.

SEC. 5. (a) The Congress finds that—

(1) the crew of the space shuttle Challenger was dedicated to stimulating the interest of American children in space flight and science generally;

(2) the members of the crew gave their lives trying to benefit the education of American children;

(3) a fitting tribute to that effort and to the sacrifice of the Challenger crew and their families is needed; and

(4) an appropriate form for such tribute would be to expand educational opportunities in science by the creation of a center that will offer children and teachers activities and information derived from American space research.

(b) It is the sense of the Congress that—

(1) a Children's Challenger Center for Space Science should be established in conjunction with the Smithsonian Institution as a living memorial to the seven Challenger astronauts who died serving their country and to other individuals who gave their lives in exploration of the space frontier; and

(2) the Federal Government should, along with the Smithsonian Institution public and private organizations and persons, cooperate in the establishing of such a Center.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Speaker, I offer an amendment in the nature of a substitute.

The Clerk read as follows:

Amendment in the nature of a substitute offered by Mr. HOWARD: Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. CONSTRUCTION OF CHARLES McC. MATHIAS, JR. LABORATORY FOR ENVIRONMENTAL RESEARCH.

(a) CONSTRUCTION AUTHORIZATION.—The Board of Regents of the Smithsonian Institution is authorized to construct the Charles McC. Mathias, Jr. Laboratory for Environmental Research.

(b) LOCATION.—The Charles McC. Mathias, Jr. Laboratory for Environmental Research shall be located at the Smithsonian Environmental Research Center, a bureau of the Smithsonian Institution, located at Edgewater, Maryland.

(c) AUTHORIZATION OF APPROPRIATIONS.—Effective October 1, 1986, there is authorized to be appropriated to the Board of Regents of the Smithsonian Institution $1,000,000 to carry out the purposes of this section.

(d) TRANSFER OF FUNDS.—Any portion of the sums appropriated to carry out the purposes of this section may be transferred to the General Services Administration which, in consultation with the Smithsonian Institution, is authorized to enter into contracts and take such other action, to the extent of the sums so transferred to it, as may be necessary to carry out such purposes.

SEC. 2. NAMING OF GENE SNYDER UNITED STATES COURTHOUSE AND CUSTOMHOUSE.

(a) DESIGNATION OF BUILDING.—The United States Courthouse and Customhouse at 601 West Broadway, Louisville, Kentucky, shall be known and designated as the "Gene Snyder United States Courthouse and Customhouse".

(b) LEGAL REFERENCES.—Each reference in a law, map, regulation, document, record, or other paper of the United States to such building shall be deemed to be a reference to the "Gene Snyder United States Courthouse and Customhouse".

(c) EFFECTIVE DATE.—Subsections (a) and (b) of this section shall take effect on January 4, 1987.

Mr. HOWARD (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The question is on the amendment in the nature of a substitute offered by the gentleman from New Jersey [Mr. HOWARD].

The amendment in the nature of a substitute was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. HOWARD

Mr. HOWARD. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. HOWARD: Amend the title so as to read: "A bill to autorize the Board of Regents of the Smithsonian Institution to construct the Charles McC. Mathias, Jr. Laboratory for Environmental Research in Edgewater, Maryland, and to designate the United States Courthouse and Customhouse in Louisville, Kentucky, as the 'Gene Snyder United States Courthouse and Customhouse'.".

The amendment to the title was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the Senate bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

DISTRICT OF COLUMBIA STADIUM ACT OF 1957

Mr. FAUNTROY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2776) to amend the District of Columbia Stadium Act of 1957 to direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 2, strike out all including line 1 over to and including line 12 on page 4, and insert:

"(b)(1) Not later than 180 days after the date of enactment of this subsection, the Secretary of the Interior shall—

"(A) convey without consideration to the government of the District of Columbia all right, title, and interest of the United States in and to the building comprising the stadium constructed under this Act; and

"(B) lease without consideration to the government of the District of Columbia—

"(i) the ground under; and

"(ii) the parking facilities associated with the stadium constructed under this Act.

"(2) The lease authorized by paragraph (1)(B) shall be for a period of 50 years.

"(c) The conveyance and lease of real property under subsection (b) shall be subject to such terms and conditions (which shall be set forth in the instrument of conveyance) as will ensure that title to the property shall not be transferred by the District to any person or entity other than the United States or any political subdivision or agency of the District of Columbia or the United States and that the property will be used only for—

"(1) stadium purposes;

"(2) providing recreational facilities, open space, or public outdoor recreation opportunities;

"(3) such other public purposes for which the property was used prior to June 1, 1985; and

"(4) such other public purposes for which the property was approved for use by the Secretary with the concurrence of the National Capital Planning Commission prior to June 1, 1985.

"(d)(1) The instrument of conveyance and the lease referred to in subsection (c) shall provide that all right, title, and interest conveyed to the District of Columbia pursuant to such instrument of conveyance shall revert to the United States and the lease shall terminate if—

"(A) the terms and conditions referred to in subsection (c) have not been complied with, as determined by the Secretary, and

"(B) such noncompliance has not been corrected within ninety days after written notice of such noncompliance has been received by the Mayor of the District of Columbia.

Such noncompliance shall be treated as corrected if the District of Columbia and the Secretary enter into an agreement, with the concurrence of the National Capital Planning Commission, which the Secretary considers adequate to ensure that the property will be used in a manner consistent with the purposes referred to in subsection (c).

"(2) No person may bring an action respecting a violation of any term or condition referred to in subsection (c) before the expiration of ninety days after the date on which such person has notified the Mayor of the District of Columbia of the alleged violation. The notice shall include notice of such person's intention to bring an action to declare a reversion and termination of the lease under paragraph (1) of this subsection.

"(3) The conveyance of real property under subsection (b) shall be made subject to the condition that the District of Columbia shall bear the cost of removing structures or rehabilitating the land or stadium should the stadium revert to the United States pursuant to this subsection.

"(4) Any property which reverts to the Secretary under this subsection shall be administered by the Secretary as part of the Park System of the Nation's Capital in accordance with the provisions of the Act of August 25, 1916 (16 U.S.C. 1, 2-4), and other provisions of law generally applicable to units of the national park system.".

SEC. 2. TECHNICAL AMENDMENT.

Section 11 of the District of Columbia Stadium Act of 1957 (D.C. Code, sec. 2-330) is amended by inserting "(including any area designated A, B, C, D, or E on the revised map entitled 'Map to Designate Transfer of Stadium and Lease of Parking Lots to the District', prepared jointly by the National Park Service (National Capital Region) and the District of Columbia Department of Public Works for site development and dated October 1986 (NPS drawing number 831/87284-A))," after "property of any kind".

Mr. FAUNTROY (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

Mr. McKINNEY. Mr. Speaker, reserving the right to object, this bill has been passed by the House; correct?

Mr. FAUNTROY. Mr. Speaker, will the gentleman yield?

Mr. McKINNEY. I yield to the gentleman from the District of Columbia.

Mr. FAUNTROY. Mr. Speaker, yes, on June 24, 1985.

Mr. McKINNEY. Mr. Speaker, this bill has also had the corrections made in it which means that the District

may not sell the stadium to a third party and make money off it, but that it has to offer it back to the U.S. Government first.

Mr. FAUNTROY. Mr. Speaker, the gentleman is correct.

Mr. McKINNEY. This bill is agreed to the land status surrounding the stadium?

Mr. FAUNTROY. It has, Mr. Speaker.

Mr. McKINNEY. In other words, we have another turkey leaving the Federal fold, like the two airports, and going out to where they belong, to the people who operate them and use them and whose name they are under; right?

I know that you would not call it a turkey, but we are finally after, I believe, 12 years going to face this issue.

Everybody has agreed in the House and the other body?

Mr. FAUNTROY. Yes, Mr. Speaker, with an amendment, of course, that would have the land leased to the stadium for a 50-year period for a nominal fee. That certainly is acceptable.

Mr. McKINNEY. Mr. Speaker, I thank the gentleman from the District of Columbia [Mr. FAUNTROY] and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

Mr. WALKER. Mr. Speaker, reserving the right to object, I have a couple of questions.

First of all, the properties are being conveyed without cost. Does the Federal Government retain any obligation for maintenance of the properties or for liabilities on the properties?

Mr. FAUNTROY. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from the District of Columbia.

Mr. FAUNTROY. Mr. Speaker, under the Stadium Act of 1957, the District of Columbia has paid the entire cost, $20 million, of the structure on the land and, of course, will be responsible for its maintenance.

The land is leased to the District government for 50 years, so it does not convey the land, as was passed by the House in 1985, but the Senate amendment would require that it only be leased.

Mr. WALKER. Mr. Speaker, further reserving the right to object, what I am trying to ascertain here is the information that I have here is that all of this is being turned over to the D.C. government without cost to the D.C. government. Is that correct?

Mr. FAUNTROY. The D.C. government has paid the cost. It has paid for the stadium, $10 million, pursuant to the act.

Mr. WALKER. In fact, we are conveying property at this point to the D.C. government in trust. I am trying to find out whether or not the Federal Government retains any liabilities with regard to this property that we are basically giving to the D.C. government.

Mr. FAUNTROY. The Federal Government retains no liability with respect to the property.

Mr. WALKER. No liabilities. Now, as I understand it, the parking lot areas around the stadium will then be leased to the District government for a 50-year period. Is that right?

Mr. FAUNTROY. Fifty-year period, yes.

Mr. WALKER. Can the gentleman tell me what the cost of those leases are; what will the Federal Government be receiving in terms of payment on the lease?

Mr. FAUNTROY. The operating income from the stadium has been over $3 million a year from concessions and rent from the Redskins and others, using 1984 as a typical year. Under the 1957 law title to the stadium vests in the United States by the year 2007, so the stadium would have grossed $150,000,000 in those 50 years.

Mr. WALKER. Over the course of the 50 years, so that would be something on the order of $3 million a year?

Mr. FAUNTROY. Yes; of course, most of that $3 million a year has been used for personnel and maintenance. The stadium has never produced enough income to pay the annual interest on construction bonds. The city has had to pay that—$15 million for interest. And the stadium income was never enough to set up a sinking fund to pay the principal on the bonds. The city had to pay $10 million of that a few years ago.

The financial report of the stadium management is filed annually with the Speaker and he refers it to the House Committee on the District of Columbia.

Mr. WALKER. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from the District of Columbia?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. FAUNTROY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from the District of Columbia?

There was no objection.

COAST GUARD AUTHORIZATION ACT OF 1986

Mr. STUDDS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4208) to authorize appropriations for the Coast Guard for fiscal year 1987, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Coast Guard Authorization Act of 1986".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. Funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1987, as follows:

(1) For the operations and maintenance of the Coast Guard, $1,862,800,000, of which not more than $20,000,000 may be made available to the Commandant of the Coast Guard for discretionary use in meeting unanticipated demands and needs for Coast Guard operation and maintenance; and for increases in salary, pay, and other employee benefits authorized by law, such sums as may be necessary.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $267,000,000, to remain available until expended.

(3) For research, development, test, and evaluation, $20,000,000, to remain available until expended.

(4) For retired pay, including the payment of obligations therefore otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents' Medical Care Act, $364,000,000.

(5) If funds are appropriated to any other officer of the United States for carrying out the purposes described in paragraphs (1) through (4) of this section, such officer may transfer to the Secretary of the department in which the Coast Guard is operating the full amount of such funds. Such funds shall be allocated by the Secretary to such purposes.

AUTHORIZED LEVELS OF MILITARY STRENGTH AND MILITARY TRAINING

SEC. 3. (a) For fiscal year 1987, the Coast Guard is authorized an end-of-year strength for active duty personnel of 39,200. The authorized strength does not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

(b) For fiscal year 1987, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,200 student-years.

(2) For flight training, 110 student-years.

(3) For professional training in military and civilian institutions, 441 student-years.

(4) For officer acquisition, 925 student-years.

TRANSFER OF FUNDS

SEC. 4. (a) Whenever the Secretary of the department in which the Coast Guard is operating determines it to be in the national interest, the Secretary may transfer not to exceed 5 percent of the funds appropriated for the purposes described in section 2(2) of this Act to the Commandant at the Coast Guard for discretionary use in meeting unanticipated demands and needs for Coast Gaurd operations and maintenance under section 2(1) of this Act.

(b) No transfer of funds may occur under subsection (a) of the section until 15 days after the Secretary has provided written notification to the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Merchant Marine and Fisheries of the House of Representatives, and the Appropriations Committees of the Senate and House of Representatives stating the reasons for such determination and a description of the purposes for which the funds proposed to be transferred will be used.

LIMITATIONS ON CONTRACTING PERFORMED BY THE COAST GUARD

SEC. 5. (a)(1) It is in the national interest for the Coast Guard to maintain a logistics capability (including personnel, equipment, and facilities) to provide a ready and controlled source of technical competence and resources necessary to ensure the effective and timely performance of Coast Guard missions in behalf of the security, safety, and economic and environmental well-being of the United States.

(2)(A) The Secretary of the department in which the Coast Guard is operating shall identify those Coast Guard activities that are necessary to maintain the logistics capability described in paragraph (1) of this subsection. The Secretary shall provide a list of such activities to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Merchant Marine and Fisheries of the House of Representatives not later than January 31, 1987. If the Secretary does not provide such list by that date, no activity performed by Coast Guard personnel may be contracted for performance by non-government personnel after such date until the list is provided to such committees.

(B) The list submitted by the Secretary under this paragraph shall not include—

(i) any activity that is being performed under contract by non-government personnel on the date of enactment of this Act; or

(ii) any activity for which Congress received, prior to April 1, 1986, a written notification pursuant to section 14(b)(2) of the Coast Guard Authorization Act of 1984 (Public Law 98-557; 98 Stat. 2864) of intent to contract.

(b)(1) Except as provided in paragraph (2) of this subsection, performance of an activity identified by the Secretary under subsection (a)(2) of this section may not be contracted for performance by non-government personnel.

(2) The Secretary may waive paragraph (1) of this subsection with respect to any Coast Guard activity (other than an activity described in subsection (d) of this section), if the Secretary determines that the performance of such activity by Government personnel is no longer necessary to ensure the effective and timely performance of Coast Guard missions.

(3) A waiver under paragraph (2) of this subsection may not take effect until a period of 30 days in which either the Senate or House of Representatives is in session has expired after the Secretary has submitted in writing to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Merchant Marine and Fisheries of the House of Representatives a full and complete statement concerning the waiver and the reasons therefor.

(c) Before the beginning of fiscal year 1987, the Secretary shall submit to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Merchant Marine and Fisheries of the House of Representatives a list of Coast Guard activities that are to be considered for performance by contract by non-Government personnel under the procedures of Office of Management and Budget Circular A-76 during that fiscal year.

(d)(1) Notwithstanding any other provision of law, each contract awarded by the Coast Guard in fiscal year 1987 for construction or services to be performed in whole or in part in a State which has an unemployment rate in excess of the national average rate of unemployment (as determined by the Secretary of Labor) shall include a provision requiring the contractor to employ, for the purpose of performing that portion of the contract in that State, individuals who are local residents and who, in the case of any craft or trade, possess or would be able to acquire promptly the necessary skills. The Secretary of the department in which the Coast Guard is operating may waive the requirements of this subsection in the interest of national security or economic efficiency.

(2) As used in this subsection, the term "local resident" means an individual within daily commuting distance even if not a resident of the State which has an unemployment rate in excess of the national average rate of unemployment (as determined by the Secretary of Labor), in accordance with paragraph (1) of this subsection.

MARITIME DEFENSE ZONE

SEC. 6. Section 2 of title 14, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", including the fulfillment of Maritime Defense Zone command responsibilities".

BOAT SAFETY PROGRAM

SEC. 7. (a) Section 9503(c)(4) of title 26, United States Code, is amended—

(1) in subparagraph (A), by striking "45,000,000" each place it appears and inserting in lieu thereof "60,000,000" for Fiscal Year 1987 only and $45,000,000 for each Fiscal Year thereafter;" and (2) by adding at the end thereof the following:

"(E) DETERMINATION.—The amount of payments made under this paragraph after October 1, 1986 shall be determined by the Secretary in accordance with the methodology described in the Treasury Department's Report to Congress of June 1986 entitled 'Gasoline Excise Tax Revenues Attributable to Fuel Used in Recreational Motorboats.' Further, a portion of the payments made by the Secretary from Fiscal Year 1987 motorfuel excise tax receipts shall be used to increase the funding for boating safety programs during Fiscal Year 1987 only."

(b) Section 13106(c) of title 46, United States Code, is amended by striking "one-third" and inserting in lieu thereof "one-half for Fiscal Year 1987 and one-third for each Fiscal Year thereafter."

(c) Section 13106(a) of title 46, United States Code, is amended by striking "two-thirds" and inserting in lieu thereof "one-half for Fiscal Year 1987 and two-thirds for each Fiscal Year thereafter".

(d) Before making any allocation under this section for a fiscal year, the Secretary shall retain not less than one percent nor more than two percent of the amount appropriated for that year for State recreational boating safety programs for the payment of costs of administration of this chapter.

PAYMENT OF INTEREST TO COAST GUARD AUXILIARY

SEC. 8. Section 830 of title 14, United States Code, is amended—

(1) by inserting "(a)" before "Appropriations"; and

(2) by adding at the end thereof the following:

"(b) The Secretary may pay interest on a claim under this section in any case in which a payment authorized under this section is not made within 60 days after the submission of the claim in a manner prescribed by the Secretary. The rate of interest for purposes of this section shall be the annual rate established under section 6621 of the Internal Revenue Code of 1954.".

USE OF COAST GUARD AUXILIARY

SEC. 9. (a) It is the sense of the Congress that the Coast Guard Auxiliary performs a broad range of services in behalf of the safety and security of the American people, and that the continued strength and vitality of the Coast Guard Auxiliary is important to the United States.

(b)(1) The Secretary of Transportation shall investigate and submit to the Congress a report within 1 year after the date of enactment of this Act regarding—

(A) the extent to which membership of the Coast Guard Auxiliary has declined in recent years and the causes of such decline;

(B) the effect, if any, on the maritime community of any such decline in the performance levels of the Coast Guard Auxiliary in the areas of life-saving, assistance to persons in distress, safety patrols and inspections, and support missions for the Coast Guard; and

(C) the effect, if any, of the Coast Guard's nonemergency assistance policy on the overall effectiveness of the Coast Guard Auxiliary.

(2) The report submitted by the Secretary under this section shall include such recommendations for legislative and administrative action as the Secretary considers appropriate to achieve and maintain the Coast Guard Auxiliary at its optimum strength.

MISCELLANEOUS AMENDMENTS TO TITLE 14 AND TITLE 46

SEC. 10. (a)(1) The analysis of parts, before section 1 of title 14, United States Code, is amended by striking

"II. Coast Guard Reserve and Auxiliary ..... 751"

and inserting in lieu thereof

"II. Coast Guard Reserve and Auxiliary ..... 701".

(2) The analysis of chapters of part II of title 14, United States Code, is amended by striking

"21. Coast Guard Reserve ..... 751"

and inserting in lieu thereof

"21. Coast Guard Reserve ..... 701".

(3) Section 82 of title 14, United States Code, is amended by striking "Federal Aviation Act of 1958, as amended (49 U.S.C. 1301 et seq.)" and inserting in lieu thereof "Fed-

eral Aviation Act of 1958 (49 App. U.S.C. 1301 et seq.)".

(4) Section 91 of title 14, United States Code, is amended to read as follows:

"§ 91. Safety of naval vessels

"(a) The Secretary may control the anchorage and movement of any vessel in the navigable waters of the United States to ensure the safety or security of any United States naval vessel in those waters.

"(b) If the Secretary does not exercise the authority in subsection (a) of this section and immediate action is required, the senior naval officer present in command may control the anchorage or movement of any vessel in the navigable waters of the United States to ensure the safety and security of any United States naval vessel under the officer's command.

"(c) If a person violates, or a vessel is operated in violation of, this section or a regulation or order issued under this section, the person or vessel is subject to the enforcement provisions in section 13 of the Ports and Waterways Safety Act (33 U.S.C. 1232).".

(5) Section 146 of title 14, United States Code, is amended by striking "Postmaster General" and inserting in lieu thereof "United States Postal Service".

(6)(A) Sections 431, 433, 434, and 438 of title 14 United States Code, are repealed, except that the repeal of such sections shall not affect rights and duties that matured, penalties that were incurred, and proceedings that were begun under such sections before the date of enactment of this Act.

(B) The analysis of chapter 11 of title 14, United States Code, is amended by striking the items relating to sections 431, 433, 434, and 438.

(7) Section 432(g) of title 14, United States Code, is amended—

(A) by inserting "(1)" immediately after "(g)"; and

(B) by striking the last paragraph and inserting in lieu thereof the following:

"(2) The additional compensation authorized by this subsection shall be included in any computation of compensation under section 6 of the Act of June 20, 1918 (33 U.S.C. 763).".

(8) Section 829 of title 14, United States Code, is amended by striking "Section" and inserting in lieu thereof "section".

(9) The first section of the Act entitled "An Act to require authorization for certain appropriations for the Coast Guard, and for other purposes", approved June 21, 1963 (77 Stat. 68; 14 U.S.C. 92, note), is repealed.

(b)(1) Section 2101(11b) of title 46, United States Code, is amended by inserting "freezing," immediately after "icing,".

(2)(A) Chapter 75 of title 46, United States Code, is amended by adding at the end the following new section:

"§ 7504. Travel and expense reimbursement

"When a requirement to qualify for the issuance of, or endorsement on, a certificate, license, or document under this part is administered at a place at the request of an applicant or an applicant's representative, the applicant or representative may reimburse the Secretary for the travel and subsistence expenses incurred by the personnel assigned to perform the administration of the requirement. Amounts received as reimbursement under this section shall be credited to the appropriation for operating expenses of the Coast Guard.".

(B) The analysis of chapter 75 of title 46, United States Code, is amended by adding at the end the following:

"7504. Travel and expense reimbursement.".

(3) Section 10101(1) and (3) of title 46, United States Code, is amended by striking "owned by a citizen of the United States".

(4) Sections 10313(e) and (h), 10314(e), 10504(a), and 10505(d) of title 46, United States Code, are amended by striking the last sentence.

(5) Section 10504(d)(3) of title 46, United States Code, is amended by striking "(except a vessel taking oysters)".

MANNING REQUIREMENTS OF MOBILE OFFSHORE DRILLING UNITS

SEC. 11. (a) Section 2101 of title 46, United States Code, is amended by inserting immediately after paragraph (15) the following:

"(15a) 'mobile offshore drilling unit' means a vessel capable of engaging in drilling operations for the exploration or exploitation of subsea resources.".

(b) Section 8101(a) of title 46, United States Code, is amended to read as follows:

"(a) The certificate of inspection issued to a vessel under part B of this subtitle shall state the complement of licensed individuals and crew (including lifeboatmen) considered by the Secretary to be necessary for safe operation. A manning requirement imposed on—

"(1) a sailing school vessel shall consider the participation of sailing school instructors and sailing school students in the operation of that vessel; and

"(2) a mobile offshore drilling unit shall consider the specialized nature of the unit.".

(c) Section 8701(a) of title 46, United States Code, is amended—

(1) by striking "and" at the end of paragraph (6);

(2) by striking the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(8) a mobile offshore drilling unit with respect to individuals, other than crew members required by the certificate of inspection, engaged on board the unit for the sole purpose of carrying out the industrial business or function of the unit.".

(d) Section 8301(c) of title 46, United States Code, is amended by inserting ", a mobile offshore drilling unit when on location"; immediately after "vessel".

TOWING LICENSE

SEC. 12. (a) Section 8904 of title 46, United States Code, is amended—

(1) by inserting "(a)" immediately before "A towing"; and

(2) by adding at the end thereof the following:

"(b) A vessel that tows a disabled vessel for consideration shall be operated by an individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.".

(b) The amendments made by subsection (a) of this section shall take effect on January 1, 1988.

FORFEITED VESSELS

SEC. 13. (a) Whenever a vessel is forfeited to the United States, the vessel may be donated, in accordance with procedures under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.), to an educational institution with a commercial fishing vessel safety program or other vessel safety, education and training program, if the institution has certified to the Federal officer referred to in subsection (b) of this section that the program includes at a minimum the following courses in vessel safety;

(1) vessel stability;

(2) firefighting;

(3) shipboard first aid;

(4) marine safety and survival; and

(5) seamanship and rules of the road.

(b) The donation of a vessel under this section shall be made on terms and conditions considered appropriate by the Federal officer making such donation, including requirements that—

(1) the educational institution must accept the vessel as is, where it is, and without warranty of any kind and without any representation as to its condition or suitability for use;

(2) the educational institution shall be responsible for maintaining the vessel;

(3) the vessel shall be used only for instructing students in vessel safety education and training programs;

(4) if the vessel is eligible to be documented, it must be documented by the educational institution as a vessel of the United States under chapter 121 of title 46, United States, Code, and the requirements of paragraph (5) of this subsection shall be noted on the permanent record of the vessel;

(5) the educational institution must obtain the prior approval of the Administrator of General Services before disposing of the vessel, and any proceeds from the disposal of the vessel shall be payable to the United States Government; and

(6) the vessel shall be inspected or regulated in the same manner as a nautical school vessel under chapter 33 of title 46, United States Code.

(c) The United States shall not be liable in an action arising out of the transfer or use of a vessel that has been transferred under this section.

(d) Section 2101(17) of title 46, United States Code, is amended by inserting immediately before the period the following: "or an educational institution under section 13 of the Coast Guard Authorization Act of 1986".

(e) Section 3305(c) of title 46, United States Code, is amended by inserting immediately after "school" the second place it appears the following: "or by an educational institution under section 13 of the Coast Guard Authorization Act of 1986".

LIMITATION ON TRAINING

SEC. 14. Notwithstanding any other provision of law, no training or course of instruction may be provided by the Coast Guard to employees of the government or to members of the armed services of the Republic of South Africa during fiscal year 1987.

STATUS REPORTS ON POLAR ICEBREAKIIG VESSELS

SEC. 15. The Secretary of the department in which the Coast Guard is operating shall provide detailed reports to Congress concerning the status of design and construction plans for the procurement of at least two new polar icebreaking vessels. Such reports shall be included in the Cutter Plan required annually by section 663 of title 14, United States Code, and shall be submitted each year until at least two new polar icebreaking vessels have been delivered to the Coast Guard.

VESSEL SAFETY

SEC. 16. Section 4102 of title 46, United States Code, is amended by adding at the end thereof the following:

"(e) Each uninspected fishing, fish processing, or fish tender vessel operating on the high seas shall be equipped with the number and type of emergency position in-

dicating radio beacons prescribed by regulation.".

PROSECUTIONS OF MARITIME DRUG TRAFFICKERS

SEC 17. The Act entitled "An Act to facilitate increased enforcement by the Coast Guard of laws relating to the importation of controlled substances, and for other purposes", approved September 15, 1980 (Public Law 96-350; 94 Stat. 1159) is amended by striking everything immediately after the enacting clause and inserting in lieu thereof the following:

"That this Act may be cited as the 'Maritime Drug Law Enforcement Act'.

"SEC. 2. The Congress finds and declares that trafficking in controlled substances aboard vessels is a serious international problem and is universally condemned. Moreover, such trafficking presents a specific threat to the security and societal well-being of the United States.

"SEC. 3. (a) It is unlawful for any person on board a vessel of the United States, or on board a vessel subject to the jurisdiction of the United States, to knowingly or intentionally manufacture or distribute, or to possess with intent to manufacture or distribute, a controlled substance.

"(b) For purposes of this section, a 'vessel of the United States' means—

"(1) a vessel documented under chapter 121 of title 46, United States Code, or a vessel numbered as provided in chapter 123 of that title;

"(2) a vessel owned in whole or part by—

"(A) the United States or a territory, commonwealth, or possession of the United States;

"(B) a State or political subdivision thereof;

"(C) a citizen or national of the United States; or

"(D) a corporation created under the laws of the United States or any State, the District of Columbia, or any territory, commonwealth, or possession of the United States;

unless the vessel has been granted the nationality of a foreign nation in accordance with article 5 of the 1958 Convention on the High Seas; and

"(3) a vessel that was once documented under the laws of the United States and, in violation of the laws of the United States, was either sold to a person not a citizen of the United States or placed under foreign registry or a foreign flag, whether or not the vessel has been granted the nationality of a foreign nation.

"(c)(1) For purposes of this section, a 'vessel subject to the jurisdiction of the United States' includes—

"(A) a vessel without nationality;

"(B) a vessel assimilated to a vessel without nationality, in acccordance with paragraph (2) of article 6 of the 1958 Convention on the High Seas;

"(C) a vessel registered in a foreign nation where the flag nation has consented or waived objection to the enforcement of United States law by the United States;

"(D) a vessel located within the customs waters of the United States; and

"(E) a vessel located in the territorial waters of another nation, where the nation consents to the enforcement of United States law by the United States.

Consent or waiver of objection by a foreign nation to the enforcement of United States law by the United States under subparagraph (C) or (2) of this paragraph may be obtained by radio, telephone, or similar oral or electronic means, and may be proved by certification of the Secretary of State or the Secretary's designee.

"(2) For purposes of this section, a 'vessel without nationality' includes—

"(A) a vessel aboard which the master or person in charge makes a claim of registry, which claim is denied by the flag nation whose registry is claimed; and

"(B) any vessel aboard which the master or person in charge fails, upon request of an officer of the United States empowered to enforce applicable provisions of United States law, to make a claim of nationality or registry for that vessel.

A claim of registry under subparagraph (A) may be verified or denied by radio, telephone, or similar oral or electronic means. The denial of such claim of registry by the claimed flag nation may be proved by certification of the Secretary of State or the Secretary's designee.

"(3) For purposes of this section, a claim of nationality or registry only includes:

"(A) possession on board the vessel and production of documents evidencing the vessel's nationality in accordance with article 5 of the 1958 Convention on the High Seas.

"(B) flying its flag nation's ensign or flag; or

"(C) a verbal claim of nationality or registry by the master or person in charge of the vessel.

"(d) A claim of failure to comply with international law in the enforcement of this Act may be invoked solely by a foreign nation, and a failure to comply with international law shall not divest a court of jurisdiction or otherwise constitute a defense to any proceeding under this Act.

"(e) This section does not apply to a common or contract carrier, or an employee thereof, who possesses or distributes a controlled substance in the lawful and usual course of the carrier's business or to a public vessel of the United States, or any person on board such a vessel who possesses or distributes a controlled substance in the lawful course of such person's duties, if the controlled substance is a part of the cargo entered in the vessel's manifest and is intended to be lawfully imported into the country of destination for scientific, medical, or other legitimate purposes. It shall not be necessary for the United States to negative the exception set forth in this subsection in any complaint, information, indictment, or other pleading or in any trial or other proceeding. The burden of going forward with the evidence with respect to this exception is upon the person claiming its benefit.

"(f) Any person who violates this section shall be tried in the United States district court at the point of entry where that person enters the United States, or in the United States District Court of the District of Columbia.

"(g)(1) Any person who commits an offense defined in this section shall be punished in accordance with the penalties set forth in section 101 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 960).

"(2) Notwithstanding paragraph (1) of this subsection, any person convicted of an offense under this Act shall be punished in accordance with the penalties set forth in section 1012 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 962) if such offense is a second or subsequent offense as defined in section 1012(b) of that Act.

"(h) This section is intended to reach acts of possession, manufacture, or distribution committed outside the territorial jurisdiction of the United States.

"(i) The definitions in the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802) apply to terms used in this Act.

"(j) Any person who attempts or conspires to commit any offense defined in this Act is punishable by imprisonment or fine, or both, which may not exceed the maximum punishment prescribed for the offense, the commission of which was the object of the attempt or conspiracy.

SEC. 4. Any property described in section 511(a) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881(a)) that is used or intended for use to commit, or to facilitate the commission of, an offense under this Act shall be subject to seizure and forfeiture in the same manner as similar property seized or forfeited under section 511 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881).".

AUTHORITY TO ISSUE CERTAIN CERTIFICATES

SEC. 18. Notwithstanding sections 12105, 12106, 12107, and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), as applicable on the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for the following vessels: Dunes Spirit, United States official number 690176; Kodiak Queen, United States official number 507891; La Reina, United States official number 230115; Northwind, United States official number 230147; and Wanderbird, United States official number 229607.

□ 1830

Mr. STUDDS (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. (Mr. GRAY of Illinois). Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Massachusetts?

Mr. YOUNG of Alaska. Mr. Speaker, reserving the right to object, and I will not object, I yield to the distinguished chairman of the Coast Guard Subcommittee for an explanation of this action.

Mr. STUDDS. Mr. Speaker, I thank the gentleman.

Let me just say to the Members that this is the basic Coast Guard authorization for the next fiscal year. It is in large measure identical to the bill which passed this House by a vote of 374 to nothing on May 6 of this year.

The bill is $48 million below the authorized level approved in that House-passed bill and the numbers are consistent with the administration's request and with the budget resolution.

There were some minor changes at the request of the Senate agreed in conference, or agreed between the two bodies, which I will go into if the gentleman wishes.

Mr. Speaker, this legislation authorizes funds for the Coast Guard for fiscal year 1987 at a level that reflects the conviction of the House that the Coast Guard should have the resources it needs to operate at a level the public expects and the national interest demands. The Coast Guard was last year forced to absorb reductions of approximately $140 million below a freeze budget, requiring it to cancel all routine patrols, and to cut back on training, on maintenance of equipment, and on small scale construction projects.

The enactment and implementation of this bill will restore the Coast Guard's muscle; it will permit the full use of the people and equipment the Coast Guard now has on hand, and it will put an end, for 1 year, at least, to further erosion in the size or capabilities of the service. This legislation was approved by the House on May 6 by a vote of 374 to 0.

In addition to the central question of funding, a number of important policy questions are addressed in the bill, as well. In particular, it will:

Reduce Coast Guard costs by making the administration of State boating safety programs entirely self-supporting;

Give the Secretary of Transportation the flexibility to transfer funds from one Coast Guard account to another in order to make the most efficient possible use of available resources;

Allow schools with fishing or other maritime safety programs to make use of vessels that have been confiscated in the drug trade; and it will

Extend Coast Guard licensing requirements to the operators of all commercial vessels that tow disabled recreational vessels.

There are several differences between the bill originally passed by the House and the bill approved by the other body. For example:

The House passed bill included a provision that prohibited the construction of Coast Guard vessels in foreign shipyards. The prohibition paralleled current law regarding the construction of naval vessels. This prohibition is not in the bill before us today. I want the record to reflect that I strongly opposed the deletion of this section and will do all I can to see that it is inserted in law at a future time.

The bill now contains a provision regarding contracting which is similar, but not identical to that in the House passed bill. It would require the Secretary of Transportation to identify those "core logistic functions" of the Coast Guard which are necessary to ensure that the Coast Guard can perform its missions in behalf of the security and economic well-being of the United States. Under this provision, these activities could not be considered for contracting by the private sector. The House passed bill also required that the Coast Guard's industrial activities at its shipyard in Curtis Bay, MD, and at the Aircraft Repair and Supply Center in Elizabeth City, NC, be included in the Secretary's list of core logistic functions. The bill before us today does not require that these two activities be specifically identified as core logistic functions. The absence of language specifically requiring that these activities be listed as core logistic functions, however, is not a substantive change in the legislation. It is the view of the House that the activities carried out at these two locations are, by their very nature, necessary for the maintenance of the Coast Guard's core logistics capability, and that language specifically identifying them as such would be redundant.

The bill approved by the other body provides for the U.S. documentation of several vessels that would otherwise be ineligible for documentation. It is the policy of the House Committee on Merchant Marine and Fisheries that foreign vessels not be allowed into our domestic trade unless there are extenuating circumstances that warrent such an action. This provision permits the documentation of two foreign-built vessels under circumstances that—in the view of the committee—would not ordinarily warrant an exception to normal practice.

The bill passed by the other body also requires that fishing vessels carry emergency locating devices, and it includes a provision that seeks to enhance the Coast Guard's ability to prosecute violations of drug laws in court.

But the fundamental purpose of this legislation is to restore the Coast Guard to full strength. This bill, in combination with the omnibus drug bill, the omnibus antiterrorism bill, and the appropriations legislation soon to become law will bolster the Coast Guard's personnel strength, provide adequate equipment, and guarantee the ability of the Coast Guard to meet the many challenges it will face in the years to come.

Mr. YOUNG of Alaska. Further reserving the right to object, Mr. Speaker, if I am correct, this is less than what the House passed on by about $58 million?

Mr. STUDDS. Mr. Speaker, the gentleman is correct. It is some $48 million below the authorizing level in the House-passed bill.

Mr. YOUNG of Alaska. It is about the money that was requested by the administration?

Mr. STUDDS. The gentleman is correct.

Mr. YOUNG of Alaska. Mr. Speaker, I rise in support of the consideration of the Coast Guard Authorization Act of 1986, H.R. 4208. This bill addresses certain Coast Guard budget and policy issues. These include funding for 1987, maritime safety, drug enforcement, and certain technical and conforming amendments in laws and programs administered by the Coast Guard.

In the technical amendments to title 46, U.S. Code, the term "freezing" is added to the list of activities in the definition of "fish processing vessel" that differentiate such a vessel from a fishing vessel. In making this change, we are clarifying that a vessel that freezes fish on board as part of normal operations qualifies as a fishing vessel for all purposes under title 46.

It is important that the Coast Guard receive an adequate and appropriate budget for fiscal year 1987. This bill provides funding that will ensure that the Coast Guard has the people and equipment to carry out its important missions of search and rescue, law enforcement, maritime safety, and military readiness. The Coast Guard is one of the most useful and cost-effective agencies that we have in our Government and deserves our support.

Mr. Speaker, I urge all of my colleagues to enact H.R. 4208.

Mr. WALKER. Mr. Speaker, will the gentleman yield just for a quick question?

Mr. YOUNG of Alaska. Further reserving the right to object, Mr. Speaker, I am glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Speaker, there is nothing in here that would be incompatible with the Coast Guard activities that are contemplated under the Drug Act that we passed in the House and in the Senate?

Mr. YOUNG of Alaska. No. In fact, I think it would be compatible.

Mr. WALKER. Mr. Speaker, I thank the gentleman.

Mr. YOUNG of Alaska. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Massachusetts?

There was no objection.

A motion to reconsider was laid on the table.

ESTABLISHING A UNITED STATES BOXING COMMISSION

Mr. BONIOR of Michigan. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 595 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 595

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2127) to establish a United States Boxing Commission, and for other purposes, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Education and Labor, and with thirty minutes to be equally divided and controlled by the chairman and ranking minority member of the Committee on Energy and Commerce, the bill shall be considered for amendment under the five-minute rule. In lieu of the amendments recommended by the Committees on Education and Labor and Energy and Commerce now printed in the bill, it shall be in order to consider an amendment in the nature of a substitute consisting of the text of the bill H.R. 5654, if offered by Representative Williams of Montana, as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may

have been adopted, and any member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the amendment in the nature of a substitute made in order as original text by this resolution. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore. The gentleman from Michigan [Mr. BONIOR] is recognized for 1 hour.

Mr. BONIOR of Michigan. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee, Mr. QUILLEN, pending which I yield to myself such time as I may consume.

House Resolution 595 is an open rule providing for consideration of H.R. 2127, a bill to establish a U.S. Boxing Commission. The rule provides for 1 hour of debate to be equally divided between the chairman and ranking minority member of the Committee on Education and Labor, and the chairman and ranking minority member of the Committee on Energy and Commerce.

After general debate, the bill shall be considered for amendment under the 5-minute rule.

In lieu of the amendments recommended by the Committees on Education and Labor and Energy and Commerce, which are now printed in the bill, the rule makes in order an amendment in the nature of a substitute consisting of the text of the bill H.R. 5654, if offered by Representative WILLIAMS of Montana. This amendment in the nature of a substitute shall be considered as an original bill for the purpose of amendment under the 5-minute rule.

The rule provides that each section of said substitute shall be considered as having been read.

Finally, the rule provides one motion to recommit, with or without instructions.

Mr. Speaker, this rule makes in order legislation that will help move us toward significant and long overdue reforms for the sport of professional boxing. The substitute to be offered represents a broad agreement between the two committees involved. It sets forth national minimum health and safety standards for the sport, but in no way infringes on the States' rights to regulate.

Mr. Speaker, I urge adoption of the rule, and support for this important legislation.

Mr. QUILLEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am sure that Congress is looking for a knockout blow and we have it in this bill.

Mr. Speaker, I have no requests for time, and yield back the balance of my time.

Mr. BONIOR of Michigan. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. QUILLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 337, nays 28, not voting 67, as follows:

□ 1845

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to House Resolution 595 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2127.

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2127) to establish a U.S. Boxing Commission, and for other purposes, with Mr. FLIPPO in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed with.

Under the rule, the gentleman from Montana [Mr. WILLIAMS] will be recognized for 15 minutes, the gentleman from Wisconsin [Mr. PETRI] will be recognized for 15 minutes, the gentleman from New Jersey [Mr. FLORIO] will be recognized for 15 minutes, and the gentleman from Kansas [Mr. WHITTAKER] will be recognized for 15 minutes.

The Chair recognizes the gentleman from Montana [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I am pleased to rise today in support of H.R. 2127, and later this evening will rise in support of a substitute amendment to this legislation.

The Congress this year recognizes more than a quarter of a century which has passed since the Congress first embarked on an effort to bring some needed, necessary, essential reform to the sport of boxing. The first Member of Congress to begin to move on necessary reform of this sport was former Senator Estes Kefauver. There have been numerous efforts to legislate on this matter during these past 26 years, and during those more than 2 decades something else has also occurred in boxing, and that is the death of almost 200 fighters as a result directly of injuries they have received in the ring.

This quarter of a century of attempted congressional action to reform boxing has witnessed a long and bitter litany of mismatched fights, needless injuries and a mounting toll of tragic ring deaths, as I say, almost 200, with countless unnecessary injuries added to that number of deaths.

Many people in the United States as well as many Members of the Congress ask why this sport needs the regulatory hand of the Federal Government, even lightly applied as this legislation and the substitute attempts to do. Across the country sports fans, including, or course, boxing fans, as well as Members of this House, have wondered what is it that is different about boxing that requires regulation there when it is not required for such sports as baseball or basketball or tennis. The difference is that boxing does not have leagues. Boxing does not have the type of structure that lends itself well to self-regulation, and the boxing community throughout the history of boxing has attempted to reform itself. Those have been promises year after year of self-regulation, but unfortunately, and through no particular fault of the boxing community, those promises have gone unfulfilled, again because of the structure of boxing and the fact that it is regulated by literally hundreds of various regulations across the country which does not allow real, necessary needed reform and since it does not permit the type of model health and safety standards that we need, particularly for the boxers who find their workplace to be in the prize-fighting arena.

I think it is a near certainty now that the Congress' attention has followed the attention of the American people to the necessity of meaningful reform on this sport, and that is what has brought the House tonight, in its final hours of this 99th Congress, to focus itself, at least in this House, if not in the entire Congress, on moving legislation which will be a major step in efforts to reform the sport.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Montana [Mr. WILLIAMS] has consumed 3 minutes.

The Chair recognizes the gentleman from Wisconsin [Mr. PETRI].

Mr. PETRI. Mr. Chairman. I yield myself such time as I may consume.

Mr. Chairman, I wonder if the gentleman from Montana would answer a question. I understand the gentleman and a number of his colleagues entered into a Dear Colleague letter describing a substitute that has generally been agreed to and seems like a good resolution of some of the controversy that at one time surrounded this bill.

Can the gentleman tell me if he is planning at some time in this hour to offer that substitute?

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. PETRI. I yield to the gentleman from Montana.

Mr. WILLIAMS. Mr. Chairman, I will offer the substitute when the gentleman's side and our side have finished what I think will be a limited general debate.

Mr. PETRI. Mr. Chairman, I have no requests for time, and I yield my time to the gentleman from Kansas [Mr. WHITTAKER] of the Committee on Energy and Commerce.

The CHAIRMAN. Without objection, the gentleman from Wisconsin [Mr. PETRI] yields his time to the gentleman from Kansas [Mr. WHITTAKER].

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from New Jersey [Mr. FLORIO].

Mr. FLORIO. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 2127, a bill to establish a U.S. Boxing Corporation.

Mr. Chairman, since 1918 an estimated 449 boxers have died as a result of injuries received in the ring. Legislation that would have begun to address this problem was defeated on the House Floor 2 years ago when opponents claimed, wrongly I might add, that the bill would lead to Federal regulation of professional sports.

Mr. RICHARDSON's bill that is before us now is also a voluntary approach to this problem. It does not regulate boxing, nor does it in any way affect the ability of States or localities to regulate boxing.

Instead, it simply provides a mechanism by which uniform health and safety standards may be developed and provides incentives to comply with those standards.

I think this approach makes sense, and I congratulate our colleagues BILL RICHARDSON of New Mexico and PAT WILLIAMS of Montana, the two principal sponsors of boxing reform legislation, for their good work. Through their skillful and tireless efforts we have reached agreement on a bill that I believe will make professional boxing a much safer sport.

The key elements of this agreement include provisons that would:

Ensure the establishment of national minimum health and safety standards which the States could then implement through their own regulatory mechanisms;

Set up a computerized national data registry to track health and other information on boxers and other key individuals involved in boxing;

Provide for the certification of professional boxers and others involved in the sport; and

Establish a national entity to be known as the U.S. Boxing Corporation with a board of 12 members.

Mr. Chairman, it is our hope and expectation that the States will choose to comply with these guidelines in order to bring greater uniformity to the health and safety standards applicable to professional boxing. Currently, 42 States and the District of Columbia have athletic commissions which regulate both amateur and professional boxing. Kansas, North Carolina, Nebraska, and Oregon regulate boxing at the local level only. Colorado, Oklahoma, South Dakota, and Wyoming do not regulate professional boxing at all.

Finally, Mr. Chairman, this bill is supported by boxing promoters, State commissioners, and others involved in the sport. We believe it is long overdue

and can be the beginning of true reform in professional boxing that we all seek.

□ 1905

Mr. Chairman, I reserve the balance of my time.

Mr. WHITTAKER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, today we are considering H.R. 2127, establishing the U.S. Boxing Commission. I am opposed to this legislation because it is inappropriate for the Federal Government to be involved in professional sports.

An agreement has been reached between the proponents of this legislation on the Energy and Commerce Committee and those on the Education and Labor Committee. As I understand it, that agreement has been introduced as H.R. 5654 and will be offered today as an amendment in the nature of a substitute. Although that substitute improves on the current form of H.R. 2127, it does not resolve the fundamental problem I have with the legislation—which is the issue of Federal involvement in a professional sport.

Professional and amateur sports traditionally have been self-policing. Amateur boxing has been self-regulated successfully by the United States of America Amateur Boxing Federation [USA/ABF]. This federation is a nonprofit organization that has jurisdiction over the administration, eligibility, sanctioning, representation, and rules of competition for men's amateur boxing in the United States. The USA/ABF is also a central source of data for amateur boxing.

Professional boxing has not been shown to have special problems warranting Federal intervention. The public can hold professional boxing accountable by refusing either to attend matches or to watch television.

Mr. Chairman, I yield 3 minutes to our minority whip for some very momentous and sobering thoughts.

Mr. LOTT. Mr. Chairman, I had hoped for a more propitious moment in which to offer this lament "On the Fall of the House," but somehow or other, perhaps this seems like an appropriate time. I know the gentlemen who are involved with this boxing commission are very sincere and dedicated, but it really strikes me as somewhat humorous, I guess, in a tragic sort of way that here, on what may be one of the last 3 or 4 nights or so of this session, we are involved in a discussion of a boxing commission that would impose itself over State laws, I guess; but at any rate we are getting into a boxing commission.

We were supposed to have ended this session about 2 weeks ago, and I have been scratching my neck sort of wondering, how we ever end it. Have we lost our ability to even adjourn any more?

I want to thank the distinguished majority whip for showing up for this effort, and I am sure he has now prepared some responding, corresponding poetry.

It seems that all the Members are singing the tune, "We've Got to Get Out of This Place," while the majority leadership is singing a different tune called, "Never Can Say Good-bye."

I've even tried to follow that old Indian advice of walking a mile in Democrat moccasins. And, I think as a result of that little exercise in empathy, I have come up with an explanation for all our slow-motion madness.

I have taken the trouble of couching that explanation in a poem written from the viewpoint of the majority leadership. My poem is entitled, "A Democratic Leadership Lament on the Fall of the House." Here's how it goes:

A DEMOCRATIC LEADERSHIP LAMENT ON THE FALL OF THE HOUSE

(By Congressman Trent Lott)

(IN EMPATHY)

We're leaving, Yes, We're leaving,
But we can't quite bring the gavel down;
It's Fall, and we are grieving,
'Cause we can't quite leave this crazy town.

We're adjourning, yes, adjourning,
But we can't quite finally say good-bye;
It's Fall, and leaves are turning,
But we can't quite pass a sine die.

We're continuing, yes, continuing,
This Government from day to day;
It's Fall, and we're opinioning,
On just how this House will get away.

We're procrastinating, yes, procrastinating,
On just how to close this silly place;
It's Fall, we're fast deflating,
All the egos that have a campaign race.

They're running, yes, they're running,
For reelection to the House next year;
It's Fall, and we're so cunning,
To keep all those bad Republicans here.

But wait now, that's not so great now,
We've got Democrats out on that campaign trail;
It's Fall, and getting late now,
What if our little party plot should fail?

So, we're quitting, yes, we're quitting,
To go home and beat the Reagan band;
It's Fall, and we'll be hitting,
Their contribution to this land.

Mr. FOLEY. Mr. Chairman, will the gentleman yield?

Mr. WHITTAKER. I yield to the gentleman from Washington.

Mr. FOLEY. Mr. Chairman, I am not going to make an extended reply to the distinguished gentleman from Mississippi [Mr. LOTT].

I think it may be called the commendable first effort.

But I would not advise him on a midlife change of career.

Mr. WHITTAKER. Mr. Chairman, I reserve the balance of my time.

Mr. FLORIO. Mr. Chairman, I yield 4 minutes to the principal cosponsor of the bill, the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. Mr. Chairman, I would like to thank you for allowing the consideration of H.R. 2127, a bill to establish a United States Boxing Commission. I would like to extend a special thanks to Congressman JIM FLORIO, who shares my interest in boxing and who has assisted me with this legislation in every way possible. I would also like to thank my colleagues PAT WILLIAMS and JACK FIELDS, who have been working with us for the last 2 years to come up with the legislation we are considering here today.

Mr. Chairman, Gil Clancy, veteran exboxing manager and CBS boxing sportscaster had this to say when asked about H.R. 2127.

Boxing is a healthy sport today because cable TV has helped bring boxing to many homes, but things can't stay that way for long if there isn't a national board. * * * States like Nevada, New Jersey and California are working together to bring some order within the sport. But we need to standardize not only safety and officiating rules but everything else in pro boxing.

H.R. 2127, a bipartisan compromise, would establish the United States Boxing Commission, a federally chartered, private nonprofit corporation—the U.S. Olympic Commission is similarly chartered and organized.

Mr. Chairman, over 460 professional boxers have died in the ring. Countless others have been seriously injured and incapacitated. While the Muhammed Ali's and the Marvin Hagler's of the world have the money and managers to hire the best ringside physicians and to provide for themselves and their families should they have to retire from the ring, many boxers are very young, poor, and have few educational opportunities—boxing is a way out for them, but the current disorganization and lack of uniform health and safety standards make it a dangerous way out.

The nonsystem for professional boxing provides young boxers with additional pitfalls. Boxing is regulated in 42 States and localities—some States have no regulations, others only license boxers—many provide boxers with no guidance or protections at all. A boxer can fight in Texas, get knocked out, go to New Mexico the next day and fight again—endangering his own health, the health of others, and, utimately, the health of the sport itself.

In the 98th Congress, the AMA endorsed the establishment of a national commission to establish minimum health and safety standards for professional boxing. When Congress failed to act, the AMA called for an outright ban on boxing. I think I am speaking for most of my colleagues when I say this is too extreme a measure—boxing is big business, has a very large following in the country and provides many young men, many from Hispanic and black neighborhoods,

with a way out. But I also think most of my colleagues would agree that boxing needs to be cleaned up.

In the 99th Congress, bills have been introduced which range from an outright ban of professional boxing to total Federal regulation of the sport—we feel H.R. 2127, with the changes incorporated into a friendly substitute to be offered by Mr. WILLIAMS, achieves the middle ground between these two extremes. While the Commission would be chartered by the Federal Government, it would not be run by it or provide for Federal regulation of the sport in any way—participation by States and individuals would be entirely voluntary. The bill deals strictly with health and safety standards—it does not promote fights, rank boxers or get involved in business that is the legitimate purview of promoters, broadcasters, boxing organizations, or States; this bill would, in no way, preempt State authority—it would assist the States and, in fact has been endorsed by the State Boxing Commissioners. Also, there would be no authorization of Federal funds under the compromise worked out between the Education and Labor and Energy and Commerce versions of the bill.

While this bill accomplishes many purposes, the most important purpose it accomplishes is to set up an effective framework to improve the health and safety standards for professinal boxers everywhere.

Mr. Chairman, the very nature of the sport of boxing points to the need for a centralized organization, charged solely with the health and safety of boxers. Existing boxing organizations promote fights and rank boxers—it seems inappropriate that these organizations also be responsible for maintaining health and safety standards. Further, the myriad of State and local boxing regulations make it possible for boxers to move from State-to-State, and match-to-match, endangering their own health and the health of others.

Again, this bill has been endorsed by the association of State Boxing Commissioners and has broad support within the boxing community. I believe this to be an important and timely bill and urge my colleagues to support it.

(1) What this bill does:

Both the original bill and the substitute establish a federally chartered, private nonprofit corporation to establish minimum health and safety standards for professional boxing.

Original bill calls it the United States Boxing Commission, substitute calls it the United States Boxing Corporation.

Point: This is not Federal regulation of boxing.

It sets up an organization similar to the U.S. Olympic Commission. Participation in the organization is entirely voluntary.

Point: Why this bill is needed?

To those who ask why the Federal Government should be involved in sports in any way—boxing is regulated on a State-by-State basis. Eight States have no regulation of the sport at all. This causes real health problems as boxers can go from State to State, and participate in fights which may endanger both themselves and others in the ring. A centralized organization is needed although Federal regulation is not the way to go. This bill would allow the sport to regulate itself and simply provides the sport with the organizational framework and gentle nudge it needs to regulate itself.

(2) Purposes of the organization.

Commission would do the following:

A. propose rule changes in ensure safety of participants

B. establish a uniform set of rules which may be adopted by various State boxing authorities

C. establish minimum standards for physical and mental examinations, medical standards at ringside

D. provide for voluntary life, accident and health insurance fund for professional boxers and others in the boxing community

Note: this does not mean the Corporation will pay for—only that it will assist in organizing and establishing one

E. research and establish minimum standards for boxing equipment

F. conduct discussions and enter into agreements with foreign boxing communities on methods for applying minimum health and safety standards

G. assist States in achieving minimum health and safety standards.

H. prescribe standards for the making of contracts, agreements, arrangements, and understanding pertaining to bout agreements between boxers and promoters.

(3) Corporation would also provide grants to States to Assist State boxing commission or appropriate entities in establishing and maintaining model State boxing commission standards. Funds raised for this purpose and the dispensing of these funds would be the responsibility of the corporation.

(4) Certification.

Corporation would certify boxing professionals and States as having met minimum health and safety standards established by the USBC. Corporation would maintain a central information system to assist them in this certification process. These features are essential to the organization and its ability to maintain minimum health and safety standards.

Certification provisions had the strongest support from boxers, promoters, State commissioners and business interests and are viewed as essential to the success of the voluntary organization they give it its teeth.

(5) Decertification.

Corporation would have the authority to decertify those who do not comply with the minimum health and safety standards established by the Commission—this provision is viewed by the boxing community both State commissions and promoters, to be crucial to the success of the voluntary approach.

Note: The decertification would be in effect for a minimum of 6 months—everyone at the meeting wanted to ensure that it had punch and was not a simple slap on the wrist.

(6) Makeup of the Commission.

Makeup of the Commission is as follows:

Eight voting members appointed by the President from lists of six per slot supplied in equal numbers by the Speaker of the House and the majority leader in the Senate, as follows:

Two acting State commissioners (at time of appointment).

Two current participants in the sport (could be managers, boxers, referees, et cetera.)

Four persons, with an interest in the sport but no current financial interest.

One voting member appointed exclusively by the President with no financial interest in the sport.

Total of nine voting members—four from House lists, four from Senate lists, one from President, exclusively.

Three nonvoting members.

One media representative.

One amateur.

One foreign representative.

All appointed by the President exclusively so essentially, President gets four, House gets four, Senate gets four.

The Chairman of the Corporation is elected by the Board. Chairman may have no financial interest.

Bill gives those with no financial interest a controlling vote—there are five voting with no financial interest—on the Corporation and at the same time allow for the input of current participants in the sport.

Board members are appointed for 5-year terms. It is the intent that, when appointed, State commissioners be acting State commissioners. If, over the course of their tenure on the corporation, they cease to be acting State commissioners, you intend that they be allowed to finish their term.

(7) Support for the bill.

Bill has the support of the State Boxing Commissioners Association [the ABC] and was endorsed by them. You have worked with promoters, managers, networks, et cetera. To get a consensus—the substitute accomplishes this. Networks have voiced no objections. Has bipartisan support in the Congress.

(9) No use of Federal funds in the bill.

(10) Additional views, dissenting views.

In the substitute, many of the problems filed as additional views have been taken care of—dropping the Members of Congress as ex officio members.

Also, many objected to Federal funds being used—this is taken care of in the WILLIAMS' substitute.

(11) Bill would not rank boxers, promote fight or interfere with broadcast contracts.

(12) Bill and the substitute would prohibit the certification of promoters, managers and matchmakers who have served in prison for more than a year. Provision is not retroactive (grandfather clause) and does not apply to boxers. This was done because the business end of the sport needs to be cleaned up.

The reason why the bill says one year and not felony is because there is no consistent definition of felony in the 50 States. Also there are no consistent definitions of types of crimes—that is, manslaughter—and no consistent definition of moral turpitude.

(13) International participation.

Bill includes nonvoting international boxing representation and empower the Corporation to work out agreements on the health and safety standards with foreign boxing entities.

(14) Audit and report to Congress.

Comptroller General shall audit the organization annually—this is how conflict of interest in fundraising could be carefully monitored.

USBC's annual report shall include information about progress of the States, the organization and the results of GAO's audit.

Substitute requires that the report be submitted to Congress—does not specify which committees.

(15) Salaries.

The substitute limits salaries and per diem of Corporation members and staff so that the bulk of this money can go to grants to States.

Chairman receives a salary of no more than $72,000 per year.

Other Board members receive per diem of no more than the equivalent of $55,000 per year (no salary) and expenses.

Staff can receive salary of no more than $55,000 per year.

□ 1915

Mr. WHITTAKER. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. FIELDS].

Mr. FIELDS. Mr. Chairman, I rise in support of H.R. 2127, a bill to establish the United States Boxing Commission.

I have been intensively involved in the refinement of this legislation for the past year. I am very pleased to see all of the months of negotiation culminating in floor consideration prior to the adjournment of the 99th Congress.

Mr. Chairman, in the past, legislation which sought to deal with the acknowledged problems in the sport of professional boxing was fraught with controversy over the appropriate role, if any, of the Federal Government in the conduct of a professional sport. Specifically, past legislation was opposed due to concerns that it would regulate boxing. H.R. 2127 does not regulate boxing.

Critics of a Federal role in professional boxing have pointed to the lack of such a role in the conduct of other professional sports. I submit to my colleagues that the state of professional boxing warrants special consideration at the Federal level.

From 1972 to 1984, 78 professional boxers in the United States died from injuries incurred during matches. Many in the sport feel this situation exists because there are no uniform health and safety standards. Consequently, there are no means to adequately assess the health history and status of boxers in a consistent way.

Colleagues, I wish that this legislation were not necessary. But, I sincerely believe that it is. I am not one who generally advocates Federal intervention into business operations, nor do I generally advocate a governmental role where the appropriate actor is the private sector. However, all past efforts by those involved in professional boxing to form an active national leadership body to focus on health and safety issues have failed.

What has been needed is something on the order of the National Football League or the National Basketball Association to at least develop uniform health and safety standards to be adopted at the State and local levels.

I know that some of my colleagues fundamentally are opposed to this legislation. However, H.R. 2127 should silence the critics of past boxing commission legislation that was characterized by a Federal Government regulatory role, for H.R. 2127 does not regulate boxing. Rather, the legislation creates a federally chartered, voluntary corporation to provide leadership in the development of uniform health and safety standards in professional boxing.

BILL RICHARDSON, PAT WILLIAMS, and I have worked intensively on H.R. 2127 to address many of the concerns that have been raised about the bill. I believe that we have come a long way in allaying most of the concerns that were brought to our attention.

This is evident upon examining the amendment in the nature of a substitute that will be offered by Mr. WILLIAMS. My colleagues will note that the substitute no longer contains an authorization for appropriations, which was a point of controversy. Additionally, the board of directors will not include Members of Congress in either voting or nonvoting positions.

In conclusion, Mr. Chairman, I reiterate my unwavering support of H.R. 2127 and urge my colleagues to join me in voting for this legislation.

Mr. WHITTAKER. Mr. Chairman, I reserve the balance of my time.

Mr. FLORIO. Mr. Chairman, I yield 2 minutes to the gentleman from Pennsylvania [Mr. YATRON].

Mr. YATRON. Mr. Chairman, several years ago, I had the honor of speaking before the National Veteran Boxers Association. It was attended by retired and active boxers, 3 former world champions, trainers, doctors, sports writers, and many others who love the sport of boxing.

Everyone at the conference supported the establishment of a National Boxing Commission and felt it would be very beneficial for the fighters and the sport itself.

I certainly agree and want to express my appreciation to my distinguished colleague from Montana, PAT WILLIAMS, for all his hard work and commitment to this idea.

I also thank my distinguished colleague from New Jersey, Mr. FLORIO, for managing this legislation today.

I know a United States Boxing Commission will help keep fighters healthier and safer and I know it will also be a very good thing for the sport itself.

I hope all my colleagues will join in supporting the creation of the United States Boxing Commission.

Mr. WHITTAKER. Mr. Chairman, I yield 2 minutes to the gentleman from Florida [Mr. BILIRAKIS].

Mr. BILIRAKIS. I thank the gentleman for yielding time to me.

Mr. Chairman, even though the bill before us tonight establishing a U.S. Boxing Commission is much better than the one reported out by the House Energy and Commerce Committee on which I serve, I still am compelled to speak out against it. Yes, the Education and Labor Committee has shown the wisdom of knocking out the authorization for $750,000 for fiscal years 1987 and 1988, which was provided in the original bill. I spoke against this bill in committee for several reasons: First, being the cost, and second, whether the Federal Government needs to be involved in professional boxing. I don't think so. Every time we turn around there is a new idea for a Federal commission. When will we wise up to the continuing encroachment of the Federal Government into our lives? Just a few weeks ago I offered an amendment on this floor during debate on the drug bill to knock out a fully federally funded commission to study recruiting practices and the impact of television on college athletes. Enough is enough.

The other body in its deliberations chose to do what the House refused to do and that was to strike the college commission. I would urge my col-

leagues to vote against this new commission before us tonight. The bottom line is that we ask ourselves whether the Federal Government needs to be involved in any way with professional boxing. If this passes, I have no doubt that the next commission will be to study, under the guise of improved foreign relations, polo players and the injuries sustained by the horses and players. I might add that there is nothing in this bill that prevents this commission from subsequently coming to the Congress for an appropriation.

My colleagues, let's vote down this further intrusion by the Federal Government.

Mr. WILLIAMS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, there is obviously at least some minsunderstanding about this bill. First, this does not create a Federal commission. There is no commission under this bill. Second, there is no Federal authority being created at all under this bill. So, there is not a Federal commission. There is no Federal authority.

This is not Federal regulation.

This simply creates a corporation of boxing people who create a board and if your State boxing commission wants to voluntarily join that corporation and they vote to do so, they simply come under the minimum health and safety standards that that corporation establishes. But do not make the mistake that this is the heavy hand of the Federal Government and you are voting for or against creating a Federal boxing commission.

That is not what this bill is all about.

Mr. Chairman, I reserve the balance of my time.

Mr. WHITTAKER. Mr. Chairman, I yield such time as he may consume to the gentleman from Pennsylvania [Mr. RITTER].

Mr. RITTER. Mr. Chairman, I rise in support of H.R. 2127, establishing a U.S. Boxing Commission. An agreement has been reached between the supporters of this legislation on the Committee on Energy and Commerce and the Committee on Education and Labor. That agreement has been introduced as H.R. 5654 and will be offered as an amendment in the nature of a substitute to H.R. 2127. I was involved in the negotiations on the substitute and I support that substitute.

The Subcommittee on Commerce, Transportation, and Tourism has held a series of hearing on this issue over the past few years which have demonstrated the need for this legislation.

During the last several years, there have been a number of tragic ring-related deaths and injuries, which have raised questions about the effectiveness of the present system for protecting the health and safety of professional boxers. After reviewing the present system, it is apparent that there is no uniform or centralized system of regulation.

Additionally, there is no central method of collecting information on injury or ring records, in professional boxing. This makes it difficult, if not impossible, for authorities to implement and enforce uniform standards.

The legislation we are considering today will correct this situation. The amendment in the nature of a substitute that will be offered establishes a nonprofit corporation to be known as the U.S. Boxing Corporation. This corporation will:

First, establish a uniform set of rules for professional boxing that may be adopted by the States;

Second, provide a national computer source for the collection of data pertinent to professional boxing;

Third, certify as meeting the minimum standards those persons having a role in professional boxing;

Fourth, establish a grant program to encourage compliance by States with standards established by the commission; and

Fifth, review "bout" agreements between boxers and promoters.

Some of my colleagues have argued that there is no need for such a commission. They have argued that boxing should follow the precedents of self-regulation established by football, baseball, and other sports. There are, however, fundamental differences between professional boxing and other sports.

Professional football and baseball players are usually recruited from colleges and universities. Professional boxer often have not had opportunities to obtain a higher education. They do not have the protection provided by the guidance of athletic coaches. Professional boxers are often young men who by pursuing a career in boxing, are taking advantage of one of the few opportunities they have to excel. It is important that there be a uniform system of State laws and regulations protecting such young boxers.

There are many issues involved when one considers how or whether to regulate an activity where men choose willingly to fight and others choose willingly to watch. But I believe that at a minimum, there should be an attempt made to establish uniform standards and conditions under which boxing matches are fought and promoted.

The legislation we are considering today strikes the delicate balance necessary to maintain the proper Federal and State relationship appropriate for regulating professional boxing. It establishes a federally chartered nonprofit corporation to coordinate States' efforts to regulate professional boxing. However, States' participation in the corporation is voluntary.

The States have many incentives to participate in such a corporation. By providing uniform health and safety standards, it will decrease the number of boxing related injuries and deaths. In fact, the States have expressed their support for this legislation through the Association of Boxing Commissioners, which represents 37 States.

Additionally, boxers, including Louis Rodriquez who is a former professional boxer from Pennsylvania, promoters and managers have testified before the subcommittee in support of the legislation.

H.R. 2127, as amended, will not only improve the regulation of professional boxing, but it will also improve its image in the public eye. I believe this legislation is necessary and urge my colleagues to vote in favor of it.

Mr. WHITTAKER. Mr. Chairman, I have one last request for time. In the spirit of bipartisanship, I yield 4 minutes to the gentleman from Illinois [Mr. SAVAGE].

Mr. SAVAGE. Mr. Chairman, let me first say that I think the purpose of this proposed legislation is indeed commendable, and most of what it proposes, I think, is very necessary. It recognizes some serious problems. However, it also does some things that I want to bring to your attention which will explain why I, who have at one time been associated with the sport, oppose it and urge my colleagues to do so. It goes far beyond what it needs to do.

Let me give you some examples from the bill. It says—and it does, incidentally, create a U.S. Boxing Commission which involves our Government because some of the directors, it says, of the USBC would be appointed by the President; it involves the Congress, the House and the Senate in setting it up and it does things such as this: it says the USBC "shall provide a unified national computer source for the collection of business associates of boxers." Well, you see the danger in that, if you understand the sport, since it is a very, very brutal sport, it involves a disproportionate number of people out of the worst kind of slum and ghetto conditions.

And people who come out of such conditions, and some of the finest boxers have come out of such conditions, in fact most have; when you come out of those conditions it is natural that you would have, whether you are a boxer or not, business associates who might be considered unsavory. You cannot avoid it. To computerize that information can deter the development of some of our Nation's finest fighters.

It says also that the USBC "shall issue a certificate to each boxer." You are going to certify boxers.

Well, when the Government starts certifying boxers, it makes me recall what happened to one of the greatest boxing champions in the history of this world who was stripped of his title, which was a kind of certification, and I am talking about Muhammad Ali, stripped of his title because of the unpopularity of his political views.

I do not want to see this Government or anything associated with this Government going around and putting a stamp of acceptance on a boxer beyond that which is deserved by his skills.

Mr. WHITTAKER. If the gentleman would yield, I believe an explanation to your concerns might be addressed by the gentleman from New Mexico, who is on his feet.

Mr. SAVAGE. I have not finished with my concerns. I want to give them all to him and let him address them all.

Let me state further: "the USBC shall withdraw certification if it finds such withdrawal may be in the public interest." The withdrawal that may be in the public interest should be more specific, for example if it has to do with the health and welfare of that boxer. But not generally. It says, "certify an individual boxer," and so forth, "if the individual has not been convicted of a crime."

Well, many, many of those involved in this sport have been convicted of a crime, not only the promoters but the boxers themselves. Boxing has been a way for them to rehabilitate themselves.

I think this is drafted by a person with good intent but really, really, whether he has been in the sport or not, I do not think he understands the sport.

I urge my colleagues to reject it and send it back so they can then improve it because it is needed but not in its present form.

Mr. WILLIAMS. Mr. Chairman, I yield 2 minutes to the gentleman from New Mexico [Mr. RICHARDSON].

Mr. RICHARDSON. Mr. Chairman, I just want to correct a couple of statements made by my colleague.

First of all, some of the concerns he addressed are taken care of in the substitute. There is no reference whatsoever on the collection of information on business associates in the substitute that the gentleman from Montana is going to offer. Second, this commission has nothing to do with certifying boxers whatsoever. The Federal Government has no role whatsoever.

I would like to point out to my colleague from Illinois that the bill has been endorsed by some several leading people in the boxing industry, Mr. "Butch" Lewis, a promoter, Bob Aram of Top Rank, a promoter, and the issue that he raised, the felony, the 1-year jail serving, is being taken care of, it is being clarified by the gentleman from Texas who will be offering an amendment to the substitute.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to my colleague from New Jersey.

Mr. FLORIO. I thank the gentleman for yielding.

Mr. Chairman, I just want to note that the Association of Boxing Commissioners representing the boxing commissions of 37 of our States have endorsed this specific piece of legislation.

Mr. WHITTAKER. I yield 1 minute to the gentleman from California [Mr. THOMAS].

Mr. THOMAS of California. Mr. Chairman, I will ask the gentleman from Montana briefly to respond to some questions. I think the gentleman from New Jersey partially cleared it up.

My understanding of the substitute legislation is that model State boxing standards will be developed and it will be up to the States to adopt them or not. Although these commissions have worked with you, do we have any indication that those leading boxing States, California, Nevada, New York, New Jersey will in fact cooperate? Because if they are not willing to cooperate, it really does not mean much to develop the standards.

Mr. WILLIAMS. Mr. Chairman, will the gentleman yield?

Mr. THOMAS of California. I yield to the gentleman from Montana.

Mr. WILLIAMS. I thank the gentleman for yielding.

Mr. Chairman, the answer to the gentleman is, that is correct. We have worked closely with both associations of State commissioners and with individual State commissioners. They have been involved continually for 8 years but particularly during this past year in the development of this legislation.

Mr. THOMAS of California. Mr. Chairman, I think this is long overdue. I commend those who wrote it. It is done in a very reasonable fashion. There needs to be some kind of standard set, and this seems to be good legislation.

Mr. WILLIAMS. Mr. Chairman, I yield 2 minutes to the gentleman from North Dakota [Mr. DORGAN].

Mr. DORGAN of North Dakota. Mr. Chairman, I thank the gentleman for yielding. I will not take the 2 minutes.

But let me underscore the fact that this is not Federal regulation of boxing. Some in this Chamber may think that that is what is necessary. I happen to think we ought to have something much stronger than what we have here this evening. But this established a structure by which the States and the boxing community itself can cooperate with each other and develop some approaches to establish some order out of chaos. This is not Federal regulation of boxing.

We are facilitating a structure by which some improvement can be made in a sport where improvements are desperately needed at this point.

This is a very modest step, and I hope the House of Representatives will take the opportunity to pass this legislation.

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from Texas.

Mr. FIELDS. Mr. Chairman, is the gentleman aware that between 1972 and 1984, 78 professional boxers in the United States died from injuries incurred during matches?

Mr. DORGAN of North Dakota. Absolutely, and that is precisely why there needs to be something done in this area. The heavy hand of Federal regulation is not what we are talking about. Many people object to that. We are talking here about giving the boxing community and the State governments and local communities an opportunity to do for themselves what we all know is necessary.

□ 1930

Mr. WHITTAKER. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. WILLIAMS. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. FLORIO. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

The CHAIRMAN. Pursuant to House Resolution 595, it is in order to consider an amendment in the nature of a substitute consisting of the text of H.R. 5654 as an original bill for the purpose of amendment under the 5-minute rule in lieu of the amendments recommended by the Committees on Education and Labor and Energy and Commerce printed in the reported bill, if offered by Representative WILLIAMS.

AMENDMENT IN THE NATURE OF A SUBSTITUTE OFFERED BY MR. WILLIAMS

Mr. WILLIAMS. Mr. Chairman, I offer an amendment in the nature of a substitute.

The CHAIRMAN. Under the rule, each section of the amendment in the nature of a substitute is considered as having been read.

The Clerk will designate section 1.

Mr. WILLIAMS. Mr. Chairman, I ask unanimous consent that the amendment in the nature of a substitute be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

There was no objection.

The CHAIRMAN. The Clerk will designate the amendment in the nature of a substitute.

The text of the amendment in the nature of a substitute is, as follows:

Amendment in the nature of a substitute offered by Mr. WILLIAMS:

SECTION 1. ESTABLISHMENT OF USBC.

There is established a nonprofit corporation to be known as the United States Boxing Corporation (hereinafter in this Act referred to as the "USBC"). The USBC shall maintain its principal office in Washington, District of Columbia.

SEC. 2. PURPOSES OF THE USBC.

(a) MODEL STATE BOXING STANDARDS.—For the purpose of establishing criteria for States to meet in order to receive assistance under this section and to encourage the nationwide implementation of uniform boxing regulation at the State level, the USBC shall develop model State boxing standards.

(b) GRANTS TO STATES TO IMPLEMENT MODEL STATE BOXING STANDARDS.—(1) The USBC shall make grants, provide technical assistance, or both, to assist States in the adoption and implementation of a plan—

(A) to establish or maintain an appropriate State agency charged with the regulation of professional boxing (hereinafter in this Act referred to as a "State boxing authority") which meets the model State boxing standards developed under subsection (a); and

(B) to comply with such other requirements as the USBC considers necessary or appropriate for a State boxing authority.

(2) Each State that desires to receive a grant or technical assistance, or both, under this subsection shall apply to the USBC. The USBC shall approve an application if it contains the information and assurances that the USBC considers necessary to demonstrate that the State has an effective plan for meeting the requirements under paragraph (1).

(c) ESTABLISHMENT OF NATIONAL REGISTRY AND CERTIFICATION.—(1) The USBC shall provide a unified national computer source for the collection, storage, and retrieval of (A) a list of professional boxers, (B) the medical records, won-loss records, size, weight, and business associates of such boxers, and (C) information pertinent to the sport of boxing on boxing promoters, boxing matchmakers, boxing managers, trainers, cut men, referees, physicians, and any other personnel determined by the USBC to have a professional role in boxing.

(2) The USBC shall issue a certificate, either through State boxing authorities or through the manner deemed most appropriate by the USBC, on an annual renewable basis, to each boxer, cut man, referee, and physician which meets USBC minimum standards, and shall issue for certified boxers an accurate record of their medical history, biographical information, and won-loss boxing record.

(3) The USBC shall issue a certificate, either through State boxing authorities or through the manner deemed most appropriate by the USBC, at least every three years, to each boxing promoter, boxing matchmaker, boxing manager, trainer, and other person determined by the USBC to have a professional role in boxing, which meets USBC minimum standards.

(4) The USBC shall issue a certificate to each State, on an annual, renewable basis, that adopts and implements the model State boxing standards developed under subsection (a).

(d) ADDITIONAL PURPOSES.—In addition to the purposes described under subsections (a) through (c), the purposes of the USBC shall be to—

(1) propose changes in the rules of the sport of professional boxing to ensure the safety of participants and establish a uniform set of rules which may be adopted by the various State boxing authorities to follow;

(2) establish minimum standards and procedures for physical and mental examinations to be given boxers;

(3) establish minimum standards for the availability of medical services at professional boxing matches;

(4) provide for a life, accident, and health insurance fund for professional boxers and other members of the professional boxing community;

(5) research and establish minimum standards for the manufacturing and use of boxing equipment, including gloves, head gear, ring ropes, and all other boxing-related equipment;

(6) conduct discussions and enter into agreements with foreign boxing entities on methods for applying minimum health and safety standards to foreign boxing events and foreign boxers, trainers, cut men, referees, judges, ringside physicians, and other professional boxing assistants;

(7) review existing State boxing authority rules and regulations for professional boxing and provide assistance to such authorities in meeting USBC minimum health and safety standards; and

(8) prescribe standards for the making of contracts, agreements, arrangements, and understandings pertaining to bout agreements between boxers and promoters.

SEC. 3. WITHDRAWAL OF USBC CERTIFICATION.

The USBC shall withdraw any certification made under this Act, at any time—

(1) if it finds such withdrawal is in the public interest and that there exist reasonable grounds for belief that standards prescribed by the USBC under section 2 are not being met, or that bribery, collusion, intentional losing, racketeering, extortion, or the use of unlawful threats, coercion, or intimidation have been used in connection with such certification; and

(2) with respect to any boxer, promoter, or referee who participates in a bout in a State which is not certified by the USBC.

Any withdrawal of certification under this section shall be for a period of not less than six months.

SEC. 4. POWERS OF USBC.

(a) IN GENERAL.—The USBC shall be subject to the District of Columbia Nonprofit Corporation Act and shall have the usual powers conferred upon a nonprofit corporation by that Act. In addition, the USBC may—

(1) serve as the coordinating body for all efforts in the United States to establish and maintain uniform minimum health and safety standards for professional boxing;

(2) charge dues for membership and reasonable fees for services it performs, and use any revenue from such dues or fees which exceeds expenditures for other authorized purposes under this Act for grants under section 2(b);

(3) establish, regulate, and discontinue subordinate organizations;

(4) establish criteria for membership in the USBC, determine benefits and responsibilities which pertain to membership, and receive and expel as members such States, existing organizations, and individuals as may be deemed desirable and proper to carry out the corporate purposes;

(5) publish a newspaper, magazine, or other publication consistent with the corporate purposes; and

(6) do any and all things necessary and proper for a nonprofit corporation to accomplish the purposes set forth in section 2, consistent with the provisions of this Act, the constitution and bylaws of the USBC, and the District of Columbia Nonprofit Corporation Act.

(b) PROHIBITIONS.—The USBC shall not—

(1) effect contracts for the television distribution of boxing events,

(2) promote boxing events or rank professional boxers,

(3) certify an individual as a boxing promoter, boxing matchmaker, or boxing manager meeting USBC standards if the individual was not a boxing promoter, boxing matchmaker, or boxing manager before the date of the enactment of this Act and has been convicted in a State or Federal court of a crime for which imprisonment of more than one year was authorized unless the individual has received a State or Federal pardon for such conviction or has had the record of such conviction expunged, or

(4) provide grants or technical assistance to, or authorize the use of the name of the USBC by, States which do not comply with requirements of the USBC.

(c) NAME.—The USBC shall have the exclusive right to use the names "United States Boxing Commission" and "USBC", and any person who, without the permission of the USBC, uses such name or any other exclusive name, trademark, emblem, symbol, or insignia of the USBC for the purpose of inducing the sale of any goods or services, or to promote any exhibition, performance, or sporting event, shall be subject to suit in a civil action by the USBC for the remedies provided in the Act of July 5, 1946 (60 Stat. 427; 15 U.S.C. 1051 et seq., popularly known as the Trademark Act of 1946).

SEC. 5. BOARD OF DIRECTORS.

(a) IN GENERAL.—The USBC shall have a Board of Directors. The Board of Directors shall, except as provided in paragraph (6)(B), consist of citizens of the United States as follows:

(1) One boxer, boxing trainer, judge, promoter, or sports medicine physician, currently active in the sport, to be appointed by the President from a list of six persons recommended by the Speaker of the House of Representatives.

(2) One boxer, boxing trainer, judge, promoter, or sports medicine physician, currently active in the sport, to be appointed by the President from a list of six persons recommended by the majority leader of the Senate.

(3) One acting State Athletic or Boxing Commissioner to be appointed by the President from a list of six persons recommended by the Speaker of the House of Representatives.

(4) One acting State Athletic or Boxing Commissioner to be appointed by the President from a list of six persons recommended by the majority leader of the Senate.

(5) Five persons with an interest in and knowledge of the sport of boxing, but with no current financial interest in that sport, of which—

(A) two shall be appointed by the President from a list of twelve persons recommended by the Speaker of the House of Representatives;

(B) two shall be appointed by the President from a list of twelve persons recommended by the majority leader of the Senate; and

(C) one shall be appointed by the President.

(6) Three nonvoting members, appointed by the President, of whom—

(A) one shall be a member of the boxing media;

(B) one shall be a citizen of a foreign country with an interest in and knowledge of the sport of boxing, but with no current financial interest in that sport; and

(C) one shall be a member of the U.S.A. Amateur Boxing Federation.

(b) INITIAL APPOINTMENTS.—Initial appointments under subsection (a) shall be made within sixty days after the date of enactment of this Act.

(c) TERMS.—Members of the Board of Directors shall be appointed to five-year terms.

(d) SUCCESSORS.—If any member of the Board of Directors is unable to serve his full term of office or becomes unqualified to serve in such position, a new member shall be appointed to serve the remainder of such term of office in the same manner in which the original appointment was made.

(e) INITIAL MEETING.—The initial meeting of the Board of Directors shall be held within ninety days after the date of enactment of this Act.

(f) ORGANIZATION.—The Board of Directors shall, as soon as practicable after being appointed and qualified, adopt a constitution and bylaws and take whatever other steps are necessary to complete the organization of the USBC.

(g) CHAIRMAN.—At the initial meeting of the Board of Directors the Board shall elect one of the members appointed under subsection (a)(5) to be the chairman. The chairman shall have administrative responsibility for the USBC.

(h) COMPENSATION.—

(1) The chairman of the USBC shall be paid at a rate determined by the Board of Directors, not to exceed $72,000 per year, plus expenses.

(2) All other voting members of the Board of Directors shall be paid at a rate not to exceed the daily equivalent of an annual rate of pay of $55,000 for each day, including traveltime, during which such member is engaged in the actual performance of the official business of the USBC, and shall be reimbursed for all travel and other expenses incurred in the performance of such business.

SEC. 6. STAFF.

The USBC may hire such staff as may be necessary to enable it to accomplish its purposes under this Act. No member of such staff shall receive a salary in excess of $55,000 per year.

SEC. 7. NONINTERFERENCE WITH STATE BOXING AUTHORITIES.

Nothing in this Act shall prohibit any board, commission, or other agency created by or pursuant to the law of any State or political subdivision of any State from exercising any of its powers, duties, or functions with respect to the regulation or supervision of professional boxing or boxing matches.

SEC. 8. AUDIT AND REPORT.

(a) AUDIT.—The Comptroller General shall conduct an annual audit of the finances of the USBC, to be completed in time for inclusion in the report required by subsection (b).

(b) REPORT.—The USBC shall submit a report to the Congress within one year after the date of enactment of this Act and annually thereafter. Such report shall detail the activities of the USBC for the preceding year and shall include—

(1) a description of the State boxing authority in each State, if any;

(2) a description of the degree to which each State is implementing the model State boxing standards developed under section 2(a); and

(3) the results of the audit required by subsection (a).

SEC. 9. DISTRIBUTION OF ASSETS TO MEMBERS.

(a) IN GENERAL.—No part of the income or assets of the USBC shall inure to the benefit of any member, officer, or director, or be distributed to any such person during the life of the USBC or upon dissolution or final liquidation. Nothing in this subsection, however, shall be construed to prevent the payment of reasonable compensation to officers of the USBC in amounts approved by the Board of Directors of the USBC.

(b) LOANS.—The USBC shall not make loans to its officers, directors, or employees. Any director who votes for or assents to the making of a loan to an officer, director, or employee of the USBC, and any officer who participates in the making of such loan, shall be jointly and severally liable to the USBC for the amount of such loan until the repayment of such loan.

SEC. 10. NONPOLITICAL NATURE OF USBC.

The USBC shall be nonpolitical and, as an organization, shall not promote the candidacy of any person seeking public office.

SEC. 11. LIABILITY FOR ACTS OF OFFICERS AND AGENTS.

The USBC shall be liable for the acts of its officers and agents when acting within the scope of their authority.

SEC. 12. BOOKS AND RECORDS; INSPECTION.

The USBC shall keep correct and complete books and records of account and shall keep minutes of the proceedings of its members, Board of Directors, and committees having any of the authority of the Board of Directors. It also shall keep at its principal office a record of the names and addresses of its members entitled to vote. All books and records of the USBC may be inspected by any member entitled to vote, or his agent or attorney, for any proper purpose, at any reasonable time.

SEC. 13. USE OF ASSETS ON DISSOLUTION OR LIQUIDATION.

Upon final dissolution or liquidation of the USBC, and after discharge or satisfaction of all outstanding obligations and liabilities, the remaining assets of the USBC may be distributed in accordance with the determination of the Board of Directors of the USBC and in compliance with the constitution and bylaws of the USBC and all Federal and State laws applicable thereto.

SEC. 14. STATE DEFINED.

As used in this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, American Samoa, and any other territory or possession of the United States.

AMENDMENT OFFERED BY MR. RALPH M. HALL

Mr. RALPH M. HALL. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by RALPH M. HALL: Page 7, lines 9 through 18, amend paragraph (3) to read as follows:

(3) certify as a boxing promoter, boxing matchmaker, or boxing manager any applicant who has been convicted of a crime, other than a misdemeanor, under Federal or State law, for which imprisonment of more than 1 year is authorized, unless the applicant—

(A) was a boxing promoter, boxing matchmaker, or boxing manager before the date of the enactment of this Act;

(B) has received a Federal or State pardon for such conviction; or

(C) has had the record of such conviction expunged; or

Mr. RALPH M. HALL. Mr. Chairman, the amendment I am offering today will clarify and make more consistent a provision that I inserted in the bill during its consideration before the Energy and Commerce Committee. Under this provision—section 4(b)(3)—as reported from the committee, the U.S. Boxing Commission would not be authorized to certify as a boxing promoter, boxing matchmaker, or boxing manager any person who had been convicted of a crime carrying a sentence of more than 1 year. At the outset we first included everyone—then watered the requirement down by, in effect, grandfathering all present convicted felons. Now we have agreed to water it down further with the exceptions agreed to in this amendment.

I want to make it clear that this provision does not affect anyone who is currently engaged in these activities. However, an important exception is included—and that exception provides that any such person who has received a pardon or has had the conviction expunged from his record will be eligible for certification, as in the bill as reported.

Since the bill was reported from the committee we have been told that there are some States in which misdemeanor convictions carry sentencing provisions of more than 1 year. My intent with this provision was to make convicted felons ineligible for certification, unless they had been pardoned or had their record expunged, but not prohibit from certification persons convicted of misdemeanors. What we found when we first attempted to draft this provision was the utter lack of consistency among the States in the classification of crimes between felonies and misdemeanors as well as in sentencing provisions.

I believe this amendment clears up a problem that has concerned a number of Members. The amendment makes it clear that in any State in which a misdemeanor conviction under State law provides for a sentence of more than 1 year, then the 1-year provision will not apply. Thus, a person convicted of such a crime will be eligible for certification.

Mr. Chairman , in closing I want to respond to another of the criticisms that has been raised about this subsection of the bill. There are some members, I understand, that feel the 1 year of imprisonment sentencing provision should be higher, perhaps 2 or as much as 3 years. They feel the 1 year is arbitrary and is set too low. As I mentioned, with the complete lack of consistency among the States, we selected 1 year because 1 year of impris-

onment is used to classify Federal crimes as either felonies or misdemeanors. I think the Federal standard is useful here, and although it, too, may be arbitrary, there is considerable precedent. I also suspect we would find that, if we were to carefully survey the States, 1 year would be closer to the breakpoint between major and minor crimes than sentences of 2 or 3 years. For that reason, I urge my colleagues to support my amendment and to oppose any attempts to liberalize the 1-year provision.

Mr. Chairman, I yield back the balance of my time.

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. RALPH M. HALL. I yield to the gentleman from New Mexico.

Mr. RICHARDSON. Mr. Chairman, this side has no problem with this amendment. I think it clarifies very specifically what was a little bit of a loophole in the bill. I commend the gentleman for offering it.

Mr. FIELDS. Mr. Chairman, will the gentleman yield?

Mr. RALPH M. HALL. I yield to the gentleman from Texas.

Mr. FIELDS. Mr. Chairman, I rise in support of the amendment offered by the gentleman from Texas.

The substitute the House is considering provides the Commission with the authority to certify boxing professionals.

The substitute also prohibits the Commission from certifying as a boxing promoter, matchmaker, or manager any applicant who has been convicted of a crime for which imprisonment of more than 1 year is authorized, unless the applicant: First, was a boxing promoter, matchmaker, or manager before enactment of the bill; second, receives a pardon for such conviction; or third, has the record of such conviction expunged.

The intent of that provision is to ensure that the certification by the Commission carries the message that the applicant is an ethical boxing promoter, matchmaker, or manager who meets the Commission's high standards.

A denial of certification will not prohibit a boxing promoter, matchmaker, or manager from participation in the sport of boxing or deny that person of his livelihood. However, that person will not be able to claim the respect that certification by the Commission will carry.

In order to command such respect, high standards must be set for certification by the Boxing Commission.

In the same light, we do not want to deny an ethical boxing promoter, matchmaker of manager certification because he has been convicted of a crime that will not affect his ability to be an ethical boxing professional.

These interests are difficult to balance. I believe the amendment offered by the gentleman from Texas assists us in reaching this delicate balance.

Therefore, I urge my colleagues to support the Hall amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas [Mr. RALPH M. HALL].

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. DORGAN OF NORTH DAKOTA

Mr. DORGAN of North Dakota. Mr. Chairman, I offer three amendments, and I ask unanimous consent they be considered en bloc.

The CHARIMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. DORGAN of North Dakota: Page 3, line 10, strike "which" and insert in lieu thereof "who".

Page 7, line 23, strike "Commission" and insert in lieu thereof "Corporation".

Page 3, line 19, strike "which" and insert in lieu thereof "who".

Mr. DORGAN of North Dakota (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. FLORIO. Mr. Chairman, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from New Jersey.

Mr. FLORIO. Mr. Chairman, the gentleman's amendments are purely technical amendments, so we have no objection to them.

Mr. WHITTAKER. Mr. Chairman, will the gentleman yield?

Mr. DORGAN of North Dakota. I yield to the gentleman from Kansas.

Mr. WHITTAKER. Mr. Chairman, we have reviewed the amendments on this side of the aisle and have no objection to them.

The CHAIRMAN. The question is on the amendments offered by the gentleman from the North Dakota [Mr. DORGAN].

The amendments were agreed to.

AMENDMENT OFFERED BY MR. SAVAGE

Mr. SAVAGE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAVAGE: Page 3, lines 1 and 2, strike-out "weight, and business associates of such boxers" and insert in lieu thereof "and weight."

Mr. SAVAGE. Mr. Chairman, as I had pointed out, the problem with that is that most boxers, because they come from such deprived living conditions, most of their friends and business associates, whether they were boxers or not, are what many people would consider unsavory.

So when you see the, "USBC shall provide a unified computer source of information about the associates of a boxer," in such broad terms, it will be harmful for those boxers to get matches, and so forth.

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. SAVAGE. I yield to the gentleman from New Mexico.

Mr. RICHARDSON. Mr. Chairman, if the gentleman is amending the correct portion of the legislation, then this side, in review of the gentleman's amendment, thinks this is a worthy amendment and would be prepared to accept it. I think it clarifies something that needs to be clarified, and I want to commend the gentleman from Illinois for offering it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois [Mr. SAVAGE].

The amendment was agreed to.

The CHAIRMAN. Are there further amendments to the bill?

If not, the question is on the amendment in the nature of a substitute, as amended.

The amendment in the nature of a substitute, as amended, was agreed to.

The amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. FOLEY), having assumed the chair, Mr. FLIPPO, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2127) to establish a U.S Boxing Commission, and for other purposes, pursuant to House Resolution 595, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore (Mr. GRAY of Illinois). Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment in the nature of a substitute was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. WILLIAMS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on H.R. 2127, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Montana.

There was no objection.

FURTHER LEGISLATIVE PROGRAM

(Mr. FOLEY asked and was given permission to address the House for 1 minute.)

□ 1940

Mr. FOLEY. Is is the plan of the leadership to call up next the Federal Insecticide, Fungicide, and Rodenticide Act under a unanimous-consent request. After the consideration of that bill, to make a judgment about whether further legislation will be considered tonight.

There in the possibility of the consideration of the drug legislation tonight. We are not in a position to inform the Members yet about whether that bill will be ready. So Members should be advised that there may be further legislation considered tonight. We should, within an hour, have the ability to inform Members about that and either go into recess awaiting that bill's availability for the floor or adjourn the House until tomorrow.

I would caution Members not to assume that the legislative program is over until further notice.

Mr. RUSSO. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from Illinois.

Mr. RUSSO. Is the gentleman indicating that on FIFRA we are going to go by unanimous consent and probably would not have any votes within the next hour?

Mr. FOLEY. Yes.

Mr. RUSSO. And then after FIFRA is over, we are going to make a judgment call at that point whether or not we are going to recess?

Mr. FOLEY. Yes, and whether legislation will be considered later in the evening.

Mr. RUSSO. So for at least the next hour we are free from rollcall votes?

Mr. FOLEY. I think Members can be confident that it will mean no substantive votes for the next hour and we will consider the FIFRA legislation under unanimous consent.

Mr. RUSSO. I thank the gentleman.

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that it shall be in order to consider at any time today or any day thereafter the conference report on H.R. 5300, the Budget Reconciliation Act of 1986, that all points of order be waived against the confernce report and against its consideration, and the conference report shall be considered as having been read when called up for consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. FOLEY. Mr. Speaker, we will have a similar motion, it has not been prepared, we will have a similar motion with respect to the drug bill which I will offer as soon as it is received.

I would ask the indulgence of the House to interrupt the proceedings for that purpose at that time.

INSECTICIDE, FUNGICIDE AND RODENTICIDE ACT AMENDMENTS OF 1985

Mr. BEDELL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2482) to amend the Federal Insecticide, Fungicide, and Rodenticide Act, and for other purposes, with a Senate amendment thereto, and concur in the Senate amendment with an amendment.

The Clerk read the title of the bill.

(For text of the Senate amendment, see proceedings of the Senate of Monday, October 6, 1986.)

The Clerk read the House amendment to the Senate amendment as follows:

HOUSE AMENDMENT TO SENATE AMENDMENT:

In lieu of the matter inserted by the Senate amendment insert:

SECTION 1. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986".

(b) TABLE OF CONTENTS.—The table of contents is as follows:

Sec. 1. Short title and table of contents.
Sec. 2. References to the Federal Insecticide, Fungicide, and Rodenticide Act.

TITLE I—REGISTRATION

Sec. 101. Preregistration access to data.
Sec. 102. Criminal penalties for disclosure of information.
Sec. 103. Conditional registration.
Sec. 104. Definition of outstanding data requirement.
Sec. 105. Reregistration of registered pesticides.
Sec. 106. Administrator's authority to require data on inert ingredients.
Sec. 107. Definition of ingredient statement.
Sec. 108. Disclosure of inert ingredients.
Sec. 109. Compensation for data on inert ingredients.

TITLE II—INFORMATION DISCLOSURE

Sec. 201. Public right to know.
Sec. 202. Data disclosure to States.

TITLE III—REVIEW AND CANCELLATION

Sec. 301. Public interim administrative review.
Sec. 302. Hearing procedures after public interim administrative review.
Sec. 303. Cancellation and change in classification or labels.
Sec. 304. Public hearings and scientific review.
Sec. 305. Administrative changes.
Sec. 306. Cancellation of registration based on false or invalid data.

TITLE IV—RECORDS AND INSPECTIONS

Sec. 401. Records.
Sec. 402. Inspections.

TITLE V—EXPORTS

Sec. 501. Definition of misbranded.
Sec. 502. Definition of importing country.
Sec. 503. Pesticides and devices intended for export.
Sec. 504. Cancellation notices furnished to foreign governments.
Sec. 505. Cooperation in international efforts.

TITLE VI—CERTIFICATION, TRAINING, AND RECORDKEEPING FOR PESTICIDE APPLICATORS

Sec. 601. Certification, training, and recordkeeping for pesticide applicators.

TITLE VII—ADDITIONAL DATA, DATA COMPENSATION, AND PATENTS

Sec. 701. Additional data to support existing registrations.
Sec. 702. Data compensation and arbitration.
Sec. 703. Restoration of patent term for certain agricultural and chemical products.

TITLE VIII—GENERAL

Subtitle A—Amendments to the Federal Insecticide, Fungicide, and Rodenticide Act

Sec. 801. Authority of States.
Sec. 802. Definitions.
Sec. 803. Information requested.
Sec. 804. Cooperative agreements.
Sec. 805. Scientific Advisory Panel.
Sec. 806. Authority for EPA action.
Sec. 807. Expiration of State primary enforcement responsibility.
Sec. 808. Unlawful acts.
Sec. 809. Penalties and subpoenas.
Sec. 810. Congressional review.
Sec. 811. Review of regulations.
Sec. 812. Delegation and cooperation.
Sec. 813. Indemnification by EPA.
Sec. 814. Ground water authority.
Sec. 815. Worker health and safety.
Sec. 816. Antimicrobial standards.
Sec. 817. Neurotoxicological and behavioral effects testing of pesticides.
Sec. 818. Pesticide containers.
Sec. 819. Notice for stored pesticides with canceled or suspended registrations.
Sec. 820. Authorization for appropriations.

Subtitle B—Other Provisions

Sec. 825. Liability for lawful application.
Sec. 826. Tolerances for agricultural commodities.
Sec. 827. IR4 program.
Sec. 828. Pesticide risk rating.
Sec. 829. Evaluation by the Comptroller General.
Sec. 830. Study of nonagricultural pesticides.
Sec. 831. Pesticide drift.
Sec. 832. Survey of naturally occurring agents that act as pesticides.
Sec. 833. Pesticide Resistance Management Program.
Sec. 834. DDT study.
Sec. 835. Salinity laboratory, Riverside, California.

TITLE IX—CLARIFYING AND TECHNICAL AMENDMENTS

Sec. 901. Clarifying amendments.
Sec. 902. Technical amendments.
Sec. 903. Table of contents amendments.

TITLE X—EFFECTIVE DATE

Sec. 1001. Effective date.

TITLE XI—HOMELESS ELIGIBILITY CLARIFICATION ACT

Sec. 1101. Short title.

Subtitle A—Emergency Food for the Homeless
Sec. 1111. Meals served to homeless individuals.
Subtitle B—Job Training for the Homeless
Sec. 1121. Job training for the homeless.
Subtitle C—Entitlements Eligibility
Sec. 1131. Treatment of homeless individuals eligible under SSI program.
Sec. 1132. Application for SSI and food stamp benefits by SSI pre-release individuals.
Sec. 1133. Delivery of veterans' benefits payments.

SEC. 2. REFERENCES TO THE FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT.

Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.).

TITLE I—REGISTRATION

SEC. 101. PREREGISTRATION ACCESS TO DATA.

(a) IN GENERAL.—Section 3(c) (7 U.S.C. 136a(c)) is amended by adding at the end thereof the following new paragraph:

"(9) PREREGISTRATION ACCESS TO DATA.—

"(A) If an application for—

"(i) a registration of a pesticide containing a new active ingredient; or

"(ii) a registration of a pesticide to authorize the initial food use of a pesticide active ingredient,

is submitted to the Administrator, the Administrator, before acting on such application, shall provide, in accordance with this paragraph, public access to health, safety, and environmental data that are submitted or cited in support of such application.

"(B) To obtain access to the data referred to in subparagraph (A), a person shall send by certified mail—

"(i) not later than 30 days after the publication under paragraph (4) of a notice of the application referred to in subparagraph (A); and

"(ii) simultaneously to the Administrator and to the applicant for the registration of the pesticide,

a request for such access and the affirmation required by subparagraph (D).

"(C)(i) Unless within 15 days after the receipt by the Administrator of a request for access to such data and of an affirmation complying with subparagraph (D) the applicant submits to the Administrator an objection to the request asserting that the affirmation is inaccurate and the reasons for the objection, the Administrator shall grant the request. If an objection to a request is submitted to the Administrator within such 15-day period, the Administrator shall determine whether to grant the request within 5 days after the receipt of the objection. If the Administrator determines to grant the request, access shall not be permitted until 5 days after the applicant making the objection has been notified that access has been granted.

"(ii) If access to data is denied under clause (i), comments on the application for which such data were submitted or cited shall be filed within 60 days after the decision of the Administrator denying access.

"(D)(i) Data referred to in subparagraph (A) may be made available only to a person who provides an affirmation (and such supporting evidence as the Administrator considers necessary) containing the information prescribed by clause (ii).

"(ii) The affirmation required under clause (i) shall—

"(I) state that the person is not engaged in, and is neither employed by nor acting (directly or indirectly) on behalf of any other person or affiliate thereof engaged in, the production, sale, or distribution of a pesticide;

"(II) identify any business, employer, or other person, if any, on whose behalf the person is requesting access to the data; and

"(III) state that the person will not intentionally or recklessly violate this paragraph.

"(iii) For purposes of clause (ii), an affiliate of a person is a person who directly or indirectly, through one or more intermediates, controls or is controlled by or is under common control with the other person.

"(iv) Section 1001 of title 18, United States Code, shall apply to an affirmation made under this subparagraph.

"(E)(i) Data supporting an application may be made available under subparagraph (A) to a person only for the purpose of permitting the person to comment to the Administrator on such application. Such comments may reasonably quote data submitted to the Administrator. No person, including the Administrator, may make such comments public before the decision of the Administrator on the application for the registration of the pesticide for which such data were submitted or after such decision if the application for registration is denied.

"(ii) Except as provided in clause (iii), a person who obtains data under subparagraph (A) (directly or indirectly) may not—

"(I) publish, copy, or transfer the data to any other person to obtain approval to sell, manufacture, or distribute a pesticide anywhere in the world; or

"(II) use the data for any purpose in any court or agency of the United States or any State or political subdivision thereof before the decision of the Administrator on the application for the registration of the pesticide for which such data were submitted or after such decision if the application for registration is denied.

"(iii) Such data and comments may be disclosed consistent with section 10 after registration of the pesticide for which such data were submitted.

"(F)(i) Data made available under this paragraph may be examined at an office of the Environmental Protection Agency or an appropriate State agency under the conditions prescribed by this paragraph and may not be removed from such office.

"(ii) The Administrator shall maintain a record of the persons who inspect data. A copy of such record shall be sent to the data submitter on request.

"(G) Once access to data respecting an application is granted, the data may be examined and notes may be taken for use in developing comments on the application. Such comments on the application shall be filed within 60 days after the decision of the Administrator granting access, unless the comment period is extended by the Administrator for an additional 30 days for good cause.".

(b) NOTICE OF APPLICATION.—Section 3(c)(4) (7 U.S.C. 136a(c)(4)) is amended—

(1) in the first sentence, by striking out "promptly" and inserting in lieu thereof "not later than 30 days"; and

(2) in the second sentence—

(A) by striking out "The notice" and inserting in lieu thereof "Except as provided in paragraph (9), the notice"; and

(B) by striking out "30" and inserting in lieu thereof "60".

SEC. 102. CRIMINAL PENALTIES FOR DISCLOSURE OF INFORMATION.

Paragraph (3) of section 14(b) (7 U.S.C. 136l(b)(3)) is amended to read as follows:

"(3) DISCLOSURE OF INFORMATION.—

"(A) Any person who, with intent to defraud, uses or reveals information relative to the formula of a product acquired under section 3 shall be fined not more than $25,000 or imprisoned for not more than 3 years, or both.

"(B) Any person, including any officer, contractor, or employee of the United States or a State, who—

"(i) is granted access to data under section 3(c)(9); and

"(ii) in furtherance of a commercial purpose involving the production, registration, distribution, or sale of a pesticide—

"(I) knowingly violates such section; or

"(II) knowingly allows data to be made available in violation of such section,

shall be fined not more than $100,000 or imprisoned for not more than 3 years, or both.".

SEC. 103. CONDITIONAL REGISTRATION.

Subparagraphs (B) and (C) of section 3(c)(7) (7 U.S.C. 136a(c)(7) (B) and (C)) are amended to read as follows:

"(B)(i) The Administrator may conditionally amend the registration of a pesticide under this subparagraph to permit additional uses of such pesticide notwithstanding the fact that data concerning the pesticide may be insufficient to support an unconditional amendment, if the Administrator determines that—

"(I) the applicant has submitted or cited additional data that the Administrator may require solely for the proposed additional use;

"(II) amending the registration in the manner proposed by the applicant would not materially increase the risk of any unreasonable adverse effect on the environment; and

"(III) the additional use is in the public interest.

"(ii)(I) Except as provided in subclause (II), if the Administrator has issued a notice stating that a pesticide, or any ingredient thereof, meets or exceeds risk criteria associated in whole or in part with human dietary exposure and specified in regulations issued under paragraph (8), no registration of the pesticide may be amended under clause (i) to add any food or feed use during the pendency of any evaluation by the Administrator initiated by such notice.

"(II) If the Administrator has issued a notice stating that a pesticide, or any ingredient thereof, meets or exceeds risk criteria associated in whole or in part with human dietary exposure and specified in regulations issued under paragraph (8), the Administrator may amend the registration of the pesticide under clause (i) to add a minor food or feed use if the Administrator determines, with the concurrence of the Secretary of Agriculture, that there is not available an effective alternative pesticide that does not meet or exceed such risk criteria.

"(iii) An applicant seeking an amended registration of a pesticide under this subparagraph shall submit or cite to the Administrator such data as would be required to obtain a registration of a similar pesticide under paragraph (5). Except as provided in clause (iv), if the applicant is unable to submit or cite an item of such data because it has not yet been generated, the Adminis-

trator may amend the registration of the pesticide under such conditions as will require the submission or citation of such data not later than the time such data are required to be submitted for the maintenance of a registration of the similar pesticide under this section.

"(iv) If data concerning chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, or teratogenicity are required to support the registration of a pesticide and if a period reasonably sufficient for the generation and submission of such data has elapsed since the Administrator first imposed the data requirement, a conditional amendment to permit an additional use of the pesticide for other than a minor use shall not be granted under clause (i) unless such data have been submitted.

"(C)(i) The Administrator may conditionally register a pesticide under this subparagraph containing an active ingredient not contained in any registered pesticide for a period reasonably sufficient for generation and submission of required data that have not been submitted because a period reasonably sufficient for generation of the data has not elapsed since the Administrator first imposed the data requirement—

"(I) on the conditions that by the end of such period the Administrator receives such data and that the data that the Administrator receives do not meet or exceed risk criteria enumerated in regulations issued under paragraph (8); and

"(II) on such other conditions as the Administrator may prescribe.

"(ii) A conditional registration under this subparagraph shall be granted only if the Administrator determines that—

"(I) use of the pesticide during the period referred to in clause (i) will not cause any unreasonable adverse effect on the environment; and

"(II) use of the pesticide is in the public interest.

"(iii) The Administrator shall not conditionally register a pesticide under this subparagraph if—

"(I) data concerning chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, or teratogenicity would be required for registration of such a pesticide under paragraph (5);

"(II) a period reasonably sufficient for generation of such data has elapsed since the Administrator first imposed the data requirement; and

"(III) such data have not been submitted to the Administrator.".

SEC. 104. DEFINITION OF OUTSTANDING DATA REQUIREMENT.

Section 2 (7 U.S.C. 136) is amended by adding at the end thereof the following new subsection:

"(ff) OUTSTANDING DATA REQUIREMENT.—

"(1) IN GENERAL.—The term 'outstanding data requirement' means a requirement for any study, information, or data that is necessary to make a determination under section 3(c)(5) and which study, information, or data—

"(A) has not been submitted to the Administrator; or

"(B) if submitted to the Administrator, the Administrator has determined must be resubmitted because it is not valid, complete, or adequate to make a determination under section 3(c)(5) and the regulations and guidelines issued under such section, as determined by the Administrator.

"(2) FACTORS.—In making a determination under paragraph (1)(B) respecting a study, the Administrator shall examine, at a minimum, relevant protocols, documentation of the conduct and analysis of the study, and the results of the study to determine whether the study and the results of the study fulfill the data requirement for which the study was submitted to the Administrator.".

SEC. 105. REREGISTRATION OF REGISTERED PESTICIDES.

(a) IN GENERAL.—The Act is amended by inserting after section 3 (7 U.S.C. 136a) the following new section:

"SEC. 3A. REREGISTRATION OF REGISTERED PESTICIDES.

"(a) GENERAL RULE.—The Administrator shall reregister, in accordance with this section, each registered pesticide containing any active ingredient contained in any pesticide first registered before November 1, 1984, except for any pesticide as to which the Administrator has determined, after November 1, 1984, and before the effective date of this section, that—

"(1) there are no outstanding data requirements; and

"(2) the requirements of section 3(c)(5) have been satisfied.

"(b) SPECIAL AUTHORITIES OF ADMINISTRATOR.—

"(1) GUIDELINES.—

"(A) Not later than 1 year after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator, by order, shall issue guidelines to be followed by registrants in accordance with subsection (f)(1) in—

"(i) summarizing studies;

"(ii) reformatting studies;

"(iii) identifying adverse information; and

"(iv) identifying studies that have been submitted previously that may not meet the requirements of section 3 or regulations issued under such section.

"(B) Guidelines issued under this paragraph shall not be subject to judicial review.

"(2) MONITORING.—The Administrator shall monitor the progress of registrants in acquiring and submitting the data required under this section.

"(3) SUSPENSIONS AND PENALTIES.—

"(A) The Administrator shall issue a notice of intent to suspend the registration of a pesticide in accordance with the procedures prescribed by section 3(c)(2)(B)(iv) if—

"(i) the Administrator determines that progress is insufficient to ensure the submission of the data required for such pesticide under a commitment made under subsection (e)(3)(B) or (f)(1)(H) within the time period prescribed by subsection (e)(4)(B) or (f)(2)(B) or the registrant has not submitted such data to the Administrator within such time period;

"(ii) the Administrator determines that tests necessary to fill an outstanding data requirement for such pesticide have not been initiated within 1 year after the issuance of a notice under subsection (g)(1)(B);

"(iii) the Administrator determines that progress is insufficient to ensure submission of the data referred to in clause (ii) within the time period prescribed by subsection (g)(2)(B) or the required data have not been submitted to the Administrator within such time period; or

"(iv) a registrant fails to comply with clause (ii) or (iii) of section 3(c)(2)(B).

"(B) A registrant who submits a certification under subsection (f)(1)(G) that is false shall be considered to have violated this Act and shall be subject to the penalties prescribed by section 14.

"(c) REREGISTRATION PHASES.—Reregistrations of pesticides under this section shall be carried out in the following phases:

"(1) The first phase shall include the listing under subsection (d) of the active ingredients of the pesticides that will be reregistered.

"(2) The second phase shall include the submission to the Administrator under subsection (e) of notices by registrants respecting their intention to seek reregistration, identification by registrants of missing and inadequate data for such pesticides, and commitments by registrants to replace such missing or inadequate data within the applicable time period.

"(3) The third phase shall include submission to the Administrator by registrants of the information required under subsection (f).

"(4) The fourth phase shall include an independent, initial review by the Administrator under subsection (g) of submissions under phases two and three, identification of outstanding data requirements, and the issuance, as necessary, of requests for additional data.

"(5) The fifth phase shall include the review by the Administrator under subsection (h) of data submitted for reregistration and appropriate regulatory action by the Administrator.

"(d) PHASE ONE.—

"(1) PRIORITY FOR REREGISTRATION.—For purposes of the reregistration of the pesticides described in subsection (a), the Administrator shall list the active ingredients of pesticides and shall give priority to, among others, active ingredients (other than active ingredients for which registration standards have been issued before the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986) that—

"(A) are in use on or in food or feed and may result in postharvest residues;

"(B) may result in residues of potential toxicological concern in potable ground water, edible fish, or shellfish;

"(C) have been determined by the Administrator before the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986 to have significant outstanding data requirements; or

"(D) are used on crops, including in greenhouses and nurseries, where worker exposure is most likely to occur.

"(2) REREGISTRATION LISTS.—For purposes of reregistration under this section, the Administrator shall by order—

"(A) not later than 70 days after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, list pesticide active ingredients for which registration standards have been issued before such date;

"(B) not later than 4 months after such effective date, list the first 150 pesticide active ingredients, as determined under paragraph (1);

"(C) not later than 7 months after such effective date, list the second 150 pesticide active ingredients, as determined under paragraph (1); and

"(D) not later than 10 months after such effective date, list the remainder of the pesticide active ingredients, as determined under paragraph (1).

Each list shall be published in the Federal Register.

"(3) JUDICIAL REVIEW.—The content of a list issued by the Administrator under paragraph (2) shall not be subject to judicial review.

"(4) NOTICE TO REGISTRANTS.—On the publication of a list of pesticide active ingredients under paragraph (2), the Administrator shall send by certified mail to the registrants of the pesticides containing such active ingredients a notice of the time by which the registrants are to notify the Administrator under subsection (e) whether the registrants intend to seek or not to seek reregistration of such pesticides.

"(e) PHASE TWO.—

"(1) IN GENERAL.—The registrant of a pesticide that contains an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) shall submit to the Administrator, within the time period prescribed by paragraph (4), the notice described in paragraph (2) and any information, commitment, or offer described in paragraph (3).

"(2) NOTICE OF INTENT TO SEEK OR NOT TO SEEK REREGISTRATION.—

"(A) The registrant of a pesticide containing an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) shall notify the Administrator by certified mail whether the registrant intends to seek or does not intend to seek reregistration of the pesticide.

"(B) If a registrant submits a notice under subparagraph (A) of an intention not to seek reregistration of a pesticide, the Administrator shall publish a notice in the Federal Register stating that such a notice has been submitted.

"(3) MISSING OR INADEQUATE DATA.—Each registrant of a pesticide that contains an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) and for which the registrant submitted a notice under paragraph (2) of an intention to seek reregistration of such pesticide shall submit to the Administrator—

"(A) in accordance with regulations issued by the Administrator under section 3, an identification of—

"(i) all data that are required by regulation to support the registration of the pesticide with respect to such active ingredient;

"(ii) data that were submitted by the registrant previously in support of the registration of the pesticide that are inadequate to meet such regulations; and

"(iii) data identified under clause (i) that have not been submitted to the Administrator; and

"(B) either—

"(i) a commitment to replace the data identified under subparagraph (A)(ii) and submit the data identified under subparagraph (A)(iii) within the applicable time period prescribed by paragraph (4)(B); or

"(ii) an offer to share in the cost to be incurred by a person who has made a commitment under clause (i) to replace or submit the data and an offer to submit to arbitration as described by section 3(c)(2)(B) with regard to such cost sharing.

For purposes of a submission by a registrant under subparagraph (A)(ii), data are inadequate if the data are derived from a study with respect to which the registrant is unable to make the certification prescribed by subsection (f)(1)(G) that the registrant possesses or has access to the raw data used in or generated by such study. For purposes of a submission by a registrant under such subparagraph, data shall be considered to be inadequate if the data are derived from a study submitted before January 1, 1970, unless it is demonstrated to the satisfaction of the Administrator that such data should be considered to support the registration of the pesticide that is to be reregistered.

"(4) TIME PERIODS.—

"(A) A submission under paragraph (2) or (3) shall be made—

"(i) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(B), not later than 3 months after the date of publication of the listing of such active ingredient;

"(ii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(C), not later than 3 months after the date of publication of the listing of such active ingredient; and

"(iii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(D), not later than 3 months after the date of publication of the listing of such active ingredient.

On application, the Administrator may extend a time period prescribed by this subparagraph if the Administrator determines that factors beyond the control of the registrant prevent the registrant from complying with such period.

"(B) A registrant shall submit data in accordance with a commitment entered into under paragraph (3)(B) within a reasonable period of time, as determined by the Administrator, but not more than 48 months after the date the registrant submitted the commitment. The Administrator, on application of a registrant, may extend the period prescribed by the preceding sentence by no more than 2 years if extraordinary circumstances beyond the control of the registrant prevent the registrant from submitting data within such prescribed period.

"(5) CANCELLATION AND REMOVAL.—

"(A) If the registrant of a pesticide does not submit a notice under paragraph (2) or (3) within the time prescribed by paragraph (4)(A), the Administrator shall issue a notice of intent to cancel the registration of such registrant for such pesticide and shall publish the notice in the Federal Register and allow 60 days for the submission of comments on the notice. On expiration of such 60 days, the Administrator, by order and without a hearing, may cancel the registration or take such other action, including extension of applicable time periods, as may be necessary to enable reregistration of such pesticide by another person.

"(B)(i) If—

"(I) no registrant of a pesticide containing an active ingredient listed under subsection (d)(2) notifies the Administrator under paragraph (2) that the registrant intends to seek reregistration of any pesticide containing that active ingredient;

"(II) no such registrant complies with paragraph (3)(A);

"(III) no such registrant makes a commitment under paragraph (3)(B) to replace or submit all data described in clauses (ii) and (iii) of paragraph (3)(A); or

"(IV) the fee prescribed by subsection (j)(1) has not been paid with regard to the active ingredient,

the Administrator shall publish in the Federal Register a notice of intent to remove the active ingredient from the list established under subsection (d)(2) and a notice of intent to cancel the registrations of all pesticides containing such active ingredient and shall provide 60 days for comment on such notice.

"(ii) After the 60-day period has expired, the Administrator, by order, may cancel any such registration without hearing, except that the Administrator shall not cancel a registration under this subparagraph if—

"(I) during the comment period a person acquires the rights of the registrant in that registration;

"(II) during the comment period that person furnishes a notice of intent to reregister the pesticide in accordance with paragraph (2); and

"(III) not later than 120 days after the publication of the notice under this subparagraph, that person has complied with paragraph (3) and the fee prescribed by subsection (j)(1) has been paid.

"(f) PHASE THREE.—

"(1) INFORMATION ABOUT STUDIES.—Each registrant of a pesticide that contains an active ingredient listed under subparagraph (B), (C), or (D) of subsection (d)(2) who has submitted a notice under subsection (e)(2) of an intent to seek the reregistration of such pesticide shall submit, in accordance with the guidelines issued under subsection (b)(1), to the Administrator—

"(A) a summary of each study concerning the active ingredient previously submitted by the registrant in support of the registration of a pesticide containing such active ingredient and considered by the registrant to be adequate to meet the requirements of section 3 and the regulations issued under such section;

"(B) a summary of each study concerning the active ingredient previously submitted by the registrant in support of the registration of a pesticide containing such active ingredient that may not comply with the requirements of section 3 and the regulations issued under such section but which the registrant asserts should be deemed to comply with such requirements and regulations;

"(C) a reformat of the data from each study summarized under subparagraph (A) or (B) by the registrant concerning chronic dosing, oncogenicity, reproductive effects, mutagenicity, neurotoxicity, teratogenicity, or residue chemistry of the active ingredient that were submitted to the Administrator before January 1, 1982;

"(D) where data described in subparagraph (C) are not required for the active ingredient by regulations issued under section 3, a reformat of acute and subchronic dosing data submitted by the registrant to the Administrator before January 1, 1982, that the registrant considers to be adequate to meet the requirements of section 3 and the regulations issued under such section;

"(E) an identification of data that are required to be submitted to the Administrator under section 6(g)(4) indicating an adverse effect of the pesticide;

"(F) an identification of any other information available that in the view of the registrant supports the registration;

"(G) a certification that the registrant or the Administrator possesses or has access to the raw data used in or generated by the studies that the registrant summarized under subparagraph (A) or (B);

"(H) either—

"(i) a commitment to submit data to fill each outstanding data requirement identified by the registrant; or

"(ii) an offer to share in the cost of developing such data to be incurred by a person who has made a commitment under clause (i) to submit such data, and an offer to submit to arbitration as described by section 3(c)(2)(B) with regard to such cost sharing; and

"(I) evidence of compliance with section 3(c)(1)(D)(ii) and regulations issued thereunder with regard to previously submitted data as if the registrant were now seeking the original registration of the pesticide.

"(2) TIME PERIODS.—

"(A) The information required by paragraph (1) shall be submitted to the Administrator—

"(i) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(B), not later than 12 months after the date of publication of the listing of such active ingredient;

"(ii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(C), not later than 12 months after the date of publication of the listing of such active ingredient; and

"(iii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(D), not later than 12 months after the date of publication of the listing of such active ingredient.

"(B) A registrant shall submit data in accordance with a commitment entered into under paragraph (1)(H) within a reasonable period of time, as determined by the Administrator, but not more than 48 months after the date the registrant submitted the commitment under such paragraph. The Administrator, on application of a registrant, may extend the period prescribed by the preceding sentence by no more than 2 years if extraordinary circumstances beyond the control of the registrant prevent the registrant from submitting data within such prescribed period.

"(3) CANCELLATION.—

"(A) If the registrant of a pesticide fails to submit the information required by paragraph (1) within the time prescribed by paragraph (2), the Administrator, by order and without hearing, shall cancel the registration of such pesticide.

"(B)(i) If the registrant of a pesticide submits the information required by paragraph (1) within the time prescribed by paragraph (2) and such information does not conform to the guidelines for submissions established by the Administrator, the Administrator shall determine whether the registrant made a good faith attempt to conform its submission to such guidelines.

"(ii) If the Administrator determines that the registrant made a good faith attempt to conform its submission to such guidelines, the Administrator shall provide the registrant a reasonable period of time to make any necessary changes or corrections.

"(iii)(I) If the Administrator determines that the registrant did not make a good faith attempt to conform its submission to such guidelines, the Administrator may issue a notice of intent to cancel the registration. Such a notice shall be sent to the registrant by certified mail.

"(II) The registration shall be canceled without a hearing or further notice at the end of 30 days after receipt by the registrant of the notice unless during that time a request for a hearing is made by the registrant.

"(III) If a hearing is requested, a hearing shall be conducted under section 6(d), except that the only matter for resolution at the hearing shall be whether the registrant made a good faith attempt to conform its submission to such guidelines. The hearing shall be held and a determination made within 75 days after receipt of a request for hearing.

"(g) PHASE FOUR.—

"(1) INDEPENDENT REVIEW AND IDENTIFICATION OF OUTSTANDING DATA REQUIREMENTS.—

"(A) The Administrator shall review the submissions of all registrants of pesticides containing a particular active ingredient under subsections (e)(3) and (f)(1) to determine if such submissions identified all the data that are missing or inadequate for such active ingredient. To assist the review of the Administrator under this section, the Administrator may require a registrant seeking reregistration to submit complete copies of studies summarized under subsection (f)(1).

"(B) The Administrator shall independently identify and publish in the Federal Register the outstanding data requirements for each active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is contained in a pesticide to be reregistered under this section. The Administrator, at the same time, shall issue a notice under section 3(c)(2)(B) for the submission of the additional data that are required to meet such requirements.

"(2) TIME PERIODS.—

"(A) The Administrator shall take the action required by paragraph (1)—

"(i) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(B), not later than 18 months after the date of the listing of such active ingredient;

"(ii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(C), not later than 24 months after the date of the listing of such active ingredient; and

"(iii) in the case of a pesticide containing an active ingredient listed under subsection (d)(2)(D), not later than 33 months after the date of the listing of such active ingredient.

"(B) If the Administrator issues a notice to a registrant under paragraph (1)(B) for the submission of additional data, the registrant shall submit such data within a reasonable period of time, as determined by the Administrator, but not to exceed 48 months after the issuance of such notice. The Administrator, on application of a registrant, may extend the period prescribed by the preceding sentence by no more than 2 years if extraordinary circumstances beyond the control of the registrant prevent the registrant from submitting data within such prescribed period.

"(h) PHASE FIVE.—

"(1) DATA REVIEW.—The Administrator shall conduct a thorough examination of all data submitted under this section concerning an active ingredient listed under subsection (d)(2) and of all other available data found by the Administrator to be relevant.

"(2) REREGISTRATION AND OTHER ACTIONS.—

"(A) Within 1 year after the submission of all data concerning an active ingredient of a pesticide under subsection (g), the Administrator shall determine whether pesticides containing such active ingredient are eligible for reregistration. For extraordinary circumstances, the Administrator may extend such period for not more than 1 additional year.

"(B) Before reregistering a pesticide, the Administrator shall obtain any needed product-specific data regarding the pesticide by use of section 3(c)(2)(B) and shall review such data within 90 days after its submission. The Administrator shall require that data under this subparagraph be submitted to the Administrator not later than 8 months after a determination of eligibility under subparagraph (A) has been made for each active ingredient of the pesticide, unless the Administrator determines that a longer period is required for the generation of the data.

"(C) After conducting the review required by paragraph (1) for each active ingredient of a pesticide and the review required by subparagraph (B) of this paragraph, the Administrator shall determine whether to reregister a pesticide by determining whether such pesticide meets the requirements of section 3(c)(5). If the Administrator determines that a pesticide is eligible to be reregistered, the Administrator shall reregister such pesticide within 6 months after the submission of the data concerning such pesticide under subparagraph (B).

"(D) If after conducting a review under paragraph (1) or subparagraph (B) of this paragraph the Administrator determines that a pesticide should not be reregistered, the Administrator shall take appropriate regulatory action.

"(i) COMPENSATION OF DATA SUBMITTER.—If data that are submitted by a registrant under subsection (e), (f), (g), or (h) are used to support the application of another person under section 3, the registrant who submitted such data shall be entitled to compensation for the use of such data as prescribed by section 3(c)(1)(D). In determining the amount of such compensation, the fees paid by the registrant under this section shall be taken into account.

"(j) FEES.—

"(1) INITIAL FEE FOR FOOD OR FEED PESTICIDE ACTIVE INGREDIENTS.—The registrants of pesticides that contain an active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is an active ingredient of any pesticide registered for a major food or feed use shall collectively pay a fee of $50,000 on submission of information under paragraphs (2) and (3) of subsection (e) for such ingredient.

"(2) FINAL FEE FOR FOOD OR FEED PESTICIDE ACTIVE INGREDIENTS.—

"(A) The registrants of pesticides that contain an active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is an active ingredient of any pesticide registered for a major food or feed use shall collectively pay a fee of $100,000—

"(i) on submission of information for such ingredient under subsection (f)(1) if data are reformatted under subsection (f)(1)(C); or

"(ii) on submission of data for such ingredient under subsection (f)(2)(B) if data are not reformatted under subsection (f)(1)(C).

"(B) The registrants of pesticides that contain an active ingredient that is listed under subsection (d)(2)(A) and that is an active ingredient of any pesticide registered for a major food or feed use shall collectively pay a fee of $150,000 at such time as the Administrator shall prescribe.

"(3) FEES FOR OTHER PESTICIDE ACTIVE INGREDIENTS.—

"(A) The registrants of pesticides that contain an active ingredient that is listed under subparagraph (B), (C), or (D) of subsection (d)(2) and that is not an active ingredient of any pesticide registered for a major food or feed use shall collectively pay fees in amounts determined by the Administrator. Such fees may not be less than one-half of, nor greater than, the fees required by paragraphs (1) and (2). A registrant shall pay such fees at the times corresponding to the times fees prescribed by paragraphs (1) and (2) are to be paid.

"(B) The registrants of pesticides that contain an active ingredient that is listed under subsection (d)(2)(A) and that is not an active ingredient of any pesticide that is registered for a major food or feed use shall collectively pay a fee of not more than $100,000 and not less than $50,000 at such time as the Administrator shall prescribe.

"(4) REDUCTION OR WAIVER OF FEES FOR MINOR USE AND OTHER PESTICIDES.—

"(A) In the case of an active ingredient of a pesticide that is registered solely for an ag-

ricultural or nonagricultural minor use or in the case of a pesticide the value or volume of use of which is small, the Administrator, on application and in the sole discretion of the Administrator, may reduce or waive the fees prescribed by paragraph (3).

"(B) In the case of an antimicrobial active ingredient for which the production level does not exceed 1,000,000 pounds per year, the Administrator, on application and in the sole discretion of the Administrator, may reduce or waive the fees prescribed by paragraph (3).

"(C)(i) Notwithstanding any other provision of this subsection, in the case of a small business registrant of a pesticide, the registrant shall pay a fee for the reregistration of each active ingredient of the pesticide that does not exceed an amount determined in accordance with this subparagraph.

"(ii) If during the 3-year period prior to reregistration the average annual gross revenue of the registrant from pesticides containing such active ingredient is—

"(I) less than $5,000,000, the registrant shall pay 0.5 percent of such revenue;

"(II) $5,000,000 or more but less than $10,000,000, the registrant shall pay 1 percent of such revenue; or

"(III) $10,000,000 or more, the registrant shall pay 1.5 percent of such revenue, but not more than $150,000.

"(iii) For the purpose of this subparagraph, a small business registrant is a corporation, partnership, or unincorporated business that—

"(I) has 150 or fewer employees; and

"(II) during the 3-year period prior to reregistration, had an average annual gross revenue from chemicals that did not exceed $40,000,000.

"(5) OTHER FEES.—On payment of fees for the reregistration of a pesticide in accordance with paragraph (1), (2), (3), or (4), the Administrator may not levy any other fees for the reregistration with respect to that active ingredient.

"(6) APPORTIONMENT.—

"(A) If two or more registrants are required to pay any fee prescribed by paragraph (1), (2), or (3) with respect to a particular active ingredient, the fees for such active ingredient shall be apportioned among such registrants on the basis of the market share in United States sales of the active ingredient for the 3 calendar years preceding the date of payment of such fee, except that—

"(i) small business registrants that produce the active ingredient shall pay fees in accordance with paragraph (4)(C); and

"(ii) registrants who have not marketed the active ingredient during such 3 calendar years but who choose to reregister such active ingredient shall pay 15 percent of such fees.

"(B) The Administrator, by order, may require registrants referred to in subparagraph (A) to submit such reports as the Administrator determines to be necessary to allow the Administrator to determine and apportion fees under this subsection.

"(C) If any such report is not submitted by a registrant after receiving notice of such report requirement, or if any fee prescribed by this subsection for an active ingredient is not paid by a registrant to the Administrator by the time prescribed under this subsection, the Administrator, by order and without hearing, may cancel each registration held by such registrant of a pesticide containing the active ingredient with respect to which the fee is imposed. The Administrator shall reapportion the fee among the remaining registrants and notify the registrants that the registrants are required to pay to the Administrator any unpaid balance of the fee within 30 days after receipt of such notice.

"(k) EXEMPTION OF CERTAIN REGISTRANTS.—The requirements of subsections (e), (f), (g), and (j) regarding data concerning an active ingredient and fees for review of such data shall not apply to any person who is the registrant of a pesticide to the extent that, under section 3(c)(2)(D), the person would not be required to submit or cite such data to obtain an initial registration of such pesticide.

"(l) REREGISTRATION FUND.—

"(1) ESTABLISHMENT.—There shall be established in the Treasury of the United States a reregistration fund.

"(2) SOURCE AND USE.—All fees collected by the Administrator under subsection (j) shall be deposited into the fund and shall be available to the Administrator, without fiscal year limitation, to carry out this section.

"(3) UNUSED FUNDS.—Money in the fund not currently needed to carry out this section shall be—

"(A) maintained on hand or on deposit;

"(B) invested in obligations of the United States or guaranteed thereby; or

"(C) invested in obligations, participations, or other instruments that are lawful investments for fiduciary, trust, or public funds.

"(4) ACCOUNTING.—The Administrator shall—

"(A) provide an annual accounting of the fees collected and disbursed from the fund; and

"(B) take all steps necessary to ensure that expenditures of such funds are used only to carry out this section.

"(m) JUDICIAL REVIEW.—Any failure of the Administrator to take any action required by this section shall be subject to judicial review under the procedures prescribed by section 16(b).".

(b) CONFORMING AMENDMENT.—Section 3 (7 U.S.C. 136a(g)) is amended by striking out subsection (g).

(c) DEFINITIONS.—

(1) ANTIMICROBIAL.—Section 2 (7 U.S.C. 136) (as amended by section 104 of this Act) is further amended by adding at the end thereof the following new subsection:

"(gg) ANTIMICROBIAL.—The term 'antimicrobial' means any active ingredient that is contained only in pesticides that are not registered for any food or feed use and that are—

"(1) sanitizers intended to reduce the number of living bacteria or viable virus particles on inanimate surfaces or in water or air;

"(2) bacteriostats intended to inhibit the growth of bacteria in the presence of moisture;

"(3) disinfectants intended to destroy or irreversibly inactivate bacteria, fungi, or viruses on surfaces or inanimate objects;

"(4) sterilizers intended to destroy viruses and all living bacteria, fungi, and their spores on inanimate surfaces; or

"(5) fungicides or fungistats.".

(2) PESTICIDE.—Section 2(u) (7 U.S.C. 136(u)) is amended—

(A) by striking out "and" before the first clause (2); and

(B) by inserting after "desiccant" the following: ", and (3) any substance or mixture of substances intended for a purpose described in subsection (gg)".

SEC. 106. ADMINISTRATOR'S AUTHORITY TO REQUIRE DATA ON INERT INGREDIENTS.

(a) DATA IN SUPPORT OF REGISTRATION.—The second sentence of section 3(c)(2)(A) (7 U.S.C. 136a(c)(2)(A)) is amended by inserting "(including information concerning an inert ingredient in a pesticide)" after "paragraph".

(b) PRIORITY LIST AND DATA REQUIREMENTS.—Section 3 (7 U.S.C. 136a) (as amended by section 105(b) of this Act) is further amended by adding at the end thereof the following new subsection:

"(g) PRIORITY LIST AND DATA REQUIREMENTS FOR INERT INGREDIENTS.—

"(1) ESTABLISHMENT OF LIST.—

"(A) Subject to paragraph (4), the Administrator shall establish a priority list of inert ingredients consisting of—

"(i) inert ingredients that appear to cause a pesticide to meet or exceed a criterion for initiating a public interim administrative review under subsection (c)(8);

"(ii) inert ingredients—

"(I) for which additional data are reasonably necessary to assess the risk that the inert ingredient may result in a pesticide causing an unreasonable adverse effect on the environment;

"(II) that are similar in molecular structure to a chemical that is oncogenic, mutagenic, or teratogenic or causes another similarly significant adverse effect; and

"(III) that have significant use in pesticides or to which there is significant exposure from pesticides; and

"(iii) inert ingredients for which additional data are reasonably necessary to assess the risk that the inert ingredient may result in a pesticide causing an unreasonable adverse effect on the environment and to which there is significant exposure from pesticides.

"(B) In establishing the priority list, the Administrator may take into account—

"(i) the differences in concept, usage, and environmental risk between various classes of pesticides; and

"(ii) data for evaluating such risk between agricultural and nonagricultural pesticides.

"(2) PUBLICATION OF LIST.—Not later than 90 days after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator shall publish the priority list required under paragraph (1). The Administrator shall publish revisions to such list at least annually.

"(3) JUDICIAL REVIEW.—The priority list under paragraph (1), the inclusion or exclusion of an ingredient on or from the priority list, and any revision of the priority list shall not be subject to judicial review.

"(4) NUMBER OF INGREDIENTS.—The priority list under paragraph (1) shall consist of not less than 50 inert ingredients unless the Administrator determines that there is not a sufficient number of inert ingredients meeting the requirements for listing under paragraph (1) to reach such minimum number. Such list may not exceed 75 inert ingredients.

"(5) ADDITIONAL DATA.—

"(A)(i) The Administrator shall determine whether additional data are required for an inert ingredient in a registered pesticide not later than 1 year after the inert ingredient is placed on the priority list under paragraph (1).

"(ii) The Administrator shall require submission of such data from each registrant of such pesticide under this Act or from manufacturers and processors of the inert ingredient under the Toxic Substances Control Act (15 U.S.C. 2601 et seq.).

"(iii) Such data shall be submitted within a reasonable time but not later than 4 years after the date of the request. The Administrator may extend the period for the submission of data by not more than 2 years if extraordinary circumstances beyond the control of the registrant or producer prevent the submission of the necessary data.

"(B) Data requirements imposed under subparagraph (A) or a decision not to require data for an inert ingredient shall be subject to judicial review under section 16(b).

"(6) EVALUATION.—Within 1 year after the receipt of additional data under paragraph (5) for an inert ingredient, the Administrator shall evaluate the data and take such steps as are appropriate to prevent unreasonable adverse effects on the environment caused by pesticides containing such inert ingredient. Under exceptional circumstances, the Administrator may extend the period for evaluation by not more than 1 year.

"(7) CONSTRUCTION.—This subsection shall not be construed to affect the authority of the Administrator—

"(A) to regulate under this Act impurities, contaminants, degradants, or other ingredients of pesticides that have not been deliberately added to the pesticides;

"(B) to regulate under this Act any deliberately added inert ingredient that has not previously been used in a pesticide or a significant new use in a pesticide of a deliberately added inert ingredient;

"(C) to require the submission of short-term, environmental fate, or residue studies for deliberately added inert ingredients; or

"(D) to require the submission of revised formula statements under subsection (c)(2)(B).".

(c) DATA COMPENSATION.—Section 3(c)(1)(D)(ii) (7 U.S.C. 136a(c)(1)(D)(ii)) is amended—

(1) by striking out "or for reregistration" and inserting in lieu thereof "for reregistration, or to support the safety of an inert ingredient"; and

(2) by inserting "or in support of the safety of an inert ingredient" before "by any other person".

SEC. 107. DEFINITION OF INGREDIENT STATEMENT.

Subsection (n) of section 2 (7 U.S.C. 136(n)) is amended to read as follows:

"(n) INGREDIENT STATEMENT.—The term 'ingredient statement' means a statement that contains—

"(1) the name and percentage of each active ingredient, and the total percentage of all inert ingredients, in a pesticide;

"(2) the name of each inert ingredient in the pesticide that the Administrator determines must appear in the ingredient statement because of the hazard that the Administrator has determined may be posed by the toxicity, use pattern, and concentration level of the inert ingredient in the pesticide;

"(3) if the pesticide contains arsenic in any form, a statement of the percentages of total and water soluble arsenic, calculated as elementary arsenic;

"(4) any other information concerning the chemical composition or identity of any active ingredient of the pesticide, including information on chemical equivalency, that the Administrator requires to appear in the ingredient statement so that the nature of the active ingredient is accurately represented; and

"(5) the name of any inert ingredient for which the Administrator has required additional data under section 3(g)(5) because such ingredient is listed under section 3(g)(1)(A) as appearing to cause a pesticide to meet or exceed a criterion for initiating a public interim administrative review under section 3(c)(8).".

SEC. 108. DISCLOSURE OF INERT INGREDIENTS.

The first sentence of section 10(d)(3) (7 U.S.C. 136h(d)(3)) is amended by striking out "If" and inserting in lieu thereof "Except with respect to disclosure of information on inert ingredients in ingredient statements in accordance with section 2(n), if".

SEC. 109. COMPENSATION FOR DATA ON INERT INGREDIENTS.

Subparagraph (D) of section 3(c)(2) (7 U.S.C. 136a(c)(2)) is amended to read as follows:

"(D)(i) No applicant for registration or amended registration of a pesticide who proposes to purchase a registered pesticide from another producer to formulate such purchased pesticide into the pesticide that is the subject of the application shall be required to—

"(I) submit or cite data pertaining to such purchased pesticide; or

"(II) offer to pay reasonable compensation otherwise required by paragraph (1)(D) for the use of any such data.

"(ii) No applicant for registration or amended registration of a pesticide who proposes to purchase an inert ingredient from another person to formulate the pesticide shall be required to offer to pay reasonable compensation otherwise required by paragraph (1)(D) for a study concerning such ingredient if any portion of the cost of the study will be or could be included in the price of the purchased ingredient.".

TITLE II—INFORMATION DISCLOSURE

SEC. 201. PUBLIC RIGHT TO KNOW.

(a) FACT SHEETS AND REPORTS.—Section 7 (7 U.S.C. 136e) is amended by adding at the end thereof the following new subsection:

"(e) PUBLIC RIGHT TO KNOW.—

"(1) FACT SHEETS.—Any producer operating an establishment in any State shall prepare or obtain a fact sheet complying with this subsection for each active ingredient manufactured or used at the establishment. The producer shall maintain copies of the fact sheet at the establishment and shall furnish a copy to any person on request.

"(2) CONTENTS.—

"(A) Each fact sheet for an ingredient required under paragraph (1) shall—

"(i) contain the chemical name, each common name, and any trade name of the ingredient and a summary of relevant health, safety, and environmental data concerning the ingredient; and

"(ii) be revised as often as is necessary to reflect current information about the ingredient.

"(B) The Administrator may require a fact sheet to be amended to provide accurate and clear information to the public.

"(3) REPORTS.—Each producer to whom this subsection applies shall furnish to the Administrator annually, in accordance with regulations published by the Administrator, a report that includes—

"(A) for each establishment operated by the producer in any State, the name of each ingredient for which a fact sheet is required that is manufactured or used at that establishment;

"(B) for each ingredient for which a fact sheet is required, the location of each establishment where such ingredient is manufactured or used by the producer; and

"(C) a current copy of each required fact sheet.

"(4) PUBLIC AVAILABILITY.—The fact sheets required by paragraph (1) and the annual reports required by paragraph (3) shall be available to the public.".

(b) CONFIDENTIAL INFORMATION.—Section 7(d) (7 U.S.C. 136e(d)) is amended by inserting "and production locations" after "names".

SEC. 202. DATA DISCLOSURE TO STATES.

Section 10 (7 U.S.C. 136h) is amended by adding at the end thereof the following new subsection:

"(h) DATA DISCLOSURE TO STATES.—

"(1) IN GENERAL.—The Administrator may disclose to a State any data or information acquired under this Act if the State assures the Administrator, and the Administrator determines, that the submitter of the data or information will receive no less protection with respect to the disclosure and use of the data or information by the State than is provided by section 3 and this section.

"(2) ACTION FOR JUST COMPENSATION.—For the purpose of any action that may lie against the United States for just compensation under section 1491 of title 28, United States Code—

"(A) the disclosure or use of data or information provided by the Administrator under paragraph (1) to a State in a manner inconsistent with this section or section 3 shall be considered a taking of property; and

"(B) the act of a State with respect to such data or information shall be considered an act of the United States.

"(3) REQUIRED DISCLOSURE.—The Administrator shall disclose to a State any data or information acquired under this Act if the State assures the Administrator, and the Administrator determines, that—

"(A) the submitter of the data or information will receive no less protection with respect to the disclosure and use of the data or information by the State than is provided by section 3 and this section; and

"(B) the law of the State allows the submitter of the data or information to recover just compensation in a civil action against the State for losses resulting from the disclosure or use of the data or information by the State or its employees or agents in a manner inconsistent with section 3 or this section.".

TITLE III—REVIEW AND CANCELLATION

SEC. 301. PUBLIC INTERIM ADMINISTRATIVE REVIEW.

(a) IN GENERAL.—Paragraph (8) of section 3(c) (7 U.S.C. 136a(c)(8)) is amended to read as follows:

"(8) PUBLIC INTERIM ADMINISTRATIVE REVIEW.—

"(A) A public interim administrative review process to determine whether the use of a pesticide (including a category of pesticides) may cause unreasonable adverse effects on the environment shall be conducted in accordance with this paragraph.

"(B)(i) Criteria for initiating a public interim administrative review of a pesticide shall be set forth in regulations published by the Administrator.

"(ii) Such criteria shall be established on the basis of levels of risk and may include consideration of currently available exposure data.

"(iii) Absence of exposure data shall not delay or preclude initiation of a public interim administrative review. The Administrator may decline to initiate a public interim administrative review solely on the basis of exposure only if adequate data on all relevant means of exposure have been considered.

"(C) The Administrator may not initiate a public interim administrative review process to develop a risk-benefit evaluation of a pesticide or any of its uses before initiating a formal action to cancel, suspend, or deny the registration of such pesticide required under this Act unless such public interim administrative review process is based on a validated test or other significant evidence raising prudent concerns of unreasonable adverse risk to man or to the environment.

"(D)(i) On receipt of information respecting a pesticide demonstrating that the criteria for initiating a public interim administrative review established under subparagraph (B) have been met, the Administrator shall immediately notify all registrants of such pesticide and provide the registrants with appropriate information and an explanation of the manner in which the criteria have been met.

"(ii) Not later than 30 days after receipt of a notice provided under clause (i), a registrant may respond to such notice.

"(iii) Not later than 60 days after the Administrator provides a notice under clause (i) concerning a pesticide, the Administrator shall determine whether a public interim administrative review of the pesticide shall be initiated.

"(E) If the Administrator intends to initiate a public interim administrative review of a pesticide that is registered for agricultural uses, the Administrator shall notify the Secretary of Agriculture of the intention to initiate such review and the reasons therefor.

"(F)(i) Any public interim administrative review proceeding shall be initiated and conducted in accordance with regulations published by the Administrator. Such regulations shall provide that a public interim administrative review shall include—

"(I) a notice of initiation of the public interim administrative review and opportunity for public comment on such notice;

"(II) a notice of a preliminary determination and opportunity for public comment on such notice; and

"(III) a notice of a final determination,

except that such regulations may authorize the Administrator to combine or forgo any such notice.

"(ii) Any proposed determination of the Administrator shall be submitted to the Scientific Advisory Panel established under section 25(d) at its next scheduled meeting for comment solely on relevant scientific issues. The public may submit comments to the Scientific Advisory Panel concerning such issues.

"(iii)(I) The notice of the initiation of a public interim administrative review or the notice of a preliminary determination shall state the basis for such review or determination and include a request for any additional data needed and a bibliography of all scientific data and studies and expert analyses concerning the risks or benefits of the pesticide that are under review.

"(II) Information in the bibliography shall be made available to the public consistent with section 10. The Administrator shall determine, to the extent feasible, before the initiation of the public interim administrative review which data in the bibliography may be disclosed to the public under section 10(d)(1).

"(III) If the Administrator receives additional data concerning such risks or benefits, the Administrator, within 30 days after receiving the additional data, shall revise the bibliography to reflect such data and make the revised bibliography available to the public.

"(iv)(I) Not later than 90 days after the publication of a notice of the initiation of a public interim administrative review or a notice of a preliminary determination, comments may be submitted on such review or determination. Any person who submits comments shall disclose to the Administrator all scientific data and studies and expert analyses in the possession of such person concerning the risks or benefits of the uses of the pesticide that are under review that were not included in the bibliography included in such notice.

"(II) If such person receives additional scientific data or studies or expert analyses of such data or studies that were not included in such bibliography, the person shall disclose such scientific data, studies, and expert analysis to the Administrator within 30 days after receipt.

"(v) Not later than 18 months after the initiation of a review, the Administrator shall decide which regulatory action (if any) to take regarding the pesticide that is the subject of the review and shall publish the decision.

"(vi) The time limits specified in this subparagraph may not be extended, except in exceptional circumstances in which—

"(I) additional data critical to a fair and accurate determination of risks posed by the pesticide subject to review are required;

"(II) the extension is for a period limited to the time required to obtain such data on an expedited basis and in no event to exceed 1 year; and

"(III) the Administrator acted to obtain the additional data at the time the public interim administrative review was initiated unless the Administrator could not have reasonably known of the need for such data at such time.

"(G) Any person may seek judicial review under section 16(a) of the failure of the Administrator to act within the time period prescribed under this paragraph.".

(b) SCIENTIFIC ADVISORY PANEL.—The first sentence of section 25(d) (7 U.S.C. 136w(d)) is amended by striking out "The" and inserting in lieu thereof "Except with respect to a referral under section 3(c)(8)(F), the".

(c) APPLICATION OF AMENDMENTS.—The amendments made by this section shall apply to public interim administrative reviews under section 3(c)(8) of the Federal Insecticide, Fungicide, and Rodenticide Act initiated after January 1, 1987.

SEC. 302. HEARING PROCEDURES AFTER PUBLIC INTERIM ADMINISTRATIVE REVIEW.

Section 6 (7 U.S.C 136d) is amended—

(1) by redesignating subsection (j) as subsection (i); and

(2) by inserting after subsection (e) the following new subsection:

"(f) HEARING PROCEDURES AFTER PUBLIC INTERIM ADMINISTRATIVE REVIEW.—

"(1) GENERAL RULE.—Except as provided in paragraphs (2) and (3), subsection (d) shall govern any hearing under such subsection—

"(A) that results from the final determination of the Administrator in a public interim administrative review proceeding under section 3(c)(8) that is initiated after January 1, 1987;

"(B) that includes an opportunity for comment on a notice of preliminary determination issued in connection with such review; and

"(C) for which the time between the first public notice for such review under section 3(c)(8)(F) and the close of the last comment period provided for such review is not less than 180 days.

"(2) REQUEST FOR HEARING.—Any person who is adversely affected by a decision of the Administrator respecting a pesticide (including a person without an economic interest in such pesticide) following a public interim administrative review described by paragraph (1) may request, or intervene in, a hearing in the manner provided by subsection (b)(2)(B) within 30 days after such decision. A person may request a hearing, or intervene in a hearing, only if that person submitted comments during the public interim administrative review proceeding and otherwise complied with section 3(c)(8)(F).

"(3) PROCEDURES.—

"(A) At the request of a party, an administrative law judge conducting a hearing may receive into evidence portions of a public interim administrative review record and other evidence, if the party demonstrates that such portions of the record and other evidence are relevant and material to the disputed issues and are not unduly repetitious, and if a competent witness is made available to be cross-examined on all matters relating to such evidence. Direct testimony of witnesses concerning scientific data or studies that were not, but could have been, obtained and submitted in the public interim administrative review proceeding by the exercise of due diligence by the offering party shall not be admissible.

"(B) The right of other parties to confront and cross-examine witnesses with respect to such evidence shall be preserved with respect to material issues of adjudicative fact, so long as such cross-examination is not unduly repetitious.

"(C)(i) Not later than 120 days after an administrative law judge is appointed, prehearing matters shall be completed and the hearing shall commence.

"(ii) The administrative law judge may establish a schedule for prehearing matters, including discovery and motions, and shall ensure that the hearing schedule is met. The administrative law judge shall issue such orders as are appropriate for the purpose of simplifying and clarifying issues, specifying the order of presentation of witnesses, and allocating the time for cross-examination, briefing, and decision.

"(iii) Discovery shall be permitted after the expiration of 120 days after the appointment of the administrative law judge on a determination by the administrative law judge that—

"(I) such discovery shall not in any way unreasonably delay the proceeding;

"(II) the information to be obtained is not otherwise obtainable; and

"(III) such information has significant probative value and is necessary to obtain relevant evidence needed to resolve a material issue in dispute.

"(D) Any challenge to—

"(i) the authority to issue; or

"(ii) the procedural correctness of the issuance of,

any notice of intent to cancel or change classification or to any request for a hearing or motion to intervene shall be filed with the administrative law judge not later than 30 days before the commencement of the evidentiary phase of the hearing.

"(E) Not later than 30 days before the hearing commences, each party shall make available to the other parties the names of the expert and other witnesses the party expects to call, together with a brief narrative summary of their expected testimony and a list of all documents and exhibits that the party expects to introduce into evidence. Thereafter, witnesses, documents, or exhibits may be added and narrative summaries of

expected testimony amended on motion by a party.

"(F) If new studies become available that were not available during the public interim administrative review, the administrative law judge, on request of any party and when in the judgment of the administrative law judge it is necessary, may submit such studies to the Scientific Advisory Panel established under section 25(d) for supplemental comment on an expedited basis under such time limits as may be established by the administrative law judge.

"(G) The administrative law judge shall schedule the presentation and examination of witnesses so that the presentation of evidence is completed within 60 days after the commencement of the hearing, except that the schedule shall not prejudice the right of a party to present evidence. The person who requested a hearing on an issue shall have the burden of going forward to present an affirmative case and shall have the burden of proof as to that issue.

"(H) A hearing conducted in accordance with this subsection shall be completed and the Administrator shall make a final decision within 300 days after the issuance of the notice that gave rise to the hearing. The time limit imposed by this subparagraph may not be extended, except in exceptional circumstances in which such extension is essential for a fair and accurate determination of pivotal facts central to the proceeding. In no event may such time limit be extended more than 180 days. Any other time limit imposed by this paragraph may be extended for good cause.

"(I) Failure to complete a hearing and make a final decision within the time period prescribed by subparagraph (H) shall be grounds for a civil action in a district court of the United States seeking an order to establish a schedule requiring the prompt completion of the hearing, but shall not be grounds for termination of the hearing or for making a final decision respecting the pesticide that is the subject of the hearing.".

SEC. 303. CANCELLATION AND CHANGE IN CLASSIFICATION OR LABELS.

Subsection (b) of section 6 (7 U.S.C. 136d(b)) is amended to read as follows:

"(b) CANCELLATION AND CHANGE IN CLASSIFICATION OR LABELS.—

"(1) NOTICE OF CANCELLATION OR CHANGE IN CLASSIFICATION.—

"(A) If it appears to the Administrator that a pesticide or its labeling or other material required to be submitted does not comply with this Act or, when used in accordance with widespread and commonly recognized practice, generally causes unreasonable adverse effects on the environment, the Administrator may issue a notice of intent—

"(i) to cancel its registration or to change its classification, together with the reasons (including the factual basis) for the action of the Administrator; or

"(ii) to hold a hearing to determine whether or not its registration should be canceled or its classification changed.

"(B) A notice issued under subparagraph (A) shall be sent to each registrant of the pesticide with respect to which the notice is issued and shall be made public.

"(C) In determining whether to issue a notice under subparagraph (A), the Administrator shall include among those factors to be taken into account the impact of the action proposed in such notice on production and prices of agricultural commodities, retail food prices, and otherwise on the agricultural economy.

"(D)(i) Not later than 60 days before sending a notice to a registrant or making public such notice under subparagraph (B), whichever occurs first, the Administrator shall provide the Secretary of Agriculture with a copy of the proposed notice under subparagraph (A) and an analysis of the impact of the proposed action on the agricultural economy. The Secretary of Agriculture shall provide comments on such notice and analysis to the Administrator within 30 days after receiving the copy of such notice.

"(ii)(I) If the Secretary of Agriculture provides such comments in writing within 30 days after receiving the copy of such notice, the Administrator shall publish in the Federal Register (with the notice) the comments of the Secretary and the response of the Administrator with regard to the comments of the Secretary.

"(II) If the Secretary of Agriculture does not provide such comments in writing within 30 days after receiving the copy of such notice, the Administrator may notify the registrant and make public the notice at any time after such 30-day period.

"(iii) The time requirements imposed by this subparagraph may be waived or modified to the extent agreed on by the Administrator and the Secretary of Agriculture.

"(E) If the Administrator finds that suspension of a pesticide registration is necessary to prevent an imminent hazard to human health, the Administrator may waive the requirements of notice to the Secretary of Agriculture prescribed by subparagraph (D) and submission to the Scientific Advisory Panel under section 25(d) and proceed in accordance with subsection (c).

"(2) HEARING.—

"(A) The action proposed in a notice issued under paragraph (1)(A) shall become final and effective at the end of 30 days after receipt by the registrant or publication of a notice issued under paragraph (1)(B), whichever occurs later, unless within that time—

"(i) the registrant makes the necessary corrections, if possible; or

"(ii) a request for a hearing is made by a person adversely affected by the notice.

"(B) Whenever a request for a hearing is made, the request shall—

"(i) identify with particularity the findings and conclusions of the decision of the Administrator that are disputed; and

"(ii) include a complete statement of the reasons and factual basis that support the request for a hearing.

"(C) Any party to the proceeding may identify findings and conclusions in dispute.

"(D) If a hearing is held pursuant to such a request or the determination of the Administrator under paragraph (1)(A)(ii), a decision pertaining to registration or classification issued after completion of such hearing shall be final.

"(E) On receipt of a request for a hearing from a person without an economic interest in the pesticide with respect to which the hearing is requested, the Administrator shall convene such hearing if the request presents a substantial issue of fact, as determined by the Administrator, pertaining to whether such pesticide poses an unreasonable risk to man or the environment.

"(3) FACTORS.—In taking any action under paragraph (1), the Administrator shall—

"(A) consider restricting a use or uses of a pesticide as an alternative to cancellation and fully explain the reasons for such restriction; and

"(B) consider the impact of such action on production and prices of agricultural commodities, retail food prices, and otherwise on the agricultural economy, and publish in the Federal Register an analysis of such impact.

"(4) LABEL CHANGES.—

"(A)(i) The Administrator may—

"(I) notify the registrant of a pesticide of a label change proposed by the Administrator that may be made by rulemaking under subparagraph (B); and

"(II) provide that the registrant may submit comments to the Administrator on such proposed change during the 30-day period beginning on the date of the receipt of such notice.

"(ii) If a registrant who is notified by the Administrator of a proposed label change notifies the Administrator that the registrant does not object to such change, such change shall take effect as prescribed by the Administrator.

"(iii) If a registrant who is notified by the Administrator of a proposed label change does not submit comments to the Administrator in such 30-day period, the Administrator shall send such registrant a second notice stating that, if such registrant does not submit any comments to the Administrator in the 30-day period beginning on the date the registrant receives the second notice, the registration of such registrant shall be canceled without a hearing or further notice. The registration of a registrant who does not submit comments on a second notice within such 30-day period shall be canceled without a hearing or further notice.

"(iv) If in response to a notice under this subparagraph a registrant submits comments to the Administrator objecting to a proposed label change, the Administrator may proceed under subparagraph (B).

"(B)(i) The Administrator may require changes to the label of a pesticide by informal rulemaking under this paragraph unless the changes—

"(I) are equivalent to a cancellation of a use;

"(II) render the pesticide unmarketable; or

"(III) otherwise have a major economic impact on persons affected by such changes.

"(ii) If the Administrator may not require changes to the label of a pesticide by informal rulemaking under this paragraph because of subclause (I), (II), or (III) of clause (i), the Administrator may only require such changes by a proceeding authorized by other provisions of this Act.

"(C)(i) After the promulgation of a regulation under subparagraph (B), the Administrator shall—

"(I) notify each registrant of the pesticide subject to the regulation of the label change required by the regulation; and

"(II) provide a 30-day period for each registrant to apply to the Administrator for an amendment to the registration to comply with the regulation.

"(ii) If a registrant does not apply for such an amendment within such period, the Administrator shall issue a notice of intent to cancel the registration of such registrant in accordance with paragraph (2). For purposes of paragraph (2), such notice shall be deemed to have been issued under paragraph (1).

"(D) A registrant or user of a pesticide subject to a regulation issued under subparagraph (B) may request a hearing under subsection (d) on such regulation in accordance with paragraph (2). The scope of the hearing shall be limited to—

"(i) whether the pesticide complies with the regulation;

"(ii) whether the regulation by its terms is applicable to such pesticide; and

"(iii) whether, because of significant information that was not (and could not reasonably have been) presented in the proceeding wherein the regulation was promulgated, it would be unreasonable to require such pesticide to comply with the regulation.

"(E)(i) Except as provided in clause (ii), in an action under 16(e) for review of a regulation issued under subparagraph (B), the court, on request, shall postpone the effective date of the regulation until completion of the review action if the petitioner shows—

"(I) a likelihood of success on the merits in such action; and

"(II) that the implementation of the regulation before completion of the action would cause a risk of substantial harm to the petitioner.

"(ii) A court in a review action under section 16(e) shall not postpone the effective date of a regulation issued under subparagraph (B) if the Administrator shows that failure to implement the regulation before completion of the action would cause a risk of substantial harm to health or the environment.".

SEC. 304. PUBLIC HEARINGS AND SCIENTIFIC REVIEW.

Section 6(d) (7 U.S.C. 136d(d)) is amended—

(1) by striking out the fifth through ninth sentences;

(2) in the tenth sentence—

(A) by striking out "(including the report of the Academy)"; and

(B) by striking out "90 days thereafter" and inserting in lieu thereof "18 months after issuance of the notice that gave rise to the hearing";

(3) by inserting before the last sentence the following new sentence: "The time period prescribed by the preceding sentence may be extended by the Administrator under extraordinary circumstances for not more than 1 year."; and

(4) in the heading, by striking out "AND SCIENTIFIC REVIEW".

SEC. 305. ADMINISTRATIVE CHANGES.

(a) ADMINISTRATIVE REVIEW.—Section 6 (7 U.S.C. 136d) (as amended by section 302 of this Act) is further amended by inserting after subsection (f) the following new subsection:

"(g) GENERAL PROVISIONS.—

"(1) VOLUNTARY CANCELLATION.—A registrant at any time may request that any of its pesticide registrations be canceled or be amended to delete one or more uses. Before acting on such request, the Administrator shall publish in the Federal Register a notice of the receipt of the request. Thereafter, the Administrator may approve such a request.

"(2) PUBLICATION OF NOTICE.—A notice of denial of registration, intent to cancel, suspension, or intent to suspend issued under this Act, a notice issued under subsection (d)(4) or (e)(5)(A) of section 3A, or a notice issued under the third sentence of subsection (b)(4)(A) shall be published in the Federal Register and shall be sent by certified mail, return receipt requested, to the registrant's or applicant's address of record on file with the Administrator. If the mailed notice is returned to the Administrator as undeliverable at that address, if delivery is refused, or if the Administrator otherwise is unable to accomplish delivery of the notice to the registrant or applicant after making reasonable efforts to do so, the notice shall be deemed to have been received by the registrant or applicant on the date the notice was published in the Federal Register.

"(3) EXISTING STOCKS.—The Administrator may permit the continued use, distribution, or sale, or any combination thereof, of existing stocks of a pesticide whose registration is canceled under this Act to such extent, under such conditions, during such periods, and for such uses as the Administrator may specify if the Administrator determines that such distribution, sale, or use is not inconsistent with the purposes of this Act and will not cause unreasonable adverse effects on the environment.

"(4) ADDITIONAL INFORMATION.—If at any time after the registration of a pesticide the registrant has additional information regarding unreasonable adverse effects on the environment of the pesticide, the registrant shall submit such information to the Administrator. For purposes of this paragraph, the term 'information' includes factual information and expert opinion regarding risks or benefits.".

(b) CONFORMING AMENDMENTS.—

(1) DENIAL OF REGISTRATION.—Section 3(c)(6) (7 U.S.C. 136a(c)(6)) is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "except as otherwise provided in this paragraph. A request for a hearing under section 6 shall be made within 30 days after the receipt of such notification. The Administrator may issue regulations governing the right to a hearing under section 6 with regard to the denial of any application for the registration of a pesticide containing an ingredient that was canceled under section 6. Under such regulations, due weight shall be given to the desirability of finality of prior proceedings and determinations and the extent that the applicant had an opportunity to participate in earlier proceedings. Section 6(g)(2) applies with respect to the publication of a notice of a denial of a registration.".

(2) CANCELLATION AFTER FIVE YEARS.—Section 6(a) (7 U.S.C. 136d(a)) is amended—

(A) by striking out paragraph (2); and

(B) in paragraph (1)—

(i) by striking out "(1) PROCEDURE.—";

(ii) by striking out ": Provided" and all that follows in the first sentence and inserting in lieu thereof a period; and

(iii) by inserting the matter in such paragraph after the subsection heading so that it is flush with the full left-hand margin of the section.

(3) CONDITIONAL REGISTRATION.—Section 6(e)(1) (7 U.S.C. 136d(e)(1)) is amended by striking out ": Provided" and all that follows and inserting in lieu thereof a period.

SEC. 306. CANCELLATION OF REGISTRATION BASED ON FALSE OR INVALID DATA.

Section 6 (7 U.S.C. 136d) (as amended by section 305(a) of this Act) is further amended by inserting after subsection (g) the following new subsection:

"(h) SUSPENSION AND CANCELLATION OF REGISTRATION BASED ON FALSE OR INVALID DATA.—

"(1) NOTICE.—

"(A) The Administrator shall immediately issue an order of suspension and a notice of intent to cancel the registration of a pesticide if—

"(i) before the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator has previously determined in the Industrial Biotest validation process conducted by the Administrator that data submitted by the registrant of the pesticide to the Administrator in support of such registration were invalid;

"(ii) the data referred to in clause (i)—

"(I) have not been replaced as of the effective date of such Act; or

"(II) are in the process of being replaced on the effective date of such Act but are not submitted to the Administrator by April 1, 1988; and

"(iii) such data are material to the registration.

"(B) The Administrator may issue an order of suspension and a notice of intent to cancel the registration of a pesticide by a registrant who cited data described in subparagraph (A) in support of the registration of the pesticide.

"(2) INVALID DATA.—

"(A) If, after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator determines that invalid data are submitted by a registrant to the Administrator in support of a registration of a pesticide, the Administrator may—

"(i) require the registrant to submit valid replacement studies or data on an expedited schedule and to submit interim progress reports; or

"(ii) issue a notice of intent to cancel such registration if the Administrator determines that such action would be in the public interest, taking into account the scope of the invalid data and the need to use the data to determine whether the pesticide may cause unreasonable adverse effects on the environment.

"(B) If, after the effective date of such Act, the Administrator determines that invalid data are cited by a registrant to the Administrator in support of a registration of a pesticide, the Administrator may—

"(i) require the registrant to submit valid replacement studies or data on an expedited schedule and to submit interim progress reports; or

"(ii) issue a notice of intent to cancel such registration if the Administrator determines that such action would be in the public interest, taking into account the scope of the invalid data and the need to use the data to determine whether the pesticide may cause unreasonable adverse effects on the environment.

"(3) FALSE DATA.—If a registrant willfully submits material data known to be false in support of the registration of a pesticide, the Administrator shall immediately issue notices of intent to suspend and cancel such registration.

"(4) HEARING.—

"(A) Any suspension or cancellation under this subsection shall become final and effective at the end of the 30-day period beginning on the date of receipt by the registrant of a notice issued under this subsection unless during such period a request for a hearing is made by a person adversely affected.

"(B) A hearing under this paragraph shall be conducted in accordance with the procedures prescribed by subsection (c) or (d), as appropriate.

"(C) In the case of a hearing held with respect to action proposed to be taken under paragraph (1), the only matters for resolution shall be whether—

"(i) in response to a notice of the Administrator issued under section 3(c)(2)(B) or other formal notice, data previously determined by the Administrator to be invalid—

"(I) have not been replaced as of the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986; or

"(II) are in the process of being replaced on the effective date of such Act but are not submitted to the Administrator by April 1, 1988; and

"(ii) the data are material to the registration.

"(D) In the case of a hearing held with respect to action proposed to be taken under paragraph (2), the only matters for resolution shall be whether data are invalid, material, and necessary to adequately determine whether a pesticide may cause unreasonable adverse effects on the environment.

"(E) In the case of a hearing held with respect to action proposed to be taken under paragraph (3), the only matters for resolution shall be whether a registrant willfully submitted material data known to be false.

"(F) A decision after completion of a hearing conducted under this paragraph shall be final.

"(G) Notwithstanding any other provision of this Act, a hearing shall be held, and a determination made, under this subsection within 75 days after the receipt of a request for such hearing.".

TITLE IV—RECORDS AND INSPECTIONS

SEC. 401. RECORDS.

(a) IN GENERAL.—Section 8 (7 U.S.C. 136f) is amended to read as follows:

"SEC. 8. RECORDS.

"(a) AUTHORITY TO REQUIRE RECORDS.—

"(1) IN GENERAL.—The Administrator, by regulation, may require any producer or exporter of pesticides, registrant, applicant for registration, applicant for or holder of an experimental use permit, pesticide testing facility, or commercial applicator, or any person who distributes or sells any pesticide—

"(A) to prepare, and to maintain for reasonable periods of time, such records as the Administrator finds to be necessary for the effective implementation or enforcement of this Act;

"(B) to furnish to the Administrator reports stating the location where the records are maintained; and

"(C) to furnish a copy of any such record to the Administrator on written request.

"(2) RETAIL DISTRIBUTION OR SALE.—Except as provided in subsections (c), (d), and (e), the Administrator may not require any person who distributes or sells at retail a registered pesticide that is not subject to a restricted use classification under section 3 to prepare, maintain, or furnish any record under this subsection with respect to such pesticide.

"(b) LIMITATIONS.—The Administrator may not, under the authority of subsection (a), require any person to maintain records of—

"(1) financial data, sales data, or pricing data;

"(2) personnel data, except for data concerning exposure of employees to pesticides or ingredients of pesticides, or concerning health effects on employees that could reasonably be attributable to such exposure; or

"(3) research or test data (other than data relating to a registered pesticide, data relating to any pesticide for which an application for registration or for an experimental use permit has been filed, or data relating to testing at a pesticide testing facility).".

(b) DEFINITION OF PESTICIDE TESTING FACILITY.—Section 2 (7 U.S.C. 136) (as amended by section 105(c)(1) of this Act) is further amended by adding at the end thereof the following new subsection:

"(hh) PESTICIDE TESTING FACILITY.—The term 'pesticide testing facility' means any person that conducts any test, study, survey, or investigation of the properties, effects, or behavior of any pesticide (or any ingredient, metabolite, or degradation product thereof) on its own behalf or on behalf of any registrant, applicant for registration, or other person who sells or distributes the pesticide (or contemplates selling or distributing the pesticide). The term does not include any person solely on account of the participation of such person as a cooperator in field testing of a pesticide in compliance with an experimental use permit issued under section 5.".

(c) CONFORMING AMENDMENTS.—The second sentence of section 26(c) (7 U.S.C. 136w-1(c)) is amended—

(1) by striking out "Notwithstanding the provisions of section 2(e)(1) of this Act" and inserting in lieu thereof "Notwithstanding section 2(kk)";

(2) by striking out "8(b) of this Act" and inserting in lieu thereof "9"; and

(3) by striking out "9(a) of this Act" and inserting in lieu thereof "9".

SEC. 402. INSPECTIONS.

(a) AUTHORITY TO ENTER, INSPECT, AND COPY.—Subsection (a) of section 9 (7 U.S.C. 136g(a)) is amended to read as follows:

"(a) AUTHORITY TO ENTER, INSPECT, AND COPY.—An officer or employee of the United States or of any State, duly designated by the Administrator, is authorized at reasonable times, as provided by this section—

"(1) to enter any place where any pesticide, active ingredient, or device is distributed or sold, to inspect and obtain samples of any pesticide, active ingredient, or device being distributed or sold at such place or of any packaging or labeling of any such pesticide, active ingredient, or device;

"(2) in the case of a pesticide the registration of which has been canceled or suspended under section 6 and that the Administrator has reasonable cause to believe may pose a danger to public health or safety, to enter any place where the pesticide is stored to inspect and obtain samples of any pesticide, active ingredient, or device being stored at such place or of any packaging or labeling of any such pesticide, active ingredient, or device;

"(3) to enter any place where there are located any records required under this Act or any place reported under section 8(a) as a location where such records are maintained, to inspect and obtain copies of such records;

"(4) to enter any pesticide testing facility—

"(A) to inspect the facility and the testing being conducted at the facility; and

"(B) to inspect and obtain copies of any records required by or under the authority of this Act to be maintained by the pesticide testing facility; and

"(5) to enter any place where such officer or employee has reason to believe that this Act has been or is being violated by any person other than a person acting in the capacity of a private applicator, to inspect such place to obtain evidence of such violation.".

(b) WARRANTS.—Subsection (b) of section 9 (7 U.S.C. 136g(b)) is amended to read as follows:

"(b) WARRANTS.—An officer or employee of the United States or of any State, duly designated by the Administrator, is empowered to obtain and execute warrants authorizing—

"(1) entry, inspection, and obtaining of evidence for the purposes of this section;

"(2) inspection and copying of all records required under this Act; and

"(3) seizure of any pesticide or device that is in violation of this Act.".

(c) PROCEDURE, COORDINATION, AND CRIMINAL VIOLATIONS.—Section 9 (7 U.S.C. 136g) is amended by adding at the end thereof the following new subsections:

"(d) PROCEDURE.—

"(1) CREDENTIALS AND STATEMENTS.—Before any entry or inspection of any premises not open to the general public is made under this section, the person conducting the inspection shall present to the person in charge of the premises appropriate credentials, and a written statement of the reason for the entry or inspection and whether a violation of this Act is suspected.

"(2) PROMPTNESS.—Each entry or inspection shall be commenced and completed with reasonable promptness.

"(3) SAMPLES.—If the person conducting the entry or inspection obtains a sample of a pesticide or device, before leaving the premises such person shall give to the person in charge of the premises a receipt describing the sample and, if requested and practicable, a portion of each such sample equal in volume or weight to the portion retained. If an analysis of any such sample is made, a copy of the results of such analysis shall be furnished on request to the person in charge of the premises.

"(e) COORDINATION.—The Administrator shall coordinate actions taken under this section with actions taken under other Federal laws for the purpose of avoiding duplication of inspections.

"(f) CRIMINAL VIOLATIONS.—An officer or employee of the United States or of any State, duly designated by the Attorney General, may obtain and execute a warrant in accordance with rule 41 of the Federal Rules of Criminal Procedure if a court or magistrate determines under such rule that there is probable cause to believe that—

"(1) a criminal violation of this Act has occurred or is occurring on the property to be entered or searched; or

"(2) evidence of a criminal violation of this Act will be found on such property.".

TITLE V—EXPORTS

SEC. 501. DEFINITION OF MISBRANDED.

Section 2(q)(1) (7 U.S.C. 136(q)(1)) is amended—

(1) by striking out "or" at the end of subparagraph (G);

(2) by striking out the period at the end of subparagraph (H) and inserting after the close quotation marks "; or"; and

(3) by adding at the end thereof the following new subparagraph:

"(I) in the case of a pesticide intended for export that is substantially similar in composition and use pattern to a pesticide registered under section 3, the label—

"(i) is not written in an appropriate language as required by section 17(a)(4)(A); or

"(ii) does not contain the same health, safety, and hazard precautions as the pesticide registered under section 3, unless such precautions on the label are in conflict with the law of the importing country.".

SEC. 502. DEFINITION OF IMPORTING COUNTRY.

Section 2 (7 U.S.C. 136) (as amended by section 401(b) of this Act) is further amended by adding at the end thereof the following new subsection:

"(ii) IMPORTING COUNTRY.—The term 'importing country' means the first country to which a pesticide, device, or active ingredient, subject to the notification requirements of section 17(a), is exported from the United States.".

SEC. 503. PESTICIDES AND DEVICES INTENDED FOR EXPORT.

(a) IN GENERAL.—Subsection (a) of section 17 (7 U.S.C. 136o(a)) is amended to read as follows:

"(a) PESTICIDES AND DEVICES INTENDED FOR EXPORT.—

"(1) VIOLATIONS.—Notwithstanding any other provision of this Act, no pesticide or device, or active ingredient used in producing a pesticide, intended solely for export to any foreign country shall be considered in violation of this Act when prepared or packed according to the specifications or directions of the foreign purchaser, except that producers of such pesticides and devices and active ingredients used in producing pesticides shall be subject to section 2(p), subparagraphs (A), (C), (D), (E), (G), (H), and (I) of section 2(q)(1), subparagraphs (A), (B), (C)(i), (C)(iii), and (D) of section 2(q)(2), sections 7 and 8, and paragraphs (2), (3), and (4) of this subsection.

"(2) EXPORT OF RESTRICTED USE OR UNREGISTERED PESTICIDES.—

"(A) This paragraph applies to a pesticide, device, or active ingredient—

"(i) for which a restricted use classification has become effective under section 3;

"(ii) for which a cancellation or suspension has become effective under section 6;

"(iii) the registration of which has been voluntarily withdrawn by the registrant, if such withdrawal is associated with concern over potential adverse public health or environmental effects; or

"(iv) that is not registered under section 3 for any use.

"(B) No pesticide, device, or active ingredient described in subparagraph (A) may be exported to any foreign country by any person unless, at least 30 days before the first shipment each year of such pesticides, devices, or active ingredients to such country, such person has—

"(i) notified, under paragraph (3), the person importing the pesticide, device, or active ingredient and the appropriate government regulatory office in the importing country;

"(ii) received written evidence that the notification was delivered to the appropriate government regulatory office; and

"(iii) submitted a copy of the notification (in English) and evidence of delivery to the Administrator.

"(C) Documents referred to in subparagraph (B) shall be made available to the public, on request.

"(3) NOTIFICATION SPECIFICATIONS.—The notification required under paragraph (2) shall be made in an appropriate language and shall contain—

"(A) the name of the pesticide and the common and chemical names of each active ingredient;

"(B) the name and address of the person exporting the pesticide, device, or active ingredient;

"(C) the name and address of the person importing the pesticide, device, or active ingredient;

"(D) the name and address of the appropriate government regulatory office in the importing country;

"(E) a statement of the reasons why the registration of the pesticide was canceled, suspended, voluntarily withdrawn, or the pesticide, is not registered in the United States, or is classified for restricted use, and the list of restrictions; and

"(F) the name and address of the office of the United States Environmental Protection Agency that, on request by the importer or official of the importing country, can provide additional information on the pesticide, device, or active ingredient.

"(4) LABELS.—

"(A) The label of a pesticide intended for export from the United States shall be written in an appropriate language.

"(B) Except as provided in section 2(q)(1)(H), such label may not refer to compliance with the laws of the United States unless the label also contains or is accompanied by a description of the relevant requirements of such laws.

"(5) RECORDS.—The Administrator, by regulation, may require any person subject to this subsection to prepare, maintain, and submit such records as may be necessary to carry out this subsection.".

(b) EFFECTIVE DATES AND IMPLEMENTATION.—

(1) IN GENERAL.—Paragraphs (2) and (3) of section 17(a) of the Federal Insecticide, Rodenticide, and Fungicide Act (as amended by subsection (a) of this section) shall become effective 90 days after the effective date of this Act.

(2) PUBLICATION OF LIST.—Not later than 30 days after the effective date of this Act, the Administrator of the Environmental Protection Agency shall publish in the Federal Register a list of the names, addresses, and international telecommunications codes of appropriate regulatory offices required to receive notices under section 17(a)(2)(B) of the Federal Insecticide, Rodenticide, and Fungicide Act (as amended by subsection (a)).

(3) REVISION OF LIST.—Not later than 180 days after the effective date of this Act, and annually thereafter, the Administrator shall revise the list required under paragraph (2).

(4) PRELIMINARY GUIDELINES.—Not later than 90 days after the effective date of this Act, the Administrator shall publish in the Federal Register preliminary guidelines regarding—

(A) the form of the notification required under section 17(a) of the Federal Insecticide, Rodenticide, and Fungicide Act (as amended by subsection (a));

(B) translation of the notification and labels required under such section 17(a) into the appropriate language;

(C) preparation and retention of records under such section 17(a); and

(D) procedures for public access to documents submitted by exporters under such section.

SEC. 504. CANCELLATION NOTICES FURNISHED TO FOREIGN GOVERNMENTS.

Subsection (b) of section 17 (7 U.S.C. 136o(b)) is amended to read as follows:

"(b) NOTICES OF REGULATORY ACTION FURNISHED TO FOREIGN GOVERNMENTS.—

"(1) ISSUANCE.—The Administrator shall promptly transmit through the Secretary of State a notice, at such time and annually thereafter, to the appropriate governmental regulatory offices of other countries and to appropriate international agencies whenever—

"(A) a registration, or a cancellation or suspension of the registration, of a pesticide becomes effective or ceases to be effective; or

"(B) a pesticide is classified for restricted use.

"(2) CONTENTS.—A notice under paragraph (1) shall include—

"(A) the reasons for the regulatory action taken;

"(B) in the case of a canceled or suspended registration of a pesticide, information concerning other pesticides that are registered under section 3 and that could be used in lieu of such pesticide; and

"(C) the name and address of the office of the United States Environmental Protection Agency that, on request, can provide additional information on the pesticide.".

SEC. 505. COOPERATION IN INTERNATIONAL EFFORTS.

Subsection (d) of section 17 (7 U.S.C. 136o(d)) is amended to read as follows:

"(d) COOPERATION IN INTERNATIONAL EFFORTS.—The Administrator shall—

"(1) in cooperation with the Secretary of State, other appropriate Federal agencies, and nongovernmental and international organizations, actively participate in international efforts to develop improved pesticide research and regulatory programs,

"(2) provide foreign countries with technical assistance to develop comprehensive pesticide regulatory programs,

"(3) within 1 year after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, and every 3 years thereafter, conduct and publish a survey of all countries that import pesticides from United States exporters or from which the United States imports agricultural commodities, to ascertain what procedures are in place in each country—

"(A) regarding registration, labeling, and training to ensure safe handling, transportation, application, and disposal of pesticides, and

"(B) to control residues on foods to meet tolerances established under United States law, and

"(4) report to Congress annually on the activities conducted under this subsection and the results thereof.".

TITLE VI—CERTIFICATION, TRAINING, AND RECORDKEEPING FOR PESTICIDE APPLICATORS

SEC. 601. CERTIFICATION, TRAINING, AND RECORDKEEPING FOR PESTICIDE APPLICATORS.

(a) DEFINITIONS.—

(1) APPLICATOR.—Subsection (e) of section 2 (7 U.S.C. 136(e)) is amended to read as follows:

"(e) APPLICATOR.—

"(1) COMMERCIAL APPLICATOR.—

"(A) Except as provided in subparagraph (B), the term 'commercial applicator' means a person (whether or not the person is a private applicator with respect to some uses) who—

"(i) uses or supervises the use, for any purpose or on any property, of any pesticide that is classified for restricted use;

"(ii) uses or supervises the use of any pesticide (other than a pesticide that the Administrator determines may be applied without the need for training) for hire as the principal part of the business or work of the person; or

"(iii) as an employee of a person described in clause (ii), uses or supervises the use of any pesticide.

"(B) The term does not include a person who uses or supervises the use of a pesticide as described in paragraph (2).

"(2) PRIVATE APPLICATOR.—The term 'private applicator' means a person who uses or supervises the use of any pesticide that is classified for restricted use for purposes of producing any agricultural commodity—

"(A) on property owned or rented by such person or the employer of such person; or

"(B) on other property if applied without compensation (other than trading of personal services between producers of agricultural commodities).

"(3) CERTIFIED APPLICATOR.—The term 'certified applicator' means a commercial or private applicator who is certified under section 4.

"(4) UNDER THE DIRECT SUPERVISION OF A CERTIFIED APPLICATOR.—Unless otherwise prescribed by its labeling, a pesticide shall be considered to be applied under the direct supervision of a certified applicator if the pesticide is applied by a person acting under

the direct supervision and the instructions and control of a certified applicator who is available if and when needed, even though such certified applicator is not physically present at the time and place the pesticide is used.".

(2) PESTICIDE DEALER.—Section 2 (as amended by section 502 of this Act) is further amended by adding at the end thereof the following new subsection:

"(jj) PESTICIDE DEALER.—

"(1) IN GENERAL.—Except as provided in paragraph (2), the term 'pesticide dealer' means any person who, in the ordinary course of business, distributes or sells any pesticide that is classified for restricted use or designated under section 8(d)(2).

"(2) EXCEPTION.—Such term does not include a person who only distributes or sells pesticides that are classified for general use and that are not designated under section 8(d)(2).".

(b) CERTIFICATION AND TRAINING FOR PESTICIDE APPLICATORS.—

(1) IN GENERAL.—Section 4 (7 U.S.C. 136b) is amended by adding at the end thereof the following new subsections:

"(d) USE BY COMMERCIAL APPLICATORS.—

"(1) IN GENERAL.—It shall be a violation of this Act for any person to use any pesticide as a commercial applicator unless such person is—

"(A) a certified commercial applicator; or

"(B) a registered commercial applicator under the direct supervision of a certified commercial applicator.

"(2) CERTIFIED COMMERCIAL APPLICATORS.—To be considered to be a certified commercial applicator, a person, at a minimum, shall—

"(A) have met the standards prescribed under subsection (a) and have received training—

"(i) prescribed by the State agency, including training in the material referred to in subsection (g);

"(ii) conducted by a trainer who has met the requirements prescribed under subsection (h); and

"(iii) that satisfies the minimum standards for training programs prescribed under subsection (h);

"(B) have had field, institutional, or industrial experience in pesticide use and application;

"(C) have passed an examination prescribed by such State agency; and

"(D) possess a valid commercial applicator certification issued by such State agency.

"(3) REGISTERED COMMERCIAL APPLICATORS.—

"(A) To be considered to be a registered commercial applicator, a person, at a minimum, shall—

"(i) have received training—

"(I) prescribed by the State agency, including training in the material referred to in subsection (g); and

"(II) conducted by a trainer who has met the requirements prescribed under subsection (h); and

"(ii) possess a valid registration issued by such State agency.

"(B) A person may obtain a registration by providing to the State agency a report, signed and dated by the trainer and by the person who received the training, stating that the prescribed minimum training has been provided and received.

"(e) USE BY PRIVATE APPLICATORS.—

"(1) IN GENERAL.—A restricted use pesticide shall be considered to have been applied by, or under the direct supervision of, a certified private applicator only if the pesticide is applied by a person who is either—

"(A) a certified private applicator; or

"(B) a supervised private applicator who uses the pesticide under the direct supervision of a certified private applicator.

"(2) CERTIFIED PRIVATE APPLICATORS.—To be considered to be a certified private applicator, a person, at a minimum, shall—

"(A) have met the standards prescribed under subsection (a) and have received training—

"(i) prescribed by the State agency, including training in the material described in subsection (g);

"(ii) conducted by a trainer who has met the requirements prescribed under subsection (h); and

"(iii) that satisfies the minimum standards for training prescribed under subsection (h); and

"(B) possess a valid private applicator certification issued by such State agency.

"(3) SUPERVISED PRIVATE APPLICATORS.—

"(A) To be considered to be a supervised private applicator, a person, at a minimum, shall have received basic instruction—

"(i) prescribed by the State agency or based on material prescribed by such State agency, including basic instruction material concerning the use of appropriate pesticide application and safety procedures, appropriate clothing and protective equipment for pesticide applications, the detection of common symptoms of pesticide poisoning, the means of obtaining emergency medical treatment, hazards posed by pesticides to workers, the public health, and the environment, and the requirements of applicable laws, regulations, and labeling; and

"(ii) given by a certified private applicator, a commercial applicator who is certified in the pest control category appropriate for the instruction being provided, or a trainer who has met the requirements prescribed under subsection (h).

"(B) The State agency may require the employer of a supervised private applicator to confirm that the basic instruction described in subparagraph (A)(i) has been received.

"(f) RECERTIFICATION AND REREGISTRATION.—

"(1) IN GENERAL.—Each certified applicator and each registered commercial applicator within a State shall undergo refresher training and be recertified or reregistered within a period established by the State agency of such State of not more than 5 years.

"(2) TRAINING MATERIAL.—The refresher training shall be prescribed by the State agency and shall include training in the materials referred to in subsection (g) and in the relevant requirements of other subsections of this section and sections 3(d), 12, and 14.

"(3) RECERTIFICATION.—To be recertified, an applicator, at a minimum, shall meet—

"(A) the requirements of subparagraphs (A), (B), and (D) of subsection (d)(2); or

"(B) the requirements of paragraphs (1) and (2) of subsection (e).

"(4) REREGISTRATION.—To be reregistered, a commercial applicator, at a minimum, shall meet the requirements of subsection (d)(3).

"(g) TRAINING MATERIAL.—

"(1) DEVELOPMENT.—The Administrator, in consultation with the Secretary of Agriculture, shall develop training material on the use of appropriate procedures for the application of pesticides, safety procedures for pesticide application, clothing and protective equipment for pesticide application, the detection of common symptoms of pesticide poisoning, the means of obtaining emergency medical treatment, hazards posed by pesticides to workers, the public health, and the environment, specific commercial application categories, and the requirements of applicable laws, regulations, and labeling.

"(2) REVISIONS.—Within 12 months after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator, in consultation with the Secretary of Agriculture, shall revise and make current such material and thereafter shall update such material as needed.

"(h) MINIMUM STANDARDS FOR TRAINERS AND TRAINING PROGRAMS.—

"(1) TRAINING OF COMMERCIAL APPLICATORS.—

"(A) The Administrator shall establish within 1 year after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986—

"(i) minimum standards of competency, and experience or expertise, for trainers referred to in subsection (d); and

"(ii) minimum standards for the training programs referred to in subsection (d).

"(B) Training programs prescribed by any State under subsection (d) shall comply with the minimum standards established by the Administrator under subparagraph (A) not later than 2 years after the effective date of such standards. If on the expiration of such 2-year period a State's training program fails to meet such minimum standards, or if a State fails to prescribe such a program, the Administrator shall notify the State of such failure. After receipt of a notice, a State shall have 90 days to bring the training program of the State into compliance with such standards. If on expiration of such 90-day period, the training program of the State does not meet such standards, the Administrator shall prescribe such training programs referred to in subsection (d) for use in such State.

"(2) TRAINING OF PRIVATE APPLICATORS.—

"(A) The Administrator shall establish within 2 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986—

"(i) minimum standards of competency, and experience or expertise, for trainers referred to in subsection (e); and

"(ii) minimum standards for the training programs referred to in subsection (e).

"(B) Training programs prescribed by any State under subsection (e) shall comply with the minimum standards established by the Administrator under subparagraph (A) not later than 2 years after the effective date of such standards. If on the expiration of such 2-year period the training program of a State fails to meet such minimum standards, or if a State fails to prescribe such a program, the Administrator shall notify the State of such failure. After receipt of a notice, a State shall have 90 days to bring the training program of the State into compliance with such standards. If on expiration of such 90-day period the training program of the State does not meet such standards, the Administrator shall prescribe the training programs referred to in subsection (e) for use in such State.

"(i) PRIVATELY ADMINISTERED TRAINING PROGRAMS.—A State agency may approve any privately administered training program that the Administrator determines meets the more stringent of—

"(1) requirements established under this section; or

"(2) requirements established by the State agency.

"(j) ENFORCEMENT OFFICER TRAINING.—Federal and State field personnel responsible for on-site observations and inspections of pesticide use shall have training that, at a minimum, includes training covering materials specified in subsection (g) for the commercial application categories for which they are assigned enforcement responsibility.

"(k) SEPARATE STANDARDS.—In establishing standards under this section applicable to applicators, the Administrator shall establish separate standards for commercial applicators and private applicators.

"(l) DEFINITION OF STATE AGENCY.—For purposes of this section, the term 'State agency' means the agency of a State that is designated under subsection (a)(2)(A) if the State has primary enforcement responsibility for pesticide use violations, as provided for by section 26. In the case of a State that does not have such primary enforcement responsibility or that does not have an agency designated under subsection (a)(2)(A), a reference to a State agency shall be considered a reference to the Administrator.".

(2) EFFECTIVE DATES.—

(A) COMMERCIAL APPLICATORS.—

(i) IN GENERAL.—Except as provided in clauses (ii) and (iii), subsection (d) of section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (as added by paragraph (1)) shall become effective in a State on the expiration of the period prescribed by subsection (h) of such section within which training programs of such State under subsection (d) are required to be in compliance with minimum standards prescribed by the Administrator of the Environmental Protection Agency under subsection (h).

(ii) CERTIFIED COMMERCIAL APPLICATORS.—If an applicator in a State is certified as a commercial applicator under subsection (a) of section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act before the effective date prescribed by clause (i) and the Administrator has determined that the previous certification or recertification requirements in that State do not conform to the requirements of subsection (d) of such section, such applicator shall be recertified—

(I) within 2 years after the date the training programs of such State under subsection (d) comply with such minimum standards of the Administrator; or

(II) within such earlier time as the State may prescribe.

(iii) REGISTERED COMMERCIAL APPLICATORS.—The requirements of subsection (d) of section 4 for registered commercial applicators shall become effective 1 year after the expiration of the period prescribed by subsection (h) of such section within which training programs of such State under subsection (d) are required to be in compliance with minimum standards prescribed by the Administrator of the Environmental Protection Agency under subsection (h).

(B) PRIVATE APPLICATORS.—

(i) IN GENERAL.—Except as provided in clauses (ii) and (iii), subsection (e) of section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (as added by paragraph (1)) shall become effective in a State on the expiration of the period prescribed by subsection (h) of such section within which training programs of such State under subsection (e) are required to be in compliance with minimum standards prescribed by the Administrator of the Environmental Protection Agency under subsection (h).

(ii) CERTIFIED PRIVATE APPLICATORS.—If an applicator in a State is certified as a private applicator under subsection (a) of section 4 before the effective date prescribed by clause (i) and the Administrator has determined that the previous certification or recertification requirements in such State do not conform to the requirements of subsection (d) of such section, such applicator shall be recertified—

(I) within 2 years after the date the training programs of such State under subsection (e) comply with such minimum standards of the Administrator; or

(II) within such earlier time as the State may prescribe.

(iii) SUPERVISED PRIVATE APPLICATORS.—The requirements of subsection (e) of section 4 for supervised private applicators shall become effective 1 year after the expiration of the period prescribed by subsection (h) of such section within which training programs of such State under subsection (e) are required to be in compliance with minimum standards prescribed by the Administrator of the Environmental Protection Agency under such subsection.

(C) ENFORCEMENT OFFICER TRAINING.—The requirements of subsection (j) of section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (as added by paragraph (1)) shall become effective 1 year after the Administrator issues the training materials specified in subsection (g) of such section.

(c) RECORDS OF PESTICIDE APPLICATORS AND DEALERS.—

(1) IN GENERAL.—Section 8 (7 U.S.C. 136f) (as amended by section 401 of this Act) is further amended by adding at the end thereof the following new subsections:

"(c) RECORDS OF APPLICATORS.—

"(1) COMMERCIAL APPLICATORS.—The Administrator shall require each commercial applicator to maintain records of each pesticide application, including the identity and quantity of pesticide applied and the date and location of such application, for a period of 2 years after each such application.

"(2) PRIVATE APPLICATORS.—No regulations issued by the Administrator to carry out this Act may require any private applicator to maintain any records or file any reports or other documents.

"(d) RECORDS OF PESTICIDE DEALERS.—

"(1) IN GENERAL.—The Administrator, by regulation, shall require each pesticide dealer to maintain a record of each sale or distribution of—

"(A) a pesticide classified for restricted use; and

"(B) any other pesticide designated for purposes of this subsection by the Administrator by regulation because the pesticide may cause significant adverse effects on health or the environment.

"(2) CONTENTS.—Such records shall include the identity of the pesticide sold or distributed, the identity of the person to whom the pesticide was distributed or sold, the date of the distribution or sale, and the amount of the pesticide distributed or sold.

"(3) DURATION.—A pesticide dealer shall maintain the records required under this subsection for 3 years after the date of the distribution or sale.

"(e) ACCESS.—

"(1) EMPLOYEES, CUSTOMERS, AND COMPLAINANTS.—

"(A) A pesticide dealer or commercial applicator shall afford to an employee or former employee of such dealer or applicator access to records required to be kept under subsections (c) and (d) that directly relate to the employment duties of the employee.

"(B) A pesticide dealer or commercial applicator shall afford to a customer of such dealer or applicator access to the records that directly relate to any pesticide that the customer purchased from the dealer or that relate to any pesticide application made by such an applicator at the request of the customer or under a contract with a customer.

"(C) Each State enforcement agency, as part of an investigation or enforcement action in response to a formal complaint, shall make available reports of the findings of such investigation or action to the complainant. On the request of a complainant, such agency shall provide in a timely manner a progress report or interim report that contains, at a minimum, the records required to be kept under subsections (c) and (d) and obtained in the investigation or action.

"(D) The records for which access is provided under subparagraph (A), (B), or (C) shall be accessible within 30 days after a request made under such subparagraph, except that if necessary to protect the public health or in a medical emergency, such records shall be provided as soon as possible, but no later than 24 hours, after the request is made.

"(2) STATE AGENCIES.—A copy of any record to be required to be maintained under subsection (c) or (d) shall be submitted to a State agency that has primary enforcement authority under section 26 on request by such State agency to the commercial applicator or dealer required to maintain such records.

"(f) INFORMATION FOR EMPLOYEES.—An employer who uses or supervises the use of a pesticide shall—

"(1) know or have access to the brand name and common or chemical name of each ingredient listed on the labeling of the pesticide, and to the safety, first aid, and antidote information listed on the labeling of the pesticide; and

"(2) be responsible for promptly making such information available, on request, to any employee exposed to the pesticide and to treating medical personnel.".

(2) CONFORMING AMENDMENT.—Section 11 (7 U.S.C. 136i) is repealed.

(d) UNLAWFUL ACTS.—Section 12(a)(2) (7 U.S.C. 136j(a)(2)) is amended—

(1) by striking out "or" at the end of subparagraph (O);

(2) by striking out the period at the end of subparagraph (P) and inserting in lieu thereof a semicolon; and

(3) by adding after subparagraph (P) the following new subparagraph:

"(Q) to obtain or use records acquired under section 8(e) in furtherance of a commercial purpose;".

TITLE VII—ADDITIONAL DATA, DATA COMPENSATION, AND PATENTS

SEC. 701. ADDITIONAL DATA TO SUPPORT EXISTING REGISTRATIONS.

Section 3(c)(2)(B) (7 U.S.C. 136a(c)(2)(B)) is amended—

(1) by striking out clauses (i) and (ii) and inserting in lieu thereof the following new clauses:

"(i) If the Administrator determines that additional data are required to maintain in effect an existing registration of a pesticide or the existing registrations of a group of pesticides, the Administrator shall notify the registrant of each pesticide to which the determination relates and provide a list of such registrants to any person.

"(ii)(I) Each registrant of such a pesticide shall provide evidence within 90 days after receipt of notification that the registrant is taking appropriate steps to secure and

submit the additional data that are required.

"(II) Two or more registrants may agree to develop jointly, or to share in the cost of development of, such data. Any registrant who enters into such an agreement, or who offers to agree to share in the cost of development of such data, shall be entitled to examine such data and rely on such data to maintain or obtain registrations under this Act or under the law of any State. An offer to enter into such an agreement may be accepted at any time and may not be withdrawn without the consent of the person to whom the offer was made."; and

(2) in clause (iii), by striking out the first sentence and inserting in lieu thereof the following new sentence: "If at the end of 60 days after two or more registrants have entered into an agreement under clause (ii) the registrants have not further agreed on the terms of the data development or cost-sharing agreement or on a procedure for reaching such agreement, any of such registrants may initiate binding arbitration proceedings to fix such terms by requesting the Federal Mediation and Conciliation Service to appoint an arbitrator from the roster of arbitrators maintained by the Service.".

SEC. 702. DATA COMPENSATION AND ARBITRATION.

Section 3(c)(1)(D) (7 U.S.C. 136a(c)(1)(D)) is amended—

(1) by redesignating clause (iii) as clause (iv); and

(2) by inserting after clause (ii) the following new clause:

"(iii)(I) In the case of a pesticide the term of the patent for which has expired, the terms and amount of compensation, for data that was submitted for such pesticide, to be paid by a person who intends to file an application for registration of a pesticide that cites such data may be fixed before the submission of such application by arbitration under clause (ii) initiated by such person.

"(II) The arbitration shall be binding on the original data submitter and shall be binding on such person after the date the application of such person is submitted.

"(III) No official or court of the United States shall have power or jurisdiction to review any such finding or determination of the arbitrator, except for fraud, misrepresentation, or other misconduct by one of the parties to the arbitration or the arbitrator where there is a verified complaint, with supporting affidavits, attesting to specific instances of such fraud, misrepresentation, or other misconduct.

"(IV) Each party to the first arbitration under this clause to determine the terms and amount of compensation for the use of particular data shall share equally in the payment of the fees and expenses of the arbitrators and shall each pay its own attorney's fees.

"(V) In all subsequent arbitrations under this clause to determine the terms and amount of compensation for the use of such data, the party to such subsequent arbitration who seeks to cite the data of the original data submitter shall pay the fees and expenses of the arbitrators and the attorney's fees of the original data submitter.

"(VI) Clause (ii) shall apply to arbitrations under this clause, except as otherwise provided in this clause.".

SEC. 703. RESTORATION OF PATENT TERM FOR CERTAIN AGRICULTURAL AND CHEMICAL PRODUCTS.

Chapter 14 of title 35 of the United States Code is amended by adding after section 157 the following:

"§158. Restoration of patent term for certain agricultural and chemical products

"(a) The term of a patent which claims a product subject to a regulatory review period, a method for using such a product, or a method for manufacturing such a product shall be extended, in accordance with this section, from the original expiration date of the patent if—

"(1) the owner of record of the patent or its agent notifies the Commissioner in compliance with subsection (d),

"(2) the product has been subject to a regulatory review period before its commercial marketing or use,

"(3) the term of the patent has never been extended under this section,

"(4) the term of the patent has not expired before the Commissioner is notified under subsection (d), and

"(5)(A) except as provided in subparagraph (B), the permission for the commercial marketing or use of the product after such regulatory review period is the first permitted commercial marketing or use of the product under the provision of law under which such regulatory review period occurred, or

"(B) in the case of a patent which claims a method of manufacturing the product which primarily uses recombinant DNA or hybridoma technology in the manufacture of the product, the permission for the commercial marketing or use of the product after such regulatory review period is the first permitted commercial marketing or use of a product manufactured under the process claimed in the patent.

"(b) The rights derived from any patent the term of which is extended under this section shall during the period during which the patent is extended—

"(1) in the case of any patent which claims a product, be limited to any use approved for the product before the expiration of the term of the patent under the provision of law under which the applicable regulatory review occurred,

"(2) in the case of a patent which claims a method of using a product, be limited to any use claimed by the patent and approved for the product before the expiration of the term of the patent under the provision of law under which the applicable regulatory review occurred,

"(3) in the case of a patent which claims a method of manufacturing a product, be limited to the method of manufacturing as used to make the product.

"(c)(1) Subject to paragraph (2), the term of a patent shall be extended by the time equal to the regulatory review period which occurred after such patent was granted, except that—

"(A) the term of any patent may not be extended for more than 5 years,

"(B) no term of any extended patent may exceed 17 years from the date the product for which the patent was issued was first permitted to be commercially marketed or used,

"(C) if the regulatory review period for a product began before the date of enactment of this section and if on such date the regulatory review period had not ended, the period of extension for the patent shall not exceed 2 years, and

"(D) if the regulatory review period for a product began before the date of enactment of this section and if on such date the regulatory review period had been completed, there shall be no extension of the patent.

"(2) In determining a regulatory review period for purposes of paragraph (1)—

"(A) if an application or notice described in subparagraph (A)(ii), (B), or (C) of paragraph (4) of subsection (g) was rejected because of insufficiency of data or other required information, the period beginning on the date the application or notice was rejected for insufficiency of data and ending on the date the application or notice was subsequently accepted shall be excluded, except that if during such period the product sponsor conducts a major health or environmental effects test, the period during which such test is conducted shall not be excluded, and

"(B) the regulatory review period shall be reduced by any period determined under subsection (e) during which the product sponsor did not act with due diligence.

"(3) In no event shall more than one patent be extended for the same regulatory review period for any product.

"(4) In the case of a pesticide, all formulations of such pesticide containing the identical active ingredient shall be considered the same pesticide and no pesticide may be the subject of more than one patent extension.

"(d) To obtain an extension of the term of a patent under subsection (a), the owner of record of the patent or its agent shall notify the Commissioner, within 60 days after the termination of the regulatory review period for the product to which the patent relates, that the regulatory review period has ended. Such notification shall be in writing and shall—

"(1) identify the Federal statute under which regulatory review occurred,

"(2) state the dates on which the regulatory review period commenced and ended and identify the event which caused such period to begin,

"(3) identify the product for which regulatory review was required,

"(4) state that the requirements of the statute under which the regulatory review referred to in subsection (a)(2) occurred have been satisfied and commercial marketing or use of the product is not prohibited under the Federal statute identified under paragraph (1),

"(5) identify the patent and any claim thereof to which the extension is applicable, identify any uses previously authorized, and state that the term of the patent has never been extended under this section and that no other patent has been extended for the regulatory review period for the product, and

"(6) include such patent or other information as the Commissioner may require.

"(e)(1) Within 60 days of the submittal of the extension notification under subsection (d), the Commissioner shall notify—

"(A) the Secretary of Agriculture if the patent claims a plant or plant product or a method of using or manufacturing a plant or plant product, and

"(B) the Administrator of the Environmental Protection Agency if the patent claims a pesticide subject to the Federal Insecticide, Fungicide, and Rodenticide Act, a chemical substance or mixture subject to the Toxic Substances Control Act, or a method of using or manufacturing such a pesticide, substance, or mixture,

of the extension notification and shall submit to the Secretary or Administrator who is so notified a copy of the extension notification. Not later than 30 days after the receipt of the extension notification from the Commissioner, the Secretary or Administrator receiving the extension notice shall review the dates contained in such notification and determine the applicable regulatory review period, shall notify the Commissioner of the determination, and shall pub-

lish in the Federal Register a notice of such determination.

"(2)(A) If a petition is submitted to the Secretary or Administrator making the determination under paragraph (1) not later than 180 days after the publication of a determination under paragraph (1) upon which it may reasonably be determined that a product sponsor did not act with due diligence during an applicable regulatory review period, the Secretary or Administrator making the determination shall, in accordance with regulations promulgated by the Secretary or Administrator, determine if the product sponsor acted with due diligence during the applicable regulatory review period. The Secretary or Administrator shall make such determination not later than 90 days after the receipt of a petition. The Administrator may not delegate the authority to make such determination to an office below the Assistant Administrator for Pesticides and Toxic Substances.

"(B) The Secretary or Administrator making a determination under subparagraph (A) shall notify the Commissioner of the determination and shall publish in the Federal Register a notice of such determination, together with the factual and legal basis for such determination. Any interested person may request, within the 60-day period beginning on the publication of a determination, the Secretary or Administrator making the determination to hold a hearing on the determination. Such a hearing shall be an informal hearing which is not subject to section 554, 556, or 557 of title 5, United States Code. If such a request is made within such period, the such Secretary or Administrator shall hold such hearing not later than 30 days after the date of the request, or at the request of the person making the request, not later than 60 days after such date. The Secretary or Administrator who is holding the hearing shall provide notice of the hearing to the product sponsor and to any interested person and provide the product sponsor and any interested person an opportunity to participate in the hearing. Within 30 days after the completion of the hearing, such Secretary or Administrator shall affirm or revise the determination which was the subject of the hearing and notify the Commissioner of such affirmation or any revision of the determination and shall publish such affirmation or revision in the Federal Register.

"(C) Failure of a product sponsor to act with due diligence during a regulatory review period shall not be a defense in any action involving the infringement of a patent.

"(D) In a proceeding under this paragraph, the Secretary or Administrator may take into consideration the failure of a product sponsor to submit data which the product sponsor knew or reasonably should have known was necessary to support an application or notice described in paragraph (4) of subsection (g).

"(E) For purposes of this paragraph, the term 'due diligence' means that degree of attention, sustained directed effort, and timeliness as may reasonably be expected from, and are ordinarily exercised by, a person during a regulatory review period.

"(f)(1) The Commissioner shall determine that a patent is eligible for extension under subsection (a) and that the requirements of subsection (d) have been complied with. A determination that a patent is eligible for extension may be made by the Commissioner solely on the basis of the representations contained in the notification under subsection (d). If the Commissioner determines that the patent is eligible for extension and upon receipt of a determination of the applicable regulatory review period under subsection (e), the Commissioner shall issue to the owner of record of the patent a certificate of extension, under seal, for the period prescribed by subsection (c). Such certificate shall be recorded in the official file of the patent and shall be considered as part of the original patent. The Commissioner shall publish in the Official Gazette of the Patent and Trademark Office a notice of such extension.

"(2) If the term of a patent for which a notification has been submitted under subsection (d) would expire before a certificate of extension is issued or denied under paragraph (1), the Commissioner shall extend, until such determination is made, the term of the patent for periods of up to 1 year if the Commissioner determines that the patent is eligible for extension. Such periods of extension shall not exceed the regulatory review period calculated from the information provided in the notification submitted under subsection (d).

"(g) As used in this section:

"(1) The term 'product' means:

"(A) Any pesticide subject to regulation under the Federal Insecticide, Fungicide, and Rodenticide Act.

"(B) Any chemical substance or mixture subject to regulation under the Toxic Substances Control Act.

"(C) Any plant or plant product that (i) is genetically altered, (ii) is defined as a plant pest or potential plant pest under the Federal Plant Pest Act (7 U.S.C. 150aa–150jj), and (iii) is subject to regulation under that Act.

"(2) The term 'major health or environmental effects test' means an experiment or study to determine or evaluate health or environmental effects which requires at least six months to conduct, not including any period for analysis or conclusions, and the data from which is submitted to receive permission for commercial marketing or use.

"(3) The term 'product sponsor' means any person who, with the consent of the patent owner, initiates testing or investigations, claims an exemption, or submits an application or notice described in paragraph (4) of this subsection.

"(4) The term 'regulatory review period' has the following meaning:

"(A) With respect to a product which is a pesticide, the term means the sum of—

"(i) the period beginning on the earlier of the date the product sponsor (I) initiates a major health or environmental effects test on such pesticide, or (II) requests, in accordance with regulations issued by the Administrator, the grant of an experimental use permit for the pesticide under section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act, and ending on the date an application is submitted for registration of such pesticide pursuant to section 3 of such Act, and

"(ii) the period beginning on the date an application is submitted, in accordance with regulations issued by the Administrator, for registration of such pesticide pursuant to section 3 of such Act and ending on the date such pesticide is first registered, either conditionally or fully, under such section.

"(B) With respect to a product which is a chemical substance for which notice is required under section 5 of the Toxic Substances Control Act or which is a mixture which contains a substance for which such notice is required and—

"(i) which is subject to a rule requiring testing under section 4(a) of such Act, the term means a period commencing on the date the product sponsor has initiated the testing required in such rule and ending on the expiration of the notice period for such chemical substance or mixture under section 5 of such Act, or if an order or injunction is issued under section 5(e) or 5(f) of such Act, the date on which such order or injunction is dissolved or set aside, or

"(ii) which is not subject to a testing rule under section 4 of such Act, the term means a period commencing on the earlier of the date the product sponsor—

"(I) submits, in accordance with regulations issued by the Administrator, a notice under section 5 of such Act, or

"(II) initiates a major health or environmental effects test on such chemical substance or mixture,

and ending on the expiration of the notice period for such substance under section 5 of such Act or if an order or injunction is issued under section 5(e) or 5(f) of such Act, the date on which such order or such injunction is dissolved or set aside.

"(C) With respect to a product which is a plant or plant product, the term means the period beginning on the date an application is submitted under section 103 of the Federal Plant Pest Act for permission to move the plant or plant product in interstate commerce and ending on the date such application is approved.

"(h) If information submitted by a product sponsor during a regulatory review period is considered a trade secret or confidential commercial or financial information under the law under which such regulatory review occurred, such information may only be disclosed under this section in accordance with such law. This subsection does not prohibit the Commissioner or the Administrator from identifying the patent owner, the product sponsor, the product, the patent, and any other information necessary to identify, describe, and calculate the regulatory review period in any notification, publication, or public record required by this section.

"(i) The Commissioner, the Administrator, and the Secretary of Agriculture may establish such fees as appropriate to cover the costs of carrying out their respective duties and functions under this section.

"(j)(1) Except as provided in paragraph (2), this section shall cease to be in effect upon the expiration of 15 years after the date of the enactment of this section.

"(2) This section shall continue to apply to any patent that claims a product subject to a regulatory review period, a method for using such a product, or a method of manufacturing such a product if the patent was issued before the expiration of 15 years after such date.

(b) CONFORMING AMENDMENT.—The last sentence of section 282 of title 35, United States Code, is amended by inserting "or 158(e)" after "(2)".

(c) ANALYSIS.—The analysis for chapter 14 of title 35 of the United States Code is amended by adding after the item relating to section 157 the following:

"158. Restoration of patent term for certain agricultural and chemical products.".

(d) SECTION 271.—Section 271(e) of title 35, United States Code, is amended by adding at the end the following:

"(5)(A) Except as provided in subparagraph (B), during the last 2 years of the term of a patent relating to a pesticide (including

a patent which claims a pesticide, a method for using a pesticide, or a method of manufacturing a pesticide) which is or has been registered under the Federal Insecticide, Fungicide, and Rodenticide Act or which is marketed with the permission of the holder of such patent, it shall not be an act of infringement of such patent to make, use, or sell such pesticide solely for testing reasonably related to the development and submission of data—

"(i) to meet regulatory requirements under the Federal Insecticide, Fungicide, and Rodenticide Act,

"(ii) to obtain a tolerance or an exemption from a tolerance under section 408 of the Federal Food, Drug, and Cosmetic Act, or

"(iii) to obtain a food additive regulation or an exemption from a food additive regulation under section 409 of the Federal Food, Drug, and Cosmetic Act.

"(B)(i) Subparagraph (A) applies only to the first patent issued for a pesticide, a method of using a pesticide, or a method of manufacturing a pesticide which makes the unlicensed manufacture, use, or sale of the pesticide a patent infringement.

"(ii) Subparagraph (A) does not apply to a patent which claims a method of manufacturing a pesticide which uses recombinant DNA or hybridoma technology in the manufacture of the pesticide.

"(C) It shall be an act of infringement for any person to submit any application under the Federal Insecticide, Fungicide, and Rodenticide Act or section 408 or 409 of the Federal Food, Drug, and Cosmetic Act for a pesticide covered by the first composition of matter patent, method of use patent, or method of manufacturing patent issued for the pesticide if such application is submitted before the expiration of the term of such first patent unless such person is the holder of such patent or a licensee of the holder.

"(D) For purposes of this paragraph, all formulations of a pesticide containing the identical active ingredient shall be considered the same pesticide.".

TITLE VIII—GENERAL

Subtitle A—Amendments to the Federal Insecticide, Fungicide, and Rodenticide Act

SEC. 801. AUTHORITY OF STATES.

(a) STATE REGULATION, HOUSEHOLD ANTIMICROBIAL PESTICIDES.—Subsection (a) of section 24 (7 U.S.C. 136v(a)) is amended to read as follows:—

"(a) STATE REGULATION.—

"(1) IN GENERAL.—A State may regulate the sale or use of any federally registered pesticide or device in the State, but only if and to the extent the regulation does not permit any sale or use prohibited by this Act.

"(2) HOUSEHOLD ANTIMICROBIAL PESTICIDES.—

"(A) This paragraph shall apply to any household antimicrobial pesticide where—

"(i) the pesticide is a formulated end-use product which, as registered, is not intended for use on food or feed;

"(ii) the pesticide has been registered under section 3(c)(5), or reregistered under section 3A, after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986;

"(iii) the Administrator has determined that the product as so registered or reregistered poses no significant toxicological concern when used in accordance with its labeling;

"(iv) the Administrator has published the determination of no significant toxicological concern in the Federal Register;

"(v) the registrant of the product has offered, at the time the registrant provides the final product label to the Administrator, to provide under the conditions of this Act to the appropriate State authority any data submitted by the registrant to the Administrator in support of the registration; and

"(vi) at least 45 days have elapsed from the date upon which an application for State registration has been filed.

"(B) A State may not prohibit any sale or use permitted under this Act of a pesticide described in subparagraph (A) for which an application for State registration has been filed unless and until the State has finally acted on such application pursuant to applicable State law.

"(C) This paragraph shall cease to be effective 5 years after the date of the enactment of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986 and shall not be construed during the 5 year effective period to (i) preclude a State from requiring in the State registration process submission of additional data beyond that required by the Administrator, or (ii) otherwise affect State authority to regulate the sale or use of a pesticide when final action is taken under State law.

(b) STATE REGISTRATIONS.—Section 24(c) is amended—

(1) in paragraph (1), by adding at the end thereof the following new sentence: "Such registration shall expire and be of no further effect, without further action by the Administrator—

"(A) at the end of the period, if any, provided as the duration of the registration by the State that approved it; or

"(B) 10 days after the date the Administrator publishes in the Federal Register a notice stating that the State that issued the registration has informed the Administrator that the State no longer desires the registration to continue in effect."; and

(2) in paragraph (2), by adding at the end thereof the following new sentence: "The Administrator shall establish criteria that define the conditions under which a special local needs registration may be disapproved, taking into account geographic patterns of use.".

(c) DIFFERENCES IN USAGE AND RISK.—Section 24 is amended by adding at the end thereof the following new subsection:

"(d) DIFFERENCES IN USAGE AND RISK.—In promulgating any regulations or policies pertaining to the sale or use of pesticides within a State, the State may take into account the difference in concept and usage between various classes of pesticides and the differences in environmental risk and the appropriate data for evaluating such risk between agricultural and nonagricultural pesticides.".

SEC. 802. DEFINITIONS.

(a) IN GENERAL.—

(1) TO USE ANY REGISTERED PESTICIDE IN A MANNER INCONSISTENT WITH ITS LABELING.—The first proviso of section 2(ee) (7 U.S.C. 136(ee)) is amended—

(A) in clause (1), by inserting before the comma at the end thereof the following: "unless the labeling specifically prohibits deviation from the specified dosage, concentration, or frequency"; and

(B) in clause (3), by inserting before the comma at the end thereof the following: "unless the labeling specifically states that the product may be applied only by the methods specified on the labeling".

(2) TO DISTRIBUTE OR SELL.—Section 2 (as amended by section 601(a)(2) of this Act) is further amended by adding at the end thereof the following new subsection:

"(kk) TO DISTRIBUTE OR SELL.—The term 'to distribute or sell' means to distribute, sell, offer for sale, hold for distribution, hold for sale, hold for shipment, ship, deliver for shipment, release for shipment, or receive and (having so received) deliver or offer to deliver. The term does not include the holding or application of registered pesticides or use dilutions thereof by any applicator who provides a service of controlling pests without delivering any unapplied pesticide to any person so served.".

(b) CONFORMING AMENDMENTS.—

(1) REGISTRATION OF PESTICIDES.—Subsection (a) of section 3 (7 U.S.C. 136a(a)) is amended to read as follows:

"(a) REQUIREMENT OF REGISTRATION.—Except as provided by this Act, no person in any State may distribute or sell to any person any pesticide that is not registered under this Act.".

(2) UNLAWFUL ACTS.—Section 12(a) (7 U.S.C. 136j(a)) is amended—

(A) in paragraph (1), by striking out "distribute, sell, offer for sale, hold for sale, ship, deliver for shipment, or receive and (having so received) deliver or offer to deliver, to any person—" and inserting in lieu thereof "distribute or sell to any person—"; and

(B) in paragraph (2)(F), by striking out "to make" and inserting in lieu thereof "to distribute or sell, or to make".

SEC. 803. INFORMATION REQUESTED.

Section 7 (7 U.S.C. 136e) (as amended by section 201(a) of this Act) is further amended by adding at the end thereof the following new subsection:

"(f) INFORMATION REQUESTS.—Consistent with section 3507(a)(1) of title 44, United States Code, the Administrator shall catalog and retrieve data in such a manner as to eliminate or reduce burdensome requests to registrants for submission of information, particularly requests that require the submission of duplicate confidential data.".

SEC. 804. COOPERATIVE AGREEMENTS.

Subsection (a) of section 23 (7 U.S.C. 136u(a)) is amended to read as follows:

"(a) COOPERATIVE AGREEMENTS.—

"(1) PURPOSES.—The Administrator may enter into cooperative agreements with States and Indian Tribes for the following:

"(A) To delegate to any State or Indian Tribe the authority to cooperate in the enforcement of this Act through the use of its personnel or facilities, to train personnel of the State or Indian Tribe to cooperate in the enforcement of this Act, and to assist States and Indian Tribes in implementing cooperative enforcement programs through grants.

"(B) To provide an amount equal to 50 percent of the anticipated cost of each State or Indian tribe, as agreed under such cooperative agreements, of conducting training programs for certification of applicators. Funds shall be distributed among States and Indian tribes on a formula basis, as developed cooperatively between the Secretary of Agriculture and the Administrator.

"(C) To provide an amount equal to 50 percent of the anticipated cost to each State or Indian tribe, as agreed under such cooperative agreements, of conducting pesticide certification and licensing programs, and in the case of a State, for administering the State plan of each State approved under section 4(a)(2). Funds shall be distributed among the States and Indian tribes on a formula basis as specified by the Administrator.

"(2) AUTHORIZATION FOR APPROPRIATIONS.—There are authorized to be appropriated such sums as may be necessary for cooperative agreements and grants under this subsection.".

SEC. 805. SCIENTIFIC ADVISORY PANEL.

Section 25(d) (7 U.S.C. 136w(d)) is amended—

(1) by striking out "consist of 7 members" and inserting in lieu thereof "be permanent and consist of 9 members"; and

(2) by striking out the sentence beginning "The advisory panel established".

SEC. 806. AUTHORITY FOR EPA ACTION.

The second sentence of section 27(a) (7 U.S.C. 136w-2(a)) is amended to read as follows: "If a State—

"(1) does not promptly initiate appropriate investigative action after receiving such referral; or

"(2) does not initiate appropriate enforcement action within 90 days after receipt of such referral,

the Administrator may act on such complaint or information in accordance with this Act.".

SEC. 807. EXPIRATION OF STATE PRIMARY ENFORCEMENT RESPONSIBILITY.

Section 26 (7 U.S.C. 136w-1) is amended by adding at the end thereof the following new subsection:

"(d) EXPIRATION.—Notwithstanding subsections (a) and (b), the primary enforcement responsibility of a State under this section for pesticide use violations shall expire on September 1, 1990, unless the Administrator determines that the State has the authority to impose civil and criminal penalties at least equal to those provided in section 14.".

SEC. 808. UNLAWFUL ACTS.

(a) IN GENERAL.—Section 12(a) (7 U.S.C. 136j(a)) (as amended by section 601(d) of this Act) is further amended—

(1) in paragraph (1), by striking out subparagraph (A) and inserting in lieu thereof the following new subparagraph:

"(A) any pesticide that is not registered under section 3 or whose registration has been canceled or suspended, except to the extent that distribution or sale otherwise has been authorized by the Administrator under this Act;"; and

(2) in paragraph (2)—

(A) by striking out subparagraph (B) and inserting in lieu thereof the following new subparagraph:

"(B) to refuse to—

"(i) prepare, maintain, or submit any records required by or under this Act;

"(ii) submit any reports required by or under this Act; or

"(iii) allow any entry, inspection, copying of records, or sampling authorized by this Act;";

(B) by striking out subparagraphs (J) and (K) and inserting in lieu thereof the following new subparagraphs:

"(J) to violate any suspension order issued under section 3(c)(2)(B), 3A, or 6;";

"(K) to violate any cancellation order issued under this Act;";

(C) in subparagraph (M), by striking out "section 8" and inserting in lieu thereof "this Act"; and

(D) by adding at the end thereof the following new subparagraphs:

"(R) to falsify all or part of any information relating to the testing of any pesticide (or any ingredient, metabolite, or degradation product thereof), including the nature of any protocol, procedure, substance, organism, or equipment used, observation made, or conclusion or opinion formed, submitted to the Administrator, or that the person knows will be furnished to the Administrator or will become a part of any records required to be maintained by this Act;

"(S) to submit to the Administrator data known to be false in support of a registration;

"(T) to violate any regulation issued under section 3(a), 19(a), 25(c)(3), or 25(f); or".

(b) ACTS OF OFFICERS, AGENTS, ETC.—

(1) IN GENERAL.—Section 12 (7 U.S.C. 136j) is amended by adding at the end thereof the following new subsection:

"(c) ACTS OF OFFICERS, AGENTS, ETC.—When construing and enforcing the provisions of this Act, the act, omission, or failure of any officer, employee, agent, or other person acting for or employed by any person shall be deemed to be the act, omission, or failure of such person as well as that of the person employed.".

(2) CONFORMING AMENDMENT.—Paragraph (4) of section 14(b) (7 U.S.C. 136l(b)) is repealed.

SEC. 809. PENALTIES AND SUBPOENAS.

(a) CIVIL PENALTIES.—Section 14(a) (7 U.S.C. 136l(a)) is amended—

(1) by striking out paragraphs (1) and (2) and inserting in lieu thereof the following new paragraphs:

"(1) IN GENERAL.—

"(A) Any registrant, applicant for a registration, producer, or pesticide testing facility that violates any provision of this Act may be assessed a civil penalty by the Administrator of not more than $25,000 for each offense. If a registrant, applicant for a registration, producer, or pesticide testing facility violates any provision of this Act after violating the same or similar provision of this Act, the Administrator may assess a civil penalty of not more than $50,000 for such subsequent violation.

"(B) Any—

"(i) commercial applicator of restricted use pesticides; or

"(ii) any other person not described in subparagraph (A) who distributes or sells pesticides or devices,

that violates any provision of this Act may be assessed a civil penalty by the Administrator of not more than $10,000 for each offense. If such person violates any provision of this Act after violating the same or similar provision of this Act, the Administrator may assess a civil penalty of not more than $20,000 for such subsequent violation.

"(2) PRIVATE APPLICATOR.—Any private applicator who violates any provision of this Act subsequent to receiving a written warning from the Administrator or following a citation for a prior violation, and any other person not included in paragraph (1) that violates any provision of this Act, may be assessed a civil penalty by the Administrator of not more than $1,000 for each offense. If such person violates any provision of this Act after violating the same or similar provision of this Act, the Administrator may assess a civil penalty of not more than $2,000 for such subsequent violation. The Administrator may waive the requirement for a warning or citation for a first offense by a private applicator if the Administrator determines that the violation was intentional or caused significant harm to health or the environment.";

(2) in paragraph (3), by adding at the end thereof the following new sentence: "If the person neither resides nor has a principal place of business in the United States, the Administrator may designate a site for the hearing in the United States that is reasonably convenient for the parties."; and

(3) in the first sentence of paragraph (4), by inserting "the economic benefit (if any) resulting from the violation," after "to continue in business,".

(b) CRIMINAL PENALTIES.—Section 14(b) is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following new paragraph:

"(1) IN GENERAL.—

"(A) Any registrant, applicant for a registration, producer, or pesticide testing facility that knowingly violates any provision of this Act shall be fined not more than $50,000 or imprisoned for not more than 1 year, or both.

"(B) Any commercial applicator of a restricted use pesticide, or any other person not described in subparagraph (A) who distributes or sells pesticides or devices, that knowingly violates any provision of this Act shall be fined not more than $25,000 or imprisoned for not more than 1 year, or both."; and

(2) in paragraph (2)—

(A) by striking out "$1,000" and inserting in lieu thereof "$2,000"; and

(B) by striking out "30" and inserting in lieu thereof "60".

(c) SUBPOENAS.—Section 14(a) is amended by adding at the end thereof the following new paragraph:

"(6) SUBPOENAS.—The Administrator, in connection with administrative proceedings under this subsection, may issue subpoenas compelling the attendance and testimony of witnesses and subpoenas duces tecum and may request the Attorney General to bring an action to enforce any subpoena issued under this paragraph. The district courts of the United States shall have jurisdiction to enforce such subpoenas and impose sanctions.".

SEC. 810. CONGRESSIONAL REVIEW.

Paragraph (4) of section 25(a) (7 U.S.C. 136w(a)(4)) is amended to read as follows:

"(4) CONGRESSIONAL REVIEW OF REGULATIONS.—Simultaneously with the promulgation of any rule or regulation under this Act, the Administrator shall transmit a copy thereof to the Secretary of the Senate and the Clerk of the House of Representatives. The rule or regulation shall not become effective until the passage of 60 calendar days after the rule or regulation is so transmitted.".

SEC. 811. REVIEW OF REGULATIONS.

Section 16 (7 U.S.C. 136n) is amended by adding at the end thereof the following new subsection:

"(e) REVIEW OF REGULATIONS.—

"(1) IN GENERAL.—

"(A) Any regulation issued under this Act and first published in the Federal Register in final form after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986 shall be reviewable only as provided by this subsection. Any person may obtain judicial review of the regulation by filing a petition for review in the United States court of appeals for the circuit wherein the person resides or has its principal place of business or in the United States Court of Appeals for the District of Columbia Circuit. Any petition under this paragraph for review of a regulation shall be filed within 120 days after the date of promulgation of the regulation as designated by the Administrator in the Federal Register.

"(B) Any refusal by the Administrator of a petition to modify or rescind a regulation issued under this Act shall be reviewable only as provided by this subsection. Any person may obtain judicial review of the refusal by filing a petition for review in the United States court of appeals for the circuit wherein the person resides or has its principal place of business or in the United States

Court of Appeals for the District of Columbia Circuit. Any such petition for review of a refusal to modify or rescind a regulation shall be filed within 120 days after such refusal.

"(C) The scope of review under subparagraph (A) or (B) shall be as specified in section 706 of title 5, United States Code. The commencement of a proceeding under subparagraph (A) or (B), unless specifically ordered by the court to the contrary, shall not operate as a stay of the regulation.

"(2) JUDICIAL REVIEW.—A regulation issued by the Administrator or a refusal by the Administrator of a petition to modify or rescind a regulation issued under this Act shall not be subject to judicial review—

"(A) in any suspension, cancellation, or denial proceeding under this Act or in any appeal therefrom; or

"(B) in any proceeding under section 13 or 14(a), or subsection (c), or in any appeal therefrom except on request of a person who, as an agricultural producer, is adversely affected by such action.

"(3) STAYS.—If a person who is a party to a proceeding described in subparagraph (A) or (B) of paragraph (2) that is based on a regulation issued under this Act petitions the Administrator to modify or rescind such regulation, the application of such regulation in the proceeding shall be stayed until the Administrator issues a final decision on the petition.

"(4) DEFINITION OF AGRICULTURAL PRODUCER.—As used in this subsection, the term 'agricultural producer' means a nongovernmental producer of agricultural commodities who—

"(A) uses or supervises the use of any pesticide for the production of such commodities on property owned or rented by the producer or the employer of the producer; or

"(B) without compensation other than the trading of personal services, assists another agricultural producer with the application of pesticides on the land of the producer.".

SEC. 812. DELEGATION AND COOPERATION.

Section 22 (7 U.S.C. 136t) is amended by adding at the end thereof the following new subsection:

"(c) EFFECT ON CERTAIN OTHER LAWS.—

"(1) IN GENERAL.—In exercising any authority under this Act, the Administrator shall not, for the purposes of section 4(b)(1) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653(b)(1)), be considered to be exercising statutory authority to prescribe or enforce standards or regulations affecting occupational safety or health to the extent that the Administrator and the Secretary of Labor by agreement specify that such exercise of authority by the Administrator under this Act is not to be considered an exercise of statutory authority for purposes of section 4(b)(1) of the Occupational Safety and Health Act of 1970.

"(2) COORDINATION.—To ensure the safety and health of workers, the Administrator and the Secretary of Labor shall seek to reach such agreements and to coordinate the exercise of their statutory authority.".

SEC. 813. INDEMNIFICATION BY EPA.

Section 15 (7 U.S.C. 136m) is amended by adding at the end thereof the following subsection:

"(c) INDEMNIFICATION.—If the Administrator takes an action that under subsection (a) requires the payment of indemnification, the Administrator shall report to the Committee on Agriculture of the House of Representatives, the Committee on Agriculture, Nutrition, and Forestry of the Senate, and the Committees on Appropriations of the House of Representatives and the Senate—

"(1) the action taken that requires the payment of indemnification;

"(2) the reasons for taking such action;

"(3) the estimated cost of the payment; and

"(4) a request for the appropriation of funds for such payment.".

SEC. 814. GROUND WATER AUTHORITY.

(a) DEFINITIONS.—Section 2 (7 U.S.C. 136) (as amended by section 802(a)(2) of this Act) is further amended by adding at the end thereof the following new subsections:

"(ll) DRINKING WATER WELL.—The term 'drinking water well' means a well or spring currently supplying water for human consumption.

"(mm) GROUND WATER.—The term 'ground water' means water below the land surface in a zone of saturation.

"(nn) GROUND WATER SAMPLING POINT.—The term 'ground water sampling point' means a public or community water supply, a private water supply, a spring, or a monitoring well or other ground water source, if the well or source is reasonably designed and of adequate depth to permit the collection of representative ground water samples.

"(oo) POTENTIAL SOURCES OF DRINKING WATER.—The term 'potential sources of drinking water' means an aquifer or portion of an aquifer system that may supply a drinking water well. Any determination as to whether an aquifer or its portion is a potential source of drinking water shall include—

"(1) whether there is water of sufficient quantity and quality to supply a drinking water well;

"(2) hydrogeological considerations and depth to drinking water; and

"(3) geographic considerations including any State criteria or guidelines established under section 1428 of the Public Health Service Act (42 U.S.C. 300h-7) or other State authority.

"(pp) RELIABLE ANALYTICAL DATA.—The term 'reliable analytical data' means scientific information that verifies the presence of a pesticide in a ground water sample and that is of a reliable scientific quality according to generally recognized standards and good laboratory practices for sampling and analysis of pesticides in ground water.

"(qq) GROUND WATER RESIDUE GUIDANCE LEVEL.—The term 'ground water residue guidance level' means a ground water residue guidance level established under section 1429 of the Public Health Service Act (42 U.S.C. 300h-8).".

(b) PROTECTION OF GROUND WATER.—The Act is amended—

(1) by redesignating section 31 (7 U.S.C. 136y) as section 32; and

(2) by inserting after section 30 (7 U.S.C. 136x) the following new section:

"SEC. 31. PROTECTION OF GROUND WATER.

"(a) LEACHING POTENTIAL.—

"(1) CRITERIA.—The Administrator shall publish and seek comment on criteria to determine whether a pesticide has the potential to leach into ground water. Such criteria may include factors such as—

"(A) the intended use of the pesticide;

"(B) the timing, rate, and method of application for the pesticide;

"(C) the mobility of the pesticide in soil and water under various conditions; and

"(D) the rates of degradation of the pesticide in soil and water under various conditions.

"(2) INFORMATION.—Each person seeking to register or reregister a pesticide under this Act shall submit such data and information as the Administrator shall require with respect to the potential for the pesticide to leach into ground water and the destination and method of transportation of the pesticide.

"(3) DETERMINATION OF POTENTIAL TO LEACH.—At the time of registering or reregistering a pesticide (and using the criteria developed under paragraph (1)) the Administrator shall determine whether the pesticide has the potential to leach into ground water.

"(4) DETERMINATION OF NECESSITY FOR MONITORING DATA.—If the Administrator determines that a pesticide has the potential to leach into ground water as described in this subsection or the pesticide has been detected at ground water sampling points in 3 or more locations, the Administrator shall also determine whether monitoring data on the presence of the pesticide in ground water are required to register or maintain in effect an existing registration of the pesticide.

"(b) NOTIFICATION.—

"(1) REQUIREMENT.—When a registrant of a pesticide obtains or learns of reliable analytical data that a pesticide has—

"(A) been detected at any ground water sampling point and no ground water residue guidance level has been issued for the pesticide under section 1429 of the Public Health Service Act;

"(B) has been detected at a ground water sampling point at a concentration higher than known previously to have been reported to the Administrator at such ground water sampling point; or

"(C) has been detected at any ground water sampling point at a concentration at or greater than 20 percent of the ground water residue guidance level issued for the pesticide under section 1429 of the Public Health Service Act;

the registrant shall file a report containing such information within 15 working days with both the Administrator, the State in which the ground water sampling point is located, and the owner of the property in which the ground water sampling point is located, if known.

"(2) CONTENT OF REPORT.—A report required by paragraph (1) for detection of a pesticide shall contain information known to the registrant of the pesticide on the level of detection of the pesticide, the frequency of detection of the pesticide, location (including depth) where the pesticide was detected, date of the pesticide detection, well construction if the pesticide was detected in a well, soil type where the pesticide was detected, and analytical method used to make the pesticide detection, including information on the precision, accuracy, and limits of the method of detection and any quality assurance and control procedures used in the pesticide detection.

"(c) REVIEW FOR FURTHER ACTION.—Upon receiving information of a detection of a pesticide at any ground water sampling point, the Administrator shall promptly review the information to determine the reliability of the detection and to determine whether further action should be taken to protect ground water.

"(d) MONITORING.—

"(1) CONFIRMATION OF DETECTIONS.—If the Administrator receives reliable, analytical data indicating that—

"(A) a pesticide has been detected in a drinking water well;

"(B) the concentration of the pesticide equals or exceeds any ground water residue guidance level issued under subsection (d) for that pesticide, and

"(C) the presence of the pesticide in the drinking water well may be the result of use of the pesticide in accordance with the labeling on the pesticide or widespread and commonly recognized practices involving the pesticide,

the Administrator may require the registrant of the pesticide detected to conduct such analysis of samples of ground water from the drinking water well involved as is necessary to determine whether the pesticide is present at a concentration that equals or exceeds such ground water residue guidance level. A monitoring requirement imposed under this paragraph shall be completed within 90 days of notice to the registrant. The procedures of section 3(c)(2)(B) shall govern any monitoring requirement imposed under this paragraph.

"(2) REQUIREMENT FOR MONITORING.—If the Administrator determines that additional data on the presence of a pesticide in ground water are required to maintain in effect an existing registration of the pesticide, the Administrator may, under section 3(c)(2)(B), require the registrant of the pesticide to conduct ground water monitoring. The Administrator shall consult with the Secretary of Agriculture, the heads of other appropriate Federal agencies, and the States concerning the design and scope of monitoring requirements imposed under this paragraph. The design and the scope of the monitoring requirement should take into account all relevant information, including the magnitude and frequency of the detection of the pesticide involved, pattern of pesticide use and soil types involved in the detection, physical and chemical properties of the pesticide, rainfall patterns, well construction if the pesticide was detected in a well, rates of degradation, reliability and analytical accuracy of the detection, and results of State or other sponsored monitoring. To the extent feasible, monitoring should be at representative geographical and hydrogeological areas associated with locations and conditions of concern as determined by the Administrator.

"(3) JUDICIAL REVIEW.—Monitoring requirements imposed under paragraph (2) shall be subject to judicial review under section 16.

"(e) REGISTRATION AMENDMENTS.—

"(1) REQUIREMENT.—

"(A)(i) After reviewing reliable analytical data, the Administrator shall determine whether there is a reasonable likelihood that the ground water residue guidance level for a pesticide will be exceeded in drinking water wells in different localities. The Administrator shall provide for notice and opportunity for public comment on any determination under this clause and shall publish the determination in the Federal Register.

"(ii) If the Administrator determines that there is a reasonable likelihood of exceeding such level in different localities, the Administrator shall promptly require amendments to the registration of the pesticide involved that are reasonably necessary to assure that the use of the pesticide in accordance with the amended registration will not cause the final ground water residue guidance level to be exceeded in drinking water wells.

"(iii) The Administrator shall make such a determination public.

"(iv) If the Administrator proposes to require registration amendments under this paragraph, the Administrator shall notify registrants of such amendments and shall publish notice of the determination in the Federal Register. Such notice shall include the determination of the Administrator whether the presence of the pesticide in drinking water wells appears to have been the result of use of the pesticide in accordance with the labeling or widespread and generally recognized practice.

"(B)(i) After reviewing reliable analytical data, the Administrator shall determine whether there is a reasonable likelihood that the ground water residue guidance level for a pesticide will be exceeded in potential sources of drinking water in different localities.

"(ii) If the Administrator determines that there is a reasonable likelihood that such level will be exceeded in different localities, the Administrator shall promptly require amendments to the registration of a pesticide involved that are reasonably necessary to ensure that use of the pesticide in accordance with the amended registration will not cause the final ground water residue guidance level to be exceeded in potential sources of drinking water.

"(iii) If the Administrator proposes to require amendments under this paragraph, the Administrator shall notify registrants of such amendments.

"(iv) In establishing such amendments, the Administrator shall—

"(I) meet the requirements of subparagraph (A);

"(II) take into account information submitted by States on land and ground water use classification or other governmental actions that could affect when ground water may be used for drinking water; and

"(III) consider the views of the Secretary of Agriculture, other heads of appropriate Federal agencies, and States as required in paragraph (2).

"(2) CONSULTATION.—

"(A) In taking action under paragraph (1), the Administrator shall consult with the Secretary of Agriculture and the State where the pesticide involved has been detected in any ground water sampling point and each other State in which there is significant use of the pesticide.

"(B) The Administrator shall notify such State of the determination of the Administrator that there is a reasonable likelihood that the ground water residue guidance level will be exceeded and shall provide the State with all information relevant to this determination subject to section 10(h).

"(C) States shall promptly provide the Administrator with information relevant to taking action under this section and shall make recommendations regarding necessary registration amendments with respect to that State.

"(3) REASONABLE LIKELIHOOD.—

"(A) For purposes of paragraph (1), there shall be a presumption that there is a reasonable likelihood that a ground water residue guidance level for a pesticide will be exceeded in drinking water wells if the pesticide is detected above 30 percent of the ground water residue guidance level, unless considering the other factors described in subparagraph (B), the Administrator determines, after notice and opportunity for public comment, that there is not such a reasonable likelihood.

"(B) The circumstances surrounding the presence of the pesticide in ground water, taking into account all relevant information, include the frequency and time of occurrence at the site of detection and elsewhere, use patterns, soil types, physical and chemical properties of the pesticide, rainfall patterns, well construction, analytical accuracy, and rates of degradation.

"(4) SCOPE OF AMENDMENTS.—

"(A) Amendments to the registration of a pesticide may include—

"(i) limitations on the purposes for and location at which the pesticide may be used, considering factors such as environmentally sensitive areas and conditions;

"(ii) limitations on the rate at which the pesticide is applied;

"(iii) limitations on the time or frequency of pesticide use;

"(iv) limitations on the method of pesticide application, storage, handling, or disposal;

"(v) reporting or other requirements, including label changes or changes in classification;

"(vi) requirements for the training or certification of pesticide applicators or other persons using the pesticide;

"(vii) required site-specific responses; or

"(viii) any other requirement under this Act to ensure that the ground water residue guidance level for such pesticide will not be exceeded.

"(B) The amendments to the registration of a pesticide should, to the extent feasible, be directed to the same or similar uses of the pesticide, similar geographical and hydrogeological areas, and other similar conditions that led to the determination under subparagraph (A) or (B) of paragraph (1).

"(C) In taking regulatory action under this subsection, the Administrator may utilize recommendations provided by the States under paragraph (2).

"(D) In requiring such amendments, the Administrator shall consider the effect of any voluntary actions by registrants or other persons, including actions by the State to prevent the ground water residue guidance level from being exceeded, and compliance with other environmental laws.

"(5) EFFECTIVENESS AMENDMENTS.—If the Administrator has imposed registration amendments on the use of a pesticide according to this subsection, the Administrator shall—

"(A) periodically review reliable analytical data on the occurrence of the pesticide at ground water sampling points representative of the locations at which the pesticide is used to determine whether such amendments are effective in meeting the requirements of paragraph (1);

"(B) require additional registration amendments, if such amendments are necessary to assure that the ground water residue guidance level for such pesticide will not be exceeded in drinking water wells and potential sources of drinking water; and

"(C) report to the Congress not later than January 31, 1989, and every 2 years thereafter, on whether any such initial or additional amendments have been effective in meeting the requirements of paragraph (1) of this subsection, and make the report available to affected States on request.

"(6) PROCEDURES.—Registration amendments under paragraph (1) shall be imposed in accordance with the procedures required by this Act.

"(f) RESPONSE TO GROUND WATER CONTAMINATION.—

"(1) REQUIREMENT.—

"(A) If the Administrator determines that a pesticide is present in a drinking water well in a concentration that exceeds the final ground water residue guidance level and that the presence of the pesticide in a drinking water well may be the result of use of the pesticide in accordance with the labeling on the pesticide or as a result of widespread and commonly recognized practice involving the pesticide, the Administrator shall—

"(i) notify the State in which the drinking water well is located of the determination of the Administrator; and

"(ii) provide the State, subject to section 10(h), with all information relevant to the determination.

"(B) Such State shall take action within 90 days of such notification to prevent potential adverse effects on human health and the environment from such pesticide. In taking such action, the State shall take appropriate action regarding the sale or use of the pesticide detected at such drinking water well to bring and retain concentrations of the pesticide at such drinking water well at or below the final ground water residue guidance level applicable to the pesticide.

"(2) ACTION BY THE ADMINISTRATOR.—

"(A) If—

"(i) a State does not have the authority to take action required by paragraph (1) with respect to a pesticide detected in a drinking water well or fails to take such action within the time period prescribed by such paragraph;

"(ii) a pesticide is present in a drinking water well in the State at a concentration that exceeds the final ground water residue guidance level; and

"(iii) the presence of the pesticide may be the result of use in accordance with the labeling or of widespread and commonly recognized practice,

the Administrator shall take appropriate action under this Act to bring and retain the concentration detected at such drinking water well at or below the final ground water residue guidance level applicable to the pesticide and may take such other action under this Act as the Administrator considers necessary to prevent potential adverse effects on human health and the environment from the pesticide at such drinking water well.

"(B) The Administrator shall publish notice of the action in the Federal Register and take appropriate steps to inform all registrants, potentially affected persons, and interested members of the public. Such notice shall specify the factual findings and conclusions relied on in support of the decision.

"(C) Any person adversely affected by an action or failure to act under this paragraph shall have an opportunity for an expedited hearing, pursuant to the procedures of section 6(c)(2), to determine whether the action was taken in accordance with this paragraph or whether the Administrator was required to take action.

"(D) Notwithstanding any other provision of this Act, a hearing shall be held and a determination made under this subsection within 75 days after receipt of the request for such a hearing.

"(E) The Administrator shall provide reasonable procedures for a petition to modify or terminate the action of the Administrator under this paragraph, if the concentration of the pesticide in the water from the drinking water well no longer exceeds the applicable ground water residue guidance level and will likely remain below such level.

"(3) JUDICIAL REVIEW.—Judicial review of actions taken under this subsection shall be governed by section 16.

"(g) INFORMATION ON PESTICIDES IN GROUND WATER.—The Administrator may collect and make available through a public information file information concerning the detection of pesticides in any ground water sampling point. The file may summarize for each pesticide that has been detected in ground water, based on reliable analytical data, whether the pesticide has been detected at a concentration that exceeds the applicable ground water residue guidance level and whether the presence of the pesticide in ground water appears to have been caused by use of the pesticide in compliance with this Act.

"(h) TECHNICAL ASSISTANCE TO STATES.—The Administrator shall provide technical information to a Governor of a State for the purpose of implementing this section. Subject to section 10(h), the technical information shall include data on the toxicity, environmental fate, physical or chemical pesticide ingredient characteristics, predictive modeling, exposure and other relevant subjects. In addition, the Administrator shall provide information, to the extent reasonably available, on the alternative methods of pest control and on agricultural or other management practices that could minimize the presence of pesticides in ground water.

"(i) SPECIAL REVIEW.—On receiving reliable analytical data that a pesticide has been detected above the ground water residue guidance level in ground water in a drinking water well or potential source of drinking water, the Administrator may initiate a public interim administrative review under section 3(c)(8) to determine whether the pesticide may cause unreasonable adverse effects on the environment from such use.

"(j) SITE-SPECIFIC INFORMATION.—

"(1) AVAILABILITY OF INFORMATION.—The Administrator shall enter into a memorandum of understanding with the Secretary of Agriculture, the Secretary of Commerce, and the Secretary of the Interior, for the purpose of developing information management systems and other techniques designed to make available information more useful to State and local officials and agricultural producers, applicators, and other persons using the pesticide information on the soil, hydrology, climate, and other characteristics or specific sites of pesticide application to be used by such officials and users in developing practices and making application decisions that will prevent the contamination of ground water by pesticides.

"(2) ESTABLISHMENT OF COUNCIL.—

"(A) Under the direction of the Administrator, a council shall be established to assist the Environmental Protection Agency in developing a site-specific pesticide information system.

"(B) The council shall consist of experts on information management who have experience with information retrieval from the Environmental Protection Agency, the National Agricultural Library, the Soil Conservation Service, the United States Geological Survey, and the National Oceanographic and Atmospheric Administration.

"(C) The council shall—

"(i) review existing information retrieval and referral services that may be used to access information on soil, hydrology, climate, and other characteristics at specific sites important to pesticide application;

"(ii) determine what information relevant to making site-specific pesticide decisions is available directly from existing data banks; and

"(iii) based on these determinations develop and submit to the Administrator a plan for an information management system that would direct and assist users in gaining access to site-specific information available in printed and electronic form.

"(3) CONSIDERATION BY ADMINISTRATOR.—The Administrator shall take the plans developed by the council into consideration when developing the site-specific pesticide information management system.

"(4) AUTHORIZATION.—

"(A) This subsection shall take effect to the extent that appropriations are made for it under subparagraph (B).

"(B) To carry out this subsection, there are authorized to be appropriated $2,500,000 for each of the fiscal years 1987, 1988, 1989, 1990, and 1991.

"(k) EFFECT ON OTHER PROVISIONS.—Nothing in this section shall limit the authority of the Administrator or of any State under other provisions of this Act or under any other law.".

(c) UNLAWFUL ACTS.—Section 12(a)(2) (7 U.S.C. 136j(a)(2)) (as amended by section 808(a)(2)(D) of this Act) is further amended by adding at the end thereof the following new subparagraph:

"(U) to violate an order issued under section 31(f)(2).".

(d) GROUND WATER RESIDUE GUIDANCE LEVEL.—Part C of title XIV of the Public Health Service Act is amended by inserting after section 1428 (42 U.S.C. 300h-7) the following new section:

"SEC. 1429. GROUND WATER RESIDUE GUIDANCE LEVEL.

"(a) ISSUANCE OF LEVELS.—

"(1) PERMISSIVE ISSUANCE FOR REGISTERED PESTICIDES.—The Administrator, on the Administrator's own initiative, may issue a ground water residue guidance level for a pesticide registered under the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.).

"(2) MANDATORY ISSUANCE FOR CERTAIN PESTICIDES.—The Administrator shall issue a ground water residue guidance level for a pesticide whenever the Administrator registers or reregisters a pesticide under such Act if the Administrator determines that the pesticide has the potential to leach into ground water.

"(3) MANDATORY ISSUANCE BASED ON CERTAIN DATA.—In addition, the Administrator shall issue a ground water residue guidance level for a pesticide if—

"(A) based on reliable analytical data, the pesticide has been detected at ground water sampling points in three or more different geographical areas;

"(B) based on reliable analytical data, the pesticide has been detected in a drinking water well or wellfield that serves a population of over 500 people; or

"(C) a Federal agency or a State petitions the Administrator to set a ground water residue guidance level for the pesticide.

"(b) LEVELS.—

"(1) MAXIMUM CONTAMINANT LEVELS.—If the Administrator has promulgated or promulgates a maximum contaminant level under section 1412(b)(3) that applies to a pesticide the ground water residue guidance level required under subsection (a) for the pesticide shall be set at such level within 30 days of being required under such section.

"(2) ESTABLISHING LEVEL IN ABSENCE OF MAXIMUM CONTAMINANT LEVEL.—

"(A) USE OF HEALTH ADVISORY LEVELS.—If a maximum contaminant level that would be applicable to a pesticide for which a ground water residue guidance level is required by subsection (a) has not been established under section 1412, the Administrator, in the Administrator's discretion, may use a health advisory level in establishing such ground water residue guidance level.

"(B) FACTORS FOR DETERMINING LEVEL.—The ground water residue guidance level established under this paragraph by the Adminis-

trator for such pesticide shall reflect the level of the pesticide in drinking water at which no known or anticipated adverse effect on the health of persons occur, the need for an adequate margin of safety, the nature of the toxic effects caused by the pesticide, and the validity, completeness, and adequacy of data about the pesticide.

"(C) ALL ABSENT OR INVALID DATA.—If all required chronic, oncogenicity, reproduction, or teratogenicity data are absent or invalid for the pesticide, the ground water residue guidance level for the pesticide established under this paragraph shall be set at the limit of detection.

"(D) CERTAIN ABSENT OR INVALID DATA.—If any required chronic, oncogenicity, reproduction, or teratogenicity data are absent or invalid for the pesticide, the ground water residue guidance level established under this paragraph for the pesticide shall include an additional margin of safety that takes into account the absence of such data.

"(c) PROCEDURE.—

"(1) INTERIM LEVELS FOR GENERAL PESTICIDES.—Before issuing a final ground water residue guidance level for a pesticide, the Administrator shall publish an interim ground water residue guidance level for the pesticide in the Federal Register and allow public comment for at least 30 days. During the public comment period, the Administrator shall invite comment on the level from the Secretary of Agriculture and States.

"(2) INTERIM LEVELS FOR PESTICIDES WITH HEALTH ADVISORY LEVELS.—If the Administrator is required under subsection (a) to issue a ground water residue guidance level for a pesticide and the ground water residue guidance level is to be issued pursuant to subsection (b)(2), the Administrator shall issue an interim ground water residue guidance level within 30 days after the requirement to issue the ground water residue guidance level takes effect.

"(3) FINAL LEVELS.—Within 3 months after establishing an interim ground water residue guidance level, the Administrator shall establish a final ground water residue guidance level. Until a final ground water residue guidance level is established under subsection (a) for a pesticide, an interim ground water residue guidance level established for the pesticide shall remain in effect.

"(d) REVISION OF LEVELS.—The Administrator may revise a ground water residue guidance level for a pesticide. The Administrator shall allow at least 30 days for public comment on any proposed revision.

"(e) JUDICIAL REVIEW.—An interim ground water residue guidance level shall not be subject to judicial review before the expiration of 3 months after its issuance. Judicial review of any final ground water residue guidance level or failure to establish an interim or final ground water residue guidance level shall be governed by section 1448. A ground water residue guidance level established under subsection (b)(1) shall not be subject to judicial review.".

SEC. 815. WORKER HEALTH AND SAFETY.

Section 25 (7 U.S.C. 136w) is amended by adding at the end thereof the following new subsection:

"(f) WORKER HEALTH AND SAFETY.—

"(1) IN GENERAL.—

"(A) The Administrator, as soon as practicable after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, shall promulgate regulations that require the protection, as appropriate and necessary, of employees who mix, load, or apply pesticides and agricultural employees who work in pesticide-treated areas.

"(B) The Administrator shall promulgate regulations that provide for the training, as appropriate and necessary, of employees who mix, load, or apply pesticides. Any training requirement that may be established by the Administrator under this subparagraph shall not apply to any person who is required to receive the training described in subsection (d) or (e) of section 4.

"(C) For purposes of subparagraphs (A) and (B), the term 'employees' does not include employees occupationally exposed to pesticides or pesticide residues as a result of the use of pesticides on livestock or other animals.

"(2) RULEMAKING PROCEDURES.—

"(A) The Administrator shall promulgate regulations under paragraph (1) for employees not described in subparagraph (B) not later than 3 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986.

"(B) The Administrator shall provide a period of at least 6 months for comments on proposed regulations issued under paragraph (1) that apply to agricultural employees who mix, load, or apply pesticides or who work in pesticide-treated areas. Such regulations shall be promulgated not later than 2 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986.

"(3) REPORT ON REGULATIONS.—Not later than 6 months after the date of the publication of the notice of proposed rulemaking issued for the regulations for employees described in paragraph (2)(B) to be promulgated under paragraph (1), the Secretary of Agriculture shall submit to the Administrator a report on the impact, cost, and effectiveness of such regulations on the agricultural community. The Secretary shall submit a copy of such report to Congress.

"(4) COPY OF REGULATIONS.—Simultaneously with the promulgation of regulations under paragraph (1), the Administrator shall transmit a copy of such regulations to the Secretary of the Senate and the Clerk of the House of Representatives. Such regulations may not become effective until the expiration of 120 days after the date such regulations are so transmitted.".

SEC. 816. ANTIMICROBIAL STANDARDS.

(a) GENERAL.—Section 3 (7 U.S.C. 136a) (as amended by section 106(b) of this Act) is further amended by adding at the end thereof the following new subsection:

"(h) ANTIMICROBIAL STANDARDS.—

"(1) STANDARDS.—The Administrator shall—

"(A) establish efficacy standards for antimicrobial control agents (including disinfectants) used to control pest microorganisms that pose a threat to human health, including standards for disinfectants used in hospitals and other health care facilities;

"(B) conduct, or require to be conducted, representative monitoring (including testing) of the compliance of the agents with the standards; and

"(C) implement an enforcement program under which the agents must comply with the standards or be prohibited from sale or distribution as an antimicrobial agent.

"(2) DEFINITION.—As used in paragraph (1), the term 'efficacy' means the capacity of an antimicrobial control agent (including a disinfectant) to produce the desired effect or the effectiveness of such an agent.".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect 60 days after the date of enactment of this Act.

SEC. 817. NEUROTOXICOLOGICAL AND BEHAVIORAL EFFECTS TESTING.

Section 3 (7 U.S.C. 136a) (as amended by section 816 of this Act) is further amended by adding at the end the following:

"(i) NEUROTOXICOLOGICAL AND BEHAVIORAL EFFECTS TESTING.—The Administrator shall develop methods for testing to accurately detect neurotoxicological and behavioral effects of pesticides, and their ingredients, and shall, as such methods are developed, require to the extent appropriate and necessary, that data from such testing be submitted by persons seeking to obtain or maintain pesticide registrations.".

SEC. 818. PESTICIDE CONTAINERS.

(a) IN GENERAL.—Section 19 (7 U.S.C. 136q) is amended by adding at the end thereof the following new subsections:

"(d) CONTAINER DESIGN.—

"(1) PROCEDURES.—

"(A) Not later than 3 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator shall, in consultation with the heads of other interested Federal agencies, promulgate regulations for the design of pesticide containers that will promote the safe storage and disposal of pesticides.

"(B) The regulations shall assure, to the fullest extent practicable, that the containers—

"(i) accommodate procedures used for the removal of pesticides from the containers and the rinsing of the containers;

"(ii) facilitate the safe use of the containers, including elimination of splash and leakage of pesticides from the containers;

"(iii) facilitate the safe disposal of the containers; and

"(iv) facilitate the safe refill and reuse of the containers.

"(2) COMPLIANCE.—The Administrator shall require compliance with the regulations referred to in paragraph (1) not later than 5 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986.

"(e) PESTICIDE RESIDUE REMOVAL.—

"(1) PROCEDURES.—

"(A) Not later than 3 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator shall, in consultation with the heads of other interested Federal agencies, promulgate regulations prescribing procedures and standards for the removal of pesticides from containers prior to disposal.

"(B) The regulations may—

"(i) specify, for each major type of pesticide container, procedures and standards providing for, at a minimum, triple rinsing or the equivalent degree of pesticide removal;

"(ii) specify procedures that can be implemented promptly and easily in various circumstances and conditions;

"(iii) provide for reuse, whenever practicable, or disposal of rinse water and residue; and

"(iv) be coordinated with requirements for the rinsing of containers imposed under the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 et seq.).

"(C) Nothing in this subsection shall affect the authorities or requirements concerning pesticide containers under the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 et. seq.).

"(D) The Administrator may, at the discretion of the Administrator, exempt products

intended solely for household use from the requirements of this subsection.

"(2) COMPLIANCE.—Effective beginning 5 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, a State may not exercise primary enforcement responsibility under section 26, or certify an applicator under section 4, unless the Administrator determines that the State is carrying out an adequate program to assure compliance with this subsection.

"(f) PESTICIDE CONTAINER STUDY.—

"(1) STUDY.—

"(A) The Administrator shall conduct a study of options to encourage or require—

"(i) the return, refill, and reuse of pesticide containers;

"(ii) the development and use of pesticide formulations that facilitate the removal of pesticide residues from containers; and

"(iii) the use of bulk storage facilities to reduce the number of pesticide containers requiring disposal.

"(B) In conducting the study, the Administrator shall—

"(i) consult with the heads of other interested Federal agencies, State agencies, industry groups, and environmental organizations; and

"(ii) assess the feasibility, costs, and environmental benefits of encouraging or requiring various measures or actions.

"(2) REPORT.—Not later than 2 years after the effective date of the Federal Insecticide, Fungicide, and Rodenticide Act Amendments of 1986, the Administrator shall submit to Congress a report describing the results of the study required under paragraph (1).".

(b) DEFINITION OF CONTAINER.—Section 2 (7 U.S.C. 136) (as amended by section 814(a) of this Act) is further amended by adding at the end thereof the following new subsection):

"(rr) CONTAINER.—The term 'container' means any package, can, bottle, bag, barrel, drum, tank, or other containing-device (excluding spray applicator tanks) used to enclose a pesticide or pesticide-related waste.".

SEC. 819. NOTICE FOR STORED PESTICIDES WITH CANCELED OR SUSPENDED REGISTRATIONS.

(a) NOTICE.—Section 6 (7 U.S.C. 136d) (as amended by section 306 of this Act) is amended by adding at the end the following:

"(i) NOTICE FOR STORED PESTICIDES WITH CANCELED OR SUSPENDED REGISTRATIONS.—

"(1) IN GENERAL.—Any producer or exporter of pesticides, registrant of a pesticide, applicant for registration of a pesticide, applicant for or holder of an experimental use permit, pesticide testing facility, commercial applicator, or any person who distributes or sells any pesticide which has in its possession any pesticide which has had its registration canceled or suspended under this section shall notify the Administrator and appropriate State and local officials of—

"(A) such possession,

"(B) the quantity of such pesticide in its possession, and

"(C) the place at which such pesticide is stored.

"(2) COPIES.—The Administrator shall transmit a copy of each notice submitted under this subsection to the regional office of the Environmental Protection Agency which has jurisdiction over the place of pesticide storage identified in the notice.".

(b) ENFORCEMENT.—Subparagraph (K) of section 12(a)(2) (7 U.S.C. 136j) (as amended by section 808(a)(2)(B)) is amended by inserting after "Act" the following: "or to fail to submit a notice in accordance with section 6(i)".

SEC. 820. AUTHORIZATION FOR APPROPRIATIONS.

Effective October 1, 1986, section 32 (7 U.S.C. 136y) (as redesignated by section 814(b)(1) of this Act) is further amended to read as follows:

"SEC. 32. AUTHORIZATION FOR APPROPRIATIONS.

"There is authorized to be appropriated to carry out this Act (other than sections 23(a) and 31(j))—

"(1) $103,363,500 for fiscal year 1987, of which not more than $13,735,500 shall be available for research under this Act and of which $22,500,000 shall be available to carry out section 31;

"(2) $112,414,200 for fiscal year 1988, of which not more than $14,343,600 shall be available for research under this Act and of which $22,500,000 shall be available to carry out section 31;

"(3) $116,673,400 for fiscal year 1989, of which not more than $14,978,200 shall be available for research under this Act and of which $22,500,000 shall be available to carry out section 31;

"(4) $123,305,800 for fiscal year 1990, of which not more than $15,625,900 shall be available for research under this Act and of which $22,500,000 shall be available to carry out section 31; and

"(5) $131,808,700 for fiscal year 1991, of which not more than $16,300,100 shall be available for research under this Act and of which $22,500,000 shall be available to carry out section 31.".

Subtitle B—Other Provisions

SEC. 825. LIABILITY FOR LAWFUL APPLICATION.

(a) PESTICIDE USE AND NO PRIVATE RIGHT OF ACTION.—

(1) GENERAL RULE.—Liability under Federal environmental statutes for—

(A) the costs of response to a release of a pesticide into the environment, or

(B) damages incurred with respect to a release or threatened release into the environment of a pesticide,

shall not be imposed on the agricultural producer involved in the release if, as shown by the agricultural producer, the application was in compliance with label instructions and applicable law unless the agricultural producer acted negligently, recklessly, or with the intent to misuse such pesticide but shall, to the extent provided under such statutes, be imposed on any other responsible parties.

(2) CONSTRUCTION.—Paragraph (1) shall not be construed, interpreted, or applied—

(A) to preempt or, except as provided in paragraph (1), assign or transfer liability under Federal or State laws, whether statutory or common,

(B) to affect the provisions of Federal environmental statutes to prohibit a release or threatened release of a pesticide into the environment, or

(C) as creating a new liability or as conferring a private right of action on any person for the purposes of the Federal Insecticide, Fungicide, or Rodenticide Act or any other Federal law.

(b) DEFINITION.—As used in subsection (a)—

(1) the term "agricultural producer" means a nongovernmental producer of agricultural commodities who (A) uses or supervises the use of any pesticide for the production of such commodities on property owned or rented by the producer or the producer's employer, or (B) without compensation other than the trading of personal services, assists another agricultural producer with the application of pesticides on such producer's land,

(2) the term "Federal environmental statutes" includes the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, the Clean Water Act, the Resource Conservation and Recovery Act, title XIV of the Public Health Service Act, and the Federal Insecticide, Fungicide, or Rodenticide Act, and

(3) the terms "damages", "response", "release", and "environment" shall have the meanings assigned them by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980.

SEC. 826. TOLERANCES FOR AGRICULTURAL COMMODITIES.

(a) REVOCATIONS AND SUSPENSIONS.—Section 408 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a) is amended by adding at the end the following:

"(p)(1)(A) If the registration of each pesticide containing a specific active or inert ingredient registered for use on a particular raw agricultural commodity—

"(i) has been canceled by the Administrator under the Federal Insecticide, Fungicide, and Rodenticide Act,

"(ii) has voluntarily been canceled under such Act, or

"(iii) has voluntarily been withdrawn under such Act,

due in whole or in part to dietary risks to humans, the Administrator, not later than 60 days after the effective date of such cancellation or after receipt of information of such withdrawal, shall revoke any tolerance established under subsection (b) for residues of such pesticide chemical in or on such commodity or any exemption from the need for such tolerance established under subsection (c). In revoking a tolerance or an exemption from a tolerance, the procedures required under section 553 of title 5, United States Code, shall be used.

"(B) The effective date of a revocation under subparagraph (A) may be delayed to permit distribution in commerce of food that bears residues of the active or inert ingredient as the result of—

"(i) the use of the canceled pesticide before the date of its cancellation,

"(ii) the use of existing stocks of such pesticide as authorized under the order cancelling the registration of the pesticide, or

"(iii) unavoidable residual environmental contamination.

"(2) If the registration of each pesticide containing a specific active or inert ingredient registered for use on a particular raw agricultural commodity has been suspended by the Administrator under the Federal Insecticide, Fungicide, and Rodenticide Act due in whole or in part to dietary risks to humans, the Administrator, not later than 60 days after the effective date of such suspension, shall suspend any tolerance established under subsection (b) for residues of such pesticide chemical in or on such commodity or any exemption from the need for such tolerance established under subsection (c). The effective date of such suspension may be delayed to permit distribution in commerce of food that bears residues of the active or inert ingredient as the result of—

"(A) the use of the suspended pesticide before the date of its suspension,

"(B) the use of existing stocks of such pesticide as authorized under the order suspending the registration of the pesticide, or

"(C) unavoidable residual environmental contamination.

In suspending a tolerance or an exemption from a tolerance, the procedures required under section 553 of title 5, United States Code, shall be used. The suspension of a tolerance or an exemption from a tolerance for a pesticide chemical shall be effective as long as the registration of the pesticide to which the tolerance or exemption is applicable is suspended under the Federal Insecticide, Fungicide, and Rodenticide Act. If the registration of the pesticide ceases to be suspended and is not canceled under such Act, the Administrator shall rescind any such suspension of a tolerance or exemption.

"(3)(A) At the time the Administrator makes a determination under section 3A(h)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act regarding an ingredient of a pesticide—

"(i) any tolerance established under subsection (b) for residues of a pesticide chemical that is or contains such ingredient or any exemption from the need for such a tolerance established under subsection (c) or a food additive regulation for residues of a pesticide chemical established under section 409 shall be reassessed.

"(ii) the Administrator shall—

"(I) make a determination whether such tolerance, exemption from tolerance, or regulation meets the requirements of this Act; and

"(II) confirm, establish, amend, or revoke such tolerance, exemption, or regulation in accordance with the requirements of this section.

"(B) Any tolerance, exemption, or regulation which is confirmed, established, or amended under subparagraph (A)(ii)(II) shall not become effective until the Administrator determines that a practical method for detecting residues in or on food or feed is available in order to enforce such tolerance, exemption, or regulation.

"(4) Notwithstanding the foregoing provisions of this subsection, the Administrator, by regulation, may reasonably limit the application of a revocation or suspension of a tolerance or exemption from a tolerance as necessary to prevent the imposition of restrictions on the imports of a particular agricultural commodity from a particular country, except that no such limitation may be effected unless the Administrator determines—

"(A) the tolerance or exemption satisfies the criteria of subsection (b) or (c); and

"(B) there is not available an effective alternative pesticide that may legally be used on the particular agricultural commodity in such country.".

(b) PROCEDURE.—Section 408(m) of such Act (21 U.S.C. 346a(m)) is amended by striking out "The" and inserting in lieu thereof "Except as provided in subsection (p), the".

(c) UNIFORMITY.—The Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321 et seq.) is amended by adding after section 412 the following:

"UNIFORMITY IN TOLERANCES AND FOOD ADDITIVE REGULATIONS

"SEC. 413. (a) To the extent provided in this section, a residue level issued under section 408 or 409 for a pesticide chemical described in subsection (b)(3), and a statement of the residue level below which enforcement action will not be taken under this Act with respect to such a chemical shall be uniform throughout the States.

"(b)(1) After December 31, 1986—

"(A) before the Administrator, acting under section 408 or 409, prescribes a permissible residue level for a pesticide chemical described in paragraph (3), or

"(B) before the Secretary issues a generally applicable statement of the residue level below which enforcement action will not be taken under this Act with respect to such a chemical,

the Administrator or Secretary shall, in accordance with section 553 of title 5, United States Code, propose a regulation prescribing that such level or statement shall be uniform throughout the States. Such regulation shall be made final if, after the consideration of comments on such proposed regulation, the Administrator or Secretary determines that such level or statement protects human health, including the health of identifiable population groups with special food consumption patterns.

"(2) In the case of a permissible residue level for a pesticide chemical described in paragraph (3) issued under section 408 or 409 that is in effect on December 31, 1986, or a generally applicable statement of the residue level below which enforcement action will not be taken under this Act with respect to such a chemical and that is in effect on such date, the Administrator or Secretary shall, in accordance with section 553 of title 5, United States Code, propose a regulation prescribing that such level or statement shall be uniform throughout the States. Such regulation shall be made final if, after the consideration of comments on such proposed regulation, the Administrator or Secretary determines that such level or statement protects human health, including the health of identifiable population groups with special food consumption patterns.

"(3) Paragraphs (1) and (2) shall apply to any pesticide chemical that is an active ingredient of a pesticide if—

"(A) the initial registration for a food use of any pesticide containing such pesticide chemical was issued—

"(i) under section 3(c)(5) of the Federal Insecticide, Fungicide, and Rodenticide Act on or after April 25, 1985, or

"(ii) on the basis of data determined by the Administrator to meet the requirements of part 158 of subchapter E of chapter I of title 40, Code of Federal Regulations, or

"(B) the pesticide containing such pesticide chemical as an active ingredient has been reregistered for food use under such section 3(c)(5) on or after April 25, 1985.

"(c) Except as provided in subsections (d) and (e), no State or political subdivision may establish or enforce any regulatory limit on residues of a pesticide chemical in or on food that is not identical to—

"(1) a permissible residue level established by regulation issued under section 408 or 409, or

"(2) any statement of the residue level below which enforcement action will not be taken under this Act,

after the Administrator or Secretary has prescribed uniformity for the residue level or statement under paragraph (1) or (2) of subsection (b) and the residues result from use of a pesticide containing a pesticide chemical described in paragraph (3) of such subsection.

"(d)(1) Notwithstanding any other provision of this section, no limit imposed by a State on the level of a residue of a pesticide chemical that may appear in or on any article of food as a result of the application of a pesticide shall apply if, at the time of the application of the pesticide, the sale of such an article of food with such level of residue of such pesticide chemical was lawful under section 408 or 409 and the law of such State unless the State determines the limit is necessary to prevent unreasonable risk to human health in such State.

"(2) The Administrator, in consultation with the Secretary of Agriculture, shall consider feasible actions to minimize the duration of distribution of existing stocks of food that contain pesticide chemical residues that comply with sections 408 and 409 and all applicable State laws at the time of the use of the pesticide chemical but that fail to comply with a new State regulatory limit.

"(3) The Administrator, in consultation with the Secretary of Agriculture, shall determine on an annual basis if feasible actions have been taken to minimize the duration of distribution of such stocks of food.

"(e)(1) A State may petition the Administrator or Secretary for authority to establish in the State a regulatory limit on residues of a pesticide chemical that is more stringent than the residue level or other statement for such pesticide chemical for which uniformity is prescribed under subsection (b).

"(2)(A) A petition under paragraph (1) shall be supported by—

"(i) scientific data about the pesticide chemical that is the subject of the residue level or other statement referred to in such paragraph or chemically related pesticide chemicals, data on the consumption of food treated with the pesticide chemical, data on exposure of humans to the pesticide chemical, or information about the pesticide chemical that reasonably raises concerns about the effect of the pesticide chemical on human health, and

"(ii) data or information described in clause (i) that has been developed since uniformity for the residue level or other statement referred to in paragraph (1) took effect, that was unavailable at the time the uniformity took effect, that was not considered by the Administrator or Secretary at the time the uniformity took effect, or that shows that the uniformity prescribed for the residue level or other statement referred to in such paragraph cannot be supported by the data or information used by the Administrator or Secretary in determining that such residue level or other statement should be uniform.

"(B) The Administrator or Secretary shall, upon the receipt of a petition submitted under paragraph (1), publish the petition in the Federal Register.

"(C) The Administrator or Secretary shall submit any petition submitted under paragraph (1) to the Scientific Advisory Panel established under section 25(d) of the Federal Insecticide, Fungicide, and Rodenticide Act.

"(3) Not later than the expiration of 180 days after the date a petition that meets the requirements of paragraph (2) is filed with the Administrator or Secretary, the Administrator or Secretary shall by order authorize the action requested by the petition or deny the petition. The Administrator may deny a petition only if the Administrator determines that the level or statement for which uniformity was prescribed under subsection (b) protects, in the State of the petitioner, human health, including the health of identifiable population groups with special food consumption patterns. Such order shall include a statement of the reasons for the order.".

SEC. 827. IR4 PROGRAM.

Section 2(c) of the Act entitled "An Act to facilitate the work of the Department of Agriculture, and for other purposes", approved August 4, 1965 (7 U.S.C. 450i(c)), is amended by inserting before the first sentence after paragraph (2) the following new sentence: "The Secretary in making grants under paragraph (2)(B) shall provide support for

the interregional project number 4 program (commonly referred to as the 'IR4 program').".

SEC. 828. PESTICIDE RISK RATING.

(a) STUDY.—

(1) IN GENERAL.—Subject to subsection (b), the Administrator of the Environmental Protection Agency may contract with the Board of Agriculture of the National Academy of Sciences to conduct a study to determine the feasibility of establishing an environmental risk rating for pesticides used in the production of agricultural commodities.

(2) RISK RATING FACTORS.—Such risk rating shall take into consideration methods of application, chronic and acute toxicity, and anticipated losses to and persistence in the environment.

(3) PUBLIC INPUT.—In conducting the study, the National Academy of Sciences shall seek information and advice from recognized public and private sector scientists and provide opportunity for public comment on the preliminary findings relating to the development of a risk rating.

(4) REPORT.—The National Academy of Sciences shall report the findings of such study to the Administrator and to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate within 18 months after entering into the contract referred to in paragraph (1).

(b) LIMITATION.—The study required by subsection (a) shall be conducted at such cost as the Administrator, in consultation with the National Academy of Sciences, may establish.

(c) CONTRACT AUTHORITY.—The authority of the Administrator to enter into contracts under this section shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

SEC. 829. EVALUATION BY THE COMPTROLLER GENERAL.

(a) EVALUATION.—The Comptroller General of the United States shall conduct an evaluation of the programs and activities authorized by the amendments to the Federal Insecticide, Fungicide, and Rodenticide Act made by this Act and shall make a final report of such evaluation to Congress no later than December 31, 1988. The Comptroller General shall include in such evaluation the effect that the Federal Insecticide, Fungicide, and Rodenticide Act, as amended by this Act, is having on the cost and availability of pesticides to farmers as well as other producers of food and fiber. Such evaluation shall include an analysis of the reregistration program under such Act and any program conducted by the Administrator of the Environmental Protection Agency under such Act relating to ground water.

(b) RECORDS.—For the purpose of conducting program evaluations required under subsection (a), the Comptroller General, or the duly authorized representatives of the Comptroller General, shall have access to and the right to examine all documents, papers, records, data, pesticide study documentation, or other recorded information within the possession or control of the Administrator of the Environmental Protection Agency or within the possession or control of pesticide registrants subject to regulation under the Federal Insecticide, Fungicide, and Rodenticide Act. The Comptroller General and the representatives of the Comptroller General shall be subject to the same restrictions regarding the disclosure of trade secret information as are the employees of the Environmental Protection Agency.

SEC. 830. STUDY OF NONAGRICULTURAL PESTICIDES.

The Administrator of the Environmental Protection Agency shall study and report to Congress within 1 year after the date of the enactment of this Act on the pesticide volume, use sites, and target insects for nonagricultural pesticides.

SEC. 831. PESTICIDE DRIFT.

The Administrator of the Environmental Protection Agency, within 2 years after the date of enactment of this Act, shall report to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate on the incidence and potential adverse effects on human health and the environment of the drift of pesticides from the site of application at the time of application.

SEC. 832. SURVEY OF NATURALLY OCCURRING AGENTS THAT ACT AS PESTICIDES.

The Administrator of the Environmental Protection Agency shall conduct a survey to determine what research has been, or is being, conducted to establish the extent to which agents that act as pesticides are manufactured by plants and thereby exist naturally in fruits, vegetables, grains, legumes, and oilseeds commonly consumed by persons in the United States. The Administrator shall provide a report on the findings of the survey to the Committee on Agriculture of the House of Representatives and to the Committee on Agriculture, Nutrition, and Forestry of the Senate not later than December 31, 1987, and shall release such findings to the public. The report shall include information on the extent to which such naturally occurring agents have been identified, the nature of such agents, and the extent to which such agents have been shown to be toxic, carcinogenic, or mutagenic.

SEC. 833. PESTICIDE RESISTANCE MANAGEMENT PROGRAM.

(a) PROGRAM.—The Administrator of the Environmental Protection Agency shall establish a Pesticide Resistance Management Program—

(1) to conduct research on pesticide resistance and pesticide resistance management techniques to control or reduce the development of pesticide resistance,

(2) to develop and demonstrate such management techniques, and

(3) in cooperation with the Secretary of Agriculture, to disseminate information obtained from the Program to appropriate entities, including growers and their organizations, manufacturers, pesticide advisors, pesticide applicators, State agriculture officials, and cooperative State extension services.

In establishing and conducting the Program the Administrator may, as appropriate, consult with the Science Advisory Panel established under section 25(d) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136w(d)).

(b) TRAINING REQUIREMENTS.—The Administrator may include training in pesticide resistance and pesticide resistance management techniques as part of the minimum standards established for commercial pesticide applicators by the Administrator under section 4(h) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136b(h)).

SEC. 834. DDT STUDY.

The Administrator of the Environmental Protection Agency, in cooperation with the Commissioner of the Food and Drug Administration, shall conduct a thorough evaluation of the health effects of DDT and other contamination of fish in Santa Monica Bay, California and in surrounding waters. The evaluation shall include an assessment of—

(1) the level of contamination of edible fish caught in the Bay and surrounding waters,

(2) the rate of consumption of contaminated fish from the Bay and surrounding waters by residents of Santa Monica and Los Angeles, California, and surrounding communities, and

(3) the health risks associated with the consumption of such contaminated fish.

The Administrator shall complete the evaluation within 6 months of the date of the enactment of this Act and shall report the results of the evaluation to the Congress.

SEC. 835. SALINITY LABORATORY, RIVERSIDE, CALIFORNIA.

Notwithstanding section 1431(a) of the Food Security Act of 1985 (Public Law 99-198; 99 Stat. 1556), there are authorized to be appropriated, beginning in fiscal year 1987, such sums as may be necessary for the planning, construction, and acquisition, by the Secretary of Agriculture, acting through the Agricultural Research Service, of buildings and equipment to establish a salinity laboratory to be located at Riverside, California. Sums appropriated under this section shall remain available without fiscal year limitation.

TITLE IX—CLARIFYING AND TECHNICAL AMENDMENTS

SEC. 901. CLARIFYING AMENDMENTS.

(a) REGISTRATION OF PESTICIDES.—

(1) LIMITATION ON UNREGISTERED PESTICIDES.—Section 3(a) (7 U.S.C. 136a(a)) (as amended by section 802(b)(1) of this Act) is further amended by adding at the end thereof the following new sentence: "To the extent necessary to prevent unreasonable adverse effects on the environment, the Administrator may by regulation limit the distribution, sale, or use in any State of any pesticide that is not registered under this Act and that is not the subject of an experimental use permit under section 5 or an emergency exemption under section 18.".

(2) REGISTRATION UNDER SPECIAL CIRCUMSTANCES.—The second sentence of section 3(c)(7)(A) (7 U.S.C. 136a(c)(7)(A)) is amended—

(A) by striking out "submit" each place it appears and inserting in lieu thereof "submit or cite";

(B) by striking out "submission" and inserting in lieu thereof "submission or citation"; and

(C) by striking out "submitted" and inserting in lieu thereof "submitted or cited".

(3) CLASSIFICATION OF PESTICIDES.—Section 3(d)(1) (7 U.S.C. 136a(d)(1)) is amended—

(A) in the second sentence of subparagraph (A), by striking out "on the initial classification"; and

(B) in subparagraph (C)—

(i) by striking out the colon preceding clause (i) and inserting in lieu thereof a period;

(ii) by striking out clause (i);

(iii) by striking out "(ii)"; and

(iv) by running in the material after "restricted use." so that the margin is the same as the margin of paragraph (1)(C).

(b) CERTIFICATION OF PESTICIDE DEALERS.—The last sentence of section 4(a)(1) (7 U.S.C. 136b(a)(1)) is amended by inserting "by regulation" after "may".

(c) REGISTRATION OF ESTABLISHMENTS.—Section 7(c)(1) (7 U.S.C. 136e(c)(1)) is amended—

(1) in the first sentence, by striking out "shall inform the Administrator" and insert-

ing in lieu thereof "shall, in accordance with regulations promulgated by the Administrator, submit to the Administrator a report";

(2) in the first sentence, by striking out "of the" and inserting in lieu thereof "describing"; and

(3) in the second sentence, by striking out "information" and inserting in lieu thereof "report".

(d) AUTHORITY OF ADMINISTRATOR.—Section 25(c) (7 U.S.C. 136w(c)) is amended—

(1) by inserting "or by regulation" after "hearing"; and

(2) in paragraph (5), by striking out "prescribe regulations requiring" and inserting in lieu thereof "require".

SEC. 902. TECHNICAL AMENDMENTS.

(a) SECTION 2.—Section 2 (7 U.S.C. 136) is amended—

(1) in subsection (c), by striking out "if:" and inserting in lieu thereof "if—";

(2) in subsection (p)(2), by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services";

(3) in subsection (q)(2)(A), by striking out "if:" and inserting in lieu thereof "if—";

(4) in subsection (q)(2)(C)(iii), by striking out ": Provided, That" and inserting in lieu thereof ", except that";

(5) in subsection (u)—

(A) by striking out ": Provided, That" and inserting in lieu thereof ", except that";

(B) by striking out "(1)(a)";

(C) by striking out "or (b)";

(D) by striking out "Health, Education, and Welfare" and inserting in lieu thereof "Health and Human Services";

(E) by striking out "(2) that" and inserting in lieu thereof "that"; and

(F) by striking out "an article covered by clause (1) of this proviso" and inserting in lieu thereof "a new animal drug"; and

(6) in subsection (ee)—

(A) by striking out ": Provided, That the term" and inserting in lieu thereof ", except that the term";

(B) by striking out "or" before clause (4);

(C) by striking out ": Provided further, That the term also shall not include" and inserting in lieu thereof ", (5)";

(D) by striking out "or any use" and inserting in lieu thereof "or (6) any use"; and

(E) by striking out ": And provided further, That after" and inserting in lieu thereof a period and "After".

(b) SECTION 3.—Section 3 (7 U.S.C. 136a) is amended—

(1) in subsection (c)(1)(D), by striking out "subsection (c)(2)(D) of this section" and inserting in lieu thereof "paragraph (2)(D)";

(2) in subsection (c)(1)(D)(i)—

(A) by striking out ": Provided, That such" and inserting in lieu thereof a period and "Such"; and

(B) by striking out the semicolon at the end thereof and inserting in lieu thereof a period;

(3) in subsection (c)(1)(D)(ii)—

(A) by striking out "except as" and inserting in lieu thereof "Except as";

(B) by striking out "subparagraph (D)(i) of this paragraph" and inserting in lieu thereof "clause (i)"; and

(C) by striking out the semicolon at the end thereof and inserting in lieu thereof a period;

(4) in subsection (c)(1)(D)(iv) (as redesignated by section 702(1) of this Act)—

(A) by striking out "after expiration" and inserting in lieu thereof "After expiration";

(B) by striking out "subparagraphs (D)(i) and (D)(ii) of this paragraph" and inserting in lieu thereof "clauses (i), (ii), and (iii)"; and

(C) by striking out the semicolon at the end thereof and inserting in lieu thereof a period;

(5) in subsection (c)(2)—

(A) by striking out "(2)(A) DATA IN SUPPORT OF REGISTRATION.—The" and inserting in lieu thereof the following:

"(2) DATA IN SUPPORT OF REGISTRATION.—

"(A) The";

(B) by indenting all of subparagraph (A) (as amended by the preceding provisions of this Act) two ems, so as to align its left margin with the margin of subparagraph (A) of section 3(d)(1);

(C) in subparagraph (B), by striking out "(B)" and all that follows through "(i) If" and inserting in lieu thereof the following:

"(B)(i) If";

(D) by realigning clauses (iii), (iv), and (v) of subparagraph (B) (as amended by the preceding provisions of this Act) two ems to the left, so as to align the left margin of each clause with the margin of subparagraph (A) (as amended by subparagraph (B) of this paragraph);

(E) in the fourth sentence of subparagraph (B)(iv), by striking out ": Provided, That the" and inserting in lieu thereof a period and "The";

(F) in the first sentence of subparagraph (B)(v), by striking out "subsection (c)(1)(D) of this section" and inserting in lieu thereof "paragraph (1)(D)";

(G) in subparagraph (C), by striking out "SIMPLIFIED PROCEDURES.—"; and

(H) by indenting all of subparagraph (C) two ems, so as to align its left margin with the margin of subparagraph (A) (as amended by subparagraph (B) of this paragraph);

(6) in subsection (c)(7), by striking out "subsection (c)(5) of this section" each place it appears and inserting in lieu thereof "paragraph (5)";

(7) in the second sentence of subsection (c)(7)(A), by striking out ": Provided, That if" and inserting in lieu thereof a period and "If";

(8) in subsection (d)(1)(A)—

(A) in the first sentence, by striking out ", provided that if" and inserting in lieu thereof a period and "If"; and

(B) in the last sentence, by striking out ": Provided, however, That the" and inserting in lieu thereof a period and "The";

(9) in subsection (d)(1)(C)(ii), by striking out the last sentence and inserting in lieu thereof the following new sentence: "Any such regulation shall be reviewable in accordance with section 16(e).."; and

(10) in subsection (f)(2), by striking out ": Provided, That as" and inserting in lieu thereof a period and "As".

(c) SECTION 4.—Section 4(a)(1) (7 U.S.C. 136b(a)(1)) is amended—

(1) by striking out ": Provided, That such" and inserting in lieu thereof a period and "Such"; and

(2) by striking out ": Provided, however, That the" and inserting in lieu thereof a period and "The".

(d) SECTION 5.—The last sentence of section 5(g) (7 U.S.C. 136c(g)) is amended by striking out ": Provided, That such" and inserting in lieu thereof a period and "Such".

(e) SECTION 6.—Section 6 (7 U.S.C. 136d) is amended—

(1) in subsection (c), by striking out "Agency" each place it appears and inserting in lieu thereof "Administrator";

(2) in subsection (c)(1), by running into the second sentence the undesignated paragraph in that subsection;

(3) in the second sentence of subsection (c)(3)—

(A) by striking out "(i)" and inserting in lieu thereof "(A)"; and

(B) by striking out "(ii)" and inserting in lieu thereof "(B)"; and

(4) in the second sentence of subsection (e)(2), by striking out ": Provided, That the" and inserting in lieu thereof a period and "The".

(f) SECTION 10.—Section 10(d) (7 U.S.C. 136h(d)) is amended—

(1) in paragraph (1)—

(A) by striking out ": Provided, That the" and inserting in lieu thereof a period and "The"; and

(B) by striking out ": Provided further, That this" and inserting in lieu thereof a period and "This"; and

(2) in the second sentence of paragraph (3), by striking out ": Provided, That where" and inserting in lieu thereof a period and "Where".

(g) SECTION 12.—Section 12(a)(2)(F) (7 U.S.C. 136j(a)(2)(F)) is amended by striking out ": Provided, That it" and inserting in lieu thereof a period and "It".

(h) SECTION 13.—Section 13 (7 U.S.C. 136k) is amended—

(1) in subsection (b), by moving the last sentence in paragraph (3) after such paragraph as a full measure sentence; and

(2) in the first sentence of subsection (c), by striking out ": Provided, That upon" and inserting in lieu thereof a period and "On".

(i) SECTION 15.—Section 15(a) (7 U.S.C. 136m(a)) is amended by striking out "(i)" and "(ii)".

(j) SECTION 16.—Subsection (a) of section 16 (7 U.S.C. 136n) is amended to read as follows:

"(a) DISTRICT COURT REVIEW.—Except as otherwise provided in this Act, the refusal of the Administrator to cancel or suspend a registration or to change a classification not following a hearing and other final actions of the Administrator not committed to the discretion of the Administrator by law are judicially reviewable by the district courts of the United States.".

(k) SECTION 17.—Section 17(c) (7 U.S.C. 136o(c)) is amended—

(1) by striking out ": Provided, That the" and inserting in lieu thereof a period and "The"; and

(2) by striking out ": And provided further, That all" and inserting in lieu thereof a period and "All".

(l) SECTION 18.—Section 18 (7 U.S.C. 136p) is amended—

(1) in the heading, by inserting "AND STATE" after "FEDERAL"; and

(2) by running in the second sentence after the first sentence.

(m) SECTION 19.—Section 19(a) (7 U.S.C. 136q(a)) is amended by striking out "canceled under section 6(c)" and inserting in lieu thereof "suspended under section 6(c) and canceled".

(n) SECTION 21.—Section 21 (7 U.S.C. 136s) is amended—

(1) in subsection (a), by inserting "SECRETARY OF AGRICULTURE.—" after the subsection designation;

(2) in subsection (b), by inserting "VIEWS.—" after the subsection designation; and

(3) in subsection (c), by inserting "NOTICE.—" after the subsection designation.

(o) SECTION 24.—Section 24 (7 U.S.C. 136v) is amended—

(1) in subsection (b), by inserting "UNIFORMITY.—" after the subsection designation; and

(2) in subsection (c)—

(A) by striking out "(c)(1) A" and inserting in lieu thereof the following:

"(c) ADDITIONAL USES.—

"(1) A"; and

(B) by indenting each paragraph two ems, so as to align the left margin of each paragraph with the margin of paragraph (4) of section 25 (as added by section 810 of this Act).

(p) SECTION 25.—Section 25 (7 U.S.C. 136w) is amended—

(1) in subsection (a)—

(A) by striking out "(a)(1) REGULATIONS.—The" and inserting in lieu thereof the following:

"(a) IN GENERAL.—

"(1) REGULATIONS.—The";

(B) by indenting all of paragraphs (1) and (3) two ems, so as to align the left margin of each paragraph with the margin of paragraph (4) of such section (as added by section 810 of this Act);

(C) in paragraph (2), by striking out "(2) PROCEDURE.—" and inserting in lieu thereof the following:

"(2) PROCEDURE.—";

(D) by indenting each subparagraph of paragraph (2) two ems, so as to align the left margin of each subparagraph with the margin of subparagraph (A) of section 25(f)(1) (as added by section 815 of this Act);

(E) in paragraph (2)—

(i) in subparagraph (A), by striking out "PROPOSED REGULATIONS.—";

(ii) in subparagraph (B), by striking out "FINAL REGULATIONS.—";

(iii) in subparagraph (C), by striking out "TIME REQUIREMENTS.—"; and

(iv) in subparagraph (D), by striking out "PUBLICATION IN THE FEDERAL REGISTER.—"; and

(F) in paragraph (3), by striking out "Committee on Agriculture and Forestry" and inserting in lieu thereof "Committee on Agriculture, Nutrition, and Forestry"; and

(2) in the second sentence of subsection (e), by striking out ": Provided, That whenever" and inserting in lieu thereof a period and "Whenever".

(q) SECTION 26.—Section 26 (7 U.S.C. 136w-1) is amended—

(1) in subsection (a), by inserting "IN GENERAL.—" after the subsection designation;

(2) in subsection (a)(1), by striking out "; Provided, That the" and inserting in lieu thereof ", except that the";

(3) in subsection (b), by inserting "SPECIAL RULES.—" after the subsection designation; and

(4) in subsection (c), by inserting "ADMINISTRATOR.—" after the subsection designation.

(r) SECTION 27.—Section 27 (7 U.S.C. 136w-2) is amended—

(1) in subsection (a), by inserting "REFERRAL.—" after the subsection designation;

(2) in subsection (b), by inserting "NOTICE.—" after the subsection designation; and

(3) in subsection (c), by inserting "CONSTRUCTION.—" after the subsection designation.

(s) REDESIGNATION OF SECTIONS 3A AND 4.—

(1) REDESIGNATION OF SECTION 4 AS SECTION 11.—

(A) IN GENERAL.—Section 4 (7 U.S.C. 136b) (as amended by the preceding provisions of this Act) is redesignated as section 11 (as amended by section 601(c)(2)).

(B) CONFORMING AMENDMENTS.—Sections 2(e)(3) (as amended by section 601(a)(1) of this Act), 5(f), 19(e)(2) (as added by section 818(a) of this Act), 23(a)(1)(C) (as amended by section 804 of this Act), 25(f)(1)(B) (as added by section 815 of this Act), and 26(b) are each amended by striking out "section 4" and inserting in lieu thereof "section 11".

(2) REDESIGNATION OF SECTION 3A AS SECTION 4.—

(A) IN GENERAL.—Section 3A (as added by section 105(a) of this Act) is redesignated as section 4.

(B) CONFORMING AMENDMENTS.—Sections 6(g)(2) (as added by section 305(a) of this Act), 12(a)(2)(J) (as amended by section 808(a)(2)(B) of this Act), 24(a)(2)(A)(ii) (as amended by section 801(a) of this Act), and section 408(p)(3) of the Federal Food, Drug, and Cosmetic Act (as added by section 820 of this Act) are each amended by striking out "3A" and inserting in lieu thereof "4".

SEC. 903. TABLE OF CONTENTS AMENDMENTS.

Subsection (b) of section 1 (7 U.S.C. prec. 121) is amended to read as follows:

"(b) TABLE OF CONTENTS.—

"Section 1. Short title and table of contents.
"(a) Short title.
"(b) Table of contents.
"Sec. 2. Definitions.
"(a) Active ingredient.
"(b) Administrator.
"(c) Adulterated.
"(d) Animal.
"(e) Applicator.
"(1) Commercial applicator.
"(2) Private applicator.
"(3) Certified applicator.
"(4) Under the direct supervision of a certified applicator.
"(f) Defoliant.
"(g) Desiccant.
"(h) Device.
"(i) District court.
"(j) Environment.
"(k) Fungus.
"(l) Imminent hazard.
"(m) Inert ingredient.
"(n) Ingredient statement.
"(o) Insect.
"(p) Label and labeling.
"(1) Label.

TITLE X—EFFECTIVE DATE
SEC. 1001. EFFECTIVE DATE.

Except as otherwise provided in this Act, the amendments made by this Act shall take effect on the expiration of 60 days after the date of enactment of this Act.

TITLE XI—HOMELESS ELIGIBILITY CLARIFICATION ACT

SEC. 1101. SHORT TITLE.

This title may be cited as the "Homeless Eligibility Clarification Act".

Subtitle A—Emergency Food for the Homeless

SEC. 1111. MEALS SERVED TO HOMELESS INDIVIDUALS.

(a) DEFINITION OF FOOD.—Section 3(g) of the Food Stamp Act of 1977 (7 U.S.C. 2012(g)) is amended—

(1) in clause (1), by striking out "and (8)" and inserting in lieu thereof "(8), and (9)";

(2) by striking out "and" at the end of clause (7); and

(3) by inserting before the period at the end thereof the following: ", and (9) in the case of households that do not reside in permanent dwellings and households that have no fixed mailing addresses, meals prepared for and served by a public or private nonprofit establishment (approved by an appropriate State or local agency) that feeds such individuals and by a public or private nonprofit shelter (approved by an appropriate State or local agency) in which such households temporarily reside (except that such establishments and shelters may only request voluntary use of food stamps by such individuals and may not request such households to pay more than the average cost of the food contained in a meal served by the establishment or shelter)".

(b) DEFINITION OF HOUSEHOLD.—The last sentence of section 3(i) of such Act (7 U.S.C. 2012(i)) is amended by inserting after "battered women and children," the following: "residents of public or private nonprofit shelters for individuals who do not reside in permanent dwellings or have no fixed mailing addresses, who are otherwise eligible for coupons,".

(c) DEFINITION OF RETAIL FOOD STORE.—Section 3(k)(2) of such Act (7 U.S.C. 2012(k)(2)) is amended by striking "and (8)" and inserting in lieu thereof "(8), and (9)".

(d) PARTICIPATION OF ESTABLISHMENTS AND SHELTERS.—Section 9 of such Act (7 U.S.C. 2018) is amended by adding at the end thereof the following new subsection:

"(g) In an area in which the Secretary, in consultation with the Inspector General of the Department of Agriculture, finds evidence that the participation of an establishment or shelter described in section 3(g)(9) damages the program's integrity, the Secretary shall limit the participation of such establishment or shelter in the food stamp program, unless the establishment or shelter is the only establishment or shelter serving the area.".

(e) REDEMPTION OF COUPONS.—The first sentence of section 10 of such Act (7 U.S.C. 2019) is amended—

(1) by striking out "and" after "battered women and children,"; and

(2) by inserting after "blind residents" the following: ", and public or private nonprofit establishments, or public or private nonprofit shelters that feed individuals who do not reside in permanent dwellings and individuals who have no fixed mailing addresses".

(f)(1) The amendments made by this section shall become effective, and be implemented by issuance of final regulations, not later than April 1, 1987.

(2) Not later than September 30, 1988, the Secretary of Agriculture shall submit to the Committee on Agriculture of the House of Representatives and the Committee on Agriculture, Nutrition, and Forestry of the Senate a report that evaluates the program established by the amendments made by this section, including any proposed legislative recommendations.

(3) The amendments made by this section shall cease to be effective after September 30, 1990.

Subtitle B—Job Training for the Homeless

SEC. 1121. JOB TRAINING FOR THE HOMELESS.

(a) ECONOMICALLY DISADVANTAGED TO INCLUDE HOMELESS.—Section 4(8) of the Job Training Partnership Act (29 U.S.C. 1503(8)) is amended—

(1) by striking out "or" at the end of clause (D);

(2) by striking out the period at the end of clause (E) and inserting in lieu thereof a semicolon; and

(3) by adding at the end thereof "(F) is homeless and whose total income is not in excess of the income levels described in subparagraph (B).".

(b) JOB TRAINING PLAN.—Section 104(b) of the Job Training Partnership Act (29 U.S.C. 1514(b)) is amended by redesignating paragraphs (3) through (10) as paragraphs (4) through (11), respectively, and by inserting after paragraph (2) the following:

"(3) and a description of how the program will provide services to the homeless;".

(c) BARRIERS TO EMPLOYMENT RULE.—Section 203(a)(2) of the Job Training Partnership Act (29 U.S.C. 1603(a)(2)) is amended by inserting "homeless," after "older workers,".

Subtitle C—Entitlements Eligibility

SEC. 1131. TREATMENT OF HOMELESS INDIVIDUALS ELIGIBLE UNDER SSI PROGRAM.

Section 1631(e) of the Social Security Act (42 U.S.C. 1383(e)) is amended by adding at the end the following:

"(3) The Secretary shall provide a method of making payments under this title to an eligible individual who does not reside in a permanent dwelling or does not have a fixed home or mailing address.".

SEC. 1132. APPLICATION FOR SSI AND FOOD STAMP BENEFITS BY SSI PRE-RELEASE INDIVIDUALS.

Section 1631 of the Social Security Act (42 U.S.C. 1383) is amended by adding at the end the following:

"Pre-Release Procedures for Institutionalized Persons

"(j) The Secretary shall develop a system under which an individual can apply for supplemental security income benefits under this title before discharge or release of the individual from a public institution. The Secretary and the Secretary of Agriculture shall develop a procedure under which an individual who applies for supplemental security income benefits under this title shall also be permitted to apply for participation in the food stamp program by executing a single application.".

SEC. 1133. DELIVERY OF VETERANS' BENEFITS PAYMENTS.

(a) IN GENERAL.—(1) Section 3003 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Benefits under laws administered by the Veterans' Administration may not be denied an applicant on the basis that the applicant does not have a mailing address.".

(2) Section 3020 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) In the case of a payee who does not have a mailing address, payments of mone-

tary benefits under laws administered by the Veterans' Administration shall be delivered under an appropriate method prescribed pursuant to paragraph (2) of this subsection.

"(2) The Administrator shall prescribe an appropriate method or methods for the delivery of payments of monetary benefits under laws administered by the Veterans' Administration in cases described in paragraph (1) of this subsection. To the maximum extent practicable, such method or methods shall be designed to ensure the delivery of payments in such cases.".

(b) EFFECTIVE DATE.—(1) The amendment made by subsection (a)(1) shall take effect on the date of enactment of this Act.

(2) The amendment made by subsection (a)(2) shall take effect with respect to payments made on or after October 1, 1986.

Mr. BEDELL (during the reading). Mr. Speaker, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

Mr. ROBERTS. Mr. Speaker, reserving the right to object, I will not object, I will yield to my friend and colleague for the purpose of informing our colleagues of the nature of this legislation and why we are yea passing the FIFRA bill for the third time.

Mr. Speaker, the House will shortly pass and send to the other body a package of amendments to the FIFRA bill, S. 2792. This package is the result of hard and lengthy negotiations between the Agriculture and Energy and Commerce Committees.

Since we are adopting this package by unanimous consent, there will be no conference report and no formal legislative history. The national uniformity provisions of the package contain language new to the House. As a principal author of the bill and as ranking minority member of the Agriculture Subcommittee that developed the bill, I want to make sure there is no misunderstanding as to the intent of the uniformity provisions:

First, under the bill, uniformity is required for a broad range of pesticide residue limits established under the Federal Food, Drug, and Cosmetic Act. These include tolerances issued under section 408 of the act for pesticide residues on raw agricultural commodities, food additive regulations issued under section 409 for pesticide residues in processed food, and tolerances issued under section 406 for unavoidable pesticide residues resulting from environmental contamination. Uniformity is also required for any generally applicable statement of the level of residues of the pesticide in food below which enforcement action will not be taken. This encompasses enforcement action levels employed by FDA and covers permissible residues in processed food subject to the passthrough provision of section 402 of the act. Under the passthrough provision, pesticide residues in a processed food are legal as long as the level of such residues is no greater than the tolerance for the pesticide on the raw agricultural commodity from which the processed food was derived.

Second, uniformity applies to any pesticide residue resulting from a use of the pesticide that was lawful under Federal law, the law of the State where the pesticide was applied, and the law of the State where the food containing the residue is distributed, as of the time that the pesticide was in fact used on the food crop. This is a "pipeline" provision, which prevents a State from retroactively applying new residue limitations after a pesticide has lawfully been used by the farmer. Under this provision, such limitations can be prospective, but not retroactive, that is, they can apply only to residues resulting from pesticide use after the limitation has been adopted. Thus, farmers will be able to rely on existing State requirements at the time they use a pesticide and need not fear that those requirements will later be changed.

The unreasonable risk exception to the pipeline provision would permit a State to impose a new pesticide residue limit on existing stocks of food only where the State can demonstrate a significant risk of harm to its citizens from residue levels meeting Federal law during the short time required for the food in question to work itself through the pipeline.

Third, the uniformity provisions become effective on January 1, 1987. However, there are a number of chemicals that have been registered or registered since April 25, 1985, that meet very rigorous scientific criteria—tests which are on the cutting edge of science. In my judgment, EPA should move rapidly to establish uniformity for any chemical that meets the April 25, 1985, data requirements.

Mr. Speaker, under my reservation of objection, I yield to the gentleman from Michigan [Mr. DINGELL].

Mr. DINGELL. I thank the gentleman.

Mr. Speaker, I am sure that the amendment that the gentleman presents is that to which we agreed this morning. Am I correct?

Mr. BEDELL. The gentleman is correct.

Mr. ROBERTS. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Iowa [Mr. BEDELL].

Mr. BEDELL. I thank the gentleman.

Mr. Speaker, this amendment represents hours and hours of work and negotiation by the people from the Commerce Committee who have been most cooperative. By Mr. ROBERTS, by Mr. STENHOLM, by a large number of our colleagues who have worked and worked hours and hours and hours on this bill.

This bill in my opinion is a very important bill in the regulation of the pesticides and chemicals in our environment. It is a giant step forward and I urge its passage.

Mr. ROBERTS. Mr. Speaker, further reserving the right to object, I yield to the gentleman from California [Mr. WAXMAN] for purposes of a colloquy.

Mr. WAXMAN. I thank the gentleman for yielding to me.

Mr. Speaker, I would like you to explain what happens under the pipeline provision contained in subsection (d)(1) of the proposed section 413. If there is review by a court, what law applies to the State determination?

Mr. BEDELL. The requirements of this provision would be satisfied if a State makes the determination specified in the provision. In addition, the State would have to make the determination in accordance with applicable procedural requirements and any substantive requirements in the State law.

Mr. WAXMAN. Thus, when the State makes its determination in compliance with applicable State law, the State action would stand.

Mr. BEDELL. That is correct.

Mr. ROBERTS. Mr. Speaker, under my reservation of objection, I yield to the gentleman from New Jersey [Mr. FLORIO] for purposes of a colloquy.

Mr. FLORIO. I thank the gentleman for yielding to me.

Mr. Speaker, as regards section 825 of the bill, it provides a limitation on the liability of the agricultural producer under other Federal environmental statutes provided that the producer can prove affirmatively that he applied the pesticide in conformance with label instructions. Once the producer has met that burden of proof, he can be held liable only if he acted negligently, recklessly or with intent to misuse such pesticide. Is my understanding of this provision correct?

Mr. BEDELL. Yes, my colleague is absolutely correct in his interpretation of this provision.

Mr. FLORIO. I would also like to inquire of my colleague from Texas about the intent of two other aspects of section 825 of the bill, dealing with liability under Federal environmental laws. The bill says liability shall be imposed on "any responsible party." It further says that such liability is "to the extent provided under such statutes."

As for the categories of responsible parties that could be included here, we intend to cover, among other parties, any person who has distributed a pesticide in commerce.

Mr. BEDELL. That is correct. Responsible parties could include those parties who are involved with the distribution of the pesticide that caused the contamination.

Mr. FLORIO. As for the language that says liability shall be "to the extent provided under such statutes," we intend for this provision to apply the standards of liability which exist under other applicable Federal environmental laws to any responsible party.

Mr. BEDELL. That is correct.

Mr. ROBERTS. Mr. Speaker, further reserving the right to object, I yield to the gentleman from Iowa [Mr. BEDELL].

Mr. BEDELL. I thank the gentleman.

Mr. Speaker, we are short on time, but I cannot help but thank the staff that has worked many, many, many hours on this effort. The Members of Congress who have worked out our various differences and spent so much time, my friend from Kansas and all of those who have been involved in this effort.

Mr. ROBERTS. I thank the gentleman for his comments.

Mr. Speaker, under my reservation, I would simply add only that this bill would not have been possible without the leadership and the perseverance of my dear friend and colleague from Iowa [Mr. BEDELL].

Mr. KASTENMEIER. Mr. Chairman, today the House is considering an important pesticide reform bill. One section of the bill includes a patent term provision like H.R. 5536 introduced by our colleague from Virginia, Mr. BOUCHER, a member of my subcommittee.

The patent term provisions of this bill differ from the earlier House passed bill, H.R. 5536, House Report 99–895, in two respects:

(1) The patent term provisions are sunsetted after 15 years. Thus, any substance patented during that time period will be eligible for extension regardless of when the regulatory review period occurred.

(2) The provision provides up to 2 years of patent term extension for substances in the pipeline at the date of enactment rather than the 3 years provided for in H.R. 5536.

These changes were agreed to as an accommodation to the other body who had included similar provisions. The other body had a 7-year sunset in their version of FIFRA reform. We agreed with Senator MATHIAS who said:

Such a short-term sunset would largely undermine the goal of patent term restoration for pesticide inventions; to stimulate long-range research and development projects in this industry. Under . . . the amendment, the patent restoration would be available only to new agrichemicals which complete regulatory review at the EPA in the next seven years. Such a provision could have little impact on the investment decisions to be made in the next few years on agrichemical research projects because uncertainty as to whether they will result in a product approved by the EPA in time to apply for a patent term restoration to compensate for the time lost during the lengthy approval process. Far from stimulating innovation, the provision would only reward innovation that has already been achieved, that is, products that have been patented and are about to enter the lengthy regulatory review process at the EPA.

A sunset would also run contrary to the most basic argument for patent term restoration in this industry, namely that pesticide inventions ought to receive the same 17-year patent term that is enjoyed by any other type of invention, and should not be denied full patent life because of the lengthy premarket regulatory review at the EPA.

Despite these reservations we have gone more than halfway to meet the position of the other body.

The patent term provisions of this bill differ from the Senate passed provisions in minor respects. The House bill is more consistent with current patent term law, and is slightly more inclusive in that genetically altered plants, and plant products are eligible for extension.

This legislation is the result of more than 6 years of legislative work. The Carter administration first proposed patent term restoration as a way to stimulate investment in research and development and to compensate for lost patent life due to Federal regulatory delay. After several legislative attempts at enacting patent term legislation, an Office of Technology Assessment study justifying the need for legislation, Congress finally acted in 1984 to create a patent term statute. Unfortunately, for a variety of reasons, agricultural chemicals, toxic substances and genetically altered plants were excluded from that legislation. This bill is an attempt to redress that omission.

The bill permits patent owners or their agents to apply for an extension of patent term when their product has been prevented from being commercially marketed or used because of a regulatory review period imposed by Federal law. Patent term extension under this bill is authorized for three different types of substances: agricultural chemicals; toxic substances; and genetically altered plant and plant products. These three types of products are required to undergo substantial health and safety testing before they can be commercially marketed or used. To compensate for this testing—while under patent but not on the market—the bill provides that an extension can be granted for a period of up to 5 years.

The bill also assists generic pesticide producers by permitting them to use the patented substances during the last 2 years of patent life to conduct health and safety testing. This will permit the more rapid approval of generic substitutues.

Finally, the bill provides procedures to guard against potential abuses for the patent term extension system. The bill compensates only for tests conducted with due diligence and excludes time spent by agencies reviewing insufficient data. Challenge procedures are also specified for parties adversely affected by the extension process when they believe that the patent holder has acted without due diligence.

It seems beyond dispute that once Congress has enacted a set of rules which afford patent term extension to a certain type of products, say, human drugs, which already compensated for regulatory delay, that other similarly situated substances should be granted similar benefits. To do so is a matter of simple consistency.

The National Agricultural Chemical Association [NACA] has compiled statistics on the effective patent life of agricultural chemicals. That data shows an average life of 15.5 years for the top 20 chemicals, but the more recent chemicals have an effective life of only 10½ years. These troubling statistics lead me to conclude that patent term restoration for time lost due to Federal regulatory delay is a matter of fairness and equity. Fairness in that existence of valid and useful health and safety tests which delay market entry should not punish the owner of intellectual property. Equity in that agricultural chemicals and products should not be treated worse than their human drug counterparts.

The Committee on the Judiciary concluded that patent term extension was appropriate as a means of encouraging increased expenditures on research and development. As the patent owners showed the costs of getting a new pesticide to the market have increased dramatically over recent years. In order to recoup this investment, a more complete patent life may be necessary. Thus, in the view of the committee, this bill serves to stimulate innovation.

I would like to thank Congressmen BOUCHER, MOORHEAD, DEWINE, GLICKMAN, and SYNAR for their leadership on this issue. Moreover the willingness of the industry to negotiate and agree with public interest and environmental groups on FIFRA reform is commendable.[1] These negotiations were the definitive step that brought us this far. Perhaps by acting today we can encourage such negotiations on other issues.

I urge my colleagues to support this bill.

Mr. BEDELL. Mr. Speaker, the House amendment to the Senate amendment consists of a substitute bill that is a compromise with respect to the various differences between the Senate- and House-passed bills. I believe it would be helpful, so that all who are interested in the FIFRA legislation can understand the compromise nature of the House amendment, for me to review, in some detail, the major provisions of the House amendment.

PREREGISTRATION ACCESS TO DATA

The bill provides for public access to health and safety data submitted to support an application for the registration of a pesticide containing a new active ingredient, or to authorize the initial food use of a pesticide active ingredient. Public access would only be granted for the purpose of allowing public comment on the application. A person seeking access to data supporting an application for registration must affirm that the person is not directly or indirectly, acting on behalf of someone, in the pesticide business. Criminal penalties would be required for wrongful disclosures of information. (Secs. 101 and 102.)

---

[1] In this regard special note should be made of the good work done on this issue by Nancy Drabble of Public Citizen, Dr. Jack Early of NACA, Bill Lyons of Ciba-Gigy and Tom Sager and David Modi of Dupont.

CONDITIONAL REGISTRATIONS

The bill will prohibit conditional registration amendments of a pesticide for additional uses unless the additional use is in the public interest. A conditional amendment to add a use not be granted if data concerning possible chronic effects have not been submitted, and the registrant has had a reasonable time to submit the data, unless the amendment is to add a minor use. (Sec. 103.)

REREGISTRATION OF REGISTERED PESTICIDES

The bill will require the Administrator of the Environmental Protection Agency to reregister pesticides with active ingredients contained in pesticides registered before November 1, 1984, with outstanding data requirements. Reregistration would be completed in five phases:

First, EPA would publish a priority list of the active ingredients contained in pesticides that must be reregistered. Priority would be given to active ingredients that have not already been assigned reregistration requirements, and that are in use on or in food or feed and may result in postharvest residues or residues of potential toxicological concern in potable ground water, edible fish or shell fish, have significant outstanding data requirements, or are used where workers exposure is most likely.

Second, registrants must notify the Administrator whether or not the registrant intends to seek reregistration of a listed pesticide. Registrants must also identify and agree to replace missing and inadequate data for the pesticide.

Third, registrants must summarize studies previously submitted in support of reregistration, reformat certain data in the studies according to EPA guidelines, and promise to fill outstanding data requirements.

Fourth, The Administrator must review submissions to determine if all data that are missing or inadequate were identified. Outstanding data requirements for each active ingredient must be published, and 4 years would be allowed for the submission of required data.

Fifth, EPA must conduct a thorough examination of all data, and determine if the pesticide is eligible for reregistration. Applicants for reregistration of the pesticide must then supply supplemental product-specific data. The Administrator must make a final decision on reregistration not later than 1 year after the submission of all required data.

The bill provides for the payment of reregistration fees based on active ingredients. Collectively, registrants of each pesticide registered for a major use on food or feed must pay an initial fee of $50,000 with the phase two submission. A final fee of $100,000 would be paid under phase 3.

Registrants of each pesticide registered for a major use on food or feed for which registration requirements already have been issued, must collectively pay a fee of $150,000 at a time to be determined by the Administrator.

Registrants of each pesticide not registered for a major food or feed use must collectively pay a fee determined by the Administrator—but not greater than $50,000 or less than $75,000. If registration requirements already have been issued for the pesticide, the fee could not be greater than $100,000 or less than $50,000.

Fees could be reduced or waived for minor use pesticides, pesticides for which the value or volume of use is small, certain small businesses, and antimicrobial active ingredients for which production levels do not exceed 1 million pounds per year. Fees are to be apportioned, according to domestic market share, among registrants.

The bill also provides that certain small business registrants will pay fees based on the gross revenue from sales of a pesticide during the 3-year period prior to reregistration.

Registrants who have not marketed a pesticide in the 3 years prior to reregistration will pay 15 percent of the prescribed fees if they choose to reregister. (Secs. 104 and 105.)

INERT INGREDIENTS

The bill will direct the Administrator to establish a priority list of between 50 and 75 inert ingredients. Listed would be first, inerts that appear to cause a pesticide to trigger a public interim administrative review; second, inerts for which additional data are reasonably necessary to assess whether they may cause unreasonable adverse effects, that are similar in molecular structure to chemicals known to cause unreasonable adverse effects, and that have significant use in pesticides or to which there is significant exposure from pesticides; and third, inerts for which additional data are needed to assess whether they may result in unreasonable adverse effects and to which there is significant exposure from pesticides.

The bill authorizes the Administrator, when establishing the priority list, to take into account, first, the differences in concept, usage, and environmental risk between various classes of pesticides, and second, data for evaluating the risk between agricultural and nonagricultural pesticides.

Within 1 year, the Administrator must determine if additional data on a listed inert ingredient are needed, and such data must be submitted within 4 years. Within 1 year after submission of the data, the Administrator must take appropriate regulatory action.

The bill would require modification of pesticide ingredient statements to show the name of each inert ingredient in a pesticide that the Administrator determines must appear in the statement because of the hazard that may be posed by the use pattern and concentration level of the inert ingredient, and the name of any inert ingredient for which the Administrator has required additional data because it appears to cause a pesticide to trigger a public interim administrative review. (Secs. 106 through 109.)

PUBLIC RIGHT TO KNOW

The bill will require that any producer operating a pesticide production establishment to prepare or obtain a fact sheet, summarizing relevant health, safety, and environmental data for each active ingredient manufactured or used at the establishment. The producer must furnish a copy of the factsheet to any person on request. Producers must furnish to EPA annual reports that include the name of each ingredient for which a factsheet is required, the location of the establishment, and a copy of the most current factsheet. Factsheets and annual reports must be made available to the public. (Sec. 201.)

DATA DISCLOSURE TO STATES

The bill will require the Administrator to disclose to a State data or information acquired under the act if the State provides at least the same protections as the act with respect to the disclosure and use of the data or information, and State law allows the data submitter to recover just compensation for losses that result from wrongful disclosure, as provided by the act. (Sec. 202.)

PUBLIC INTERIM ADMINISTRATIVE REVIEW

The bill provides that a public interim administrative review initiated after January 1, 1987, on whether the use of a currently registered pesticide or category of pesticides poses unreasonable adverse effects to the environment must be conducted as follows:

First, the Administrator must publish criteria for initiating a review. The criteria must be based on levels of risk and could include consideration of currently available exposure data. Absence of exposure data would not delay initiation of a review. The Administrator could decline to initiate a review solely on the basis of exposure only if adequate data on all relevant means of exposure have been considered.

Second, as under current law, the Administrator could not initiate a review to develop a risk-benefit evaluation of a pesticide or any of its uses before initiating a formal action to cancel, suspend, or deny the registration of the pesticide unless the review is based on a validated test or other significant evidence raising prudent concerns of unreasonable adverse risk to the environment.

Third, on receipt of information about a pesticide demonstrating that the criteria for initiating a review have been met, the Administrator must notify all registrants of the pesticide and provide information and an explanation.

Fourth, if the Administrator intends to initiate a review of a pesticide registered for agricultural uses, the Administrator must notify the Secretary of Agriculture.

Fifth, any review must be conducted in accordance with published regulations. The regulations must provide that a review will include a notice of initiation of the review; a notice of preliminary determination; and a notice of final determination. Public comment must be provided for in the notice of initiation and the notice of preliminary determination.

Sixth, the notice of initiation or the notice of preliminary determination must state the basis for the review or determination and include a request for any additional data needed, and a bibliography of all scientific data, studies, and expert analysis concerning those risks or ben-

efits of the pesticide that are under review. A person must submit comments within 90 days and disclose all scientific data, studies, and expert analyses in the person's possession about the pesticide that were not included in the bibliography.

Seventh, within 18 months after initiating a review, the Administrator must decide what further regulatory action—if any—to take. (Sec. 301.)

PUBLIC HEARINGS RESULTING FROM A PUBLIC INTERIM ADMINISTRATIVE REVIEW

The bill will establish the following special rules to govern hearings that result from the final decision of the Administrator in a public interim administrative review initiated after January 1, 1987:

First, any person who is adversely affected by a decision of the Administrator, including a person without an economic interest in the pesticide, could request a hearing within 30 days of the decision. A person could request a hearing, or intervene in a hearing, only if that person submitted comments during the review.

Second, at the request of a party to the hearing, the administrative law judge [ALJ] could receive into evidence portions of the review record and other evidence if the party demonstrates the evidence is relevant and material to the disputed issues, is not unduly repetitious, and a competent witness is made available to be cross-examined about the evidence. Direct testimony of witnesses concerning scientific data or studies that were not, but could have been, obtained and submitted in the review would not be admissible at the hearing. The right of parties to confront and cross-examine witnesses would be preserved on material issues of adjudicative facts.

Third, not later than 120 days after the ALJ is appointed, prehearing matters must be completed and the hearing begun. The ALJ could establish a schedule for prehearing matters, and must ensure that the hearing schedule is met.

Fourth, any challenge to the notice of intent to cancel or change classification stemming from the review, or to any request for a hearing or motion to intervene, must be filed with the ALJ before the evidentiary phase of the hearing. Not later than 30 days before the hearing begins, the parties must exchange witness lists, a summary of testimony, and a list of all documents and exhibits to be introduced at the hearing. The presentation of evidence must be completed within 60 days after commencement of the hearing. The person who requested a hearing on an issue will have the burden of going forward to present an affirmative case and have the burden of proof on that issue.

Fifth, a hearing must be completed and the Administrator must make a final decision within 300 days of the issuance of the final review notice that gave rise to the hearing. (Sec. 302.)

CANCELLATION AND CHANGE IN CLASSIFICATION ON LABELS

The bill will add a new provision to current law to require that any request for a hearing on cancellation must identify the findings and conclusions of the Administrator that are disputed, and include a complete statement of the reasons and factual basis that support the request for a hearing. Any party may identify findings and conclusions in dispute. Before convening a hearing on the request of a person without an economic interest in the pesticide, the Administrator must determine that the request presents a substantial issue of fact pertaining to whether the pesticide poses an unreasonable risk to man or the environment.

The bill also will authorize pesticide label changes through informal rulemaking, as follows:

First, the Administrator could not require label changes that are equivalent to a cancellation of a use, render the product unmarketable, or otherwise have a major economic effect on persons affected by the changes.

Second, once a regulation is promulgated, the Administrator must notify each registrant or user of the pesticide of the label change required by the regulation. Thirty days must be provided for registrants to apply for amendments to registrations to comply with the regulation.

Third, at a hearing requested by a registrant or user of a pesticide that is subject to the regulation, the scope of the hearing will be limited to whether, first, the pesticide complies with the regulation; second, the regulation by its terms is applicable to the pesticide; and third, because of significant new information it would be unreasonable to require compliance with the regulation.

Fourth, in an action for review of a label regulation, on request, the court must stay the regulation if the petitioner shows a likelihood of success on the merits, and that implementation of the regulation would cause a risk of substantial harm to the petitioner. The court could not stay the regulation if the Administrator shows that failure to implement the regulation would cause a risk of substantial harm to health or the environment. (Sec. 303.)

PUBLIC HEARINGS ON CANCELLATION

The bill provides that, as soon as practicable after completion of a hearing on the cancellation of a pesticide registration—but not later than 18 months after the issuance of the cancellation notice that gave rise to the hearing—the Administrator must evaluate the data and reports and take appropriate regulatory action. This time period could be extended by the Administrator under extraordinary circumstances for not more than one year. (Sec. 304.)

ADMINISTRATIVE CHANGES

The bill will allow a pesticide registrant any time to request that any of its registrations be cancelled or amended to delete one or more uses. Before acting upon the request, the Administrator would be required to publish a notice of the receipt of the request.

The bill will specify that notices of certain regulatory action under the act must be published in the Federal Register and sent by certified mail, return receipt requested, to the registrant's or applicant's address of record.

The bill will restate and clarify existing law to require that if, at any time after registration a registrant has additional information regarding unreasonable adverse effects of his pesticide on the environment, the information must be submitted to the Administrator. Information would include factual information and expert opinion regarding risks or benefits.

The bill provides that, if the Administrator issues a notice of the denial of registration, a request for a hearing under the act must be made within 30 days after receipt of the notification. The Administrator could issue regulations governing the right to a hearing on denial with respect to a product containing an ingredient that already has been cancelled under the act. The regulations could give due weight to the desirability of finality of prior proceedings and the extent the applicant had an opportunity to participate in earlier proceedings. (Sec. 305.)

CANCELLATION OF REGISTRATION BASED ON FALSE OR INVALID DATA

The bill will require the Administrator to immediately issue an order of suspension and a notice of intent to cancel a pesticide registration if the Administrator has determined in the industrial biotest validation process that the data submitted in support of the registration were invalid and have not been replaced, or are in the process of being replaced but are not submitted by April 1, 1988, and are material to the registration.

The bill specifies that, if the Administrator determines that invalid data have been submitted or cited in support of a registration, the Administrator could either require the registrant to submit valid replacement data on an expedited schedule, or issue a notice of intent to cancel the registration. If a registrant willfully submits material data known to be false in support of registration, the Administrator must immediately issue a notice of intent to suspend or cancel the registration.

The bill will make a suspension or cancellation based on false or invalid data effective 30 days after receipt by the registrant of a notice of the proposed action unless, during the 30-day period, a request for a hearing is made by a person adversely affected.

The bill will limit the matters for resolution at hearings held with respect to false or invalid data and impose a 75-day time limit on the hearing. (Sec. 306.)

INSPECTIONS

The bill will clarify existing law to provide that officers or employees of the United States or of any State, duly designated by the Administrator are authorized to:

First, conduct inspections at pesticide distribution and sales facilities, other places where pesticide records are located, and pesticide testing facilities;

Second, enter any place where the officer or employee has reason to believe that the act has been or is being violated by any person other than a private applicator;

Third, enter, inspect, and obtain samples at any place where pesticides with canceled or suspended registrations are stored, if the Administrator has reasonable cause to believe there is a danger to public health or safety;

Fourth, obtain and execute warrants authorizing entry and obtaining of evidence for inspection purposes, inspection and copying of records, and seizure of any pesticide or device that is in violation of the act; and

Fifth, obtain and execute warrants in accordance with Federal law if a court or magistrate determines there is probable cause to believe that a criminal violation of the act has occurred or is occurring on the property.

The bill will require the Administrator to coordinate inspections with actions taken under other Federal laws. (Sec. 402.)

EXPORT OF PESTICIDES

The bill specifies that a pesticide will be considered misbranded if the pesticide is intended for export and is substantially similar in composition and use pattern to a registered pesticide but the label is not written in an appropriate language or does not contain the same health, safety, and hazard precautions as a registered pesticide, unless the precautions on the label would be in conflict with laws of the importing country.

This bill will restrict the export of a pesticide that is classified for restricted use, canceled, suspended, or not registered for any use. Export of the pesticide would be allowed if 30 days before the first shipment each year, the exporter, first, provides the notice described below to the person importing the pesticide and the appropriate government regulatory office in the importing country, second, receives written evidence that the notice was delivered to the appropriate government regulatory office, and third, submits a copy of the notice in English and evidence of delivery to the Administrator.

The Administrator must promptly transmit through the Secretary of State a notice to the appropriate governmental regulatory office of other countries and to appropriate international agencies whenever a registration, or a cancellation or suspension of a registration, becomes effective or ceases to be effective, or a pesticide is classified for restricted use. An annual notice must also be transmitted.

The Administrator must: First, actively participate in international efforts to develop and improve pesticide research and regulatory programs; second, provide foreign countries with technical assistance to develop comprehensive pesticide regulatory programs; third, conduct and publish a survey of all countries that import pesticides from the United States or from which the United States imports agricultural commodities, to ascertain what procedures exist in each country regarding the registration, labeling, and training to ensure safe handling, transportation, application, and disposal of pesticides, and to control residues on foods in order to meet tolerances established under United States law. (Secs. 501 through 505.)

CERTIFICATION, TRAINING, AND RECORDKEEPING

The bill will make it a violation of the act for any person to use any pesticides as a commercial applicator unless the person is a certified commercial applicator, or a registered commercial applicator under the direct supervision of a certified commercial applicator. To be considered to be a certified commercial applicator or a registered commercial applicator a person must meet certain requirements and standards.

The bill provides that a restricted use pesticide must be considered to have been applied by, or under the direct supervision of, a certified private applicator only if it is applied by a person who is either a certified private applicator, or a supervised private applicator who uses the pesticide under the direct supervision of a certified private applicator. To be considered to be a certified private applicator or supervised private applicator a person must meet certain minimum requirements and standards.

The bill will impose a requirement that each certified applicator and each registered commercial applicator undergo refresher training and be recertified or reregistered within a period established by the State agency but not to exceed 5 years.

The bill will require the Administrator in consultation with the Secretary of Agriculture to develop certain training material on the use of appropriate procedures for the application of pesticides, safety procedures for pesticide application, clothing and protective equipment for pesticide application, the detection of common symptoms of pesticide poisoning, the means of obtaining emergency medical treatment, hazards posed by pesticides to workers, the public health, and the environment, specific commercial application categories, and the requirements of applicable law, regulations, and labeling. The bill also will require the Administrator to establish minimum standards of competency, and experience or expertise, for trainers and minimum standards for training programs.

A State agency could approve any privately administered training program that it determines meets the requirements established under the act, or requirements established by the State agency, whichever are more stringent.

Federal and State field personnel responsible for onsite observations and inspections of pesticide use must have training that includes training covering materials specified for the commercial application categories for which they are assigned enforcement responsibility.

The bill also will clarify that, in establishing standards applicable to applicators, the Administrator must establish separate standards for commercial applicators and private applicators. (Sec. 601.)

The bill will require each commercial applicator to maintain records of pesticide applications, including the identity and amount of the pesticides applied and the date and location of the applications, for a period of 2 years. No regulation could require any private applicator to maintain any records or file any reports or other documents.

Each pesticide dealer would have to maintain a record of each sale or distribution of a pesticide classified for restricted use and pesticides designated because they may cause significant adverse effects on health or the environment. The records must include the identity of the pesticide sold, identity of the person to whom the pesticide was distributed or sold, the date of the distribution or sale, and the amount of the pesticide distributed or sold. A pesticide dealer must maintain the records for 3 years.

A pesticide dealer or commercial applicator must afford to any employee or former employee access to records required to be kept that directly relate to the employee's employment duties. Customers of the dealer or applicator must also have access to records that directly relate to a purchase or application.

State enforcement agencies, as part of an investigation or enforcement action in response to a formal complaint, must make available a report of the findings of the investigation or action to the complainant. At a minimum, the report must include the records required by this section.

An employer who uses or supervises the use of a pesticide must know or have access to the brand name and common or medical name of the pesticide, and know or have access to the safety, first aid, and antidote information listed on the labeling, and make the information available, on request, to any employee exposed to a pesticide and to treating medical personnel.

Records obtained under these provisions of the bill that are used for commercial purposes would be a violation of the act. (Sec. 601.)

DATA DEVELOPMENT

The bill provides that if the Administrator determines that additional data are required to maintain an existing registration of a pesticide or a group of pesticides, the Administrator must notify the registrant of each pesticide and provide a list of the registrants to any person. Within 90 days of receiving notice, registrants must provide evidence that appropriate steps are being taken to secure and submit the additional required data.

The bill also authorizes two or more registrants to agree to develop jointly, or to share in the cost of development of, data to maintain a registration. An offer to enter into such an agreement may be accepted at any time but may not be withdrawn without the consent of the person to whom the offer is made. Registrants making joint data development, or cost sharing, agreements will be entitled to examine and rely on the data to maintain or obtain registrations under the act or the law of any State. If 60 days after entering into a joint data agreement the registrants have not further agreed to the terms of the agreement, then any of the registrants may move to fix the terms by the initiation of arbitration proceedings. (Sec. 701.)

DATA COMPENSATION AND ARBITRATION

For pesticides with expired patents, the bill provides a new procedure for fixing the amount of compensation to be paid for the use of another person's health and safety data. Under this provision, before the filing of an application for registration that cites another person's data, compensation could be fixed by arbitration that is binding on the original data submitter and binding on the person seeking to use the data only after the application is submitted. There would be no court review of the arbitration finding except for fraud or misrepresentation. Each party to the first arbitration would share equally in the payment of the fees and expenses of the arbitrators and pay its own attorney's fees. In all subsequent arbitrations the party who seeks to use the data would pay all fees, including attorney's fees. (Sec. 702.)

PATENT TERM RESTORATION AND PATENT INFRINGEMENT

The bill grants patent extensions to certain pesticides, chemical, and plant products that must undergo regulatory review prior to commerical marketing. A patent could be extended for up to 5 years based on the period that the patented product was subject to a statutorily mandated review period prior to commercial marketing or use. Patent extension would not be available if the patent has previously been extended under this authority,

or if the patent is already expired. If a regulatory review period for a product begins before the date of enactment of the bill, the period of patent extension could not exceed 2 years. If the regulatory review period for a product began before the date of enactment and if regulatory review had been completed on or before date of enactment there will be no extension of the patent. The period of regulatory review used to calculate patent extension would be reduced by any period during which the product sponsor fails to act with due diligence during the regulatory review period. The patent term extension authority provided in the bill would expire 15 years after the date of enactment of the bill, except that patent term extension would still be available for products that are patented during the 15-year period.

The bill also provides that, with certain exceptions, during the last 2 years of a patent relating to a pesticide—including a patent which claims a pesticide, a method for using a pesticide, or a method of manufacturing a pesticide—which is or has been registered under the act or which has been marketed with the permission of the holder of the patent, it will not be an act of patent infringement to make, use, or sell the pesticide solely for testing reasonably related to the development and submission of data to meet certain regulatory requirements.

It woud be an act of patent infringement for any person to submit any application under the act for a pesticide covered by the first composition of matter patent, method of use patent, or method of manufacturing patent issued for the pesticide before the expiration of the first such patent, unless such person is the holder of the patent or a licensee thereof. (Sec. 703.)

STATE AUTHORITY AND REGISTRATIONS

For a period of 5 years, the bill will restrict the authority of a State to prohibit any sale or use of certain household antimicrobial pesticides, otherwise allowed under the act, for which an application for a State registration is pending unless and until the State has made a final determination on the application. The bill will specify that when a State provides a registration for additional uses of a federally registered pesticide to meet special local needs, the registration will expire and be of no further effect at the end of the period, if any, provided by the State, or 10 days after the date the Administrator publishes a notice that the State no longer desires the registration to continue in effect.

The Administrator must establish criteria that define the conditions under which a special local needs registration may be disapproved by the Administrator, taking into account geographic patterns of use.

The bill also provides that in promulgating pesticide regulations, States may take into account, first, the difference in concept and usage between various classes of pesticides, and second, the differences in environmental risk and the appropriate data for evaluating the risk between agricultural and nonagricultural pesticides. (Sec. 801.)

DEFINITIONS

The bill will clarify that the term "to use any registered pesticide in a manner inconsistent with its labeling" does not include, first, applying a pesticide at any dosage, concentration, or frequency less than that specified on the labeling, unless the labeling specifically prohibits a deviation; or second, employing any method of application not prohibited by the labeling specifically states that the product may be applied only by the methods specified on the labeling. (Sec. 802.)

INFORMATION REQUESTED

The bill will require the Administrator to catalog and retrieve data under the act in a manner to eliminate or reduce burdensome requests to registrants for submission of information, particularly those requests that require the submission of duplicate confidential data. (Sec. 803.)

SCIENTIFIC ADVISORY PANEL

The bill will make the scientific advisory panel under the act permanent and expand the panel from seven members to nine members. (Sec. 805.)

AUTHORITY FOR EPA ACTION

The bill provides that the Administrator could act on complaints or information, if a State does not promptly initiate appropriate investigative action after receiving a referral from the Administrator, or does not initiate appropriate enforcement action within 90 days of receipt of the referral. (Sec. 806.)

EXPIRATION OF STATE PRIMARY ENFORCEMENT RESPONSIBILITY

The bill provides that the primary enforcement responsibility of a State with respect to pesticide use violations will expire on September 1, 1990, unless the Administrator determines that the State has the authority to impose civil and criminal penalties at least equal to those provided in the act. (Sec. 807.)

UNLAWFUL ACTS

The bill provides that it would be unlawful for any person to, first, falsify all or part of any information relating to the testing of any pesticide; second, submit data known to be false to the Administrator in support of a registration; or third, violate certain regulations issued under the act. (Sec. 808.)

PENALTIES AND SUBPENAS

The bill provides that:

First, any registrant, applicant for a registration, producer, or pesticide testing facility that violates any provision of the act could be assessed a civil penalty by the Administrator of not more than $25,000 for each offense, and not more than $50,000 for a subsequent violation;

Second, any commercial applicator of restricted use pesticides, or any other person who distributes or sells pesticides or devices, that violates any provision of the act could be assessed a civil penalty by the Administrator of not more than $10,000 for each offense, and not more than $20,000 for a subsequent violation;

Third, any private applicator who violates any provision of the act subsequent to receiving a written warning from the Administrator or following a citation for a prior violation may be assessed a civil penalty by the Administrator of not more than $1,000 for each offense, and not more than $2,000 for a subsequent violation. The Administrator could waive the requirement for a warning or citation for a first offense by a private applicator if the violation was intentional or caused significant harm to health or the environment; and

Fourth, any registrant, applicant for a registration, producer, or pesticide testing facility that knowingly violates any provision of the act can be fined not more than $50,000 or imprisoned for not more than 1 year, or both. Any commercial applicator of restricted use pesticides, or any person—not including a registrant, applicant for a registration, producer, or pesticide testing facility—who distributes or sells pesticides or devices that knowingly violates any provision of the act can be fined not more than $25,000 or imprisoned for not more than 1 year, or both.

The maximum penalty for the knowing violation of the act by a private applicator would be increased from $1,000 to $2,000, and the possible term of imprisonment from 30 to 60 days.

The Administrator could issue subpenas compelling the attendance and testimony of witnesses, and production of documents. (Sec. 809.)

CONGRESSIONAL REVIEW

The bill will repeal current congressional veto provisions applicable to regulations under the act. Substitute provisions would be provided for the Administrator, simultaneously with the promulgation of any rule or regulation, to transmit a copy to the Secretary of the Senate and the Clerk of the House of Representatives. The rule or regulation would not become effective until 60 calendar days after the rule or regulation is transmitted. (Sec. 810.)

REVIEW OF REGULATIONS

The bill will allow any person to obtain judicial review of a regulation promulgated by the Administrator, or the refusal by the Adminstrator of a petition to modify or rescind a regulation, by filing a petition for review in the U.S. Court of Appeals within 120 days after the date of promulgation or refusal.

A regulation issued by the Administrator or a refusal by the Administrator of a petition to modify or rescind a regulation issued under the act would not be subject to judicial review in, first, any suspension, cancellation, or denial proceeding, or in any appeal therefrom, or second, certain enforcement proceedings under the act or in any appeal therefrom except on request of an agricultural producer who is adversely affected by the action. If a person petitions the Administrator to modify or rescind a regulation in the enforcement proceeding, the application of the regulation must be stayed until the Administrator issues a final decision on the petition. (Sec. 811.)

DELEGATION AND COOPERATION

The bill will establish that regulatory actions of the Administrator will not preempt the Secretary of Labor from acting under the Occupational Safety and Health Act to prescribe or enforce standards or regulations to the extent that the Administrator and the Secretary of Labor so agree. To ensure the safety and health of workers, the Administrator and the Secretary of Labor must seek to reach agreements and to coordinate the exercise of their statutory authority. (Sec. 812.)

INDEMNITY REPORT

The bill provides that if the Administrator has taken an action that requires the payment of indemnification, the Administrator must provide a report to the House and Senate Agri-

culture Committees and the House and Senate Appropriations Committees. (Sec. 813.)

GROUND WATER AUTHORITY

The bill will add a new section to the act and amend the Public Health Service Act to provide for protection of ground water under the Federal pesticide program. The new section of the act would provide for, first, determinations by the Administrator as to whether a pesticide has the potential for leaching into ground water, second, registrant notification, to the Administrator, of detection of pesticides in ground water, third, monitoring of ground water by registrants, fourth, pesticide registration amendments—based on reasonable likelihood, fifth, response to the presence of excessive levels of pesticides in ground water, sixth, making information available to the public, seventh, technical information to the States, eighth, public interim administrative review, and ninth, information management systems, as follows:

The Administrator will be required to publish and seek comment on criteria to determine whether a pesticide has the potential to leach into ground water. Each applicant for pesticide registration or reregistration under the act would be required to submit any information required by the Administrator regarding such leaching potential for the pesticide involved and the destination and method of transportation of the pesticide; and at the time of registration or reregistration, the Administrator would have to determine whether the pesticide has such potential. Also, the Administrator would be required, if he determines that a pesticide has leaching potential or has been detected at three or more ground water sampling points, to decide whether monitoring data on the presence of the pesticide in ground water are needed for the registration.

Whenever a pesticide registrant obtains or learns of reliable data that a pesticide has been detected first, at a ground water sampling point and no ground water residue guidance level has been issued for the pesticide; or second, at a ground water sampling point at a concentration higher than previously reported from that sampling point, or at a concentration that is 20 percent (or more) of the guidance level, the registrant must file a report of the information, within 15 working days, with the Administrator, the State involved, and the owner of the property in which the sampling point is located, if known. The report must provide the information known to the registrant relating to the detection. The Administrator, on receiving a report, must promptly review the information reported to determine, first, the reliability of the detection, and second, whether further action should be taken to protect ground water.

If the Administrator receives reliable data that, first, a pesticide has been detected in a drinking water well; second, the concentration of the pesticide equals or exceeds the ground water residue guidance level, and third, the presence of the pesticide in the drinking water well may be the result of use of the pesticide in accordance with the label or recognized practices involving the pesticide, the Administrator could require the registrant to analyze samples of ground water from the well involved as necessary to determine whether the pesticide is present at a concentration that equals or exceeds the guidance level for the pesticide. The monitoring would have to be completed within 90 days after notice. In addition, the Administrator—if he determines that additional data on the presence of a pesticide in ground water are required to maintain in effect a registration of a pesticide—could require the pesticide registrant to conduct ground water monitoring. He would have to consult with the Secretary of Agriculture, heads of other appropriate Federal agencies, and the States concerning the design and scope of such monitoring requirements.

The Administrator would be required, after reviewing reliable data, to determine whether there is a "reasonable likelihood"—which term is described in the bill—that the ground water residue guidance level for a pesticide will be exceeded in drinking water wells in different localities. If he determines that there is a reasonable likelihood, he must promptly require amendments to the pesticide's registration as reasonably necessary to ensure that use of the pesticide in accordance with the amended registration will not cause the final guidance level for the pesticide involved in the finding to be exceeded in drinking water wells. The Administrator's determination must be made public. The Administrator would have to notify the pesticide registrant of the proposed amendments and publish notice in the Federal Register. The notice must include the Administrator's determination whether the presence of the pesticide in wells appears to have been the result of the use of the pesticide in accordance with its label or the result of recognized practices.

The Administrator would be required to make a similar determination of "reasonable likelihood" with respect to potential drinking water, and similarly mandate amendments to a pesticide's registration—with notice to the registrant of the proposed amendments. In making a determination relating to potential drinking water, the Administrator would, first, not be required to make the determination public; second, be required to take into account information submitted by States on land or ground water use classification or other governmental actions that could affect when ground water can be used for drinking water; and third, consider the views of the Secretary of Agriculture, heads of other appropriate Federal agencies, and States.

Amendments to a registration could include, first limitations on, first, the purposes for, and locations at, which the pesticide might be used, considering factors such as environmentally sensitive areas and conditions, second, the rate at which the pesticide is applied, third, the time or frequency of pesticide use, or fourth, the method of pesticide application, storage, handling, or disposal; second, reporting or other requirements, including label changes or changes in classification; third, requirements for the training or certification of pesticide applicators or other persons using the pesticide; fourth, required site-specific responses; or fifth, any other requirement to ensure that the applicable ground water residue guidance level will not be exceeded. In requiring registration amendments, the Administrator would have to consider the effect of any voluntary actions by registrants or other persons, including actions by a State to prevent the ground water residue guidance level involved from being exceeded and to comply with other environmental laws. The Administrator would be required to review data periodically to determine if the registration amendments are effective, make additional amendments—if necessary—and report to Congress periodically on the effectiveness of the amendments.

If the Administrator determines that first, a pesticide is present in a drinking water well at a concentration that exceeds the final ground water residue guidance level applicable to the pesticide, and second, the presence of the pesticide in the well may be the result of the use of the pesticide in accordance with its label or as a result of recognized practice involving the pesticide, he would be required to notify the State in which the well is located and provide the State with all information relevant to his determinations. The State, in turn, would be required to take action, within 90 days, to prevent potential adverse effects on human health and the environment from the pesticide. If the State does not have the authority to take action, or fails to take action within 90 days, the Administrator would be required to take appropriate action, under the act, to bring down concentration levels.

The Administrator could take other action under the act as necessary to prevent potential adverse effects on human health and the environment from the pesticide at the well. If the Administrator acts, he must publish notice of his action in the Federal Register and take appropriate steps to notify the registrant, potentially affected persons, and interested members of the public. Any person adversely affected by an action taken by a State or the Administrator, or a failure of the Administrator to act, could request an expedited hearing—under the procedures of section 6(c)(2) of the act, dealing with expendited judicial procedures—to determine if, first, the action was taken in accord with this provision of the bill, or second, whether the Administrator was required to take action. The hearing would have to be held, and a determination made, within 75 days after the request for the hearing is received. The Administrator would be required to provide reasonable procedures for petitions to modify or terminate an action taken by a State or the Administrator when the drinking water well involved no longer has the pesticide in a concentration that exceeds the applicable ground water residue guidance level and likely will remain below such level.

The Administrator would be authorized to collect and make available, through a public information file, information concerning the detection of pesticides in any ground water sampling point.

The Administrator would be required to provide technical information to the States in implementing this new ground water provision. The Administrator also would have to provide information, to the extent reasonably available, on alternative methods of pest control and on agricultural or other management practices that could minimize the presence of pesticides in ground water.

On receiving reliable data that a pesticide has been detected above the applicable

ground water residue guidance level in a drinking water well or potential drinking water, the Administrator could initiate a public interim administrative review to determine whether the pesticide may cause unreasonable adverse effects on the environment from such use.

The Administrator would be authorized to work with the Secretaries of Agriculture, Commerce, and the Interior to develop information management systems and other techniques to make available information to prevent ground water contamination by pesticides. A council of experts would be formed to assist in developing the information system; and appropriations of up to $2,500,000 for each of the fiscal year 1987 through 1991 would be authorized for the information system.

The violation of an order of the Administrator issued in response to ground water contamination would be a violation of the act. (Secs. 814(a)–814(c).)

The bill also would amend the Public Health Service Act to provide for the issuance of ground water residue guidance levels. A guidance level would have to be issued for a pesticide, first, when the Administrator registers or reregisters the pesticide if he determines it has the potential to leach into ground water; second, if based on reliable data, the pesticide has been detected at three or more water sampling points, or in a drinking water well or well field that serves over 500 people; or third, a Federal agency or State petitions him to set a guidance level. Procedures would be established for setting guidance levels based on maximum contaminant levels [MCL's] and health advisory levels, for setting interim and final guidance levels, and for judicial review of guidance levels. (Sec. 814(d).)

WORKER HEALTH AND SAFETY

The bill will require the Administrator to promulgate regulations for the protection of employees who mix, load, or apply pesticides and agricultural employees who work in pesticide-treated areas. The Administrator also must promulgate regulations that provide for the training of employees who mix, load, or apply pesticides. (Sec. 815.)

ANTIMICROBIAL STANDARDS

Effective 60 days after the date of enactment, the bill will require the Administrator to establish efficacy standards for antimicrobial control agents—including disinfectants—used to control pest micro-organisms that pose a threat to human health, including standards for disinfectants used in hospitals and other health care facilities. He also would be required to, first, have representative monitoring—including testing—conducted, regarding compliance of antimicrobial control agents with the standards; and second, implement an enforcement program under which agents not in compliance with the standards would be prohibited from sale or distribution as an antimicrobial agent. (Sec. 816.)

NEUROTOXIC AND BEHAVIORAL EFFECTS TESTING

The bill will require the Administrator to, first, develop methods for testing to more accurately detect neurotoxic and behavioral effects of pesticides and pesticide ingredients; and second, as such methods are developed, provide—to the extent appropriate and necessary—that testing data be submitted by persons seeking to obtain or maintain pesticide registrations. (Sec. 817.)

PESTICIDE CONTAINERS

The bill will require the Administrator, within 3 years after the effective date of the bill, to promulgate regulations for the design of pesticide containers that will promote the safe storage and disposal of pesticides and regulations prescribing procedures and standards for the removal of pesticides from containers prior to disposal. The Administrator is to ensure compliance with the regulations not later than 5 years after the effective date. The bill also will require the Administrator to conduct a study of options concerning pesticide containers and to report to Congress the results of the study not later than 2 years after the effective date. (Sec. 818.)

NOTICE FOR STORED PESTICIDES

The bill will require any producer or marketer of pesticides, pesticide registrant, or applicant under the act who has in his possession a pesticide with a canceled or suspended registration to notify the Administrator and appropriate State and local officials of such possession, the quantity of the pesticide involved, and the place it is being stored. Copies of each such notice will be submitted to the EPA regional office that has jurisdiction over the place where the pesticide is stored. Failure of a person to submit a notice to the authorities will be a violation of the act. (Sec. 819.)

AUTHORIZATION FOR APPROPRIATIONS

The bill will authorize appropriations to carry out the act—including most of the new ground water provision to be added to the act by the bill, but excluding, first, State enforcement, training, certification, and licensing, and, second, the ground water information management program—which have separate authorizations—for each of the 1987 through 1991 fiscal years. (Sec. 821.)

LIABILITY

The bill will establish that an agricultural producer will not be liable in any action brought under any Federal environmental statute for the costs of response to a release of a pesticide into the environment or damages incurred with respect to a release—or threatened release—of a pesticide into the environment if the pesticide was applied in accordance with label instructions, unless the producer has acted negligently, recklessly, or with intent to misuse the pesticide. However, such liability would be imposed on any other responsible party, to the extent provided in the environmental statute involved. These provisions would not, first, preempt or, except as described above, transfer or assign liability under any statutory or common law; second, affect authorities under the environmental laws to prohibit the release—or threatened release—of a pesticide into the environment; or third, be construed as creating a new liability or conferring a private right of action on any person for the purposes of the act or any other Federal law. The terms "damages," "response," "release," and "environment" would have the meanings assigned them by the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. (Sec. 825.)

TOLERANCES FOR AGRICULTURAL COMMODITIES

The bill will require that when pesticide registrations are canceled, withdrawn, or suspended, due to dietary risks to humans, the Administrator must withdraw any tolerance for residues of the pesticide, or any exemption from the need for a tolerance. The effective date of withdrawal could be delayed under limited circumstances. The bill provides that, when a pesticide is reviewed under phase 5 of reregistration, any tolerance for residues of the pesticide or any exemption from the need for tolerance must be reassessed and confirmed, established, amended, and or revoked as necessary. The bill also authorizes the Administrator to reasonably limit the application of a withdrawal of a tolerance or exemption to prevent the imposition of restrictions on the imports of a particular agricultural commodity from a particular country. The preceding sentence would apply only if the tolerance or exemption meets the other criteria of the Federal Food, Drug, and Cosmetic Act and there is no effective alternative pesticide available in the other country. (Sec. 826(a).)

The bill provides for a system of uniform tolerances for residues of pesticides. Beginning on January 1, 1987, before the Administrator sets a tolerance, he will have to propose a regulation prescribing that the tolerance be uniform throughout the United States. The regulation would become final only if the Administrator determines, after consideration of comments on the proposal, that the tolerance protects human health, including the health of identifiable population groups with special food consumption patterns. The same procedure would apply to tolerances in effect on December 31, 1986, if the tolerance applies for, first, a pesticide registered after April 25, 1985, or under 40 CFR part 158, or second, a pesticide reregistered under the act after April 24, 1985. The above procedures also would apply equally to action levels—statements of the residue level below which enforcement action will not be taken under the Federal Food, Drug, and Cosmetic Act.

The uniform tolerance—or action level—requirement described above would apply to each State, and no State could set a tolerance or action level that is not identical to the Federal level, except that a State could petition for a more stringent residue level. A petition would have to be based on, first, scientific data that reasonably raises concerns about the effect of the pesticide chemical involvement on human health and second, new data not considered when the uniformity decision was made or data that shows that the uniformity decision is insupportable. The petition would be published in the Federal Register and submitted to the FIFRA scientific advisory panel. Within 180 days after a completed petition is filed, a decision on the petition must be made. A petition could be denied only if the Administrator finds that the uniform residue level protects human health, including the health of identifiable population groups with special food consumption patterns, in the State involved.

The bill also provides that no limit imposed by a State on the level of a residue of a pesticide that may appear on food articles will apply if, at the time the pesticide involved was

applied to the agricultural commodity involved, the sale of food articles with a residue level in excess of the new limit set by the State was lawful under Federal and State tolerance laws. However, the preceding sentence would not apply if the State determines that the new limit is necessary to prevent an unreasonable increase in risk to human health in the State.

The Administrator, in consultation with the Secretary of Agriculture, would have to consider feasible actions to minimize the time during which distribution of existing stocks of food—that contain residues at levels in excess of the newly established State levels—occurs. The Administrator, annually, would have to determine if feasible actions, as decribed above, have been taken. (Secs. 826(b) and 826(c).)

IR–4 PROGRAM

The bill will require the Secretary of Agriculture to provide support for the interregional project No. 4 program—commonly referred to as the IR–4 program.

PESTICIDE RISK RATING

The bill will permit the Administrator to contract with the Board of Agriculture of National Academy of Sciences to conduct a study to determine the feasibility of establishing an environmental risk rating for pesticides used in the production of agricultural commodities and report the findings of the study to the Administrator and to the House and Senate Agriculture Committees within 18 months after entering into the contract. (Sec. 828.)

EVALUATION BY THE COMPTROLLER GENERAL

The bill will require the Comptroller General of the United States to conduct an evaluation of the programs and activities authorized by the bill and make a final report to Congress no later than December 31, 1988. (Sec. 829.)

STUDY OF NONAGRICULTURAL PESTICIDES

The bill will require the Administrator to study and report to Congress within 1 year after the date of the enactment on the pesticide volume, use sites, and target insects for nonagricultural pesticides. (Sec. 830.)

PESTICIDE DRIFT

The bill will require the Administrator, within 2 years after the date of enactment, to report to the House and Senate Agriculture Committees on the incidence and potential adverse effects on the environment of the drift of pesticides from the site of application at the time of application. (Sec. 831.)

SURVEY OF NATURALLY OCCURRING AGENTS THAT ACT AS PESTICIDES

The bill will require the Administrator to conduct a survey to determine what research has been, or is being, conducted to establish the extent to which agents that act as pesticides are manufactured by plants. The Administrator must provide a report on the findings of the survey to the House and Senate Agriculture Committees not later than December 31, 1987, and release the findings to the public. The report must include information on the extent to which the naturally occurring agents have been identified, the nature of the agents, and the extent to which the agents have been shown to be toxic, carcinogenic, or mutagenic.

PESTICIDE RESISTANCE MANAGEMENT PROGRAM

The bill will require the Administrator to establish a Pesticide Resistance Management Program to develop, demonstrate, and disseminate—in cooperation with the Secretary of Agriculture—information on management techniques to control or reduce the development of pesticide resistance. The Administrator also would be authorized to include training in such management techniques as part of the minimum standards for commercial pesticide applicator under the act. (Sec. 833.)

DDT STUDY

The bill will require the Administrator, in cooperation with the Commissioner of the Food and Drug Administration, to conduct a thorough evaluation of the health effects of DDT and other contamination of fish in Santa Monica Bay, CA, and in surrounding waters, and to report the results of the evaluation within 6 months after the bill is enacted. (Sec. 834.)

RIVERSIDE, CA, SALINITY LABORATORY

The bill will authorize appropriations of funds for the planning, construction, and acquisition of buildings and equipment to establish a salinity research laboratory to be located in Riverside, CA. (Sec. 835.)

HOMELESS ELIGIBILITY CLARIFICATION ACT

The bill will make several amendments to the Food Stamp Act of 1977 to facilitate the provision of nutrition benefits under the Food Stamp Program to homeless individuals. The food stamp amendments would sunset on September 30, 1990. The bill will similarly amend the Job Training Partnership Act and the Social Security Act to allow homeless individuals to participate in job training programs and receive supplemental security income benefits, respectively, under such acts. Further, a system will be developed to enable individuals in public institutions to apply for SSI benefits before release from the institution, and a procedure will be developed under which a person who applies for SSI benefits also can apply for participation in the Food Stamp Program by executing a single application. Finally, the bill will amend the veterans laws to ensure that veterans benefits are made available to homeless persons. (Title XI.)

Mr. ROBERTS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Iowa?

There was no objection.

A motion to reconsider was laid on the table.

□1950

LEGISLATIVE PROGRAM

(Mr. FOLEY asked and was given permission to address the House for 1 minute.)

Mr. FOLEY. Mr. Speaker, the conclusion of the FIFRA legislation will mark the end of any recorded votes that we expect in the House tonight.

There may be additional business considered under unanimous consent, but we do not anticipate any other rollcall votes and Members can be advised at this point that this will conclude any likelihood of rollcall votes for the remainder of the evening.

Mr. LAGOMARSINO. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from California.

Mr. LAGOMARSINO. Mr. Speaker, could the gentleman advise us as to what time the House will meet tomorrow. Is it 10 o'clock?

Mr. FOLEY. Yes, we will meet tomorrow at 10 o'clock.

Mr. TORRES. Mr. Speaker, will the gentleman yield?

Mr. FOLEY. I yield to the gentleman from California.

Mr. TORRES. Mr. Speaker, does the gentleman believe the issue of immigration will come up again?

Mr. FOLEY. I know of no further action with respect to immigration tonight.

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the bill, H.R. 4244, which passed the House today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. GRAY of Illinois). The Chair would like to announce, before calling special orders, that the Chair reserves the right, without prejudice, to entertain other business upon the call of the Chair.

ADMIRAL FREEMAN H. CARY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. GAYDOS] is recognized for 60 minutes.

Mr. GAYDOS. Mr. Speaker, I reserved this 1-hour special order for, I think, a very laudable purpose. I have been requested and have had requests directed my way from many of our Members that it was time, at this late stage of the session, that we take a little time to recognize and spread on the RECORD the consensus of opinion, the feelings that prevail in the House regarding Admiral Cary.

Admiral Cary, from roughly July of this year, saw fit to take his retirement. He served this House for 13 years. As I mentioned earlier, there are many Members here who had such a personal contact with him, and it goes beyond saying that every citizen, every person, probably has closer contact than they do in instances of pro-

fessional advice and business acquaintances and personal acquaintances. Outside of their spiritual adviser, he is probably one of the most important people in their lives.

I think that that has been properly said about Admiral Cary, and let me give some statistics to start off this hour that I think would serve us well.

Dr. Cary was born on September 14, 1926. He received his B.S. from Emory University, Atlanta, in 1946 and his M.D. from Emory in 1950. From 1950–54, he completed his internship and residency at Grady Hospital in Atlanta. His medical specialty is cardiology.

He joined the Navy as a lieutenant in the Naval Reserve in 1954 and served until 1956. He activated his commission in 1971 when he joined the office of the attending physician and was promoted to rear admiral when he took over as the attending physician in 1973. He was only the fourth attending physician in history and resigned on June 25, 1986.

From 1953–60, he served as an instructor and later an associate in medicine at Emory University, and, at the same time was director of the stroke rehabilitation clinic at Grady Hospital. From 1960–71 he was director of medical education at Orange Memorial Hospital in Orlando, FL, and from 1968–71 he was clinical professor at the University of South Florida Medical School and clinical professor of allied health sciences at Florida Technical University.

Member of Georgia Heart Association; Central Florida Heart Association—also served as president.

Dr. Cary is a fellow in the American College of Physicians; the American Heart Association's Council of Clinical Cardiology; American College of Chest Physicians; American College of Cardiology. He is certified by the American Board of Internal Medicine and its subspecialty Board in Cardiovascular Disease. He received a Bronze Medallion from the Georgia Heart Association, a Silver Medallion from the Florida Heart Association, and served on the Board of Directors of the American Heart Association from 1980–83.

□ 2000

I thought at the beginning that that background of Dr. Cary should be put into the RECORD. I think it indicates beyond saying that this man was a most qualified man. What I did to this professional man in person, a close friend of many Members, who knew the workings of the House and spent much time on the floor, I think to determine in his professional capacity the stresses that the Members were under, to develop a close acquaintanceship with them so that when and if they sought his advice and his professional services that he would know them as a person. That is very scarce in the outside world. You do not have an opportunity generally in the public to develop that type of repartee with your physician.

Seeing him everyday, letting him know the stresses of the occupation that you have, working with you very closely, all these things I think were factors that culminated in Dr. Cary being able to practice his profession and to give those exquisite services on a timely basis.

I just wanted the record to show that I thought it essential that I contact personally some past Members. I chose particularly Dr. Morgan, a doctor himself, a medical professional who served in the House 32 years, a very close friend of Dr. Cary. I called him yesterday. I mentioned to Doc Morgan that I was about to take out a special order and Dr. Morgan was so emphatic, he said, "I want you, and please listen carefully, I want you to put into the RECORD what I would like to say if I had the opportunity to say it."

He said that of all the attending Capitol physicians that we have had, in his professional conclusion and opinion, he said that Dr. Cary was the best. He worked with him off and on for all those years that he served.

I mentioned before that Dr. Cary, Admiral Cary, had served for roughly 13 years. Doc Morgan again said, "Joe, I want you to spread on the record my intense personal feeling about this man, his professionalism, his ability."

He said that he was one of the doctors most closely associated with all the Members, knew them personally. He was outstanding in his field, his credentials unquestioned, and he said, "I liked him as an individual and I had high respect for him, very high regard." I wanted to spread that on the record.

Then after I concluded that telephone conversation, I called my good friend, John Dent, who served in this body 20 years—not 32, but 20 years. Congressman Dent told me again the same as Doc Morgan had concluded. He said, "Joe, please put on the record, and you listen to me very carefully because I can't be there," and he told me in detail some of the different treatments that he was under and how Dr. Cary in many instances had advised him, treated him, and we all know that Congressman Dent ended up his career and had to leave here because he had an accident and lost the sight of one eye. It had to be removed.

He told me that throughout his 20 years serving here in the Congress that he had nothing but the highest respect and that the doctor's services were of such a nature that he felt that he sustained his 20 years here because of what Dr. Cary did and how he treated him and how he administered medicine and the advice he gave him.

So not being satisfied, then I called my good friend, Mr. Rooney, Fred Rooney, who served in this House 18 years. He is here on the Hill and I asked him, I said, "Fred, I am taking out this special order. Would you like to be heard as far as Admiral Cary? He had been your treating physician for the 13 years you were here."

And he said, "Yes, I most definitely would." He said, "I want you to put in the RECORD exactly what happened to me," and he went on to tell me: I promised that I would reiterate his remarks and put them in the RECORD. He had through his yearly examinations, was told by Dr. Cary that he had a swelling in the area of his throat. As consequences occurred and situations being what they were, he treated him over a period of 2 years.

Mr. Rooney unqualifiedly and unhesitatingly stated that he thought it was Dr. Cary who saved him and saved his life, because eventually his problem diagnosed in the area of his throat was diagnosed as a malignancy. This was in the face of another diagnosis that was offered indicating that it was benign; so he always attributed to Admiral Cary that he had saved his life and he wanted me to make that very specific in the RECORD.

I could go on and with informal remarks on the record here in the House and asking many of our Members what they thought about Dr. Cary, Admiral Cary, and believe me, I think that I state it accurately and I want the RECORD to show that in unison and without one exception, Dr. Cary's reputation was lauded to no end and his professionalism was attested to repeatedly and his personality was just unequaled. All of our Members have said that it was just so great to have a doctor so close to you, working with you and serving with you on the floor of the House and knowing all your problems and being able in that capacity to deliver medicine and all the requirements related thereto because he knows you personally.

Mr. Speaker, I yield to my colleague, the gentlewoman from Ohio [Ms. OAKAR].

Ms. OAKAR. Mr. Speaker, I want to thank my chairman and good friend from Pennsylvania for yielding.

Let me just say that I want to join the gentleman in the rather personal tribute that we are trying to pay to Dr. Cary.

You know, Government service and military service is sometimes the least thankful job. I think that in Dr. Cary's case, at least from my own personal knowledge, he has really been one of the most dedicated people that I have run into since I have been on the Hill, which is 10 years in public service as a Congresswoman.

I think I am a little more sensitive now to the role of a doctor since I have my sister's son, Philip, who is a young resident doctor, and I know all

the kinds of pressures that doctors are under today to be perfect.

The only thing I wanted to say and I want to say this for the RECORD is that I personally do not think that Members should use the wonderful facilities that are here, not only for Members, but for all the people who visit Capitol Hill having those emergency kinds of health problems for our people, our American people. I do not think we really should use these wonderful dedicated health providers for our personal physicians. I think that they are there to give ambulatory care and that is the extent to which I came in contact with Dr. Cary.

I want to say that I think he is one of the finest, most sensible and most sensitive health providers that I have ever met. He is a kind, decent person, who dedicated virtually his whole adult life to public service. We were so fortunate to have him here as a physician serving not only Members of Congress for hopefully ambulatory reasons, but also if there were emergencies that the public had.

I really want to say to Dr. Cary, if by any chance he has an opportunity to hear our remarks or see our presentation or read them in the CONGRESSIONAL RECORD that the majority of Members of Congress really respect and revere you. We really want to say very belatedly, because we did not know you were retiring, most of us did not, a sincere real thank you, and not only thank you to Dr. Cary, but to what you symbolize.

The other night about a week and a half ago my class was celebrating a dinner. It was our 10th anniversary dinner and one of my colleagues, TED WEISS, was at the dinner. He had a little difficulty and he walked out of the dinner and had to have some ambulatory care, emergency care. I must say that the staff who was on call when we were in session for the American people responded immediately. Frankly, they probably saved my colleague's life, because they were right there with the oxygen he needed for his apparent heart ailment and so forth. That is something that really is extraordinarily irreplaceable.

For all the negatives that are sometimes unfolded about those people in the medical profession, there are so many positives. I think in Dr. Cary's case it is somewhat belated, but thanks to my chairman and many other Members of Congress, all of us really want to say thank you to you Dr. Cary. God bless you and good health to you and thanks for all the lovely deeds that you did to so many of us over the years of public service that you gave to not only this body and the people who serve in and around Congress, but to the American people.

Mr. Speaker, I thank the gentleman for yielding.

Mr. GAYDOS. Mr. Speaker, I wish to take this opportunity to thank the able gentlewoman from Ohio for participating in this special order and for her sincere and meaningful remarks.

I yield to my good friend, the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Mr. Speaker, I thank my good friend from Pennsylvania.

Earlier this evening the gentleman trapped me back there in the corner on the majority side. I usually move quickly through that corner, but the gentleman got me and he said, "What do you think of Dr. Cary?"

I said, "I think he is terrific."

He asked me if I would say it publicly, and I am proud to. I want to associate myself with the good gentlewoman from the Western Case Reserve area of the Indian country there in Ohio.

I agree that he was a sensitive, excellent man. I am 64½ years of age. Do I look that? No, I am 53½, and I do not look a day older, because although the gentlewoman is correct, we should not rely on our physician's office here to be our personal physician, I have not had another doctor for 10 years. Even during my unfortunate undeserved break in service, I came in here and checked in with Dr. Cary for 10 years, just because I had no need to go anywhere else, but he was my personal physician.

I just think he was excellent. I am proud to have known him, proud to have had him as my doctor, and proud to have had him as a friend.

I hope that his successor will come onto this House floor and stand in the back here working both sides of the street and talk to us at the back of this House the way Dr. Cary did.

I went on one trip, a trip that I will probably be coming up absentmindedly about in the next 3 weeks, I do not even remember where it was, probably to help some constituents trapped in some dungeon somewhere, but he was on that trip with us. Several Members became ill on that trip. His care was excellent.

I just think that because he did give all of us services throughout his life as a naval officer, that I cannot think of any finer thing to say to that doctor than that I salute you, Admiral, and I thank you for the good care that I received for a decade.

I thank the gentleman for taking this much deserved special order to give some honor to this excellent man of medicine, this excellent man of the U.S. Navy.

Mr. GAYDOS. Mr. Speaker, I thank my colleague from California for his very valued opinion.

Let me just state this, that Doc Morgan had asked me to put into the RECORD his conclusion as a fellow professional, that these are the most trying circumstances under which a physician can operate and practice his profession, because the Members are coming and going, they have so many conflicting responsibilities, they do not practice what they preach many times and they have their own personal physicians and are traveling throughout the world under very trying circumstances.

Doc Morgan concludes that if a man can operate here for 13 years, he is quite a professional.

Mr. Speaker, I yield to the majority whip, the gentleman from Washington [Mr. FOLEY].

Mr. FOLEY. Mr. Speaker, I thank the distinguished gentleman from Pennsylvania for yielding.

I would like to add my words to those that have been expressed on both sides of the aisle, expressions of thanks to Dr. Cary and to his wife, Sarah Cary, for the service that they rendered to this House over so many years.

As the gentleman has said, this is a difficult institution in which to serve, difficult for Members, often more difficult for those who serve the institution in other capacities.

□ 2015

There is no more important, central, or difficult task than to be the attending physician of the Capitol. But Dr. Cary took that responsibility with great care and concern over the years in which he served in that position, and he did it in a way that has earned the deep gratitude of Members and their families.

All that we can say in return is thank you to him, and thank you to Mrs. Cary, his wife. I thank you for those years of service, thank you for those years of care and concern, and all of us who have had the pleasure and honor of serving with him know how much he gave of time and of professional service to this House, and no special order can adequately express that obligation and gratitude that we feel to them for it.

Mr. GAYDOS. Mr. Speaker, I want to thank the majority whip for his most valued opinion, and I think that it exemplifies what he is trying to say by saying that I remember Dr. Cary telling me, "Here I give you a pill, you are supposed to be sedated somewhat and take it easy, and you are running up there and trying to handle a bill or trying to support some argument." So you see that things are antagonistic. So I think that the gentleman makes a good point, and I am very glad that he is here.

Mr. FOLEY. Again I congratulate the gentleman for taking this special order.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from New York.

Mr. STRATTON. Mr. Speaker, I appreciate the gentleman's allowing me to join in his special order. I think that I may have something of a record in terms of the number of visits that I have made to the Naval Hospital in Bethesda, as well as to the attending physician's office here in the Capitol.

Dr. Cary was not only on alert when we were proceeding in a late session, and the gentlewoman from Ohio [Ms. OAKAR] indicated earlier that he was standing back of the railing and talking to Members at that time, and probably making sure that no one was overdoing these late-night sessions.

In addition to that I think that we have to recognize that Dr. Cary was a very eminent cardiologist, and one of the major problems that have arisen for Members of the House has been in heart attacks, cardiology. And in the 28 years that I have been here I think one or two Members have dropped in the well, and at that time we did not have the kind of efficient response that later Dr. Cary instituted for both the House and the Senate.

He also I think has done a remarkable job taking over the pharmacy, which is also a very important part of the medical services that are provided here in the Congress. Oftentimes we are told that we have a kind of free medical service, but in fact the responsibilities of the Members of the House I think are major enough so that their health should be protected, and particularly from types of situations that might aggravate whatever their condition might be.

One other thing I think that is extremely effective and was done under the leadership of Dr. Cary was the voluminous keeping of charts. That may seem to be a pain in the neck, but when a doctor can go through the charts and find out what the patient had or what his condition was a few years ago, it helps a great deal to make a proper diagnosis when he is required very rapidly on the spot.

I also had the opportunity as the chairman of several trips to Egypt and to Israel to have Dr. Cary along as the physician, and he not only took good care of the members of the committee, but he was also an avid jogger and also a very fine photographer, and came back with a number of pictures of the trip.

So he was part of the Congress, and I think that we regarded him as a very faithful servant of the Congress, and a friend, and I certainly salute the gentleman from Pennsylvania for making it possible for us to indicate the service that Dr. Cary has genuinely performed. Nobody can be perfect, and the difficulties as has already been mentioned of trying to diagnose something on the spur of the moment when you have not only Members coming in but former Members and oftentimes perhaps even wives and families, this is a tough responsibility that he had, and he carried it out, and I think that we are proper to salute him for his services here as a medical physician.

Mr. GAYDOS. Mr. Speaker, I want to thank my colleague from New York for his valuable contribution.

Mr. MYERS of Indiana. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. I yield to the gentleman from Indiana.

Mr. MYERS of Indiana. Mr. Speaker, I thank my colleague from Pennsylvania for taking this time, a classmate of mine.

Mr. Speaker, I did not know Dr. Cary professionally very well. I do not frequent the doctor any more often than I have to. I cannot say that I have not appeared in the doctor's office for sniffles or some little thing like this, but he was always a friend. Frequently he would be standing this hour of the night, which is late, in the back of the room or up here, watching over his flock—not an easy job.

As we all know, the constituency here, both in the other body and this body, travels all over the world, coming back with all types of symptoms and diseases, and it was a most difficult job to care on an emergency basis, as he had to, for Members of the House and the Senate. But he did an excellent professional job in my experience here.

The important thing, I think, is that he cared that he was here, and was always here saying, "Is there anything that I can help you with?" Of course, all of us were busy, we are here late tonight, and the doctors' offices in the country are all closed except the emergency rooms, and he had to perform if necessary, as often he did, under extreme conditions.

I do not have a regular doctor. My last regular doctor was a gynecologist—my battalion surgeon. Professionally he was a gynecologist. He said he did not know anything about men, but he only practiced on us men for practice, to get experience. So I do not have a regular doctor, but when I had something wrong, I always went to Dr. Cary or his appointees here, which was not too often, but he was a friend. I think that that is the important thing.

I am certainly pleased that we have taken this time to thank him for the service that he did give to us and to the country in his Navy service and his service to us here. So we wish him well as he pursues his future life, and we thank the gentleman for taking this time.

Mr. GAYDOS. I want to thank my colleague for making those practical observations part of the official record. I think what the gentleman says is right. All of us know that if he had spent 13 years in private practice, his monetary rewards would be substantially more than he earned as an admiral here among all of us people.

Mrs. LONG. Mr. Speaker, will the gentleman yield?

Mr. GAYDOS. I yield to the gentlewoman from Louisiana.

Mrs. LONG. I thank the gentleman for yielding.

Mr. Speaker, I very much appreciate the gentleman's giving us this opportunity to say a few words about this wonderful, wonderful gentleman, Dr. Cary. I did not know that we were having special orders for him today, but I was in my office watching the proceedings, so I put on my running shoes and came right over so that I could take part in this tribute to him.

Dr. Cary has been a good friend of mine, and was a very great friend to my husband, the late Congressman Gillis Long. No one that we have ever had contact with in our lives was better to us than he was.

As most of the Members know, Gillis had had a serious heart attack, and it was followed several years later by open-heart surgery. Dr. Cary was available night or day to help either one of us. He was so conscientious and so kind and considerate to us during all the terrible times that we suffered through Gillis' illness. Many is the time that we called him in the middle of the night. Gillis had a private physician, too, and he was just as good to him, but you do not make those calls in the middle of the night to just every doctor.

□ 2025

Also, we had had the pleasure of traveling with Dr. Cary and with his wife, Sarah. As Gillis used to say about me when I was a congressional wife, that the U.S. Government got two for the price of one. Well, with Sarah and Freeman Cary you got two for the price of one too, because Sarah was right in there pitching, and if you could not get Freeman she would get him for you in a minute's notice.

So to both of them I owe a deep, deep debt of gratitude for wonderful, wonderful care and consideration that they gave to Gillis and that Dr. Cary has given to me. He has been my friend too. I have gone to him on many occasions, just when I needed someone to talk to, and we all know how important that is in our lives.

So I wish both Sarah and Freeman the best there is to come in the years ahead because they deserve every minute of happiness.

Thank you so much for the opportunity to say my few words of appreciation to this fine man.

Mr. GAYDOS. Mr. Speaker, I thank the gentlewoman from Louisiana for her most sincere remarks.

I yield to the gentleman from Texas [Mr. WRIGHT] the majority leader.

Mr. WRIGHT. Mr. Speaker, I thank the gentleman for yielding.

Freeman Cary is a man who has given much of his life, much of his time, effort, and energy in helping people. Few of us appreciate good health until it begins to wane. Only as we suffer the effects of ill health do we know how wondrous a blessing is good health.

Freeman Cary has possessed all the qualities of a family practitioner in the sense that he has taken care of this big legislative family. He has known something and cared something about each one of us, and I think it is highly appropriate that on this occasion we wish him well in his retirement and express our thanks and our deepest appreciation for the time and energy that he has devoted to our physical well-being.

Mr. GAYDOS. I want to thank the majority leader.

I had mentioned earlier Dr. Morgan from Pennsylvania and his remarks, and Congressman Dent, a former Member, and Congressman Rooney, and also I want to mention Congressman Flood. He has reiterated on many occasions that he thought he is living today, well past 80, because of Dr. Cary. When I first came to Congress, Dan Flood at that time was having some very personal physical problems, and I remember saying, gee, our friend over there is not going to be with us in 6 months. And here it is 25 years later and Dan Flood is 85 years of age and is still going strong. So I just want you to know that I think a great portion of that is attributable to the professionalism of Dr. Cary and his dedication.

I yield to the gentleman from Indiana [Mr. BURTON].

Mr. BURTON of Indiana. Mr. Speaker, I thank the gentleman from Pennsylvania for taking this special order.

Let me just say in the 4 years that I have been in this body I have learned to really admire and respect Dr. Cary, not only as my colleagues have because of his prowess as a physician, but also as a great human being. Dr. Cary has helped all of us with medical problems and maladies that we have had over the past many years, but in addition to that he is a very caring individual outside his function as a medical doctor.

I have had the privilege and pleasure of playing golf with Dr. Cary, and incidentally, he is an excellent golfer, and very competitive, and I am sure that he is going to be more competitive now that he has a few more hours to devote to practice.

But in addition to that, if any individual Member of Congress with whom he had a close association had a personal problem, Dr. Cary was always willing to sit down and talk to you about that problem, not just physical problems but personal problems as well. I am one of those individuals that had a personal problem and I talked to Dr. Cary about it one day after we had had a round of gold. And without blinking an eye, without my even asking, Dr. Cary said, what can I do to help, and he did help me. He helped me a great deal.

Dr. Cary, if you are watching tonight, I want you to know that I really appreciate your concern and help, not only as a doctor but as a good friend, and I along with my colleagues here assembled tonight wish you the very best and hope that you will come back and see us again real soon.

Once again I thank the gentleman for yielding.

Mr. GAYDOS. Mr. Speaker, I would just like to add to what the gentleman has said, and want to thank him, that Dr. Cary was like a mother hen. If you did not make your physical, he made sure he reminded you, and reminded you, and reminded you. He got you down there one way or another, though subterfuge or whatever other methodology he had to use.

I yield to the gentleman from California [Mr. ROYBAL], my good friend.

Mr. ROYBAL. Mr. Speaker, I thank the gentleman for yielding. I would like to associate myself with the remarks that have been made with regard to Dr. Cary, a doctor that I knew very well. I knew him professionally and I knew him as a friend.

I knew him professionally because I went to him as often as I possibly could, not because I was ill but because I wanted to stay well. He is a strong advocate of exercise and good eating habits. We talked about exercising, about jogging and walking. I remember that at one time we were discussing the one subject of which is best, is it best to jog or walk. We finally concluded that if you do it correctly both are just as good. But if you jog in excess, it could be harmful.

Walking, of course, in this discussion, was a subject matter that was discussed only to the point of determining how many paces per minute one would walk. We finally concluded, I remember, in that little conversation, that if you walk 122 to 124 paces per minute, and you keep that up for 2 to 5 miles, that you have done your day's work insofar as exercise is concerned.

Now anyone that does that at any time will also have to conclude that you are better off exercise wise walking 124 paces a minute for 2 to 5 miles than you are jogging. That, of course, is my opinion, not the doctor's.

But I am bringing this to your attention because he took the time to talk about these particular things after he had examined you, and he was constantly looking after our health. I remember that during the years that I have been here receiving letters every year that is time now for your annual physical examination, constantly reminding us that it was time.

But I remember also that when I first came here he was not the head doctor, but it was the ability, the professional ability of this individual that placed him and made him the head doctor, the man who took care of the Members of Congress, both the House and the Senate, an individual that I believe deserves the thanks of each and every one of us who has served in the Congress of the United States.

I am grateful for that friendship because there was a time when he did place me in the hospital, and there was a time also when as a patient at that particular hospital he was constantly in touch during those 3 days I was there, constantly in touch with the doctor that was attending me to find out my condition. Fortunately, it was not a big problem.

But nevertheless, it showed the compassion of an individual, of a doctor, a capable doctor who was interested in the welfare of his patients.

Where else can one get that kind of attention? I think only from a man like Dr. Cary, a man well qualified for the job that he had, and a man that cared and cares still for every Member of the House and the Senate.

I am most grateful for having known him and having been associated with him in any manner.

Mr. GAYDOS. I want to thank my colleague, and I am very grateful that he has participated in this special order, because he is going to be with us a long time. Your vitality and effervescence speaks for itself. So your association that you have had with the good admiral has paid off well, and it is good to hear remarks such as those.

Mr. Speaker I yield to the gentleman from Minnesota [Mr. FRENZEL].

(Mr. FRENZEL asked and was given permission to revise and extend his remarks.)

□ 2035

Mr. FRENZEL. Mr. Speaker, I, too, am thankful to the gentleman from Pennsylvania [Mr. GAYDOS] for taking this time so that all of us can remember the splendid service of Adm. Freeman Cary to this institution and to all of us personally, and to thank him for all of the personal courtesies and services that he provided for all of the people who came near the Capitol.

He was here long before I got here, and I am not a recent arrival; so obviously his work has affected and touched thousands of people who have come in to this Congress and who have come through the Capitol and required medical attention.

In addition, although we think of him as the personification of the medical unit in the Capitol, which fortunately I did not have to use very much, he ran a squad of people in the

medical unit of younger doctors, nurses, technicians of various kinds in a way I think that was exemplary and many of us remember services which were provided by the people who he directed and often recruited to serve the people of the United States in that particular unit.

I am grateful for having had the opportunity to work with Dr. Cary. This is a strange institution; we operate on strange hours, as has been noted; I note we are here at 8:30, waiting for something to happen, and that sort of thing did not phase Freeman Cary. He was here when he was needed, and available when needed, and a good sailor at all times as well as a good doctor.

I am privileged to have known him, I thank him for his service. I wish him the happiest sort of retirement. I hope he gets all the holes in one or catches all the fish that any human can do, and I hope the process is enjoyable.

Mr. GAYDOS. I thank my colleague for joining us in the special order, and I would like to observe at this time that the admiral could have been noninterested and nonchalant, and left the facilities we have go as is. However, he was progressive, he made sure he modernized it; he always came up and asked us for budgetary considerations; he really made a top notch medical facility, and for that we are grateful.

I yield to my friend from Texas [Mr. WILSON].

Mr. WILSON. Mr. Speaker, like all the other Members, I want to thank the gentleman from Pennsylvania [Mr. GAYDOS] for his thoughtfulness in arranging this special order.

Mr. Speaker, I, like the gentlewoman from Louisiana, had forgotten about this special order tonight, and just happened to see it on my television, and was so grateful that I had an opportunity to come over here, because I have had an extremely guilty conscience about Dr. Cary, because I believe, I hope I was out of town or had some reasonable excuse, but I may be the only Member of Congress that will admit to being an admirer of the Washington Post.

I love the Post; I cannot wait to pick it up in the morning; and I really miss it when I am out of town; but on this occasion, I really felt that the Post was unfair to Dr. Cary; and I want to say a couple of words in defense that I would, that I have had a guilty conscience that I did not write a letter to the editor, and so I want to say some of the things I would have said in that letter to the editor.

Dr. Cary took an extremely bum rap. He was criticized in articles in which it was absolutely impossible for him to defend himself. He was criticized in one case by someone who took their own life which, by definition indicates a certain amount of depression; and then he was criticized also in the case of a very senior Member that had a fatal heart attack.

Now, nothing could be more unfair than that. Like Gillis Long, I have had a heart problem of some severity, and I remember when Gillis was here and I was having my problems, we talked about our problems together; but Dr. Cary never walked on this floor that he did not walk up to Gillis and take his pulse or ask him how he was doing.

I do not mean that from the standpoint of what a personable fellow he was; I mean that from the standpoint of what a conscientious physician he was.

In my own case, before I had the heart problem, Dr. Cary explained to me that I had probably had my share of whiskey in my 50 years, at the time; I probably had had my share and I ought to let somebody else take care of that. He nagged me about that for about 3 years, and I finally got persuaded that he was right, and that is probably why I am here tonight.

Dr. Cary was a splendid physician in every sense of the word. He harangued his patients when they did not do what they should have been doing to take care of themselves; he ran an absolutely splendid organization, and he himself was not only caring but extremely competent.

We have in this body, as the gentleman from Minnesota [Mr. FRENZEL] mentioned, we have in this body extremely difficult and unusual hours; we have many Members who are advanced in years; we have many Members, as you would with any group of 435 or 535, you have many people with many different kinds of ailments.

I do not know of anybody, Mr. Speaker, that in their lifetime has complained that the care that they got from the attending physician was anything less than excellent.

I remember Senator KENNEDY once, in discussing Medicaid in the context of reducing Medicaid, and he was trying to make the point that the Members of Congress, of the House and the Senate, get such good medical care from Dr. Cary that we tend to take it for granted and think that everybody, perhaps, got as good care as we do.

The newspaper articles were cruel, unfair, and the kind of thing that you cannot possibly defend yourself against, because the accusers are gone.

Nothing could be more unfair than that, and I would just like to say that in my 14 years in this body, this is my second special order. The other one was on the occasion of the death of Wright Patman. I cannot say enough about the competency and the conscientiousness of Dr. Cary that has kept many Members alive longer than they would have been had he not been here, and has kept many of us feeling a whole lot better than we would have, had he not been here.

I, myself, am ashamed that I did not leap to his defense in print sooner, and I am extremely grateful to the gentleman from Pennsylvania [Mr. GAYDOS] for giving me the opportunity to try to make up for that deficiency on my part.

Mr. GAYDOS. Mr. Speaker, I am glad that our colleague appeared here today.

I yield to my good friend from Louisiana [Mrs. BOGGS].

Mrs. BOGGS. Mr. Speaker, I thank the gentleman for yielding to me and I thank him, as others have tonight, for taking this special order for a very special person, Dr. Freeman Cary.

We have heard tonight about his excellent training, his exemplary conduct, his fine professionalism, his very special caring for the Members of the Congress and for the members of their families.

We have heard all of these wonderful things about Freeman Cary, and I am happy to say also about his very competent as well as lovely wife, Sarah.

One of the things that I would like to point out that has not really been said tonight, was the kind of rapport that Dr. Cary had with the congressional spouses; except in personal instances, we have not heard that tonight.

My first memory of Dr. Cary as a physician for the Congress was when a group of congressional wives were very concerned about cholesterol and the amount of cholesterol that was in the menus in the House dining room.

It was an interesting encounter that the wives had with Dr. Cary. As a cardiologist, he had already written a book with suggested menus for people who had heart problems. So he shared this book of menus with us and then we were able to get a hearing before the House restaurant committee, and the chairman of the committee was very much surprised that we wanted to do anything to change the menus, with the wonderful butter and cream and good fats that were in the menus of the House restaurant.

□ 2045

But the wives called themselves "The Committee on Carrots and Sticks" and we were able to have a hearing. It was under Dr. Cary's influence and his fine testimony at that hearing that you now see always at least one menu every day in the House restaurant that is low in cholesterol content. It was this kind of rapport that he had with the wives, with the spouses, because there are, of course, male spouses as well, that gave us such confidence in his care of the Members of Congress.

It was with such gratitude that I was able to know that he was on trips with the Members of Congress, with the leaders of the Congress because it is so important not only to have a physician of the caliber of Dr. Cary on the trip with the Members of Congress and with the leaders of Congress but also it is a very, very fine outreach, an ambassadorship as far as the other countries are concerned. To have a man of Dr. Cary's standing with us on official trips really raised the attitudes of the people of the host countries in American medicine and in American care for their public officials.

I was on the historic trip in 1972 to China when President Nixon had been, and then Senators Mansfield and Scott had been for the Senate. My husband, Hale, was the majority leader of the House, and Gerald Ford was the minority leader of the House.

With Betty and Mr. Ford, we went to China on this historic trip. Dr. Cary had not only his reputation precede him in China but when he arrived, there were many, many medical institutions who asked if we could share his time with them for advice and counsel on setting up their cardiology units.

Dr. Cary went back to China on many occasions and was very helpful to the medical institutions in China. But on that trip it was so important because we were feeling our way to a new kind of relationship with a country that we had been estranged from for so long. He was one of the Ambassadors who was able to make the transition for us.

Mr. Speaker, today is the anniversary of my husband's disappearance in a plane over Alaska. I could not let the day go by without saying how perfectly wonderful Dr. Cary and Sarah were to me, to all the members of our family and to Hale's memory.

He kept our spirits alive and he kept our health intact during the long weeks and months of waiting, hoping, searching.

We all owe him a great, great debt of gratitude for those kinds of family remembrances that we all have. This Nation owes him a great debt of gratitude for the excellent service this great public servant has rendered to us.

I thank the gentleman in the well so much for giving us the privilege of saying so.

Mr. GAYDOS. I want to thank my friend for participating. I want her to know that those of us who served with Hale share your bereavement even at this late hour of times past because we had the privilege of working with him. It is just so nice that you make the connection between that and the subject we are discussing today.

In conclusion let me say I think what is testament to the man's professionalism and his dispensation of medicine in these hallowed halls is best exemplified by the fact that we had so many Members come here and extemporaneously, I want to emphasize that, extemporaneously bared their hearts, talked about their personal problems and spread their conclusions on the RECORD in an unabashed manner, not prepared but extemporaneous. I think that is significant.

Second, let me say I relied upon Doc Morgan's opinion for many things, and he is the one I want to emphasize, he told me to make sure that the RECORD shows that this man comes from a highly accepted profession. You do not become a fellow because you have nice friends. You have to earn it, as the saying goes.

I yield at this time to my friend from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding because, I too, want to join in the special order. Dr. Cary was certainly someone whom I enjoyed working with. He took good care of the Members of this body. I found him an outstanding gentleman who listened often to many of us, and so on, who did not know quite what was wrong and he always seemed to have the answer.

I appreciate the gentleman's taking out this special order so that we all have a chance to say "thank you" to him.

Mr. GAYDOS. I thank my colleague from Pennsylvania.

Let me conclude by saying that, when you have the attestations we have had today from people whom you served in the most difficult profession of all, medicine, when they get up and say what they have said, I think that is proof of what Dr. Morgan said, the professionalism of this individual. I think it is only proper that we met here today in special orders and say what should have been said maybe months ago, but I think it is a most opportune time to say it. You let things gel for a while, let things pass and then we can voice in unison our sincere appreciation for having a man responsible for overseeing our health, our best interests for the 13 years that he served. I think I speak on behalf of all the Members, even those who are not here tonight who may submit written remarks, that we all wish the great doctor, the great admiral a lot of good health, good happiness in his retirement. But I do not think he is going to retire. He is going to be very active because he is just too much of a professional.

I want to thank all of my colleagues for participating in these remarks today and yield back the balance of my time.

Mr. ANNUNZIO. Mr. Speaker, I rise to join with my friend and colleague, Congressman JOSEPH GAYDOS, in paying tribute to Dr. Freeman H. Cary, the attending physician of the U.S. Congress, who is retiring after 14 years of dedicated service.

Dr. Cary has discharged his professional responsibilities with a devotion and commitment which has earned the admiration and respect of all of us in the House of Representatives who have had the privilege to know him as a friend, and to count on his advice, counsel, and judgment.

Before coming to Congress, Dr. Cary was director of the Cardiac and Stroke Rehabilitation Clinics at Emory University and Grady Hospital in Atlanta, and also served as clinical professor at the University of Southern Florida and Florida Tech. He is a world renowned cardiologist, and is an excellent teacher, who has selflessly devoted thousands of hours of service to our Nation.

As the attending physician to the U.S. Congress, Dr. Cary has been a conscientious and caring individual who has provided the very best in health care services for the thousands of elected Members of Congress whom he has served during the last 14 years, and has supervised the emergency treatment of the more than 80,000 patients who are seen by the congressional clinic each year.

Dr. Cary has received the Silver and Bronze Medallions from the Georgia and Florida Heart Associations in recognition of his contributions to the prevention and treatment of heart disease, and in addition to his many professional and community activities, Dr. Cary has remained active in the U.S. Naval Reserve, rising to the rank of rear admiral.

Mr. Speaker, Dr. Cary has been a compassionate and competent physician who has provided exemplary professional service to the Members of Congress. He will be sorely missed by all of us in the House of Representatives who have had the privilege to know him as a friend.

I join with my colleagues in the House of Representatives in congratulating Dr. Cary on his 14 years of outstanding service, and to extend to him my best wishes for success in all of his future endeavors in devotion to the highest principles.

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order.

The SPEAKER pro tempore (Mr. VOLKMER). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONCURRING IN THE SENATE AMENDMENT TO THE HOUSE AMENDMENT TO THE SENATE AMENDMENT TO H.R. 5484 DRUG ENFORCEMENT, EDUCATION, AND CONTROL ACT OF 1986, WITH AN AMENDMENT

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a priv-

ileged report (Rept. No. 99-1010) on the resolution (H. Res. 597) providing for taking from the Speaker's table the bill (H.R. 5484) to strengthen Federal efforts to encourage foreign cooperation in eradicating illicit drug crops and in halting international drug traffic, to improve enforcement of Federal drug laws and enhance interdiction of illicit drug shipments, to provide strong Federal leadership in establishing effective drug abuse prevention and education programs, to expand Federal support for drug abuse treatment and rehabilitation efforts, concurring in the Senate amendment to the House amendment to the Senate amendment with an amendment, and for other purposes, which was referred to the House Calendar and ordered printed.

PERMISSION FOR COMMITTEE ON RULES TO FILE A PRIVILEGED REPORT ON HOUSE CONCURRENT RESOLUTION 395 CORRECTING THE ENROLLMENT OF H.R. 3838, TAX REFORM ACT OF 1985

Mr. BONIOR of Michigan. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file a privileged report on House Concurrent Resolution 395, correcting the enrollment of H.R. 3838, the Tax Reform Act of 1985.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

Mr. LAGOMARSINO. Mr. Speaker, reserving the right to object, can the gentleman advise us if this has been cleared with the minority?

Mr. BONIOR of Michigan. Mr. Speaker, it is my understanding that it has been cleared with the minority. The committee is at present considering the rule on that bill, this very moment, and it has been cleared with the minority.

Mr. LAGOMARSINO. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR TAKING FROM SPEAKER'S TABLE HOUSE CONCURRENT RESOLUTION 395 TAX REFORM ACT OF 1985 WITH SENATE AMENDMENTS AND DISPOSING OF THE SENATE AMENDMENTS

Mr. BONIOR of Michigan, from the Committee on Rules, submitted a privileged report (Rept. No. 99-1011) on the resolution (H. Res. 598) providing for taking the concurrent resolution (H. Con. Res. 395) to correct technical errors in the enrollment of the bill H.R. 3838, from the Speaker's table with the Senate amendments and disposing of the Senate amendments, which was referred to the House Calendar and ordered printed.

ORDER OF BUSINESS

Mr. BURTON of Indiana. Mr. Speaker, I ask unanimous consent to be permitted to take my special order at this time.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Indiana [Mr. BURTON]?

There was no objection.

U.S. AID TO COMMUNISTS IN CENTRAL AMERICA BY WAY OF INDIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana [Mr. BURTON] is recognized for 5 minutes.

Mr. BURTON of Indiana. Mr. Speaker, I thank my colleagues for letting me take my special order out of order.

Mr. Speaker, last week I brought to the attention of the House that we were giving, in aid to India approximately $600 million, and it was reported in Indiana Abroad in September that Rajiv Gandhi, the chief of state in India, had just authorized $10.4 million in aid to Nicaragua, Communist Nicaragua. We give them $600 million, and they turn around and give $10.4 million to Communist Nicaragua for fighting the freedom fighters whom we are going to be supporting. It makes it look as though the United States is indirectly supporting what we consider to be an enemy of the free world.

When Rajiv Gandhi received Mr. Ortega, Daniel Ortega in New Delhi, Daniel Ortega pinned upon him the country's, Nicaragua's highest honor, the Order of Augusto Cesar Sandino.

Mr. Gandhi was very pleased to accept this. He immediately turned around and gave him $10.4 million and bid him farewell as he flew away to Beijing, probably to buy weapons with which to fight the freedom fighters.

Now, I have some real problems with the support we are giving for Mr. Gandhi in view of the fact that he is supporting people like Mr. Ortega. Mr. Gandhi was reported in September, as well, in the Washington Times as one of the biggest recipients of military assistance from the Soviet Union. As a matter of fact, India is the first country outside of the Warsaw Pact countries to be ordered the MI-26 helicopter, just as it was the first to get the Mig-29 fighter bomber, indications of India's importance to the Soviet Union and the Soviet confidence in their long-term relationship.

Last month the two countries celebrated the 15th anniversary of their friendship and cooperation treaty.

Now, India is a close ally of the Soviet Union. We gave them $600 million, and they gave $10.4 million to a Communist Soviet satellite in our hemisphere, Nicaragua. India votes with us in the United Nations 8.9 percent of the time. The Soviet Union votes with us 12.2 percent of the time. So, India votes with us less than the Soviet Union, our major enemy in this world.

In addition to that, Mr. Gandi has two children who are being educated in the Soviet Union. Now, I would say from a layman's point of view that Mr. Gandhi is inextricably tied to the Soviet Union.

So, I was very alarmed when on October 12 I read in the papers throughout this country that our Secretary of Defense, Caspar Weinberger, went to New Delhi and met with Mr. Gandhi. And this was just not a friendly meeting, folks. At this meeting Mr. Weinberger agreed to sell so-called supercomputers to India. Let me read you what it says:

> The sale of the large, multifunciton computer has in the past been approved only for close U.S. allies because of its potential use in military and nuclear weapons programs.

So, we are now selling to India, a very close ally of the Soviet Union, not just high technology but computers that can be used in nuclear weaponry. But that is not all, folks.

In addition to that, Mr. Weinberger agreed to go into a joint venture to produce military aircraft engines, jet engines. So we are now getting into bed with Mr. Gandhi, who is inextricably tied to the Soviet Union so far that we are actually going to be co-producing military equipment.

I might end up by saying that the Soviet Union, in addition to selling the Mig-29 fighter bomber, has been sending other aid to Mr. Gandhi.

Weinberger said the United States and India recognized the necessity that high technology sold by Washington "should not fall into the hands of the Soviet Union."

Now, I would like to ask how a Secretary of Defense, in whom I have the greatest confidence, why, Mr. Secretary, are we giving them this high technology? Why are we going to build military aircraft equipment in India jointly with the Indian Government when they are so inextricably tied to the Soviet Union? I do not understand this. If we are concerned about the Soviet Union getting these computers, if we are concerned about the Soviet Union acquiring high technology that they could use against us at some point in the future, why would we give it to such a close ally of theirs? I think these questions should be answered by

Mr. Weinberger. I hope he will contact those of us in Congress and give us a full explanation. I have the highest respect for Mr. Weinberger, as I said, but I think it is something that should be explained to the Congress so we will understand better.

□ 2100

Most of my colleagues want to support the Defense Department. Most of my colleagues want to support a strong defense for this Nation. But if we are going to give money to the Defense Department that is going to create this high technology, and it is going to in turn be given to an ally of the Soviet Union when we do not want it to fall into Soviet hands, then there has got to be an answer, and I cannot find one in the articles that have been presented to us in the paper.

So, Mr. Weinberger, Mr. Secretary, will you please contact us and let us know. We would really appreciate a response. I do not think we should be aiding Mr. Gandhi at a time he is aiding the Communist Sandinista government and is such a close ally of the Soviet Union.

TRIBUTE TO HON. GENE CHAPPIE, HON. ROBBI FIEDLER AND HON. ED ZSCHAU

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. MOORHEAD] is recognized for 60 minutes.

Mr. MOORHEAD. Mr. Speaker, the California Republican delegation is the largest Republican delegation in the Congress. We have 18 Members strong. We are losing 3 of our key Members at the end of this Congress. Two of them decided to run for the U.S. Senate, and one of them is our Republican candidate for the U.S. Senate from California this year.

The other one, GENE CHAPPIE, has been in public office for 28 years. He was a member of the California State Legislature for many years before he came back here to the U.S. Congress.

Certainly GENE is a friend of everyone who has ever met him. He has been the humorous of our delegation, always light hearted with something to add to make us feel better. Wherever he has gone, he has improved the feeling of the people, regardless of who they were, always kind in his comments, but always getting to the point of the business at hand. He was someone who could look through any kind of pretense. Anyone who was feeling that they were better than others, GENE would have the right words to make them realize that really they might not be that important altogether, but they really were important to him, as everyone was that he met.

I first met GENE when he went to Sacramento as a member of the State legislature back in 1967. He represented a mountain area of California. Each and every week GENE would take off to those hills of the High Sierras, and down as far as San Bernardino County so that he would get an opportunity to meet his constituents and would be of service to them, putting in thousands of miles each year covering that district.

He was an important member of the State legislature, because he was chairman of the Rules Committee and active in agriculture working with many of the problems that affected our great State of California.

He has been here in Washington, DC for 6 years, and GENE has made a mark in the Agriculture Committee of the U.S. Congress. He is a person whom we will all miss. We will miss what he has added to our caucus, and we will miss what he has added to the people of the State of California and to the United States.

GENE was recently given a high honor in an award that he was presented by the folks in the Claremont Colleges in California, which recognizes leadership in our California delegation each year.

BOBBI FIEDLER became a Congresswoman when she beat an entrenched incumbent back in 1980. She did not have a chance to win, according to most people, but she fought a hard battle as she always does, and she was able to come through victorious.

She had previously served as a member of the community college board of education in Los Angeles County, and had been one of the leaders in the State of California in the fight against forced busing. BOBBI FIEDLER fought hard for whatever she believed in.

Here in the Congress she served on the Budget Committee, where anyone who served with her knew her tremendous knowledge of the subjects with which she dealt

I served on one conference committee with BOBBI, and I was amazed at the overall grasp that she had of everything that was being done on that Budget Committee and in the budget of the U.S. Government.

We will truly miss BOBBI as she leaves to go back to California, and she has served the people of her State well in this place.

Our last Member that we are losing is ED ZSCHAU, and he is certainly not the least, because ED ZSCHAU is running very close to the incumbent U.S. Senator in his race for the U.S. Senate, and he well may be coming back to us in the Congress, the 100th Congress, to represent the people of California.

He is a highly intelligent Member of the Congress. He has been a tremendous success in the Silicone Valley where he founded his own company and has made a reputation that is envied by all who are in business in the State of California. I know that people who are in industry of any kind know how hard he has worked to build up the quality of our economic environment in our State and throughout the Nation.

We wish all three of these tremendous Members of the California delegation Godspeed as they go on to new endeavors.

Mr. Speaker, I yield to the gentleman from California [Mr. LAGOMARSINO].

Mr. LAGOMARSINO. Mr. Speaker, it's often said that Congress is a reflection of the national electorate. And I guess it's true that in any group of 435 individuals, even an elected group, you're bound to find every type of personality and character.

Now I don't want anyone to get the wrong idea. I think our three honorees today are as fine a collection of individuals as you'll find anywhere. My good friend and neighbor, Mrs. FIEDLER, has been an asset to this body since the day she joined it nearly 6 years ago. A prominent citizen of that great metropolitan area to the south of my district, BOBBI was already famous the day she got here. Her career as a citizen activist in the field of education equipped her to deal decisively and effectively with this sometimes unruly body, just as a teacher might deal with an overly rambunctious classroom.

After her first term, she was named the outstanding freshman of the 97th Congress, and she has served her party and her Nation well as a member of the House Budget Committee and the Republican Committee on Committees.

I'm going to miss her on the House floor, but I know she will find even more prestigious outlets for her energies in the years to come, and so I won't say good-bye, but only "be see'in you."

ED ZSCHAU likewise arrived on the scene in Washington and flared like a comet, destined for even greater things. He is a man who has been a success at every task he has turned his hand to—in academe, in business, in public life. Soon, the voters willing, he will be the newest citizen of our great State to sit in that other body across the Capitol from us.

What can you say of a man whose name no one could even pronounce 4 years ago, but is now a household word—at least in households of the Golden State? I know a little bit about that problem. Good luck, ED, and I'll see you back here in January.

Finally, what can I say of my long time good friend and compatriot, fellow Italian-American GENE CHAPPIE. He's a man who can literally leave you speechless. When I served with him in the California Legislature, I was con-

stantly amazed at his ability to analyze a situation and sum it up in a few succinct words—some of them even printable. I knew that Congress would never be the same after he got here. And I know that it will never be the same after he leaves. GENO, best of luck!

GENE, ED, BOBBI—what can I say about three of the most unforgettable characters I ever met. Not a lot, except we're all going to miss you. But our loss will be California's gain. So keep up the good work, and don't ever forget your friends and colleagues back here in this Babylon by the Potomac.

□ 2110

Mr. MOORHEAD. Mr. Speaker, I yield to the gentleman from California [Mr. DANNEMEYER].

Mr. DANNEMEYER. I thank the gentleman for yielding to me.

Mr. Speaker, I thank the gentleman for taking this time to give this Member from southern California an opportunity to express my thoughts on three of the Members of our delegation who will be leaving us at the end of the 99th Congress, whenever that day may come.

We have 45 Members of the House from California; 18 Republicans and 27 Democrats. As has been pointed out here this evening, our delegation to the House of Representatives from California represents, I suspect, just about every philosophical point of view in the spectrum. We Republicans also fit within that definition of representing different points of view; persons from different backgrounds. I think that diversity is part of the strength of our delegation here in the Nation's capital.

GENE CHAPPIE is a man who is from the northern part of our State, very close to the Oregon and Nevada border, a man that I served with in Sacramento. He is the gentleman that, when the fight starts, you want him around because he is a man in the very sense of the word; just what that word entails.

GENE saw extensive combat service in World War II. He was a commissioned officer. He never lost the ability to be fair with anybody he encountered. If someone exhibited attitudes of stuffiness, GENE had the ability to bring them down with tact. Sometimes less than tact, but always with humor. GENE was a leader in our delegation in Sacramento; he was a leader here in the House.

He had an empathy for people in the agricultural business. He was in the farming business himself in the Roseville area. He was recognized as a spokesman for the cause of agriculture in California and we are going to miss him here as a Member of the House of Representatives.

BOBBI FIEDLER comes from the field of small business to her service here in the House of Representatives. She completed 6 years in the House. She contributed a great deal to our delegation because she was the only female Member of our delegation from California, at least on the Republican side. She brought an openness and a viewpoint that I think improved the lot of all of us.

BOBBI had the capacity to speak succinctly to issues and she was not afraid to do so. She was aggressive but not in an arrogant way but she let you know where she stood and she was willing to fight for the causes in which she believed.

She did some outstanding work on the Budget Committee here in the House and contributed much to the work that some of us here on the Republican side are seeking to do with respect to controlling runaway spending.

ED ZSCHAU is a big contributing Member to our delegation. He comes from academia, from the business side of the private sector. He was a successful entrepreneur. I think the base for his senatorial bid was developed when he was active in the movement to drive down capital gains tax rates in the late 1970's, which the Congress adopted in 1978.

Because of that contact, I think Mr. ZSCHAU was able to expand persons in the electronic field in the State of California. Our State is known for its deep infrastructure of electronic industry. As a result of that contact, ED developed a base for the senatorial bid in which he is now participating.

ED was not a person to participate extensively in House debate relative to bills or amendments, but he was always a person who was very thoughtful, and I think he is recognized as a member of our delegation who sincerely believed that the way for America to develop an expanding economic base is through driving down marginal tax rates by increasing productivity and providing incentives in the work force so that the entrepreneurial spirit of America is alive and will prosper.

We are going to miss all three of these Members. I will look forward to keeping in contact with them. I know that our delegation will miss their talents in a very material and substantial way.

Mr. MOORHEAD. Mr. Speaker, I yield to the gentleman from California [Mr. DREIER].

Mr. DREIER of California. I thank the gentleman for yielding to me.

Mr. Speaker, I would like to congratulate the fine leader of our delegation for taking out this special order. He in his own inimitable way has provided a spectacular degree of leadership for all of us and he has provided leadership for the three retiring Members whom we are honoring this evening.

First of all, I want to follow up on the comments made about our colleague, BOBBI FIEDLER. BOBBI and I are classmates. We were both elected as Members of that historic 97th Congress. You will remember that that was the Congress which saw 33 Members of the other side of the aisle defeated when our great President, Ronald Reagan, came sweeping in, and, as we all know, took over control of the other body. BOBBI was a very strong and dynamic leader of that 97th Congress. I was pleased to serve with her as a classmate.

As was said earlier, she was well known before she came to the Congress because of her leadership on the crusade to bring an end to forced busing in southern California and she always has been known as a person who fights for what she believes in. She has relentless energy. I will never forget that on an issue that was near and dear to the dean of the delegation and myself, construction of the Los Angeles Metrorail, that our colleague, Ms. FIEDLER, was not only on the other side of that issue, but she led the charge because she believed very strongly that her constituents did not want to see the subway built up the Wilshire corridor and into the San Fernando Valley.

Needless to say, I am pleased that we were successful in that one but no one could in any way doubt the tenacity that BOBBI FIEDLER applied on that issue. She has demonstrated that kind of leadership on a wide range of issues and she certainly will be missed as she leaves this House and returns to Los Angeles.

I also want to say that it is with mixed emotions that I say that our colleague, ED ZSCHAU, who I believe will remain a colleague in the other body is leaving. ED has, as our friend, Mr. DANNEMEYER, said earlier, provided very strong leadership on the issues of bringing about reduction in the area of capital gains tax. He epitomizes that term "entrepreneurial." He is a very successful businessman who has taken that expertise and applied it to politics and in his service here in the Congress.

We certainly wish him well in his attempt to win that very important seat in the largest State in the Union in the U.S. Senate.

□ 2120

I also thought that I would take a few moments to talk about another classmate of mine, GENE CHAPPIE. GENE prides himself on being a person who speaks his mind. GENE has often been labeled irreverent and he refuses to deny that label.

He sent a letter to several of us just recently, and I would like to share

that letter with the House, Mr. Speaker.

This one says: "Dear David, as the monkey said when his tail got caught in the lawnmower, it won't be long now. With the days running out for this short-timer, I wanted to take a minute to thank you for your counsel, friendship and support on those issues of importance to northern California."

He goes on to talk about what a privilege it was to serve with us. He said, "Will Rogers once said there is no trick to being a humorist when you have the whole Government working for you."

With that in mind, he, and I assume a member of his staff, put together a rendition of the tune "My Favorite Things," which we all remember very well from "The Sound of Music."

I would like to yield for a comment specifically on that to my distinguished colleague, the gentleman from California [Mr. DORNAN].

Mr. DORNAN of California. Thanks awfully, DAVID.

These three honored people are in the gallery enjoying every precious moment, every treasured word. They are not here.

Mr. DREIER of California. We are not to refer to the gallery.

Mr. DORNAN of California. Oh, they are watching from their offices, bless their little hearts.

Mr. DREIER of California. But we are not to address them in their offices, based on House rules.

Mr. DORNAN of California. That is right; there is no television here. I keep forgetting.

Mr. DREIER of California. That is right.

Mr. DORNAN of California. Reality keeps impinging upon the truth, as we know it in the House.

I am ready, DAVID.

Mr. DREIER of California. This is called GENE CHAPPIE's ode to Congress, or these are a few of the funniest things.

Mr. DORNAN of California. Do we sing? Again, a violation of House rules.

Mr. DREIER of California. Mr. Speaker——

Mr. DORNAN of California. Yes, we would never even think of singing. Mr. Speaker, forget the mere mention of it.

Mr. DREIER of California. Mr. Speaker, is it a violation of House rules to sing on the House floor?

The SPEAKER pro tempore. If the gentlemen wish to do so, the Chair will not infringe upon the vocal attributes of the gentlemen from California.

Mr. DORNAN of California. You have caved in too easily, Mr. Speaker. I thought you would save us from this temptation. Maybe a Richard-Burton-in-Camelot compromise, sort of talk singing. You have done dinner theater, DAVID, have you not?

Mr. DREIER of California. No.

Mr. DORNAN of California. My distinguished colleague from Pomona.

Mr. DREIER of California. I would like to yield to the gentleman from Fresno.

Mr. PASHAYAN. Thank you very much. I wish I could stay to join the chorus here, but if I might be given a minute of solo——

Mr. DORNAN of California. Your voice is tightening up, I understand. If you sing, you will lose for sure.

Mr. PASHAYAN. I understand that, but I want to point out simply the unusual proportion of the Members that we are unfortunately losing from the great State of California, one from the southern part and two from the northern. By the mathematics of the population that exists in the State and the proportions opportunate thereunto, it ought to be, of course, the reverse.

Mr. DORNAN of California. Oh, no. To the contrary, Mr. Northerner.

Mr. PASHAYAN. I am Mr. Central, thank you.

Mr. DORNAN of California. Right.

Mr. PASHAYAN. These three have——

Mr. DORNAN of California. You moderate.

Mr. PASHAYAN. Absolutely. These three have left their marks, individually, on this great body. As for our colleague, BOBBI FIEDLER, I think her marks have been made principally in the areas of the budget. I know she faces a very bright future.

As for our Congressman, ED ZSCHAU, he obviously is seeking a bright political future, and if that should fail, I am sure other doors will be opened.

As for the last that I choose to mention, and it might well be in violation of the old adage that the last shall be first, in this case, the last shall be last.

Mr. DORNAN of California. You biblical scholar, you.

Mr. PASHAYAN. As for the last to be mentioned, the one and only, Mr. CHAPPIE, the one and only from the most northern reaches of the State, I think we can have little to say of him other than the general ruckus that usually surrounds his presence, wherever he is, will be largely transferred now from Washington back to the west coast.

I know he plans to hide out in the upper reaches of the Sierra Nevada, to engage in activities of roaring around the mountains in his vehicles and——

Mr. DREIER. If the gentleman will yield for one moment, if I could reclaim the dean's time, I would just like to say that he has a couple of other things in mind which incorporate——

Mr. PASHAYAN. Shooting road signs.

Mr. DREIER of California. Thank you. I thank the gentleman.

Mr. PASHAYAN. But in any case, we wish this man of the law well. When he goes back to his native habitat, he will be living on that fine line between formal law and informal law. We wish all three well.

I yield back my time.

Mr. DREIER of California. The time is controlled by the distinguished gentleman from Glendale.

Mr. DORNAN of California. Was the distinguished gentleman from Pomona?

Were you not going to, in sort of a Richard Burton style, talk/sing this great poem?

Mr. DREIER of California. What I would like to ask the dean is if he might demonstrate his leadership by leading us and also, I have for my friend from San Diego a copy of this very interesting rendition of "My Favorite Things," which has been composed by our colleague from California, GENE CHAPPIE.

I would like to ask the dean if he would care to lead us——

Mr. DORNAN of California. Lead off.

Mr. DREIER of California [continuing]. In this because we have been given permission by the Speaker to——

Mr. DORNAN of California. Dean MOORHEAD.

Mr. MOORHEAD. I think our great Member from Orange County here, ROBERT DORNAN, has the most mellow voice and will be able to do the best job in leading us. ROBERT, why don't you go ahead.

Mr. DREIER of California. Having gotten permission to sing it——

Mr. DORNAN of California. I will lead off. We might get into this. I will lead off, asking the people to think of "These are a few of my favorite things." So this is the melody to the tune of "My Favorite Things," a poem, stolen musically, but written, the book, as we say on Broadway, the lyrics, written in the manner of Rodgers and Hammerstein, by GENE CHAPPIE.

Wait a minute, we cannot go together or they will never hear it.

Mr. DREIER of California. No, no, we are singing this together.

Mr. DORNAN of California. I am 20 years older than you; I will go first and you take the second one. DUNCAN, you take the third one.

Tuesdays through Thursdays, and half-hour sessions.
Rollcalls and quorums, and eighty suspensions.
Boll Weevils, Young Turks, right and left wings.
These are a few of the funniest things.
When the bell rings,
When the whip calls,
When I'm on the floor,
I simply remember the funniest things, and wonder why I ask for more.
Lawyers and lobbyists and those who want money.
Balancing the budget, Isn't that funny?
National Brick Week, This and that day.
Can anyone think of a better way?

When the letters come,
When the press calls,
When there are meetings all day.
I simply remember the funniest things, and tomorrow may bring what it may.
Presidents and Secretaries, urge your support.
Flying the red eye, to get back and forth.
Constituents who need help, Bureaucrats who won't.
For those seeking office, my advice is "Don't"
When the money's gone,
When the government closes,
When the CR fails
I'll pack my bags, let the phone ring, and always remember the funniest things.

As GENO fades into the distance in his camper, stealing one old Henny Youngman joke after another, I say, as the Sun sets in the high Sierras, fond adieu, GENO, you Italian-American happy guy, you brought us hours and hours of riotous laughter in the House.

But when the chips were down, when agriculture was jeopardized, GENO was in the front line, fighting for his great Golden State. We truly are going to miss him.

As far as the other two are concerned, let me go down, if the dean will yield to me.

Mr. MOORHEAD. I yield to the gentleman from California [Mr. DORNAN].

□ 2130

Mr. DORNAN of California. Mr. Speaker, I just wrote down a few things that most voters when they go to the polls 2 weeks from next Tuesday, here is what they want in a Congressman or Congresswoman. I think as I read this list that I have just jotted down that the magnificent trio we are talking about, this terrific trio, they fit this description to a tee, to perfection.

Everybody would like to think that their Member was smart. When we think of ED ZSCHAU you think of somebody so smart, he creates hundreds of jobs for people. He is a professor in the arcane ways of business and world economics. That is why he is going to be over in the U.S. Senate, sworn in as the junior Senator from California on the first Monday following the first Sunday in January.

Second thing, they want their Member to be hard working. When you say hard working, then you think of ED ZSCHAU. You think of GENO, as we said. But has any Member worked harder than BOBBI FIEDLER on the budget? She cleared the decks for the last 6 years so that she could concentrate on this one thing that is bedeviling this House and has us here 13 days past our promised date of departure, Mr. Speaker, October 3. We are all wrestling with this budget, and she is going to be sorely missed.

If David Stockman's successor, Mr. Miller, ever coughs over at OMB and decides he has had enough, I know our whole delegation of 18 Republicans, and maybe a few on the other side, would say, "Mr. President, consider BOBBI FIEDLER to balance your books."

The third thing that I think they want to see in Members is dedication to making our beloved United States stronger and more economically prosperous so that families have those jobs out there and the money to educate the young Americans coming up in the generations ahead.

All three of our departing Members again fit that to a tee. Every one of them had demonstrated dedication to duty around here, to their districts, their constitutents, and they are hard working and smart.

Now, the extra ingredient that the voters really could not care less about, whether it was an Abraham Lincoln or John F. Kennedy or our great President now, is a sense of humor. They do not really vote for that. That is something extra that comes with some and does not come with others.

GENO had it in spades.

BOBBI FIEDLER, no matter how tough the hours late at night, working on that budget conference, she was always in a good mood. Never did one of these three ever take themselves so seriously that you would say, "Well, there's another Member full of himself or herself."

As far as ED ZSCHAU is concerned, he went through the primary, and I think that is why he blew away some good friends of ours who we thought might be the winner, he went through that whole campaign singing in the face of terrible reviews.

I have seen ED's daughter just 3 nights ago out campaigning for him. I watched his son precede me in an auction in Anaheim auctioning off all sorts of items to raise money for a good cause, a medical cause. A man sometimes can be judged by his children. I do not know all of ED's children, I think there are three, but those two, his oldest son and his daughter, are just absolutely splendid young Americans and a fine tribute to Mr. and Mrs. ED ZSCHAU.

So I think we are proud of all of these people. GENO will be back. He will win his way to this coast in that camper of his, bringing a lot of wisdom and mirth with him.

BOBBI as has been said before me, will land on her feet. I have never seen her knocked off her feet, so she will turn up somewhere in government helping again to strengthen her country, and as I said, we expect to see ED ZSCHAU I hope occasionally coming over here to visit us as a U.S. Senator.

I have always felt the best of the breed over there are those who started here in the House.

Now, there is one thing I would like to add. I have been through one of these drills before when six outstanding Members and one that we are not too sure about, me, left in 1982.

Mr. HUNTER. Known as the magnificent seven, I might say.

Mr. DORNAN of California. Seven of us left in 1982. Congressman HUNTER was here on the floor, and we were all here. We sat down there blushing like young brides, or at least the way young brides used to blush about 20 years ago. We sat down there blushing and the gentleman over there saying all these wonderful things, we felt sort of a warm trickle running down our backs. It just made us feel squiggly and happy and warm all over.

I am a little hurt that our terrific trio did not show up tonight, but we will make them read these remarks and it will go into their family Bibles and almanacs and memoirs.

I truly in seriousness can say they will be missed and those three charging Republicans, because these are all safe seats, they have left their districts in such phenomenal condition that Mr. Rabbit is not questioning one of those three districts. The gentleman from Fresno, Mr. Rabbit, is saying, "Take them, they are yours."

So they have some big shoes to fill, Mr. Konnyu, Mr. Herger and Mr. Gallegly.

I am just sorry to see our three comrades leaving us. If any of them choose to come back, like Mr. DANNEMEYER threatened the other side that DORNAN will be back, and thank the stars he turned out to be correct. If they want to come back, they are welcome.

If Mr. ZSCHAU wants to resign the Senate after 6 years and come back to the House, we will be happy to have him back, too.

I am just so thrilled to be here with my pals talking about these three great people, these two fine gentlemen and this lady. It is probably the best night I have spent in the House in the 2 years since I have been back.

I say thanks a lot to the gentleman from California.

Mr. MOORHEAD. Mr. Speaker, I thank the gentleman.

You know, the year that BOBBI FIEDLER pulled her big upset, there was another gentleman from California who did not have a chance to win, but when the votes were counted he did win, and that is the next speaker, the gentleman from California [Mr. HUNTER], and I am happy to yield to the gentleman.

Mr. HUNTER. Mr. Speaker, I appreciate the gentleman yielding.

I hesitate to follow the guy that I consider to be the best extemporaneous speaker in the House or the other body, Mr. DORNAN, but I agree with everything that he said about our three friends.

I am reminded that Mr. ZSCHAU, and I would like to start with him, is a guy

who represents to the people of California, and particularly the people who have families, who are trying to climb the ladder and make some economic opportunity, he represents the proposition that we can expand our economy, that we can get more high-technology jobs, more high-technology facilities in California, that we can produce the wherewithal to educate our children, to build homes, to carry out our lives with better opportunity for our children and our grandchildren.

Particularly, Mr. ZSCHAU is the guy who is going to keep the lid on taxes. Although his opponent is slightly ahead in the polls right now, he started with almost nothing and he developed his high-technology business into a very flourishing establishment. He became a leader of the high-technology community. He came back to Washington, DC, worked for deregulation, worked for lower taxes, and produced a boom in California that has brought many other industries into California; so I think if you try to define what Mr. ZSCHAU stands for, that the California people would say one word and that is jobs and maybe opportunity, opportunity to build a better world for our children and for our children's children. He has made quite a mark in this Congress and I have to admit that I have stood on the other side of the debate a number of times when issues have come up with regard to import or export of technology to other countries. I have sometimes worked the national security dimensions of that problem and Mr. ZSCHAU has worked to expand our exports and to help our balance of payments; but we always have seen in his debates on the House floor a keen intellect and a refusal to become personal, to become mean in arguments or debate on the floor. He has always persevered on an intellectual level and I think all Members have appreciated that.

It is a great thing to be able to stand with a colleague, go toe to toe with him on an issue, and later shake hands and work on the next issue, perhaps as allies rather than adversaries. That is one quality that I think of when I think of ED ZSCHAU. He was a person with a vision. He brought that vision to Washington to create more opportunity for Californians to develop high technology, to work for deregulating our Government, particularly in our exports, so that we could beat the rest of the world in this very important area.

I think he is going to become the next Senator from California. I think when he attains that position, he is going to carry that same leadership over to the other body and move this country toward a positon where we have a balance-of-trade surplus with Japan, rather than the other way around, and many other countries also.

Let me say about GENO CHAPPIE, and I agree with all the great characterizations that have indicated that Mr. CHAPPIE is somewhat irreverent and not really in awe of the institutions in Washington when he came here. I think that is good and I think it is healthy.

I notice that GENO had one very important goal in mind when he came to Washington. That was to serve his people and they always came first. He never forgot that there are very few people in Washington who vote in our congressional districts, who live in our congressional districts. I saw GENO go head to head, toe to toe, many times with bureaucrats to do things for the people of his district, particularly his people in agriculture and timber. He fought hard for them even when it won him animosity sometimes from the administration, from the bureaucracy, and put him at odds many times with other Members of Congress, some on this side of the aisle, some on the other side of the aisle.

GENO CHAPPIE was dedicated to the people of his congressional district with a dedication that was unmatched by any other Member of the House.

Now, let me say about BOBBI FIEDLER, there are many people who come to Washington, DC, who participate in the executive branch of our Government or in the legislative branch of the Government, in the bureaucracy that regulates and runs this town, and when you see those people and take a first analysis, you see a great deal of promise. You see courage. You think you see courage and you see reliability and you think you see loyalty. Sometimes you are pleasantly surprised to see that they end up being what you hoped they would be and other times you are a little disappointed. That is human nature. That is a constant process we go through.

When BOBBI FIEDLER came to this city and started working as a Member of Congress, came from that very close race from California and came in as a classmate of mine, I saw somebody with an incredible quality of leadership and courage and loyalty. That loyalty has remained right through her tenure.

I have seen her in position when she had incredible pressures placed upon her and you could always go to BOBBI FIEDLER and talk to her and ask her what her position was, what she would do, and she told you. She was incredibly straight and true. It is only because of that that she was able to become a prominent political leader in a very tough political arena in Los Angeles.

You cannot talk out of both sides of your mouth, especially if you are in a minority position in a difficult political arena like that and survive. You can only do it if you are vey loyal to your friends, very straightforward, very courageous and willing to take chances. BOBBI FIEDLER has always been willing to take chances. I admire her very much for that.

I have to agree with the gentleman from Orange County, Mr. DORNAN, when he said BOBBI FIEDLER will land on her feet. She will because she has vision. She has courage and she has a great quality of leadership.

I think the Members of this delegation will see her exhibit that quality of leadership in the years to come.

So to BOBBI and to GENO and to ED ZSCHAU, whose star is rising in the Senate race, I wish them my best. I know the rest of the delegation wishes them Godspeed.

Mr. MOORHEAD. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I think you can tell why the people of California and the people of our delegation have so much respect and admiration for our colleagues who are now going to be leaving us. Each has established himself or herself in their own way. They have done an outstanding job and made a contribution to the people of the United States.

We are proud of our delegation. We are proud of our Members and we are proud of the accomplishments that they take part in. I appreciate having this hour of time.

Mr. SHUMWAY. Mr. Speaker, I very much appreciate having this opportunity to pay tribute to a friend, colleague, and fellow Californian, ED ZSCHAU, as his days of service in the House wind to a close.

I have always felt a special affinity for ED because we are two of only a few Republicans from northern California, and because I am quite familiar with his district. ED's predecessor was a friend and supporter of mine, who introduced me to ED some years ago. In turn ED ZSCHAU made it possible for me to meet and get to know those he is privileged to represent, and to learn of their concerns.

From the beginning, I have respected and admired ED for the record of achievement he has acquired not only in business, but also in academics. Indeed, few individuals have quite such an impressive record of success in academia and the business world—a track record which has always given ED leadership status in my eyes.

ED's independence also marked him as a leader and a statesman. While some have criticized him for that independent thinking, I believe he has demonstrated qualities imperative to sound leadership by making up his own mind, sticking to his guns, and acting as a well-educated and experienced individual who is confident and at peace with his decision-making ability.

ED will be missed in the House, but I am certain that his outstanding abilities will continue to benefit California and the Nation in the years to come. He has my very best wishes.

Mr. Speaker, not only Californians, but all House Members will be sorry to lose the able

service of BOBBI FIEDLER as she prepares to leave the House. I am pleased to have this opportunity to pay tribute to her, and to wish her well in her future endeavors.

As the only woman in the California Republican delegation, BOBBI brought a needed female perspective and influence to our discussions. Her comments and suggestions were very helpful not only because she is a woman, but also because of her fine experience in business. She shared with all of us a pragmatic viewpoint, something from which the legislative process can always benefit.

I have always admired BOBBI's assertiveness, and respected her tenacious ability to take on even the most controversial of issues. Indeed, she proved herself committed to those causes in which she believed long before coming to Congress, with her outspoken opposition to mandatory busing. Her work in that arena, to my mind, has been exemplary. When she joined us in the House, she brought with her not only a sensible approach, but also a proven record of achievement. That record served her district and State very well.

I would like to express my appreciation to BOBBI for her many contributions to the House, and to extend every best wish to her as she leaves this body. She will be truly missed.

Mr. Speaker, whenever a friend and colleague leaves the House, it is tempting to say that no one will ever fill his or her shoes. In the case of GENE CHAPPIE, it is the truth. GENE is one of a kind, remembered by all of us who were privileged to serve with him and, as I told him earlier this month, quoted by those who dare.

GENE's colorful and outspoken presence enlivened our delegation meetings and endeared him to our respective staffs. He brought to Congress a down-home practicality which often saw through excessive bureaucracy and redtape with sparkling clarity. GENE has been a good and loyal friend to those of us who were privileged to know and serve with him, and I will never forget the invaluable help he offered to me when reapportionment expanded the boundaries of my district into much of what had been his. GENE made that transition smooth and easy, ensuring that I met new constituents throughut the area and offering the benefit of his experience.

California has benefited from GENE's dedicated service at virtually every level of government, and his contributions as a legislator will not be forgotten. More importantly, his very special personality, embodying his love for his homestate, will always be warmly remembered.

I will miss serving with GENE CHAPPIE, and I will always consider him my friend. I know that we all join in extending every best wish to GENE and his wife, Nancy, as they return to the beautiful area they call home.

Mr. BADHAM. Mr. Speaker, I rise today to offer my very best wishes to my friend and colleague, BOBBI FIEDLER, who leaves the House after this term to return to my great State of California.

Above all, I think, this House will miss BOBBI's dynamic, agressive, and tenacious style of legislative leadership. It was this set of attributes that caused her to burst upon the public consciousness as a Los Angeles school board member in the late 1970's, where she made her mark as an untiring opponent of busing to achieve racial balance in the schools.

BOBBI FIEDLER, is indeed the personification of the much hallowed citizen activist who attacks the system head-on when it is wrong, rather than sitting on the sidelines complaining endlessly but failing to act. It was her activism as a citizen and a parent that won her a seat on the school board and ultimately a seat in Congress.

Mr. Speaker, it is this self-same courage and strong personal commitment that carried her into the battle against wasteful Federal spending on Metrorail, despite powerful forces aligned against her. It is this independent spirit that leads her to stand up and vocally argue on behalf of feminist concerns. And while I do not always agree with her on certain issues, I have gained tremendous respect and admiration for her strength of character.

I think it can be safety said that the citizens of California and this Nation have not heard the last of BOBBI FIEDLER, in the political arena. I know that whatever course she now chooses will add new accomplishments and achievements to an already stellar record of public service.

Mr. Speaker, as one Member who has come from a background in private business, it was particularly pleasing for me to welcome ED ZSCHAU to this House, where we often seem oblivious to the fact that there is a real world out there that is impacted by the decisions we make.

I say ED's arrival was a pleasure because he brought with him not only a distinguished background in higher education, including studies and a professorship at my own alma mater, Stanford University, but also an entrepreneur's ingenuity, enthusiasm, and understanding of pragmatic decisionmaking.

Today, ED ZSCHAU is working diligently to win election to a seat in the other body and I know from my firsthand experience with him of the great benefits that body will gain through his presence there.

Mr. Speaker, I have been troubled at times by some of the critics of ED ZSCHAU, who unjustly attempt to capitalize on his independence of throught on complex issues. In fact, one of the things I admire the most about ED is his willingness to take a stand based on his own evaluation of an issue, even if it means bucking the popular tide.

ED ZSCHAU has bought a special dimension to his service in the House not only because of his integrity and scholarly approach to many issues but also because he knows very personally from his real-world exposure that we in government often are the architects of disorder, despite all best intentions. ED knows that the engine that makes this country the most powerful nation on Earth is its industrial and business base, fueled by the energies of hard-working Americans. He has fought during his time here to preserve these fundamental principles and for that, I applaud him.

Mr. Speaker, when GENE CHAPPIE arrived in this House several years ago, it brought back a flood of special memories to me of my own service to the people of California in elected office. I had the great pleasure of serving with GENE in the California State Assembly for more than 10 years until my election to Congress in 1976. More than anything, I have enjoyed and will miss GENE's salty and irreverent sense of humor because if we lose the ability to laugh at ourselves, this Nation is in big trouble.

GENE and I also share an impatience with the seemingly endless speeches and posturing that have become so large a part of our official duties. We share a desire to do the best we can for the people who elected us and for the Nation as a whole.

Mr. Speaker, there can be little doubt that GENE CHAPPIE knows what his constituents want and need from the Federal Government. He has been their elected representative for more than 35 years, first as a county supervisor, then as an assemblyman and finally as a member of the House of Representatives.

By focusing his considerable energies on the problems at hand, rather than becoming distracted by the peripheral trappings of office, GENE has gone to bat for farm and timber interests, for the preservation of the Trinity River and other matters that impinge specifically on the residents and businesses of his northern California district.

Obviously, his constituents know very well that they have a good thing in GENE CHAPPIE because, Mr. Speaker, he never once has lost an election in his 3½ decades of elective office.

Mr. Speaker, I will miss GENE CHAPPIE here in the House not only because of our long and valued friendship but because of the work ethic and devotion he brings to his office.

GENERAL LEAVE

Mr. MOORHEAD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore (Mr. VOLKMER). Is there objection to the request of the gentleman from California?

There was no objection.

□ 2145

TRIBUTE TO THE HONORABLE MARK SILJANDER

The SPEAKER pro tempore (Mr. VOLKMER). Under a previous order of the House, the gentleman from Georgia [Mr. SWINDALL] is recognized for 60 minutes.

GENERAL LEAVE

Mr. SWINDALL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. SWINDALL. Mr. Speaker, as the 99th Congress wanes to its end, I have requested this special order for a very special Member of Congress who was

elected in a special election in 1981. That Member is MARK SILJANDER, from the Fourth District of Michigan, who will not be a part of the 100th Congress, but certainly will be a part of the history of this great body.

MARK was elected to succeed David Stockman in 1981 after David was appointed by the President to become the head of the OMB, and MARK came here obviously with big shoes to fill. MARK has served this Congress in a number of capacities, but probably he will be best known for his offerings in terms of the Committee on Foreign Affairs, where he served very well in the very complicated area of Africa.

I happen to know MARK best, though, because of his activity with respect to tax reform. MARK offered the 10-percent flat-tax bill known as the Siljander bill, and he has worked very hard to see that passed, and of course was very instrumental in the tax reform bill that recently passed this House.

While both MARK and I were disappointed that we did not see a flat tax, certainly it was his efforts that brought much of the flat-tax type of proposals into the tax reform that recently passed the House.

I might also add that MARK will also and always be very special to me, because MARK came to my district very early on in my challenger race, and as most individuals in this body know, it is very difficult to find incumbent Members of Congress who will come in and campaign for an individual who is running against a five-term incumbent. However, MARK came in May 1984 to my district, and not only helped me raise money, but also helped me raise a great deal of support, because MARK has that gift of sincerity and earnestness that he is able to transmit and literally transfer to other individuals.

After MARK left our district, we had a whole new cadre of individuals who wanted to get involved in my campaign primarily because of MARK SILJANDER. I might add that even to this day individuals come to me and mention to me that they want to know what is happening with MARK SILJANDER.

I think that one of the greatest disappointments in my district was when the news of MARK's defeat in his own primary this past summer was passed along to his friends in my district.

I also think of MARK SILJANDER when I think of all the other places that I have traveled with MARK. Just recently MARK and I went out to Orange County, CA, to help there in terms of the conservative movement that MARK has been so closely identified with.

But also I think of MARK in terms of probably his greatest legacy to this body, and that legacy is that all of us can be magnanimous in victory, but what impressed me most about MARK SILJANDER was that he was magnanimous in defeat. I can still remember standing in the back of the Chamber here the day after MARK was defeated in Michigan in his primary and talking with a number of my colleagues, some of whom are here tonight to participate in this special order.

Each of us was talking to the others saying, "When MARK comes back"—and we frankly did not expect him to come back for a week or so—"what are we going to say to MARK?" About that time, MARK came walking into the Chamber—I know that he had been up all night the night before—and he was literally smiling, and it was he who came and ministered to us.

I guess I will never forget that, because to me that really showed what kind of man MARK SILJANDER is and will continue to be. He is the only person whom I know who can literally come full circle in less than 24 hours to the realization that unquestionably God has greater things in mind for MARK SILJANDER. There is no question in my mind that as incredible as the contributions are that MARK has made to this House, he has got even greater contributions to make in the future, not only to this Nation, but probably to the world.

I know that my other colleagues join me in saying that while we are selfishly disappointed that he will not be here next Congress, because he has been such a friend, such an exhorter, such a source of personal consultation to each and every one of us, we know that our loss is, quite frankly, everyone else's gain, because MARK is certainly going to make his mark as soon as he leaves this body.

One last point that I would like to make is that so frequently we look at Members of Congress and we think of those Members only in the context of their legislative prowess. MARK certainly was an incredible legislator, one who gained the respect of individuals on both sides of the aisle, but MARK is also a family man. MARK is the husband of a very beautiful bride named Nancy, and the father of Elizabeth Marquette, and soon he will have either a child that is a daughter or a son. I wish for him either, frankly. I have a daughter myself, and recently had a son, and would have been happy with either.

MARK is a loving father and a loving husband, and that is something that we can all emulate, but more importantly, he has left his mark in this body just by his example in terms of being a family man, not only in terms of the outward appearance, but also in terms of his actual practice.

Mr. BURTON of Indiana. Mr. Speaker, will the gentleman yield?

Mr. SWINDALL. I yield to the gentleman from Indiana.

Mr. BURTON of Indiana. I thank the gentleman for yielding.

Mr. Speaker, I think it is very nice of the gentleman from Georgia to take this special order tonight. I recall when I first came to Congress, one of the first people who extended the hand of friendship to me was MARK SILJANDER, and I think the first week that I was here he said, "DAN, why don't you come up to our weekly Bible study?" For about a couple of years, even though I am a strong Christian, I did not feel compelled to go to the Bible study meetings that we have on Thursday. But finally, after MARK pushed and pushed, he finally prevailed, and after about 2 years I did start going.

I want to say that it has been a real wonderful experience for me. I think that it has been a real blessing for everybody who goes up there. The problems that we face in this body—I know that people across the country probably think that Congress and congressional work is not all that difficult—but the pressures here are extremely severe, especially in the waning hours of Congress, and many times tempers flare and people start feeling that pressure, and they start to crack, and they need something to hold onto.

These meetings that we have had once a week, thanks to MARK SILJANDER's leadership, have been a real help to those of us who attend. I think that when things get tough and the pressure grows, I think most of us feel a little more peace than we would have otherwise. So I really want to thank MARK SILJANDER for leading me to the meetings and to a better understanding of what my faith is all about, and getting to know people like the gentleman in the well better, because had it not been for this experience, I would not feel the close kinship to him and the other Members that we attend with that I do feel.

Mr. SWINDALL. If the gentleman will yield, I am sure that I speak for not only him but every Member of that small group that is bipartisan that meets in a small room here in the Capitol every Thursday, when I say that MARK's presence will probably be most felt in terms of the loss, I should say, next year, when we have our first Bible study again, and we both today encourage MARK, as every Member did, to please continue to come, because that would be a tremendous loss.

Mr. BURTON of Indiana. I think that the gentleman makes a good point. Tom Barrett, our leader, who does such a tremendous job, has said, I think, every week since MARK had his unfortunate loss, "Who's going to take MARK's place? Who's going to make sure that we get everybody up here? Who's going to fill MARK's shoes?" I do not think that anybody really can.

So I think that there is a genuine concern. I think that the gentleman in the well may be the one who is best suited for that task, and I urge him to pick up the mantle of leadership and herd us all up there every Thursday.

Mr. SWINDALL. If the gentleman will yield, I only function well when MARK comes first and tells me to go out and work the floor and get everybody there. So I will need somebody to replace MARK in that capacity.

Mr. BURTON of Indiana. I do not want to impose upon the gentleman's time too long, but I would like to say that I consider MARK SILJANDER a friend, I consider him to be a man of impeccable integrity, and a very strong Christian whose faith is, I believe, unshakable. He has gone through some tremendous pressures and pain, and he has gone through it like a real champ, and I think that without the foundation in Jesus Christ that he has, he would not have been able to do it. And so he is a real example to all of us.

I personally am going to miss MARK SILJANDER, and I hope that he comes back and visits a lot, because his leadership and his fellowship is something that is an inspiration to us all, and MARK, if you are watching tonight, we love you, and we wish you the very best in the future.

□ 2155

Mr. SWINDALL. I thank the gentleman. Mentioning his faith also reminds me that MARK is very well known as being a strong supporter of Israel. The gentleman mentions that he is a Christian, but I think that it is important that MARK has the respect of the Jewish community throughout this country because of his strong support for Israel. And one of the first times that I spoke with MARK about foreign policy we talked at length about Israel and how vital Israel is in terms of our Middle Eastern policy.

I am sure that MARK's advice and leadership in that area is going to be greatly missed as well.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. SWINDALL. I am happy to yield to the gentleman from California.

Mr. HUNTER. I thank my friend for yielding and I appreciated when my friend talked about the vibrance and the vitality of MARK SILJANDER, and the way he came in and energized that campaign in Georgia, because MARK SILJANDER has energized Members of this House in a way that had not happened before his arrival in this Congress. I can remember, I think it was in 1982, and I know my friend from California [Mr. DORNAN] with his great mind for facts will probably place the debate precisely on the calendar, but I remember during the nuclear freeze debate when we started the debate and the Speaker of the House told the House that this debate would probably be over very quickly, there was no reason to drag it out, he thought the votes were there to pass it, and I can remember that the Republican side, the conservative side had just about resigned itself to defeat. We threw a few amendments up and we lost by many, many votes, huge margins, and MARK SILJANDER came on the floor. He offered the first Siljander amendment, and although it failed it only failed by two votes.

But the way he laid that amendment out, and the way he fought for it, motivated a lot of other Members of Congress to come on the floor, and all of a sudden there were Members, conservative Members streaming through the doors. We came out and we started fighting, and 5 weeks later we were still debating the nuclear freeze, and we had amended it something like 30 times, and there were a whole passel full of amendments that were called appropriately sons of SILJANDER because they all emanated from the same basic proposition that MARK had laid out on the House floor.

I remember how surprised some Members were to see this junior Congressman come out here with an idea, and with the will to talk about that idea, not worry about what the world would say, or whether he would look foolish in front of his colleagues, and give it everything he had, gave it 100 percent. Because of his dedication and his absolute feeling that this was right, his genuineness, I guess is the best way to describe it, it motivated us to come out and to help.

Mr. SWINDALL. Often I have cited that as an example of what 1 Member out of 435 can do, and so frequently we think that to make a legislative mark it takes literally weeks and sometimes years of research and staff help and what have you. MARK was able to implement that foreign policy decision purely from his own creativity right here on the floor, and having the courage, as you say, to step forward without weighing the consequences in terms of what if it is defeated, or what if only one other person votes with me. He had the courage, not knowing what the ultimate votes would be, to step forward at a time that literally had he not done so we may well have passed a nuclear freeze bill that very day.

Mr. HUNTER. That is absolutely right. The gentleman is correct in saying that MARK SILJANDER in his first amendment, which is the first substantial amendment that he offered that really had a chance of winning, effectively derailed the nuclear freeze and, of course, we have some friends on this side of the aisle that might not have been pleased about that. But I think it is a fact that the wind was taken out of that particular effort which had been building for months, and which would have had major ramifications for the national security of this country. MARK SILJANDER strode out on this House floor and changed things.

And let me tell you he changed things in my life also. MARK SILJANDER is a moral leader. He is a guy who wants to help. He is never too busy to help with a friend's problem.

He is absolutely honest. In fact, he is not really a very good politician in that sense, because MARK SILJANDER tells you precisely what he is going to do, and he always tells you the truth, even if it does not work to his benefit.

I want to say that his wife, Nancy, is a great person, too. She is so sweet. I can recall when MARK got married, and you know a few funny things happened. I hope MARK forgives me for relaying these things.

Mr. DORNAN of California. December 10, 1983. It was a great day.

Mr. HUNTER. Ultimately it was advertised, and it was made known on national radio that MARK SILJANDER was looking for a wife.

Mr. SWINDALL. I remember that.

Mr. HUNTER. And the press I think in this particular episode took full retribution on MARK SILJANDER. But the upshot was he and Nancy were not deterred, and they are presently the happiest couple, one of the happiest couples I have ever seen in this city.

Mr. DORNAN of California. If the gentleman will yield, they did something so touching. MARK said that his friendship with me meant so much that they had a red-headed baby the first time around. I thought that was really touching. The baby's hair is as red as fire. I was very touched by that.

Mr. HUNTER. It was the Paul Harvey show that talked about the fact that MARK SILJANDER had not been married yet, and he had hundreds and hundreds of letters and cards coming into his office. I think it all started when a newspaperman said that MARK and his preacher were looking for a suitable wife.

Mr. DORNAN of California. And Nancy left the convent a week later and went looking for him.

Mr. DORNAN of California. Mr. Speaker, will the gentleman yield?

Mr. SWINDALL. I am happy to yield to the other gentleman from California.

Mr. DORNAN of California. Mr. Speaker, there are about I guess a couple of dozen very special people on both sides of the aisle, and MARK is a very, very special person as a Member of Congress.

Earlier we were having the order called special for our three departing California colleagues, and I was just sitting here writing down things that I thought most voters wanted in a man or woman who represents them in this

great deliberative body. And I wrote down smart, hard working, dedicated. Those three are just like MARK's middle name.

He speaks several languages. Whenever he would go to a group to meet with them he would always learn how that group would say in their language, "How are you, how do you do. How's it going. Good to see you again."

He is one of the few Members in this House that was studying Hebrew. The gentleman alluded to his great love and respect for the existence of Israel, and that was one of the reasons MARK studied Hebrew.

The gentleman mentioned his deep faith. But it is that hard working description, I have never seen somebody that had so much energy, that would put so much work and commitment into serving his constituency. I traveled through his district with him about 8 days before he lost, and it came as a great shock to me because I could feel this great affection that his district had for him. And, of course, things happened after that that he blamed on no one but himself, a very overly eager radio spot that he in a very manly and forthright way said, hey, I goofed, one goof, and that was it, nobody to blame but me. And that dedication that MARK has on defense, making this a stronger country, but also on things that are such treacherous grounds for Members of this body to venture out into, human rights and far off corners of the globe, I do not care if people were suffering in the Soviet Union, Jewish Pentecostal, Helsinki basket civil rights workers, Romania, the Baltic States, pick your African country, down in Central America, anyplace on this globe, if somebody was in trouble or one of the Members on either side of the aisle was passing around a letter that alluded to any type of human rights or civil rights violations, MARK would jump for that letter and say, let me get on that. Then he would go that extra mile and say, what can I do to help.

I went to MARK's retirement party and spoke for a few brief moments. There were a lot of tears in the eyes of people in that room looking over at MARK, wishing that he were not leaving, and MARK pointed out that he had won 14 elections in a row since he was a very young man and his father had called him into the room and pointed out for umpteenth time what a fantastic country this is, and how somebody in their family maybe should give something back, and to consider public service. And he said, so what is wrong, you win 14 in a row and you lose 1. I believe that losses are character strengthening, he said, and they are. We all know that. We only have to go back to our first great Republican President, Abraham Lincoln. He lost more than he won.

□ 2205

If he had had 14 wins in a row, he would have been the President 10 years sooner and long out of office and probably not cost him his life, with the War Between the States.

Mark is going to be sorely missed around here. People are casting rumors around that there are sore feelings and his replacement is going to take some heat in the Cloakroom. Forget all that. It is just the guy has big shoes to fill. I love MARK SILJANDER and always will: Special, dedicated, hard-working, committed, and good-natured Congressman.

I honestly think, with all due respect to my other colleagues, and they will concede this, MARK had the biggest smile in the House of Representatives.

If I got off the redeye and staggered in here some Monday or Tuesday morning, unable to sleep on the plane because I stupidly started reading something and did not put it down when the sleep first came on me, I would walk in here and see that big smiling face; and he would say "Parachalo!" and I would say, "What is this? "Greek," he says. He would be into some new language and he would have some human rights letter, and off he would go from economics, domestic issues, foreign issues, defense issues, and beloved social issues, to defend the American family and keep it strong.

MARK SILJANDER, wherever you go, God will be guiding your career; and if it is your will to come back here, we will be here just as He was there for you and you and I were there for Him. We will bring him back with bells on.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. SWINDALL. I yield to the gentleman.

Mr. HUNTER. Once again, I am sorry that I am having to follow the guy that I consider to be the best speaker, the best orator in this body.

You mentioned, BOB, that there have been rumors that there is going to be ill feeling, perhaps, because MARK was a popular guy and is leaving, and it was a tough, hard-fought campaign; but you know, there will not be.

Mr. DORNAN of California. Ill-founded rumors.

Mr. HUNTER. The reason there will not be is because MARK SILJANDER would never let that happen, and I know that when the results came in on that election night, the first person that MARK SILJANDER called was his opponent, to wish him well, and the best in his coming term in Congress.

I think that all of us will do precisely the same thing; and we will welcome him, and we will work with him, and MARK would not have it any other way.

Mr. DORNAN of California. There is an irony, if I can add one thought. MARK broke that young person into politics, who turned around to bite him; and although it will be forgotten because of the rough and tumble around here and the goal that we are all focused on, I hope that the young man who replaces him will remember what he learned about dedication and commitment and good spiritedness and gentlemanliness, and that class that MARK showed on the night of his defeat.

I repeat, the young man coming here has big shoes to fill, and if his voting record, which he promises, is an absolute mirror image of Mr. SILJANDER's, he will be in pretty good shape and he will also be in pretty good shape with the White House down there, which thought a lot of MARK.

The President himself sent a beautiful letter to MARK SILJANDER, thanking him for his nearly 6 years of service; a little bit shortened because he replaced David Stockman; but his over 5¾ years the White House was aware always that MARK SILJANDER was here, and on the President's team and a strong right hand to the President's policies.

Mr. SWINDALL. Mr. Speaker, the gentleman mentioned that MARK SILJANDER is probably best known in this body for his compassion for human rights, but we have not talked about where probably MARK's greatest commitment, and greatest dedication when it comes to human rights is: And that is with the unborn.

MARK has for many, many years been at the forefront of the battle to reverse the Roe versus Wade decision; and as each of you gentlemen know, MARK was at the forefront in this body of calling Members together to pray and to fast about the tragedy of abortion.

We talk a lot about MARK's being a spiritual leader, but certainly there is no place more prevalent than in his role with respect to the abortion issue; because he has been very faithful in the area of exhorting the rest of us to continue in that fight.

It is a fight, and I think it is very appropriate that the gentleman from California made the analogy between Abraham Lincoln and MARK SILJANDER, because it was Abraham Lincoln who lost in one battle, in 1858, in a senatorial battle with Stephen Douglas.

The issue there revolved on one very similar to the abortion issue. It was the slavery issue. The difference was, that decision of course had to do with Dred Scott, a very controversial Supreme Court decision that had been made in 1957; and there, because by a 7-to-2 split, the Supreme Court had held that the blacks in this country were not entitled to constitutional protection because they were not persons, but rather property.

We were allowing the tragedy of slavery to continue, and it took the courage of an Abraham Lincoln to challenge that decision even though it was not popular because of the socio-economic conditions of the time. Of course we all know the rest of that story.

Abraham Lincoln went on to become President of the United States, and I certainly do not think it would be stretching to say that MARK SILJANDER has taken equally unpopular positions frequently with respect to the 18 million unborn that have lost their lives since the Roe versus Wade decision, the 4,000 unborn that lose their lives everyday.

I yield to the gentleman from California [Mr. HUNTER].

Mr. HUNTER. The gentleman mentioned the Dred Scott decision. I have often thought of that as the first pro-choice decision, because the Court said in its decision, as I recall, that although they did not agree with the idea of owning slaves, they thought that that was a choice that was up to the individual, and that every landowner should make his own choice, and if he decided to have slaves, then the Government was not going to inhibit his exercise of what they construed to be a right; a right of choice.

You know, the gentleman mentioned that it is unpopular in many, many quarters to be prolife. I think one reason that is the case is because things move in this body because of votes and because of people who go to cast their votes for or against politicians who have pleased or displeased them.

It is very difficult for an individual like MARK SILJANDER to go out and be an advocate for unborn children who have no votes, when there is an enormously powerful bloc of people who would make the other decision and go the other way who do have votes and who do have money and who do campaign against people like MARK.

Mr. DORNAN of California. Mr. Speaker, will the gentleman yield?

Mr. SWINDALL. I yield to the gentleman.

Mr. DORNAN of California. Mr. Speaker, I pictured people who are unable to visit us in this Chamber, but take advantage of watching us through other means; national technical means—NTM—and personally owned national technical means, and I pictured some of them suddenly looking at the set, turning up the volume when you said, that a Member, MARK SILJANDER, would suggest that other Members of Congress pray and fast.

Now, they know that we pray here; we begin every day with a prayer here and in the other body, but the thought of some Member asking other Members to fast I am sure jolts some people.

To show you how good-natured MARK was, he was sitting down here in the front row, shortly after the election, and feeling a little hurt and stunned, but that big smile was still there; and I said, "MARK, I figured out what did you in." I said, "It wasn't that little thing about calling for evil to be broken in your district that was so badly misinterpreted." I said, "Didn't you call for the people in your district to fast and pray?" He said yes. I said, "I think you violated a political rule. It's OK to ask Members to fast, and you can ask the people in your district to pray; the President asks us all the time to pray for peace," I said, "but I think we must never ask voters to fast. If you had said, 'Pray and feast' for my primary victory coming up, that would have turned the corner."

He laughed, he roared with laughter and he said, "Well, I'm relieved. Now I know what to correct the next time. I will tell them to kill the fatted calf and pray like all gangbusters, and I'll never again ask them to fast."

I am going to miss his great sense of humor and his self-effacing ability to humbly realize that we are all frail humans who walk and peep about and think that maybe we are creating bigger waves than we are. In the end, every talent, every little minuscule gift we have come from our Creator; and MARK was one of those that by his very lifestyle reminded us all that we are servants of the Lord and very, very lucky to be in the greatest parliament in the freest country that ever existed.

Mr. SWINDALL. Mr. Speaker, one of the remarkable things about MARK is, I am certain the gentleman was talking about people that are going and turning up their sets, many of them have probably never met, nor even seen MARK SILJANDER.

Perhaps the most incredible thing about MARK is, you just mentioned that he has had 14 consecutive election victories.

Mr. DORNAN of California. Going back to school.

Mr. SWINDALL. He served in this body for 5½ years; yet remarkably, he is only 35.

Mr. DORNAN of California. Right.

Mr. SWINDALL. So certainly if we sound as though we are euologizing a colleague, let me say very quickly for the record, this is certainly not a euology. MARK SILJANDER is a very young man with a very bright future.

Mr. HUNTER. Mr. Speaker, if the gentleman will yield, I agree with the gentleman completely; there is nobody who has a better intellect in this House than MARK SILJANDER, and more enthusiasm and more energy and more wherewithal to move this country or to move other governments; whether they are State or local or even if he should decide to become a part of the administration and work in the bureaucracy, MARK SILJANDER, has more opportunity ahead of him than the great majority of Congressmen who come through this door.

□ 2215

He was elected when, I think, he was 29, when we won that election to this body.

Mr. SWINDALL. He was one of the youngest Members of this body.

Mr. HUNTER. Absolutely, one of the youngest Members of Congress.

He is going to go places. We wish him well and we wish that great companion wife of his, Nancy, well.

Mr. DORNAN of California. And that red-headed baby.

Mr. HUNTER. And all the red-headed babies to come.

Mr. SWINDALL. I want to thank all of my colleagues who participated and say to MARK that certainly there were many, many others who, because of the peculiar schedule here tonight, many individuals have already gone home, but they have assured me that they are going to place their remarks in the RECORD.

I would just like to close by saying, MARK, I think we can all summarize what we have been saying here by the fact that, yes, we do love you, we love Nancy, but most importantly I think the greatest compliment that we can pay to you, MARK, is the fact that in your 5½ years in this body and even in your defeat this summer you have been a man who has watched your talk, and we thank you for that.

Mr. HALL of Ohio. Mr. Speaker, I rise to pay tribute to our friend and colleague from Michigan's Fourth District, MARK D. SILJANDER, who will be leaving the House of Representatives at the conclusion of the 99th Congress.

Few men in or out of public life have demonstrated the deep faith and conviction of MARK SILJANDER. His personal strength and courage are espcially rare in an elected official.

MARK has been led by deeply held personal beliefs that have often been challenging. The result has been an increased diversity of views represented in the Congress.

He has never been afraid to stand up for his views, and he has been unswerving in his efforts to improve our Government and our society.

MARK has been a steadfast defender of Israel and has frequently led the charge to protect the welfare of that nation. As a member of the Foreign Affairs Committee, he has been particularly effective in influencing U.S. policy to insure the safety of Israel.

As a man committed to the highest ideals of service, MARK has represented the people of Michigan with diligence and responsiveness. He has always sought the best for his constituents.

It has been an honor for me to be among MARK's friends, and I look forward to continuing that friendship in the future. Still, he will be missed in these Chambers, and the role he

has carved for himself as a spokesman for his faith is one not likely to be immediately filled.

I wish MARK the best of success in his future endeavors.

NOBEL PEACE PRIZE TO ELIE WIESEL

(Mr. FASCELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. FASCELL. Mr. Speaker, I, along with many of our colleagues, was pleased to learn yesterday that the Nobel Committee in Norway had chosen to award the Peace Prize for 1986 to Elie Wiesel. Mr. Wiesel, a professor at Boston University and author of more than 25 books, is truly a fitting recipient of the Nobel Peace Prize.

A survivor of the Nazi death camps, he had dedicated his life to keeping alive the memory of the victims. He considers himself a storyteller and his duty to bear witness. Through his eloquent words, both written and spoken, he pays homage to the millions who perished. His works are compelling and disturbing. He rivets our attention to the horrors that we would prefer to forget in the conviction that, in order to prevent another holocaust, we must never forget. Through his efforts as chairman of the U.S. Holocaust Memorial Council, he has ensured that all visitors to our Nation's Capital will be aware of the greatest example of man's inhumanity to man. In awarding the Peace Prize, the Nobel Committee said: "Wiesel is a messenger to mankind. His message is one of peace, atonement and human dignity."

Elie Wiesel is concerned not only with the injustices of the past but of the present as well. He was among the first to draw our attention to the plight of the Jewish minority in the Soviet Union, the world's third largest Jewish community. Over 20 years ago, he visited the U.S.S.R. and his then-silent Jewish brethren there. His play, "Zalman or The Madness of God", alerted the West to the conditions of Jews in the Soviet Union and their attempts to sustain their cultural and religious identity. He continues to work tirelessly in behalf of freedom for Soviet Jewry.

Mr. Speaker, the Nobel Committee has chosen wisely. Through the receipt of the 1986 Peace Prize, Elie Wiesel joins the ranks of Andrei Sakharov, Mother Teresa, Lech Walesa and Bishop Desmond Tutu and is rightly recognized as one of this century's greatest champions of human dignity and human rights. I am honored to pay him tribute.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. LAGOMARSINO) to revise and extend their remarks and include extraneous material:)

Mr. MOORHEAD, for 60 minutes, today.

Mr. DREIER of California, for 60 minutes, today.

Mr. SWINDALL, for 60 minutes, today.

Mr. BURTON of Indiana, for 5 minutes, today.

Mr. WALKER, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, today.

Mr. LEACH of Iowa, for 5 minutes, October 17.

(The following Members (at the request of Mr. GAYDOS) to revise and extend their remarks and include extraneous material:)

Mrs. KENNELLY, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. FRENZEL, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,476.

(The following Members (at the request of Mr. LAGOMARSINO) and to include extraneous matter:)

Mr. GILMAN in three instances.
Mr. PASHAYAN.
Mr. MCDADE.
Mr. PORTER.
Mr. FRENZEL in five instances.
Mr. KEMP in two instances.
Ms. FIEDLER.
Mr. FISH in two instances.
Mr. DORNAN of California.
Mr. MADIGAN.
Mr. MCGRATH.
Mr. ROWLAND of Connecticut.
Mr. CRANE in three instances.
Mr. CARNEY.
Mr. BEREUTER.
Mr. LAGOMARSINO in two instances.
Mrs. BENTLEY in two instances.
Mr. CONTE in two instances.
Mr. WEBER.
Mrs. ROUKEMA.
Mr. FIELDS.
Mr. BOEHLERT.

(The following Members (at the request of Mr. GAYDOS) and to include extraneous matter:)

Mr. FASCELL in two instances.
Mr. ROE in two instances.
Mr. FORD of Michigan.
Mr. LANTOS.
Mr. MAZZOLI.
Mr. HAMILTON.
Mrs. SCHROEDER.
Mr. MORRISON of Connecticut.
Mr. COELHO.
Mr. HAYES in two instances.
Mr. WOLPE.
Mr. MARKEY.
Mr. BORSKI in two instances.
Mr. PICKLE.
Mr. SCHEUER.
Mr. FRANK.
Mr. MOAKLEY.
Mr. DYSON.
Mr. ATKINS.
Mr. YATRON.
Ms. OAKAR.
Mr. PEASE.
Mr. HAWKINS.
Mr. TORRES.
Mr. FLORIO in two instances.
Mr. TORRICELLI.
Mr. WHEAT.
Mr. LELAND.

ENROLLED BILLS AND A JOINT RESOLUTION SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 2067. An act to validate conveyances of certain lands in the State of California that form part of the right-of-way granted by the United States to the Central Pacific Railway Co.;

H.R. 3113. An act to implement the Coordinated Operations Agreement, the Suisun March Preservation Agreement, and to amend the Small Reclamation Projects Act of 1956, as amended, and for other purposes;

H.R. 3352. An act to transfer certain real property to the city of Mesquite, NV;

H.R. 4175. An act to authorize appropriations for fiscal year 1987 for certain maritime programs of the Department of Transportation and the Federal Maritime Commission; and

H.J. Res. 753. Joint resolution making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes.

ADJOURNMENT

Mr. SWINDALL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 10 o'clock and 17 minutes p.m.), the House adjourned until tomorrow, Friday, October 17, 1986, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

4337. A letter from the Deputy Assistant Secretary (Logistics and Communications), Department of the Air Force, transmitting notification of the Air Force's decision to study the conversion of several functions from civilian employees to private contractor performance, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

4338. A letter from the Assistant Secretary of the Army (Installations and Logistics), Department of Defense, transmitting a report of the recent discovery and emergency disposal of suspected chemical munitions at Dugway Proving Ground, UT, pursuant to 50 U.S.C. 1518; to the Committee on Armed Services.

4339. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, Department of State, transmitting a report on the extent to which the Government of Haiti is cooperating in: halting illegal emigration, imple-

menting U.S. development, food, and economic assistance programs, and improving human rights and political reforms, pursuant to Public Law 99-83, section 705(c) (99 Stat. 242); to the Committee on Foreign Affairs.

4340. A letter from the Assistant Secretary of State for Legislative and Intergovernmental Affairs, transmitting a report of political contributions by Arnold Lewis Raphael, of New Jersey, Ambassador Extraordinary and Plenipotentiary of the United States-designate, to the Islamic Republic of Pakistan, and members of his family, pursuant to 22 U.S.C. 3944(b)(2); to the Committee on Foreign Affairs.

4341. A letter from the Assistant Secretary for Administration, Department of Transportation, transmitting notification of a proposed new system of Federal records relating to telephone station message detail, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mrs. BOGGS: Commission on the United States House of Representatives bicentenary report of the Commission on the Bicentenary of the U.S. House of Representatives (Rept. 99-1008). Referred to the Committee of the Whole House on the State of the Union.

Mr. FUQUA: Committee on Science and Technology. Report on projects for sustainable development in sub-Saharan Africa (Rept. 99-1009). Referred to the Committee of the Whole House on the State of the Union.

Mr. PEPPER: Committee on Rules. H. Res. 597. Resolution providing for taking from the Speaker's table the bill H.R. 5484 to strengthen Federal efforts to encourage foreign cooperation in eradicating illicit drug crops and in halting international drug traffic, to improve enforcement of Federal drug laws and enhance interdiction of illicit drug shipments, to provide strong Federal leadership in establishing effective drug abuse prevention and education programs, to expand Federal support for drug abuse treatment and rehabilitation efforts, concurring in the Senate amendment to the House amendment to the Senate amendment with an amendment, and for other purposes. (Rept. 99-1010). Referred to the House Calendar.

Mr. DERRICK: Committee on Rules. H. Res. 598. Resolution providing for taking the concurrent resolution H. Con. Res. 395 to correct technical errors in the enrollment of the bill H.R. 3838, from the Speaker's table with the Senate amendments and disposing of the Senate amendments. (Rept. 99-1011). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BROWN of California:

H.R. 5717. A bill to promote economic competitiveness in the United States, and for other purposes; jointly, to the Committees on Science and Technology, Education and Labor, Ways and Means, and Banking, Finance and Urban Affairs.

By Mr. CRANE:

H.R. 5718. A bill to require that the U.S. Government prepare and make public annual consolidated financial statements utilizing the accrual method of accounting, and for other purposes; to the Committee on Government Operations.

By Mr. DORNAN of California:

H.R. 5719. A bill to amend the Export Administration Act of 1979 to allow gifts of not less than $400 to be exported under a general license; to the Committee on Foreign Affairs.

By Mr. LEVIN of Michigan (for himself, Mr. GEPHARDT, Mr. MURTHA, Mrs. KENNELLY, Mr. MACKAY, Mr. SPRATT, Mr. OBERSTAR, Mr. DURBIN, Ms. KAPTUR, Mr. ATKINS, and Mr. SEIBERLING):

H.R. 5720. A bill to improve and establish Federal programs concerning unemployment compensation, job training and retraining, and other matters relating to employment and unemployment; jointly, to the Committees on Ways and Means, and Education and Labor.

By Mr. McDADE:

H.R. 5721. A bill to require the Secretary of the Treasury to establish a national lottery and to provide that not less than 50 percent of the receipts from such lottery be used to reduce the Federal debt; to the Committee on Ways and Means.

By Mr. MARKEY:

H.R. 5722. A bill to amend the copyright law to secure the rights of artists of pictorial, graphic, or sculptural works to prevent the distortion, mutilation, or other alteration of such works, to provide for resale royalties, and for other purposes; to the Committee on the Judiciary.

By Ms. OAKAR (for herself and Mr. SIKORSKI):

H.R. 5723. A bill to provide that a demonstration project be conducted to determine the feasibility and desirability of providing benefits relating to certain social and long-term health services under the Federal employees health benefits program; to the Committee on Post Office and Civil Service.

By Mr. PEASE:

H.R. 5724. A bill relating to the enforcement of the Steel Import Stabilization Act; to the Committee on Ways and Means.

By Mr. PORTER:

H.R. 5725. A bill to provide that the disaster relief personnel of the Small Business Administration shall be treated as performing essential services for purposes of allowing such Administration to operate for temporary periods without budget authority; to the Committee on Small Business.

By Mr. RICHARDSON:

H.R. 5726. A bill to establish the El Malpais National Monument, the Masau Trail, and the Grants National Conservation Area in the State of New Mexico, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. STALLINGS (for himself, Mr. WEAVER, Mr. LOWRY of Washington, and Mr. WYDEN):

H.R. 5727. A bill to enable certain States affected by the siting of repositories for high-level radioactive waste to participate in the site selection, review, and approval process, and for other purposes; jointly, to the Committees on Interior and Insular Affairs, and Energy and Commerce.

By Mr. WORTLEY:

H.R. 5728. A bill to authorize national banks to trade in precious metals; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RODINO:

H. Con. Res. 414. Concurrent resolution to correct the enrollment of the bill S. 1200; considered and agreed to.

By Mr. GARCIA (for himself and Mr. GREEN):

H. Res. 599. Resolution congratulating human rights activist Elie Wiesel on being chosen the 1986 recipient of the Nobel Peace Prize; to the Committee on Post Office and Civil Service.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 77: Mr. TRAFICANT, Mr. YOUNG of Missouri, and Mrs. JOHNSON.

H.R. 214: Mrs. BYRON.

H.R. 1345: Mr. LOWERY of California and Mr. MACK.

H.R. 1632: Mrs. BURTON of California.

H.R. 1633: Mrs. BURTON of California.

H.R. 1634: Mrs. BURTON of California.

H.R. 1668: Mr. SABO and Mr. FISH.

H.R. 3582: Mr. COURTER.

H.R. 3599: Mr. SHUMWAY.

H.R. 4439: Mr. WISE.

H.R. 4523: Mr. BARTON of Texas and Mr. BUSTAMANTE.

H.R. 4831: Mr. CARPER.

H.R. 5021: Mr. VENTO, Mr. CHAPMAN, Mr. ROBINSON, Mr. LIPINSKI, Mr. HUCKABY, Mr. STALLINGS, Mr. ANDREWS, Mr. BUSTAMANTE, Mr. GEKAS, Mr. CRAIG, and Mr. ARMEY.

H.R. 5062: Mr. EMERSON and Mr. DAUB.

H.R. 5196: Mr. ROBERT F. SMITH and Mr. PACKARD.

H.R. 5509: Mr. MILLER of Washington.

H.R. 5510: Mr. MYERS of Indiana, Mr. DURBIN, Mr. SKELTON, Mr. HORTON, Mr. ERDREICH, Mr. OWENS, Mr. WEISS, Mr. BRYANT, Mr. ATKINS, Mr. REID, Mr. LIPINSKI, Mr. MCKERNAN, Mr. MANTON, Mr. PRICE, Mr. PERKINS, Mr. PEPPER, Mr. SMITH of Florida, Mr. LEVIN of Michigan, Mr. RICHARDSON, Mr. LEHMAN of California, Mr. COLEMAN of Texas, Mr. CHAPPIE, Mr. RANGEL, Mr. WHEAT, Mr. FEIGHAN, Mr. MARTINEZ, Mr. COELHO, Mr. CHANDLER, and Mr. COATS.

H.R. 5600: Mr. WHITEHURST, Mr. ROSE, Mr. DAUB, Mr. DE LUGO, Mr. LEHMAN of California, Mr. OWENS, and Mr. BONIOR of Michigan.

H.R. 5608: Mr. FISH and Mrs. JOHNSON.

H.R. 5642: Mr. STANGELAND.

H.R. 5661: Mr. VENTO and Mrs. BOXER.

H.R. 5698: Mr. ATKINS.

H.J. Res. 167: Mr. ORTIZ.

H.J. Res. 638: Mr. COATS, Mr. ANTHONY, Mr. GEJDENSON, Mr. CAMPBELL, Mr. CHANDLER, Mr. CARPER, Mr. DAVIS, Mr. HUBBARD, Mr. WAXMAN, Mr. TALLON, Mr. GEPHARDT, Mr. DERRICK, Mr. APPLEGATE, Mr. LUNDINE, Mr. MCMILLAN, Mr. LENT, Mr. HOPKINS, Mr. FOGLIETTA, Mrs. KENNELLY, Mr. FORD of Tennessee, Mr. GUNDERSON, Mr. OBERSTAR, Mr. RODINO, Mr. SILJANDER, Mr. ZSCHAU, Mr. WIRTH, Mr. PARRIS, Mr. FLORIO, Mr. WALGREN, Mr. HANSEN, Mr. ROBERT F. SMITH, Mr. TORRICELLI, Mr. WOLPE, Mr. DE LUGO, and Mr. ST GERMAIN.

H.J. Res. 703: Mr. COELHO, Mr. DANNEMEYER, Mr. FAZIO, Mr. HORTON, Mr. LEVIN of Michigan, Mr. LIPINSKI, Mr. MINETA, Mr. ROBERTS, and Mr. SUNIA.

H.J. Res. 706: Mr. CARR, Mr. DINGELL, and Mr. ANDERSON.

H. Con. Res. 15: Mr. MCHUGH and Mr. WISE.

H. Con. Res. 54: Mr. MCHUGH.

H. Con. Res. 334: Mr. MARKEY.

H. Con. Res. 351: Mr. WALDON and Mr. MACKAY.

H. Con. Res. 407: Mr. TOWNS, Mr. BURTON of Indiana, Mr. LUKEN, Mr. HAYES, Mr. LENT, and Mr. SMITH of Florida.

H. Con. Res. 408: Mr. SMITH of Florida, Mrs. KENNELLY, Mr. OWENS, Mr. FORD of Michigan, Mr. FAZIO, Mr. CONYERS, Mr. PURSELL, Mr. GUARINI, Mr. COELHO, Mr. TAUKE, Mr. HUGHES, Mr. LEVIN of Michigan, Mr. WOLPE, and Mr. HOYER.

H. Res. 564: Mr. FUQUA, Mr. SMITH of Florida, Mr. FEIGHAN, Mr. HOWARD, and Mr. DE LA GARZA.

SENATE—*Thursday, October 16, 1986*

(Legislative day of Tuesday, October 14, 1986)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray:

Mighty God, Ruler of history, Lord of the nations, I confess we have been so secularized that we do not believe in miracles anymore. But gracious God, I pray for a miracle on Capitol Hill. You know what is frustrating the best intentions and earnest efforts of the leadership to bring the 99th Congress to adjournment sine die. Whatever it is, Lord, do what God alone can do, work a miracle. Dissolve resistance, break deadlocks, generate movement, eliminate roadblocks. Be God in this place. Be glorified in our midst. Help burdened Senators who have so few days left to wrap up their campaigns successfully. Provide the rest so sorely needed by Your weary servants. Hallowed be Thy name. Thy kingdom come, Thy will be done on Earth as it is in heaven. Through Jesus Christ our Lord. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The able and distinguished majority leader, Senator ROBERT DOLE, of Kansas, is now recognized.

Mr. DOLE. Mr. President, I thank the distinguished Presiding Officer, the senior Senator from South Carolina, the President pro tempore, Senator THURMOND.

SCHEDULE

Mr. DOLE. Mr. President, today ought to be a big day. I will say at the outset it seems to me we have many opportunities in line with the prayer this morning to maybe not have a miracle but we might almost complete our action today.

I would hope we could do the immigration conference report first thing, after we do a little short continuing resolution so the Government will not shut down at noon, and we need to do that hopefully between now and 9:30 a.m.

Then I am still going to believe that Senator PACKWOOD will get unanimous consent to do his little concurrent resolution to take care of some of the errors to make corrections in the tax bill. I would urge my colleagues to give Senator PACKWOOD that agreement.

There are 31 States involved in that little agreement. It means a great deal to many of our colleagues on both sides of the aisle. It is not a partisan matter at all.

I would urge my colleagues who wait for these opportunities to gain an extra ounce of flesh that they just back off and let us proceed with our work. There will be other opportunities, I would think, for those who feel constrained to always be there to see if they cannot leverage one more amendment before we adjourn.

So I would hope that Senator PACKWOOD can reach that agreement. It is important. I have had Senators on both sides say what can we do. I said we can talk to our colleagues and tell them not to insist on offering amendments, or whatever, but that I think will be up again.

Reconciliation is still mired down with two or three provisions. I am not certain that will be worked out.

We do have the continuing resolution conference report and the clean water conference report. The debt limit conference report has not yet come over.

But aside from the continuing resolution conference report, I do not think anything is going to take any great deal of time.

So I am prepared as soon as we can, and again I want to thank my colleagues for all their cooperation on the antidrug bill. It seemed yesterday that we were going to be bogged down again on that. Cloture was not invoked. It probably did not make a great deal of difference about the cloture vote. The important thing was that members of our staff, Republicans and Democrats, went off and sat down and worked it out in a matter of 2 hours and passed on a voice vote last night a $1.7 billion Antidrug Program that I believe is a very credible program.

Some people did not get all they wanted. Some would insist on the death penalty. I thought the voluntary tax checkoff was a good idea, but in my view the better idea was to pass the drug bill, and that was also the view of the distinguished Presiding Officer, who is the chairman of the Judiciary Committee, who indicated that next year we will have another opportunity to vote on some of the matters that we were not able to complete last evening.

PUBLIC SUPPORTS REAGAN ON REYKJAVIK MEETING

Mr. DOLE. Mr. President, last week I suggested to the press and broadcast media that, with all the handwringing over a captive American soldier of fortune, they were missing the real story of a Marxist nightmare in Nicaragua. Now, if I may quote the President: "There you go again."

For the past few days, all of us have been subjected to screaming headlines about the "collapse" of the Reykjavik talks because of—and I will quote a typical line from the press—"Because of the President's refusal to give up star wars." That was the headline. But while the headline writers have been busy at their work, some far more important things have been going on.

First, the President gave us an authoritative, comprehensive account of what really happened in Reykjavik. Other administration officials—including the Secretary of State, came up here 2 days ago and provided additional details of the talks. They set straight a record that the media had gotten very, very wrong.

Then the Geneva arms control talks resumed, right on schedule, and with the full participation of the Soviet delegation and, of course, our own delegation, and the Soviet side arrived back in Geneva amid reports that the "official Politburo position" in Moscow was that the door was still open for progress on arms control.

And now, last evening, we begin to get the returns in on what the American people believe about the Iceland presummit meeting. As usual, the public seems to be taking in what happened with a great deal more calm, perspective, and a great deal more common sense than we have seen in the press and—sad to say—from some people up here on Capitol Hill.

Here is what the brandnew ABC-Washington Post poll tells us: Do the American people approve of the President's handling of the Reykjavik talks? Some 64 percent say yes, while only 22 percent say no. Three times as many support the actions the President took as oppose them.

What about Gorbachev's role? The headlines say the President's position on SDI sunk an accord. But the people, thank goodness, know better. Only 16 percent of those polled indicated the President should shoulder the blame. Four times as many—four times as many—put the blame where it belongs: on Gorbachev's doorstep.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

And what about SDI? The media would have you believe that SDI's only supporters live at 1600 Pennsylvania Avenue. But the polls say otherwise. Nearly three out of five of all respondents characterized SDI as "essential" to the United States—essential, meaning, you do not give it away just so you can get Gorbachev's signature on some kind of agreement.

Mr. President, last week, in discussing arms control issues, I asked the Congress to "let the President be the President." Today, I want to add: Thank goodness that the American people are being the American people—wise, tough and, as always, united behind their President.

Finally, Mr. President, I would like to include in the RECORD results from public opinion polls taken by the Wall Street Journal and the New York Times.

When asked by the Wall Street Journal: "Do you think Ronald Reagan should have made concessions on star wars so that a formal agreement could have been reached; or don't you think so?" 31 percent said he should have made concessions, while 60 percent said he should not have.

The New York Times asked who was to blame for the summit failure. Of those polled, 17 percent blamed President Reagan, 44 percent blamed General Secretary Gorbachev.

I ask unanimous consent that the previously mentioned articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Oct. 16, 1986]

PUBLIC BROADLY BACKS REAGAN'S SUMMIT STANCE, POLL SHOWS, SUGGESTING PUBLICITY BLITZ WORKED

(By Albert R. Hunt and Jane Mayer)

WASHINGTON.—President Reagan wins impressive public support for his performance at the Iceland summit, according to a new Wall Street Journal/NBC News poll, suggesting a smashing success for the administration's unprecedented public-relations blitz.

More than 70% of the public approves both the general way the president handled his meeting with Soviet leader Mikhail Gorbachev and his specific refusal to limit the U.S.'s Strategic Defense Initiative. Even when asked specifically if Ronald Reagan should have made "concessions" so that a formal agreement with the Soviets could have been reached, 60% said no.

What's especially remarkable about this support is that initially the summit was viewed as a failure and a disappointment, both by administration officials and the media, since the negotiations broke down at the end. But after early expressions of disappointment, even anger, the Reagan administration decided to declare a victory and has worked relentlessly and effectively the past three days to spread that idea.

Flying back last Sunday night from Iceland, top Reagan advisers decided they shouldn't return "with our tails between our legs, acting like we just lost the World Series," recalled White House chief of staff Donald Regan. "We made a conscious decision on Monday morning at the White House, let's tell everybody how far we got."

Mr. Regan made these remarks in a lunch at the Wall Street Journal's Washington bureau yesterday, one of dozens of sessions with the media this week, most of which he initiated. And Secretary of State George Shultz yesterday went on a whirlwind selling job in New York, meeting with top news executives of the three television networks, the New York Times and this newspaper.

IMPLICATIONS FOR POLICY

The upshot is that the Reagan White House has taken a potential political and policy disaster and turned it into a near-term triumph. This may have substantive policy implications, in that initially it appeared the president would be under heavy pressure at home and from European allies to go back and make concessions to get a deal with the Soviets. It's now clear, however, that won't be the case at least in the short run.

Instead, the public appears to strongly support the president's decision to reject a Soviet offer to make deep reductions in long-range and intermediate-range nuclear weapons in return for severe constraints on the development of the futuristic SDI.

Whether this public support actually translates into Republican gains in the congressional elections in less than three weeks is less certain. Democrats insist it won't. Yesterday, House Speaker Thomas O'Neill (D., Mass.) said it would only have a "relatively small" effect, and Rep. Tony Coelho (D., Calif.), who runs the Democrats' House campaign committee, said he has gotten only seven inquiries from candidates about how to handle the summit issue.

But top GOP political strategists, who only three days ago saw political peril, now see possible gains. Yesterday, campaigning for Maryland Senate candidate Linda Chavez, the president charged it would be a "terrible tragedy" if congressional Democratic critics cut funds for the Strategic Defense Initiative, popularly known as Star Wars, and "hand over to the Soviet Union free of charge what we refused to hand over across the negotiating table in Reykjavik."

Privately, top Republican politicians are considering trying to make the summit and support for Star Wars an important national theme in the closing days of this campaign. Yesterday, in another White House-arranged session with reporters, Richard Wirthlin, the president's pollster, suggested Mr. Reagan will "talk about the summit as he continues to campaign" and that, this will help Republican candidates.

To be sure, the poll was taken only a day after the president's nationally televised address Monday night, and thus some drop-off in support seems inevitable. But the Reagan support starts from a high base.

RELATIONS WITH SOVIETS

By better than 4-to-1 margins, the Wall Street Journal/NBC News poll shows the public approves of the president's actions at the summit. Support for the way he handles relations with the Soviets showed a modest but significant rise from pre-summit levels; 60% of the public believes that as a result of the summit, relations with the Soviets will stay the same, 26% think relations actually will get better and only 9% think they'll get worse.

The president's Star Wars initiative also fares well in this survey. Fully 60% say they favor the development of Star Wars, with only 26% in opposition. Further, 53% of the public think it's important to elect members of Congress who'll back the president on Star Wars.

It appears, however, that the public isn't as optimistic as the president about the political benefits of his antimissile defense research program. Mr. Reagan contends Star Wars can make nuclear weapons obsolete, but according to the Wall Street Journal/NBC News poll the public, by a 58% to 23% margin, rejects that contention.

'EXTRAORDINARY GAINS'

The reversal in White House psychology was dramatically evident in Donald Regan. On Sunday, after the summit ended, the White House chief of staff angrily assailed the Soviets, charging the outcome "shows them up for what they are." But at lunch yesterday he confidently spoke of the "extraordinary gains" made in last weekend's negotiations and suggested "this period is really a pause or an interlude in the negotiations."

Separately, White House communications chief Patrick Buchanan crowed that the extraordinary public-relations effort "is working. It doesn't have to be all that complex. The average guy doesn't know about INF (intermediate-range nuclear forces). All he knows is that the Russians wanted us to give up SDI, and Dutch Reagan said blankety-blank, no way. That's the level it's on for the average guy.

"By the end of the week, it's going to be the Triumph of Reykjavik," Mr. Buchanan predicted.

Certainly, the administration is sparing no effort toward that goal. Even the stolid, secretive National Security Adviser John Poindexter has been trotted out from one media event to another. Coming home from Iceland on Air Force One Sunday night, he briefed reporters for more than an hour; on Tuesday he held sessions with two more groups; and yesterday he appeared on NBC's "Today" TV show and gave an interview to a group of British, French, German, Turkish and Norwegian TV stations.

"Hey you know," Donald Regan cracked, noting Adm. Poindexter's new high profile, "a star is born."

FIRST REACTION: POLL SHOWS ARMS-CONTROL OPTIMISM AND SUPPORT FOR REAGAN

SUMMIT AFTERMATH: WHAT THE PUBLIC THINKS

(By Adam Clymer)

The American public's initial reaction to the Reykjavik summit meeting is quite supportive of President Reagan and very optimistic about the future of arms control, a New York Times/CBS News Poll shows.

But there was no indication in the survey that this support had translated into advantages for Republicans in the November elections. Voting preferences among the 767 Americans interviewed by telephone Tuesday and on Wednesday morning were unchanged from the views of those same respondents two weeks earlier.

Public reactions may deepen or swerve as the issue is debated, but the survey suggested that Mr. Reagan had, at the least, put his stamp on the first impressions in the mind of an American public that rarely focuses intently on foreign-policy issues.

The poll was conducted as Administration officials, after President Reagan's nationally broadcast speech Monday night, have been offering their view of events through dozens of newspaper and television inter-

views in what they describe as one of their most intense public-relations campaigns.

REAGAN POPULARITY REPORTED UP

Yesterday, continuing that effort, Secretary of State George P. Shultz visited the New York Times, and Richard B. Wirthlin, Mr. Reagan's poll taker, said overall approval of Mr. Reagan's handling of his job had jumped from 64 percent among 1,000 people interviewed Oct. 9 and 10 to 73 percent among 500 interviewed on Oct. 14.

In the Times-CBS News Poll, 44 percent said the blame for the failure of the meeting to produce an arms-control agreement rested on Mikhail S. Gorbachev, the Soviet leader, and only 17 percent blamed both, 4 percent neither and the rest had no opinion. The poll had a margin of sampling error of plus or minus four percentage points.

Moreover, only 20 percent said the President "should have given up the Strategic Defense Initiative—'Star Wars'—in order to get Gorbachev to agree to a big reduction in Soviet and U.S. nuclear weapons," while 68 percent sided with Mr. Reagan and said he should not.

OPTIMISM ON ARMS ACCORD

The most striking single comparison with past surveys emerged from the answers to the question: "Even though no agreement was reached at the Iceland summit, do you think that meeting will eventually lead to real arms-control agreements, or not?

Fifty-seven percent said such agreements would result, and 31 percent said they would not.

Past Times/CBS News Polls, including those taken around the summit meeting last November in Geneva, had never found more than two Americans in five optimistic. In January 1986, 41 percent said the Geneva meeting would lead to agreements, and 47 percent said it would not.

Another important comparison showed 72 percent approving of Mr. Reagan's handling of relations with the Soviet Union, up from 61 percent in a Sept. 28-Oct. 1 Times/CBS News Poll. Approval by women increased very sharply, from 58 percent in the earlier poll to 69 percent in this one.

Although the public blamed Mr. Gorbachev much more than Mr. Reagan for the outcome in Reykjavik, its confidence in the Soviet leader's desire for arms control was unchanged. In the poll two weeks ago, 33 percent said they thought he "wants an arms-control agreement enough to make real concessions to the United States in order to get it." This time, 34 percent said that.

But the poll clearly indicated that the public support and optimism were making no difference yet in the November election races. Asked if they preferred or leaned toward the Democrat or Republican House candidate in their district, prospective voters in the sample divided, 48 to 46 percent, for the Democrats. Two weeks ago, this same group preferred Democrats, 47 to 46 percent; the difference is not statistically significant.

And although 12 percent of the probable electorate said yes when asked if the events in Iceland would "make a difference in how you vote this fall for Congress," among that group only 3 percent, or 15 individuals, reported a different voting intention than they offered two weeks earlier. Five were switching from Republican to Democrat, and five from Democrat to Republican; two went from Republican to "don't know" and two from Democrat to "don't know" or other, and one went from "don't know" to Republican.

The respondents were also asked which party they would like to see control the Senate. The prospective voters divided, 47 to 42 percent, for the Democrats. The entire probable electorate in the Sept. 28-Oct. 1 poll preferred the Democrats by only 43 to 42 percent, and the particular respondents who were reached in the poll this week had wanted a Democratic Senate by a margin of 45 to 41 percent. For these respondents there was thus no statistically significant change.

FOREIGN AFFAIRS OF LITTLE INTEREST

Two key reasons for what was apparently the lack of political impact was measured in questions asked in the earlier poll. When asked if the main reason for a vote for a House candidate was a national issue, a state or local issue, the candidate's character or experience, only 5 percent of the probable electorate gave answers related to foreign affairs or the military. Even when asked what was the most important problem facing the nation, only 30 percent gave such answers.

Still, this issue, and the intense publicity it is getting, has a political potential because of the breadth of support for Mr. Reagan.

In almost all population groups, more than twice as many blamed Mr. Gorbachev as blamed the President for the lack of an agreement in Reykjavik. Blacks, however, were about evenly divided. But 39 percent of Democrats, for example, blamed the Soviet leader, and only 22 percent of them blamed Mr. Reagan.

The poll also demonstrated continued, and perhaps stronger, confidence in the Strategic Defense Initiative, or "Star Wars" plan. Sixty percent said they believed it was likely to work, while 21 percent said it would not. When a similar question was asked before the Geneva summit meeting, 58 percent said the system was likely to work but 27 percent said it would not.

The belief that the Iceland meeting would eventually lead to real arms agreements also did not vary greatly among different groups. Republicans (62 percent of whom believed) and college graduates (65 percent of whom did) were most optimistic. Blacks and those with less than a high school education or family incomes under $12,500 a year and those who live in small towns were least optimistic, although in all those groups more respondents expected an eventual agreement than did not.

A majority said they felt Mr. Reagan wanted arms control enough to make concessions to the Soviet Union to achieve it. Fifty-three percent felt that way, and 37 percent disagreed.

Along with the question that found that 34 percent believed Mr. Gorbachev wanted an agreement enough to make concessions, the survey found that 51 percent of the public said that both leaders were equally interested in negotiating an arms pact. Thirty-five percent said Mr. Reagan was more interested, and 9 percent said Mr. Gorbachev was. All three groups were about equally optimistic about an eventual agreement.

HOW THE POLL WAS CONDUCTED

The latest New York Times/CBS News Poll is based on telephone interviews conducted Oct. 14 and 15 with 767 adults around the United States, excluding Alaska and Hawaii.

The people who were called were randomly selected from two-thirds of the 1,525 people interviewed in a poll conducted from Sept. 28 to Oct. 1, a process that permitted precise examinations of shifts in opinion. The earlier 1,525 were called from a sample of telephone exchanges selected by a computer from a complete list of exchanges in the country. The exchanges were chosen so as to insure that each region of the country was represented in proportion to its population. For each exchange, the telephone numbers were formed by random digits, thus permitting access to both listed and unlisted residential numbers.

The results have been weighted to take account of household size and number of residential telephones and to adjust for variations in the sample relating to region, race, sex, age and education. Some election-related findings are reported in terms of an overall "probable electorate," which uses responses to questions dealing with voter registration, past voting history and the likelihood of voting in 1986 as a measure of the probability of particular respondents' voting in November.

In theory, in 19 cases out of 20 the results based on such samples will differ by no more than 4 percentage points in either direction from what would have been obtained by interviewing all adult Americans registered to vote. The error for smaller subgroups is larger. For example, for men or women, the margin of sampling error is plus or minus five percentage points.

In addition to sampling error, the practical difficulties of conducting any survey of public opinion may introduce other sources of error into the poll.

[From the USA Today, Oct. 16, 1986]

POLLS GIVE REAGAN HIGH REYKJAVIK RATING

The White House is touting polls that show its public relations blitz on the Reykjavik summit is paying off. "The more people know about what happened in Iceland, the more they support the president," said Reagan's pollster, Richard Wirthlin. His numbers: Reagan's approval rating—64 percent before the summit—jumped to 73 percent Tuesday; 75 percent think Reagan's Strategic Defense Initiative ("star wars" missile defense system) is a good idea, 23 percent say it's a bad idea. It was 62- to 36-percent approval before the summit. Other polls:

41% say summit was a failure, 30% say it was successful; 55% support SDI—Business Week/Harris Poll.

44% blame Soviet leader Mikhail Gorbachev for no agreement, 17% cite Reagan. 68% agree Reagan shouldn't give up SDI for big reductions in nuclear weapons, 20% disagree—CBS New/New York Times.

64% approve of Reagan's handling of summit; 22% disapprove—ABC News/Washington Post.

[From the Washington Post, Oct. 16, 1986]

REAGAN UNDAMAGED BY SUMMIT

(By John M. Goshko)

More than 60 percent of Americans approve of President Reagan's handling of relations with the Soviet Union, including his stance at the Reykjavik summit, according to a Washington Post-ABC News poll. But 49 percent also believe that he could do more to further nuclear arms control.

The poll, conducted Tuesday, indicates that the failure of Reagan and Soviet leader Mikhail Gorbachev to break the arms-control impasse will not significantly affect the Nov. 4 congressional elections.

Of those polled, 78 percent said the summit would make no difference in how

they vote, while 10 percent said they were more likely to vote Democratic and 9 percent said the summit was likely to turn them toward the Republican column.

Poll results were based on 768 interviews in different parts of the country, and their accuracy is subject to a variation of 4 percentage points in either direction.

The poll showed that 64 percent approved of Reagan's handling of the summit, while 22 percent disapproved. Similarly, 55 percent backed his decision not to accept limits on the Strategic Defense Initiative, with 16 percent dissenting and 27 percent saying they did not know enough about the space-based missile defense to have an opinion.

Responses to other questions directly related to the summit showed that 53 percent believe that Gorbachev was more to blame for the failure to reach an arms accord, while 16 percent said Reagan should be blamed.

Reagan was described as the better negotiator by 55 percent, while 15 percent said that distinction belonged to Gorbachev and the other respondents either had no opinion or said the leaders demonstrated equal negotiating ability.

In assessing the impact of the summit's failure to produce an agreement, 55 percent said the fact that Reagan and Gorbachev came close was a step forward, but 36 percent described it as a step backward.

The poll gave Reagan an approval rating of 62 percent for his overall handling of U.S.-Soviet relations, and 74 percent said they believe that the president seriously seeks progress in arms control. These figures were relatively consistent with Reagan's ratings on the same questions in other polls over the last year.

But the question of whether he has done as much as he should to limit nuclear arms buildups caused a sharp division among respondents, with 49 percent saying he has not and 42 percent endorsing his accomplishments. Other polls taken periodically since 1982 have reflected a similar division.

The poll indicated that 44 percent think Gorbachev wants arms-control progress, while 47 percent suspect his motives. Eleven months ago, a Washington Post-ABC News poll showed 56 percent believing that Gorbachev was sincere about arms control, while only 35 percent mistrusted him.

□ 0910

SENATOR GARY HART

Mr. DOLE. Mr. President, I wish to make a statement on another one of my neighbors, another one of my colleagues, in fact, a colleague who was born in Kansas, who may be spending his last week in the Senate—he is retiring—Senator GARY HART.

Senator HART has taken unique approaches in dealing with many of the pivotal issues of our time. While some are willing to rely on well-worn solutions to our problems, GARY has had the courage to explore and offer new solutions. Whether it was military reform, arms control, or education, Senator HART has provided this body and the Nation with food for thought.

Success in this institution should not be measured merely by the number of bills passed. There is success in prodding Members to looking at new and different directions, and that Senator HART has done time and time again.

I look forward to hearing about and from Senator HART in the coming months. Who knows, two native Kansans may just happen to bump into each other on the road to 1988. The other Kansan, of course, being Senator KASSEBAUM. [Laughter.]

But, in any event, I say to my friend and my neighbor from Colorado, and a native born Kansan, I again say with pride, that I wish Senator HART well. He is a man of great wisdom, integrity, and character. Whatever he may do, I wish him almost complete success. [Laughter.]

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The able and distinguished acting Democratic leader, Senator PROXMIRE, is now recognized.

WHY SDI WILL WEAKEN THIS COUNTRY'S MILITARY STRENGTH

Mr. PROXMIRE. Mr. President, if this Congress decides to go ahead with the strategic defense initiative [SDI] or star wars, how much will it cost? And where is that money coming from? The testimony before the Appropriations Committee has produced not even a ballpark estimate of SDI costs from the administration. Their answer when asked is that they don't know what the cost will be.

Mr. President, in my 25 years on the Appropriations Committee I can recall no other major program—none—where an administration called for a major program, secured billions of dollars of appropriations for it and could not even give a rough estimate of how much it would cost to complete. It is even worse that the committee has permitted Congress to get away with this.

General Abrahamson, the Director of SDI, has told the Appropriations Committee that it is "too early to tell." Defense Secretary Weinberger has said that it will be some time before the administration can make a judgment on the extent and even the nature of the strategic defense initiative. That will be essential to any useful judgment on the project's cost. And yet Secretary Weinberger insists that SDI will be a nationwide defensive system designed to protect our cities and the great bulk of our population. The Secretary has repeatedly denied that SDI will be scaled back to simply provide protection for our missile sites and command centers. Mr. President, this is outrageous. Our taxpayers have every right to know how much SDI can be expected to cost. The Congress is appropriating $3½ billion for research for SDI for the fiscal year that began October 1. That brings SDI costs to more than $9 billion already appropriated and we still don't know where we are going with this project or what the ultimate cost will be. We do know we will be called on by the administration to appropriate sharply increasing sums in coming years. This money will be largely wasted if the Congress determines 5 or 6 years from now that the tens of billions required every year is simply too much.

So if the administration draws a blank, where can the Congress go to get some notion of what this burden is likely to be? The Appropriations Committee has turned to former Defense Secretaries as military experts and to outstanding scientists. How do they estimate the cost? Former Secretaries Schlesinger, Brown, and McNamara have weighed in at about a trillion dollars. The magazine Physics Today representing the experts in the most relevant scientific discipline for SDI estimates the cost at $2 trillion. Former Defense Secretary Brown who is a world class physicist and who has served as the Director of the Livermore Weapons lab where much of the advance work for SDI has been done has given us a further insight into the cost of SDI. He estimates that the perpetual annual cost of maintaining and modernizing star wars after we deploy it will range from $100 to $200 billion per year in 1986 dollars. So we might expect to spend roughly one-third or more of the defense budget per year to keep star wars operating.

Now, Mr. President, all of us in the Congress are well aware of the great pressure to hold down spending. In the past year the pressure has been especially strong to hold down military spending. So where would this $100 to $200 billion per year come from? Isn't it obvious? It almost certainly would come from other military spending. This would mean a roughly one-third slash in spending for the Army, Navy, and Air Force. It would require a sharp reduction in our military personnel. It would mean we would have to forgo the dream of a 600- or even a 500-ship Navy. We would have to scrap our plans to modernize and improve our submarine fleet. It would mean no new aircraft carriers. We would curtail our plans to improve our fighter planes and bombers. We would have to cut back the advanced weapons for our Marines. A proportionate allocation of the one-third cutback would knock out a third of this country's military bases. We would have to withdraw a large segment of our military forces from the NATO command in Europe. We would cut severely into the funding of our vital National Guard and Reserve Forces. Is there any doubt that overall we would have to weaken this country's military force and severely

weaken it? And we would have to do all of this without any corresponding reduction in the military capability of our prime adversary—the Soviet Union?

Mr. President, previously this Senator asserted on the floor of the Senate that Secretary Gorbachev might very well want the United States to proceed with SDI. Why? Because he knows that he can almost certainly overwhelm it and because he knows that SDI will weaken this country's overall military capability. Mr. President, anyone who has served in this Congress long enough to know what a fiscal bind we are in, anyone who knows the pressure the Congress is under to cut costs, anyone who understands how that pressure will concentrate on holding down military spending, must know that, whether Mr. Gorbachev knows it or not, we will serve the interests of the Soviet Union and disserve the interests of our country if this Congress insists on moving ahead as the administration has asked us to do with SDI.

MYTH OF THE DAY: REHNQUIST COURT WILL BE DIFFERENT

Mr. PROXMIRE. Mr. President, the myth of the day is that the new "Rehnquist Court" will somehow be radically different from its predecessor, the "Burger Court."

This is a myth, pure and simple. Those who propagate this myth are overlooking two basic facts.

First, William Rehnquist has been a member of the Supreme Court for many years. He is not a new arrival on the Court. He has been handing down decisions over the years, and the direction and substance of his views are well known.

Will Justice Rehnquist's views suddenly change now that he has been elevated to the position of Chief Justice of the United States? No. We can logically expect the Rehnquist positions and opinions to remain basically the same, regardless of the fact that he is now the Chief Justice. As a result, there will be no radical change brought about by the movement of Justice Rehnquist to fill the post of Chief Justice. Things will remain pretty much the same on that score.

Second, how about Judge Scalia as a substitute for Warren Burger on the Supreme Court? Here again, little change in the Court's direction can reasonably be anticipated. After all, Judge Scalia comes to the Supreme Court with a well-known background. He has a track record, and it shows that he is and will very likely remain a conservative jurist. Exactly the same can be said regarding the recently departed Chief Justice, Mr. Burger. Once again, there is what might be called an even exchange: Scalia for Burger, one conservative for another.

So, what we have here, Mr. President, is a Supreme Court that will simply give us more of the same. Mr. Rehnquist is still there, and he will be handing down decisions that follow a well-worn path. He represents a constant. And, in getting Justice Scalia and losing Chief Justice Burger, we are simply getting one conservative in lieu of another conservative.

In view of these facts, Mr. President, those who foresee a radical change in direction on the U.S. Supreme Court are believers in a myth. The Supreme Court, as now constituted, should provide no great surprises.

Mr. LAUTENBERG. Mr. President, is there leadership time available from our side, I ask the Senator from Wisconsin?

Mr. PROXMIRE. I just do not know. May I ask the Presiding Officer, do we now go into a period of morning business with time allotted to Senators?

The PRESIDENT pro tempore. There is morning business specified after the leadership time.

Mr. PROXMIRE. There is no morning business?

The PRESIDENT pro tempore. There is morning business after the leaders' time.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the remainder of the Democratic leader's time be reserved for his use later in the day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 9:30 a.m., with statements therein limited to 5 minutes each.

TECHNICAL CORRECTIONS TO THE TAX BILL

Mr. MELCHER. Mr. President, would the majority leader yield to me?

Mr. DOLE. I am happy to yield to the Senator from Montana.

Mr. MELCHER. I thank the majority leader for yielding to me.

I want to tell the majority leader that the difficulty in getting up the technical corrections to the tax bill has been complicated so much by one Senator after another hoping to add some amendment to it. I wanted to make clear to the majority leader and to all other Senators that the amendment that I sought to offer to it, income averaging for farmers, truly a tax proposal, I will offer that amendment to some other piece of legislation that remains before us before we adjourn.

I make that announcement so that all Senators may become aware of that, that if my proposal complicates the procedure of the Senate considering the technical corrections to the tax bill, that at least mine will be removed from that complication.

I well understand a number of Senators whose States are in the so-called bond pool provision of the technical corrections, that it is extremely important to those Senators that this technical correction bill pass. And so, I do not know whether that will free up the consideration of that measure, but at least I will not complicate it.

I understand the Senator from New Jersey, Senator BRADLEY, late yesterday evening entered an objection if my amendment were to be considered, which seemed to ruin the opportunity for unanimous-consent requests to bring it up at this time today.

□ 0920

If I had known about the Senator from New Jersey's objection earlier, I would have taken this step earlier so that the work of the Senate would not be complicated; as complicated as it is.

Mr. DOLE. Mr. President, I want to thank the distinguished Senator from Montana. I know this will be good news to the distinguished chairman of the Finance Committee as well as the distinguished ranking member, Senator LONG, and others. This will, I think, make it possible to obtain the agreement, and it is an indication that the Senator from Montana, and many other Senators have decided they would like to put an amendment on there but if they do that they are going to torpedo a number of other amendments that have been considered that mean a great deal not just to Senators but to their States. I am advised there are 31 States—I do not know if there are 31—that are affected by this little concurrent resolution.

So I would encourage Senator PACKWOOD maybe to come back to the floor after a while and renew his unanimous-consent request. I again thank the Senator from Montana for his thoughtfulness.

FURTHER CONTINUING APPROPRIATIONS, 1987

Mr. DOLE. I wonder if we might be able to act on the short continuing resolution.

Mr. BYRD. Yes.

Mr. DOLE. I thank the distinguished minority leader. I ask unanimous consent that the Senate now turn to the consideration of House Joint Resolution 753, the continuing resolution extension which is at the desk.

The PRESIDING OFFICER (Mr. MURKOWSKI). Is there objection? Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 753) making further continuing appropriations for the fiscal year ending September 30, 1987, and for other purposes.

There being no objection, the Senate proceeded to the consideration of the joint resolution.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be offered the question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 753) was ordered to a third reading, was read the third time, and passed, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the joint resolution of October 11, 1986 (Public Law 99-465) is hereby amended by striking out "October 15, 1986" and inserting in lieu thereof "October 16, 1986".

Mr. DOLE. Mr. President, I move to reconsider the vote by which the joint resolution was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Let me indicate that this expires at midnight tonight. It will be delivered to the President for his signature before noon. The Government will continue to function as smoothly as in the past.

SCHEDULE

Mr. BYRD. Mr. President, would the distinguished majority leader yield?

Mr. DOLE. I am happy to.

Mr. BYRD. I wish to ask the majority leader as to how he sees the operation of the Senate today, what the schedule is going to be, how late he would expect us to be in, and what he sees for tomorrow.

Mr. DOLE. I was asked earlier by someone in the press if we would finish today. I doubt it. It seems to me we might be able to do the immigration conference report this morning; the clean water conference report I understand will soon be available. Hopefully we can go to the technical corrections that Senator PACKWOOD has an interest in doing. I think all of those can be done very quickly. Then we would move to the main event today, which would be the continuing resolution conference report which has arrived. I do not know precisely how many amendments there will be in disagreement. As I understand, there are four that are amendable. So we could make some pretty good time today. That would leave reconciliation, and debt limit. That is all we would have left. There is a glimmer, at least.

I understand, again, the Speaker would like to finish this evening. They still have the debt limit and reconciliation. We have the continuing resolution, debt limit, reconciliation, water, and immigration. But I do not believe any of those will take a great deal of time.

Mr. BYRD. What is the outlook for the signing of the Superfund bill?

Mr. DOLE. I have been urging the White House to do that. I have been suggesting to the White House, and I have been helping circulate a letter which would indicate to the President that if he would sign the Superfund there would not be an effort here next year to come back and again raise the ante by raising additional taxes because there are some people in the business, the oil business, chemical business, and business in general who feel they have been taxed about enough.

I hope to be able to demonstrate that there is some bipartisan support for that effort, and I believe if we could deliver a letter to the President, with a pretty good number of signatures, that would give him the encouragement to sign the bill.

Mr. BYRD. May I also add a note that I am urging the majority leader on the other side of the Capitol not to send over the adjournment resolution until Tuesday so that the Congress will be around in the event the President pocket-vetoes that bill, unless in the meantime we would get some assurances from the White House that that bill will not be pocket-vetoed.

The bill has passed both Houses by wide majorities. It is much-needed legislation. I hope we can get that assurance from the White House so that when we complete our other work we would not have to stay around. I share the majority leader's feeling that we do not want to come back next year and revisit this matter with higher taxes, but I also feel that it is incumbent upon us to do everything we can to see that this bill is enacted into law, it having passed both Houses by great majorities. It is very much needed, I think. I can speak for my own State and the chemical companies therein. I would hope we could get that assurance from the White House.

Mr. DOLE. I would hope the bill would be signed. I am going to work very hard today on the letter. I hope to have Republicans and Democrats. It does not bind anybody. It just indicates, we believe, the level of funding is not going to be increased by more taxes. I have had some Democrats who indicated they will sign the letter.

So, I think, if we want the President to indicate his good faith, maybe we could show that we believe this is a good bill, it ought to be signed, and we are not about to, and we are willing to restrain ourselves on raising taxes.

Mr. BYRD. The majority leader feels, does he, there is a good likelihood that the Senate will still be in tomorrow?

Mr. DOLE. I would rather err on the side of being cautious. I would say yes.

Mr. BYRD. I thank the majority leader.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. DOLE. Mr. President, I would like to extend morning business. I think it is until 9:30.

The PRESIDING OFFICER. The leader is correct. Morning business is until 9:30.

Mr. DOLE. I ask unanimous consent to extend morning business until 10. I know there are some speakers who have not spoken. I have been asked by the Senator from Delaware if he might have 15 minutes if the minority leader has no objection.

The PRESIDING OFFICER. Without objection, morning business will be extended until 10 o'clock.

Mr. DOLE. We will reserve the time.

Mr. ROTH addressed the Chair.

Mr. LAUTENBERG addressed the Chair.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. LAUTENBERG. I would ask if my colleague from Delaware would allow me about 5 minutes, Mr. President, if there is no objection.

The PRESIDING OFFICER. The Senator from New Jersey is recognized.

Mr. LAUTENBERG. I thank my colleague from Delaware, the majority leader, and I thank the minority leader for his views on the Superfund bill.

SUPERFUND

Mr. LAUTENBERG. Mr. President, the fate of Superfund still hangs in the balance, as we await action by the President.

The Senate passed the conference report by 88 to 8. The House by 386 to 27. Industry, labor, public health, and environmental groups have rallied behind the bill. Eighty-one Senators joined in a letter to the President urging him to sign this historic legislation. And public opinion polls consistently show that an overwhelming majority of the public is committed to toxic waste cleanup.

After almost 3 years of work, Congress has crafted a Superfund bill that will get the job done, and which is supported by a broad cross section of interests in this country. This consensus did not come easily. Literally thousands of hours of work went into this bill. It was considered by eight committees in the House and Senate.

Yet we have heard that President Reagan is being advised by some to veto the bill. With such an action the President would be turning his back on the environment. Rejecting new,

tough cleanup standards; community right to know requirements; protection from radon; citizen suits; a leaking underground tank program; and many other breakthroughs in the bill that is sitting on his desk.

Mr. President, I hope that President Reagan will sign this bill. But, we are running against a clock. If the President wants to try and wait the Congress out, and pocket-veto this bill, he just needs to delay action until we adjourn, if we adjourn today or tomorrow, or even Saturday. This, Mr. President, would be unacceptable, in my judgment.

So, Mr. President, I want to reiterate that there is another option on Superfund. And, that is to stay in session long enough to override a veto. I know that suggestion will not be welcomed by some. All of us have canceled visits with our constituents as the session has dragged on. I know that everyone here would like to finish our work and go home. But, if the President decides to wait out the Congress, then I think we have no choice but to wait out the President.

Last week, 55 of our colleagues joined me and Senator CRANSTON in a letter to the majority leader asking that the Senate be accorded the opportunity to override a potential veto. The Democratic caucus agreed on Tuesday that, if necessary, we should follow such a course of action.

Also on Tuesday, the Democratic leadership in the House announced its intention to stay in session long enough to prevent a pocket veto, by staying in session until the President takes action on the bill. My understanding is that, under the Constitution, the Senate cannot adjourn sine die until the House does. So, the decision by the House leadership should assure that the Senate would stay in session, as well, if necessary, to vote on a veto override. It would be a comfort to know that our leadership is in accord with that recommendation.

Mr. President, I believe the Senate has no choice. We are here to do the work of the people. It would be unconscionable to walk away from this bill. Already we have 900 sites on the national priority list, 99 of which are in my home State of New Jersey. Estimates suggest that there may be as many as 10,000 abandoned toxic waste sites. They threaten the air we breathe, our soil, our ground water. They scar our Nation and jeopardize the health of our citizens.

And while the cleanup tasks ahead continue to mount, the very means of taking on the challenge—Superfund—is dying a slow death. EPA sent termination notices to cleanup contractors on October 1. And the agency will be forced to cancel remedial work at over 100 sites across the Nation in 2 weeks, if Superfund is not reauthorized.

The time has come to put our shoulders to the wheel. To push forward with an historic new program of toxic waste cleanup. To tell people across the Nation that this Government is committed to protecting them, their children, and their grandchildren from the insidious threats of toxic waste sites.

This is what Superfund is all about. This is what is at stake. That is why I hope the President will sign the bill. But, if he chooses to veto it, that is why the Congress should be here to override that veto.

We cannot adjourn, we cannot go home, until we take final action on a strong and reauthorized Superfund. This Nation deserves no less.

Mr. President, I yield the floor. I ask unanimous consent that three editorials recently appearing the Camden Courier-Post, the Bridgeton Evening News, and the Central New Jersey Home News, be printed in the RECORD following my remarks.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Camden Courier-Post, Oct. 13, 1986]

THE LAST HURDLE FOR SUPERFUND

Ronald Reagan, back from the summit that wasn't a summit, has waiting for his signature the Superfund bill that may never be. Mr. Reagan has been urged to veto the legislation by Treasury Secretary James A. Baker and budget director James Miller. Rather than be persuaded by Jimmies-come-lately to the Superfund debate, Mr. Reagan should give careful attention to the advice he is getting from Senate Republicans.

"I hope the president and presidential advisers will study the bill carefully, and I hope that it will be signed and not vetoed," said Senate Majority Leader Robert Dole. Added Wyoming Republican Alan Simpson during floor debate in the Senate Oct. 3: "I think it would be a very bad mistake if the president of the United States were to veto this."

Indeed, if only from a partisan perspective, the president's veto would be a major political blunder. Twenty-two of 34 senators up for re-election are Republicans, and the GOP leadership concedes that the going will be tough for some of them, as it always is for the majority party in mid-term elections. Those senators will have to explain to their constituents why Mr. Reagan scuttled the Superfund and with it their best chance to get toxic waste dumps in their state cleaned up. The Senate's 88-8 vote for the expanded $9-million Superfund suggests that senators of both parties prefer to confront the voters with a "yes" vote recorded on the major environmental issue to come before this Congress.

Mr. Reagan might also pause to consider the bipartisan efforts that went into building the unique coalition that supports the Superfund bill. It includes the Chemical Manufacturers Association and environmental groups such as the National Audubon Society. None of the supporters is absolutely satisfied with the bill, and that in itself is testimony to the compromise that it represents.

The administration's objections to the Superfund center around its size—too big to be effectively managed, detractors say—and the inclusion of a broad-based tax that will require industries other than petroleum and chemicals to pay a share of the cleanup. Neither objection stands up to scrutiny. The $9 billion, to be spend over five years, is not too much considering the hundreds of sites that need attention; and the broad-based tax is simple recognition not only of the need for equitable tax policy but also of the fact that cleaning up the nation's worst dumps is everyone's problem.

Mr. Reagan won't decide the fate of Superfund with New Jersey uppermost in his mind, but should he veto, he should be aware that this state, with the most sites on the Superfund list, will lose the most. Work already begun under the original Superfund will stop. Once it does, it won't simply be a matter of starting again. Contractors, EPA employees, complementary state programs—everything that has been set in place to attack toxic waste—will fall apart, as will the political compromise on which the legislation is based. By time the pieces are picked up and put back together, toxic pollution will have won another round.

[From the Bridgeton Evening News, Sept. 29, 1986]

RENEW SUPERFUND

Let's save the Superfund that was originated to clean up scores of hazardous toxic waste sites, many of them in New Jersey.

Congress must act on legislation to continue the Superfund before the end of next month or it will cost millions of extra dollars to terminate it and to get a new bill passed next year, according to Environmental Protection Agency chief Lee Thomas.

If the fund dies for lack of continuing legislation and appropriation of funds, Thomas says that as many as 1,500 EPA employees may have to be terminated. That will not only be a hardship to them but to the thousands who suffer from the proximity of toxic waste sites to their homes and businesses and could greatly delay implementation of any new efforts at toxic waste removal.

It is proposed that the fund be renewed for $8.5 billion for the next five years. Such sums frighten congressmen in the face of the Gramm-Rudman budget limitations and coming elections but failure to renew the fund may prove a worse threat in states where toxic wastes are a public health threat.

It is just plain stupid to put off the inevitable in such a case. The removal of toxic waste hazards from antiquated dumps is essential and will have to be faced sooner or later. Only a fraction of the needed cleanup has been done and we can't rest until it has all been cleaned up.

Congress must act before it adjourns in October to stump for re-election or the fund will automatically terminate. It must be renewed. Waiting to enact a new toxic waste dump cleanup law next year will both increase the hazard and the cost.

Time is running out and with it the public's patience.

R.E.B.

[From the Central New Jersey Home News, Oct. 6, 1986]

LAST PUSH FOR SUPERFUND

Now that congressional negotiators at long last have resolved their differences over the reauthorization of the federal Su-

perfund, Americans ought to be able to breathe a sign of relief for a renewed commitment to cleaning up the worst toxic sites in America.

Alas, congressional agreement—which came a year and a day after the original five-year Superfund expired—is not the final hurdle for the program. All along, the Reagan administration has threatened to veto any Superfund renewal financed with a broad-based tax or with a price tag as high as the $9 billion Senate-House proposal. And there is no indication the administration has changed its mind.

It should. The Superfund renewal may not be a perfect bill. It probably calls for a bigger program and more money than the Environmental Protection Agency can spend efficiently and effectively, and it almost certainly is overspecific in its instructions to the EPA on toxic-waste cleanup. Congress has a bad habit of imposing overstrict and unrealistic rules and conditions on environmental legislation.

But the alternative to the compromise congressional bill—a presidential veto or pocket veto that would put the Superfund out of business—is unacceptable.

Congress is making a last push to persuade President Reagan to go along with this Superfund renewal. It can do more than that. It can stay in session long enough to prevent a presidential pocket veto and be prepared to vote a veto override. The Superfund cannot be allowed to shut down.

Mr. ROTH addressed the Chair.

The PRESIDING OFFICER. The Senator from Delaware.

NEED FOR A STRONG JAPANESE ROLE IN PHILIPPINE DEVELOPMENT

Mr. ROTH. Mr. President, 3 weeks ago we heard a most moving and an effective speech by President Corazon Aquino, regarding the situation in the Philippines and Filipino-American relations. The American people have followed closely the developments which brought Mrs. Aquino to power for many reasons—the historical and ethnic ties between the Philippines and the United States, our security relationship, but, most importantly, because we admired the dramatic rebirth of democracy almost 15 years after former President Marcos had declared martial law. That the change of leadership ultimately occurred peacefully and that the vast majority of the Filipino people supported a democratic rather than Communist alternative was very gratifying to us. We certainly want to help the new Government and the Filipino people, but our means are limited. I believe that we should seek a strong joint approach with the Japanese to assist the Philippines.

As President Aquino pointed out in her speech before this body, the struggle for freedom in the Philippines did not end with the flight of Mr. Marcos and the restoration of civil liberties. All of us in politics know that it is easier to "kick the bums out" than it is to design meaningful alternative programs and carry them out effectively. The new leadership has faced and continues to confront a variety of acute challenges. The viability of what must be regarded as a fledgling democracy in the Philippines depends on the new Government's success in dealing with the growing Communist insurgency, in working out acceptable arrangements with Muslim and tribal ethnic minorities, in rooting out corruption, in providing more effective delivery of Government services, and above all in restoring economic growth and improving standards of living in both urban and rural areas. Since 1983, there has been negative economic growth in the Philippines, while population has continued to grow. Many desperately poor Filipinos will be loyal to whatever government offers the best prospect of a decent livelihood.

The challenges facing the Philippines are long term, but the time available to President Aquino to begin making significant progress may not be that long. That is the reason she made an early visit to the United States. She realizes that the challenges facing her government must be basically solved at home, but she also knows that the Philippines needs the help of its friends abroad. If she, with our support, can offer a clear strategy for the long-term growth of the Philippines and begin to implement it, she will have taken a major stride in consolidating the democratic revolution she began.

The United States is responding generously to the Philippines' needs. We have humanitarian concerns and important political, strategic, and economic interests in the Philippines. Aside from governmental assistance programs, under which millions of dollars have been committed in economic and military assistance already this year, other resources are flowing from the United States to the Philippines under private auspices. These include spending by United States-based foundations, contributions by charitable and religious organizations, and individual remittances to friends and relatives in the Philippines. This public and private response comes at a time when the United States is facing enormous deficits in the Federal budget and in its current balance-of-payments account with the rest of the world.

There is another developed country whose stake in the Philippines is equal or greater to that of the United States; this is Japan. Japan and the Philippines are among the very few democratic nations in Asia. Japan is the Philippines' second largest trading partner. The vast majority of Japan's petroleum and many other raw materials pass through the South China Sea between the Philippines and Vietnam. Economic progress, the evolution of democratic institutions, and political stability in the Philippines will make a major contribution to the East and Southeast Asian political, economic, and security environment so important to Japan's own security and growth. If democracy fails in the Philippines and the Communists ultimately come to power, Japan's economic lifeline to the Middle East and Europe might be flanked by Soviet bases on both sides. Many in the Japanese Government recognize their country's stake in the success of the Aquino government, and Japan is currently providing more foreign economic assistance to the Philippines than does the United States. Aside from its aid, however, the Japanese role is more limited. For example, private foundation activities, markets for Philippine manufactured goods, new Japanese investments, and educational opportunities for Filipino students in Japan, are not well-developed.

Japan's role in the Philippines should be regarded as an important test of Japan's ability to assume increased international responsibilities and contribute to the comprehensive security of free countries in the Asia-Pacific region. The external requirements of the Philippines are principally economic in nature, and the Japanese have long argued that they can best assist free world security through economic means. I hope that Japan will design a special and generous policy toward the Philippines to help that country recover economically and thus contribute to political stability and the strengthening of Philippine democracy.

This policy should go beyond foreign aid. There are frequent calls by Japanese and other Asians for a Japanese "Marshall plan" for this or that country or countries, and these frequently place too much stress on the foreign aid, and forget that even the original Marshall plan was not simply a United States foreign aid program for Europe, but also involved the development of regional institutions and European plans of self-help and cooperation. Indeed too great a stress of foreign aid can be detrimental when projects are not well thought out and aid leads to corruption and cynicism.

The biggest foreign exchange earner for the Philippines as for most developing countries is exports. Japan has been a good market for Filipino raw materials and primary products, but it is a small market for Filipino manufactures. As manufactured goods have become an increasingly large share of Philippine exports, Japan's share of Philippine exports have dropped from almost 40 percent in the early 1970's to only 20 percent today. The Philippines and other Southeast Asian nations face major barriers to marketing their products in Japan, a problem Japan is only beginning to address.

Japan should regard the Philippines as a priority country in its foreign

policy and develop a comprehensive strategy of help in aid, trade, investment, technical assistance, and education. It seems to me that it makes a lot of sense if that strategy evolves in close collaboration and consultation with not only the Philippines, but also with the United States. Japan and the United States are the Philippines' main external partners. Coordination by these two partners on external assistance programs agreed to with Philippines will permit a more effective use of external resources. Moreover, a triangular dialog may contribute to the better flow of communication than separate bilateral dialogs. This may be particularly true in the Japanese-Filipino relationship, where wartime legacies and other factors appear to place a heavy negative psychological load on the relationship. In my judgment, a triangular discussion should involve the private sectors as well as the governments and be carried out in a low-keyed manner, exploring Filipino needs, Filipino domestic policy options, and the kinds of Japanese or American policies that can complement Filipino policies.

□ 0940

Some Filipinos may fear that a triangular dialog would reduce their bargaining power with the two economic giants. This dialog would not substitute for bilateral negotiations or more multinational efforts involving the international financial institutions, but be complementary to these discussions. The triangular approach would encourage a more forthcoming policy by the Japanese than would otherwise be the case. Japan still lacks confidence in its foreign policies and the development of a comprehensive policy of support for the Philippines would certainly be sidetracked and delayed by squabbles within the Japanese bureaucracy. A triangular arrangement will not only give the Japanese more confidence, but also provide a continuing source of political pressure for the development of a forthcoming and broad policy direction. Of course, a forthcoming policy will also depend very much upon Filipino progress in understanding domestic policies and policy reforms that ensure the effectiveness of foreign help.

Some Americans also may be skeptical of a triangular approach, fearing that it would be cumbersome and slow down assistance programs that Americans would find more convenient to handle by themselves. I believe, however, that if we want our allies to share burdens as we say we do, we need to develop stronger habits of meaningful consultations and complementary policy arrangements. I also believe that a tripartite program involving Japan as a key factor and the chief financier would provide a stronger basis of political support for the United States program toward the Philippines. Finally, existing programs and shorter term emergency assistance need not wait while we develop a longer term Japanese-United States effort. I would agree, however, that major new support should be carefully planned on the basis of trilateral consultation.

Some Japanese might be fearful that a triangular approach would entangle Japan in bilateral United States-Philippine questions, such as the future of the United States bases. Our triangular approach should be limited to economic development plans for the Philippines, understanding, of course, that successful economic development provides a more favorable climate in which a variety of political and security questions, including the bases, the insurgency, and the minority questions, can be resolved by the party or parties directly involved.

I do not mean to imply that Japan and the United States are not already in touch on the situation in the Philippines. A rather broad dialog on many issues, including the Philippines, is taking place between the two governments, but our efforts are essentially separate, focused on meeting emergency problems such as debt rescheduling, and there is nothing approaching a long-term coordinated strategy to assist Philippine economic development. Such a strategy would provide a basic consensus on policy for the three parties; obviously policy details and implementation must be nationally determined.

The Aquino government offers civil liberties, political participation, and new hope to the Filipino people. The United States and Japan want this government to succeed. Japan has a golden opportunity to help the Philippines and, in so doing, contribute to regional development and security. This would help strengthen its relationship with the United States. I hope, Mr. President, that Japan will join with us and with the Philippines in a historic effort to develop new policies that give maximum opportunity for the Aquino government to succeed and allow the frail plant of Philippine democracy to develop deep and strong roots.

Mr. President, I yield back the remainder of my time.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

U.S. EXPORT CONTROLS

Mr. BAUCUS. Mr. President, I have risen repeatedly on this floor to speak about the need to improve America's international competitiveness.

I am concerned that sometimes the issue of competitiveness is just an abstraction—just a collection of generalities, masked in unclear terms like "productivity," "innovation" and "capital costs."

Today I would like to explain what our lack of a clear competitiveness policy has meant to one specific business in the United States. The plight of this company, Silicon Technology Corp., is described in the October 1986, copy of INC. magazine in an article entitled "Kachajian's Rebellion".

The article tells the story of George Kachajian and his fight against the unnecessary and cumbersome export control regulations that burden some of America's most competitive exporters.

Export controls are those regulations governing whether U.S. high technology can be shipped abroad. Export controls exist primarily to protect our national security.

Let us be clear about something from the start. We all strongly support national security. We must restrict some exports to ensure that militarily sensitive technology does not fall into the wrong hands.

But this administration has unnecessarily burdened U.S. exporters who want to sell low-level technology that is generally available throughout the world. And that is undermining our competitiveness.

George Kachajian's story makes this clear. During the 1970's, Kachajian exported wafering saws, which are used to cut silicon chips, to the Soviet Union and Poland. These saws were readily available from Switzerland, so if Kachajian did not sell them, Switzerland would.

In other words, it was not a question of whether these countries would get the saws; it was only a question of whether the United States or some other country would make the sales.

From 1974 to 1980, Kachajian had sold 57 saws to Eastern bloc countries. But in August 1980, the Commerce Department suddenly denied his application for an export license based solely upon redtape and bureaucracy, claiming, however, it was for national security reasons. As a result, the Swiss got the sales Kachajian lost.

But our friend Kachajian did not give up, a testament to the determination of American competitors, despite government roadblocks.

Kachajian generated 1,000 pages of correspondence, made 30 trips to Washington, and spent $60,000 in legal fees. That is $60,000 he could have spent on research and development, but he was forced to spend it on overcoming barriers the Government was erecting to trade.

Because of Kachajian's efforts, the White House finally decontrolled the saws for sale to non-Communist countries, but sales to Communist countries must still get final approval from COCOM.

After 6 years, Kachajian is still unable to sell to the one market he had requested in the first place. Meanwhile, the Swiss are penetrating and monopolizing markets that should be ours. Moreover, they have used their strength to penetrate the U.S. market, eroding Kachajian's sales here.

Mr. President, George Kachajian's story is not unusual. High technology exporters throughout this country each have their litany of horror stories connected with seeking export licenses.

□ 0950

Export controls are justified on the basis of national security. That is important. But is it not time we recognized that economic security is an equally important component of national security?

President John Kennedy once observed that the true strength of a nation was not reflected in its list of weapons but in its balance of trade. We must recognize that maintaining economic strength is central in the long run to funding our military strength.

I would not support revision of our export controls if I thought it would undermine in any sense our military strength.

I must say that in the case of George Kachajian there was no compelling national security reason given for refusing to grant him his license. It was redtape and bureaucracy.

The case of George Kachajian demonstrates that we can and must persevere to upgrade our export control policies. The case demonstrates in personal terms the competitiveness gap that we face in relation to other countries. That competitiveness gap is getting wider every day, as foreign competitors make inroads into markets that once were ours.

I hope George Kachajian's persuades us of the need to reverse the policies that led to that competitiveness gap. If we do not, we will find someday that not only our economic security, but also our national security, will have been seriously eroded.

Mr. President, I ask unanimous consent that the article from INC magazine be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

KACHAJIAN'S REBELLION

(By Lucien Rhodes)

Welcome to George Kachajian's Theater of the Absurd.

You will know you have arrived when you see the marquee, there above the front door of his corporate headquarters at the end of Spruce Street in Oakland, N.J. No, it wasn't planned that way, but it does capture the spirit and essence of the whole long, involved, and contentious drama that's been six years in the making and not finished yet.

Once, those large blue letters announced the company he started 16 years ago as Silicon Technology Corp. (STC). But some months ago, this sign broke in the middle, as if unable to stand the weight of the company's aching frustration any longer: the letters spelling "TECH" fell and shattered on the parking lot below. Now each morning when Kachajian sees this symbol of his plight, he cannot help but mentally review the script as he's lived it thus far. In a rising spiral of incredulity, he will recall how an abrupt shift in American foreign policy suddenly denied him access to foreign markets, and how a foreign competitor used the opportunity both to fill the vacuum overseas and to raid his market in the United States. And he will remember with bitterness the layoffs of workers in Oakland, and the mounting financial losses, and his long hegira through the federal bureaucracy in search of relief.

So it is that George Kachajian comes to work, his $10-million company still dangerously close to collapse. Looking at the marquee, he asks himself, "Who took the 'tech' from my technology?" to which he answers, amazed at the improbability of his own response: "My own government, that's who."

But please come inside: the featured attraction has a lot more to offer—senators, congressional subcommittees, the Western Alliance; also the Soviet Union and the Warsaw Pact. You will see that the story of George Kachajian's quest for an export license is really only a small vignette played out against a vast backdrop of international trade deficits, East-West competition, and political feuding within the Reagan Administration. Still, it is vignette that raises disturbing questions: Do the complex controls regulating U.S. exports sacrifice the international competitiveness of American companies, particularly hightech companies? If our export-control system causes our companies to lose markets, and worse yet, industries, to foreign competitors, then, in the long run are they really protecting our national security? With a trade deficit of $170 billion, can the United States afford to forgo exports that surely run into the billions of dollars that are lost each year to export controls?

The controversy has by no means spent its force, although George Kachajian has now won a victory of sorts against the deadening hand of the Export Administration Act—the first of its kind in history. And as the news of this victory spreads through the hightech community, he is being praised as the underdog who beat city hall. But Kachajian never wanted to star in his own melodrama. He wanted to be a businessman.

For 18 years, George S. Kachajian had worked for Dow Corning Corp. in various sales and marketing jobs, first selling silicones for oils, greases, and paint resins, and then silicon, the pure crystalline element used exclusively in the manufacture of semiconductors. His contacts within this new, rapidly growing industry were broad, he was well paid, and his prospects were very promising. But in 1969, he decided to quit. That fall, at a company plant in Hemlock, Mich., Kachajian watched an employee at work on an internal diameter wafering saw, which cuts silicon ingot into thin wafers, one of the first steps in creating semiconductors. For a second, the operator looked away from his work and the saw's diamond blade sliced through the back of his hand and cut off his fingers. Horrified and splattered with blood, Kachajian pulled the man away from the machine and applied a tourniquet. Then and there he decided that "there had to be a better way."

With almost $20,000 in personal savings, Kachajian turned to a machine-tool company in Massachusetts and financed the development of a prototype for a new saw that changed the orientation of the cutting blade, added a protective shield, and rearranged the work flow. In the fall of 1970, funded by $220,000 from friends and relatives and the refinancing of his house, he began to manufacture and sell his new machine. And it was not long before Kachajian realized that he would have to comply with U.S. export regulations, the vagaries of which could hardly be factored into any rational business plan or production schedule.

These days, business on the international level is rarely "strictly business," especially when it involves high tech. During World War II, export controls were used to ensure an adequate supply of various goods and commodities needed to sustain the war effort. But contrary to the original expectations, those controls were left in place long after peace had been declared—a weapon of the Cold War. The Export Control Act of 1949 finally made official what had been administrative practice, banning the export to communist countries of not only bona fide military equipment, but also dual-use commodities that might have military as well as commercial value. Beginning in 1969, Congresses and Presidents began relaxing those export restrictions, turning a more congenial and expansive face to trade with the Soviet Union and its allies. But this period of détente came to an abrupt halt with the Soviet invasion of Afghanistan in 1980. Caught up in the ebb and flow of the tensions between the superpowers was a small machine-tool company at the end of Spruce Street in Oakland, N.J.

During the 1970s, STC had prospered, controlling 80% of the domestic market in wafering saws. At the same time, Kachajian, encouraged by the prevailing attitude toward open East-West trade, had turned his attention to the demand coming from foreign markets, particularly from the Eastern Bloc, to which he traveled more than 20 times from 1974 to 1980. Because his saw is an integral part of the semiconductor manufacturing line whose end products are, in turn, essential to sophisticated weapons systems, the saws were classified as dual-use commodities requiring a validated export license. In those days, however, the only problems Kachajian encountered in the licensing procedure were delays—after a wait of up to nine months, his applications were all approved. As a result, he sold 53 wafering saws to the Soviet Union and 4 to Poland, machines that today go for $100,000 apiece.

Then suddenly, in August 1980, the U.S. Department of Commerce, for the first time, denied an export license application from STC. "One minute I was selling," Kachajian recalls, "and the next minute I was screwed. And there you are. You don't want to break the law, so you have to live with it." During the next year and a half, he made one futile call after another to the Commerce Department, only to be told cryptically that his licenses were being denied for national security reasons. Kachajian allowed himself brief interludes of opti-

mism in which he fantasized making up his lost sales with redoubled efforts in the U.S. market. But these, it turned out, were tranquil delusions, only possible because he had not yet heard all the bad news.

By mid-1981, Kachajian discovered that STC was losing not just overseas business, but domestic customers as well. His major competitor, Meyer & Burger A.G., in Switzerland, had suddenly appeared in the United States offering comparable wafering saws for less than STC's cost of production. At first, Kachajian could not understand how the Swiss firm could sustain such suicidal dumping, but he soon learned: lacking any competitive restraint, the Swiss company was selling saws in the Eastern Bloc for prices as much as triple those that had prevailed before the export controls went into effect. "They were using those excess profits to buy market share here and drive me out of business—and I couldn't fight back," Kachajian says. "It was absurd. It was outrageous. My hands were being tied by my own government."

What's more, Kachajian could not see how the country's national-security interests were served by denying him export licenses on a product that the Soviets could get in comparable quality and quantity from the Swiss. Instead, he felt he was the victim of capricious regulations, which, in effect, doomed him to extinction. Determined to correct the obvious illogic of his situation, Kachajian screwed up his courage and marched directly into the maw of the netherworld of export licensing.

What he found was a forbidding tangle of categories and classifications, or processes and procedures, of laws, regulations, and inscrutable interpretations. At its center was the Commodity Control List (CCL), which presents those commodities, goods, and technologies requiring export licenses for any of five criteria: national security, foreign policy, short supply, human rights, and nuclear nonproliferation. In many instances, the CCL is constructed not of products, per se, but of entries calculated according to general technical or performance standards. As a result, no one really knows how many specific products are, in fact, controlled, although estimates range to the hundreds of thousands. While nobody would argue that critical high technology should be sold to the Soviet Bloc, critics from industry, academia, and Congress have charged that the list is far too broad and that it includes items long since rendered technologically obsolete.

The complexity and ungainly sprawl of the CCL is replicated in the bureaucracy that has grown up around it. Today, an application to export a product that might be covered by the CCL is scrutinized not only by several divisions within the Department of Commerce, but frequently by several intelligence agencies and the Departments of State, Defense, and Energy. Nor is that the end of it. Even after applications for certain items have been reviewed by the appropriate roster of U.S. authorities, licenses still cannot be granted unless they are also approved by the 15 allies of the Coordinating Committee for Multilateral Export Controls (COCOM), a regulatory body headquartered in Paris. The intent of COCOM is to coordinate export controls with our allies, which is certainly understandable. But exporters complain that it adds yet another layer of uncertainty to the licensing system, causing delays that drive customers to the arms of competitors, either in non-COCOM countries or, even worse, in COCOM countries that interpret its restrictions more liberally than the United States. In fact, some American businesspeople charge that our allies have, on occasion, used the licensing apparatus to give a competitive advantage to their own manufacturers.

Admittedly, it is unclear how any government bureaucracy can effectively administer such a convoluted system. The General Accounting Office, the investigative arm of the Congress, once descibed the export controls as a "licensing system characterized more as a paper exercise than as an instrument of control." But should you get caught shipping items on the CCL without a valid license, the penalties for violating the export regulations are very real indeed: up to five years in jail, a minimum fine of $50,000, and the loss of all export privileges.

It was this phantasmagoria of licensing that nearly overwhelmed Kachajian's sensibilities. But the more he learned about it, the more he knew he was fighting for a cause that was not only empirically just, but one that was defensible under the law as well. Provisions of the Export Administration Act of 1979 had instructed the Commerce Department to establish a division of foreign availability. If this division were to determine that a product manufactured by a U.S. company was also available to proscribed countries in comparable quality and quantity, it could decontrol that product, and the exporter could ship without a license. If there ever were a case of foreign availability, Kachajian figured, his was it. What he did not figure was that it would take him nearly four more years to get the government to admit it.

Looking back, George Kachajian's plan of attack now seems fairly obvious: compiling the information needed to prove the matter of foreign availability; seeking the testimony of industry colleagues who found themselves in similar straits; enlisting the political support of the New Jersey congressional delegation. But at the time, the process was confusing, unpredictable, and enormously frustrating. When he has the need, Kachajian will arrange on the top of his office conference table, in eight indexed stacks, seemingly every piece of correspondence he has ever sent or received to or from anybody regarding some aspect of his case. If this collection were put under one cover, its more than 1,000 pages would tell a story roughly comparable, in its own way, to the voyage of Ulysses. In Kachajian's Bureaucrats' Baedeker, there are letters addressed to the chief of the policy division of the munitions control directorate, the deputy assistant secretary of commerce for export administration, the deputy to the deputy assistant secretary for export administration, the licensing officer of the electronic instrumentation branch of the office for export administration, the special assistant to the President for public liaison, the U.S. special trade representative, the special assistant to the President for intergovernmental affairs, the director of the office of International Economic Affairs, the director of the office of Investigations of the U.S. International Trade Commission, and the undersecretary of state for political affairs—to name just a few. Then, of course, there were all those phone calls beyond counting and some 30 trips to Washington, which cost him nearly $20,000 in hotel and travel expenses. And throw in maybe $60,000 in legal fees.

But Kachajian's odyssey was much more than inconvenient and expensive. It was also desperate. While the whole involved process—the dead-end leads, the false promises, the interminable discussions—dragged on and on, Kachajian's company was slowly bleeding to death, the victim of Meyer & Burger's persistent dumping. After a decade of growth in sales and profits, STC began to lose money—nearly a million dollars to date. In 1983, Kachajian was forced to lay off almost half his employees, and even as late as July 1986, he had to sell an acre and a quarter of land the company owned across the street just to bolster cash flow. "For six years," he says, "the upside of my business has been survival and the downside was bankruptcy. I never even thought about growth."

What he was thinking about most often was the Pentagon, which had persistently used the national-security issue in connection with the export of his wafering saws. Between 1982 and 1984, Kachajian had half a dozen meetings with various Defense Department officials, including Stephen D. Bryen, the deputy undersecretary for trade security policy. At each meeting, Kachajian would lay out his case, a Swiss competitor driving him out of business with the help of Eastern Bloc profits and counterproductive U.S. government restrictions. And at each meeting, Defense officials would tell him that an export license would jeopardize "national security." Kachajian was prepared to meet their argument head-on. He would first point out that his saws were really "glorified salami slicers" whose technology was so well known that they could hardly be considered a threat to national security. And furthermore that the Eastern Bloc could already get as many saws as it wanted from the Swiss. Then he would go on to say that the United States was in danger of losing its semiconductor manufacturing capability to foreign companies—where there were once five companies manufacturing saws in the States, now only two remained. That, he concluded, was the real threat to national security.

The Pentagon was not impressed, however, and Kachajian finally gave up in disgust. Says Wesley E. Charles, STC's president, who attended one such meeting: "They don't care about anything else, just don't give the Soviet Union anything. They wouldn't sell them a handful of sand. And if they could control that, they would."

Fortunately, as one door closed, another one opened. In the fall of 1984, Kachajian got a call from an investigator in the division of foreign availability, which only then had finally been staffed and funded as Congress had ordered back in 1979. Kachajian, hearing for the first time that a study was being done on internal diameter saws, was ecstatic. "Man, that was exciting," he says. "I had someone who was interested. I mean the guy asked questions for two hours." During the six months that it took the investigator to complete the study, Kachajian peppered the Commerce Department with information and stumped around Washington. "Because of George's involvement," says Toli Welihozkiy of the Office of Foreign Availability (OFA), "everybody became aware that this was an agenda item that needed to be moved quickly." But "quickly" has a special meaning in Washington. It was the spring of 1985, more than five years after the rejection of his first license, that the OFA determined that there was, in fact, foreign availability of wafering saws and that the item should be decontrolled.

With the OFA determination, Kachajian had established a beachhead within the bureaucracy, but the battle had only just begun. Under the procedures of the Export

Administration Act of 1985, OFA sent a draft of its report detailing its findings to the Department of Defense for review and comment, and, not surprisingly, Defense disagreed strongly with the specific findings, with their interpretation, and particularly with the impulse to decontrol the saws. The reaction touched off a fierce interagency squabble within an Administration equally committed to fighting back the Russians and fighting back government restrictions on business.

"Our view," explained deputy undersecretary Bryen, "is that we have very good intelligence, incontrovertible intelligence, that the items . . . will be put to use by the Soviets directly in military. You know, in the '70s we had this great experiment: we were going to trade with the Russians and try to improve relations. But the basic bottom line is that the bulk of this stuff went right to the Soviet military, and it was used by them to modernize their military forces."

Replied Paul Freedenberg, assistant secretary of Commerce for trade administration: "The Commerce Department sees to it that you have to make a balance in these types of cases. You have to decide to balance off immediate national security against the long-term loss of the defense-industrial base, which, in itself, has a national-security implication. If you lose, for example your semiconductor manufacturing capability, ultimately you're undermined, because you no longer have that defense base to build semiconductors. Now we're just talking in this case about one specific company, but it's a microcosm of a danger—not something that's immediate, but certainly something that, long range, could be very deleterious."

Confronted with implacable opposition from Defense once again, Kachajian's spirits wilted, but only for a moment. In September 1985, his forces were joined by fresh troops. Stanley T. Myers, president and chief executive officer of California-based Siltec Corp. and a member of the Semiconductor Technical Advisory Committee (TAC), one of nine such committees advising the Commerce Department in various high-tech areas, wrote a letter about STC's predicament to his fellow members. Myers, whose company uses wafering saws, knew firsthand about Meyer & Burgers's tactics. And in his letter, he carefuly outlined STC's plight and urged the committee to action on STC's and all U.S. manufacturers' behalf, ending with: "Unless we act quickly and decisively, we will face the ironic circumstance of having controlled an American technology into extinction."

The Advisory Committee did act quickly, using its powers under the Export Administration Act to force a decision on Kachajian's case, supposedly within 90 days. Kachajian responded by redoubling his lobbying efforts, enlisting New Jersey's two senators, Bill Bradley and Frank R. Lautenberg, and Representative Marge Roukema to put pressure on Commerce Secretary Malcolm Baldrige and his aides. "I was in the wilderness for four years," Kachajian recalls," and now I had big names."

Commerce was leaning toward a favorable decision, both because of the merits of Kachajian's case and because a positive decision was important to the credibility of the Office of Foreign Availability. Up to that point, the OFA had not produced one single case leading to the decontrol of any item or technology listed on the CCL. The business community was becoming openly critical. So was Congress, which had ordered the establishment of the office six years earlier. But there was still the problem of the Pentagon's unrelenting opposition. Finally, the standoff between an immovable object and an irresistible force had reached an impasse, and the case of George Kachajian and his little company at the end of Spruce Street in Oakland, N.J., was taken all the way to the White House.

On May 15 at 10:30 a.m., Kachajian was attending a meeting of the Semi-conductor Technical Advisory Committee in the huge Commerce building on Pennsylvania Avenue. As Kachajian remembers it, the 20 members of TAC were in their places around a large conference table while assorted guests and observers chatted from their seats around the edges of the room. Suddenly, assistant secretary Freedenberg came in and everyone fell silent as he announced that, earlier that morning, he had recommended to the National Security Council at the White House that wafering saws be decontrolled for reasons of foreign availability. "Everybody turned to look at me," Kachajian says. "Then they got up and started to congratulate me. I just sat there like the cat who swallowed a canary, but I was afraid to smile. I still couldn't believe it. . . . This happened after six years of busting my chops. When I left that place, I thought I was walking on air."

For the next month, Kachajian kept up his pressure with telephone calls, visits, and a letter campaign that involved all 45 employees of his company. Then, in late June, he got a call from a staff person in Representative Roukema's office. The congresswoman had just received a letter, the caller said, from John M. Poindexter, the assistant to the President for national-security affairs, which stated that the council had agreed with the Commerce Department's position that the internal diameter saws should be immediately decontrolled.

Kachajian's first reaction was to shout for joy, but he knew better. Long experience with the government had taught him that seldom were problems that easily dispatched. And he was right. The saws, the letter continued, would, in fact, be decontrolled immediately for sale only to noncommunist countries such as Sweden and South Korea. The letter went on to say that, "Subsequently, we will begin working with our allies to arrive at a mutually agreed upon and orderly removal of COCOM controls on these saws to controlled countries."

In short, Kachajian, who views the reopening of Eastern Bloc markets as the key to the survival of his company, still could not sell his saws to the one market he wanted in the first place. And, at this moment, that is still where he is: one hand clutching the collar of his company to keep it from going under, the other with all its fingers crossed while he waits for COCOM to consider the issue sometime this year.

Yet as painful as it is for him, Kachajian's current limbo is entirely expressive of the lack of consensus that the current Administration brings to the issue of export controls. And it is particularly expressive of a regulatory environment in which the word "resolution" seems oddly to imply a more or less permanent state of contentiousness.

At the Commerce Department, for example, James K. Pont, the director of the OFA, speaks for many of his colleagues when he says that the Kachajian case establishes an important precedent. Claiming that the OFA has finally "found a path through the bureaucratic jungle," he predicts that over the next three to six months there may be several more positive findings.

But at the Defense Department, the feeling is that if there is any kind of precedent involved, it is only of the worst possible kind. Pointing out that the Kachajian case involves "the most sensitive technology that the Bloc can acquire," deputy undersecretary Bryen sees the handling of the issue as an example of "poor leadership" that ignored "the national interest." In his opinion, Commerce should have negotiated aggressively with the Swiss to get them to stop sales in the Eastern Bloc rather than decontrolling U.S. shipments. "There are plenty of things the Swiss want from us," he argues, "and it's outrageous that what we have is the Commerce Department laying back and saying, 'Well, we informally asked them and they said no.' I mean, that's nonsense. They [the Swiss] don't informally ask when they want something."

Bryen also makes it quite clear that George Kachajian's long ordeal is far from over, at least as far as the Pentagon is concerned. "Some of them [the saws] he will be allowed to sell," he says, "but there will be restrictions, at least if we have anything to say about it, or what types of saws he will be able to sell, and for what size ingot, and so on. It won't be any open door."

Thus, while George Kachajian's victory has drawn the attention of the export community, it has not engendered much hope for a significantly more balanced export-control policy. If anything, many of Kachajian's fellow exporters look at his six-year ordeal and wonder if it only confirms their worst fears about controls and the future competitiveness of American manufacturers abroad. Larry L. Hansen, executive vice-president of Varian Associates Inc., manufacturers of such items as ion implanters and chemical vapor deposition reactors, responds to the Kachajian case with a mixture of admiration and horror: "George put in an enormous amount of effort to get that, and that's a very mundane piece of equipment. I mean who in the hell can't make a crystal slicer? For him to have had to put in that much effort, and get that many people involved to get the relief that he got is an incredible thing, absolutely incredible."

"Sometimes there's a little voice inside me," says Kachajian, "that asks: 'What are you so happy about? All this means is that you can do what you should've been able to do all along.' " Maybe.

WORLD INSPECTION OF NUCLEAR FACILITIES

Mr. COCHRAN. Mr. President, I am rising today to bring to the attention of the Senate a report which I am filing for the record describing my observations at the International Atomic Energy Agency meeting in Vienna last August where the report of the Soviet delegation on the Chernobyl accident was received and discussed by delegates from about 47 different countries. There were approximately 500 people—scientists and technicians mainly—who participated in this review of the facts surrounding the accident at Chernobyl. I am filing this report because to me it indicates that we need to assess the need for an international safety regime which would involve minimum standards and

onsite inspection of nuclear powerplants.

Mr. President, the International Atomic Energy Agency, which hosted this meeting in Vienna, was the agency that you may remember immediately after the Chernobyl accident was looked to for information and assistance by the Soviet Union. The Director General, Dr. Hans Blix, and two of his deputies were invited by the Soviets to actually inspect and review the situation at Chernobyl. These were the first visitors from outside the Soviet Union who were permitted at the site.

The International Atomic Energy Agency has as one of its primary functions the monitoring of safeguards to prevent the proliferation of nuclear weapons and the diversion of nuclear fuels for the purpose of weapons construction. It has worked in a very expert way, in a way that has attracted the support of nations all over the world. To me this is the agency that ought to have the additional authority and the additional resources that would enable it to adopt a set of minimum standards for international nuclear powerplant construction operation and to conduct onsite inspections to ensure that those standards are complied with by those who construct nuclear powerplants.

There are hundreds of nuclear powerplants around the world. Two are being constructed by the Soviet Union in Cuba right now. They do not have the same standards we have in the United States to protect safety and health and to ensure the proper operation of the reactors and powerplant. The Nuclear Regulatory Commission in the United States is the Federal agency with responsibility for policing and monitoring these activities. But enforcement of international standards is nonexistent. It has been the practice up until now that each nation which elects to construct and operate nuclear powerplants is responsible for its own regulations and enforcement. But Chernobyl showed us, and the whole world, that, as someone said, "A nuclear accident anywhere is a nuclear accident everywhere." So this is an international concern. We are concerned in the United States about the standards, or the lack of standards, surrounding the construction and operation of the nuclear plants in Cuba. An accident there could very easily jeopardize health and safety here in the United States. We learned in the accident last April at Chernobyl the damage was not just confined to the Soviet Union but extened to other nations.

So that is why, Mr. President, I think this report should be reviewed. It indicates the interest at least of this Senator as chairman of the subcommittee of the Governmental Affairs Committee that has jurisdiction over energy and nuclear proliferation issues that a greater role be assigned to the IAEA. It was under the auspices of the Governmental Affairs Committee that this trip to the meeting in Vienna was undertaken. I hope that the Senate will look at this issue area and adopt legislation, maybe a resolution at the beginning of our session next year, which would put us on record as favoring additional authority for the International Atomic Energy Agency and additional resources to help it do this job.

During the past 12 months, I have chaired five hearings on nonproliferation, nuclear safety, and the IAEA before the Governmental Affairs Subcommittee on Energy, Nuclear Proliferation, and Government Processes. Those hearings have convinced me that if nations are determined to construct nuclear power facilities, it is essential that they promise to abide by minimum international standards enforced by onsite inspections to ensure that those facilities are safe. Although technical and political objections will be heard from some, I am convinced that this is an idea whose time has come, one that merits the support of the U.S. Senate.

I was very encouraged by what I saw and heard in Vienna. The Soviet Union was surprisingly forthcoming in its Chernobyl report, and there was much discussion of improved nuclear safety. The task now is to turn this talk into concrete programs that will work. The visit confirmed my view that the IAEA is the organization to serve the nations in meeting this challenge.

Mr. President, I ask unanimous consent that my report on the visit to the International Atomic Energy Agency by printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT OF THE VISIT OF SENATOR THAD COCHRAN TO THE INTERNATIONAL ATOMIC ENERGY AGENCY, AUGUST 24-29, 1986

PURPOSE

For the past thirty years, a major international effort has been made to protect materials at nuclear power reactors from diversion for the purpose of making explosives. The International Atomic Energy Agency (IAEA) has been effective in enforcing nonproliferation safeguards to give the world this protection.

The Chernobyl accident has made nuclear safety another international concern. Because of its nonproliferation experience, observers generally agree that IAEA is the logical body to develop an improved international nuclear safety regime.

The main purpose of the visit reported here was to discuss with IAEA officials the existing international nonproliferation effort and the evolving international nuclear safety regime. Another objective was to attend sessions of the Post Accident Review Meeting being held in Vienna the week of the visit.

AN OVERVIEW OF THE INTERNATIONAL ATOMIC ENERGY AGENCY

IAEA, which now has 113 Member States, was established in 1957 as an outgrowth of President Eisenhower's "Atoms for Peace" initiative. It assists nations in the peaceful development of nuclear energy throughout the world. It advises governments on their nuclear programs, prepares studies of the market for nuclear plants and equipment, arranges the loan of equipment, finances research, and acts as an intermediary in arranging the supply of nuclear materials. It also advises Member States on the physical protection of such matter, and applies safeguards to materials at nuclear reactors to ensure that they are used only for their intended peaceful purposes. It organizes conferences and training courses, awards fellowships for advanced study, issues technical publications, establishes safety standards for all types of nuclear activity, and operates three laboratories.

The work of the Agency is directed by a General Conference, representing the entire membership, and by a 35-member Board of Governors. The General Conference is convened once a year for debate on the Agency's policies, programs, and budget. As the principal policy-making organ, the Board of Governors considers all major questions, including applications for membership and the Agency's program of work. Under its own authority, the Board approves all safeguards agreements, important projects, and safety standards. The Agency's annual budget requires approval by the Board before submission to the General Conference.

The Board holds two main meetings each year in February and June. it also meets immediately before and after regular sessions of the General Conference, usually held in September. The General Conference elects 25 of the Board's 35 members in accordance with rules prescribing a wide geographical distribution (11 of these seats fall vacant each year). The remainder are designated by the Board itself from among Member States which are advanced in nuclear technology.

Member States make assessed contributions to finance the regular budget. They may, in addition, make voluntary contributions to finance the technical assistance program.

The Secretariat is headed by a Director General responsible for overall administration and program implementation. He is assisted by five Deputy Directors General who head five Departments (Administration, Research and Isotopes, Safeguards, Technical Cooperation, and Nuclear Energy and Safety). The Director General consults on scientific and technical matters with a Scientific Advisory Committee, and a Standing Advisory Group on Safeguards Implementation advises him on technical aspects of safeguards.

MEETING WITH DIRECTOR GENERAL HANS BLIX

The Director General expressed pleasure for my visit, especially since it coincided with the week-long Chernobyl assessment. The accident and its consequences continue to attract enormous international interest and to influence public opinion on nuclear power in several countries. While Dr. Blix is convinced that nuclear power, which provides 15% of the world's electricity, will remain an important energy source, there is no doubt that in some nations public confidence has been seriously affected by Chernobyl. To restore this confidence will re-

quire prolonged safe operation of nuclear power plants worldwide as well as measures to minimize the health and environmental consequences of any future accidents. Dr. Blix said that over the following months IAEA would host other important international meetings to consider suggestions of ways to achieve greater safety.

The Director General noted that IAEA responded to Chernobyl in two ways: it was a center for information and analysis regarding the accident, and it sought to encourage the application and improvement of essential international response measures.

A week after the accident, he and two other Agency officials were invited to the Soviet Union and viewed the reactor destruction from the air. During the visit Soviet authorities declared their willingness to provide information to an IAEA post-accident symposium. In May and June, the Board of Governors and the International Nuclear Safety Advisory Group considered the accident's implications for the Agency, deciding upon a number of activities to be undertaken in 1986 and agreeing to consider an expanded nuclear safety program for 1987 and 1988. In July and August governmental experts met in Vienna and drafted two conventions on early notification and emergency assistance.

The Director General anticipated that the Post Accident Review Meeting would result in an authoritative factual base for use in discussions of future actions to be taken. After the review, the International Nuclear Safety Advisory Group and other experts would draft a report for submission to the Board of Governors, which would then decide what further Agency measures might be desirable.

The Director General noted that there is general agreement that nuclear safety is primarily the task of individual nations, since they possess both governmental power and direct responsibility to citizens. International measures can never be a substitute for essential national regulations. If governments and public opinion agree, however that certain safety standards should be implemented everywhere—and this might be a result of Chernobyl—more international cooperation will be indispensable.

After the meeting with the Director General I toured facilities at the Vienna International Center with Mr. Hans-Friedrich Meyer of the Division of Public Information. I also met with Deputy Director General Maurizio Zifferero for a briefing on the work of the Department of Research and Isotopes.

MEETING WITH DEPUTY DIRECTOR GENERAL NELSON SIEVERING

Mr. Sievering, an American with extensive prior U.S. governmental experience directs the IAEA Department of Administration in a complex institutional environment.

The Agency shares many of the organizational problems of other international bodies. The majority of its members are developing countries, and some resent technical programs, including plant safety initiatives, which they perceive as favoring richer nations. In the past, some highly political proposals have threatened to politicize IAEA and to divert attention and resources from the Agency's vital technical mission. The civil servants from various nations who come to work in Vienna often bring differing administrative perspectives to their new assignments.

Further complicating the administrative task is the fact that IAEA has operated on a "zero growth" budget since 1984. Tight management has preserved essential services, but there is little surplus on which the agency can draw as it attempts to improve nonproliferation safeguards on the growing number of nuclear facilities worldwide.

Mr. Sievering emphasized that IAEA needs more resources if there is to be a substantial increase in nuclear safety responsibilities. The quality and quantity of services will depend largely upon whether the United States, the Soviet Union, and other industrialized countries provide the necessary additional funds and political support to enable the Agency to keep pace with world nuclear development.

MEETING WITH DIRECTOR OF NUCLEAR SAFETY MORRIS ROSEN

Dr. Rosen was one of the IAEA officials invited to visit Chernobyl after the accident, and he presented a clear and detailed account of the circumstances surrounding the incident. He also reviewed the progress of the ongoing accident assessment sessions.

He noted that the principal IAEA nuclear safety programs are directed toward establishing safety standards, giving assistance to Member States, and fostering the exchange of information. The current Agency role is principally advisory, and each country is ultimately responsible for its own nuclear safety activities.

Guidelines for nuclear safety have been published since 1974. These are composed of codes of practice and safety guides developed for the areas of governmental organization, siting, design, operation, and quality assurance. Although voluntary, they are used widely by countries as a basis for developing their domestic safety regulations.

IAEA maintains a voluntary Incident Reporting System for the collection and examination of significant safety-related events. The United States participates in this system, but until Chernobyl the Soviet Union did not. The system is especially important to developing countries, who learn from the experiences of advanced nuclear nations.

IAEA has in place a voluntary program for reviewing nuclear power plant safety. Up to the present, neither of the superpowers has taken advantage of this Operational Safety Review Team program, in which Agency experts and outside consultants spend two to three weeks consulting with operators at a nuclear facility at the request of the host country. It is anticipated that by the end of 1986, reviews will have been held in Brazil, Finland, France, Mexico, the Netherlands, Pakistan, the Philippines, South Korea, Sweden, West Germany, and Yugoslavia. Dr. Rosen noted with pleasure that Czechoslovakia has agreed to receive a safety review team in the very near future, the first Eastern bloc nation to do so.

With enhanced resources over the near term, about 20 reviews per year will be feasible. The existing safety operation has a staff of approximately 50 professionals. Personnel will be increased somewhat as the result of Chernobyl, with $2 million more for safety activities in the 1987 budget. Major portions of this increase will be devoted to increased safety team inspections, creation of an IAEA emergency control center in 1987, and procurement of equipment for measuring radioactive contaminants.

Over the longer term, several safety developments are probable, including an improved reporting system for the feedback of operating experience; broader coverage and greater impact for the Operational Safety Review Team program; examination of existing safety standards with a view to implementing lessons learned from Chernobyl and other accidents; and consideration of the feasibility of transforming some safety standards into minimum binding rules which countries would commit themselves to follow.

At the conclusion of our conversation, Dr. Rosen introduced me to a panel of specialists with experience on Operational Safety Review Teams. The panel, composed of Agency personnel from Canada, Finland, the United States, and West Germany, discussed various aspects of a typical team operation and answered questions concerning the scope and effectiveness of the program.

MEETING WITH DEPUTY DIRECTOR GENERAL PETER TEMPUS

Dr. Tempus reported that his Department of Safeguards is a major component of the Agency's activities and accounts for over 25 percent of the budget. It is the product of a new form of international collaboration, combining simple techniques of nuclear materials accountancy with physical surveillance measures. The objective is to ensure that nuclear materials and equipment intended for peaceful use are not diverted to military purposes. There are 180 safeguards inspectors organized into three divisions based upon blocs of countries.

The basic nonproliferation approach has been to make nuclear material and technology available to countries in return for nonproliferation commitments which are verified through safeguards inspections. Safeguards are applied in such a way that industrial secrets are protected, and there is minimum intrusion into the operation of plants.

Safeguards are applied to facilities and materials in individual Member States in accordance with the provisions of bilateral or multilateral agreements or those of the Tlatelolco Treaty and of the Treaty on the Non-Proliferation of Nuclear Weapons. The latter treaty, which came into force in 1970, requires non-nuclear-weapon signatories to conclude safeguards agreements with the Agency covering nuclear materials in all their peaceful nuclear activities. The Treaty currently includes 134 nations.

Dr. Tempus believes that safeguards are effective and afford countries the opportunity to show they are living up to their nonproliferation commitments. Since the most difficult part of the fuel cycle to safeguard is reprocessing, especially close surveillance is required at reprocessing facilities. Another important question requiring attention and clarification is the matter of Agency liability for any damage to a plant during a safeguards inspection.

The Deputy Director General suggested that the evolution of safeguards will depend upon the rate of growth of nuclear power, future developments in the fuel cycle, and changes in safeguards concepts and approaches. The major refinements are expected to include greater standardization of safeguards procedures, the strengthening of safeguards requirements in connection with exports of nuclear material, and improved cost-effectiveness.

Following this visit Dr. Tempus, I met with staff members of the Department of Safeguards to discuss fundamental objectives and approaches used in safeguards inspections. The personnel were from Britain, Canada, East Germany, Finland, Nigeria, and the United States.

OTHER MEETINGS

The U.S. Mission to the United Nations System Organizations in Vienna (UNVIE),

headed by Ambassador Bruce Chapman, provides permanent U.S. representation to the U.N. organizations located in the Austrian capital. At two luncheons hosted by Ambassador Chapman, I heard presentations from representatives of the U.N. Industrial Development Organization, devoted to promotion of industrialization in the developing countries; the U.N. Relief and Works Agency, charged since 1949 with direct assistance to Palestinian refugees; the U.N. Fund for Drug Abuse Control, which receives voluntary contributions to help furnish assistance to national and international agencies in the field of drug control, the Division of Narcotic Drugs, the staff arm of the U.N. Commission on Narcotic Drugs; and the U.N. Center for Social Development and Humanitarian Affairs, which provides limited technical assistance to developing countries in such fields as women's affairs, aging, youth, and crime prevention.

Before leaving Vienna, I had a very informative meeting on U.S.-Austrian relations at the U.S. Embassy with Ambassador Ronald Lauder. On the morning of my departure, I was briefed by Ambassador Richard Kennedy and members of the U.S. delegation to the Post Accident Review Meeting on the outlook for the final plenary session scheduled for later that day, and I was given their assessment of the presentation the Soviet delegation had made to all the delegates.

CONCLUSION

The Chernobyl accident has increased public uncertainty concerning the safety of nuclear power. Each country must decide for itself whether it will develop nuclear energy; if it chooses to do so, it has an obligation to assure the entire international community that its power plants are operating safely. There is no better method for such assurance than creation of an international nuclear safety regime which includes inspections of all civilian nuclear power plants worldwide.

This trip confirmed that the International Atomic Energy Agency is the organization best suited to lead in the building of such a regime. It has for thirty years been the mainstay in the international nonproliferation effort, and it should be the forum for the consideration and implementation of improved nuclear safety standards and policies.

In order to serve this need, the Agency merits the continued and increasing moral and financial support of the nuclear nations, including the United States. The valuable insights gained and the views exchanged on this trip should enhance within our Government the cooperation so necessary to insure that the IAEA receives that support.

EXTENSION OF ROUTINE MORNING BUSINESS

Mr. MELCHER. Mr. President, it is my understanding that morning business is extended until 10 o'clock; is that correct?

The PRESIDING OFFICER. The Senator from Montana is correct.

Mr. MELCHER. Mr. President, I have a short statement but I would like to ask unanimous consent that morning business be extended 2 minutes beyond 10 o'clock.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

FARM INCOME TAX AVERAGING

Mr. MELCHER. Mr. President, a dozen or more of us in a bipartisan effort are sponsoring an amendment to the tax bill that earlier passed this Congress. It involves income tax averaging for farmers. That is the amendment. The reason we attempt to do that and catch up with the tax bill that has just passed is the obvious need of this provision in the current code which would be wiped out under the tax reform bill. The reason that it is so important is this, Mr. President. Because of the changes and the vagaries of nature, whether it is drought or flood or hail or fire, the incomes of farmers and ranchers vary considerably. More correctly put, their losses in a given year vary considerably.

□ 1000

This year we have had the drought in the South, in the Southeast. We have had the flooding situation in over half of the country, in various States. Even our own State of Montana was affected by some very serious flooding in several of our counties this fall, which caused an unusual amount of loss at an unusual time of year. Fire and hail are easily understood, and that has happened in various localities throughout the country every year.

So the fact is that income averaging for farmers is extremely important. We thought we would offer this tax amendment to the technical corrections bill that has been at the desk whenever it was called up. Last night, in seeking to get unanimous consent to bring it before the Senate, the chairman of the Senate Finance Committee, the Senator from Oregon [Mr. PACKWOOD], very correctly and very considerately advised the Senate that he would ask for such unanimous consent. After having given that notice for at least an hour or two, he made that unanimous-consent request, making an order that there be a half-hour taken, equally divided, for consideration of this particular amendment.

At that time, the Senator from Iowa [Mr. HARKIN] brought forward his proposal as an amendment to be offered to this technical corrections bill, and that delayed the process. That was eventually worked out, to give the Senator from Iowa [Mr. HARKIN] a separate time for him to bring up his provision on Nicaragua.

So, at the last minute, after 3 or 4 hours of floating the unanimous-consent request by Senators, there was an objection from our side to my offering, on behalf of myself and the numerous cosponsors, the income averaging.

I do not want to further delay the process, and that is why I earlier announced that I would offer this amendment to some other piece of legislation before we adjourn. I only take this time now to describe why we think it is so important to offer that income-averaging amendment and let the Senate vote on it. It has been voted on before, and it carried before, and we would like to see if it will carry again, and the House might accept it—but not on the technical corrections bill.

Mr. PACKWOOD. Mr. President, I thank the Senator from Montana. He has correctly and accurately described what happened last night. We were within an iota of having an agreement.

As he is aware, the longer we stay and the more people are here and the later it gets at night, the more people want to add other things. I had two phone messages in my pocket last night, beyond the Senators on the floor, and they have amendments they want to offer if the Senator from Montana is going to offer his amendment. If he can offer his and they cannot offer theirs, they will object, and there would be no technical corrections tag bill on the tax bill.

There are about 30 States affected which have perfectly legitimate provisions. The Senator from Montana is very gracious to withdraw his amendment so that we can go ahead. If others will be as charitable as he is, we can go ahead with the technical corrections part.

Mr. MELCHER. I thank the Senator from Oregon [Mr. PACKWOOD] for his considerateness and graciousness and for his valiant efforts to bring the technical corrections bill to the floor and get it passed. I hope, as he does, that that can be done very promptly.

Mr. PACKWOOD. I thank my good friend.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. MATHIAS). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCURRENT RESOLUTION RELATING TO TAX REFORM ACT OF 1986—CORRECTION OF ENROLLMENT

Mr. PACKWOOD. Mr. President, I am going to propose a unanimous-consent request. It is a package unanimous-consent request relating to House Concurrent Resolution 395, otherwise referred to as the concurrent resolution which is the tag bill

following the tax bill which has numerous corrections in it. I will read it.

I ask unanimous consent that when the Senate turns to the consideration of House Concurrent Resolution 395, it be considered under the following agreement:

That the only amendment in order shall be an amendment to be offered by Senator PACKWOOD, limited to 20 minutes, to be equally divided, in the usual form, and that following the conclusion or yielding back of time, the amendment be considered agreed to.

I further ask unanimous consent that following the disposition of the Packwood amendment, the Senate proceed to final passage of House Concurrent Resolution 395, without any intervening action, motion, or debate.

I ask unanimous consent that no motions to commit with or without instructions be in order.

Finally, I ask unanimous consent that the Senate proceed to the consideration of House Concurrent Resolution 395.

Mr. BYRD. Mr. President, reserving the right to object, do any of my colleagues wish to reserve the right to object?

Mr. HARKIN. Mr. President, reserving the right to object——

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to object, I just want to be assured that the Senator from Ohio will have 5 minutes to discuss the matter.

Mr. PACKWOOD. I will be happy to assure that. If it is not available from the managers on the other side, the Senator may have it from my time.

Mr. METZENBAUM. I thank the Senator.

The PRESIDING OFFICER. Is there objection to the request?

Mr. BYRD. Mr. President, reserving the right to object, will the Chair indulge me?

Mr. President, I withdraw my reservation.

The PRESIDING OFFICER. Without objection, the unanimous-consent request is agreed to.

The concurrent resolution will be stated by title.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 395) to correct technical errors in the enrollment of H.R. 3838.

AMENDMENT NO. 3467

(Purpose: Making further technical corrections)

Mr. PACKWOOD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, strike lines 9 through 18.

On page 6, strike lines 1 through 7, and insert: comma and "and", and add at the end thereof the following new subparagraph:

(D) such facility is to serve Haverhill, Massachusetts.

On page 10, line 9, strike "1983" and insert "1993".

On page 13, line 20, strike "or (C)".

On page 14, line 10, strike "Samuel A. Hardage Enterprises" and insert "Interests of Samuel A. Hardage".

On page 16, between lines 16 and 17, insert:

(E) Subsections (c) and (d) of section 49 of the Internal Revenue Code of 1986 shall not apply to property described in section 204(a)(4) of this Act.

On page 19, line 10, insert "Pittsburgh," after "in".

On page 19, between lines 17 and 18, insert:

(NN) Old Louisville Trust Project, Louisville, Kentucky.

(OO) Stewarts Rehabilitation Project, Louisville, Kentucky.

(PP) Bernheim Officenter, Louisville, Kentucky.

On page 25, after line 24, insert the following flush sentence:

In no event shall sections 382 (a) and (b) of such Code (as so in effect) apply to any ownership change described in subparagraph (A).

On page 27, line 9, strike "stock in such corporation" and insert "such stock".

On page 27, line 20, after "1989" insert ", without regard to whether such corporation is completely liquidated".

On page 36, strike lines 16 through 18.

On page 38, beginning with line 21, strike through page 39, line 19, and insert :

(116) On page 322, in subsection (d) (relating to treatment of certain market discount bonds)—

(A) strike "28 percent" in paragraph (1) and insert "32 percent", and

(B) strike paragraph (2) and insert:

(2) QUALIFIED LIFE INSURANCE COMPANY.—for purposes of paragraph (1), the term "qualified life insurance company" means any life insurance company subject to tax under part I of subchapter L of chapter 1 of the Internal Revenue Code of 1986.

On page 40, between lines 21 and 22, insert:

(c) REVENUE LOSS LIMITED.—The decrease in the amount of Federal revenue by reason of the amendment made by his section shall not exceed $300,000 per year.

On page 41, strike lines 1 through 4, and insert:

(B) in subparagraph (A)—

(i) strike out "a deferred compensation plan" and insert "employees on August 16, 1986,", and

(ii) insert "maintaining a deferred compensation plan" after "Alabama", and

On page 41, line 7, insert "to" before "individuals".

On page 47, line 8, strike "(b)(2)(D)" and insert "(b)(2)(B)".

On page 47, line 9, strike "884(b)(2)" and insert "884(d)(2)".

On page 52, strike lines 4 through 18.

On page 60, line 25, before "projects" insert "the construction of such diagnostic and treatment center, or to finance construction and renovation".

On page 62, beginning with line 21, strike through page 63, line 25.

On page 66, line 17 strike "subparagraphs (A) and (B)" and insert "subparagraphs (A), (B), and (C)".

On page 71, strike lines 4 through 7, and insert:

(243) On page 76, in paragraph (11) (relating to certain aircraft)—

(A) strike "aircraft" each place it appears in the text and heading and insert "airplane",

(B) strike "Kansas, Florida, Georgia, or Texas" in subparagraph (A) and insert "the United States";

(C) strike ", the date of conference committee action)" in subparagraph (B); and

(D) strike subparagraph (C) and insert:

(C) The aircraft is—

(i) purchased on or after August 16, 1986, and before January 1, 1987, or

(ii) is subject to a binding contract which was in effect on August 16, 1986, or entered into on or after August 16, 1986, and before January 1, 1987, and

is delivered and placed in service pursuant to such purchase or contract before July 1, 1987.

Any airplane which is one of 7 airplanes with respect to which an airline signed an airplane purchase agreement on January 20, 1986 (with respect to which the financing contingency was removed no later than February 7, 1986), the estimated cost of which is $2,900,000, and which was delivered before May 23, 1986, and placed in service by May 27, 1986, shall be treated as described in this paragraph.

On page 72, line 4, after "Industries" insert "after December 31, 1988".

On page 72, line 8, strike "paragraph" and insert "paragraphs".

On page 73, after line 25, insert the following:

(39) The amendments made by section 201 shall not apply to any facility for the manufacture of an improved particle board if a binding contract to purchase such equipment was executed March 3, 1986, such equipment will be placed in service by January 1, 1988, and such facility is located in or near Moncure, North Carolina.

On page 74, line 16, insert "(including repairs and maintenance)" before "of".

On page 74, line 20, strike "during 1986" and insert "(and allowable as a deduction) during 1986 and shall be treated as qualified rehabilitation expenditures made during 1986".

On page 76, between lines 17 and 18, insert:

(W) South Carolina Family Farm Development Authority.

(X) Clemson University Continuing Education and the Component Housing Project.

On page 78, strike lines 1 through 16, and insert after "1986" in line 17 "and the amendments made by section 1301 of the Tax Reform Act of 1986".

On page 80, line 12, strike "each place it appears" and insert "the second place it appears".

On page 80, between lines 19 and 20, insert the following:

( ) On page 31, in paragraph (4) of subsection (b) (relating to miscellaneous itemized deductions)—

(A) strike "deduction" and and insert the "deductions", and

(B) strike the comma at the end and insert "and section 642(c) (relating to deduction for amounts said or permanently set aside for a charitable purpose),".

( ) On page 32, in the heading of subsection (e), strike "Determination of Adjusted Gross Income in Case of" and insert "Special Rules for".

( ) On page 32, after the period at the end of subsection (e) and before the close quotation marks, insert "For purposes of

this section and section 56(b)(1), the deductions allowable to an estate or trust under sections 651 and 661 shall not be treated as itemized deductions.".

( ) On page 56, in subsection (b) (relating to system used for purposes of earnings and profits)—

(A) strike "Paragraph (3)" and insert:

(1) IN GENERAL.—Paragraph (3), and

(B) insert at the end of the following new paragraph:

(2) CONFORMING AMENDMENT.—Section 312(k)(4) is amended—

(A) by striking out "paragraphs (1) and (3)" and inserting in lieu thereof "paragraph (1)", and

(B) by striking out the last sentence.

( ) On page 61, immediately before section 202 (relating to expensing of depreciable assets), insert the following new paragraph:

(15) Subparagraph (D) of section 46(e)(4) is amended by striking out "paragraph (8) and (9) of section 168(j)" and inserting in lieu thereof "paragraphs (5) and (6) of section 168(h)".

( ) On page 62, the last line, insert after the end period the following new sentence: "No election may be made under this subparagraph with respect to property to which section 168 of the Internal Revenue Code of 1986 does not apply by reason of section 168(f)(5) of such Code."

( ) On page 65, at the end of subsection (d) (relating to mid-quarter convention), insert: "The preceding sentence shall only apply to property which would be taken into account if such amendments did apply."

( ) On page 67, in subparagraph (F), insert "either" after "if".

( ) On page 68, in the 21st line, strike "1993" and insert "1998".

( ) On page 81, in paragraph (29)—

(A) strike "January 18" in subparagraph (A) and insert "January 25", and

(B) strike "law suits filed on June 22, 1984, and November 21, 1985" in subparagraph (B) and insert "a law suit filed on October 25, 1985".

( ) On page 84, strike subparagraph (J) and insert the following:

(J) a 25.85 megowatt alternative energy facility located in Deblois, Maine, with respect to which certification by the Federal Energy Regulatory Commission was made on April 3, 1986, and".

( ) On page 84, immediately before subsection (b), insert the following new paragraph:

(40) The amendments made in section 201 shall not apply to trucks, tractor units, and trailers which a privately held truck leasing company headquartered in Des Moines, Iowa, contracted to purchase in September 1985 but only to the extent the aggregate reduction in Federal tax liability by reason of the application of this subparagraph does not exceed $8,500,000.

( ) On page 85, the first 12 lines—

(A) insert "and" at the end of subparagraph (B),

(B) strike subparagraph (C), and

(C) redesignate subparagraph (D) as subparagraph (C).

( ) On page 108, in subparagraph (B) of paragraph (3) (relating to certain additional rehabilitations), strike "Pontabla" and insert "Pontalba".

( ) On page 110, in subparagraph (T) of paragraph (4), strike "Louisville" and insert "Covington".

( ) On page 124, in paragraph (1) of subsection (k) (relating to application of at-risk rules)—

(A) strike "subparagraph (D)(iv)(I)" and insert "subparagraphs (D)(11)(II) and (D)(iv)(I)", and

(B) strike "qualified basis" and insert "eligible basis".

( ) On page 125, the 5th line, before the end period insert: ", except that this subparagraph shall not apply in the case of a Federally-assisted building described in subsection (d)(6)(B) if—

"(i) a security interest in such building is not permitted by a Government agency holding or insuring the mortgage secured by such building, and

"(ii) the proceeds from the financing (if any) are applied to acquire or improve such building."

( ) On page 127, in the third line, strike the period and insert ", and except for any building described in paragraph (2)(B), subsection (h)(4) shall not apply to any building placed in service after 1989.".

( ) On page 141, immediately before subsection (c) (relating to effective date) insert:

(14) Subparagraph (B) of section 172(d)(4) is amended by striking out ", (2)(B),".

( ) On page 167, between the fourth and fifth lines, insert:

(4) SPECIAL RULE FOR CERTAIN RURAL HOUSING.—In the case of any interest in a qualified low-income housing project which—

(A) is assisted under section 515 of the Housing Act of 1949 (relating to the Farmers Home Administration Program), and

(B) is located in a town with a population of less than 10,000 and which is not part of a metropolitan statistical area,

paragraph (1)(B) shall be applied by substituting "35 percent" for "50 percent" and subsection (b)(1) shall be applied by substituting "5th taxable year" for "6th taxable year". The preceding sentence shall not apply to any interest unless, on December 31, 1986, at least one-half of the number of payments required with respect to such interest remain to be paid.

( ) On page 177, the 11th line, insert "amount or" before "payment".

( ) On page 177, strike the last 4 lines, and insert:

"(B) except as provided in regulations, the only earnings and profits of such corporation were earnings and profits—

"(i) accumulated by such corporation (or any predecessor corporation) during such period, and

"(ii) not attributable to distributions from any other corporation unless the stock of such other corporation (or of any predecessor corporation) was held by such corporation during the entire period such other corporation (or predecessor corporation) was in existence, and

( ) On page 190, lines 8 and 9, strike "deposits described in subclause (II)" and insert "the amount of deposits in the new loss corporation immediately after the change".

( ) On page 190, in paragraph (6) (relating to special rule for insolvency transactions), strike "be the value of the new loss corporation immediately after the ownership change" and insert "shall reflect the increase (if any) in value of the old loss corporation resulting from any surrender or cancellation of creditor's claims in the transaction".

( ) On page 193, in the sentence immediately preceding paragraph (5) (relating to bankruptcy proceedings) strike "with respect to domestic building and loan transactions" and insert "with respect to transactions (including firm commitment underwritings) by institutions described in section 591 of such Code".

( ) On page 201, immediately before section 632 (relating to treatment of C corporations electing subchapter S status), insert the following new paragraph:

(18) Section 334(b)(2) is amended by striking out "332(c)" each place it appears in the text and heading and inserting in lieu thereof "337(b)(1)".

( ) On page 203, immediately before subsection (b) (relating to treatment of distributions), strike the end quotation marks and insert the following new paragraph:

"(5) TREATMENT OF TRANSFER OF ASSETS FROM C CORPORATION TO S CORPORATION.—

"(A) IN GENERAL.—Except to the extent provided in regulations, if—

"(i) an S corporation acquires any assets from a C corporation, and

"(ii) the S corporation's basis in such assets is determined (in whole or in part) by reference to the basis in the hands of the C corporation,

then this section (other than subsection (c)(1)) shall apply to any recognized built-in gain on the disposition of any such asset.

"(B) SPECIAL RULES.—For purposes of subparagraph (A)—

"(i) paragraphs (1), (2), and (3) shall be applied by substituting the taxable year in which the assets were acquired for the taxable year referred to in such paragraphs, and

"(ii) the net unrealized build-in gain shall be computed by taking into account only such assets."

( ) On page 206, in paragraph (8), strike "becomes an S corporation for a taxable year beginning" and insert "makes an election to be an S corporation under section 1362 of such Code".

( ) On page 206, redesignate subsections (d) and (e) as subsections (e) and (f), respectively.

( ) On page 208, redesignate subsection (f) as subsection (g).

( ) On page 225, the 10th line, strike "contractual option" and insert "contractural obligation".

( ) On page 253, strike subparagraph (E) (relating to standard deduction not allowed) and insert:

"(E) STANDARD DEDUCTION AND PERSONAL EXEMPTION NOT ALLOWED.—The standard deduction under section 63(c) and the deduction for personal exemptions under section 151 shall not be allowed.

( ) On page 264, on paragraph (6)(A) (relating to appreciated property charitable deduction) insert "or 642(c)" after "section 170".

( ) On page 268, the 5th line from the bottom, strike the end quotation marks.

( ) On page 268, between the 4th and 5th lines from the bottom, insert:

"(1) TAXABLE INCOME FOR CERTAIN ORGANIZATIONS.—If the tax imposed by chapter 1 on any organization is determined by reference to an amount other than taxable income, such amount shall be treated as the taxable income of such organization for purposes of this part."

( ) On page 269, fifth line from the bottom, strike "earnings and profits" and insert "current earnings".

( ) On page 273, before the last line, insert:

(L) Section 511 is amended by striking out subsection (d).

( ) On page 295, the 7th line from the bottom, strike "Section 267(a)" and insert "Section 267(a)(2)."

( ) On page 313, in paragraph (3)(C) (relating to limitation on issuer), strike "qualified" the second place it appears.

( ) On page 315, strike subparagraph (P) and insert:

(P) Homewood, Alabama, the Club Apartments.

( ) On page 321, the 6th line, strike "June 20, 1986" and insert "the date of the enactment of this Act".

( ) On page 349, in clause (iv) of paragraph (4)(B) (relating to information required to be supplied), strike "with or within which the taxable year ends" and insert "in which the taxable year begins".

( ) On page 350, in subparagraph (C) of paragraph (2) (relating to special rules for applying section 72), strike "with or within which the taxable year ends" and insert "in which the taxable year begins".

( ) On page 383, the 9th line from the bottom, strike "414(f)(1)(B)" and insert "3(37)(A)(ii)".

( ) On page 384, the first line, strike "Section 202(B)(i)" and insert "Section 202(a)(1)(B)(i)".

( ) On page 398, in section 4979(c) (defining excess contributions), strike "408(k)(8)(B)" and insert "408(k)(6)(C)".

( ) On page 419, line 11, strike "at the end thereof" and insert "after section 4981".

( ) On page 419, line 13, strike "SEC. 4981." and insert "SEC. 4981A.".

( ) On page 421, line 18, strike "at the end thereof" and insert "after the item relating to section 4981".

( ) On page 421, in the matter following line 18, strike "Sec. 4981." and insert "Sec. 4981A.".

( ) On page 429, the 9th line, strike "(E)" and insert "D".

( ) On page 448, immediately before part II (relating to other provisions), insert:

(6) CERTAIN PLANS MAINTAINED BY EDUCATIONAL INSTITUTIONS.—If an educational organization described in section 170(b)(1)(A)(ii) of the Internal Revenue Code of 1986 makes an election under this paragraph with respect to a plan described in section 125(c)(2)(C) of such Code, the amendments made by this section shall apply with respect to such plan for plan years beginning after the date of the enactment of this Act.

( ) On page 451, in section 134(b)(1) of the Internal Revenue Code of 1986, as added by section 1168(a) of the Act, insert "(other than personal use of a vehicle)" after "in-kind benefit".

( ) On page 453, in paragraph (1) of section 2057(b) (relating to qualified sale), strike "is".

( ) On page 455, in subclause (II) of paragraph (2)(B)(i) (relating to effective date for subsection (b)), strike "July 18" and insert "May 23".

( ) On page 463, in clause (ii) of subparagraph (I) (relating to transitional rule), strike "1986" and insert "1987".

( ) On page 484, immediately above subsection (d) (relating to effective dates), insert the following new subparagraph:

(D) Paragraph (1) of section 2195(b) (relating to bank deposits and certain other debt obligations) is amended by striking out "section 861(c), if any interest thereon would be treated by reason of section 861(a)(1)(A) as income from sources without the United States" and inserting in lieu thereof "section 871(i)(3), if any interest thereon would not be subject to tax by reason of section 871(i)(2)".

( ) On page 488, in subparagraph (C) (relating to special rule), strike "to interest expenses paid or accrued".

( ) On page 511, in paragraph (2) of subsection (e) (relating to certain basis, etc. rules made applicable), strike "who was not" and insert "who was".

( ) On page 517, in the matter added by subsection (b) (relating to coordination of section 1246 with section 1248), strike "section 1248(g)(3)" and insert "section 1248(g)(2)".

( ) On page 543, immediately before part III (relating to cover of income taxes), insert the following new paragraph:

(9) Section 1444 is amended by striking out "(as modified by section 934A)".

( ) On page 546, insert immediately after subsection (e) the following new subsection:

(f) EXEMPTION FROM WITHHOLDING.—Notwithstanding subsections (b) and (c), the modification of section 884 of the Internal Revenue Code of 1986 by reason of the amendment to section 881 of such Code by section 1273(b)(1) of this Act shall apply to taxable years beginning after December 31, 1986.

( ) On page 606, in paragraph (2) of subsection (b) (relating to section 1301(f)), insert "with respect to non-issued bond amounts elected" after "issued".

( ) On page 610, immediately after subparagraph (F), insert the following new subparagraph:

(G) Except as provided in the last sentence of subsection (c)(2) of this section, the requirements of section 145(b) (relating to $150,000,000. limitation on bonds other than hospital bonds).

( ) On page 615, in line 8, insert "and as having a carryforward purpose described in section 146(f)(5) of such Code," immediately before "but".

( ) On page 653, in clause (ii) of paragraph (33)(A) (relating to application of $150,000,000 limitation for certain qualified 501(c)(3) bonds)—

(A) strike "on" in subclause (II) thereof and insert "dated", and

(B) insert "dated on December 1, 1985" after "(Series 1985 A and 1985 B)" in subclause (III) thereof.

( ) On page 656, the last line, strike "$80,000,000" and insert "$400,000,000".

( ) On page 658, in the second item in the table in paragraph (44) (relating to New Mexico Hospital pool bonds), strike "Bonds Pool" and insert "Equipment Loan Council".

( ) On page 662, strike the end quotation marks at the end of section 673 (relating to reversionary interests).

( ) On page 662, immediately before section 1402(b) (relating to conforming amendments), insert:

"(c) SPECIAL RULE FOR DETERMINING VALUE OF REVERSIONARY INTEREST.—For purposes of subsection (a), the value of the grantor's reversionary interest shall be determined by assuming the maximum exercise of discretion by the fiduciary in favor of the grantor."

( ) On page 682, the fifth line, insert "(or revocable trust)" after "will".

( ) On pages 723 and 724, strike section 1608 and conform the table of contents.

( ) On page 744, in the matter inserted by subparagraph (G)—

(A) strike "Registry of Deeds" each place it appears and insert "Register of Deed", and

(B) strike "May 7, 1985" and insert "May 7, 1984".

( ) On page 758, in paragraph (9)(B), strike "1986" and insert "1954".

On page 784, sixth line from the bottom, strike "1985" and insert "1986".

( ) On page 833, in clause (i) of subparagraph (B) (relating to operating corporation), strike "placement period" and insert "replacement period".

( ) On page 886, strike paragraph (8) (the first 31 lines).

( ) On page 910, the 13th line, strike "401(a)(11)" and insert "205".

( ) On page 910, in subparagraph (B) of paragraph (7) (relating to clarification of nonforfeitable accrued benefit), strike "Subparagraph (C) of section 205(b)(1)" and insert "Clause (1) of section 205(b)(1)(C)".

( ) On page 911, in clause (i) of subparagraph (B) of paragraph (9) (relating to amendments of ERISA), strike "nonforfeitable accrued benefit" and insert "nonforfeitable right (within the meaning of section 203)".

( ) On page 917, the 10th line, strike "means earlier of" and insert "means the earlier of".

( ) On page 917, the 12th line, strike "in".

( ) On page 917, the 14th line, strike "in".

( ) On page 918, the 7th line, strike "section 203" and insert "section 203(e)".

Mr. PACKWOOD. Mr. President, this is the amendment we talked about yesterday. I think the Senator from Ohio is fully aware of what it is. Some of the objections he had have been stricken out. I have talked with his aide. There is nothing in this amendment that was not there last night.

I know of no objections on either side to what is in the amendment. After the Senator from Ohio finishes, if there is no other request for time on his side, I will be prepared to yield back time on our side and go to a vote.

□ 1010

Mr. METZENBAUM. Mr. President, the Senator from Oregon states it very accurately.

When this matter was originally proposed as a unanimous-consent agreement yesterday, the Senator from Ohio indicated that I was not opposed to the general thrust of the concurrent resolution but did have some concerns about some of the specific provisions.

In discussions had with the manager of the bill as well as some of his staff and my staff as well, we were able to agree to delete certain of the provisions, and I believe that they are appropriate deletions.

One of them we had originally agreed to in the original tax bill. I guess it was in the corrections bill. We agreed that in connection with an item having to do with a Physician's Mutual that some change would be made amounting to $300,000. When we then submitted that to determine the actual value from the Joint Tax Committee, we were told it was $10 million. It now has a provision in it providing for limitation of $300,000 a year and that was our original understanding.

Under those circumstances, we have no objection.

Mr. PACKWOOD. I thank the Senator from Ohio.

I might say there was no change in the amendment from the time we had the original estimate on it until it suddenly cost $10 million.

Mr. METZENBAUM. That is absolutely correct.

Mr. PACKWOOD. I cannot explain why it once cost $300,000 and then it cost $10 million when it was the same amendment.

Mr. METZENBAUM. At least we are in the same agreement now.

In all fairness to the Senator from Nebraska, who was the proponent of the amendment, Senator EXON, he made it clear right from the beginning that he was talking about $300,000, not $10 million.

Mr. PACKWOOD. On this one there was no attempt by any Senator on either side of the aisle to blind-side any other Senator on the other side of the aisle.

Senator EXON from Nebraska was gracious last night saying he did not need $10 million, so we agreed to the $300,000 a year limit.

Mr. METZENBAUM. That is correct.

There are some provisions in the transition rules that provided for certain provisions having to do with WPPSS, the Washington Public Power Supply System.

There was some new language inserted by the House when that would have cost the Government $50 million additional. After our discussions, I am pleased to report that the Senator from Oregon, the manager of the bill, has agreed to drop that and that is part of this amendment.

Then there was a new lease-back arrangement for the Los Angeles library sale. That would have cost the Federal Government $2 million, and that would be an exemption from the current law. The manager of the bill has agreed to drop that.

Then there was a new project that the House put in—all of these projects I might say came from the House—the Tennessee solid waste project, I have no idea whether it is meritorious or not, but the point is it did not belong in this corrections measure, and that has been dropped for a total savings of $81 million plus the savings of $8½ million on the Physician's Mutual.

None of these matters were in either the House or Senate bill with exception of the Physician's Mutual matter.

Then in connection with the general aviation amendment, that amendment which originally was limited to certain aviation companies that were located in particular States, it was agreed that there was agreement that that would be generic but there were some provisions provided that as to the cost limitations and instead of it costing $25 million, it will not cost $14 million.

The total savings to the Treasury in all of them amounts to $92 million and that, around here, maybe is not a lot of money, but when you are trying to get $4 million for orphan drugs or a few million dollars for a WIC program or a few million dollars for some other research program, it is a lot of money, and to this Senator, and I am sure the manager of the bill, it is a lot of money, and I think we have agreed on that.

Then there was another measure that came into this bill and this is one of those unusual ones that nobody claims any parenthood, nobody is willing to describe where it came from, and that had to do with a freight forwarders amendment. It so happens that is a very good amendment and the manager of the bill indicated publicly the other day that he supports it. I support it.

It really does not belong in this bill because it sort of comes in from left field, but notwithstanding that, it was a very good amendment and I had hoped we could keep it in.

The chairman of the committee, Senator DANFORTH, has indicated and made a commitment, and I think I speak correctly, and I hope the manager will correct me since I see Senator DANFORTH is not on the floor at the moment, if I am wrong, that he agreed that if the matter is dropped there would be early hearings in the committee, that the matter would not only have hearings but would be brought to a vote in the committee or there would be a markup. On that basis, although I feel very strongly that the measure does have a lot of merit to it, I have agreed that I would not concern myself about that deletion.

Mr. PACKWOOD. The Senator from Ohio is correct. As a matter of fact, I even talked to the Senator from Missouri, Senator DANFORTH, last night and again reconfirmed that we would have hearings on it.

I agree with the Senator from Ohio. I think it is a good provision. I think on the merits it is a good provision. It was put in the bill by the method we have not yet determined. I felt badly. It was his jurisdiction, and I appreciate the Senator from Ohio, even though he and I agree on the merits, taking it out.

Mr. METZENBAUM. I say to the Senator from Oregon, the manager of the bill, that he has been very reasonable in our discussions that we had in connection with these negotiations and deletions. There was some effort on his part last night to move forward with this unanimous consent and there was, I think, some possible misunderstanding with my staff. I was out of the city for a couple of hours. But I appreciate his consideration and cooperation, and I think we are going forward and I think many of the problems that he wants to resolve in this concurrent resolution will now be resolved.

Mr. MOYNIHAN. Mr. President, there does not appear to be any Member on this side who wishes to speak.

Mr. PACKWOOD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PACKWOOD. Mr. President, what happened is that in the changing of the effective date on the insurance issues from June 20 to the date of the enactment of the act, the June 20 date appears in three places in the bill. The amendment that is before the body changes the date in only one place.

So I ask unanimous consent that my amendment may be modified on page 17, line 7, after the word "the" and before the number "Sixth" that the words "third, fourth, and" may be added.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MOYNIHAN. Mr. President, I take a moment just to thank the distinguished chairman and our indefatigable staff for having put together this collection of basically corrections to a large document which was inevitably subject to the kinds of drafting errors and typographical errors that will happen and also the simple oversights. In the interests of full disclosure which we have had throughout this, there are two provisions in this measure, one having to do with a development of the Flushing Center in the county of Queens in New York and the other the Eastman Place in Rochester, NY. Both have been fully agreed with in conference and there was no question about their appropriateness as transition rules. A piece of paper fell on the floor somewhere in the course of the drafting and these now are restored. I just want to make that point clear.

□ 1020

Mr. President, how much time do we have on this side?

The PRESIDING OFFICER. The Senator has 3 minutes remaining.

Mr. MOYNIHAN. I yield 1 minute to the Senator from Kentucky.

Mr. FORD. I thank my distinguished friend. Mr. President, I want to compliment the chairman, Mr. PACKWOOD, for his effort in resolving the problem we had as it relates to the technical corrections, and my distinguished friend from New York. I would like to thank Senator MELCHER for working out his problem that was delaying the consideration of this legislation today. He was amenable to the

concerns of his colleagues and I am grateful for that. And also Senator METZENBAUM for allowing it to go forward. I do thank all of those who are involved. It is an important piece of legislation for the people of my State and I am grateful.

Mr. MOYNIHAN. Mr. President, we yield back the balance of our time.

Mr. PACKWOOD. I yield back the balance of the time on our side.

The PRESIDING OFFICER. All time having been yielded back, in accordance with the terms of the unanimous-consent agreement, upon yielding back of all time, the amendment is considered agreed to.

The amendment (No. 3467) was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the provisions of the agreement, the question now recurs on the adoption of the concurrent resolution, as amended.

The concurrent resolution (H. Con. Res. 395), as amended, was agreed to.

Mr. MOYNIHAN. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. PACKWOOD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I will just take 1 minute to thank the distinguished chairman of the Finance Committee for not giving up and we now have that behind us. So that is one thing off the list, one big item that is gone, disappeared in 10 minutes.

The immigration bill will be next. I hope we could complete that by noon. Then I assume we would turn to the continuing resolution which will probably take some time, but at least we are starting to move.

Mr. HATCH. Mr. President, the 1984 tax bill had the unintended effect of creating an incentive for U.S gold miners to use foreign refineries in order to qualify for foreign sales corporation tax benefits. This provision of the Tax Code threatens the existence of the precious metals refining industry in the United States. Unless Congress acts, our domestic industry will be harmed irreversibly, as more and more gold goes overseas for refining.

This challenge to our refining industry became apparent to domestic refiners only earlier this year. When the industry called this problem to my attention, it was too late for consideration by the Finance Committee, and relief was not included in the Tax Reform Act of 1986. I believe, however, that this problem deserves the attention of the Congress, and I will urge my colleagues to consider a resolution to it during the next session of Congress. In the meantime, I hope the gold mining, refining, and manufacturing industries themselves will consider the best way to accommodate the interests of individual companies with the goal of saving our domestic refining capacity.

Our mining industry has seen hard times in recent years, and to some profitable gold mining companies, FSC tax benefits are providing welcome financial support in the form of an income tax deduction. Gold prices are recovering, which should also help our miners. But regardless of the price of gold, I know that all U.S. mining companies support the concept of a healthy, competitive refining industry within our borders if for no other reason than because competition controls refining costs.

As another assist to the U.S. gold producers, Congress has approved an ambitious U.S. gold coin program, and required that newly mined U.S. gold be purchased to the fullest extent possible before U.S. gold reserves are tapped for coinage. It would undermine the purpose of the gold coin program, Mr. President, for the U.S. mint to be forced to buy U.S. gold abroad in the absence of domestic refining capacity, or to dig into our gold reserves, thereby increasing overall gold supplies and depressing gold prices.

There are only a handful of independent precious metals refineries in the United States and only one major precious metals refinery in the West, located in Salt Lake City. Even without the market distortion created by the Tax Code, the industry is intensely competitive. Yet the domestic refining industry cannot compete on an equal footing unless it is eligible for FSC benefits available for precious metals refined abroad.

Mr. President, let me provide some background about foreign sales corporations as they affect the domestic refining industry.

The 1984 Tax Reform Act established foreign sales corporations to replace DISC's. Reversing a policy established in the 1960's, Congress also made extracted minerals eligible for FSC benefits. Several gold miners have since transferred their business from domestic to foreign refineries in order to obtain the FSC tax benefits. Since gold is a fungible commodity, an equivalent amount of gold is soon reimported for use in the United States.

The United States is a net importer of precious metals. The United States produces 2 million ounces of gold and imports 7 million ounces annually. If FSC trends continue, the United States could actually export 2 million ounces of gold and import 9 million.

That is not what the Congress had in mind in 1984, Mr. President.

Just as the gold market is complex, so there is no simple solution to the refining crisis. Precious metals are totally fungible elemental commodities. Gold is seldom consumed. Rather, it is held and traded internationally for its intrinsic value. Physical gold is rarely shipped or delivered at time of sale. Gold enters the world market as soon as it reaches the refinery. A foreign buyer of gold from a western U.S. mine might actually receive title to physical gold stored in Toronto or London, even before the gold from the U.S. mine is refined.

The fungible nature of gold, and the impossibility of tracking any individual ounce of gold from the refinery gate to its ultimate user, make relief for the refiners difficult in the contest of foreign sales corporation requirements. One alternative would be to formally make U.S. refined gold eligible for FSC benefits. The Treasury Department, however, believes this legislative relief would undermine the fundamental FSC tests of delivery and use outside the United States.

Treasury would support excluding gold altogether from FSC benefits. But while the gold mining industry did not seek special export tax benefits in 1984, miners now using FSC's understandably do not want to give up the tax advantage. Others in the precious metals mining industry feel just as strongly that a U.S. capability to refine U.S. mined gold is in the public interest as well as in their economic interest.

Given the alternative of losing our domestic refining capacity—with the implications for the U.S. gold coin program—a solution must be found quickly. I urge the precious metals industry to consider the equities and counsel the Congress. And I look forward to working with my colleagues over the next several months to fashion a solution.

Mr. DOLE. Mr. President, I would like to take a few moments to address the issue of the general aviation transition rule contained in H.R. 3838 and modified in Senator PACKWOOD's amendment to the House concurrent resolution.

The transition rule, as originally drafted, was intended to allow our manufacturers of general aviation aircraft to offer buyers the investment credit and current law depreciation as an incentive to purchase planes before the end of the year. We intended to include all planes truly manufactured in the United States although the measure was drafted in a limited manner to satisfy the revenue estimators that the revenue loss would not be unexpectedly high.

As it turned out, we missed one major manufacturer by the way that

the conference report was drafted. The House concurrent resolution corrected that omission.

The modification proposed by the distinguished chairman of the Finance Committee would attempt to expand the transition rule to include aircraft which are not in any sense "manufactured" in the United States. I think this is wrong. However, I will not object to the unanimous-consent request because I know how important the truly technical corrections contained in this resolution are to many Members and their constituents.

Nevertheless, it is difficult for me to justify to myself or to explain to anyone else how we can consider a paint job, installation of part of an interior, or installation of some avionics to qualify an airplane for the benefits of this special rule. It seems to me to be a very strained definition of "final assembly" to allow planes that are flown over on their own from overseas to be considered "finally assembled" in the United States.

I can understand the desire of the chairman to adopt a generic rule that will not appear to prefer one State over another. However, I think that we should focus on why the provision exists in the first place. It was included in the bill because our domestic general aviation manufacturers are suffering from a severe recession. We are hoping that a short period when they can tell potential buyers that they will still be able to get an investment tax credit will give these manufacturers a chance to sell the planes they now have in inventory and those that they expect to complete before next July.

I would hope that the Internal Revenue Service will interpret the term "final assembly" in accordance with the common understanding of the term—that a plane will not qualify for this rule unless its final assembly is in the United States. It would seem odd that a plane could be considered finally assembled in the United States if it is capable of being flown and, in fact, is flown into this country from somewhere else.

THE ANTIDRUG BILL

Mr. DOLE. Mr. President, the Senate, in the truest sense of bipartisanship, passed the drug bill last night. It has been that way from the start. We had a couple of major differences, really only one. But we approved that bill by a voice vote last night.

I would just like to urge my House colleagues to take a hard look at that bill today and to accept it. It is very close to the House bill. There are some differences. I would just urge the House today to indicate that they are going to support the Senate bill which contains many of the provisions in the House bill. It is really a bicameral compromise, as well as a bipartisan compromise.

COMPARISON OF SENATE AND HOUSE ANTIDRUG BILLS

Mr. President, I have repeatedly stated that I believe Congress has a duty to approve antidrug legislation before we adjourn this year. The Senate has twice now addressed the issue—addressed it in a responsible and meaningful way.

On September 30, we approved the Drug Enforcement Act, and last night, after meeting the House more than half-way on a number of important issues, we passed a revised drug bill and sent it to the House for its consideration.

There never will be or could be a drug bill that would please every Member. Like any legislation that is as far-reaching and covers as many different concerns, there will be differences of opinion. But I believe the bill we passed last night is as close as we can come to a consensus between the two bodies. And I hope that the House, after looking at what we have done, will accept the Senate's bill.

Mr. President, I ask unanimous consent that a summary of the major differences in the bills be printed at this point in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

MAJOR SENATE CHANGES TO HOUSE AMENDMENT

TITLE I—ENFORCEMENT

Adds back certain Senate provisions dropped by the House:

Authority to reduce statutory minimum sentences in return for cooperation with police and prosecutors.

Federal Drug Law Enforcement Agent Protection Act.

Common carrier operations under the influence of drugs or alcohol.

Retains Senate money laundering.

Authorizes $230 million for grants to State and local law enforcement agencies, as opposed to a House level of $350 million and Senate level of $115 million.

TITLE II—INTERNATIONAL

Restores Senate level of $63 million for International Narcotics Control Assistance.

Retains Senate language on the location where the repeal of the Mansfield Amendment applies.

Strikes the $1 million reduction in narcotics assistance to Mexico added by the House, and instead lists a series of actions the Congress may take unless progress is made in the investigations on the death of DEA agent Camarena and the torture of DEA agent Cortez.

TITLE III—INTERDICTION

Provides (2) E2C Hawkeye Surveillance aircraft to U.S. Customs Service and (2) identical aircraft to U.S. Coast Guard.

Specifies that funds provided through Department of Defense are new authority and not out of existing authority.

Restores Senate language on FCC license revocation and equipment seizure.

Provides "up to $7 million" for the Civil Air Patrol as opposed to $3.5 million.

Provides two C-130 surveillance aircraft to U.S. Coast Guard.

TITLE IV—DEMAND REDUCTION

Increases by $15 million the existing ADAMHA block grant to a total of $515 million.

Authorizes $186 million for drug and alcohol treatment and rehabilitation.

Retains Senate language reauthorizing NIAAA at $69 million and NIDA at $129 million.

Provides $200 million in new educational funds. This compares to an original Senate level of $150 million and House level of $250 million.

Mr. DOLE. Mr. President, again, I strongly urge the House to take the responsible route, to accept the Senate drug bill, which is itself a compromise between the original House and Senate versions. This is the best possible way to offer the American people some of the help they have called on us to provide—help to combat the terrible tragedy of drug abuse.

ORDER OF PROCEDURE

Mr. SIMPSON. Mr. President, I believe we have some business to conduct and, after conferring with the Democratic leader, we can do some housekeeping matters that are important to both bodies in these last hours.

RELEASING CERTAIN CONDITIONS AND RESERVATIONS CONTAINED IN A CONVEYANCE OF LAND TO THE STATE OF UTAH

Mr. SIMPSON. Mr. President, after conferring with the Democratic leader, I ask unanimous consent that the Energy Committee be discharged from further consideration of H.R. 5459, dealing with certain land in the State of Utah, and I ask for its immediate consideration.

Mr. BYRD. Mr. President, there is no objection to either the request to discharge from the committee or immediate consideration.

The PRESIDING OFFICER. Is there objection? There being no objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5459) to direct the release, on behalf of the United States, of certain conditions and reservations contained in a conveyance of land to the State of Utah, and for other purposes.

The Senate proceeded to consider the bill.

The PRESIDING OFFICER. Are there amendments? If not, the question is on the third reading and passage of the bill.

The bill (H.R. 5459) was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COAST GUARD AUTHORIZATION ACT

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar Order No. 1086, H.R. 4208, the Coast Guard authorization bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 4208) to authorize appropriations for the Coast Guard for fiscal year 1987, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Wyoming?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment to strike all after the enacting clause and insert in lieu thereof, the following:

That this Act may be cited as the "Coast Guard Authorization Act of 1986".

AUTHORIZATION OF APPROPRIATIONS

SEC. 2. Funds are authorized to be appropriated for necessary expenses of the Coast Guard for fiscal year 1987, as follows:

(1) For the operations and maintenance of the Coast Guard, $1,862,800,000, of which not more than $20,000,000 may be made available to the Commandant of the Coast Guard for discretionary use in meeting unanticipated demands and needs for Coast Guard operation and maintenance; and for increases in salary, pay, and other employee benefits authorized by law, such sums as may be necessary.

(2) For the acquisition, construction, rebuilding, and improvement of aids to navigation, shore facilities, vessels, and aircraft, including equipment related thereto, $267,000,000, to remain available until expended.

(3) For research, development, test, and evaluation, $20,000,000, to remain available until expended.

(4) For retired pay, including the payment of obligations therefor otherwise chargeable to lapsed appropriations for this purpose, and payments under the Retired Serviceman's Family Protection and Survivor Benefit Plans, and for payments for medical care of retired personnel and their dependents under the Dependents' Medical Care Act, $364,000,000.

(5) If funds are appropriated to any other officer of the United States for carrying out the purposes described in paragraphs (1) through (4) of this section, such officer may transfer to the Secretary of the department in which the Coast Guard is operating the full amount of such funds. Such funds shall be allocated by the Secretary to such purposes.

AUTHORIZED LEVELS OF MILITARY STRENGTH AND MILITARY TRAINING

SEC. 3. (a) For fiscal year 1987, the Coast Guard is authorized in end-of-year strength for active duty personnel of 39,200. The authorized strength does not include members of the Ready Reserve called to active duty under the authority of section 712 of title 14, United States Code.

(b) For fiscal year 1987, the Coast Guard is authorized average military training student loads as follows:

(1) For recruit and special training, 3,200 student-years.

(2) For flight training, 110 student-years.

(3) For professional training in military and civilian institutions, 441 student-years.

(4) For officer acquisition, 925 student-years.

TRANSFER OF FUNDS

SEC. 4. (a) Whenever the Secretary of the department in which the Coast Guard is operating determines it to be in the national interest, the Secretary may transfer not to exceed 5 percent of the funds appropriated for the purposes described in section 2(2) of this Act to the Commandant of the Coast Guard for discretionary use in meeting unanticipated demands and needs for Coast Guard operations and maintenance under section 2(1) of this Act.

(b) No transfer of funds may occur under subsection (a) of this section until 15 days after the Secretary has provided written notification to the Committee on Commerce, Science, and Transportation of the Senate, the Committee on Merchant Marine and Fisheries of the House of Representatives, and the Appropriations Committees of the Senate and House of Representatives stating the reasons for such determination and a description of the purposes for which the funds proposed to be transferred will be used.

LIMITATIONS ON CONTRACTING PERFORMED BY THE COAST GUARD

SEC. 5. (a)(1) It is in the national interest for the Coast Guard to maintain a logistics capability (including personnel, equipment, and facilities) to provide a ready and controlled source of technical competence and resources necessary to ensure the effective and timely performance of Coast Guard missions in behalf of the security, safety, and economic and environmental well-being of the United States.

(2)(A) The Secretary of the department in which the Coast Guard is operating shall identify those Coast Guard activities that are necessary to maintain the logistics capability described in paragraph (1) of this subsection. The Secretary shall provide a list of such activities to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Merchant Marine and Fisheries of the House of Representatives not later than January 31, 1987. If the Secretary does not provide such list by that date, no activity performed by Coast Guard personnel may be contracted for performance by non-government personnel after such date until the list is provided to such committees.

(B) The list submitted by the Secretary under this paragraph shall not include—

(i) any activity that is being performed under contract by non-government personnel on the date of enactment of this Act; or

(ii) any activity for which Congress received, prior to April 1, 1986, a written notification pursuant to section 14(b)(2) of the Coast Guard Authorization Act of 1984 (Public Law 98-557; 98 Stat. 2864) of intent to contract.

(b)(1) Except as provided in paragraph (2) of this subsection, performance of an activity identified by the Secretary under subsection (a)(2) of this section may not be contracted for performance by non-government personnel.

(2) The Secretary may waive paragraph (1) of this subsection with respect to any Coast Guard activity (other than an activity described in subsection (d) of this section), if the Secretary determines that the performance of such activity by Government personnel is no longer necessary to ensure the effective and timely performance of Coast Guard missions.

(3) A waiver under paragraph (2) of this subsection may not take effect until a period of 30 days in which either the Senate or House of Representatives is in session has expired after the Secretary has submitted in writing to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Merchant Marine and Fisheries of the House of Representatives a full and complete statement concerning the waiver and the reasons therefor.

(c) Before the beginning of fiscal year 1987, the Secretary shall submit to the Committee on Commerce, Science, and Transportation of the Senate and to the Committee on Merchant Marine and Fisheries of the House of Representatives a list of Coast Guard activities that are to be considered for performance by contract by non-Government personnel under the procedures of Office of Management and Budget Circular A-76 during that fiscal year.

(d) The Secretary may not award any contract for the performance of any "commercial activity", as defined by paragraph 6.a. of the Office of Management and Budget Circular Memorandum A-76, which is performed by employees of the Coast Guard until at least 30 calendar days after the Secretary has presented, in writing, to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Merchant Marine and Fisheries of the House of Representatives a full and complete description of such proposed contract, together with supporting documentation. Such documentation shall include—

(1) a comparison of the cost of such activity as performed by employees of the Coast Guard and the cost of such activity as performed under the proposed contract;

(2) a comparison of the services performed by employees of the Coast Guard and the services to be performed under the proposed contract; and

(3) an assessment of the benefits to the Coast Guard of proceeding with the proposed contract.

(e)(1) Notwithstanding any other provision of law, each contract awarded by the Coast Guard in fiscal year 1987 for construction or services to be performed in whole or in part in a State which has an unemployment rate in excess of the national average rate of unemployment (as determined by the Secretary of Labor) shall include a provision requiring the contractor to employ, for the purpose of performing that portion of the contract in that State, individuals who are local residents and who, in the case of any craft or trade, possess or would be able to acquire promptly the necessary skills. The secretary of the department in which the Coast Guard is operating may waive the requirements of this subsection in the interest of national security or economic efficiency.

(2) As used in this subsection, the term "local resident" means an individual within daily commuting distance even if not a resident of the State which has an unemployment rate in excess of the national average rate of unemployment (as determined by

the Secretary of Labor), in accordance with paragraph (1) of this subsection.

MARITIME DEFENSE ZONE

SEC. 6. Section 2 of title 14, United States Code, is amended by inserting immediately before the period at the end thereof the following: ", including the fulfillment of Maritime Defense Zone command responsibilities".

BOAT SAFETY PROGRAM

SEC. 7. (a) Section 9503(c)(4) of title 26, United States Code, is amended—

(1) in subparagraph (A), by striking "$45,000,000" each place it appears and inserting in lieu thereof "$60,000,000"; and

(2) by adding at the end thereof the following:

"(E) DETERMINATION.—The amount of payments made under this paragraph after October 1, 1986 shall be determined by the Secretary in accordance with the Department of the Treasury's Report to Congress of June 1986 entitled 'Gasoline Excise Tax Revenues Attributable to Fuel Used in Recreational Motorboats'.".

(b) Section 13106 of title 46, United States Code, is amended—

(1) in subsection (a), by striking "two-thirds" and inserting in lieu thereof "one-half"; and

(2) in subsection (c), by striking "one-third" and inserting in lieu thereof "one-half".

(c) Section 13103 of title 46, United States Code, is amended by adding at the end thereof the following:

"(d) Before making any allocation under this section for a fiscal year, the Secretary shall retain not less than 1 percent nor more than 2 percent of the amount appropriated for that year for State recreational boating safety programs for the payment of costs of administration of this chapter.".

PAYMENT OF INTEREST TO COAST GUARD AUXILIARY

SEC. 8. Section 830 of title 14, United States Code, is amended—

(1) by inserting "(a)" before "Appropriations"; and

(2) by adding at the end thereof the following:

"(b) The Secretary may pay interest on a claim under this section in any case in which a payment authorized under this section is not made within 60 days after the submission of the claim in a manner prescribed by the Secretary. The rate of interest for purposes of this section shall be the annual rate established under section 6621 of the Internal Revenue Code of 1954.".

USE OF COAST GUARD AUXILIARY

SEC. 9. (a) It is the sense of the Congress that the Coast Guard Auxiliary performs a broad range of services in behalf of the safety and security of the American people, and that the continued strength and vitality of the Coast Guard Auxiliary is important to the United States.

(b)(1) The Secretary of Transportation shall investigate and submit to the Congress a report within 1 year after the date of enactment of this Act regarding—

(A) the extent to which membership of the Coast Guard Auxiliary has declined in recent years and the causes of such decline;

(B) the effect, if any, on the maritime community of any such decline in the performance levels of the Coast Guard Auxiliary in the areas of life-saving, assistance to persons in distress, safety patrols and inspections, and support missions for the Coast Guard;

(C) the effect, if any, of the Coast Guard's non-emergency assistance policy on the overall effectiveness of the Coast Guard Auxiliary.

(2) The report submitted by the Secretary under this section shall include such recommendations for legislative and administrative action as the Secretary considers appropriate to achieve and maintain the Coast Guard Auxiliary at its optimum strength.

MISCELLANEOUS AMENDMENTS TO TITLE 14 AND TITLE 46

SEC. 10. (a)(1) The analysis of parts, before section 1 of title 14, United States Code, is amended by striking

"II. Coast Guard Reserve and Auxiliary ..... 751"

and inserting in lieu thereof

"II. Coast Guard Reserve and Auxiliary ..... 701".

(2) The analysis of chapters of part II of title 14, United States Code, is amended by striking

"21. Coast Guard Reserve ..... 751"

and inserting in lieu thereof

"21. Coast Guard Reserve ..... 701".

(3) Section 82 of title 14, United States Code, is amended by striking "Federal Aviation Act of 1958, as amended (49 U.S.C. 1301 et seq.)" and inserting in lieu thereof "Federal Aviation Act of 1958 (49 App. U.S.C. 1301 et seq.)".

(4) Section 91 of title 14, United States Code, is amended to read as follows:

"§ 91. Safety of naval vessels

"(a) The Secretary may control the anchorage and movement of any vessel in the navigable waters of the United States to ensure the safety or security of any United States naval vessel in those waters.

"(b) If the Secretary does not exercise the authority in subsection (a) of this section and immediate action is required, the senior naval officer present in command may control the anchorage or movement of any vessel in the navigable waters of the United States to ensure the safety and security of any United States naval vessel under the officer's command.

"(c) If a person violates, or a vessel is operated in violation of, this section or a regulation or order issued under this section, the person or vessel is subject to the enforcement provisions in section 13 of the Ports and Waterways Safety Act (33 U.S.C. 1232).".

(5) Section 146 of title 14, United States Code, is amended by striking "Postmaster General" and inserting in lieu thereof "United States Postal Service."

(6)(A) Sections 431, 433, 434, and 438 of title 14, United States Code, are repealed, except that the repeal of such section shall not affect rights and duties that matured, penalties that were incurred, and proceedings that were begun under such sections before the date of enactment of this Act.

(B) The analysis of chapter 11 of title 14, United States Code, is amended by striking the items relating to sections 431, 433, 434, and 438.

(7) Section 432(g) of title 14, United States Code, is amended—

(A) by inserting "(1)" immediately after "(g)"; and

(B) by striking the last paragraph and inserting in lieu thereof the following:

"(2) The additional compensation authorized by this subsection shall be included in any computation of compensation under section 6 of the Act of June 20, 1918 (33 U.S.C. 763).".

(8) Section 829 of title 14, United States Code, is amended by striking "Section" and inserting in lieu thereof "section."

(9) The first section of the Act entitled "An Act to require authorization for certain appropriations for the Coast Guard, and for other purposes", approved June 21, 1963 (77 Stat. 68; 14 U.S.C. 92, note), is repealed.

(b)(1) Section 2102(11b) of title 46, United States Code, is amended by inserting "freezing," immediately after "icing,".

(2)(A) Chapter 75 of title 46, United States Code, is amended by adding at the end the following new section:

"§ 7504. Travel and expense reimbursement

"When a requirement to qualify for the issuance of, or endorsement on, a certificate, license, or document under this part is administered at a place at the request of an applicant or an applicant's representative, the applicant or representative may reimburse the Secretary for the travel and subsistence expenses incurred by the personnel assigned to perform the administration of the requirement. Amounts received as reimbursement under this section shall be credited to the appropriation for operating expenses of the Coast Guard.".

(B) The analysis of chapter 75 of title 46, United States Code, is amended by adding at the end the following:

"7504. Travel and expense reimbursement.".

(3) Section 10101 (1) and (3) of title 46, United States Code, is amended by striking "owned by a citizen of the United States".

(4) Sections 10313 (e) and (h), 10314(e), 10504(a), and 10505(d) of title 46, United States Code, are amended by striking the last sentence.

(5) Section 10504(d)(3) of title 46, United States Code, is amended by striking "(except a vessel taking oysters)".

MANNING REQUIREMENTS OF MOBILE OFFSHORE DRILLING UNITS

SEC. 11. (a) Section 2101 of title 46, United States Code, is amended by inserting immediately after paragraph (15) the following:

"(15a) 'mobile offshore drilling unit' means a vessel capable of engaging in drilling operations for the exploration or exploitation of subsea resources.".

(b) Section 8101(a) of title 46, United States Code, is amended to read as follows:

"(a) The certificate of inspection issued to a vessel under part B of this subtitle shall state the complement of licensed individuals and crew (including lifeboatmen) considered by the Secretary to be necessary for safe operation. A manning requirement imposed on—

"(1) a sailing school vessel shall consider the participation of sailing school instructors and sailing school students in the operation of that vessel; and

"(2) a mobile offshore drilling unit shall consider the specialized nature of the unit.".

(c) Section 8701(a) of title 46, United States Code, is amended—

(1) by striking "and" at the end of paragraph (6);

(2) by striking the period at the end of paragraph (7) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following:

"(8) a mobile offshore drilling unit with respect to individuals, other than crew members required by the certificate of inspection, engaged on board the unit for the sole purpose of carrying out the industrial business or function of the unit.".

(d) Section 8301(c) of title 46, United States Code, is amended by inserting ", a mobile offshore drilling unit when on location," immediately after "vessel".

TOWING LICENSE

SEC. 12. (a) Section 8904 of title 46, United States Code, is amended—

(1) by inserting "(a)" immediately before "A towing"; and

(2) by adding at the end thereof the following:

"(b) A vessel that tows a disabled vessel for consideration shall be operated by individual licensed by the Secretary to operate that type of vessel in the particular geographic area, under prescribed regulations.".

(b) The amendments made by subsection (a) of this section shall take effect on January 1, 1988.

FORFEITED VESSELS

SEC. 13. (a) Whenever a vessel is forfeited to the United States, the vessel may be donated, in accordance with procedures under the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 et seq.), to an educational institution with a commercial fishing vessel safety program or other vessel safety, education and training program, if the institution has certified to the Federal officer referred to in subsection (b) of this section that the program includes at a minimum the following courses in vessel safety:

(1) vessel stability;

(2) firefighting;

(3) shipboard first aid;

(4) marine safety and survival; and

(5) seamanship and rules of the road.

(b) The donation of a vessel under this section shall be made on terms and conditions considered appropriate by the Federal officer making such donation, including requirements that—

(1) the educational institution must accept the vessel as is, where it is, and without warranty of any kind and without any representation as to its condition or suitability for use;

(2) the educational institution shall be responsible for maintaining the vessel;

(3) the vessel shall be used only for instructing students in vessel safety education and training programs;

(4) if the vessel is eligible to be documented, it must be documented by the educational institution as a vessel of the United States under chapter 121 of title 46, United States Code, and the requirements of paragraph (5) of this subsection shall be noted on the permanent record of the vessel;

(5) the education institution must obtain the prior approval of the Administrator of General Services before disposing of the vessel, and any proceeds from the disposal of the vessel shall be payable to the United States Government; and

(6) the vessel shall be inspected or regulated in the same manner as a nautical school vessel under chapter 33 of title 46, United States Code.

(c) The United States shall not be liable in an action arising out of the transfer or use of a vessel that has been transferred under this section.

(d) Section 2101(17) of title 46, United States Code, is amended by inserting immediately before the period the following: "or an educational institution under section 13 of the Coast Guard Authorization Act of 1986".

(e) Section 3305(c) of title 46, United States Code, is amended by inserting immediately after "school" the second place it appears the following: "or by an educational institution under section 13 of the Coast Guard Authorization Act of 1986".

LIMITATION ON TRAINING

SEC. 14. Notwithstanding any other provision of law, no training or course of instruction may be provided by the Coast Guard to employees of the government or to members of the armed services of the Republic of South Africa during fiscal year 1987.

STATUS REPORTS ON POLAR ICEBREAKING VESSELS

SEC. 15. The Secretary of the department in which the Coast Guard is operating shall provide detailed reports to Congress concerning the status of design and construction plans for the procurement of at least two new polar icebreaking vessels. Such reports shall be included in the Cutter Plan required annually by section 663 of title 14, United States Code, and shall be submitted each year until at least two new polar icebreaking vessels have been delivered to the Coast Guard.

VESSEL SAFETY

SEC. 16. Section 4102 of title 46, United States Code, is amended by adding at the end thereof the following:

"(e) Each uninspected fishing, fish processing, or fish tender vessel operating on the high seas shall be equipped with the number and type of emergency position indicating radio beacons prescribed by regulation.".

PROSECUTIONS OF MARITIME DRUG TRAFFICKERS

SEC. 17. The Act entitled "An Act to facilitate increased enforcement by the Coast Guard of laws relating to the importation of controlled substances, and for other purposes", approved September 15, 1980 (Public Law 96-350; 94 Stat. 1159) is amended by striking everything immediately after the enacting clause and inserting in lieu thereof the following:

"That this Act may be cited as the 'Maritime Drug Law Enforcement Act'.

"SEC. 2. The Congress finds and declares that trafficking in controlled substances aboard vessels is a serious international problem and is universally condemned. Moreover, such trafficking presents a specific threat to the security and societal well-being of the United States.

"SEC. 3. (a) It is unlawful for any person on board a vessel of the United States, or on board a vessel subject to the jurisdiction of the United States, to knowingly or intentionally manufacture or distribute, or to possess with intent to manufacture or distribute, a controlled substance.

"(b) For purposes of this section a 'vessel of the United States' means—

"(1) a vessel documented under chapter 121 of title 46, United States Code, or a vessel numbered as provided in chapter 123 of that title;

"(2) a vessel owned in whole or part by—

"(A) the United States or a territory, commonwealth, or possession of the United States;

"(B) a State or political subdivision thereof;

"(C) a citizen or national of the United States; or

"(D) a corporation created under the laws of the United States or any State, the District of Columbia, or any territory, commonwealth, or possession of the United States;

unless the vessel has been granted the nationality of a foreign nation in accordance with article 5 of the 1958 Convention of the High Seas; and

"(3) a vessel that was once documented under the laws of the United States and, in violation of the laws of the United States, was either sold to a person not a citizen of the United States or placed under foreign registry or a foreign flag, whether or not the vessel has been granted the nationality of a foreign nation.

"(c)(1) For purposes of this section, a 'vessel subject to the jurisdiction of the United States' includes—

"(A) a vessel without nationality;

"(B) a vessel assimilated to a vessel without nationality, in accordance with paragraph (2) of article 6 of the 1958 Convention on the High Seas;

"(C) a vessel registered in a foreign nation where the flag nation has consented or waived objection to the enforcement of United States law by the United States;

"(D) a vessel located within the customs waters of the United States; and

"(E) a vessel located in the territorial waters of another nation, where the nation consents to the enforcement of United States law by the United States.

Consent or waiver of objection by a foreign nation to the enforcement of United States law by the United States under subparagraph (C) or (E) of this paragraph may be obtained by radio, telephone, or similar oral or electronic means, and may be proved by certification of the Secretary of State or the Secretary's designee.

"(2) For purposes of this section, a 'vessel without nationality' includes—

"(A) a vessel aboard which the master or person in charge makes a claim of registry, which claim is denied by the flag nation whose registry is claimed; and

"(B) any vessel aboard which the master or person in charge fails, upon request of an officer of the United States empowered to enforce applicable provisions of United States law, to make a claim of nationality or registry for that vessel.

A claim of registry under subparagraph (A) may be verified or denied by radio, telephone, or similar oral or electronic means. The denial of such claim of registry by the claimed flag nation may be proved by certification of the Secretary of State or the Secretary's designee.

"(3) For purposes of this section, a claim of nationality or registry only includes:

"(A) possession on board the vessel and production of documents evidencing the vessel's nationality in accordance with article 5 of the 1958 Convention on the High Seas;

"(B) flying its flag nation's ensign or flag; or

"(C) a verbal claim of nationality or registry by the master or person in charge of the vessel.

"(d) A claim of failure to comply with international law in the enforcement of this Act may be invoked solely by a foreign nation, and a failure to comply with international law shall not divest a court of jurisdiction or otherwise constitute a defense to any proceeding under this Act.

"(e) This section does not apply to a common or contract carrier, or an employee thereof, who possesses or distributes a controlled substance in the lawful and usual course of the carrier's business or to a public vessel of the United States, or any person on board such a vessel who possesses or distributes a controlled substance in the lawful course of such person's duties, if the controlled substance is a part of the cargo entered in the vessel's manifest and is intended to be lawfully imported into the

country of destination for scientific, medical, or other legitimate purposes. It shall not be necessary for the United States to negative the exception set forth in this subsection in any complaint, information, indictment, or other pleading or in any trial or other proceeding. The burden of going forward with the evidence with respect to this exception is upon the person claiming its benefit.

"(f) Any person who violates this section shall be tried in the United States district court at the point of entry where that person enters the United States, or in the United States District Court of the District of Columbia.

"(g)(1) Any person who commits an offense defined in this section shall be punished in accordance with the penalties set forth in section 1010 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 960).

"(2) Notwithstanding paragraph (1) of this subsection, any person convicted of an offense under this Act shall be punished in accordance with the penalties set forth in section 1012 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 962) if such offense is a second or subsequent offense as defined in section 1012(b) of that Act.

"(h) This section is intended to reach acts of possession, manufacture, or distribution committed outside the territorial jurisdiction of the United States.

"(i) The definitions in the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 802) apply to terms used in this Act.

"(j) Any person who attempts or conspires to commit any offense defined in this Act is punishable by imprisonment or fine, or both, which may not exceed the maximum punishment prescribed for the offense, the commission of which was the object of the attempt or conspiracy.

"SEC. 4. Any property described in section 511(a) of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881(a)) that is used or intended for use to commit, or to facilitate the commission of, an offense under this Act shall be subject to seizure and forfeiture in the same manner as similar property seized or forfeited under section 511 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 881).".

AUTHORITY TO ISSUE CERTAIN CERTIFICATES

SEC. 18. Notwithstanding sections 12105, 12106, 12107, and 12108 of title 46, United States Code, and section 27 of the Merchant Marine Act, 1920 (46 App. U.S.C. 883), as applicable on the date of enactment of this Act, the Secretary of the department in which the Coast Guard is operating may issue a certificate of documentation for the following vessels: Dunes Spirit, United States official number 690176; Kodiak Queen, United States official number 507891; La Reina, United States official number 230115; Northwind, United States official number 230147; and Wanderbird, United States official number 229607.

AMENDMENT NO. 3468

(Purpose: Amend provision regarding the awarding of contracts for the performance of commercial activities)

Mr. SIMPSON. Mr. President, on behalf of Senator STEVENS, I send an amendment to the committee substitute to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. STEVENS, proposes an amendment numbered 3468.

Strike subsection (d) of section 5, and redesignate subsection (e) of section 5 as subsection (d).

Mr. STEVENS. Mr. President, I am offering today for consideration H.R. 4208, a bill to authorize appropriations for the Coast Guard for fiscal year 1987. This legislation was reported by the Senate Committee on Commerce, Science, and Transportation without objection. I am also offering an amendment which has been cleared by the committee.

Congress has greatly expanded the Coast Guard's civilian and coastal defense responsibilities over the last 15 years, but actual funding to perform these activities has remained static. This has forced the Coast Guard to juggle numerous duties with limited funding and personnel.

This authorization corrects many of the more severe problems facing the Coast Guard by providing greater stability in the Coast Guard's funding for operations. H.R. 4208 as reported authorizes $2,513,000,000 for the Coast Guard in fiscal year 1987. This figure equals the President's request and is consistent with the levels set forth by the budget resolution.

The amendment relates to the contracting out of activities currently performed by Coast Guard personnel. It strikes section 5(d) from H.R. 4208 as reported by the committee. Section 5(d) would have required the Secretary of Transportation to report to Congress prior to the awarding of any contract to nongovernment personnel. This provision was in response to a growing concern that essential Coast Guard functions might suffer in the future if budgetary considerations become the driving force for these contract rewards in lieu of efficiency and performance.

I am withdrawing section 5(d) due to the objections of the administration and a fear expressed by Members of the House of Representatives that the provision will lead to a Presidential veto. I do intend to closely monitor the contracting out process next year to assure that essential Coast Guard functions are not eroded.

□ 1030

Mr. MATHIAS. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 3468) was agreed to.

AMENDMENT NO. 3469

(Purpose: Makes a technical amendment to section 10)

Mr. SIMPSON. Mr. President, I send an amendment to the desk in behalf of Senator STEVENS and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. STEVENS, proposes an amendment numbered 3469.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 31, line 5, strike "2102(11b)" and insert in lieu thereof "2101(11b)".

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Alaska.

The amendment (No. 3469) was agreed to.

AMENDMENT NO. 3470

(Purpose: To correct the funding in the Wallop-Breaux fund)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator WALLOP to the committee substitute and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. WALLOP, proposes an amendment numbered 3470.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike section 7 and insert in lieu thereof the following:

SEC. 7. (a) Section 9503(c)(4) of title 26, United States Code, is amended—

(1) in subparagraph (A), by striking "45,000,000" each place it appears and inserting in lieu thereof "60,000,000 for Fiscal Year 1987 only and $45,000,000 for each Fiscal Year thereafter;" and (2) by adding at the end thereof the following:

"(E) DETERMINATION.—The amount of payments made under this paragraph after October 1, 1986 shall be determined by the Secretary in accordance with the methodology described in the Treasury Department's Report to Congress on June 1986 entitled 'Gasoline Excise Tax Revenues Attributable to Fuel Used in Recreational Motorboats.' Further, a portion of the payments made by the Secretary from Fiscal Year 1987 motorfuel excise tax receipts shall be used to increase the funding for boating safety programs during Fiscal Year 1987 only."

(b) Section 13106(c) of Title 46, United States Code, is amended by striking "one-third" and inserting in lieu thereof "one-half for Fiscal Year 1987 and one-third for each Fiscal Year thereafter."

(c) Section 13106(a) of title 46, United States Code, is amended by striking "two-thirds" and inserting in lieu thereof "one-half for Fiscal Year 1987 and two-thirds for each Fiscal Year thereafter."

"(d) Before making any allocation under this section for a fiscal year, the Secretary shall retain not less than one percent nor more than two percent of the amount appropriated for that year for State recreational boating safety programs for the payment of costs of administration of this chapter."

Mr. WALLOP. Mr. President, I move to add a new section 7 to the act.

This amendment would correct a funding problem which has recently arisen with the Federal Aid in Sport Fish Restoration Act. Moneys for this act are provided by the Wallop-Breaux fund, which was created through the efforts of Congressman JOHN BREAUX and myself in 1984. Funding comes from an excise tax on fishing equipment and motorboat fuel taxes. The trust fund provides support for fish restoration projects organized by State wildlife agencies and for boat safety programs. This year, $110.4 million will go to the State wildlife agencies for their projects.

Our efforts to ensure proper funding of the Wallop-Breaux program have been disrupted by OMB machinations to capture portions of the Wallop-Breaux fund, to be used for other purposes. We have successfully preserved the integrity of the program, but one problem has remained. There has been a longstanding disagreement on the allocation of the gasoline excise tax to the Wallop-Breaux fund. As my colleagues know, most of the excise tax is directed to the highway trust fund. However, a portion of the tax is collected from boaters who use motor fuel. It is this portion which is supposed to be directed to the Wallop-Breaux fund. For years, the Treasury Department has earmarked only 0.75 percent of the collections to Wallop-Breaux.

Five years ago, Treasury was directed to do an analysis of the tax to determine a more accurate assessment of the boaters' contributions. Finally, last summer, Treasury admitted that previous estimates had understated the contribution by 50 percent. A more accurate allocation, according to Treasury, is 1.08 percent of the excise tax. For fiscal year 1987, this would amount to an additional $31 million.

One would think that distribution of this additional money would be straightforward. However, that is not the case. OMB argues that there can be no shift in funds between the highway trust fund and the Wallop-Breaux funds for fiscal year 1987 because the budgets were set last spring with the presentation of the administration's budget. The fact that Treasury, several years late, has finally developed a more realistic allocation formula for Wallop-Breaux is irrelevant in OMB's eyes. The only way Wallop-Breaux can receive the $31 million for fiscal year 1987 is through legislative authorization.

The second problem is a dispute between the fish restoration advocates and the boaters over the proper division of the additional $31 million. Fortunately, there exists an umbrella organization, the American League of Anglers and Boaters [ALAB], which serves as a consensus-building forum for the various groups involved with the Wallop-Breaux fund. ALAB has reached agreement on the distribution of the $31 million for fiscal year 1987, and this is explained in the letter from ALAB which I would ask be inserted at the end of my remarks.

The amendment I have proposed provides a solution to the $31 million funding problem. It requires that the additional allocation to the Wallop-Breaux fund as a result of the revised formula for the gasoline excise tax be provided for fiscal year 1987. Of the additional funds, $15 million would go to the boating safety program. The remainder, about $16 million, would go to fish restoration. This split would be for fiscal year 1987. This would provide an opportunity to develop a permanent solution to the distribution of new revenues.

I would like to thank my colleague from Alaska, Senator STEVENS, and ALAB for their assistance in resolving this matter. I would urge the adoption of my amendment.

Mr. HOLLINGS. Mr. President, I strongly support the amendment offered today by the Senator from Wyoming. After several years of delay, the Department of the Treasury has completed its investigation of the amount of fuel used by the Nation's boaters. The review revealed that the prior estimate used to compute the transfer from the highway trust fund to the Wallop-Breaux trust fund was too low. In fact, it now appears that we were underestimating the amount by nearly 50 percent.

As a result, the Senator has proposed a 1-year fix that would more accurately reflect the amount of money being collected in motor boat fuel taxes, meaning that an estimated $31 million in additional revenues would be available in fiscal year 1987 for the Wallop-Breaux fund. One effect of this change would be to increase the authorized level for the boating safety portion of the fund by roughly half the additional amount, some $15 million. These funds will be available to the Coast Guard to help pay for its recreational boating programs.

The remaining $16 million will be allocated to the States for use in fish restoration work. These funds will be available to the States for fiscal year 1988.

This temporary solution will provide us the time necessary to review the program and establish a permanent, equitable division of the moneys between boating safety and fisheries enhancement.

I support the Senator's amendment and urge my colleagues to join us in its approval.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Wyoming.

The amendment (No. 3470) was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

Mr. GORTON. Mr. President, I have one question that I would like to discuss with the distinguished chairman of the Commerce Committee, Senator DANFORTH. The House of Representatives included a provision in its authorization bill that would have prohibited the construction of Coast Guard vessels in foreign yards. This provision is not inlcuded in the Senate bill. I had planned to offer an amendment to include a provision similar to the House's in the Senate bill, but I understand that such a provision would be unacceptable to the chairman and to the administration at this time. I also understand that the House has agreed to accept the Senate bill without the "build-foreign" prohibition.

Bearing those things in mind, I am willing to withdraw my amendment if my colleagues can assure me that we will pursue this issue in the next Congress. At present, there is no such "build-American" requirement for Coast Guard vessels, although there is one for the Navy and other branches of the armed services. In light of the critical role that the Coast Guard plays in protecting our national security, and the need to maintain a viable, state-of-the-art shipbuilding industry, it is important to assure that future Coast Guard construction be done in this country.

My amendment would have provided that, during fiscal year 1987, no Coast Guard vessel, and no major component of the hull or superstructure of a Coast Guard vessel, may be constructed or contracted for construction in a foreign shipyard. It also would allow the President to waive this requirement if he determined that to do so would be in the national security interest of the United States. This is essentially the same provision that was included in the House bill, except that

it is limited to the 1-year authorization period of the bill.

As I mentioned earlier, in addition to its many other functions, such as maritime safety, search and rescue, and drug interdiction, the Coast Guard is a vital component in our overall national security picture. It participates in various Department of Defense activities, and in naval fleet and interservice exercises. It has participated in every national conflict as an arm of the U.S. Navy. I believe it is clear that we must retain the capability to build Coast Guard vessels at home. It makes no sense for us to leave open the possibility that our shipyards could lose this work, and the improvements in naval engineering that it will produce, when they are already reeling from the loss of other shipbuilding work to foreign yards.

There has been strong support in the Senate for efforts to maintain a viable U.S. shipbuilding industry and merchant marine fleet. I believe that this issue should be part of that effort. I therefore ask if the chairman would be willing to examine it further in the 100th Congress.

Mr. DANFORTH. I thank my colleague for his cooperation in expediting action on the Coast Guard authorization bill. As for the build foreign prohibition. I believe that it is bad trade policy and contrary to the national interest. I recognize, however, that national security considerations may require that some Coast Guard vessels be built in the United States. I assure my colleague that I would be prepared to consider during the 100th Congress the extent to which the national security interest might be jeopardized by construction abroad.

Mr. HOLLINGS. The Coast Guard has received its share of attention lately as one of the essential arms of defense in our war on drugs. This is only fitting. The Coast Guard is our chief maritime law enforcement agency and last year seized drugs valued at $4.1 billion.

The legislation we are considering today, H.R. 4208, provides the core authorizations for fiscal year 1987. We have already passed special authorizations to help beef up the Coast Guard's drug interdiction capability and to augment its capacity to carry out the coastal defense of the United States that is crucial to our national security. H.R. 4208 authorizes the appropriations needed for the Agency's full range of missions.

Under the bill, $1.862 billion is authorized for operating expenses. Together with operating funds provided for under the anti drug and Defense Department authorization bills, this amount will permit vital drug interdiction work in the Caribbean to continue without interruption. It will also enable the Coast Guard to carry out its many other important missions—from search and rescue activities in aid of distressed ships and aircraft, to such impromptu assignments as salvaging the debris from the *Challenger* accident or maintaining order and security at the Statue of Liberty celebrations in New York Harbor on July 4. Further, the bill authorizes $267 million in support of the congressional effort to modernize the Coast Guard's vessels, aircraft, and shore stations, plus $20 million to conduct research, development, testing, and evaluation activities.

This legislation includes in section 17 an amendment that was added to the Senate anti drug bill (H.R. 5484) at the Commerce Committee's request. This provision will further strengthen Public Law 96-350, which has been very successful in facilitating convictions for maritime drug trafficking. That law, which I strongly supported, was enacted in 1980 because existing criminal statutes did not explicitly prohibit the high seas possession of illegal drugs with intent to manufacture or distribute. With the increasing use of foreign-flag vessels and vessels of no registry (known as stateless vessels), which were manned by foreign crews, the 1980 law was carefully crafted to reach beyond U.S. citizens and U.S.-flag vessels.

The enactment of Public Law 96-350 made a major difference in the effective prosecution of drug smugglers. Prior to its enactment, only 64 percent of those apprehended by the Coast Guard were accepted for prosecution, and then only 45 percent of those tried were convicted. In contrast, Coast Guard statistics for 1985 in the seventh district, which is where most of the maritime drug prosecutions occur, indicated that 83 percent of those apprehended were accepted for prosecution, and of those cases, 94 percent resulted in guilty verdicts in Federal court. The law was particularly effective for prosecutions of foreign offenders, who, before 1980, were virtually all deported or repatriated to their countries of origin without punishment—at U.S. taxpayer expense.

Despite its clear success, Public Law 96-350 has encountered several difficulties in the courtroom. One such problem was brought to the Congress' attention last year. This involved a Federal district court ruling that threatened to undermine the Coast Guard's enforcement practices with respect to foreign-flag vessels suspected for drug trafficking.

The typical situation arises after the master of a foreign vessel refuses a Coast Guard cutter's request to board. The captain of the cutter then must send his boarding request and supporting information up the chain of command to Coast Guard Headquarters and the State Department. The State Department in turn, through the affected American Embassy, seeks the cooperation of the country whose registry is being claimed. The necessary consent for boarding and possible seizure normally consists of oral communications by the flag nation, confirmed by subsequent messages or diplomatic notes. The court ruling in question indicated that oral consent was insufficient and that a more formal agreement with the flag nation was required prior to Coast Guard enforcement action.

The less formal procedures now in place often consume days, sometimes enabling the suspect vessel to escape Coast Guard surveillance. Under the more formal consent system envisioned in the court ruling, these days of delay could turn into weeks. Enforcement against foreign vessels would be nearly impossible.

To correct this potentially calamitous legal interpretation, I cosponsored legislation last session to make clear that foreign boarding and seizing authority granted by agreement via telephone, radio, or similar means is a fully valid consent. I added that provision to H.R. 739, an omnibus Coast Guard and maritime bill that passed the Senate on April 24 and was signed into law on May 19 of this year.

The language set forth in the bill we are considering today will address a broader problem that has plagued prosecutions under Public Law 96-350 from its inception. I understand that Federal prosecutors in cases involving drug seizures more than 12 miles off the U.S. coast spend the lion's share of their time before and during trial ensuring that they can prove that the United States had jurisdiction to seize the illegal drugs. In the past 3 or 4 years, cases involving over $200 million in contraband resulted in plea bargains for minimum sentences or were dropped altogether because of difficulties in obtaining foreign documents to prove jurisdiction. it is estimated that acquiring the requisite documentation in cases entailing seizure of a foreign or stateless vessel consumes from 2.5 to 8 days of U.S. Government personnel time for each case.

In my view, these contests over the U.S. Government's international jurisdiction to carry out enforcement actions are inappropriate for the courtroom. International law does not call for the United States to provide compliance with international standards in a domestic criminal prosecution.

The nation whose flag a vessel is flying at the time of a Coast Guard seizure would naturally have a legitimate complaint if the U.S. Government has failed to obtain its prior consent. But what has been happening is that criminal defendants from seized vessels are using jurisdictional complexities as a device for escaping conviction. They have been insisting at trial that the Government present ju-

71-059 O-87-36 (Pt. 22)

dicially-admissible documentary evidence from the affected foreign nation to prove consent. Prosecutors are thus compelled to ensure that documents relating to the consent are sufficient to withstand evidentiary objections. This can be a tall order when a foreign government, unfamiliar with U.S. legal procedures, has to generate the required documents. And on occasion, delays by foreign governments in providing the necessary documents have jeopardized cases because of the U.S. constitutional requirement to afford defendants with a speedy trial.

This legislation will eliminate the need to prepare for battle over these jurisdictional questions every time a maritime drug smuggling case comes to trial. It declares clearly that trafficking in controlled substances aboard vessels is a serious international problem, is universally condemned, and presents a specific threat to the security and societal well-being of the United States.

And it permits questions of international jurisdiction to be raised only by a foreign nation, not by an individual defendant. Yet the Coast Guard and other law enforcement agencies will not be relieved of their obligation to follow international law in carrying out a seizure. Approval of the flag country will still have to be obtained before a boarding can commence. The current practice of going through the State Department to the foreign government to obtain consent should continue without alteration. Our purpose is not to relieve U.S. agencies of the need to acquire flag-nation consent. Rather, it is to allow prosecutors to concentrate less on technicalities and more on proving the commission of a crime: possession of an illegal substance with intent to manufacture or distribute. This bill will enable them to focus on the right things.

We have also added a new offense under Public Law 96-350. This makes it unlawful to possess with intent to distribute a controlled substance aboard a vessel located within the territorial sea of another country where that country affirmatively consents to enforcement action by the United States.

Mr. President, I urge Senate approval of H.R. 4208 as reported by the Commerce Committee, as well as the additional amendments offered today here on the Senate floor. The Coast Guard is an invaluable national asset and this authorization legislation will help it to maintain its standards of excellence.

Mr. SARBANES. Mr. President, I support H.R. 4208, the Coast Guard Authorization Act of 1986. The Coast Guard has served our country with pride and distinction for over 200 years. It has played a major role in maintaining navigational safety, enforcing environmental standards, and protecting our Nation's coastline and harbors. It must have the personnel, equipment and training to carry out its important missions and this bill provides the resources the Coast Guard needs to do its job.

The Coast Guard must also, in my view, maintain core logistics and industrial capabilities sufficent to ensure the timely and effective performance of its many important missions. Earlier this year, I had urged the committee to approve the restrictions on contracting out of industrial and logistics activities of the Coast Guard and specifically of the Coast Guard's Curtis Bay Yard, included in section 5 of H.R. 4208, as passed by the House on May 6.

These restrictions are similar to those which currently apply to the other armed services. They are particularly critical to the Coast Guard Yard at Curtis Bay because of the unique importance of the industrial activities carried out there. The Curtis Bay Yard is the only shipbuilding and repair facility operated by the service and is responsible for the construction, repair, and renovation of both vessels and aids to navigation peculiar to the Coast Guard. It is also the location of the service's ship inventory control point and provides worldwide logistics support for the Coast Guard. It enjoys an enviable reputation for the quality of its work and for the efficiency of its work force and I am certain that the contracting out of the functions currently being performed at Curtis Bay would result in a significant deterioration of the Coast Guard's ability to perform its mission.

While the limitations contracting approved by the Senate Commerce Committee are not as far-reaching as those contained in the House bill, I look forward to working with my colleagues on the Commerce Committee to ensure that the Coast Guard retains control of basic logistic and industrial capabilities and urge adoption of this authorization bill.

The PRESIDING OFFICER. Is there further debate on the bill? If not, the question is on the engrossment of the committee amendment and third reading of the bill.

The amendment was ordered to be engrossed, and the bill to be read a third time. The bill was read a third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 4208), as amended, was passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

PUEBLO OF ZIA LAND BILL

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Energy Committee be discharged from further consideration of H.R. 5167, the Pueblo of Zia land bill, and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. There is no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 5167) to declare that the United States hold certain public domain lands or trusts for the Pueblo of Zia.

There being no objection, the Senate proceeded to the consideration of the bill.

AMENDMENT NO. 3471

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator DOMENICI and Senator BINGAMAN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. DOMENICI and Mr. BINGAMAN, proposes an amendment numbered 3471.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 1, line 10, strike "situated within Sandoval County, New Mexico, which is under the jurisdiction of the Bureau of Land Management of the Department of the Interior," and insert in lieu thereof "under the jurisdiction of the Bureau of Land Management of the Department of the Interior situated within Sandoval County, New Mexico,".

On page 4, strike lines 8 through 16 and insert in lieu thereof:

"(2) Plains Electric Generation and Transmission Cooperative, Inc. and its successors and assigns, shall be permitted to renew the right-of-way described in paragraph (1) under rules and regulations of the Secretary to the same extent and in the same manner that such permit could have been renewed if this Act had not been enacted.".

On page 5, line 8, strike the word "subsisting" and insert in lieu thereof "existing".

On pages 5 and 6, strike paragraph (2) and insert in lieu thereof:

"(2) Subject to valid existing rights, the leases described in subsection 4(d)(1) shall be administered under rules and regulations of the Secretary to the same extent and in the same manner that such leases would be administered if this Act had not been enacted.".

The PRESIDING OFFICER. Is there debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (No. 3471) was agreed to.

Mr. DOMENICI. Mr. President, after careful review and close scrutiny by the Members of the New Mexico congressional delegation, we agreed to seek passage of this important legislation for the Pueblo of Zia, NM.

On June 25, 1986, Senator BINGAMAN and I introduced S. 2599 in the Senate. On July 15, 1986, Congressmen LUJAN, SKEEN, and RICHARDSON introduced a companion bill in the House of Representatives. The House Committee on Interior and Insular Affairs held hearings and a markup in August 1986. The Senate Subcommittee on Public Lands held a hearing on September 19, 1986. House passage with two amendments occurred on September 16, 1986.

PURPOSE OF S. 2599 AND H.R. 5167

These bills transfer 1,844 acres of BLM land to the Pueblo of Zia to be held in trust by the United States of America. The Pueblo of Zia is the current permit holder of this "Parada Piedra ("Standing Rock") Allotment."

This allotment is completely surrounded by the Zia Pueblo Indian Reservation. Passage of this bill as amended consolidates the Zia Pueblo lands, now totalling 118,000 acres.

Existing interests on the land are fully protected and no new water rights are given.

Several religious shrines will be protected by enactment of this bill. The two oil and gas leases on this land are also protected along with rights of access to conduct exploration and related activities. These claims have been inactive for several years. The Plains Electric easement is also protected and permission is given for renewal of this important right-of-way.

The House of Representatives passed H.R. 5167 on Tuesday, September 16, 1986, with two committee amendments:

First. The first amendment is a technical correction to the land description after the BIA survey was completed.

Second. The second amendment strikes section 3 of the bill. This section provided that the land to be held in trust not be subject to taxation. This language is redundant as, by current law, trust lands held by the United States for an Indian tribe are not subject to taxation.

PURPOSE OF THE SENATE AMENDMENT

The administration expressed concern in the Public Lands Subcommittee hearing and in the House hearing about the management of the above-named easements and leases. Since the trust land will managed by the Bureau of Indian Affairs at the U.S. Department of Interior, the Bureau of Land Management felt that the leases and easements should also be administered by the BIA. Our amendment accomplishes this purpose by requiring that NIA manage the easements and leases "to the same extent and in the same manner" that such permit or lease would have been renewed under the BLM. Thus, the terms of the renewal agreements are subject to existing BLM rules and regulations for the existing easement and leases.

The entire New Mexico delegation supports this legislation for the Pueblo of Zia. The Pueblo has come to us in good faith with a just request. We are happy to support this effort and we urge our colleagues to agree to final passage of H.R. 5167 as amended.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it Pass?

So the bill (H.R. 5167), as amended, was passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

IMMIGRATION OF NAUM MEIMAN AND INNA KITROSSKAYA-MEIMAN

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Foreign Relations Committee be discharged from further consideration of House Concurrent Resolution 404, dealing with the immigration of Naum Meiman and Inna Kitrosskaya-Meiman, and I ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (H. Con. Res. 404) expressing the sense of the Congress that the Soviet Union should immediately provide for the immigration of Naum Meiman and Inna Kitrosskaya-Meiman and for the resolution of all divided family and emigration cases.

There being no objection, the Senate proceeded to the consideration of the concurrent resolution.

Mr. HART. Mr. President, I am grateful to Chairman LUGAR and Senator PELL for bringing House Concurrent Resolution 404 to the floor today. This measure was introduced by Congressman TIM WIRTH and was passed by the House of Representatives on October 8. I introduced a similar measure which now has the cosponsorship of 28 Senate colleagues.

This resolution has special meaning for all Coloradans. It deals with the case of Dr. Naum Meiman and his wife who have been trying for years to leave the Soviet Union. Their daughter, Olga Plum, is a constituent of mine in Colorado. The Meimans repeatedly have been denied emigration visas to seek medical treatment and to be reunited with their daughter. They have been told repeatedly that Mrs. Meiman is too ill to travel; that satisfactory medical treatment for Mrs. Meiman is already available in the Soviet Union; that a Ministry of Health certificate, stating that treatment abroad is necessary, must be presented to Soviet emigration officials—only to be told by the Ministry of Health that such certificates do not exist.

Now it has become clear that treatments no longer exists in the Soviet Union which can effectively treat Inna Meiman's cancer. But the technology does exist in the West. And yet she is still denied an exit visa. It is beyond my understanding what the Soviet authorities have to gain by continuing to deny the necessary exit visas to the Meimans. The time is running short for Inna and Naum Meiman, while the climate is ripe for a humanitarian gesture from the Soviet Union.

In the past I have raised the Meiman's case directly with Soviet Foreign Minister Gromyko and other Soviet officials when I visited Moscow; I have pursued the case with Soviet Ambassador Dobrynin and have written to General Secretary Mikhail Gorbachev asking his help in securing an exist visa for the Meimans. Because time is such a critical factor, it is appropriate that the Senate is joining our call to the General Secretary to intervene on behalf of the Meimans.

It is of the greatest importance that the Meimans and other Soviet Jews who wish to emigrate be reminded constantly that they have friends and supporters around the world. It is equally important the Soviet Government be constantly reminded of that fact.

The House author of this measure is Congressman WIRTH. Congressman WIRTH has been a leader in the struggle for human rights and the battle to permit Soviet citizens to emigrate to freedom throughout his career in the Congress. We have worked together on the Meiman case, and I was pleased to introduce the Senate version of this resolution several months ago.

Mr. President, passage of this resolution will be a candle in the window for all Soviet refuseniks, a message of hope for the Meiman family, and a statement of conscience by the U.S. Congress. I urge its adoption.

Mr. SIMON. Mr. President, on October 9, 1986, the House of Representatives passed a resolution which urges the Soviet Union to allow Naum and Inna Meiman to emigrate to Israel.

The Senate has just done the same in passing House Concurrent Resolution 404. I want to commend my colleagues for their concern. The Congress of the United States could not send a stronger message of support of the Meimans to the Soviet Union.

The Meimans troubles began when they applied to emigrate to Israel 10 years ago. Applying to emigrate from the Soviet Union results in termination of employment, ostracism from Soviet society and harassment by the Government. Inna is now critically ill with cancer. She desperately needs medical treatment only available to her in the West.

This case demands immediate attention. Inna is slipping each day. Let us hope that the Government of the Soviet Union will grant Inna and Naum another chance at life.

I strongly urge the Soviets to heed the Congress' call and resolve the Meiman's case by permiting them to emigrate to Israel.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (H. Con. Res. 404) was agreed to.

The preamble was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROBERT F. KENNEDY MEMORIAL STADIUM

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar 459, H.R. 2776, the RFK Stadium bill.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 2776), to amend the District of Columbia Stadium Act of 1957 to direct the Secretary of the Interior to convey title to the Robert F. Kennedy Memorial Stadium to the District of Columbia government.

There being no objection, the Senate proceeded to consider the bill.

AMENDMENT NO. 3472

(Purpose: To strike out provisions relating to the transfer of title of the stadium except for the building itself and to authorize the lease only of the stadium parking facilities)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator McCLURE, and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. McCLURE, proposes an amendment numbered 3472.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, beginning with line 7, strike out all through line 16 on page 4 and insert in lieu thereof the following:

"(b)(1) Not later than 180 days after the date of enactment of this subsection, the Secretary of the Interior shall—

"(A) convey without consideration to the government of the District of Columbia all right, title, and interest of the United States in and to the building comprising the stadium constructed under this Act; and

"(B) lease without consideration to the government of the District of Columbia—

"(i) the ground under; and

"(ii) the parking facilities associated with the stadium construction under this Act.

"(2) The lease authorized by paragraph (1)(B) shall be for a period of 50 years.

"(c) The conveyance and lease of real property under subsection (b) shall be subject to such terms and conditions (which shall be set forth in the instrument of conveyance) as will ensure that title to the property shall not be transferred by the District to any person or entity other than the United States or any political subdivision or agency of the District of Columbia or the United States and that the property will be used only for—

"(1) stadium purposes;

"(2) providing recreational facilities, open space, or public outdoor recreation opportunities;

"(3) such other public purposes for which the property was used prior to June 1, 1985; and

"(4) such other public purposes for which the property was approved for use by the Secretary with the concurrence of the National Capital Planning Commission prior to June 1, 1985.

"(d)(1) The instrument of conveyance and the lease referred to in subsection (c) shall provide that all right, title, and interest conveyed to the District of Columbia pursuant to such instrument of conveyance shall revert to the United States and the lease shall terminate if—

"(A) the terms and conditions referred to in subsection (c) have not been complied with, as determined by the Secretary, and

"(B) such noncompliance has not been corrected within ninety days after written notice of such noncompliance has been received by the Mayor of the District of Columbia.

Such noncompliance shall be treated as corrected if the District of Columbia and the Secretary enter into an agreement, with the concurrence of the National Capital Planning Commission, which the Secretary considers adequate to ensure that the property will be used in a manner consistent with the purposes referred to in subsection (c).

"(2) No person may bring an action respecting a violation of any term or condition referred to in subsection (c) before the expiration of ninety days after the date on which such person has notified the Mayor of the District of Columbia of the alleged violation. The notice shall include notice of such person's intention to bring an action to declare a reversion and termination of the lease under paragraph (1) of this subsection.

"(3) The conveyance of real property under subsection (b) shall be made subject to the condition that the District of Columbia shall bear the cost of removing structures or rehabilitating the land or stadium should the stadium revert to the United States pursuant to this subsection.

"(4) Any property which reverts to the Secretary under this subsection shall be administered by the Secretary as part of the Park System of the Nation's Capital in accordance with the provisions of the Act of August 25, 1916 (16 U.S.C. 1, 2-4), and other provisions of law generally applicable to units of the national park system.".

SEC. 2. TECHNICAL AMENDMENT.

Section 11 of the District of Columbia Stadium Act of 1957 (D.C. Code, sec. 2-330) is amended by inserting "(including any area designated A, B, C, D, or E on the revised map entitled 'Map to Designate Transfer of Stadium and Lease of Parking Lots to the District', prepared jointly by the National Park Service (National Capital Region) and the District of Columbia Department of Public Works for site development and dated October 1986 (NPS drawing number 831/87284-A))," after "property of any kind".

The PRESIDING OFFICER. Is there debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Idaho.

The amendment (No. 3472) was agreed to.

Mr. WARNER. Mr. President, I rise in support of H.R. 2776, as amended, authorizing the Secretary of the Interior to convey title of the Robert F. Kennedy Memorial Stadium to the District of Columbia government.

I wish to express my heartfelt appreciation to the Senator from Oregon [Mr. HATFIELD], for his willingness to work with me to draft some modifications to the bill, which I introduced and was earlier passed by the House of Representatives, that are acceptable to the Senate and the District of Columbia government.

This legislation as modified preserves the core of my original legislation to transfer title of the Robert F. Kennedy Memorial Stadium to the District of Columbia. It will enable the District to compete fairly for a major league baseball franchise for our Nation's Capital.

A favorable stadium lease, including needed repairs, is a critical ingredient in determining the site of the new franchise.

This bill satisfies the District's full requirements for tax-exempt bond financing to pay for an estimated $16 million in stadium modifications to accommodate a baseball franchise.

Further, the bill directs the Secretary of the Interior to enter into a 50-year lease arrangement with the city on the property under and surrounding the stadium comprising the parking lots.

This bill brings to fruition a proposal that originated several years ago.

President Carter's Task Force on the District of Columbia in 1977 laid the foundation, and now the Department of the Interior and the District of Columbia government have supported this step to complete a transfer.

Although this bill does not fully comprise the recommendations of the 1977 Task Force on the District of Columbia, I believe the District has made a substantial financial investment in the stadium. The District has operated and maintained the stadium since its construction, and has financed two-thirds of the stadium costs—$22.7 million of the total $36.2 million.

Let me state for my colleagues that the Congressional Budget Office, in a letter to the House District of Columbia Committee on June 18, 1985, has determined that this transfer "will not affect the budgets of either the Federal Government or the District of Columbia."

I want to assure my colleagues that this title transfer will not be a departure from the normal use of the stadium, or its operating procedures.

Provisions are included which require the District of Columbia to operate the stadium for purposes previously approved by the Department of the Interior.

Should the terms and conditions of this agreement be violated, an orderly process for returning ownership to the Federal Government is provided.

Mr. President, first and foremost, the Federal Government is getting out of the business of operating a stadium facility, and returning to the District of Columbia a facility for which it has been financially responsible.

Second, assisting to return major league baseball to our Nation's Capital will be a unifying force for the entire Metropolitan Washington area.

I urge my colleagues to adopt this bill, as amended.

Mr. WARNER. If the distinguished Senator from Oregon, Mr. HATFIELD, would be willing to engage in a colloquy with me to clarify the intent of section (d) of the amendment. Section (d) provides for a reverter clause that would cause title to the property to revert to the Federal Government in the event that specified public purpose uses are not complied with by the District of Columbia.

If a reversion does occur, there is a question of the contractual rights of persons who have purchased bonds sold to finance the improvements to the stadium, or the rights of leaseholders who are using the stadium, are altered or nullified. I want all Senators, the administration, and the District of Columbia to understand that it is clearly not our intention to change the terms of the bonds sold to finance the improvements in the stadium.

May I inquire of the Senator from Oregon if that is his understanding of section (d) of his amendment?

Mr. HATFIELD. The Senator from Virginia, Mr. WARNER's understanding of section (d) of the amendment is correct. It is my intention that the bondholders and leaseholders will continue to have recourse in the unlikely event that the reversion clause is activated. If the Federal Government does take title to the stadium, such action does not disturb or impair those existing contracts, provided the contracts themselves are not the cause of the reversion.

Mr. McCLURE. I wish to concur in the remarks offered by the gentleman from Oregon, Senator HATFIELD, that section (d) will not interrupt the terms of the bonds or adversely affect the bondholders or leaseholders.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time. The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

So the bill (H.R. 2776), as amended, was passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

IMPROVEMENT OF THE HEALTH STATUS OF NATIVE HAWAIIANS

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 1089, S. 2243, to improve the health status of native Hawaiians.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 2243) to improve the health status of native Hawaiians, and for other purposes, reported with an amendment in the nature of a substitute.

At the appropriate place in the committee amendment, insert the following:

PACIFIC BASIN DISEASE RESEARCH INSTITUTE

SEC. . (a) The Secretary shall make a grant under section 720(a)(1) of the Public Health Service Act to the University of Hawaii in Honolulu, Hawaii, for the construction of a building for a Pacific Basin disease research institute. Notwithstanding sections 702(b) and 721(c) of such Act, the Secretary is not required to secure the advice of the National Advisory Council on Health Professions Education with respect to such grant.

(b) The Federal share of the necessary costs of construction, as determined by the Secretary, of the building described in subsection (a), shall be 50 percent.

(c) To carry out this section, there are authorized to be appropriated $5,000,000. Amounts appropriated under this section shall remain available until expended.

Mr. INOUYE. Mr. President, the amendment which Senator MATSUNAGA and I are offering today would provide $5 million for the construction of a Pacific Basin Disease Research Institute at the University of Hawaii.

This proposal follows up on a special hearing which the Senate Appropriations Committee held in Honolulu, HI. The facility is necessary for the University of Hawaii to continue its efforts throughout the Pacific basin and, given the pressing Federal interest involved, I honestly do not feel that it is appropriate that the State legislature be required to provide all of the funds necessary.

Mr. President, I would also like to express my personal appreciation to Senator ORRIN HATCH, chairman of the Senate Labor and Human Resources Committee, who earlier this session agreed with me that the establishment of this institute would be in our Nation's best interest.

The Pacific basin region is geographically quite remote from our Nation's Capital and I do appreciate the time Senator HATCH's committee took, not only to visit the State of Hawaii, but to discuss with the leadership of those who provide necessary health care for the region, the importance of providing an integrated approach to the underlying Federal responsibility.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Hawaii.

The amendment (No. 3473) was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendments to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 2243

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS

SECTION 1. The Congress finds that—

(1) the Federal Government retains the legal responsibility to enforce the administration of a public trust responsibility for the betterment of the conditions of Native Hawaiians by the State of Hawaii;

(2) in furtherance of the State of Hawaii's public trust responsibility for the betterment of the conditions of Native Hawaiians, contributions by the Federal Government to the provision of health education and health services to maintain and improve the health status of Native Hawaiians are con-

sistent with the historical and unique legal relationship of the Federal Government with the government that represented the indigenous native people of Hawaii;

(3) it is the policy of the Federal Government to raise the health status of Native Hawaiians to the highest possible level and to encourage the maximum participation of Native Hawaiians in the planning and management of health services in order to achieve this objective;

(4) Federal support for programs that provide health care to Native Hawaiians has resulted in a reduction in the prevalence and incidence of preventable illnesses among Native Hawaiians and in a reduction in premature deaths of Native Hawaiians; and

(5) further improvement in the health status of Native Hawaiians is necessary on the basis of findings that—

(A) Native Hawaiians experience the highest age-sex standardized mortality rate in the State of Hawaii,

(B) Native Hawaiians experience a lower life expectancy than any other population group in the State of Hawaii,

(C) Native Hawaiians experience a higher rate of infant mortality, congenital abnormalities and underweight infants than any other population in the State of Hawaii,

(D) Native Hawaiians have the greatest risk of diabetes, heart disease, and some forms of cancer than any other population in the State of Hawaii,

(E) Native Hawaiians experience the onset of diabetes, heart disease, and hypertension at earlier ages than other populations in the State of Hawaii,

(F) Native Hawaiians have significantly higher rates of heart disease and hypertension than other populations in the State of Hawaii,

(G) Native Hawaiians have one of the highest cancer rates of any population in the United States and Native Hawaiians have the poorest survival rates from cancer than any other population in the State of Hawaii,

(H) Native Hawaiian pregnant women rank the highest of all populations of pregnant women in the State of Hawaii in—

(i) receiving late or no prenatal care,

(ii) smoking and alcohol consumption during pregnancy,

(iii) toxemia and urinary tract infections during pregnancy, and

(iv) complications of pregnancy over age 35,

(I) Native Hawaiians have higher rates of suicide among young adult and elderly males than the statewide population as a whole,

(J) Native Hawaiian children have one of the highest periodontal disease rates and the poorest dental hygiene of any other population in the State of Hawaii,

(K) Native Hawaiians have higher proportion of alcohol and narcotics use and school performance impairment than the statewide population as a whole,

(L) Native Hawaiians have higher levels of stress than the statewide population as a whole based on leading stress indicators,

(M) Native Hawaiians are underrepresented in rates of participation in health education, health promotion, screening, and referral programs,

(N) utilization of mental health services by Native Hawaiians is significantly below that of other populations in the State of Hawaii, and

(O) Native Hawaiians are underrepresented in the health professions.

DEFINITIONS

SEC. 2. For purposes of this Act—

(1) The term "disease prevention" includes—

(A) immunizations,

(B) control of high blood pressure,

(C) control of sexually transmittable diseases,

(D) prevention and control of diabetes,

(E) pregnancy and infant care, including prevention of fetal alcohol syndrome,

(F) control of toxic agents,

(G) occupational safety and health,

(H) accident prevention,

(I) fluoridation of water, and

(J) control of infectious agents.

(2) The term "health promotion" includes—

(A) cessation of tobacco smoking,

(B) reduction in the misuse of alcohol and drugs,

(C) improvement of nutrition,

(D) improvement in physical fitness,

(E) family planning, and

(F) control of stress.

(3) The term "Native Hawaiian" means any individual who has any ancestors that were natives, prior to 1778, of the area that now comprises the State of Hawaii.

(4) The term "Native Hawaiian organization" means any organization—

(A) which serves and represents the interests of Native Hawaiians,

(B) which is recognized by the Office of Hawaiian Affairs of the State of Hawaii and E Ola Mau for the purpose of planning, conducting, or administering programs (or portion of programs) authorized under this Act, and

(C) in which Native Hawaiian health professionals significantly participate in the planning, management, monitoring, and evaluation of health services.

(5) The term "Native Hawaiian educational institution" means any educational institution that—

(A) serves and represents the interests of Native Hawaiians, and

(B) has as a primary and stated purpose the provision of educational services to Native Hawaiians.

(6) The term "Advisory Board" means the Native Hawaiian Health Promotion and Disease Prevention Advisory Board established under section 3(b).

(7) The term "Secretary" means the Secretary of Health and Human Services.

HEALTH PROMOTION AND DISEASE PREVENTION

SEC. 3. (a)(1) For fiscal year 1989, and for each fiscal year thereafter, the Secretary shall, in consultation with the Advisory Board established under subsection (b), enter into contracts with Native Hawaiian organizations under which the Secretary shall provide funds to Native Hawaiian organizations to establish and administer programs of health promotion and disease prevention designed to serve Native Hawaiians.

(2) The program that is to be established and administered under each contract entered into under paragraph (1) shall—

(A) provide necessary preventive-oriented health services, including maternal and child health care and mental health care, through the establishment of community health centers, subject to the availability of appropriations authorized under section 4(a)(3)(B);

(B) provide for the collection of data related to the prevention of diseases and illnesses among Native Hawaiians, including the prevention of fetal alcohol syndrome, hypertension, heart disease, and diabetes;

(C) provide for medical and general health-related research into the diseases that are most prevalent among Native Hawaiians including, but not limited to, heart disease, hypertension, cancer, and diabetes;

(D) provide for research into the mental health problems that are most prevalent among Native Hawaiians including, but not limited to, alcoholism, substance abuse, reduction of stress, and child abuse;

(E) provide for education in health promotion and disease prevention in the Native Hawaiian population by Native Hawaiian community outreach workers and Native Hawaiian nurses;

(F) provide for health planning in areas which shall include, but not be limited to, health planning in maternal and child health, nutrition, disease prevention, health promotion, health education, and mental health; and

(G) provide training for Native Hawaiian community health outreach workers as paraprofessionals in the provision of health care and health education in Native Hawaiian communities by means of a curriculum which—

(i) combines education in the theories of health care with supervised practical experience in the provision of health care,

(ii) provides instruction and practical experience in health promotion and disease prevention activities, particularly—

(I) nutrition,

(II) physical fitness,

(III) weight control,

(IV) cessation of tobacco smoking,

(V) stress management,

(VI) control of alcohol and substance abuse, including prevention of fetal alcohol syndrome,

(VII) control of high blood pressure,

(VIII) prevention and control of diabetes,

(IX) prevention of lifestyle related accidents,

(X) prenatal and postnatal infant health care, and

(XI) maternal health care, and

(iii) provides instruction in the most current and effective social, educational, and behavioral approaches to the establishment and maintenance of good health habits.

(b)(1) There is hereby established the Native Hawaiian Health Promotion and Disease Prevention Advisory Board.

(2)(A) The Advisory Board shall be composed of—

(i) an individual appointed to the Advisory Board by the Secretary from among nominations submitted to the Secretary by the Governor of the State of Hawaii, and

(ii) individuals representing each of the following organizations who are appointed to the Advisory Board by the Secretary from among nominations submitted by each of the following organizations:

(I) Alu Like, Inc.;

(II) the Office of Hawaiian Affairs of the State of Hawaii;

(III) E Ola Mau or any other organization composed of Native Hawaiian health care professionals;

(IV) the University of Hawaii School of Medicine;

(V) the University of Hawaii School of Public Health;

(VI) the University of Hawaii School of Nursing;

(VII) the Hawaii State Department of Health;

(VIII) the Kamehameha Schools, Bernice Pauahi Bishop Estate;

(IX) the Liliuokalani Trust;

(X) the Hawaii Nurses Association;

(XI) the Hawaii Medical Association;
(XII) the Hawaii State Department of Social Services and Housing;
(XIII) the Waianae Coast Comprehensive Health Center, or its successor organization, the Hawaii State Association of Community Health Centers;
(XIV) the Hawaii Psychological Association;
(XV) the Hawaii Psychiatric Association;
(XVI) the Hawaii Social Work Association;
(XVII) the Hawaii Society of Public Health Educators;
(XVIII) the Hawaii Dietetic Association;
(XIX) the Hawaii State Board of Education;
(XX) the Department of Hawaiian Home Lands;
(XXI) the Hawaii Dental Association; and
(XXII) any other organization designated by the Secretary for purposes of this subparagraph.

(B)(i) Except as provided in clause (ii), the term of office for each member of the Advisory Board shall be 3 years.

(ii) Of the initial members of the Advisory Board—

(I) the member representing the Governor of Hawaii and the members representing organizations listed in clauses (I), (II), (III), (IV), (V), and (VI) of subparagraph (A)(ii) shall have a term of 3 years,

(II) the members representing the organizations listed in clauses (VII), (VIII), (IX), (X), (XI), (XII), and (XIII) of subparagraph (A)(ii) shall have a term of 2 years, and

(III) the members representing all other organizations listed in subparagraph (A)(ii) shall have a term of 1 year.

(C) A vacancy on the Advisory Board shall be filled in the same manner in which the original appointment was made. A member so appointed shall serve for the remainder of the term of office to which such member is appointed.

(D) Individuals nominated for, and appointed to, the Advisory Board under subparagraph (A) should, to the extent feasible, be Native Hawaiians.

(E) The members of the Advisory Board shall elect a chairman from among the members of the Advisory Board.

(3) The Advisory Board—

(A) shall oversee—

(i) the awarding of contracts under subsection (a)(1),

(ii) the administration of programs for which contracts are entered into under subsection (a)(1), and

(iii) the grants awarded under subsection (c), and

(B) shall prepare and submit to the Secretary reports for each calendar quarter on the oversight conducted under subparagraph (A), and

(C) shall prepare and submit to the Congress, through the Secretary, annual reports containing recommendations on activities that—

(i) are designed to address the health care needs of Native Hawaiians, and

(ii) may be conducted by—

(I) the State of Hawaii,

(II) the Federal Government,

(III) community health centers,

(IV) Native Hawaiian organizations, or

(V) private health care providers.

(4) The provisions of section 14 and subsections (e) and (f) of section 10 of the Federal Advisory Committee Act (5 U.S.C. Appendix 2) shall not apply with respect to the Advisory Board.

(c)(1) Subject to the availability of funds appropriated under the authority of paragraph (3), the Secretary shall provide grants to Native Hawaiian organizations for the purpose of developing the management capabilities of such organizations to plan and operate the health promotion and disease prevention program that is to be established under contracts entered into in subsection (a).

(2) The total amount of grants that may be made to any Native Hawaiian organization under paragraph (1) shall not exceed $75,000.

(3) There are authorized to be appropriated $600,000 for fiscal year 1987, and each fiscal year thereafter, for the purpose of funding grants under paragraph (1).

(d)(1) The Secretary is authorized to enter into an agreement with any Native Hawaiian organization (or any Native Hawaiian educational institution) under which the Secretary is authorized to assign personnel of the Department of Health and Human Services with expertise identified by such Native Hawaiian organization (or such Native Hawaiian educational institution) to such Native Hawaiian organization (or to such Native Hawaiian educational institution) on detail for the purpose of providing education in health promotion and disease prevention to Native Hawaiian children who are underserved.

(2) Any assignment of personnel made by the Secretary under any agreement entered into under the authority of paragraph (1) shall be treated as an assignment of Federal personnel to a local government that is made in accordance with subchapter VI of chapter 33 of title 5, United States Code.

(e)(1) The Secretary shall establish in the State of Hawaii, as a demonstration project, a Native Hawaiian Program for Health Promotion and Disease Prevention for the purpose of exploring ways to meet the unique health care needs of Native Hawaiians.

(2) The demonstration program that is to be established under paragraph (1) shall—

(A) provide necessary preventive-oriented health services, including health education and mental health care,

(B) develop innovative training and research projects,

(C) establish cooperative relationships with the leadership of the Native Hawaiian community, and

(D) ensure that a continuous effort is made to establish programs which can be of direct benefit to other Native American people.

(3) The Secretary is authorized to enter into contracts with Native Hawaiian organizations for the purpose of assisting the Secretary in meeting the objectives of the demonstration program that is to be established under paragraph (1).

(4) The Secretary shall submit to the Congress an annual report on the status and accomplishments of the program during each of the fiscal years 1987, 1988, and 1989.

(5) There are authorized to be appropriated $500,000 for each of the fiscal years 1987, 1988, and 1989, for the purpose of carrying out the provisions of this subsection.

(f)(1) The Secretary shall include in any contract which the Secretary enters into with any Native Hawaiian organization under this section such conditions as the Secretary considers necessary to ensure that the objectives of such contract are achieved.

(2) The Secretary shall develop procedures to evaluate compliance with, and performance of, contracts entered into by Native Hawaiian organizations under this section.

(3) The Secretary shall conduct an annual onsite evaluation of each Native Hawaiian organization which has entered into a contract under this section for purposes of determining the compliance of such organization with, and evaluating the performance of such organization under, such contract.

(4) If, as a result of the evaluations conducted under paragraph (3), the Secretary determines that a Native Hawaiian organization has not complied with or satisfactorily performed a contract entered into under this section, the Secretary shall, prior to renewing such contract, attempt to resolve the areas of noncompliance or unsatisfactory performance and modify such contract to prevent future occurrences of such noncompliance or unsatisfactory performance. If the Secretary determines that such noncompliance or unsatisfactory performance cannot be resolved and prevented in the future, the Secretary shall not renew such contract with such organization and is authorized to enter into a contract under this section with another Native Hawaiian organization that serves the same population of Native Hawaiians which is served by the Native Hawaiian organization whose contract is not renewed by reason of this paragraph.

(5) In determining whether to renew a contract entered into with a Native Hawaiian organization under this section, the Secretary shall—

(A) review the records of the Native Hawaiian organization and the reports submitted by the Advisory Board under subsection (b)(3)(B) with respect to such organization, and

(B) shall consider the results of the onsite evaluations conducted under paragraph (3).

(6) All contracts entered into by the Secretary under this section shall be in accordance with all Federal contracting laws and regulations except that, in the discretion of the Secretary, such contracts may be negotiated without advertising and need not conform to the provision of the Act of August 24, 1935 (40 U.S.C. 270a, et seq.).

(7) Payments made under any contract entered into under this section may be made in advance, by means of reimbursement, or in installments and shall be made on such conditions as the Secretary deems necessary to carry out the purposes of this section.

(8) Notwithstanding any other provision of law, the Secretary may, at the request or consent of a Native Hawaiian organization, revise or amend any contract entered into by the Secretary with such organization under this section as necessary to carry out the purposes of this section, except that whenever such organization requests retrocession of any contract entered into under this section, such retrocession shall become effective upon a date specified by the Secretary that is not more than 120 days after the date of the request by such organization or at such later date as may be mutually agreed to by the Secretary and such organization.

(9)(A) For each fiscal year during which a Native Hawaiian organization receives or expends funds pursuant to a contract entered into under this section, such organization shall submit to the Secretary a quarterly report on—

(i) activities conducted by the organization under the contract,

(ii) the amounts and purposes for which Federal funds were expended, and

(iii) such other information as the Secretary may request.

(B) The reports and records of any Native Hawaiian organization which concern any contract entered into under this section

shall be subject to audit by the Secretary and the Comptroller General of the United States.

(10) The Secretary shall allow as a cost of any contract entered into under this section the cost of an annual private audit conducted by a certified public accountant.

(11) The authority of the Secretary to enter into contracts under this section shall be to the extent, and in amounts, provided for in appropriation Acts.

COMMUNITY HEALTH CENTERS; NATIONAL HEALTH SERVICE CORPS PROGRAM

SEC. 4. (a)(1) The Secretary is authorized—

(A) to designate Native Hawaiians as a medically underserved population for purposes of section 330 of the Public Health Service Act (42 U.S.C. 254c),

(B) to provide planning grants (no more than 8 and of no more than $100,000 per grant) to Native Hawaiian organizations, or to any organization of health care professionals serving Native Hawaiians, for the purpose of planning community health centers to serve the health needs of Native Hawaiian communities, and

(C) to establish community health centers under section 330 of such Act to serve the health needs of Native Hawaiian communities.

(2) The Secretary shall consult with the Governor of Hawaii regarding any grants that may be made under section 330(c)(1) of the Public Health Service Act (42 U.S.C. 254c(c)(1)), or under paragraph (1)(B), for the planning and developing of community health centers to serve the health needs of Native Hawaiian communities.

(3) In addition to any other amounts authorized to be appropriated for carrying out section 330 of the Public Health Service Act, there are authorized to be appropriated for fiscal year 1987—

(A) $800,000 for the purpose of providing planning grants authorized under paragraph (1)(B), and

(B) $2,800,000 for the purpose of establishing under section 330 of the Public Health Service Act no more than 8 community health centers to serve the health needs of Native Hawaiian communities,

such sums to remain available until expended, without fiscal year limitation. No more than $350,000 of the funds authorized to be appropriated under subparagraph (B) may be expended for each community health center.

(b) The Secretary is authorized to designate Native Hawaiians as a population group which has a health manpower shortage for purposes of subpart II of part C of title III of the Public Health Service Act.

HEALTH SERVICE SCHOLARSHIP PROGRAM

SEC. 5. (a) Subject to the availability of funds appropriated under the authority of subsection (c), the Secretary shall provide scholarship assistance to students who—

(1) meet the requirements of section 338A(b) of the Public Health Service Act (42 U.S.C. 254l(b)), and

(2) are Native Hawaiians.

(b) The scholarship assistance provided under subsection (a) shall be provided under the same terms and subject to the same conditions, regulations, and rules that apply to scholarship assistance provided under section 338A of the Public Health Service Act (42 U.S.C. 254l).

(c) There are authorized to be appropriated $1,800,000 for fiscal year 1987, and for each fiscal year thereafter, for the purpose of funding the scholarship assistance provided under subsection (a).

HEALTH CARE REFERRAL SERVICES FOR NATIVE HAWAIIANS

SEC. 6. (a)(1) The Secretary shall enter into contracts with Native Hawaiian organizations for the provision of health care referral services for Native Hawaiians. Any such contract shall include requirements that the Native Hawaiian organization successfully undertake to—

(A) determine the population of Native Hawaiians who are, or could be, recipients of health care referral services,

(B) determine the current health status of Native Hawaiians served by the Native Hawaiian organization,

(C) determine the current health care needs of Native Hawaiians served by the Native Hawaiian organization,

(D) identify all public and private health services resources which are, or could be, available to Native Hawaiians,

(E) determine the use of public and private health services resources by Native Hawaiians,

(F) assist such health services resources in providing services to Native Hawaiians,

(G) assist Native Hawaiians in becoming familiar with such health services resources and in utilizing such health services resources,

(H) provide basic health education to Native Hawaiians, including education in health promotion and disease prevention through a community health outreach program that uses Native Hawaiian community health outreach workers,

(I) establish and implement manpower training programs to accomplish the referral and education tasks set forth in subparagraphs (F), (G), and (H),

(J) identify any disparity between the health needs of Native Hawaiians that are not being met and the resources available to meet such needs, and

(K) make recommendations to the Secretary and Federal, State, local, and other resource agencies on methods of improving health service programs to meet the needs of Native Hawaiians.

(2) The Secretary shall prescribe regulations which provide the criteria for selecting Native Hawaiian organizations to enter into contracts under this subsection. Such criteria shall, among other factors, include—

(A) the extent of the health care needs of Native Hawaiians served by the Native Hawaiian organization that are not being met,

(B) the size of the Native Hawaiian population served by the Native Hawaiian organization,

(C) the accessibility to, and utilization of, health care services by Native Hawaiians served by the Native Hawaiian organization,

(D) the extent, if any, to which the activities that are required to be undertaken under paragraph (1) would duplicate—

(i) any previous or current public or private health services project that was, or is, funded by any means other than a contract entered into under this section, or

(ii) any project funded by means of a contract entered into under this section,

(E) the capability of the Native Hawaiian organization to—

(i) perform the activities that are required to be undertaken under paragraph (1), and

(ii) enter into a contract with the Secretary under this subsection,

(F) the satisfactory performance and successful completion by the Native Hawaiian organization of other contracts entered into with the Secretary under this section,

(G) the appropriateness and likely effectiveness of conducting the activities that are required to be undertaken under paragraph (1), and

(H) the extent of existing participation, or likely future participation, in the activities that are required to be undertaken under paragraph (1) by appropriate health and health-related Federal, State, local, and other agencies.

(b)(1) The Secretary may enter into contracts under this subsection with Native Hawaiian organizations which have not entered into a contract with the Secretary under subsection (a). The purpose of entering into a contract under this subsection shall be to determine—

(A) the matters described in paragraph (2) in order to assist the Secretary in assessing the health status and health care needs of Native Hawaiians served by the Native Hawaiian organization, and

(B) whether the Secretary should enter into a contract under subsection (a) with the Native Hawaiian organization.

(2) Any contract entered into by the Secretary under this subsection shall include requirements that the Native Hawaiian organization—

(A) document the health care status and health care needs of Native Hawaiians served by the Native Hawaiian organization,

(B) with respect to Native Hawaiians served by the Native Hawaiian organization, determine the matters described in subparagraphs (B), (C), (D), and (H) of subsection (a)(2), and

(C) complete performance of the contract within one year after the date on which the Secretary and the Native Hawaiian organization enter into such contract.

(c)(1) The Secretary shall include in any contract which the Secretary enters into with any Native Hawaiian organization under this section such conditions as the Secretary considers necessary to encourage the establishment of programs which make health care services more accessible to Native Hawaiians.

(2) The Secretary shall develop procedures to evaluate compliance with, and performance of, contracts entered into by Native Hawaiian organizations under this section. Such procedures shall include provisions for carrying out the requirements of this section.

(3) The Secretary shall conduct an annual onsite evaluation of each Native Hawaiian organization which has entered into a contract under subsection (a) for purposes of determining the compliance of such organization with, and evaluating the performance of such organization under, such contract.

(4) If, as a result of the evaluations conducted under paragraph (3), the Secretary determines that a Native Hawaiian organization has not complied with or satisfactorily performed a contract entered into under subsection (a), the Secretary shall, prior to renewing such contract, attempt to resolve the areas of noncompliance or unsatisfactory performance and modify such contract to prevent future occurrences of such noncompliance or unsatisfactory performance. If the Secretary determines that such noncompliance or unsatisfactory performance cannot be resolved and prevented in the future, the Secretary shall not renew such contract with such organization and is authorized to enter into a contract under subsection (a) with another Native Hawaiian organization that serves the same population of Native Hawaiians which is served by the Native Hawaiian organization whose

contract is not renewed by reason of this paragraph.

(5) In determining whether to renew a contract entered into with a Native Hawaiian organization under subsection (a), or whether to enter into a contract with a Native Hawaiian organization under subsection (a) which has completed performance of a contract entered into under subsection (b), the Secretary shall—

(A) review the records of the Native Hawaiian organization and the reports submitted under subsection (e), and

(B) in the case of a renewal of a contract entered into under subsection (a), shall consider the results of the onsite evaluations conducted under paragraph (3).

(d)(1) No contract entered into under this section may provide for a total amount of payments under the contract by the Federal Government that exceeds $125,000.

(2) All contracts entered into by the Secretary under this section shall be in accordance with all Federal contracting laws and regulations except that, in the discretion of the Secretary, such contracts may be negotiated without advertising and need not conform to the provision of the Act of August 24, 1935 (40 U.S.C. 270a, et seq.).

(3) Payments made under any contract entered into under this section may be made in advance, by means of reimbursement, or in installments and shall be made on such conditions as the Secretary deems necessary to carry out the purposes of this section.

(4) Notwithstanding any other provision of law, the Secretary may, at the request or consent of a Native Hawaiian organization, revise or amend any contract entered into by the Secretary with such organization under this section as necessary to carry out the purposes of this section, except that whenever such organization requests retrocession of any contract entered into under this section, such retrocession shall become effective upon a date specified by the Secretary that is not more than 120 days after the date of the request by such organization or at such later date as may be mutually agreed to by the Secretary and such organization.

(5) All contracts entered into under this section with Native Hawaiian organizations, and all regulations prescribed under this section, shall include provisions to assure the fair and uniform provision to Native Hawaiians of health care referral services and assistance under such contracts by such organizations.

(e)(1) For each fiscal year during which a Native Hawaiian organization receives or expends funds pursuant to a contract entered into under this section, such organization shall submit to the Secretary a quarterly report on—

(A) in the case of a contract entered into under subsection (b), disparities identified and recommendations made under subparagraphs (J) and (K) of subsection (a)(1),

(B) activities conducted by the organization under the contract,

(C) the amounts and purposes for which Federal funds were expended, and

(D) such other information as the Secretary may request.

(2) The reports and records of any Native Hawaiian organization which concern any contract entered into under this section shall be subject to audit by the Secretary and the Comptroller General of the United States.

(3) The Secretary shall allow as a cost of any contract entered into under subsection (a) the cost of an annual private audit conducted by a certified public accountant.

(f)(1) The authority of the Secretary to enter into contracts under this section shall be to the extent, and in an amount, provided for in appropriation Acts.

(2) There are authorized to be appropriated $625,000 for fiscal year 1987, and for each fiscal year thereafter, for the purpose of funding contracts entered into under this section.

ACCESS TO MEDICARE AND MEDICAID SERVICES

SEC. 7. (a) The Secretary shall, in consultation with Native Hawaiian organizations, conduct a study of any barriers which may exist to the participation of Native Hawaiians in programs established under title XVIII of the Social Security Act (medicare) or under title XIX of the Social Security Act (medicaid).

(b) By no later than the date which is one year after the date of enactment of this Act, the Secretary shall submit to the Congress a report on the study conducted under subsection (a). Such report shall include—

(1) recommendations for legislation which—

(A) would remove any barriers to participation identified in such study, and

(B) would encourage participation by Native Hawaiians in the programs described in subsection (a), and

(2) estimates of—

(A) the potential number of Native Hawaiians eligible for medicare,

(B) the potential number of Native Hawaiians eligible for medicaid,

(C) the number of Native Hawaiians participating in the medicare program, and

(D) the number of Native Hawaiians participating in the medicaid program.

GENERAL AUTHORIZATION

SEC. 8. There are authorized to be appropriated for fiscal year 1987, and for each fiscal year thereafter, such sums as may be necessary to carry out the provisions of this Act for which a specific authorization of appropriations is not otherwise provided for in this Act.

PACIFIC BASIN DISEASE RESEARCH INSTITUTE

SEC. 9. (a) The Secretary shall make a grant under section 720(a)(1) of the Public Health Service Act to the University of Hawaii in Honolulu, Hawaii, for the construction of a building for a Pacific Basin disease research institute. Notwithstanding sections 702(b) and 721(c) of such Act, the Secretary is not required to secure the advice of the National Advisory Council on Health Professions Education with respect to such grant.

(b) The Federal share of the necessary costs of construction, as determined by the Secretary, of the building described in subsection (a), shall be 50 percent.

(c) To carry out this section, there are authorized to be appropriated $5,000,000. Amounts appropriated under this section shall remain available until expended.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENTS TO THE WASHINGTON METRO AREA TRANSIT REGULATION COMPACT

Mr. SIMPSON. Mr. President, I send the enclosed joint resolution to the desk on behalf of Senators MATHIAS, SARBANES, and others, and ask for its immediate consideration.

□ 1040

The assistant legislative clerk read as follows:

A joint resolution (S.J. Res. 428) granting the consent and approval of Congress for the State of Maryland, the Commonwealth of Virginia, and the District of Columbia to amend the Washington Metropolitan Area Transit Regulation Compact.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the joint resolution.

Mr. MATHIAS. Mr. President. I am today introducing, for myself and Senators SARBANES, WARNER, and TRIBLE, legislation which gives consent to the amendments passed by Virginia, Maryland, and the District of Columbia modifying the Washington Metropolitan Area Transit Authority's interstate compact. I am inserting for the record background information on the WMATA compact.

These changes to the compact will facilitate the continuation of WMATA's current activities in a more efficient and orderly way.

They involve the public hearing requirements on matters relating to service changes and emergency situations; WMATA financial investments; Metro's procurement policies; and improvements in public safety.

With regard to the public hearing requirements, the amendments permit WMATA to make minor or experimental bus service changes, provide for emergency situations, and experiment with particular buslines without holding a public hearing. For example, if Maryland planners detect a market for a particular line, they can provide the service for a couple of months without having to go through the public hearing process. This change allows a more efficient method of sampling transit markets in the Washington metropolitan region.

These amendments also allow WMATA to deposit funds in a branch or subsidiary of any bank which operates within the transit zone. The present compact now says that WMATA can only deposit funds in the headquarters bank.

The Metro board currently is required to advertise for bids on any supply purchases above $2,500. These amendments raise the threshold for advertising contracts for supplies and equipment from $2,500 to $10,000 and for construction and reconstruction from $10,000 to $25,000. Raising the thresholds will increase procurement efficiency and reduce staff time and associated costs. The new thresholds will also make WMATA procurement policies more consistent with the practices of the Federal Government,

other transit agencies, and many local governments.

Finally, the public safety amendments to the compact in general permit the transit authority to have police jurisdiction at the Metrobus stops. Currently, Metro has no official authority to interfere with criminal acts at its bus stops and therefore can not adequately protect patrons or employees at the bus stops. The District of Columbia, Maryland, and Virginia police departments all support giving Metro jurisdiction at its bus stops. These amendments clarify and simplify the enforcement of WMATA rules.

It has been cleared on both sides of the aisle by the Judiciary Committee, which has jurisdiction over interstate compacts, and the Governmental Affairs Committee, which has substantive jurisdiction over Metro.

The purpose of the amendments to title III and a letter follow:

BACKGROUND AND PURPOSE OF THE 1986 AMENDMENTS TO TITLE III OF THE WASHINGTON METROPOLITAN AREA TRANSIT REGULATION COMPACT.

PURPOSE

The purpose of the legislation is to amend Title III of the Washington Metropolitan Area Transit Regulation Compact, (WMATA Compact) Articles XIII and XVI, in order to (1) provide the Washington Metropolitan Area Transit Authority with more flexibility in instituting service changes on an emergency or experimental basis or in making minor changes in service, (2) permit deposits in banking institutions headquartered outside the Transit Zone but having branches located within the Transit Zone, (3) increase the dollar threshold at which the advertising of contracts for the purchase of supplies and equipment and construction, reconstruction and improvement of facilities is required, and (4) expand the jurisdiction for the Metro Transit Police to include bus stops, as defined in the bill.

BACKGROUND

This is the fourth time that the WMATA Compact has been amended. It was originally approved on November 6, 1966 (Washington Metropolitan Area Transit Authority Compact. Pub. L. 89-774, 80 Stat. 1324). In 1972 it was amended twice (National Capital Transportation Act of 1972. Pub. L. 92-349, 86 Stat. 464, and National Capital Area Transit Act of 1972, Pub. L. 92-517, 86 Stat. 999). Generally, those amendments were required to (1) make those necessary changes to the Compact to permit WMATA to provide transit service directly, (2) govern labor relations at WMATA, (3) provide for public acquisition of the then privately owned bus companies, (4) make other needed changes to the Compact with respect to definitions, temporary borrowing, interest on bonds, sale of bonds and reduced fares. The Compact was amended the third time in 1976 (Metro Transit Police Act of 1976, Pub. L. 94-306, 90 Stat. 672). In order to promote the safety of the riding public and to protect its employers and transit facilities, WMATA was authorized to establish a sworn police force fully empowered to enforce the signatory law on transit facilities owned, or operated or controlled by WMATA.

MAJOR PROVISIONS

The amendments Congress is consenting to in this resolution are summarized below:

Public hearings

Section 62(a).—This amendment provides that minor service changes, experimental service and emergency situations do not require a public hearing. The amendment clarifies current language, negates any potential challenges to current practices and reflects Urban Mass Transportation Administration (UMTA) public hearing requirements.

Public safety

Section 76(a).—This amendment gives the Metro Transit Police jurisdiction at Metrobus bus stops. Currently, local police have jurisdiction at bus stops. This change allows Metro police to provide protection for transit patrons at bus stops, thus increasing patron protection and safety.

Investment flexibility

Section 69(a).—This amendment allows WMATA to deposit funds in a branch or subsidiary of any bank which has operations within the Transit Zone. The change permits WMATA to take advantage of the greater flexibility in the banking industry as a result of deregulation.

Procurement

Section 73.—This amendment raises the threshold for advertising contracts for supplies and equipment from $2,500 to $10,000, and for construction and reconstruction from $10,000 to $25,000. Updating the thresholds will increase procurement efficiency and reduce staff time and associated costs. The new thresholds will also make WMATA procurement policies more consistent with the Federal government, other transit properties and many local governments.

U.S. SENATE,
Washington, DC, September 29, 1986.

Hon. ROBERT DOLE,
Majority Leader, U.S. Senate, Washington, DC.

DEAR MAJORITY LEADER: We understand that Senator Mathias intends to introduce a resolution to approve the Washington Metropolitan Area Transit Authority's (WMATA) interstate compact.

Rather than referring this resolution to the Judiciary Committee, which has jurisdiction over interstate compacts, or the Governmental Affairs Committee, which has substantive jurisdiction over WMATA, we do not object to placing this legislation directly on the calendar for immediate action. Senator Mathias advises us that he will seek such an agreement, when the legislation is introduced.

Our view of this bill has found that the proposed amendments to WMATA's compact deal with noncontroversial, routine WMATA management activities. We agree that our Committee Members' scarce time would not be well served by further reviewing this legislation.

We appreciate your consideration of this legislation.

Sincerely,

JOSEPH R. BIDEN, Jr.,
THOMAS F. EAGLETON,
STROM THURMOND,
WILLIAM V. ROTH, Jr.,
U.S. Senators.

The PRESIDING OFFICER. The joint resolution is before the Senate and open to amendment. If there be no amendment to be proposed, the question is on the engrossment and third reading of the joint resolution.

The joint resolution (S.J. Res. 428) was ordered to be engrossed for a third reading, was read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, reads as follows:

S.J. RES. 428

Granting the consent and approval of Congress for the State of Maryland, the Commonwealth of Virginia, and the District of Columbia to amend the Washington Metropolitan Area Transit Regulation Compact.

Whereas the State of Maryland, the Commonwealth of Virginia, and the District of Columbia have adopted amendments to the Washington Metropolitan Area Transit Regulation Compact relating to public hearing requirements, investment flexibility, procurement and public safety; and

Whereas the Congress has reviewed such amendments and is willing to consent to such amendments: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That consent of Congress is hereby given to the amendments of the State of Maryland (Chapters 674 and 675, 1984 Act of the Maryland General Assembly), the amendment of the Commonwealth of Virginia (Chapter 610, 1984 Acts of Assembly of Virginia), and the amendment of the District of Columbia (D.C. Law 5-122) to sections 62(a), 69(a), 73, and 76(a) of the Washington Metropolitan Area Transit Regulation Compact. Such amendments are as follows:

"62(a) The Board shall not make or change any fare or rate, nor establish or abandon any service except after holding a public hearing with respect thereto, except for service changes required by an emergency; minor service changes as defined by regulations promulgated by the Board; experimental service established to test the effect of such service, and in effect for not more than six months; and fare and service changes established for special events.

"69(a) The Board may provide for the creation and administration of such funds as may be required. The funds shall be disbursed in accordance with rules established by the Board and all payments from any fund shall be reported to the Board. Monies in such funds and other monies of the Authority shall be deposited, as directed by the Board, in any branch or subsidiary of any state or national bank which has operations within the Zone, and having a total paid-in capital of at least one million dollars ($1,000,000). The trust department of any such state or national bank may be designated as a depositary to receive any securities acquired or owned by the Authority. The restriction with respect to paid-in capital may be waived for any such bank which agrees to pledge federal securities to protect the funds and securities of the Authority in such amounts and pursuant to such arrangements as may be acceptable to the Board.

"73 Contracts for the construction, reconstruction or improvement of any facility when the expenditure required exceeds twenty five thousand dollars ($25,000) and contracts for the puchase of supplies, equipment and materials when the expenditure required exceeds ten thousand ($10,000) shall be advertised and let upon sealed bids to the lowest responsible bidder. Notice re-

questing such bids shall be published in a manner reasonably likely to attract prospective bidders, which publication shall be made at least ten days before bids are received and in at least two newspapers of general circulation in the Zone. The Board may reject any and all bids and readvertise in its discretion. If after rejecting bids the Board determines and resolves that, in its opinion, the supplies, equipment and materials may be purchased at lower price in the open market, the Board may give responsible bidder an opportunity to negotiate a price and may proceed to purchase the supplies, equipment and materials in the open market at a negotiated price which is lower than the lowest rejected bid of a responsible bidder, without further observance of the provision requiring bids or notice. The Board shall adopt rules and regulations to provide for purchasing from the lowest responsible bidder when sealed bids, notice and publication are not required by this section. The Board may suspend and waive the provisions of this section requiring competitive bids whenever:

"(a) the purchase is to be made from or the contract is to be made with the federal or any State government or any agency or political subdivision thereof or pursuant to any open end bulk purchase contract of any of them;

"(b) the public exigency requires the immediate delivery of the articles;

"(c) only one source of supply is available; or

"(d) the equipment to be purchased is of a technical nature and the procurement thereof without advertising is necessary in order to assure standardization of equipment and interchangeability of parts in the public interest.

"76(a) The Authority is authorized to establish and maintain a regular police force, to be known as the Metro Transit Police, to provide protection for its patrons, personnel, and transit facilities. The Metro Transit Police shall have the powers and duties and shall be subject to the limitations set forth in this section. It shall be composed of both uniformed and plainclothes personnel and shall be charged with the duty of enforcing the laws of the signatories, and the laws, ordinances and regulations of the political subdivisions thereof in the Transit Zone, and the rules and regulations of the Authority. The jurisdiction of the Metro Transit Police shall be limited to all the transit facilities (including bus stops) owned, controlled or operated by the Authority, but this restriction shall not limit the power of the Metro Transit Police to make arrests in the Transit Zone for violations committed upon, to or against such transit facilities committed from within or outside such transit facilities, while in hot or close pursuit or to execute traffic citations and criminal process in accordance with subsection (c) below. The members of the Metro Transit Police shall have concurrent jurisdiction in the performance of their duties with the duly constituted law enforcement agencies of the signatories and of the political subdivisions thereof in which any transit facility of the Authority is located or in which the Authority operates any transit service. Nothing contained in this section shall either relieve any signatory or political subdivision or agency thereof from its duty to provide police, fire and other public safety service and protection, or limit, restrict or interfere with the jurisdiction of or the performance of duties by the existing police, fire and other public safety agencies. For purposes of this section, "bus stop" means that area within 150 feet of a metrobus bus stop sign, excluding the interior of any building not owned, controlled, or operated by the Washington Metropolitan Area Transit Authority.".

SEC. 2. The right of Congress to alter, amend, or repeal this act is hereby expressly reserved.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the joint resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING MINTING OF COINS OF THE BICENTENNIAL

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of H.R. 3415, the commemorative coin bill.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3415) to authorize the minting of coins in commemoration of the bicentennial of the United States Constitution.

AMENDMENT NO. 3474

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator GARN and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON] for Mr. GARN, proposes an amendment numbered 3474.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 22, strike out "December 31, 1987" and insert in lieu thereof "June 30, 1988."

At the end of the bill, add the following new section: No provision of law governing procurement or public contracts shall be applicable to the procurement of goods or services necessary for carrying out the provisions of this title. Nothing in this section shall relieve any person entering into a contract under the authority of this title from complying with any law relating to equal employment opportunity.

Mr. SIMPSON. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3474) was agreed to.

Mr. McCLURE. Mr. President, the bicentennial of the United States Constitution is a day to be remembered by all. To help remind our citizens of this historic event, a Commission has been established to promote this day.

In addition to parades, educational seminars and picnics, the Congress will pass legislation which calls for the minting of commemorative coins. These coins may be purchased by the public and kept as a reminder of this historic event.

Mr. President, the bill before us requires the Secretary of the Treasury to mint and sell both gold and silver coins. The gold coins will be a $5 legal tender coin which contains 90 percent gold and 10 percent alloy. There will be a maximum of 1 million gold coins minted.

The silver coin will be a $1 legal tender coin which contains 90 percent silver and 10 percent alloy. There will be a maximum of 10 million coins minted and sold to the general public. The silver to be used in the coins will come from the National Defense Stockpile. It should be noted that the limitations of Public Law 96–41, as amended (50 U.S.C. 98d(b)) prohibiting disposal of material from the stockpile until the unobligated balance in the Transaction Fund falls below a certain statutory ceiling is inapplicable to the sale by the General Services Administration to Treasury authorized by H.R. 3415, and that any moneys received by the General Services Administration from Treasury shall be for deposit to the Transaction Fund.

Mr. President, I congratulate the great work of Chairman ANNUNZIO, the chairman of the House Banking Subcommittee on Consumer Affairs and Coinage, for his leadership in this matter. In addition, I appreciate the leadership of Senator GARN and his willingness to advance this important legislation.

Mr. President, I have been a strong advocate of coinage legislation and believe it is the solution to disposing of the National Defense Stockpile without further disrupting the silver markets. I am confident that many Americans will choose to purchase a gold or silver bicentennial coin as a reminder of this great Nation and in celebration of the Constitution.

● Mr. SYMMS. Mr. President, I commend my distinguished colleague, Senator GARN, the chairman of the Banking Committee for his willingness to call this measure up on short notice. This is important legislation and should be considered before the Congress recesses. Mr. ANNUNZIO introduced this bill in the other body and it passed by voice vote. This act is titled "Bicentennial of the Constitution Coins and Medals Act."

It grants the Secretary of the Treasury authority to issue gold and silver coins in honor of the bicentennial of our Constitution. It is entirely appropriate that these coins be struck to commemorate this great event. They will be a lasting reminder of this very important date in our history. This

bill authorizes the Secretary of the Treasury to mint 1 million $5 gold coins, weighing 8.359 grams each. In addition, the Secretary is authorized to issue 10 million $1 silver coins weighing 26.736 grams each.

The gold for the $5 coins will be minted under the authority the Secretary of the Treasury has under existing law. The silver coins will be minted from metal taken from the Strategic and Critical Minerals Stockpile.

Certainly, these metals will be of more benefit in coins than in a stockpile. The act fixes a $35 per coin surcharge on the $5 coins and a $7 per coin surcharge on the $1 coins. These surcharges will be deposited in the Treasury and used solely for the purpose of reducing the national debt. The Secretary is directed to take all actions necessary to ensure that this title shall result in no net cost to the United States Treasury.

In further recognition of the bicentennial of the Constitution the Secretary is instructed to strike and deliver to the Bicentennial Commission 750,000 medals with suitable emblems and inscriptions. The medals will be made from gold, silver, and bronze in sizes to be determined by the Bicentennial Commission.

Mr. President, this bill authorizes, in a modest way, commemoration of a major milestone in our development as a nation. I urge its adoption.●

Mr. McCLURE. Is it the understanding of the chairman that the limitations of Public Law 96–41, as amended (50 U.S.C. 98d(b)) prohibiting disposal of material from the stockpile until the unobligated balance in the Transaction Fund falls below a certain statutory ceiling is inapplicable to the sale by the General Services Administration to Treasury authorized by H.R. 3415, and that any moneys received by the General Services Administration from Treasury shall be for deposit to the Transaction Fund?

Mr. GARN. Yes; that is the intent of the committee.

Mr. McCLURE. I thank the chairman.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no further amendment, the question is on third reading and passage.

The bill was ordered to a third reading, was read the third time, and passed.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

S. 2928—TO PROVIDE FOR MORE EFFECTIVE REGULATION OF VEHICLES

Mr. BYRD. Mr. President, I ask unanimous consent that I may send a bill to the desk on behalf of Mr. INOUYE and Mr. RUDMAN. I ask unanimous consent that the bill be held at the desk pending further disposition.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE. Mr. President, I rise today with the distinguished Senator from New Hampshire [Mr. RUDMAN] to offer legislation to regulate the automobile gray market. This legislation is quite similar to the measure which was agreed to earlier this year by unanimous consent as title IV of S. 863, the reauthorization bill for the National Highway Traffic Safety Administration [NHTSA]. As you will recall, after extensive negotiations, Mr. RUDMAN and I agreed on this legislation to provide for more effective regulation of the gray market in automobiles, and on May 15, 1986, the Senate passed our compromise legislation.

The House passed comparable legislation on October 6, 1986, as part of H.R. 2248, their NHTSA reauthorization bill. Currently, negotiations are ongoing to reconcile the House and Senate versions of the NHTSA bill. However, as consideration of such a compromise is not assured before adjournment of the 99th Congress, and given the importance to the American public and NHTSA itself of putting a more workable system into place to regulate the gray market, Senator RUDMAN and I are offering this bill and seeking its passage separately. As I indicated, the measure is very similar to the legislation agreed to in May by the Senate and just recently by the House. In developing this legislation, the Senator from New Hampshire and I have sought to ensure that gray market importers and modifiers are brought within the existing regulatory framework that governs the manufacturing and the sale of vehicles through authorized dealers. In short, we have sought to level the playing field and to assist the Department of Transportation in its effort to get a handle on the problems created by the present unworkable situation.

The Administrator of NHTSA has indicated her support for this type of legislation. In a recent letter, she stated:

> One of the major problems with the gray market program as it is now constituted is that the importer, rather than the modifier, is legally responsible for bringing the vehicle into compliance with the safety standards. The modifier has no direct legal responsibility for the success of his activities unless he is also the importer of record. Currently, 73 percent of importation of gray market vehicles are by individuals where the vehicles are for their own use as opposed to commercial importations for resale. The number of individual importations has always been greater than the number of commercial importations. The problems this creates are (1) the large number of entities we must deal with, (2) the lack of expertise of the importers in dealing with the legal and practical requirements of vehicle importation, and (3) the financial hardship placed on the individual importers if the vehicles must be exported, returned to Customs to be destroyed, or if full bond must be forfeited.
>
> These problems, and most others in this area, would be solved if the gray market program were restructured along the lines proposed in S. 863, which recently passed the Senate. We also understand that a similar proposal is being considered in the House of Representatives. We support legislation that would concentrate the program on registered commercial importers, which would afford tighter supervision of the modification process.

Unless we act now on this legislation, I fear that the opportunity will pass to accomplish these objectives. If we have to wait until the next Congress, thousands of vehicles will have continued to enter the United States without our beginning to put the controls in place that I believe we all agree are necessary.

Mr. President, under the program we are establishing, gray market vehicles may generally be imported into the United States only if they are substantially similar to a model manufactured for the U.S. market and are modified by a registered importer. We have included a special provision to ensure that military personnel and foreign service personnel returning from abroad may import an automobile for personal use and have it modified to meet U.S. safety and emission standards here in the United States, even if no substantially similar vehicle has been approved by the Secretary of Transportation for importation. We also have included a provision providing that, even in those instances in which a substantially similar U.S.-made vehicle does not exist, a vehicle made for a foreign market may be imported and then modified if the Secretary determines that the vehicle can be modified to comply with all applicable Federal motor vehicle safety standards. Finally, to meet the concerns of the Ways and Means Committee, we have included a provision that allows individuals, not just registered importers, to import a vehicle for personal use, but not for resale, as long as they agree to have it modified by a registered importer.

To ensure that this new program does not drain taxpayer resources, registered importers must pay upon registration and annually thereafter whatever fee the Secretary calculates is necessary to cover the new, additional costs of administering the entire program. Such fees must cover, among other things, the cost of processing bonds and making determinations. We felt it was appropriate in this limited

instance to require the payment of such fees because this new program is being established solely for the benefit of registered importers and will continue to permit them to stay in business.

Let me explain in greater detail how this new process works. In short, the Secretary of Transportation makes a determination whether a vehicle can be modified to meet all applicable safety standards. The registered importer—or modifier—must make the modifications as approved by the Secretary and then file a statement confirming he has done so. At that point, the Secretary, if she approves the certification statement, provides the necessary paperwork authorizing release of the Customs bond on the vehicle.

Once a determination has been made by the Secretary of Transportation with respect to a particular line or model of vehicle that the vehicle can meet the applicable standards, any other registered importer may, on the basis of that approval, modify the same line or model of vehicle. Of course, such a registered importer must perform the work in the same manner provided for in the approved petition. This should help lessen the regulatory burden that otherwise might have been imposed on the agency. We trust the Secretary will ensure that this provision is not abused to allow registered importers to make modifications without regard for the precise methods and procedures in the petition on which the determination was premised. Moreover, we trust the Secretary will be vigilant in ascertaining whether vehicles modified pursuant to the description provided for in petitions actually meet all applicable Federal motor vehicle safety standards. If she finds, for example, that modifications are not being made, we expect appropriate actions will be taken to remedy the situation. Once a determination has been revoked, vehicles of the same model or line may not be modified after a new determination is made pursuant to the procedures established for making the initial determination.

With respect to this process, we have not required that the Secretary make such determinations through traditional notice and comment rulemaking. However, while we have minimized the regulatory burden, the Secretary nonetheless must include the public in the process prior to making any determination on the merits. We do not want these determinations made solely on the basis of information supplied by petitioners. The petitions must be made available to the public, including original equipment manufacturers, so that they may submit comments and information relevant to the determination before it is made.

To monitor compliance with the law, the Secretary must conduct inspections and tests, including destructive tests, of vehicles imported under this new program. The status quo, under which voluntary compliance has been assumed, has proven to be ineffective in ensuring compliance with existing laws and regulations. We trust the Secretary will vigorously carry out her responsibilities to ensure that this pattern of noncompliance is brought to an end.

This bill addresses other concerns aired in hearings held before the Commerce Committee. As my colleagues are aware, one of the principal concerns that has been raised is the failure of gray market importers to pay the applicable gas guzzler tax due on each imported low-mileage vehicle. Recently, the Internal Revenue Service issued a revenue ruling confirming that the law has always required the payment of gas guzzler taxes on gray market vehicles. The provisions we have included do not address the retroactive application of the revenue ruling. I am sympathetic to the plight of those individuals who are covered by the ruling and recognize its application may have harsh, perhaps inequitable, application. To ensure that this tax avoidance comes to an end in the future and individuals are not later unfairly penalized, we have included two provisions in the amendment. The first requires these importers to have fuel economy ratings established on the vehicles they import for purposes of calculating the gas guzzler tax due. Once those ratings have been established and provided to the relevant government agencies, no basis will exist for avoiding payment of gas guzzler taxes. The second provision requires registered importers to document payment of this tax in order to maintain their registration. This should clarify any existing ambiguity as to the law's coverage.

As a related matter, the amendment provides that each registered importer will be treated as a manufacturer for purposes of C.A.F.E. Each registered importer will calculate a fleet fuel economy average on the basis of the vehicle he modifies during each calendar year. Thus, his fleet will include not only the vehicles he imports and modifies, but those imported by individuals for which he makes modifications. To preclude registered importers from avoiding the responsibilities that come with being treated as a manufacturer under the Motor Vehicle Information and Cost Savings Act, the amendment specifically precludes them from claiming to be "small volume" manufacturers. To maintain a registration, each registered importer must document payment of any C.A.F.E. penalties due for the prior year. We leave it to the Secretary to determine precisely how to apply the many provisions of the C.A.F.E. to registered importers.

Mr. President, there also has been a great deal of concern raised about vehicles being released to consumers before modifications have been made or in violation of the terms and conditions of the Customs bond placed on each vehicle. To get at this problem, the bill provides that it shall be unlawful to release custody of a vehicle, operate it—other than for testing—or ignore the conditions imposed by the applicable bond until the registered importer has filed a certification statement with the Secretary that the vehicle has been properly modified, the Secretary has reviewed the certification as valid, the Secretary has confirmed a consumer disclosure label has been placed on the vehicle, and the fuel economy ratings for the vehicle have been established and provided to the relevant government agencies. We have further provided that the Secretary may demand to inspect any vehicle prior to release by the registered importer.

In an effort to reduce the opportunities for the unscrupulous to avoid making the modifications required under existing law, we have built a number of additional safeguards into the system.

First, the types of vehicles which may be imported generally are limited to those which are substantially similar to vehicles originally manufactured and certified for importation into the United States and which are capable of being readily modified to meet all U.S. standards. For certain safety features of a motor vehicle, such as the structural features protecting the passenger compartment, it is impossible to assess compliance with U.S. safety regulations merely by visual inspection. Destructive crash testing is needed. Because substantially similar gray market vehicles will not be crash tested before importation, these concealed safety features of the gray market vehicles must be substantially the same as those on U.S. certified models before importation and modification.

Second, before any vehicles may be modified, a registered importer must first establish—with respect to the particular line or model of vehicle involved—that the vehicle can be modified to meet all applicable Federal motor vehicle safety standards and that any modifications made for the purpose of compliance with any applicable law or regulation will not appear to create a violation of these standards or a defect relating to motor vehicle safety. We would hope that the petition submitted to the Secretary could include an analysis by a qualified professional engineer certifying that this is the case with respect to the safety features of the vehicle.

Third, the Secretary must approve a certification statement filed by each registered importer before issuing the bond release letter applicable to each imported motor vehicle.

Finally, the Secretary by regulation must establish requirements to ensure that the registered importers who will be making these modifications have the financial capability to meet their obligations under our safety laws and regulations. The posting of a prepaid surety bond on each vehicle would be one means of protecting consumers from financially irresponsible importers.

So that we can monitor how this new program works in operation, this legislation requires the GAO to provide us with a report within 3 years. Also, the Secretary must conduct a study of the effectiveness of the program 18 months after promulgation of the regulations implementing this legislation. With these reports, the Congress will be in a good position to assess whether modifications to the program are necessary.

In closing, I might add that we remain quite concerned that the provisions in this legislation may not be put into effect as a result of a delay in the promulgation of implementing regulations. Thus, this bill explicitly provides that the Secretary must publish regulations implementing this amendment within 8 months. This is more than adequate time. If the Secretary has not done so, the legislation provides that any person may commence a civil action in the U.S. Court of Appeals for the District of Columbia Circuit. We have directed that the court grant an expedited hearing. We also have indicated that the court should award reasonable attorney fees to private litigants if the Government fails to promulgate these regulations. We hope this will provide a sufficient incentive for the agency to comply with the law and meet the deadline we have set. We do not want to be in a position where through inadvertence or negligence the current, unworkable program remains in effect beyond the prescribed period set out in the bill. We believe this would be unacceptable.

Mr. President, I want to remind my colleagues that many months of negotiations were necessary to craft this compromise. We have addressed the concerns of gray market participants, as well as those of concerned Members of the House. My colleague from New Hampshire and I have put a great deal of work into developing this legislation and we urge our colleagues to support us in its passage.

Mr. RUDMAN. Mr. President, I rise to join my colleague, the distinguished senior Senator from Hawaii, Mr. INOUYE, in introducing legislation to improve the statutory and regulatory framework under which vehicles not originally manufactured for sale in the United States are brought into compliance with U.S. standards. This legislation represents a compromise intended to ensure that so-called gray market cars fully comply with applicable Federal motor vehicle safety standards.

Direct import cars, often referred to as gray market cars, are foreign-manufactured cars that are imported directly by independent importers. This activity is entirely legal provided that certain procedures are followed to ensure that these cars, which may be different than vehicles originally manufactured for distribution in the United States, are brought into conformity with our Federal environmental and safety standards.

The gray market generally arises when foreign manufacturers implement discriminatory pricing policies whereby American consumers are charged a higher price for a product than is charged for the same or comparable item sold overseas. Independent importers take advantage of this dual-pricing system by purchasing products at the world price and selling the product to the American consumer at a price considerably below that offered by the foreign manufacturer's U.S. distributor. It should be noted that there is a gray market for many products other than automobiles. In my view, the gray market provides enormous benefits to the consumers of this country by providing price and choice competition.

In the case of automobiles, my good friend, Senator INOUYE, has expressed concerns that the current regulation of direct import vehicles is not sufficient to protect safety. Frankly, although our views differ on this contention, we have worked together to improve enforcement in this area while preserving the right of independent importers to market these automobiles. In fact, this bill is essentially similar to an amendment we successfully offered to S. 863, the national highway traffic safety reauthorization bill, passed by the Senate earlier this year. We believe that this bill improves upon the Senate amendment to S. 863 and also addresses some concerns raised by the other body.

Our bill has three main features. First, the bill includes provisions to ensure that vehicles imported into the United States are capable of meeting U.S. safety standards. Thus, the Secretary of Transportation must determine, pursuant to the petition of a registered importer, that a model of a vehicle is capable of being modified to comply with applicable U.S. safety standards. The Secretary may make such determinations based on one of two findings: The Secretary may make a determination that a vehicle is substantialy similar to a vehicle originally manufactured for sale in the United States and that it can be modified to meet our standards. Alternatively, where there is no substantially similar domestic vehicle, the Secretary may make a determination based on destructive test data or other information which demonstrates that the vehicle is capable of meeting all applicable U.S. standards. It is presumed that in most cases destructive test data will be necessary to make this determination. In some cases, however, other evidence may suffice. For example, if a petitioner can demonstrate that a vehicle is largely similar to an earlier model of a U.S. model vehicle certified as meeting our standards, destructive test data may not be necessary. Once a determination is made, other importers or individuals may import that model vehicle provided that it is modified by a registered importer pursuant to an approved petition.

The second feature is the requirement that vehicles imported pursuant to this bill be modified by an importer who is registered with the Secretary of Transportation. The registered importer must also pay user-fees as necessary to cover the costs of administering the main provisions of this program where such costs exceed current expenditures. Thus, implementation of this program will allow the Department to meet its obligations without adding to the Federal budget deficit.

Third, the bill provides that a properly registered importer submit a certification to the Secretary for each vehicle modified. The Secretary is provided an opportunity to inspect any vehicle prior to approval. If the Secretary has not given notice of its intention to inspect the vehicle within 30 days, the Secretary shall provide for the prompt release of the importer's bond. It should be noted that although the bill permits importation of automobiles by individuals, such vehicle must be modified by a registered importer pursuant to an approved petition.

Our bill also provides that the registered importer will be responsible for recordkeeping, payment of any applicable gas guzzler tax for cars imported pursuant to this legislation, and compliance with CAFE requirements. We have also called for reports on the effectiveness of the new program by the General Accounting Office and the Department of Transportation. The Secretary is directed to promulgate regulations within 8 months after enactment of this legislation. The provisions of this bill will take effect 3 months after the effective date of regulations. This 3-month grace period is intended to ensure that importers will be able to continue to import vehicles after the effective date of the regulations and while the Secretary is making determinations and registering importers.

I believe that this bill represents a reasonable compromise to improve the

regulation of direct import automobiles while ensuring that the American consumer continues to benefit from the price and choice competition provided by direct imports.

RESOLUTION PROVIDING FOR A POINT OF ORDER AGAINST EXTRANEOUS MATERIAL IN CERTAIN RECONCILIATION MEASURES

Mr. SIMPSON. Mr. President, I send a resolution to the desk on behalf of Senators ROTH, DOMENICI, and CHILES, dealing with a point of order on the reconciliation bill.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A resolution (S. Res. 509) providing for a point of order against extraneous material in certain reconciliation measures.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the resolution be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROTH. Mr. President, on December 19, 1985, the Senate adopted Senate Resolution 286, which I authored. The purpose of Senate Resolution 286 was to extend the prohibition against extraneous matter in reconciliation bills and resolutions, popularly known as the Byrd rule after its distinguished author, to House language coming over to us either in a conference report or as a House amendment. But for Senate Resolution 286, the Senate would have been in a position of imposing a much needed discipline on itself while facing the prospect that the House could load down reconciliation bills and resolutions with all kinds of extraneous matter.

When the Senate considered Senate Resolution 286, I noted its similarity to rule XXVIII of the House rules by which the House seeks to protect itself against Senate provisions that would violate House rules on germaneness if offered there. Under Senate Resolution 286, when the point of order against extraneous matter is made and sustained, the offending language is deemed stricken and the Senate is permitted to consider the remainder "under the rules and practices of the Senate and applicable law."

In contrast, in the analogous situation under rule XXVIII of the House rules, after the offending language is deemed stricken, the opportunity to debate and to make further amendments is restricted under the rule and the practices of the House. In practical terms this means that one making a point of order does not have to overcome the burden that his or her success might unravel all the negotiations that led up to the conference report or amendment in question.

Therefore, on reflection, it is my considered opinion that Senate Resolution 286 needs to be amended so that successful points of order intended to surgically remove offending language, do not provide the occasion for unraveling the remaining language of conference reports which Senate conferees have worked out in conference.

The amendment to Senate Resolution 286 would preserve the original purpose of that resolution but would further refine the implementation, in the case of conference reports or House amendments, by limiting debate and, in the case of conference reports, by precluding amendments.

Conference reports as such are not subject to amendment. It would be highly inappropriate, therefore, to allow such language to become amendable once extraneous matter is removed by a successful point of order. Unfortunately, that result would occur without the adoption of the pending resolution because a conference report falls as a matter of parliamentary law when a successful point of order is made against it. And when the conference report falls, the last amendment or amendments are before this body subject to further debate and further action.

But this result is contrary to the special purpose of Senate Resolution 286. Such a result would make it more difficult to police our policy against extraneous matter. For if a Senator desiring to make a point of order against extraneous matter realizes that his success could cause the entire conference agreement to become amendable, then he would be inclined to go forward guided more by his position on the substance of the conference agreement than by his desire to enforce Senate policy on extraneous matter. That would be unfortunate.

The pending resolution would change that result. It would allow a successful point of order to excise the offending language in a conference report and would, in effect, treat the remaining language in the same way we treat conference reports, that is, as not subject to amendment.

House amendments, like conference reports, would be subject to the provision limiting debate. However, House amendments would be subject to further amendment since, unlike a conference report, they have not been agreed to by the Senate.

The resolution also treats the situation where the House has sent us an amendment containing extraneous matter and the Senate is considering a Senate amendment to the House amendment containing such extraneous matter. This kind of Senate amendment is included within the phrase "amendment between the Houses" in the pending resolution. This kind of Senate amendment to a House amendment would be subject to the same procedure as would the House amendment.

It should also be noted that more than one point of order may be made against a conference report or amendment between the Houses. In the case of Senate consideration of conference reports, it should be noted that a second point of order would be made against the resulting Senate amendment created by operation of this resolution upon a successful point of order being made. It cannot be made against the conference report because it is no longer before the body. That is why the phrase "Senate amendment derived from such conference report by operation of this resolution" is included in the resolution; such amendments are basically treated under the procedure for conference reports. This means they are not amendable.

In my opinion, the procedural refinements contained in the pending resolution are necessary to implement the original purpose of Senate Resolution 286 and should be adopted.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 509) was agreed to, as follows:

S. RES. 509

That Senate Resolution 286 (99th Congress, 2d Session), adopted December 19, 1985, is amended by striking out all after the resolving clause and inserting in lieu thereof the following:

"That (a) when the Senate is considering a conference report on, or an amendment between the Houses in relation to, a reconciliation bill or reconciliation resolution pursuant to section 310 of the Congressional Budget Act of 1974, upon—

"(1) a point of order being made by any Senator against extraneous material meeting the definition of subsections (d)(1)(A) or (d)(1)(D) of section 20001 of the Consolidated Omnibus Budget Reconciliation Act of 1985, and

"(2) such point of order being sustained, such material contained in such conference report or amendment shall be deemed stricken, and the Senate shall proceed, without intervening action or motion, to consider the question of whether the Senate shall recede from its amendment and concur with a further amendment, or concur in the House amendment with a further amendment, as the case may be, which further amendment shall consist of only that portion of the conference report or House amendment, as the case may be, not so stricken. Any such motion in the Senate shall be debatable for 2 hours. In any case in which such point of order is sustained against a conference report (or Senate amendment derived from such conference report by operation of this resolution), no further amendment shall be in order.

"(b) An affirmative vote of three-fifths of the Members, duly chosen and sworn, shall be required to sustain an appeal of the ruling of the Chair on a point of order raised under this resolution, as well as to waive or suspend the provisions of this resolution.

"(c) The provisions of this resolution shall remain in effect until the date of termina-

tion of section 20001 of the Consolidated Omnibus Budget Reconciliation Act of 1985.".

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TREATMENT OF CERTAIN SUBMERGED LANDS

Mr. SIMPSON. Mr. President, I ask unanimous consent that the Senate now turn to the consideration of Calendar 1030, S. 485, dealing with the Alaskan National Interest Lands Conservation Act of 1980.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (S. 485) to amend the Alaska National Interest Lands Conservation Act of 1980 to clarify the treatment of submerged lands and ownership by the Alaska Native Corporation.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources with an amendment to strike all after the enacting clause and insert in lieu thereof, the following:

That section 901 of the Alaska National Interest Lands Conservation Act (94 Stat. 2430; Public Law 96-487) is amended by striking out the text of such section and inserting in lieu thereof:

"SEC. 901. (a)(1) Except as provided in paragraph (2), whenever the Secretary surveys land selected by a Native, a Native Corporation, or the State pursuant to the Alaska Native Claims Settlement Act, the Alaska Statehood Act, or this Act, lakes, rivers, and streams shall be meandered in accordance with the principles in the Bureau of Land Management, 'Manual of Surveying Instructions' (1973).

"(2) If title to the lands beneath navigable waters of a lake less than fifty acres in size or a river or stream less than three chains in width did not vest in the State pursuant to the Submerged Lands Act, such lake, river, or stream shall not be meandered.

"(3) The Secretary is not required to determine the navigability of a lake, river, or stream which because of its size or width is required to be meandered or to compute the acreage of the land beneath such lake, river, or stream or to describe such land in any conveyance document.

"(4) Nothing in this subsection shall be construed to require ground survey or monumentation of meanderlines.

"(b)(1) Whenever, either before or after the date of enactment of this section, the Secretary conveys land to a Native, a Native Corporation, or the State pursuant to the Alaska Native Claims Settlement Act, the Alaska Statehood Act, or this Act which abuts or surrounds a meanderable lake, river, or stream, all right, title, and interest of the United States, if any, in the land under such lake, river, or stream lying between the uplands and the median line or midpoint, as the case may be, shall vest in and shall not be charged against the acreage entitlement of such Native or Native Corporation or the State. The right, title, and interest vested in a Native or Native Corporation shall be no greater an estate than the estate he or it is conveyed in the land which abuts or surrounds the lake, river, or stream.

"(2) The specific terms, conditions, procedures, covenants, reservations, and other restrictions set forth in the document entitled, 'Memorandum of Agreement between the United States Department of the Interior and the State of Alaska' dated March 28, 1984, signed by the Secretary and the Governor of Alaska and submitted to the Committee on Interior and Insular Affairs of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate, are hereby incorporated in this section and are ratified as to the duties and obligations of the United States and the State, as a matter of Federal law.

"(c)(1) The execution of an interim conveyance or patent, as appropriate, by the Bureau of Land Management which conveys an area of land selected by a Native or Native Corporation which includes, surrounds, or abuts a lake, river, or stream, or any portion thereof, shall be the final agency action with respect to a decision of the Secretary of the Interior that such lake, river, or stream, is or is not navigable, unless such decision was validly appealed to an agency or board of the Department of the Interior on or before December 2, 1980.

"(2) No agency or board of the Department of the Interior other than the Bureau of Land Management shall have authority to determine the navigability of a lake, river, or stream within an area selected by a Native or Native Corporation pursuant to the Alaska Native Claims Settlement Act or this act unless a determination by the Bureau of Land Management that such lake, river, or stream, is or is not navigable, was validly appealed to such agency or board on or before December 2, 1980.

"(3) If title to land conveyed to a Native Corporation pursuant to the Alaska Native Claims Settlement Act or this Act which underlies a lake, river, or stream is challenged in a court of competent jurisdiction and such court determines that such land is owned by the Native Corporation, the Native Corporation shall be awarded a money judgment against the plaintiffs in an amount equal to its costs and attorney's fees, including costs and attorney's fees incurred on appeal.

"(d) For the purposes of this section, the terms 'navigable' and 'navigability' means navigable for the purpose of determining title to lands beneath navigable waters, as between the United States and the several States pursuant to the Submerged Lands Act and section 6(m) of the Alaska Statehood Act.".

SEC. 2. Nothing in this Act shall amend or alter any land exchange agreement to which the United States is a party, or any statute, including but not limited to the Act of January 2, 1976 (89 Stat. 1151) and section 506(c) of the Alaska National Interest Lands Conservation Act (94 Stat. 2409), that authorizes, ratifies or implements such an agreement.

AMENDMENT NO. 3475

(Purpose: To extend the Submerged Lands Statute of Limitations found in P.L. 96-487)

Mr. SIMPSON. Mr. President, I send an amendment to the desk on behalf of Senator MURKOWSKI and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Wyoming [Mr. SIMPSON], for Mr. MURKOWSKI, proposes an amendment numbered 3475.

Mr. SIMPSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

That subsection (a) of section 901 of the Alaska National Interest Lands Conservation Act (Public Law 96-487), as amended, is hereby amended by striking out the words "six years after the date of execution" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "eight years after the date of execution", and by striking the words "seven years after the date of enactment" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "nine years after the date of enactment".

Mr. MURKOWSKI. Mr. President, I rise in support of this amendment in the nature of a substitute. This amendment replaces the text of S. 485. It simply extends the submerged lands statute of limitations found in section 901 of the Alaska National Interest Lands Conservation Act for 2 years.

Earlier this year in February, the statute was extended through December 2, 1986, in hopes that a comprehensive solution to the submerged lands issue could be resolved. Such a solution was reported out of the Energy and Natural Resources Committee in the form of S. 485. Unfortunately, there are still those who oppose such a solution.

In order to prevent the State of Alaska from being forced to file hundreds of lawsuits against Native corporations in December, this extension must be passed. It is noncontroversial and merely protects the status quo with respect to the submerged lands issue.

It is my full intention to pursue a final and equitable solution to this issue when Congress returns for the 100th Congress in January.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum to be sure that this bill we are passing is not another one that I do not want to have passed. It will not take but 1 minute.

The PRESIDING OFFICER. Does the Senator from Ohio have objection to the unanimous-consent request?

Mr. METZENBAUM. Reserving the right to object, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I have no objection. I apologize to the Senator from Wyoming.

Mr. SIMPSON. Mr. President, I assume that was not the amendment the Senator from Ohio was looking for.

Mr. METZENBAUM. The Senator is correct.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 3475) was agreed to.

Mr. SIMPSON. Mr. President, I move adoption of the committee amendment in the nature of a substitute, as amended.

The committee amendment, as amended, was agreed to.

Mr. METZENBAUM. Mr. President, this legislation is limited in purpose and scope. It only grants the State of Alaska a simple extension of time in which to file judicial challenges to navigability determinations, pursuant to section 901(a) of ANILCA. The bill is not intended to, and does not, alter the language of section 901(d) of ANILCA which is based upon the premise that lands submerged beneath nonnavigable waters will be conveyed and charged against the State and Alaska Native corporation entitlements. The bill is not intended to delay or otherwise affect litigation pending in the U.S. Court of Appeals for the District of Columbia concerning the chargeability of submerged lands (Civil No. 86-5205).

The PRESIDING OFFICER. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The committee amendment, as amended, the bill (S. 485) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 485

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (a) of section 901 of the Alaska National Interest Lands Conservation Act (Public Law 96-487), as amended, is hereby amended by striking out the words "six years after the date of execution" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "eight years after the date of execution", and by striking the words "seven years after the date of enactment" each time such words occur in such subsection, and by inserting in lieu thereof in each instance the words "nine years after the date of enactment".

STANDARDS FOR PLACEMENT OF COMMEMORATIVE WORKS IN THE DISTRICT OF COLUMBIA

Mr. SIMPSON. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4378.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the title of the bill (H.R. 4378) entitled "An Act to provide standards for placement of commemorative works on lands administered by the National Park Service in the District of Columbia, and for other purposes.".

Resolved, That the House agree to the amendment of the Senate to the text of the aforesaid bill, with amendments as follows:

(1) Page 3 of the Senate engrossed amendments, line 13, strike out "appropriate congressional authorizing Committees" and insert: *Committee on House Administration of the House of Representatives and the Energy and Natural Resources Committee of the Senate*

(2) Page 4 of the Senate engrossed amendments, strike out line 23 and all that follows through line 8 on page 5, and insert:

SEC. 6. (a) AREA I.—The conditions set forth in subsection (b) shall apply to the location of a commemorative work in Area I or in Area II. In addition, the Secretary or Administrator (as appropriate) may approve the location of a commemorative work in Area I only if he finds that the subject of the commemorative work is of preeminent historical and lasting significance to the Nation. The Secretary or Administrator (as appropriate) shall notify, after consultation with the National Capital Memorial Commission, the Congress of his determination that a commemorative work should be located in Area I. The location of a commemorative work in Area I shall be deemed disapproved, unless, not later than 150 days after such notification, the location is approved by law.

(3) Page 6 of the Senate engrossed amendments, line 15, strike out "of this section, such person shall submit" and insert: *, the Secretary or Administrator (as appropriate) shall submit, on behalf of such person,*

(4) Page 9 of the Senate engrossed amendments, strike out lines 8 through 21 and insert:

TEMPORARY SITE DESIGNATION

SEC. 9. (a) If the Secretary, in consultation with the National Capital Memorial Commission, determines that a site where commemorative works may be displayed on a temporary basis is necessary in order to aid in the preservation of the limited amount of open space available to residents of, and visitors to, the Nation's Capital, he may designate such a site on lands administered by him in the District of Columbia. A designation may not be made under the preceding sentence unless, at least 120 days before the designation, the Secretary, in consultation with the National Capital Memorial Commission, prepares and submits to the Congress a plan for the site. The plan shall include specifications for the location, construction, and administration of the site and criteria for displaying commemorative works at the site.

(b) Any commemorative work displayed at the site shall be installed, maintained, and removed at the sole expense and risk of the person authorized to display the commemorative work. Such person shall agree to indemnify the United States for any liability arising from the display of the commemorative work under this section.

(5) Page 10 of the Senate engrossed amendments, strike out lines 1 and 2, and insert: *the Secretary or the Administrator (as appropriate) and shall be permanently maintained in the manner provided by law.*

Mr. SIMPSON. Mr. President, I move that the Senate concur in the House amendments.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CORRECTING ENROLLMENT OF HOUSE JOINT RESOLUTION 626

Mr. SIMPSON. Mr. President, I send a concurrent resolution to the desk on behalf of Senator MCCLURE and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A concurrent resolution (S. Con. Res. 171) to correct the enrollment of H.J. Res. 626.

The PRESIDING OFFICER. Without objection, the Senate will proceed to its immediate consideration.

The Senate proceeded to consider the concurrent resolution.

Mr. SIMPSON. Mr. President, I move adoption of the concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 171) was agreed to, as follows:

S. CON. RES. 171

Resolved by the Senate (the House of Representatives concurring), That in the enrollment of the joint resolution (H.J. Res. 626) to approve the "Compact of Free Association" between the United States and the Government of Palau, the following corrections shall be made:

(1) In section 101(d)(1)(B), insert "the Committees on Interior and Insular Affairs and Foreign Affairs and other" before "appropriate Committees of the House of Representatives".

(2) In section 101(d)(2) strike "(B)" and insert "(C)".

(3) In section 102(b), add "as amended," after "Public Law 99-239,".

(4) In section 104(c), strike "fiscal year 1985" each time such words occur and in each instance insert in lieu thereof "fiscal year 1986".

(5) In section 104(f), strike "Public Law 99-396" and in lieu thereof insert "Public Law 99-366".

(6) In section 104(g), strike "preclude" and in lieu thereof insert "exclude, limit".

(7) In section 242(c)(4) of Title II, strike "chapter V" and insert "title V".

(8) Following Section 104(j) insert new subsection (k) as follows:

"(k) The Departments of Energy and Interior are directed to provide the Committees on Appropriations of the House and Senate with a report by December 1 of each fiscal year detailing how funds were spent during the previous fiscal year for the special medical care and logistical support program for Rongelap and Utrik and for the agriculture and food programs for Enewetak and Bikini as referenced in Section 103(h) of Public Law 99-239. The report shall also specify the anticipated needs during the current and following fiscal years in order to meet the radiological health care and logistical support program for Rongelap and Utrik and the planting, agricultural maintenance, and food programs for Enewetak and Bikini. It is the sense of the Congress that the special medical care and logistical support program for Rongelap and Utrik and for the agriculture and food programs for Enewetak and Bikini described in section 103(h) of Public Law 99-239 represent special and continuing moral commitments of the United States which will be annually funded to the extent of the need of the populations of such atolls for such assistance."

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONVENING OF CONGRESS IN PHILADELPHIA, PA, ON JULY 16, 1987

Mr. SIMPSON. Mr. President, I send a concurrent resolution to the desk on behalf of Senator THURMOND, Senator DOLE, Senator BYRD, Senator STENNIS, Senator HATFIELD, Senator SIMON, and Senator KASSEBAUM, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 172) to convene the Congress in Philadelphia, Pennsylvania, on July 16, 1987, in order to commemorate the 200th anniversary of the Great Compromise creating the basis of representation between the Senate and the House of Representatives.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the immediate consideration of the concurrent resolution.

The Senate proceeded to consider the concurrent resolution.

Mr. THURMOND. Mr. President, today, along with Senators DOLE, BYRD, KASSEBAUM, HATFIELD, STENNIS, and SIMON, I am urging Senate passage of Senate Concurrent Resolution 172, a concurrent resolution providing that the House and Senate shall convene for the day of July 16, 1987, in Philadelphia, PA. The purpose of this very special session of Congress would be to commemorate the 200th anniversary of the "Great Compromise" creating the basis of representation in the House and Senate.

Mr. President, the sponsors of this proposal, as the members of the Commission on the Bicentennial of the Senate, are charged with the responsibility of coordinating the observance and celebration of the Senate bicentennial. We can think of no better date on which to commemorate the 200 years of the legislative branch than on the date that the framers crafted the plan establishing how the Senate and House were to be constituted. It was this question which bitterly divided the delegates to the Constitutional Convention and threatened to scuttle its mission.

The proposal to convene the Congress in Philadelphia has been developed primarily by Philadelphia's "We The People, 200" committee, which has already raised $1.5 million to underwrite the cost of the event. This special session of Congress would be an actual working session, rather than a purely ceremonial event. If held, it would be the first time in 187 years that Congress has met outside Washington and the first time the Congress has ever met outside the seat of government.

Mr. President, although much planning remains to be done, as this resolution specifies, Congress would convene in the Independence National Historical Park for 1 day, July 16, 1987. Plans are already being developed regarding erection of temporary structures for the House and Senate Chambers. Details regarding transportation, security, funding, and other matters related to this proposal are under study.

Only 9 months are left to prepare for this event—if it is to occur. Congress must decide very quickly if it wishes to commemorate its bicentennial in this fashion. I, therefore, urge my colleagues to approve this important concurrent resolution.

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution (S. Con. Res. 172) was agreed to.

The preamble was agreed to.

The concurrent resolution, with its preamble, reads as follows:

S. CON. RES. 172

Whereas 1987 marks the two hundredth anniversary of the meeting of the Constitutional Convention in the City of Philadelphia, Pennsylvania from May 25 to September 17, 1787;

Whereas on July 16, 1787, the framers of the Constitution agreed to the "Great Compromise", which provided for States to be represented equally in the Senate and in the proportion to their populations in the House of Representatives;

Whereas that compromise established fundamental nature of the Senate and the House of Representatives;

Whereas the City of Philadelphia's "We the People 200" committee, an organization planning a year-long national celebration of the United States Constitution bicentennial, has invited the Congress of the United States to convene a special legislative session on July 16, 1787, at Independence National Historical Park; and

Whereas it is appropriate for Congress, as the First Branch of the Government under the Constitution, to provide for suitable commemoration of this significant anniversary to focus public attention on the unique role of the national legislature as a coequal branch of the Federal Government: Now, therefore, be it

Resolved by the Senate (the House of Representatives concurring), That the two Houses of Congress shall convene for the day of July 16, 1987, in the city of Philadelphia, Pennsylvania, in the Independence National Historical Park.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZING CERTAIN ACTIONS AFTER THE SINE DIE ADJOURNMENT OF THE PRESENT SESSION

Mr. SIMPSON. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A resolution (S. Res. 510) authorizing the President of the Senate, the President of the Senate pro tempore, the majority leader of the Senate, and the minority leader of the Senate to make certain appointments after the sine die adjournment of the present session.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The PRESIDING OFFICER. The question is on agreeing to the resolution.

The resolution (S. Res. 510) was agreed to, as follows:

S. RES. 510

Resolved, That notwithstanding the sine die adjournment of the present session of the Congress, the President of the Senate, the President of the Senate pro tempore, the majority leader of the Senate, and the minority leader of the Senate be, and they are hereby, authorized to make appointments to commissions, committees, boards, conferences, or interparliamentary conferences authorized by law, by concurrent action of the two Houses, or by order of the Senate.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, I greatly thank the Democratic leader for his presence here, enabling us to proceed with our business. I thank him.

Mr. BYRD. I thank the distinguished acting majority leader.

□ 1050

IMMIGRATION REFORM AND CONTROL ACT OF 1986—CONFERENCE REPORT

Mr. SIMPSON. Mr. President, I ask that the Senate turn to the consideration of the conference report on S. 1200.

The PRESIDING OFFICER. The conference report will be stated by title.

The bill clerk read as follows:

IMMIGRATION REFORM AND CONTROL ACT OF 1986—CONFERENCE REPORT

The Senate resumed consideration of the conference report.

Mr. SIMPSON. Mr. President, before we proceed with the conference committee report, which was agreed to in the House yesterday, I see my colleague from New Mexico is on the floor. I have been informed by my good friend, the chairman of the Committee on the Budget, Senator PETE DOMENICI, that the conference report on S. 1200, the immigration reform bill, is subject to a point of order under the Budget Act, since the legislation before us would, after a 5-year moratorium, then allow legalized aliens to become eligible for certain Federal welfare programs. There is an exceedingly limited Federal benefit to these persons during that 5-year period. Consequently, this is considered then to be an expansion of an entitlement program in a year for which no budget resolution has been agreed to.

Shortly, I shall ask for unanimous consent that section 303 of the Budget Act be waived for consideration of the conference report. I want to inquire of the Senator from New Mexico, who is a most extraordinary and alert and productive Member of the Senate with regard to budget matters, if he has a further statement with regard to this matter.

Mr. DOMENICI. Mr. President, I believe the distinguished Senator from Wyoming has properly stated the case. At this point, the conference report that is before us would be subject to a section 303 point of order under the Budget Act. In essence, that point of order lies because the conference report expands entitlement programs beginning in fiscal year 1992, a year for which we do not have a budget resolution. There is a clear provision in the Budget Act, section 303, saying that new or expanded entitlements cannot be considered for the years for which there is no budget resolution in effect. We all understand why. That was a very prudent thing.

I see the minority leader on the floor. He had a hand in draftng that in the Budget Act when it was prepared. That was to prevent a willy-nilly kind backdoor expenditure where you get around the processes by saying, 3 years from now, here is a new add on to some entitlement program which causes automatic expenditures.

That is the explanation. Having said that, I want the distinguished Senator from Wyoming and the Senate to know that this is a 50-vote waiver; it is not a supermajority requirement. This is part of the Budget Act in its original content. Clearly, this kind of point of order was not enacted with the sense that it should never be violated or we should never use the waiver for it. The waiver provisions are there with the clear understanding that if the Senate of the United States looked the issue squarely in the eye and said, "We want to waive," they will have the choice.

So I say to my friend from Wyoming and to the U.S. Senate that I believe the issue of waiving section 303 is separate and distinct from whether you want to vote for the bill. If one chooses to say, "I don't like the new immigration bill," there will be a chance to say no. The Senator from New Mexico will probably be in that group. But basically, I believe it is an exact case for waiver.

I think you could not find a better example of a situation where you ought to waive section 303 so long as you understand the nature of the entitlement that is being created. I do. I think the Senate will find that taking the whole bill, the fact that immigration is a major national problem, the fact that it has been worked on for decades, the fact that for five sessions of Congress we have come close and failed, take all those things together and this bill is a remarkable accomplishment. If you had a list of five major American domestic problems, you would have to say immigration is one.

So I am going to support waiving section 303 of the Budget Act. I do not believe it is a major new expenditure of money. I believe it is far out in the future and when you look at that waiver in the context of whether you should deny the U.S. Congress an opportunity to pass a major immigration bill, you ought to say yes. If you are going to say yes, you ought to give them the opportunity to vote on that. Then you ought to waive.

So, if the distinguished Senator from Wyoming propounds a motion to waive, the Senator from New Mexico will be on his side.

I do not want my good friend from Wyoming to misunderstand. This does not mean that I am terribly sanguine about the bill. I know his diligent work and what he thinks about it and the fact that it is practical and pragmatic and compromises had to take place. But I, for one, think it might be a worse bill than what originally passed the Senate. I did not vote for that; consequently, I cannot vote for this one. But I am willing to join him in waiving if and when he moves to waive section 303 of the Budget Act.

Mr. SIMPSON. Mr. President, I do thank Senator DOMENICI very much. I now ask unanimous consent, in accordance with section 914 of the Budget Act, to waive section 303 of that act for consideration of the conference report.

The PRESIDING OFFICER. Is there objection?

Mr. GRAMM. I reserve the right to object.

Mr. President, I think this is not a trivial matter before us. In a letter from the Congressional Budget Office dated October 15, Rudy Penner, the Director, reports that the direct spending provisions in the bill through 1991 total almost $4 billion. That is double the amount the administration set out as a goal. To commit to these direct expenditures now under Gramm-Rudman would require that cuts be made in other high-priority programs.

Mr. President, I am not going to debate the immigration bill now. We are going to have ample opportunity to do that. But I do not believe that a waiver of the Budget Act of the magnitude that we are discussing here ought to be done by unanimous consent. I believe it ought to be voted on. The distinguished Senator from New Mexico has made a clear cut case that this might be an instance where you want to vote a waiver, but I believe the waiver would be voted on. Therefore, I shall have to object to the unanimous consent request and I do object.

The PRESIDING OFFICER. Objection is heard.

Mr. SIMPSON. Mr. President, indeed, immigration reform, budgeting of it, is not an insignificant matter. It is a grueling, ghastly issue, filled with emotion, fear, guilt and racism. It makes it tough to pass something that has those things attached to it. But the provision here is waiver—I shall have a statement later on the bill. I do respect greatly the Senator from Texas, for what he tries to do for us in fiscal responsibility matters is extraordinary.

The cost to Americans, both financially and socially, will far outweigh the $4 billion in 4 years, when we have 1.8 million people coming across our

borders each and every year, undocumented, who then seek our services. But provision is made in the Budget Act for waiver. So I move, in accordance with section 904 of the Congressional Budget Act, to waive section 303 of that act for consideration of the conference report.

The PRESIDING OFFICER. The question is on agreeing to the motion.

Mr. GRAMM. Mr. President, I suggest the absence of a quorum.

Mr. DOMENICI. Would the Senator withhold on that? I would like to make a comment on that.

Mr. GRAMM. I withhold, Mr. President.

Mr. DOMENICI. Mr. President, the motion is debatable, is it not?

Mr. SIMPSON. It is not debatable.

The PRESIDING OFFICER. The motion is debatable.

Mr. SIMPSON. I understood that motion was not debatable and time for debate would be had by unanimous consent agreement.

The PRESIDING OFFICER. Under the Budget Act, the motion to waive is a debatable motion.

Mr. DOMENICI. A parliamentary inquiry: Is time for debate limited by law?

The PRESIDING OFFICER. In this situation, the time for debate is not limited by law.

Mr. DOMENICI. Mr. President, may I be recognized?

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, I hope the Senate, in short order, will move to waive. I would like quickly to address the issue that the distinguished Senator from Texas raised.

Actually, the $4 billion that the Senator from Texas is alluding to is a true statement by the Congressional Budget Office. But that part of this bill is not the reason for a point of order because, as a matter of fact, that program that has been alluded to in fact starts in a year for which there is a budget resolution, 1987. Consequently, it does not violate the provision that I spoke to. So it clearly is not the $4 billion item that we are waiving but, rather, a very remote outyear addition to an entitlement program because we do not have a budget resolution at this point in time.

I think that even adds to the significance of the position of the floor manager that we ought to get onto the substantive issue and waive the Budget Act. If ever there was a case for a piece of national legislation for which a waiver is judicious and prudent, this is one. I hope the Senate will proceed.

Mr. METZENBAUM. Will the Senator from New Mexico yield for a question?

Mr. DOMENICI. I shall be happy to yield.

□ 1100

Mr. METZENBAUM. Is the Senator from Ohio not correct in his understanding—and I would like to ask the attention of the Senator from Wyoming as well, if he will be good enough to listen to the question I am about to propound to the Senator from New Mexico. Is it not the fact that the cost features may become applicable in 1987 but as a reality, since legalization does not occur overnight, the actual cost figures are down the road even a piece beyond 1987? Am I not correct in that?

Mr. SIMPSON. Mr. President, that is absolutely correct. That is why in the Senate version of the bill we provided that the legalization funds would be $300 million in the first year and in the second year and then $600 million in the third, fourth, fifth, and sixth years. That formula was changed, but the figure was $4 billion; $1 billion a year in those outyears past that 4-year period will be increased expenditures which will have to be brought before this body under the appropriations process.

Mr. METZENBAUM. Is it not also the fact that the figures the Senator has used are maximums, not the appropriated amounts?

Mr. SIMPSON. Mr. President, the figures that are used in the conference committee report are maximum figures. That is a capped feature of the bill which was agreed to by the conferees.

Mr. METZENBAUM. So the figures actually might be substantially less that that?

Mr. SIMPSON. That is possible, I say to the Senator from Ohio.

Mr. METZENBAUM. I thank the Senator from Wyoming as well as the Senator from New Mexico.

Mr. GRAMM. Will the Senator from New Mexico yield?

Mr. DOMENICI. I do not have the floor, I say to my friend.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. I would like to ask the Senator from New Mexico a couple of questions. I understand the 303 point of order has to do with creating new entitlements in a year where no budget has been adopted, and many of the provisions of this bill come into effect this first year. If we pass the continuing resolution later today, it is possible that there will be a 311 point of order that will lie against the bill, a point of order that will require 60 votes. But I would like to ask another question. As I read in the bill, it says in general:

Out of any money in the Treasury not otherwise appropriated, there are appropriated to carry out this section $1 billion for fiscal year 1988 and for each of the 3 succeeding fiscal years.

Now, obviously, the 303 point of order has to do with new entitlements created in the outyears. But would the distinguished chairman explain to the body how this $1 billion would feed into the budget process? My question is, what possibility there might be concerning a third point of order, not to 303 which the distinguished Senator from Wyoming has sought to waive, or the 311 point of order which clearly will not lie unless there is a continuing resolution, and may or may not lie at that point, but how does the $1 billion that is clearly appropriated here fit into the budget process?

Mr. DOMENICI. I would be pleased to respond. First of all, let me say, Mr. President and Members of the Senate, the Senator from Texas is correct. This pending conference report may or may not be subject to a section 311 point of order which requires a supermajority, depending upon how much the continuing resolution costs when it is finally sent to the President. The Senator is essentially correct. But we will not know the answer to that until both Houses have agreed to the continuing resolution.

With reference to the $1 billion that the Senator referred to in direct appropriations for the year 1988, it might sound strange but basically the reason there is no point of order for that is that there is a precedent which we have named the Long precedent after the distinguished Senator from Louisiana because in fact the Senate has voted on that issue and the point of order does not lie on that until the beginning of the calendar year in which that fiscal year begins—in other words, January of calendar year 1987.

Now, nonetheless, the substantive issue of budgeting and costs is terribly relevant to this bill and that is the point the Senator is making. Clearly we are saying we are going to mandate as the Senator has described, regardless of other provisions of law, the $1 billion the Senator has referred to in the manner he has referred to it in the future years for this program. You cannot escape it. I would assume in technical language, budget language, if this conference report is adopted, those who begin to project our budgets in the future will put in that beginning point for automatic expenditures for our Government that figure. In other words, we will have raised automatically the amount of expenditures in the so-called baseline—or starting point assumption of reality maybe is a better way of saying it—that $1 billion in each of those years. So it does indeed have a rather substantial impact.

Mr. GRAMM. I thank the distinguished chairman of the Budget Committee.

(Mr. GRASSLEY assumed the chair.)

IN OPPOSITION TO THE CONFERENCE REPORT ON THE IMMIGRATION REFORM AND CONTROL ACT

Mr. DENTON. Mr. President, I rise in opposition to the conference report on S. 1200, the Immigration Reform and Control Act. While I support the concept of general immigration reform which will allow this country to control its borders and applaud the herculean efforts of our distinguished colleague from Wyoming [Mr. SIMPSON], chairman of the Judiciary Subcommittee on Immigration and Refugee Policy, I do have a number of concerns with the conference report before us.

Let me first say that despite my concerns, I signed the conference report in order to allow the report to be debated by the full Senate. However, I must now register my opposition to the report.

Mr. President, the first area which engenders my concern is the so-called Frank antidiscrimination language. In short, the language would broaden the current provisions of title VII of the Civil Rights Act of 1964, create a new protected class by prohibiting employment discrimination based on alienage or citizenship status and create a new bureaucracy outside of Equal Employment Opportunity Commission for adjudication of complaints. Or, in the words of the U.S. Chamber of Commerce, the provision "give aliens—that is, permanent resident aliens, newly legalized aliens, refugees, and asylees—new job discrimination protections not available to U.S. citizens," and "bars employers from hiring only U.S. citizens." Further, it "makes small employers—employers of less than 15 people—currently exempt from the requirement of title VII of the Civil Rights Act of 1964, subject to laws granting new rights for noncitizens."

Mr. President, title VII currently covers discrimination based on national origin and the proponents of the provision are unable to cite examples of alienage discrimination. While I believe that existing law is sufficient to guard against any potential discrimination based on national origin, I fear that the Frank antidiscrimination provision will have the unintended effect of promoting discrimination against U.S. citizens.

The second area which gives me reason for concern is the legalization or amnesty provision. In sum, this provision provides temporary status—to be upgarded to permanent residence status after 1 year—to aliens who were in this country illegally prior to January 1, 1982, and who have resided continuously in the United States since that time.

By adopting this provision we reward lawbreakers—people who have been in this country illegally—and punish the thousands of would-be immigrants who have been in the process of petitioning to enter this country legally. Additionally, the millions and millions of illegal immigrants rewarded by the legalization provision would severely test the capacity of our institutions to absorb and assimilate them and adversely effect employment for U.S. citizens.

To soften the impact of legalization, the conference report provides for a capped entitlement for grants to States for $1 billion each year for 4 years. Certainly, if we are to have legalization we must ease the financial burden which will befall the State. Yet, I would ask, how in this era of Gramm-Rudman-Hollings can the country afford $4 billion? What program will have to be cut to pay for the cost of legalizing millions of illegal aliens? National defense? Education? Veterans programs?

Finally, Mr. President, the conference report specifies that nonimmigrant workers admitted or permitted to remain in the United States for agricultural labor or services shall be treated like lawful permanent resident aliens for purposes of eligibility for legal services under the Legal Services Corporation Act. Or in other words, the provision provides limited legal services for migrant farmworkers—workers who remain foreign nationals; services which would not be automatically provided for U.S. citizens similarly situated. I find this provision to be questionable.

Mr. President, for these reasons and for a desire to protect the American worker, I am compelled to vote "no" on the conference report on S. 1200, the Immigration Reform and Control Act.

Thank you, Mr. President.

Mr. KENNEDY. Mr. President, I intend to vote against this immigration bill. While the current version contains much that is worthwhile, I strongly oppose the employer sanctions provisions, which I regard as an unwarranted badge of discrimination against millions of law-abiding, hard-working American citizens of Hispanic descent.

Having said that, I also want to acknowledge that bad as this bill is, it might have been even worse. That it is not is a tribute to the dedication and endurance of the chairman of the Senate Immigration and Refugee Policy Subcommittee, Senator ALAN SIMPSON. We disagree about the merits of this bill, but he has worked hard to eliminate some of the most objectionable features in its prior incarnations. In fact, the current bill is a clear improvement over the measure that passed the Senate only a year ago.

Immigration reform is one of the most complex issues that any of us has ever faced—and it is also one of the most important, because it will shape the lives of millions of Americans in the years ahead.

There are many provisions in the current bill that I support, such as the generous amnesty date, the elimination of any massive temporary foreign agricultural worker program, the semisunset provision that I worked to have included in a stronger form, the new alienage civil right, and the breakthrough that ends the two decade old discrimination in current law against Irish and other European immigrants.

But these positive features fall well short of justifying this legislation. The resort to employer sanctions is a retreat from America's commitment to civil rights and our struggle against discrimination.

If one thing is clear in the history of the immigration laws, it is that whenever Congress enacts a measure with any potential for discrimination, the full potential is relentlessly realized and virulent discrimination results.

This bill has that potential and will inevitably have that result. It is an underserved slap at millions of Hispanic citizens. In our zeal to control our borders, we should resist the temptation to break faith with the noble ideals of America's immigrant heritage. This measure fails that test, and it should not be enacted into law.

Finally, it is illusory to believe that this bill can deal effectively with the migration pressures of the future, unless we are also prepared to deal with the economic forces behind those pressures. We must address the issues of economic growth and development in other nations if we are to gain control of our own borders. When the peso fell, migration soared. This bill deals only with the immigration law, but not the powerful forces driving illegal immigration.

Mr. THURMOND. Mr. President, I rise in support of the conference report on S. 1200, the proposed "Immigration Reform and Control Act of 1986." This legislation is the result of more than a decade of effort to reform the immigration laws of the United States.

Mr. President, no country in the world comes close to attracting or accepting immigrants at the rate that our Nation does. This has been the case throughout our history and is a tradition of which we are justly proud.

Today, however, the unfortunate truth is that immigration in the United States is out of control. It is estimated that illegal entrants now in our country number in the millions and continue to increase at a rate in the hundreds of thousands per year. This bill—while recognizing the great benefits the country obtains from new migrants—attempts to come to grips with the necessity that they be limited to an appropriate number, and be selected on the basis of family reunification priorities and preferences for skills needed in a highly developed nation.

Mr. President, as my colleagues are aware, this conference report is the result of hours upon hours of deliberations by House and Senate conferees and their staffs. Great credit and congratulations must go to the distinguished majority whip, Senator SIMPSON, who, in his role as chairman of the Subcommittee on Immigration and Refugee Policy, has labored tirelessly for 6 years to bring us to this point. He has been required to balance many divergent interests in crafting a bill to bring illegal immigration under control. My hat is off to him.

Although I believe that, overall, this conference report will result in positive immigration reform and I will vote for its passage, like most of those who have reviewed its contents, I do not support every provision of the report. One provision in particular, known as the Frank antidiscrimination amendment, causes me significant concern.

The Frank provision prohibits employment discrimination, not only on the basis of national origin, but also on the basis of status of citizenship. The practical effect of this provision is that an employer must hire an alien applicant for a position over an American citizen applicant if the alien is marginally better qualified. I do not question the appropriateness of the prohibition against discrimination of United States citizens on the basis of national origin—a policy which is a part of title VII of the Civil Rights Act of 1964. This prohibition, however, should apply only among the citizens of the United States and there should not be a policy which prevents an employer from granting a preference to an American citizen over an alien. I was, therefore, very disappointed that the House insisted on including this provision.

But, as I stated, Mr. President, the good in this bill and the great need for immigration reform outweighs the negatives in the bill and I urge the support of my colleagues for the conference report.

Mr. President, I want to take this opportunity to commend the staff of the Immigration Subcommittee for their outstanding work on this legislation. Chief counsel Dick Day has done an excellent job, not only this year, but over the last several Congresses, in assisting in the development of the bill. Staff counsel Carl Hampe and Jodi Brayton have also done fine work on the bill.

□ 1110

Mr. BYRD. Mr. President, I ask unanimous consent to speak out of order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Democratic leader may proceed.

SENATOR PAUL LAXALT

Mr. BYRD. Mr. President, with the retirement of Senator LAXALT, the U.S. Senate says farewell to a son of the modern American West. We say farewell to the individualism of a Western pioneer, and to a consistent advocate of the unfettering of individual drive, ambition, and potential.

With President Reagan and our esteemed colleague, Senator GOLDWATER, Senator LAXALT has been one the most eloquent and influential voices for his party's conservative wing in this decade.

Mr. LAXALT was elected to the Senate in 1974 after having served as Lieutenant Governor and Governor of the State of Nevada. He was the only member of his party to capture a Senate seat that year, and the first member of his party to represent the State of Nevada in the Senate since 1952. I am sure that he is also proud of the fact that he is the first Basque-American ever elected to the U.S. Senate.

His senatorial career has been distinguished by his service on the Senate Appropriations Committee and Senate Judiciary Committee.

His senatorial career also has been highlighted by his fights for regulatory reform, his vision of a "new federalism," his advocacy for fiscal prudence, his faith in the private sector, and his push for a strong national defense. One of the most important responsibilities of the U.S. Senate is to provide for the safety and security of the United States, and Senator LAXALT has been tenacious and eloquent in this quest.

I have always found him to be a trustworthy and honorable Senator. To his credit, Senator LAXALT has never allowed political differences to become personal—and this is an essential ingredient if this body is to care for the vital work of this Nation that is the responsibility of the Senate.

Senator LAXALT's career as a public official has involved many important duties and successes outside as well as inside this Chamber. He has performed important diplomatic duties for the President; he has served as the general chairman of the Republican Party, 1982, and was chairman of Ronald Reagan's 1976, 1980, and 1984 Presidential campaigns.

Futhermore, Senator LAXALT has served as an important bridge between his colleagues in the Senate and the White House. Steve Roberts accurately noted in the New York Times magazine:

> Senator LAXALT has been called the President's best friend so many times that the phrase is now practically part of his name.

As the leader of Senate Democrats, I know what an important link this has been, because Senator LAXALT has used his personal influence with the White House to assist Democratic as well as Republican Senators. I have always appreciated that, for that is the type of cooperative spirit and attitude that enables the Members of this Chamber to work effectively together despite our political differences.

The Senate will miss his talents and his unwavering commitment to the causes in which he believes. And the Senate loses a good man and effective Senator. My wife Erma and I extend our best wishes to him and his wife Carol as they prepare for the next stage in their lives.

□ 1120

I feel safe in saying, however, that we have not heard the last from this man who has distinguished himself with success in so much that he has undertaken. May his future years be bright.

Mr. President, while the quorum call was in progress, I decided that this might be a good time to speak about our departing colleagues.

When a Senator is ready to ask for the floor I will be happy to take my seat and if business is ready to be transacted, I will certainly yield the floor.

SENATOR BARRY GOLDWATER

Mr. BYRD. Mr. President, with the retirement of Senator BARRY GOLDWATER, an institution departs this Chamber. With his leaving, an important part of American history departs. He is the man and the Senator who made conservative political ideology an important and influential force in contemporary American politics.

In this Chamber, long before it became politically popular to do so, Senator GOLDWATER consistently and adamantly fought intrusions of Government into the lives of the American people; it made no difference if those invasions, as he saw them, were proposed by the political left or the political right; or whether those intrusions were proposed by Democrats or Republicans, he was there, and was calling the Nation's attention to them and denouncing them in his own eloquent style. His inherent belief in the American people and his faith in the American democratic process have touched and inspired us all.

In this body, Senator GOLDWATER has performed valuable service on the Senate's Commerce, Science, and Transportation Committee; the Select Indian Affairs Committee; and the Small Business Committee. He was chairman of the Intelligence Committee.

But in 1985 he realized one of his great ambitions—he became chairman of the Senate Armed Services Committee. Upon taking the position, Senator GOLDWATER said it was one of "the biggest challenges I've had in public life."

As usual, he met that challenge effectively and successfully. In this role, he has demonstrated a continual receptivity to changes in law and procedure where they will improve America's defense structure. Just this year, he and the distinguished senior Senator from Georgia, Mr. NUNN, proposed and guided to passage the Department of Defense Reorganization Act of 1986. As I said on the day the Senate approved that measure, this is "the most significant legislative effort to improve the Nation's civilian and military decisionmaking structure in the past 25 years."

Senator GOLDWATER's career has been filled with peaks and valleys, praise and criticism—there has been rarely a dull moment in his long and distinguished career. In 1964, he was his party's Presidential nominee. Although he was not elected, in the 1970's a Gallup Poll revealed that he was one of the 10 most admired men in the world.

In the 1964 Presidential election, when Senator GOLDWATER showed that a national campaign can be built around a powerful, committed political belief, he wrote in his book, "Conscience of a Conservative":

> If I should be attacked for neglecting my constituents' interests, I shall reply that I was informed their main interest is liberty and that in that cause I am doing the very best that I can.

And indeed he did do his best. The Members of this Chamber always respected him for it, and the people of his beloved State of Arizona must have appreciated it, too, for they kept sending him back to represent them.

Although some of the ideas that Senator GOLDWATER has promoted have been controversial, I have never once heard the Senator himself attacked. James J. Kilpatrick was certainly on target a few months ago when he wrote:

> I have never heard a mean or malicious word said about him [Senator GOLDWATER]. How can you hate a thoroughly honest man?

And as I said on May 7, 1986, the day the Senate approved the Department of Defense Reorganization Act:

> If we have differed from time to time, I have never misunderstood where Mr. GOLDWATER stood. I have never failed to have respect for his conviction or his position.

Mr. President, throughout his entire senatorial career, BARRY GOLDWATER was truly a choice, never an echo.

In his book, "With No Apologies," Senator GOLDWATER wrote:

> The world may seem dark and cold and beyond redemption for a moment—but only for a moment. We know Almighty God intended his children to be free.

Mr. President, I do not think that it is taking any credit away from the Good Lord to say that it is also because of the dedicated efforts of American public servants such as Senator BARRY GOLDWATER that the world is less dark, less cold, and people a little more free.

I now say goodbye to a good friend, a good man, and a good Senator as he begins another phase of his life.

May God's blessings continue to favor BARRY GOLDWATER.

Mr. President, I suggest the absence of a quorum and I yield the floor.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1130

Mr. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Democratic leader.

ORDER OF BUSINESS

Mr. BYRD. Mr. President, believing that the viewing public would prefer seeing a face on the screen, even if it is mine, over watching a quorum call, and hoping that the public will be somewhat more benefited, at least, I shall proceed at this time, ready to yield the floor at any time to any Senator who wishes to have the floor or if the majority leader or other Senators wish to transact business.

SENATOR GARY HART

Mr. BYRD. Mr. President, GARY HART was elected to the Senate in 1974, after having served as an attorney in the U.S. Justice Department in Washington, DC; special assistant to Secretary of Interior Stewart Udall; and national campaign director for Senator George McGovern's Presidential campaign in 1972.

It has been a pleasure to work with this Senator, and I know I am not alone in regretting his departure from this body. As I have said before on this floor—June 20, 1986—Senator HART has the ability to combine "intellectual freshness with a good dose of practicality."

Shortly before his first election as Senator, Mr. HART stated: "This Nation needs a new generation of thinkers and doers who will question old premises and disregard old alliances."

As a Senator he has been a "thinker" and a "doer." In 1984, when he seemed to have come from nowhere to almost capture the Democratic nomination for President, if anyone had asked me, I could have told them that he had been producing "new ideas" well before his Presidential campaign, and was respected for his creativity and fresh approach. Since his first days as a Senator, he has been proposing "new ideas" which have been filled with both careful thought and substance.

In so doing, Senator HART has played an active role in defining and shaping the national agenda for the 1980's, and he has occupied important roles in most of the legislative areas that affect the American quality of life.

In the environmental field, he has served as cochairman of the Congressional Environmental Study Conference, Chairman of the National Commission on Air Quality (NCAQ), and he authored several amendments to the Senate's rewrite of the Clean Air Act. Because of efforts in this field, the National Wildlife Federation once named him "Legislator of the Year."

In the area of energy, he is the former chairman of the Senate Budget Committee's Task Force on Synthetic Fuels, has served on the Energy and Public Works Committee, and has chaired the Nuclear Regulatory Subcommittee. And he authored "An Energy Plan for the 1980's"—a plan to enable the United States to achieve energy self-sufficiency by 1990.

Senator HART also has been a leader in attempts to devise a fair and reasonable Federal budget. He served as a member of the Senate Budget Committee. Even before the whopping additions to the Federal debt brought to us by the Reagan administration, Senator HART was expressing grave concern about the size of the Federal budget deficit. In 1981, he advocated and the Senate Budget Committee adopted a plan he proposed to balance the Federal budget.

In the area of national security, Senator HART was the founder and cochairman of the Congressional military reform caucus, serves on the Senate Armed Services Committee, and has authored a proposal for strategic talks on prevention [STOP] that offered firm measures to prevent the use of nuclear weapons.

Last June, Senator HART delivered a three-part series of lectures entitled "Enlightened Engagement: A Foreign Policy for the 21st Century," in which he outlined a comprehensive framework—a vision—of the challenges and opportunities for this country's foreign policy into the next century. Shortly after these lectures, Columnist George Will wrote, "HART has made a brave effort to think systematically about foreign policies which are necessarily episodic." I pointed out at the time that this was "precisely the kind of analysis which is obviously and sorely lacking in the fractured and drifting ad hoc militarism which characterizes the present administration's approach to the world."

And Senator HART has been a major advocate of programs that involve investing in American's future. He has stressed, for example, Government en-

couragement for growth of high-technology industries and retraining workers for them.

As early as 1979, Time magazine named Senator HART one of the "50 leaders for America's future." Senator HART's work in this Chamber, and his accomplishments for the people of his State of Colorado and of the United States have certainly made that prediction prophetic.

Senator HART now leaves this Chamber in order to pursue other endeavors. Those of us who have served with him, and have come to highly regard his vision and intelligence, are certain that he is not leaving the stage—he will not cease to be visible on the public scene.

My wife Erma and I wish him and his wife, Lee, well, and along with many others, will look forward to the products of this fertile mind and to his continued leadership in the future.

250TH ANNIVERSARY OF CHARITY HOSPITAL

Mr. LONG. Mr. President, it has been 250 years since Charity Hospital of Louisiana at New Orleans came into existence. Since its modest beginnings following the death in 1736 of Louisiana merchant Jean Louis—who ordered that his estate be used to found a hospital for the indigent—Charity Hospital has stood as a monument to my State's commitment to the people, regardless of their financial means.

Charity Hospital has a long proud history. In my lifetime alone, it has undergone drastic changes and improvements, each of which have increased the quality of health care available to the citizens of my State. I am proud to say that my father, the late Gov. Huey P. Long, put hospital care for the poor at the top of his list of priorities when he took office as Governor of Louisiana in 1928. Under his leadership, funds to Charity Hospital were dramatically increased and health care to the poor was vastly improved. Within a few short years, the infant mortality rate at the hospital dropped by more than one-fourth.

When Huey Long became Governor, the death rate at the hospital was 4.1 percent on admissions. But because of his efforts, that was reduced to 2.8 percent, or a reduction of 28 percent. If you consider it another way and assume that the death rate should have been 2.8 percent all along, then you could argue that it had been 48 percent too high prior to the time he was Governor.

When my father took office, admissions at charity Hospital were 1,600. He increased admissions to 3,000 and reduced the costs, on a per capita rate, by 19 percent. So what you had was a drastic per capita cost reduction and about twice as many people receiving better service than before.

Today, the hospital serves as the primary teaching hospital for the Tulane University School of Medicine and the LSU School of Medicine. Training more than 400 physicians annually, Charity Hospital also serves as a major training center for professionals in allied health fields with its own School of Diagnostic Ultrasound, School of Nurse Anesthesia, School of Nursing and School of X-ray Technology.

Fifty-seven percent of all emergency room services in Orleans Parish are provided by Charity Hospital. Sixty-four percent of all out-patient visits in Orleans Parish are handled at Charity Hospital.

Mr. President, Charity Hospital clearly serves as the hospital of last resort for the needy citizens of Louisiana and I am proud of that commitment to the health and well-being of our citizens. I commend the hundreds of health care professionals whose dedication has made Charity Hospital a shining example of human compassion. Their commitment to their fellow human beings is worthy of the highest praise we can offer.

WATER QUALITY ACT OF 1986—CONFERENCE REPORT

Mr. STAFFORD. Mr. President, we are waiting momentarily for the Democratic leader to come in the room, although I believe he is aware of our intention to go ahead with the Clean Water Act amendments conference report.

Mr. President, without actually turning to the conference report, I will say that last evening the House passed the conference report, which in my view is excellent legislation, by, I believe, a unanimous vote. There were over 400 votes in favor of the conference report and none in opposition to it. At the proper time, after we have called up the conference report, I will yield to my colleague, Senator CHAFEE, who has been the chairman of the Environment and Public Works Subcommittee which handled this legislation and who has been instrumental not only as a leader in environmental issues but instrumental in his subcommittee, in the full committee, and in the conference between the House and the Senate in developing the legislation which has resulted in the conference report that passed the House unanimously with over 400 votes last night, and I hope will pass with an equally resounding majority in the Senate.

Mr. President, I now ask that the Senate proceed to the consideration of the conference report to accompany S. 1128, the Clean Water Act amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1128) to amend the Clean Water Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 15, 1986.)

Mr. STAFFORD. Mr. President, I would now propose a unanimous consent request that the bill be allotted 40 minutes for debate to be equally divided between the majority and the minority.

Mr. BENTSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. I have conferred with my colleagues on the committee on the minority side. We find that a fair apportionment of time considering the pressures that we are under in the closing days of this Congress.

The PRESIDING OFFICER. Is there any objection? None is heard. The unanimous-consent request is granted.

Mr. STAFFORD. Mr. President, I rise in strong support of this bill. It represents over 4 years of hard work by the Congress, and it deserves the enthusiastic support of all my colleagues.

I especially want to acknowledge the leadership of my good friend from the State of Rhode Island, Senator CHAFEE, who served as floor manager of the Senate bill and leader of the Senate conferees. His tireless enthusiasm has been a major force in shaping the bill before us today. Senators BENTSEN and MITCHELL and other members of the Committee on Environment and Public Works have made extraordinary contributions as well.

Mr. President, this bill makes a number of needed improvements to the Clean Water Act.

It extends the Federal construction grants program and provides for an orderly transition to State revolving loan funds.

It establishes a new program for focusing regulatory attention on "toxic hot spots," where controls on toxic pollutants beyond those required by uniform best available technology requirements are needed to restore and protect water quality.

It narrows and restricts a number of loopholes, variances, modifications, and waivers in the Clean Water Act.

It generally prohibits "backsliding" in permit requirements.

It establishes a new program for managing nonpoint sources of pollu-

tion, such as polluted runoff from agricultural lands.

It establishes new requirements to prevent toxic contamination of sewage sludge.

And it establishes new programs to clean up estuaries and lakes.

Mr. President, I urge my colleagues to support this bill. There is no question that it makes needed revisions to the Clean Water Act and will improve the quality of our Nation's waters.

Mr. President, I will not take the time to provide an exhaustive description of this bill, but I do want to make a few remarks about parts of the bill that are particularly important.

The conference substitute establishes a new subsection 402(o) for the purpose of limiting backsliding in permits. Backsliding occurs when the effluent limits in permits are relaxed for any reason. Relaxation of permit effluent limits is fundamentally contrary to the spirit and intent of the Federal Water Pollution Control Act, which is supposed to restore and maintain the chemical physical and biological integrity of the Nation's waters by reducing the amount of pollutants being discharged.

The new provision establishes a general rule that permit limits may not be relaxed, then presents several exceptions. These exceptions are intended to be narrow, and they must be narrowly construed consistent with the objective described above.

With respect to revised waste load allocations or other means of translating water quality standards into effluent limits, backsliding is allowed in only one instance. That instance arises when a State decides to take a portion of allocated waste load away from one facility and give it to another. The recipient facility in this case would be entitled to a revised permit allowing an increase in discharge of the pollutant for which the load is being reallocated. This transfer can take place only if there is a net reduction in the amount of the pollutant in question. Of course, the recipient facility still cannot discharge more of the pollutant than is allowed by effluent limitations guidelines or water quality standards.

Mr. President, I want to be explicit about types of backsliding that definitely are not allowed by this exception. If a facility reduces its discharge of a pollutant because of permit requirements, a process change, decrease in production level, or even closing the facility altogether, other dischargers may not increase their discharges in response. Putting it simply, a polluter is not allowed to increase his amount of pollution because another polluter is reducing his. For another example, suppose the new nonpoint source program works as it should and as a result the level of, say, nitrate pollution in a river decreases. A downstream point source may not obtain a weaker permit with respect to nitrate, even if he could discharge more nitrate without violating water quality standards.

Mr. President, the key to understanding this issue is to recognize the difference between water quality and water quality standards. Water quality is measured by the level of pollution in a water body. A water quality standard defines a particular level of pollution that is the maximum allowable in a water body.

If one polluter discharges less, water quality improves. If another discharger discharges correspondingly more, that improvement is lost, although the water quality standard still is being met. The objective of the act is restore and maintain the integrity of the Nation's waters. That objective cannot be reached if water quality gains achieved on the one hand are yielded back on the other. If actual water quality improves for any reason, such as the examples given above, that gain must be captured. The improved level of water quality defines the water quality that is subject to the antidegradation policy of the act. Thus, water quality that is higher than the minimum level of quality needed to meet a water quality standard is protected from degradation.

Mr. President, stormwater runoff from urban areas contains large volumes of toxic materials and other pollutants. Since 1972, municipal separate storm sewers have been subject to the point source permit requirements of the Clean Water Act. However, EPA only recently began to develop a permit program for these sources. The conference substitute contains a provision that is intended to establish a transition period for promulgating rules for regulating municipal separate storm sewers.

The conference substitute differs from the provisions in the House and Senate bills. The conferees discussed the issue at considerable length, and both bodies offered written proposals. The provision that was adopted by the conferees is the one offered by the Senate conferees, with modifications respecting the sizes of cities affected and the scheduling of requirements requested by the House.

I would like to note the important contribution to the resolution of this issue made by my good friend and colleague, the Senator from Minnesota, Senator DURENBERGER. It was he who proposed the idea of phasing in the program, as a refinement to the Senate proposal.

This provision gives EPA and the States a schedule for developing permit program regulations. Generally, it focuses first on the larger storm sewer systems—those serving more than 250,000 people. All permits for these systems must be issued within 4 years of enactment. Then systems serving more than 100,000 persons must be permitted. Finally, after October 1, 1992, EPA and the States must issue permits for the remaining municipal separate storm sewer systems.

Mr. President, I would like to explain to my colleagues why a little more time is needed to develop a comprehensive municipal storm sewer program. These permits will not necessarily be like industrial discharge permits. Often, an end-of-the-pipe treatment technology is not appropriate for this type of discharge. As an EPA official explained in a meeting of the conferees:

> These are not permits in the normal sense we expect them to be. These are actual programs. These are permits that go far beyond the normal permits we would issue for an industry because they in effect are programs for stormwater management that we would be writing into these permits.

As my colleagues know, I generally do not support willingly any delays in environmental programs, especially a program to control a source of toxic pollutants as important as this one is. EPA should have developed this program long ago. Unfortunately, it did not. The conference substitute provides a short grace period during which EPA and the States generally may not require permits for municipal separate storm sewers. However, even during this period EPA and the States must require permits when either determines that a storm sewer contributes to a violation of water quality standards or is a significant contributor of pollutants to waters of the United States.

Mr. President, there is one aspect of this provision that could cause confusion, and I would like to take this opportunity to clear it up. With respect to storm sewer discharges associated with industrial activity, new subparagraph 402(p)(2)(B) states that these sources are excepted from the provision that EPA and the States generally will not require permits for certain storm water systems. Moreover, paragraph 402(p)(3) explicitly states that these sources must meet all applicable requirements of sections 301 and 402. This includes the permit application requirements of section 402. In other words, the provisions of sections 301 and 402 of the act continue to apply without interruption, and storm sewers with discharges associated with industrial activities are subject to the enforcement provisions of the act if they do not have a section 402 permit.

The conference substitute also requires EPA to establish regulations regarding these sources and municipal separate storm sewers 2 years after enactment, requires applications no later than 3 years after enactment, and requires permit issuance no later than 4 years after enactment. These dates are outside dates. The schedule for promulgating regulations does not over-

come the underlying statutory requirements of sections 301 and 402 respecting the need to have a permit. Congress expects the regulations for storm sewers associated with industrial activity to be published under the current schedule and to require permits for these sources as soon as possible.

Mr. President, I have undertaken this explanation out of concern that affected parties may argue that the schedule for promulgation of regulations indicates an intent on the part of Congress to defer permit requirements for storm sewers associated with industrial activities. This definitely is not the case. If that result had been intended, the conference substitute would not specify that these storm sewers must meet all applicable requirements of sections 301 and 402.

The conference substitute also establishes explicit but limited authority for the Administrator to issue "fundamentally different factors" variances to industrial dischargers. This FDF variance currently is not authorized explicitly by the act. The EPA created it administratively, and the Supreme Court subsequently ruled that it had not acted illegally in doing so. The purpose of this provision is to provide explicit statutory authority for this variance, but at the same time to limit its availability.

Generally, the effluent limits required of a particular facility are based on nationally uniform effluent limitation guidelines for the industrial category or subcategory of which the facility is a member. If an industrial category is diverse, EPA is supposed to subcategorize industries appropriately, so that each subcategory contains similar facilities.

In establishing a category or subcategory, however, EPA usually does not examine every facility. Occasionally, a particular facility argues that it is "fundamentally different" from the other facilities in the category and that it should be able to negotiate individual effluent limits apart from those required for the category. This provision allows such modifications, but constrains their use in several ways.

The Administrator is to use this new authority sparingly. Generally, differences within an industry should be accommodated by creation of an appropriate subcategory. This provision should not be used in place of complete definition of subcategories within an industry.

In establishing an effluent limitations guideline under section 304, the Administrator is allowed to consider a number of factors. One is the cost of achieving the effluent reductions for the entire category. EPA must consider aggregate cost for the industry in order to determine the best available technology economically achievable by the entire industry. The national effluent limitations guideline, however, is not intended to account for the economic impact on an individual facility. As the conferees stated in 1972 when section 304(b) was enacted, EPA is to "make the determination of the economic impact of an effluent limitation on the basis of classes and categories of point sources, as distinguished from a plant-by-plant determination."

If a facility faces higher individual cost than the industry average, that is a reflection of economic efficiency of the facility rather than the ability of the industry as a whole to meet the necessary pollution control costs. To establish individual effluent limits on the basis of plant-specific cost of compliance would be to vitiate the principle of industrywide minimum treatment levels.

For these reasons, Mr. President, the conferees agreed to adopt the Senate approach and exclude individual cost of compliance from the factors the Administrator may consider when deciding whether to grant an FDF variance to a particular facility. Although the act does not and should not provide a mechanism to modify the requirements of an effluent guideline on the basis of fundamentally different costs at an individual facility, section 301(c) of the act provides for modification of requirements in a case where such requirements are beyond the economic capability of the owner.

Section 301(c) does not allow the Administrator to modify treatment requirements based on a showing of fundamentally different costs to an individual facility, unless these costs are beyond the economic capability of the facility and, therefore, threaten its survival. In addition, section 301(c) is subject to section 301(l), which prohibits the Administrator from modifying any requirement as it applies to a toxic pollutant. This provision assures that toxic pollutants will be controlled, regardless of the economic capability of the discharger. The new authority for treatment modifications based on fundamentally different factors contained in the reported bill is not subject to section 301(l).

This provision does not, however, preclude the Administrator from considering the other factors enumerated in section 304(b), some of which may result in reduced cost to the facility.

The Administrator may not use the authority of this section to modify effluent standards pursuant to section 307(a)(2) of the act, the general prohibited discharge standard in 40 CFR sec. 403.5, or other requirements implementing such standards.

The Administrator's decision to promulgate or deny an alternative effluent limitation or standard under this subsection shall be subject to judicial review pursuant to section 509(b)(1) of the act.

The Administrator may not delegate the authority to grant FDF variances to any State or to regional EPA officials. It should be exercised only by the Administrator or the Assistant Administrator for Water.

Mr. President, I am pleased to note that the conference substitute includes a major new program to control runoff pollution from nonpoint sources.

Nonpoint sources contribute approximately 50 percent of the pollution entering our Nation's waters. Nonpoint pollution contains not only conventional pollutants, such as sediment, bacteria and oxygen-demanding materials, but also toxics like cadmium, arsenic, lead, and pesticides. The U.S. Department of Agriculture in a recently issued report estimates that nonpoint pollution costs this country in excess of $7 billion per year in environmental damage and repair, such as dredging channels and reservoirs.

A new section 319 establishes a program to begin the process of addressing this hitherto unregulated source of water degradation. While potentially far reaching in its scope and intent, the new nonpoint program, as a product of compromise, is not as strong as I would have wished for. For example, it does not contain a regulatory component. Instead, it gives States and persons who are responsible for nonpoint pollution considerable flexibility to determine the type of program that will be used.

I consider this nonpoint source pollution program to be only a first step in tackling the problem—a trial run, to see if allowing the States the option to develop a control program will indeed abate nonpoint source pollution across the Nation. I am sure Congress will monitor the results of this program closely as it progresses if this approach has been adequate to meet the task at hand.

Mr. President, the conference substitute contains many provisions that are taken from the Senate bill. These provisions were described at length in reports from the Committee on Environment and Public Works in this and the previous Congress, as well as my own floor statements on the subject during Senate consideration of bills to reauthorize and amend the Clean Water Act. An adequate legislative history exists regarding congressional intent behind these provisions, so I will not describe them further at this time.

Mr. President, industrial users dump millions of pounds of toxic pollutants into the sewerlines to publicly owned treatment works [POTW's] each year. Virtually all of the toxic metals which do not simply pass through the POTW collect in the POTW's sludge, as do many of the toxic organics. Hence, many POTW's report sludge contamination from industrial wastes.

This already serious environmental problem threatens to become even more serious in the near future. The extent of contaminated sludge is likely to increase as more POTW's employ secondary treatment. That is because secondary treatment generates five times the sludge produced by primary plants. In addition, the sludge at secondary plants is likely to collect more toxics in the POTW's waste stream. Also, in response to restrictions in the Resource Conservation and Recovery Act on land disposal of industrial wastes, some operators of industrial facilities may engage in illegal dumping of hazardous wastes into sewers, contrary to Congress' intent.

Contaminated sludge causes serious adverse environmental and economic effects. It prevents cities from using cheaper disposal or use options such as fertilizer or soil conditioner. If landfilled or land spread, contaminated sludge can leach toxics into ground water and drinking water supplies, or introduce toxics into the food chain. If incinerated, such sludge can contaminate the atmosphere, affecting the health of POTW workers and nearby residents.

Pretreatment by industrial users of sewers can dramatically improve sludge quality. For example, I understand that in Muncie, IN, the sludge concentration of chromium was reduced from 2,000 to 9.5 with pretreatment. That of copper went from 1,750 to 700; nickel from 8,500 to 150; and zinc from 5,800 to 2,700. Large reductions in toxic concentrations have also been reported in other cities. In fact, pretreatment is the principal means for reducing the toxicity of municipal sludge. Also, pretreatment assures that the cost of toxics removal is borne by the generators of the toxic materials. Industries that dump toxics into sewers are simply passing their treatment costs on to the town or city, and creating political headaches in the process.

Because the relative strength or weakness of pretreatment requirements directly affects the quality of municipal sludge, EPA must consider the impact of pretreatment requirements on municipal sludge at two stages: When setting pretreatment requirements in the first instance, and when approving the issuance of removal credits under section 307(b) because the latter reduce pretreatment requirements for industrial users. That is why Congress told EPA in the 1977 amendment to the Clean Water Act not to approve the issuance of removal credits unless the credits would not prevent sludge use or disposal in accordance with regulations issued under section 405 of the act. In other words, Congress intended the existence of sludge regulations, and compliance with those regulations, to be a precondition to the granting of removal credits.

Of course, Congress originally directed EPA to issue comprehensive regulations covering every sludge use and disposal method by 1978. If EPA had followed this schedule, it could approve municipal programs to issue removal credits without adversely affecting the environment.

EPA, however, utterly failed to heed this congressional directive. Although I am told that EPA has detected at least 76 toxic priority pollutants in POTW sludge, it has issued rules only for two pollutants: cadmium and PCB's—and only if these pollutants are landfilled or land spread. EPA has no limits whatsoever on the toxicity of marketed sewage sludge products, and no limits for the many other toxic pollutants in sewage sludge which is landfilled or land spread.

These skeletal rules do not even approximate compliance with section 405 of the act. Nor do they provide a basis for determining whether EPA may safety approve the issuance of removal credits for industrial users.

I therefore sponsored an amendment to the Senate bill which I am happy to say is incorporated in the conference substitute. This amendment has a twofold objective: First, it directs EPA to begin the long overdue task of promulgating sludge regulations under section 405 of the act. Second, it addresses the relationship between sludge rules and removal credits.

This provision deliberately retains the original 1978 deadline for issuing sludge rules pursuant to section 405. It also gives EPA additional deadlines which are merely intended to put EPA on a schedule to correct its failure to meet the 1978 promulgation deadline in section 405. The additional deadlines are not intended to excuse the agency from its failure to meet the original deadline, nor to eliminate any consequences which flow from the original deadline, such as the inability to issue removal credits until sludge rules are in place.

Thus, by August 31, 1987, EPA must identify those toxic pollutants which, on the basis of available information on their toxicity, persistence, concentration, mobility, or potential for exposure, may be present in sewage sludge in concentrations which may adversely affect public health or the environment. For each such pollutant, EPA must promulgate regulations specifying acceptable management practices for sewage sludge containing the pollutant. EPA's rules must also establish numerical limitations for each such pollutant. EPA's rules must protect public health and the environment with an ample margin of safety, and must take care to protect the health of individuals or populations which are at higher risk than the population as a whole.

EPA officials informed the Congress over 3 years ago that there were at that time sufficient data to regulate comprehensively approximately 20 of the most common toxic sludge pollutants. Congress expects EPA to regulate at least these 20 pollutants in the 1987 regulations.

By June 15, 1988, EPA must issue similar regulations for all toxic pollutants which are not addressed by the 1987 regulations and which may be present in sewage sludge in concentrations which may adversely affect public health or the environment. These rules must meet the same criteria as the 1987 rules; that is, they must specify acceptable management practices, establish numerical limitations, protect public health and the environment with an ample margin of safety, and protect individuals and populations at higher risk than the population as a whole.

At least every 2 years, or more often if the data indicate, EPA must review its section 405 regulations for the purpose of identifying additional toxic pollutants which may be present in sewage sludge and must promulgate regulations for these additional pollutants. This requirement ensures that EPA's rules keep pace with developing technical knowledge and adequately protect health and the environment. It does not, however, excuse EPA from the need to issue comprehensive regulations on the schedule set forth in this bill.

Finally, the bill addresses the relationship between removal credits and sludge regulations. A recent court case, *NRDC* v. *EPA*, No. 84-3530 (3d Cir. 1986), correctly held that EPA could not approve the issuance of removal credits until the agency issued comprehensive sludge regulations under section 405 of the act. Yet notwithstanding the absence of 405 sludge rules, EPA has already approved the issuance of removal credits for 12 POTW's. Industrial users of these POTW's many have relied on EPA's approval in planning their pollution control systems. In addition, EPA has received removal credit applications from approximately 14 POTW's which also may have relied on EPA's removal credit rules in developing their programs.

The bill includes a provision to prevent temporary inequities with respect to these industrial users and POTW's. It stays that part of the court's decision which addresses section 405(d) of the act until August 31, 1987, for these approved or pending applications only. This will give EPA adequate time to correct its failure to issue the necessary sludge regulations. It will also allow these POTW's to grant removal credits, assuming they meet all other criteria for credits. It is important to note that the bill does not stay any

other part of the court's decision. In other words, these 12 POTW's must meet the applicable parts of the court's decision on consistent removal, combined sewer overflows, and so forth to continue to grant credits. In addition, EPA must revise the permits for these POTW's to incorporate the sludge criteria required by subsection (d)(4). Likewise, EPA may approve the 14 pending removal credit applications under the same criteria and subject to the same permit conditions mandated by subsection (d)(4).

Interim removal credit authority for these 26 POTW's may not extend beyond August 31, 1987, nor may EPA approve applications for removal credit authority from any other POTW's or for any additional pollutants not covered by the approved or pending applications. This restriction is critical because any further expansion of removal credits or perpetuation of existing credits beyond August 31, 1987, may well exacerbate the adverse environmental consequences of EPA's failure to issue sludge regulations. In addition, EPA's sludge regulations may necessitate stricter pretreatment requirements at some POTW's, including the 26 which have applied for credits. Until EPA has published the comprehensive sludge regulations as required by section 405(d), as amended by the conference substitute, the Agency is prohibited from allowing any more cities to weaken pretreatment requirements for industrial users. Also, the Agency is prohibited from extending interim removal credits allowed by subsection 406(e) of the conference substitute beyond August 31, 1987.

The conference substitute addresses acid mine drainage as well as the discharge of iron and manganese from abandoned coal mines—those mines abandoned before enactment of the Surface Mining Reclamation and Control Act of 1977. Although this problem is largely confined to the Appalachian region of our country, it is a significant water quality problem in that area. Acid drainage and the flow of metals and soils from these abandoned workings cause severe water quality problems throughout Appalachia that persist long after mining has ceased, in some cases rendering entire watersheds biologically dead.

I am told that it is generally less costly to reopen an abandoned minesite than to open up a new area. However, both the Surface Mining and Clean Water Acts impose a best available technology requirement on new mine operations, and confusion has arisen as to whether that requirement applies when an operator reworks an area abandoned prior to enactment of the Surface Mining Act.

To clarify matters, the conference substitute provides that section 402 permits issued for preexisting discharges from remined areas contain binding specific numerical effluent limitations set on a case-by-case basis, with the permit writer using his best professional judgment as to what those limitations should be. This approach was intended to give the mine operator sufficient flexibility and thus incentive to rework these abandoned sites. However, water quality must not be degraded and State water quality standards must not be violated, either at remined site or in adjacent areas. Further, after the binding specific numerical limitations are set, an applicant for such a discharge permit must demonstrate, as a separate showing, to the satisfaction of EPA—or the State, where applicable—that the issuance of such a permit creates a potential for improvement to water quality. This means that EPA and the State must be satisfied based on a conviction that it is probably that there will be actual improvement in water quality as a result of the modified requirement. This determination must be based on a scientifically supported prediction, not mere speculation. Mere assertions unsupported by scientifically verifiable methods will not meet this standard. Such a factual showing is consistent with the goals of both the Surface Mining Act and the Clean Water Act that pollution to the Nation's waters not only be abated, but that the quality of the receiving waters be improved.

Mr. President, I am pleased to note that the conference substitute contains a provision that was placed in the Senate bill at the request of Senator MITCHELL and myself. I am referring to the new section 602(a)(4)(B), which allows a State to use its revolving loan fund for implementing its nonpoint source management under section 319. The State first must use funds directly made available by capitalization grants to assure maintenance of progress, as determined by the Governor, toward compliance with enforceable deadlines, goals, and requirements.

This flexibility afforded by this provision will be important to a largely rural State, such as my own State of Vermont. In my State, there may well be circumstances in which the State will decide that a loan to a dairy farmer for construction of a manure management facility, for example, may achieve a greater water quality gain than a loan for a publicly owned treatment works. The State may make such a loan when the Governor makes the determination described above.

I also am pleased to note that the conference substitute continues support for the national small flows clearinghouse located at the University of West Virginia. The clearinghouse assembles information on alternative sewage treatment technology for use in rural areas where conventional treatment systems are inappropriate. This is important for a highly rural State such as Vermont, where conventional systems sometimes are not the most cost-effective solution. The conference substitute is intended to provide a more reliable source of funding for the University of West Virginia clearinghouse. It is not intended that the designated funds be used by the Environmental Protection Agency in any other way.

Mr. President, this conference substitute contains a provision which is intended to reduce the paperwork and procedural burdens on log transfer facilities. The provision is essentially identical to the provision adopted on the Senate floor when the Senate considered S. 1128. That amendment was worked out between Senators STEVENS, MURKOWSKI, CHAFEE, and myself.

Some log transfer facilities in the State of Alaska have obtained permits from the Corps of Engineers under section 404 of the Clean Water Act for filling of navigable waters associated with construction of the facility. That is proper and indeed the issuance of such permits is the responsibility of the corps. However, the corps also wrote into the permits various conditions related to discharge of pollutants, such as tree bark, associated with the ongoing operation of the facility. The Clean Water Act does not authorize the corps to write permits for the discharge of pollutants other than dredged spoil and fill material and so absent legislative action, these facilities are in violation of sections 301 and 402 of the act.

The conference substitute excuses facilities that received a section 404 permit before October 22, 1985, from the need to apply for a permit under section 402. If the Administrator determines that the permit requirements regarding discharges of pollutants other than dredged or fill material meet the applicable requirements of the Clean Water Act, no subsequent section 402 application is required. If they do not meet the applicable requirements, however, the section 404 permit is to be modified by the Administrator to incorporate appropriate requirements.

This provision does not change current law with regard to the division of authority between the Secretary of the Army and the Administrator of the Environmental Protection Agency. An accurate description of current law was expressed in a letter to this Senator from EPA Administrator Lee Thomas on May 21, 1985. That letter was reprinted in the CONGRESSIONAL RECORD on June 13, 1985, in the context of Senate consideration of S. 1128. In corps-issued section 404 permits for log transfer facilities, permit limits for pollutants other than

dredged or fill material are considered to be section 402 permit limits, whether written by the corps and approved by EPA or whether written into the permit by EPA as a modification.

□ 1150

Mr. STAFFORD. Mr. President, I reserve the remainder of my time.

I yield the floor.

Mr. BENTSEN. Mr. President, it is with a great sense of accomplishment that the committee brings forth this series of amendments, the product of 4 years of very hard work and a very long and arduous conference with the House of Representatives.

The distinguished chairman of this committee has been one who has approached this in a very bipartisan manner in trying to do what he thought was best for our country and it has been a pleasure to work with him in that regard.

The distinguished Senator from Maine [Mr. MITCHELL] has spent incredible hours in very productive work in bringing this about, reconciling some of the different points of view, and we owe a debt of gratitude to him. I am most appreciative of that.

Then I look at my good friend, the able Senator from Rhode Island. I think Senator JOHN CHAFEE has, with his good humor and his ability to cut through to the heart of the problem, and his sense of fairness, made a major contribution. I really do not believe it could have been accomplished on our side without the Senator from Rhode Island and the Senator from Maine taking such a productive role.

This legislation is an outstanding example of the ability to solve major and very complicated problems through bipartisan cooperation in pursuit of an important national goal.

The recognition of clean water as a high priority in our Nation was a moving force behind this agreement. The effort to clean up our Nation's waters has the overwhelming support of the American public, who throughout the history of this country have recognized the responsibility to our neighbors, our children and ourselves to correct abuses to this critical aspect of the environment.

Hearings before the Environment and Public Works Committee clearly prove that the Clean Water Act is paying off with a substantial reduction in pollutants. Our rivers are cleaner and our water quality has improved.

But this legislation also reflects the fact that there is still work to be done—and it includes major new efforts to continue on a steady and productive course.

It took many months to work out an acceptable agreement on construction grants, but I am pleased to report that the House and Senate are of one mind on the final figures. It would be regretable and, in my mind, contrary to the will of Congress and the American people for the administration to consider a challenge to this provision. My colleagues will recall that in 1981, the administration agreed to fund this grant program at a level of $2.4 billion per year for the 10 years needed to complete core needs for treatment works based on available needs survey data. Then, early last year, OMB proposed to phase out the program by 1990, and to fund no new starts.

This legislation continues to shift the program to State and local governments, but it also recognizes that the OMB proposal to pull the rug out from under a national goal at a critical point of progress was too abrupt and poorly planned. The $18 billion authorization will support the construction grant and loan program through 1994, and it is a fair timetable. Under the grant program, it authorizes $2.4 billion for fiscal year 1986, for fiscal year 1987 and fiscal year 1988, and $1.2 billion each for fiscal year 1989 and fiscal year 1990. Under the revolving fund, $1.2 billion is authorized each year for fiscal year 1989 and fiscal year 1990, $2.4 billion for fiscal year 1991, $1.8 billion for fiscal year 1992, $1.2 billion for fiscal year 1993, and $600 million for fiscal year 1994. States are required to establish revolving loan programs and provide a 20 percent match for Federal funds. Equally important, the legislation sets up a more equitable allocation program, which more accurately reflects the needs of our growing States. During fiscal years 1987, 1988, 1989, and 1990, for example, my State of Texas will receive an increase of approximately $18 million annually over the current level. While this is still less than what the figure would be under an allocation based strictly on eligible needs, it is an acceptable step toward fairness. It is also a correction of an inadequacy in the current allocation formula that was known but unaccounted for in the 1981 legislation.

The construction grant program is an acknowledgement that we must work closely with the States to assure that the revolving fund mechanism is workable and to provide a period of transition to allow States with lengthy legislative cycles or difficult remaining needs to work out their problems. However, it will be the revolving loan program that will represent the real future of municipal wastewater treatment construction. Under this program States will be able to recycle these funds in perpetuity and can develop a planned approach for ongoing and changing construction needs. I am pleased that the conferees agreed on provisions to allow substantial transfer of construction grant funds to the revolving loan fund in the first years. Fifty percent of fiscal year 1987 grant funds, 75 percent of fiscal year 1988 grant funds, and all of the fiscal year 1989 and fiscal year 1990 grant funds may be transferred into revolving loan funds. Additionally, the loan program is more flexible than the grant program; for example, reserve capacity—which is so essential to growing States such as Texas—can be funded under the loan program.

This legislation also includes a new permitting program to control industrial and municipal stormwater discharges. EPA will promulgate stormwater discharge regulations, and the initial cities to be regulated are those over 250,000 population, with cities over 100,000 to be regulated later.

There is also a growing national concern over nonpoint pollution, and provisions are included to authorize the States $400 million to develop and implement nonpoint source pollution management programs to manage such problems as polluted runoff from city streets and farmland. This type of pollution represents a major source of sediments, pesticides, nutrients, toxic heavy metals and bacteria, and almost every State has identified it as a significant contributor to existing water quality problems. At the same time, nonpoint pollution is a very different problem to solve than discharges from point sources. It is not easily subjected to a harsh regulatory solution. While there are some cities and States which have successfully implemented ordinances that manage nonpoint runoff from various operations like excavation, the issue is vastly different in most rural areas. Farmers and ranchers have long had a stewardship role in the land. Their lives depend on it. It is my view that no successful nonpoint program can be developed without the full involvement and support of these citizens. Land conservation is the original version of nonpoint protection. It is equally my view that a program which captures the minds and imagination of farmers and ranchers is one that will depend on their initial involvement in its creation. It will not be one developed in Washington and sent to the States for implementation. One of the key aspects of the nonpoint program included in this bill is its heavy reliance on nonregulatory approaches to nonpoint pollution problems. I am pleased to see a program which envisions a cooperative problem solving approach instead of the usual Federal control and compliance theory. Nonpoint pollution is a different problem; it warrants a new solution.

Another provision of particular interest to my State provides for partial delegation of the permit program. Texas has been unable to obtain approval for the Texas program because the State divides wastewater permits between the Texas Department of Water Resources and the Texas Railroad Commission. The Railroad Commission, which regulates oil and gas

operations, has only in recent years sought permit delegation. Under this provision, the Texas Department of Water Resources, which has a fine permit program, will be in position to gain Federal approval for its portion of the program.

The bill also allows establishment of management conferences to solve pollution problems in many of the Nation's major estuaries. The levels of water quality in some of these estuaries are alarming, and demand prompt action. Point and nonpoint sources of pollution have actually closed some of our Nation's greatest natural resources to shellfishing and swimming, and others are declining. Under this provision, the EPA will convene management conferences for up to 5 years to identify pollution sources, conduct research, and develop conservation and mangement plans.

The legislation lists several of these estuaries for priority consideration under the program, ranging from Long Island Sound and Narragansett Bay to Galveston Bay, in my State of Texas. Galveston Bay is the largest of the seven major estuarine systems in Texas, and studies in 1975 showed it was the spawning and nursery grounds for 80 percent of the total fishery products taken from the Texas Gulf Coast. If this percentage remains similar today, Galveston and adjacent bays were ultimately responsible for approximately 82 million pounds of commercial fishery products worth $142 million in the 1985 total commercial Texas catch. In all, the Galveston Bay system receives runoff from Texas cities and towns totalling more than 6.75 million population and receives discharges from some of the most critical and vibrant industrial operations in the Nation. There will always be conflicts among the competing needs of the users of Galveston Bay. It is my hope that these conferences will facilitate the planning necessary to assure that sound judgments are made with regard to the use of these important estuarine systems.

The conference agreement addresses several other policy matters. Among these is modification of the use of fundamentally different factors in the effluent guideline and permitting programs. Generally, these changes follow the basic Senate approach. However, we have made several pragmatic adjustments that should make these changes work better. In particular, a sound approach has been defined to deal with industrial operations in which situations are not readily resolvable through the guideline development process. For example, in oil and gas production operations, wastewater conditions can differ from well to well. Generally, this water is reinjected under the UIC provisions of the Safe Drinking Water Act. However, there are situations in which it must be discharged and the guideline development process is not able to consider these situations before they occur. Consequently, the conference agreement directs the EPA to approach these situations by first, temporarily suspending the guidelines with respect to such facilities, second issuing Best Professional Judgment permits for such sources, and third, subsequently revising the guidelines to reflect these new situations. This will allow the necessary sensible case-by-case considerations to be made in these appropriate circumstances.

Another provision of the fundamentally different factors agreement relates to four fertilier plants in Louisiana. The conference substitute excludes from the effluent guidelines under 40 CFR, part 418, these four facilities under section 306(c)(1). Paragraph (2) of that subsection requires that EPA expeditiously, but not later than 180 days after enactment, issue permits for these four facilities based on best professional judgment under section 402(a)(1)(B) of the act. If EPA decides, after the date of enactment, to promulgate new effluent limitation guidelines for the facilities subject to the provisions of section 306(c) of this bill, the BPJ permits will remain in effect until issuance of new permits under the new effluent guidelines. Otherwise, permitting for these four facilities will continue under section 402(a)(1)(B).

The bill extends deadlines for compliance with the statutory requirement for the implementation of controls to achieve best available technology economically achievable. The bill would largely track the Senate approach including a final deadline date for compliance. However, it is clear that there are some guidelines, including the guidelines for the very complicated chemical industry, which will not be completed in time for all the facilities to comply with this deadline. There is administrative discretion available to address this type of situation; it is in use now. The conferees fully anticipate that EPA will continue judicious and equitable use of its administrative discretion in those instances where failure to comply with the deadline is related to limitations in the development of the guidelines by EPA.

The conference substitute also contains a provision closely modeled on the Senate bill, prohibiting backsliding or the weakening of effluent limitations in permits based on best professional judgment or water quality standards. While this provision is well explained in the statement of managers, there is one aspect on which additional comment may be helpful. The conference substitute contains five exceptions to the general rule prohibiting the weakening of effluent limitation. There are two matters addressed in EPA's current regulations on this subject, however, that although not included in the statutory exceptions, may still have an effect on particular situations. In certain circumstances effluent limitations may be established on a net basis for particular dischargers. Such a permit should be examined as to whether any modification does indeed involve a weakening of effluent limitation. Also, permits are occasionally based on production levels. Such permits can be examined in a similar manner.

Mr. President, we can all be justly proud of the advancements toward clean, safe water over the past 10 years. This legislation—which has broad support among all interested parties, the Congress and the people—recognizes there is still more to do. It is sound legislation, targeted with care toward the goal of cleaning up once and for all our Nation's waters. I urge the support of my colleagues.

Mr. President, I now defer to my distinguished colleague, a very valued member of the committee, the Senator from Maine [Mr. MITCHELL] to make such comments as he desires and to take control of the time for our side.

Mr. MITCHELL. Mr. President, I join Senators CHAFEE, STAFFORD, BENTSEN, and others in support of the conference report on the amendments to the Clean Water Act. Senator STAFFORD and Senator BENTSEN have worked very hard and displayed great leadership in this area.

I want to express my appreciation to Senator CHAFEE for his leadership in developing this important legislation. Through all our deliberations in the Environment Committee and with House conferees, Senator CHAFEE pressed for legislation to provide the best possible protection for the rivers, lakes, and estuaries of the country. Thanks in large part to Senator CHAFEE's leadership, we have achieved this goal. Every American who cares about clean water—and I believe that includes every American—owes a debt of gratitude to Senator CHAFEE.

I am pleased to have had the opportunity to participate in the various phases of the development of this legislation as the ranking minority member of the Subcommittee on Environmental Pollution of the Environment Committee and a member of the House-Senate conference on this legislation.

The 1972 Clean Water Act set an ambitious goal for the country: "To restore the chemical, physical, and biological integrity of the Nation's waters." We have, in fact, made substantial progress in cleaning up polluted waters. But serious problems still remain. In the State of Maine, there is evidence of both the success of the pollution control programs established in the Clean Water Act and of the se-

riousness of remaining pollution problems.

The Androscoggin River, once 1 of the 10 most polluted rivers in the country, received a waste load equal to that generated by New York City and virtually every mile was unfit for swimming or fishing. Today, almost 70 percent of the river is cleaned up. While this is an impressive accomplishment, we must continue our efforts to clean up the remaining 30 percent of the river.

The Maine commercial shell fishing industry declined for many years because the discharge of untreated sewage forced the closing of some 20 square miles of harvesting areas. We have been able to reclaim some 6 square miles of clam flats, but 14 square miles remain closed. These flats have a potential harvest value of over $30 million a year and could contribute a substantial return on our continued investment in clean water.

The great majority of Maine's lakes are remarkably clean. But some 36,000 acres of lakes have had pollution problems. While cleanup is underway at about half these lakes about 15,000 acres need further attention.

Virtually every State in this country has similar success stories and faces similar water quality challenges.

Our experiences over the past decade are evidence that the basic design of the Clean Water Act is still sound. The legislation before us today will build on the framework established by the original Clean Water Act and expand the act to address emerging pollution problems and changing conditions.

I would like to address a number of the amendments to the act.

The legislation will result in a second-generation program to achieve greater control of toxic water pollutants. Under the current law EPA is required to establish uniform, minimum controls for toxic pollutants. There is no assurance, however, that these controls will result in a safe level for a particular water body. Although the current law provides general authority for further control, this legislation initiates a specific process designed to control these toxic substances.

The legislation requires States to identify waters that do not meet water quality standards due to the discharge of toxic pollutants; to adopt numerical criteria for the pollutants in such waters; and to establish effluent limitations for individual discharges to such water bodies. This provision is an important addition to our ability to protect water quality and public health from increasing amounts of toxic chemicals.

The amendments also provide for new authority for modifying control requirements for industrial facilities which are fundamentally different from other facilities in an industrial class. This provision is complicated and I would like to provide a detailed description of the provision and its objectives.

The Clean Water Act provides for the development of minimum, national, technology-based treatment requirements for industrial dischargers. These requirements address a range of industrial categories and include effluent guidelines applying to direct dischargers and pretreatment categorical standards applying to indirect dischargers.

The amendments provide the EPA Administrator with new authority to modify a minimum, national treatment requirements for an individual facility within an industry if the facility is found to be fundamentally different from other facilities within the industry on the basis of certain factors considered by the Administrator in establishing the guidelines or standards.

The new provision provides that a facility may be found to be fundamentally different based on factors identified in sections 304 (b) and (g). These factors include the age of equipment and facilities, the process employed, the engineering aspects of the types of control techniques, process changes, and other factors deemed appropriate by the Administrator.

The Clean Water Act currently provides for establishment of minimum, national technology-based requirements on an industry-wide basis but does not allow modification of requirements on a plant-by-plant basis. The Administrator has been able to accommodate variation in an industry through development of different requirements for subcategories of an industry.

In addition, the Agency developed and implemented a procedure for establishing alternative treatment requirements for individual facilities based on a conclusion that the facility is fundamentally different from the industry. These regulations were recently upheld by the Supreme Court. While there is currently no basis for the regulations in the act, the conferees concluded that some expansion of the Administrator's authority in this area is an appropriate addition to the act.

This new provision provides a clearly defined and limited authority in the statute for modification of treatment requirements for individual facilities. The provision is intended to assist the Administrator in addressing variation in development and effective administration of the national effluent guidelines and standards.

The conferees intend, however, that the Administrator use the new authority in this section sparingly. Applications under this section should be assessed with the objective of accounting for unique situations encountered in implementing national, minimum treatment requirements. Unless the circumstances of a facility are unique, the Agency should accommodate fundamental differences among facilities through the establishment of subcategories within an effluent guideline. This section should not be used in place of complete definition and subcategorization of an industry.

The conferees recognize that this section will require the EPA Administrator to make difficult decisions with regard to the magnitude of differences among similar facilities within an industry. In exercising this judgment, the Administrator should place high priority on the principle that all industries within a category or subcategory are to meet national, minimum, treatment requirements. The authority of this section is intended only to provide the Administrator with the authority needed to implement this aspect of the statute effectively and should not be used to generally relax or retreat from national, minimum requirements for an industry.

This new provision places several important limits on this new authority. These limits concern consideration of costs to a facility and procedural and other limitations.

The bill specifically excludes consideration of costs as a basis for establishing a fundamental difference with regard to an individual facility. Section 304 of the Clean Water Act authorizes the EPA to consider the cost of achieving effluent reductions, in addition to other factors, in development of a guideline for an entire industry. The EPA needs to consider cost when developing a guideline for an industry in order to determine the best available technology for water pollution control which is economically achievable for an entire industry.

Individual facilities, however, may face costs which are higher than costs to the majority of other facilities in an industry. A facility might find that differences in costs cause it to be fundamentally different from other facilities and contend that these differences justify modified treatment requirements. For example, costs of labor, transport or materials might be presented as fundamentally different.

While a guideline is intended to account for economic impact on an entire industry, it is not intended to account for the economic impact on each individual facility. The 1972 Clean Water Act conference report stressed this point, directing EPA to "make the determination of the economic impact of an effluent limitation on the basis of classes and categories of point sources, as distinguished from a plant-by-plant determination."

If a facility facing higher costs than the overall industry is allowed to reduce treatment levels below the minimum level, the degree of pollution

control at a facility is linked to the economic efficiency of the facility, rather than the economic ability of the industry, and the principle of an industry-wide minimum level of treatment loses its meaning.

Although the act does not and should not provide a mechanism to modify the requirements of an effluent guideline on the basis of fundamentally different costs at an individual facility, section 301(c) of the act provides for modification of requirements in a case where such requirements are beyond the economic capability of the owner. Section 301(c) does not allow the Administrator to modify treatment requirements based on a showing of fundamentally different costs to an individual facility, unless these costs are beyond the economic capability of the facility and, therefore, threaten its survival.

In addition, section 301(c) is subject to section 301(1), which prohibits the Administrator from modifying any requirement as it applies to a toxic pollutant. This provision assures that toxic pollutants will be controlled, regardless of the economic capability of the discharger. The new authority for treatment modifications based on fundamentally different factors contained in the reported bill is not subject to section 301(1).

This provision is not intended to prohibit the EPA from modifying treatment requirements in a case where a fundamental difference in an aspect of a facility which is eligible for consideration—for example, age of facility, process employed—would result in a reduction in costs to a facility.

When such an eligible factor is under review, the EPA may consider the costs specifically associated with that factor, but must be able to justify a finding of a fundamental difference primarily on the basis of a substantive and technical assessment of eligible factors. The EPA shall not replace a substantive and technical assessment of eligible factors with a shortened cost test designed to indicate a fundamental difference—for example, when the costs of an eligible factor at an individual facility are twice the costs at average facilities, the factor is fundamentally different.

The reported bill specifies several procedural requirements and other limitations governing applications for modifications under this section.

Section (n)(1)(B) provides that an application be based solely on information and supporting data submitted to the Administrator during the development or revision of a guideline or on information the applicant did not have a reasonable opportunity to submit during the rulemaking. The lack of a reasonable opportunity to submit information is based solely on a lack of actual or constructive notice of the rulemaking.

This provision will assure that effluent limitations and standards are as comprehensive as possible, and thereby reduce the need for applications under this subsection. This provision will also discourage withholding of information during the rulemaking process for subsequent use in an application for treatment modification under this subsection.

In addition, where the record is already closed and an applicant has new information to present bearing on the guideline or standard, the applicant continues to have the right to petition the Administrator to reopen the rulemaking and record and consider creation of a subcategory. The Administrator's disposition of such a petition is subject to judicial review under section 509(b) of the act.

Section (n)(1)(C) provides that the alternative requirement imposed on the applicant can be no less stringent than justified by the applicant's fundamental difference from the rest of the category or subcategory with respect to eligible factors.

Section (n)(1)(D) provides that any alternative requirement shall not result in a nonwater quality environmental impact which is markedly more adverse than the impact considered by the Administrator.

Section (n)(2) requires that an application under this section shall be submitted within 180 days after the publication of the initial guideline or standard. Section (n)(3) provides that an application shall be approved by final Agency action within 180 days after submission. For the purposes of this section, final Agency action means the administrative decision issued by the EPA, following public notice and comment, as appropriate and including a statement of the basis for the decision. Section (n)(4) states that the Administrator may allow the applicant to submit clarifications with regard to information submitted in an application prior to the 180-day decision deadline.

Section (n)(5) provides that an application for an alternative requirement based on fundamentally different factors which is pending on the date of enactment may be amended by the applicant within 180 days after such date of enactment. This provision is intended to allow applicants with pending applications developed under EPA regulations pertaining to fundamentally different factors to revise the applications to reflect the requirements of this new section of the statute.

Section 301(n)(6) provides that an application for an alternative requirement under this section shall not stay the facility's obligation to comply with the effluent limitation guideline or standard which is the subject of the application.

This provision is intended to prevent EPA or the State, or the POTW in the case of indirect discharge, from delaying issuance of the permit or pretreatment mechanism during the pendency of an application. If an application for an alternative requirement is denied by the Administrator, the applicant must comply with the limitation or standard as established or revised. This section is subject to section 301(b) and 309 as to compliance dates.

This section shall apply to existing primary and secondary national effluent limitations and categorical pretreatment standards for industrial categories, such categories as may be identified in the future, and to any revisions of guidelines or standards for such categories.

The Administrator may not use the authority of this section to modify effluent standards issued pursuant to section 307(a)(2) of this act, the general prohibited discharge standard in 40 CFR sec. 403.5, or other requirements implementing such standards.

The owner or operator of a facility has the burden of proving to the satisfaction of the Administrator that the facility is eligible for an alternative requirement under this section. The Administrator's decision to promulgate or deny an alternative effluent limitation or standard under this subsection shall be subject to judicial review pursuant to section 509(b)(1) of the act.

This new authority is intended to provide for modifications of requirements for conventional, nonconventional, and toxic pollutants. Consistent with this objective, section 301(l) of the Act, which excludes toxic pollutants from modifications under this act, is amended to allow modifications under this section for toxic pollutants. This amendment to section 301(l) does not in any way weaken the application of the section to modifications of the act than provided under this subsection—301(n).

The Administrator may not delegate the authority provided by this subsection to any State. In addition, it is our intention that the authority of this section be exercised only by the Administrator or Assistant Administrator for Water, rather than regional or other officials. The Administrator shall obtain the concurrence of a State before approving any alternative requirements under this subsection.

All of these provisions are to be self-implementing and are to take effect upon enactment of the Clean Water Act Amendments of 1985. The Administrator is encouraged to amend the appropriate regulations to make them consistent with these requirements; however, the failure of the Administrator to make such revisions will not affect the implementation of these provisions.

A related provision provides new authority for the EPA to collect fees for the processing of various modifica-

tions of permits and other requirements.

Substantial Federal resources are being devoted to processing applications for modifications authorized by the Clean Water Act. Section 301(o) of the reported bill requires the Administrator to establish a system of fees to recover costs of reviewing and processing these applications. Applications, including resubmitted applications, are to be accompanied by an appropriate fee, as determined by the Administrator. The Administrator may develop a tiered or sliding scale fee structure so long as the aggregate amount of fees collected reflects the Federal resources actually expended in processing such applications.

Fees collected under this section shall be deposited into a special fund in the U.S. Treasury entitled "Water Permits and Other Services." Such funds are to be available for appropriation and to remain available until expended and are to be used to carry out the Agency activity for which the fee was charged. Creation of this special fund will assure that fees charged for processing of applications will be used to support water permit related activities, rather than other activities. The existence of this fund shall not be a basis for reductions in funding levels for related program activities.

EPA recently estimated that as much as half the remaining water pollution problems result from nonpoint sources. Controlling nonpoint pollution, however, has proven to be an extremely difficult, intractable problem.

This legislation includes a major amendment providing for State programs to identify and control nonpoint source pollution. States will identify waters affected by nonpoint sources of pollution and develop programs to implement best management practices for controlling this pollution. State programs will include a schedule for implementation and will be coordinated with related Federal projects. A total of $400 million is authorized over 4 years to support this important program.

It is the intention of the conferees that grants to States be used to implement nonpoint management plans developed under this section. Grants are not intended to be used to support the development of such programs or plans. The conferees expect that States will use State resources to develop nonpoint plans and programs. States may also use funds available under a new section 205(j) of the act to develop such plans, and once plans are approved, assist in the implementation of plans.

In using grant funds under this section for the implementation of approved programs or plans, States are not to provide assistance to individuals for construction of pollution control facilities unless such assistance is in the form of a demonstration program, as determined by the Administrator. State's may include other Federal assistance programs, including programs of the Department of Agriculture involving grant and loan assistance and cost sharing, in overall programs for control of nonpoint pollution.

States may use funds available in the new State revolving loan funds for the implementation of nonpoint programs developed under this section. Loan funds must be used in a manner consistent with all the provisions of title VI of this act.

For example, once a State has assured progress toward compliance with the deadline for construction of secondary treatment facilities, the State may make loans or provide otherwise eligible assistance to nonpoint pollution-related projects.

Such loan or other assistance may be made to individuals or organizations, as well as municipalities and other governmental units. For example, a State may provide a loan to a farmer to construct a manure storage facility if such facilities are called for in the approved State nonpoint pollution control program. A State might also provide assistance to a municipality to implement programs to control urban runoff.

Among the most significant issues addressed in this reauthorization of the Clean Water Act is the financing of wastewater treatment plant construction. This aspect of the reauthorization bill is important because it provides State and local governments with a clear statement of future Federal involvement in treatment plant financing and allows them to finalize plans to meet the compliance deadlines established in the law.

The act provides for a transition from the current grant program to a program providing Federal support for State revolving loan funds. The bill provides for an authorization of a total of $18 billion over the next 9 years to assist municipalities with these construction projects. Establishment of loan funds will complete the process of transfer to State control of the Municipal Treatment Construction Program.

The State revolving loan fund is important for the future financing of pollution control projects. It is a complicated provision and I would like to describe the intentions and objectives of the conferees.

The provision provides that the Administrator and States may enter into capitalization grant agreements under this title. States must agree to accept payments under a schedule to be developed jointly with the Administrator, must agree to provide a 20-percent match of Federal funds, and must agree to make binding commitments for assistance in an amount equal to 120 percent of the amount of the grant payment within 1 year. Moneys contributed by a State to match Federal capitalization grants under section 602(b)(2) are to be cash and not in kind.

The schedule under which payments are to be made by the Administrator to the State shall be developed jointly by the State and the Administrator. Such schedule shall be based on the State intended-use plan and shall provide that payments be made as expeditiously as possible, consistent with such plan. At a minimum, payments shall be made not later than the earlier of 8 quarters after the date funds were obligated by the State or 12 quarters after the date such funds were allotted to the State.

In addition, the State must agree to assure, as part of the intended-use plan submitted annually, that all Federal and State funds provided to the SRF will be committed in an expeditious and timely manner. This provision reinforces the requirement that States make binding commitments for funds within 1 year of any given payment to the fund.

Subsection 602(b)(5) refers to all Federal funds, in the form of capitalization grants, and all other funds in the SRF as a result of those capitalization grants, including repayments of loans originating from those grants and State funds contributed as the required match for those grants, and funds deposited in the fund under 205(m).

The State must use these funds first to assure maintenance of progress toward compliance with the enforceable deadlines, goals, and requirements of this act, including the municipal compliance deadline of July 1, 1988, or are on enforceable schedules of compliance after that date.

Progress toward compliance with enforceable deadlines, goals, and requirements of the act, in the case of treatment works that are not voluntarily on a schedule to achieve compliance, may be assured through a funding commitment or through establishment of an enforceable compliance schedule.

Thus, the requirement of subsection 602(b)(5) is met if treatment works in a State are on an enforceable schedule to achieve compliance with uniform secondary treatment requirements of the act, whether or not there is a commitment to fund such treatment works from a State revolving loan fund or with a grant under title II of this act. Governors of each State shall make the determination of progress toward compliance required under this subsection and the Administrator shall oversee such determinations.

Once a State has met the requirement of subsection 602(b)(5) funds from the SRF may be used for any other treatment works as defined by

71-059 O-87-37 (Pt. 22)

section 212 of the Act (subject to the restrictions of section 602(b)(6), programs and projects identified under the Nonpoint Source Pollution Control Program (section 319), or programs and projects identified under the National Estuaries Program (section 320).

The provision is intended to allow States the flexibility to utilize funds from the SRF to support a variety of measures that the State determines are needed to achieve water quality goals. States are free to fund a wide range of pollution control projects, other than municipal waste water treatment works, once the requirement for assuring progress toward compliance with the 1988 compliance date is met.

Further, a State must demonstrate that any treatment works which is constructed in whole or in part prior to fiscal year 1995 with funds directly made available by capitalization grants under this title or section 205(m), will meet the requirements of the sections 201(b), 201(g)(1), 201(g)(2), 201(g)(3), 201(g)(5), 201(g)(6), 201(n)(1), 201(o), 204(a)(1), 204(a)(2), 204(b)(1), 204(d)(2), 211, 218, 511(c)(1) and 513.

This restriction on the use of Federal capitalization grant funds does not apply to funds contributed by the State in accord with section 602(b)(2), moneys repaid to the fund, or other moneys. State Governors shall assure that the requirements of this subsection are met.

Section 201(g)(1) limits assistance to projects for secondary treatment or more stringent treatment, or any cost effective alternative thereto, new interceptors and appurtenances, and infiltration-in-flow correction. This subsection also provides that State Governors may reserve 20 percent of a State's allotment for projects which meet the definition of treatment works in section 212(2) but are otherwise not eligible for assistance under this subsection. This Governor's reserve is intended to apply to funds made available under this title.

Section 201(n)(1) provides that funds under section 205 may be used to address water quality problems due to discharges of combined stormwater and sanitary sewer overflows, which are not otherwise eligible, if such discharges are a major priority in a State. This provision is intended to apply to use of funds under title VI as well as section 205.

As noted above, the fund may be used to assist publicly owned treatment works as defined by section 212 of the act, the development and implementation of a nonpoint source management program established under section 319 and development and implementation of an estuary program under section 320. This provision is intended to provide a basis for funding of projects to control nonpoint pollution and pollution to estuaries conducted by municipalities, a State, other public organizations, or individuals. All fund management provisions of this title apply to such projects.

The definition of projects eligible for funding under the loan program includes publicly owned treatment works as defined by section 212 of the act. This definition includes planning and design as defined in 212(1), treatment works as defined in 212(2) and replacement as defined in 212(3). Each of these aspects of treatment works is eligible for assistance under this title.

Funds under this title may be used to make loans as provided under section 603(d), but are not to be used to provide direct grants. If as a result of audits under this section, the Administrator finds a consistent and substantial failure to repay loans, he may take corrective action as provided under this title.

This section provides that loan funds may be used to refinance debt obligations of municipalities for eligible projects, where such obligations were incurred after March 7, 1985. This provision is a very important element of the loan fund program in that it allows municipalities and States to work out financing plans which will allow a community to proceed with financing and construction as soon as possible and to achieve water quality benefits as soon as possible. Based on this authority States may agree to participate in project financing at a later date. The requirement in subsection 603(g), providing that municipal waste water treatment projects be included on State priority lists is not intended to prevent a State from providing such refinancing assistance.

Section 603(h) limits the authority of subsection 603(d)(2) by providing that funds may not be used to make direct loans to support the non-Federal share of a project receiving assistance under title II of this act.

This limitation on direct loan assistance does not include ancillary assistance to the municipality which results in a lowering of costs of the obligation (for example guarantee of the local share obligation, insurance of the obligation, etc.). Such indirect assistance to support the costs of non-Federal share shall only be available to municipalities which face severe financial constraints preventing a project from proceeding.

The provision provides for the allotment of funds to States, reservation of funds for planning, and the reallotment of unobligated funds. Funds reserved for water quality management planning under this provision are to be used by the State agency which conducts environmental programs, rather than an agency established to manage the financing of projects with funds provided under this title.

Funds available to States under section 205(g) for the management of construction grant programs under title II may be used to assist the development of revolving loan funds under this title.

There are several other important provisions of the bill which I would like to describe and explain.

Section 210 of the amendments provides for set-aside of a small part of the construction grant fund to support projects for prevention of pollution to marine bays and estuaries resulting from combined storm water and sanitary sewer overflows. It is the intention of the conferees that, for the purposes of this section, the term "marine bays and estuaries" shall be defined consistent with the definition of estuarine zone in section 104(n)(4) of the act. It is not the intention of the Conferees that this set-aside be used for projects at the upper reaches of tidal influence of a river which eventually enters into an estuary.

Section 202(f) of the act provides that assistance made available by the Farmer's Home Administration may be used to provide the non-Federal share of a construction grant project under title II of the act. This provision states the policy of the conferees that such assistance in support of a local share is acceptable, and has been acceptable in the past. The adoption of the provision shall not be construed to imply that, prior to this action, such support for a local share was not acceptable or consistent with congressional intent and policy.

Another important amendment to the act provides that States are to passthrough at least 40 percent of funds made available under section 205(j)(1) to support water quality management planning at the areawide and interstate level. The provision was modified by the conferees to assure that a Governor, with the approval of the Administrator, could provide less than 40 percent of funds to such organizations if such funding would not significantly assist in water quality management planning. The conferees do not intend to imply that funding for areawide organizations should be limited to 40 percent of funds under seciton 205(j)(1). It is not the intention of the conferees that the requirement for passthrough of 40 percent of funds to areawide agencies apply to section 205(j)(5) funding.

The amendments also provide a specific period of 180 days in which communities may apply for variances under section 301(i). The conferees intend that no application whatsoever may be made under section 301(i) after the 180-day period following enactment of the amendment. In addition, the amendment provides that communities which are on a compliance schedule are not eligible to apply for a

variance under section 301(i) at any time.

This provision includes any community which is on a schedule established prior to enactment by a court order or an administrative order established by the EPA or a State agency. In addition, the Administrator has discretion in granting variances under section 301(i). The conferees encourage the Administrator to use this discretion to deny applications for variances under section 301(i) where necessary to preserve the stable and effective implementation of the National Municipal Policy and relted agency policies.

The amendments provide for new authority for the EPA to use administrative penalties in enforcement of the Clean Water Act. This provision will substantially increase the Agency's authority to assure full enforcement of the act. The amendments provide that the EPA may use the administrative penalty authority in enforcement cases related to activities which do not have permits as required under section 404 of the act. It is the intention of the conferees that EPA use this authority to provide for full and aggressive enforcement of section 404.

It is also the intention of the conferees that the EPA and the Corps of Engineers develop a memorandum of understanding to provide for the efficient coordination of enforcement activities related to section 404. Such an MOU should be developed as soon as possible, but not later than 6 months after the date of enactment. EPA has the authority to use administrative penalty authority prior to the development of such an MOU. In the event that the EPA and the ACE are not able to agree on an MOU, EPA retains the full authority to implement administrative penalty authority related to section 404 as provided in these amendments.

The amendments also provide new requirements for compliance with treatment requirements of the act. The conferees believe that these new dates are responsible and reasonable can be achieved in virtually all cases. In an unusual case where a date cannot be met despite the conscientious efforts by a facility, the conferees understand that the EPA is able to exercise its discretion with regard to enforcement and penalty authority.

In addition, it is the intention of the conferees that any action by a regulated industry to initiate litigation related to a control requirement which results in a delay in accomplishment of controls, is not a basis for the EPA to exercise its enforcement discretion.

Industries which choose to challenge pollution control regulations in court should not expect that the EPA will use its enforcement discretion and should expect that EPA will fully enforce requirements and compliance dates, regardless of court challenges.

In conclusion, I am confident that the basic design of the Clean Water Act is sound. We have before us badly needed amendments for fine tuning existing provisions of the act and addition of major programs to address emerging problems.

These proposals are consistent with the national consensus for clean water. The great majority of persons responding to a recent Harris survey either supported the Clean Water Act or wanted it strengthened, even considering the costs of pollution controls. This legislation is an important step toward carrying out this mandate.

I urge my colleagues to adopt the legislation, and I urge the President to sign it. It will be a tragic day, a sad day, for the Nation if the President vetoes this legislation.

Mr. President, I yield to the distinguished chairman of the subcommittee, the man singly most responsible for this legislation and for much of the progress made in this Nation in recent years on protecting the health and environment of this country, Senator CHAFEE.

□ 1200

Mr. CHAFEE. I thank my distinguished friend and colleague, the Senator from Maine, for those generous comments. Throughout the work on this measure, working with Senator MITCHELL has been not only an intellectual pleasure but also a great personal pleasure. He is a man who knows the act, is truly dedicated to improving the quality of the waters of our Nation. At every step of the way, he was helpful and constructive. This act, in which he generously said I had a major hand, was the result of combined efforts, and his part in it was very significant.

I also thank the senior Senator from Texas [Mr. BENSTON], who was helpful overall in this project. Of course, our distinguished chairman of the committee, Senator STAFFORD, has made this a truly bipartisan matter. I thank the staffs as well.

So it has been a thorough pleasure dealing with this matter, which has gone on for a long time. We passed the bill in the Senate over a year ago.

Mr. President, this sweeping legislation provides a major overhaul of one of our Nation's key environmental laws, the Clean Water Act. Although we have made great strides in restoring our rivers, lakes, and estuaries, much work remains to be done. The legislation before us provides a framework which builds upon our past successes and will lead to major improvements in water quality well into the next decade.

The legislation assures compliance with a strong water quality standards programs and provides for great controls of toxic, conventional and nonconventional pollutants. It establishes a new program to control pollution from nonpoint sources. That is not a point discharge from a factory. Nonpoint means runoff from fields, from roads, and such instances. It continues funding of wastewater treatment works at the $2.4 billion level through fiscal year 1991 while establishing a revolving loan fund to ease the transition to full State and local sufficiency.

I would like to take a few minutes to explain in greater detail a few of the key provisions of the conference report.

The legislation tightens up several regulatory programs. One such program relates to nonconventional pollutants. Under current law modifications can be sought from strong discharge requirements for so-called nonconventional pollutants many of which can be highly toxic. In effort to severely limit the circumstances in which these weaker modifications can be given the conference report allows them for only five specific pollutants. If other pollutants are to be listed for a modification, EPA must go through a special procedure. This procedure requires the Administrator to first determine whether a pollutant meets the criteria of toxic pollutant. If it does, then the pollutant must be listed as toxic from which no variance can be received. If the pollutant is not found to be toxic, the Administrator must then determine whether it can be listed under section 301(g) as a nonconventional pollutant. If it meets that test, the Administrator must finally determine whether an applicant applying for a modification from the effluent guideline for that particular pollutant can meet the test contained in section 301(g). It is expected that each of these steps be conducted through the formal regulatory process. It is also important to note that a stay of requirements for control of pollutants other than the nonconventional pollutant for which the modification is being sought is prohibited.

The legislation also contains provisions which severely limits the opportunities for which discharges can get modifications for fundamentally different factors. A key provision under the fundamentally different factors section specifically excludes consideration of costs, independent of other eligible factors, as a basis for establishing a fundamental difference with regard to an individual facility. Section 304 of the Clean Water Act authorizes the EPA to consider the cost of achieving effluent reductions, in addition to other factors, in development of a guideline for an entire industry. The EPA needs to consider cost when developing a guideline for an industry in order to determine the best available technology for water pollution control which is economically achievable for an entire industry.

While a guideline is intended to account for economic impact on an entire industry, it is not intended to account for the economic impact on each individual facility. The 1972 Clean Water Act conference report stressed this point, directing EPA to "make the determination of the economic impact of an effluent limitation on the basis of classes and categories of point sources, as distinguished from a plant-by-plant determination." If a facility facing higher costs than the overall industry is allowed to reduce costs than the overall industry is allowed to reduce treatment levels below the minimum level, the degree of pollution control at a facility is linked to the economic efficiency of the facility, rather than the economic ability of the industry, and the principle of an industrywide minimum level of treatment loses its meaning.

Although the act does not and should not provide a mechanism to modify the requirements of an effluent guideline on the basis of fundamentally different costs at an individual facility, section 301(c) of the act provides for modification of requirements in a case where such requirements are beyond the economic capability of the owner. Section 301(c) does not allow the Administrator to modify treatment requirements based on a showing of fundamentally different costs to an individual facility, unless these costs are beyond the economic capability of the facility and, therefore, threaten its survival. In addition, section 301(c) is subject to section 301(l), which prohibits the Administrator from modifying any requirement as it applies to a toxic pollutant. This provision assures that toxic pollutants will be controlled, regardless of the economic capability of the discharger. The new authority for treatment modifications based on fundamentally different factors contained in the reported bill is not subject to section 301(l).

Section 301(n)(6) provides that an application for an alternative requirement under this section shall not stay the facility's obligation to comply with the effluent limitation guideline or standard which is the subject of the application. This provision is intended to prevent EPA or the State, or the POTW in the case of indirect discharge, from delaying issuance of the permit or pretreatment mechanism during the pendency of an application.

The owner or operator of a facility seeking an FDF modification has the burden of proving to the satisfaction of the Administrator that the facility is eligible for an alternative requirement under this section. The Administrator's decision to promulgate or deny an alternative effluent limitation or standard under this subsection shall be subject to judicial review pursuant to section 509(b)(1) of the act.

The Administrator may not delegate the authority provided by this subsection to any State. In addition, it is the intention of the conferees that the authority of this section be exercised only by the Administrator or Assistant Administrator for Water, rather than regional or other officials. The Administrator shall obtain the concurrence of a State before approving any alternative requirements under this subsection.

The conference agreement also contains provisions continuing the Chesapeake Bay Program; it establishes a Great Lakes Water Quality Program and sets up new National Estuary Program which provides that management conferences develop control strategies to assist in the clean up of estuaries. This is especially important to the Narragansett Bay in my State of Rhode Island which suffers from degradation of water quality. Funds are also set aside for correction of combined sewer overflows which cause serious pollution in the Narragansett and other estuaries around the Nation.

A new nonpoint source Pollution Control Program, which was contained in both bills, is included in the conference agreement. The program would authorize $400 million over 4 years for States to develop comprehensive programs to abate such pollution sources as runoff from urban areas and farmlands which often contaminated with toxic and other pollutants.

The legislation also beefs up the enforcement provisions of the act by increasing penalties for civil and criminals violations and adds a new authority for the Administrator to assess administrative penalties on violators. The EPA has new authority to assess penalties against unpermitted discharges. We expect the Agency to use this authority aggressively against illegal polluters even if a memorandum of agreement is not concluded with the Secretary of the Army. The corps enforcement record against illegal dumpers is not the strongest and now EPA has the authority to move against these polluters.

Compliance dates for industries for which effluent guidelines have not been promulgated have been extended to March of 1989 or 3 years from date of promulgation, which ever is sooner. EPA is strongly encouraged to get these guidelines finalized so industries can comply with discharge requirements as soon as possible. Until such guidelines are promulgated the Agency is expected to proceed under its current policy with respect to noncompliance of dischargers who will not meet the deadline.

A provision establishing a progressive Stormwater Control Program is included in the conference agreement. Although the law now requires EPA to establish discharge requirements for the stormwater point sources, the Agency has been unable to develop a final permit program for these sources. This legislation sets up a program whereby EPA must issue permits for stormwater point source discharges in municipalities with populations over 250,000 within 4 years of enactment. Within 5 years of enactment, permits for stormwater point source discharges are required in cities with populations between 100,000 and 250,000. These discharge requirements are to contain control technology or other techniques to control these discharges and should conform to water quality requirements. Requirements for stormwater discharges associated with industrial activities are unaffected by this provision. The Agency has been unable to move forward with a program because the current law did not give enough guidance to the Agency. This provision provides such guidance and the conferees expect EPA to move rapidly to implement this control program.

The legislation also contains the Senate provision relating to the Chicago tunnel and reservoir project. This provision only allows funding for this project under section 201(g)(1) without regard to the limitation contained in the provision if the Administrator determines that such project meets the cost-effective requirements of sections 217 and 218 of the act without any redesign or reconstruction. The Governor of Illinois must demonstrate to the satisfaction of the Administrator the water quality benefits of the project. This provision does not apply to the cost-sharing requirements under the other applicable provisions of the bill.

The conference agreement modifies the Senate-passed bill with respect to antibacksliding on best practical judgment and water quality-based permits. The thrust of this provision is to generally prohibit affected permittees from weakening their discharge requirements as a result of subsequently promulgated guidelines. Only in very narrow circumstances can backsliding be permitted, and in no event can it be permitted even if, after a discharger leaves a stream, there is an improvement in water quality, unless the antidegradation policy test is met. That test states that water quality may be lowered only if widespread adverse social and economic consequences can be demonstrated through a full intergovernmental review process.

The conference agreement also embodies much of the Senate-passed proposal with respect to the Construction Grants Program and newly created revolving loan fund. The conference agreement extends the current $2.4 billion annual authorization for title II construction grants for 3 years. In fiscal years 1989 and 1990, the annual authorization for title II would be re-

duced to $1.2 billion. No further authorizations would be made for title II after fiscal year 1990.

States would be provided with sufficient lead time to begin setting up State revolving loan programs. The committee bill encourages the creation of these self-sustaining financing entities at the earliest opportunity by providing each State with an option of converting title II construction grants funds into capitalization grants for SRF's.

Beginning in fiscal year 1989 and continuing in fiscal year 1990, $1.2 billion a year would be authorized specifically for capitalizing SRF's under the new title VI. In fiscal year 1991, the amount would be increased to $2.4 billion. Thereafter, the SRF authorization would gradually be reduced by providing $1.8 billion in fiscal year 1992, $1.2 billion in fiscal year 1993, and $600 million in fiscal year 1994. After fiscal year 1994, all authorizations for direct Federal contributions to municipal wastewater treatment or SRF's would be ended.

Mr. President, I ask unanimous consent to have printed in the RECORD a chart showing the fiscal years and funding levels.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[In billions of dollars]

	Construction grants (title II)	Revolving loan fund (title VI)
Fiscal year:		
1986	2.4	
1987	2.4	
1988	2.4	
1989	1.2	1.2
1990	1.2	1.2
1991		2.4
1992		1.8
1993		1.2
1994		.6

Mr. CHAFEE. Mr. President, the total authorizations for title II and VI amount to $18 billion and will ensure that the core treatment-related needs identified in the 1981 amendments will be met.

This approach lives up the commitment made by Congress and the administration to support an annual appropriation of $2.4 billion over the 10-year period of 1981 through 1991 to meet the needs for construction of wastewater treatment facilities. That commitment was restated by then EPA Administrator William Ruckelshaus at a budget hearing before the Environment and Public Works Committee. His statement is as follows:

I think that while there may be some at OMB who would prefer not to see this kind of program continue, I have not run in personally to those people at OMB, and there is an understanding that there is an agreement with the administration with the Congress that for 10 years this level of funding, at least, is a commitment. If you will note the difference between what we submitted to the President in terms of our budget and what we are now requesting is somewhat less. We went down to $2.4 billion as a result of that commitment. That was something the administration put back into our budget over our submission.

A compromise on the allotment formula for grants to the States is contained in the conference agreement. This compromise only makes minor changes in the present formula.

The revolving loan fund embodied in this legislation presents a great opportunity for the States to eventually assume full responsibility for construction of wastewater treatment facilities in their jurisdictions.

States must first use the funds in loan fund on projects needed to meet the 1988 municipal deadline requirement for secondary treatment. After that requirement is satisfied loan funds may also be spent on activities eligible under the nonpoint pollution program and the national estuary program.

In an effort to encourage cities to move forward with construction with treatment facilities to meet the 1988 deadline the legislation allows for refinancing under the loan program of projects which were begun after March 7, 1985. Although these projects should be on the State priority list to be eligible for refinancing, prior agreements between the State and the municipality should be honored in the event the project is no longer on the priority list.

Mr. President, I would like to conclude by saying passage of this legislation gives us an opportunity to renew our commitment to the national goal of making all of our waters fishable and swimmable. The Water Quality Improvement Act of 1986 strengthens the existing provisions of the Clean Water Act and establishes new cleanup programs which will greatly enable us to address a new generation of subtle—more devastating—problems posed by toxic pollution, stormwater discharges, nonpoint pollution, and contamination of sludges.

A year ago, the Senate passed the clean water bill by a vote of 94 to 0. I would hope my colleagues would give this conference agreement the same resounding show of support and vote "yes" to continue the job of cleaning up our Nation's waters.

There has been talk of the President vetoing this legislation. That would be a drastic mistake. This bill is within the agreed upon authorization level of $2.4 billion for wastewater treatment facilities passed by the Senate and contained in the budget resolution. It provides for an orderly transition for the construction grants program. And most importantly it gives the American people what has been reflected in public opinion polls conducted across the land—that they want clean water.

Finally, Mr. President, I wish to thank the chairman of our full Committee on Environment and Public Works, Senator STAFFORD, the ranking member of the Environmental Pollution Subcommittee, Senator MITCHELL, and the ranking member of the full committee, Senator BENTSEN for their hard work and diligent efforts to make this legislation possible. I would also like to thank the staff who labored long and hard in putting this legislation together, particularly Bob Hurley and Phil Cummings, Ron Outen, Jeff Peterson, Jimmie Powell, Steve Shimberg, and all the others who spent long hours and what seemed like endless days of negotiations on the bill.

Mr. MOYNIHAN. Mr. President, as New Yorkers, we have daily reminders of our dependence on water, although it is a resource that we too often take it for granted. The striped bass in the Hudson are too contaminated to be eaten safely. Long Island's aquifer which is the drinking water for 3 million New Yorkers is being depleted and polluted. And underneath New York City's streets old leaky mains are reluctantly dispursing water to city residents.

I am pleased to be able to offer some assurances today that we are making progress in cleaning up New York's water, and indeed, that of the entire Nation. The 99th Congress has already passed the Safe Drinking Water Act, which strengthens EPA's capacity to protect and improve our country's drinking water supplies, and which contains the Sole Source Aquifer Protection Act, which I first introduced in 1982, designed to protect irreplaceable aquifers like the one on Long Island.

With the passage of the Clean Water Act Amendments of 1986 we add another cornerstone in our Federal water policy, one that will build on the progress made since the Federal Water Pollution Control Act of 1972, which has come to be known as the "Clean Water Act."

GOALS AND STRATEGIES OF CLEAN WATER ACT OF 1972

The Federal Water Pollution Control Act was enacted in 1972 with an exuberantly optimistic set of goals. By 1983 the act envisioned clean rivers throughout the Nation; by 1985 it sought to eliminate altogether the discharge of pollutants into our waters.

Two major strategies were embodied in the act to achieve these goals. First, a large Federal grant program was established to help local areas construct sewage treatment plants. According to the Congressional Budget Office, $52 billion—in 1984 dollars—total has been spent by the Federal Government on this construction grant program since 1972.

Second, the act required that all municipal and industrial wastewater be treated before being discharged into

waterways, to remove pollutants ranging from organic materials, bacteria, and viruses to toxic chemicals and heavy metals.

Under the act's national pollutant discharge elimination system the Environmental Protection Agency established limits on the maximum allowable discharge of specific pollutants from treatment plants and industrial facilities. These limits were based on available detection and control technologies, and took into account the compliance costs to the regulated community. They are written into permits issued to all such discharging facilities.

Significant progress has been made toward cleaning up the Nation's waters. According to EPA's 1984 national water quality inventory, many of the most severe pollution problems of the 1960's and 1970's have been abated. Moreover, despite substantial growth in the Nation's population, industry, and development, overall water quality remained roughly stable between 1972 and 1982—a major accomplishment. A 1984 study by the Association of State and Interstate Water Pollution Control Adminstrators found that of 350,000 miles of streams and rivers monitored during this period, water quality improved in 13 percent, stayed the same in 84 percent, and declined in only 3 percent. We have been doing something—several things—right.

The Clean Water Act Amendments of 1986 strengthen and add to our current statutes. I will review briefly the most important provisions in these amendments.

CONSTRUCTION GRANTS FOR SEWAGE TREATMENT PLANTS

S. 1128 authorizes $18 billion in Federal support over 8 years for the construction grants program, on a 55-percent Federal, 45-percent basis. This program enables construction and upgrading of sewage treatment plants. The goal is to have all sewage treatment plants achieve secondary treatment by 1988—a process which removes 85 percent of solid and organic matter. In 1989, the revolving fund plan begins, the goal of which is to convert the States construction grants program into a self-financing program. Such an approach has worked extremely well in Texas and other States. The Governor will have the discretion to apportion grant funds and loan funds in order to meet the particular needs of his or her State. With wise planning, the States should make this transition without any disruption in their current schedules of priority work.

I am pleased that the current allocation formula for construction grants has been left virtually in place. This formula, which is based on the current EPA needs survey, correctly reflects the immediate needs in our urban areas in the Great Lakes and Chesapeake Bay regions. Our older cities, place the greatest population pressures on the water systems, which also tend to be the oldest systems. New York receives $267 million annually under this allocation.

NONPOINT SOURCE POLLUTION

This bill provides $400 million to initiate the first national program to control nonpoint source pollution, primarily runoff from agriculture and urban areas. Scientists at EPA have determined that nonpoint source pollution—pollution not from a single pipe or outfall—is a significant contributor to degredation of water quality. This includes runoff contaminated by fertilizers and other chemicals, as well as runoff from city streets which often contains high levels of salts and oils.

As part of this effort, conferees worked diligently with cities and counties as well as with environmental groups to devise a stormwater permit system that would improve water quality without being too costly or too cumbersome for EPA to administer. A recent court decision had ordered EPA to issue permits for virtually all storm sewers, which would have required EPA to issue 50,000 more permits on top of the 65,000 point source permits EPA already issues. This would have diverted EPA personnel efforts from control of toxic contaminants in water to a paper shuffling exercise that would not be result in environmental improvements in most cases. The conference agreed on a provision which would require permits from industrial discharges to storm sewers, and from cities over 250,000 in population where those discharges are significant contributors to pollution.

CLEAN LAKES PROGRAM

S. 1128 provides $85 million for a clean lakes program which States can use to clean up silted lakes, and to lime acidified lakes.

ESTUARIES PROGRAM

The bill provides $48 million for an estuary research program, which identifies several estuaries of national importance, including New York and New Jersey Harbor. Under this provision EPA can offer up to $10 million per year on a 50-percent matching basis to States to study and implement cleanup in the New York-New Jersey Harbor area.

BAN ON DUMPING OF SLUDGE IN THE NEW YORK BIGHT

The bill bans as of December 1987 any additional users from dumping sewage sludge in the New York Bight 12 miles off Sandy Hook, NJ. The bill also restricts the use of the site 106 miles off the coast to those currently using the 12-mile site.

FUNDS FOR BOSTON TREATMENT PLANTS

S. 1128 includes $100 million to fund sewage treatment plants in Boston Harbor, assisting Boston in complying with its court ordered directive to stop dumping sludge in the ocean.

GREAT LAKES OFFICE

The conferees agreed to establish a Great Lakes International Coordination Office within EPA to focus on control of toxic pollutants and achievements of goals in the Great Lakes Water Quality Agreement of 1978. The bill also establishes a Great Lakes Research Office with the National Oceanic and Atmospheric Administration to carry out a comprehensive Great Lakes Research Program, with special attention to sediment control projects.

All in all, this is a most worthy bill, which will improve upon the good work already begun by the Clean Water Act of 1972, I heartily support passage of the conference report, and I commend my fellow conferees for their good sense and hard work.

I ask unanimous consent that material summarizing the construction grants program in New York be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

The House-Senate conference report on the Clean Water Act provides $267.9 million annually in federal grants for the construction of sewage treatment plants and sewers in New York State through 1990. The New York State Department of Environmental Conservation has identified the following for priority funding:

New York: Oakwood Beach (Staten Island); Owl's Head Treatment Plant (New York City); Fort Covington (St. Lawrence County); Schuylerville (Washington County); Village of Gowanda (Cattaraugus County); Village of Oxford (Chenango County); Village of Croghan (Lewis County); Cedar Creek Sewage Plant (Nassau County); Mamaroneck Sewer District (Westchester County); Dewey Eastman Tunnel (Monroe County); City of Gloversville (Fulton County); City of Batavia (Genesee County); Buffalo Sewer Authority (Erie County); Chautaugua Utility District (Chautauqua County); City of Binghamton (Broome County); Cheektowaga (Erie County); Village of South Glens Falls (Saratoga County); Village of Great Neck (Nassau County); and Great Neck Sewer District (Nassau County).

Mr. STAFFORD. Mr. President, I yield 2 minutes to the very able Senator from South Dakota [Mr. ABDNOR].

The PRESIDING OFFICER (Mr. BROYHILL). The Senator from South Dakota is recognized.

Mr. ABDNOR. I thank the chairman for yielding. I will be very brief.

Mr. President, the previous speaker, the gentleman who guided this clean water bill through the Senate and the conference committee, is far too modest. It is true that there are a lot of people who helped, particularly our full committee chairman and the very able staff of Senator CHAFEE, but I happen to know that a number of people said a week or so ago that this bill was dead, and they did not have

any hope for a final conference agreement on the Clean Water Act Amendments of 1986.

□ 1210

How do I know? I know because I am the chairman of the Subcommittee on Water Resources that is conferencing the national water policy bill. As it often happens at the tail-end of a session, Members begin to look around for an opportunity to attach their legislation to another, nongermane bill.

This is exactly what happened as we tried to work out the differences between the House and Senate on the national water policy bill even as Members of both Houses were working to resolve their differences on the clean water bill.

I am happy to report that Senator CHAFEE has been successful in bringing his bill to the floor in final form. I am still striving to reach final agreement on my water policy bill so that it, too, may be passed in these closing days.

At one time we believed the conference report on the national water policy bill was more likely to be the first to reach the floor.

So it is a great credit to this gentleman. With the help, of course, of others he has developed a sound approach to addressing our remaining water pollution problems, whether they are the result of discharges from either point or nonpoint sources.

For this, I think, we all owe him a great deal of thanks. It is absolutely imperative that we pass this vital legislation. It is long overdue.

I join the other proponents of this legislation in urging our colleagues to say to Senator CHAFEE, Senator STAFFORD, and their fellow conferees, "It is a job well done," by voting to approve the Clean Water Act Amendments of 1986.

Mr. STAFFORD. I thank the very able Senator from South Dakota for his words.

In a very short minute we will be ready to yield back our time and vote on this issue.

But before we do that, in view of the kind things that have been said on both sides of the aisle, I do want to say as chairman of the Committee on Environment and Public Works that I have taken a great deal of pride in the work the committee has done this year on a bipartisan basis.

This really is one of a series of major pieces of legislation which thanks to the Senator from Rhode Island, the Senator from Maine, and Senator BENTSEN has been made possible. Much of the work that has made it possible has been accomplished in a bipartisan spirit by the Senators of the committee, including Senator ABDNOR, and as has been noted the very fine staff that has worked for the committee over the last several years.

One note of the fact that the staff has operated as well as the committee on a bipartisan basis is the fact I see in the back of the Chamber some of the Republican staff operators are seated with some of the Democratic staff operators which truly indicates a bipartisan support.

Mr. DURENBERGER. Mr. President, we have before us the third conference report on a major environmental bill in this session of the Congress. In May we sent the President a reauthorization of the Safe Drinking Water Act. Two weeks ago we were here on the floor with the conference report to reauthorize the Superfund Program. And tonight we will be concluding the legislative process on the Water Quality Act of 1986 which amends and extends the Clean Water Act protecting the surface waters of the Nation.

That we have been able to conclude work on these three major pieces of environmental legislation gives all of us a sense of accomplishment. And there may be more good news in the next few days. We may also add an omnibus water resources bill and a reauthorization of the Nation's pesticide law to this list of environmental achievements for the 99th Congress.

We are here tonight largely as a result of the tireless work of the distinguished Senator from Rhode Island [Mr. CHAFEE], who is chairman of the Environmental Pollution Subcommittee of the Senate. Along with Senator MITCHELL, the ranking member of the subcommittee, and Senator STAFFORD, the chairman of our full committee, the Senator from Rhode Island has spent long hours in hearings, markup and conference sessions and floor debate to bring this bill to this point in the legislative process. This is a major piece of legislation. It has been pending before the Congress for several years. And over that whole period, Senator CHAFEE, has been a consistent champion of the Nation's water resources. He has shown no inclination to compromise the goals of the Clean Water Act just to get a bill and tonight his dedication to those principles is rewarded with an excellent piece of legislation that adds much to a law which has already been quite effective in improving the quality of the Nations's surface waters.

Before turning to the substance of this legislation let me just mention the role of two of my fellow Minnesotans who serve in the other body and who were instrumental in developing this legislation. Both Congressman STANGELAND and Congressman OBERSTAR from Minnesota serve on the Water Resources Subcommittee of the House and were active members of the conference on this legislation. All of us from Minnesota are proud of the contribution they have made to this bill.

The principal feature of this bill is a reauthorization of the municipal wastewater treatment construction grants program. Title II of the Clean Water Act has provided more than $40 billion to the cities of our country to build sewage treatment systems over the past decade and one-half. We add another $18 billion to that commitment with the enactment of this bill. But we also begin the process of phasing out the construction grants program. During the phase down period, States will convert Federal grants into revolving loan programs so that Federal dollars can be recycled and will continue to protect the Nation's waters well into the future.

One controversial aspect of this legislation was the allocation formula for the construction grants program. In June of last year, when the Senate was considering this bill for the first time, I felt compelled to put together a coalition of members representing the Great Lakes States to protest the allocation formula that was included in the bill as reported by the Environment Committee.

The formula was grossly unfair to the Great Lakes States and would have threatened our efforts through the Water Quality Agreement of 1978, an international treaty with our closest friend in the community of nations, Canada, to restore and maintain the quality of the waters of this international treasure. I will have further comments on the Great Lakes at a later point in this statement, but for now let me simply say that I am very happy to tell the Senate tonight that the Senate provision on the construction grants allocation formula did not prevail in the conference.

The Senate was thoroughly whipped in the conference. We were so badly defeated, in fact, that my colleagues from the Great Lakes will be able to go home to their constituents and boast about this failure of the Senate. Each State in our region will lose only a small amount of funding as against the current formula, but in no case will it be more than 1 percent of the current allocation. These lost funds, amounting to approximately $18 million across the whole Nation, will be sent to Texas in what is best characterized as a compromise with political reality.

There are several other provisions of this legislation which should be mentioned in any thorough summary of its features: the Clean Lakes Program is reauthorized and extended to problems of acid mitigation for lakes damaged by acid rain; the bill contains a provision prohibiting backsliding from effluent limitations in existing permits; there is a new estuary program and a program to further the efforts to clean up the Chesapeake Bay; and we have established a new role for

Indian tribes in achieving the goals and requirements of the Clean Water Act.

There are three major provisions of the legislation relating to nonprofit sources of pollution, stormwater discharges and the Great Lakes which I will discuss at length this evening. Before doing so, let me, if I may Mr. President, make brief comment on the anti-backsliding provision of this legislation. The purpose of the anti-backsliding amendment is to assure that we keep the improvements in water quality that have already been accomplished under the act. I have listened to the description of this provision provided by the distinguished Chairman of our Committee, Senator STAFFORD, and am in complete accord with the statement he has made. There are exceptions to the anti-backsliding requirement, both for permits based on best practicable judgments and those based on water quality standards. But even with the exceptions, the intent and effect of the legislation is clear. Except in extraordinary circumstances those improvements in water quality which have been achieved as a result of permits issued under the Clean Water Act will be maintained and other factors including improvements in water quality due to additional efforts under the act, the promulgation of different and less stringent effluent guidelines, or other unrelated causes, cannot be used as a justification to shutdown pollution control technology that is in place and operating to meet effluent limitations in existing permits.

NONPOINT SOURCE POLLUTION

The legislation we are reporting today establishes a new program under the Clean Water Act to require development of management programs to control nonpoint source pollution.

The new section 319 of the act requires each State, individually or in combination with adjoining States, to submit a proposed nonpoint source pollution management program to the Administrator of the Environmental Protection Agency within 18 months of enactment of this legislation. These State programs will have seven principal elements.

First, they will identify waters within the State which are not expected to attain water quality standards or the goals of the Clean Water Act without control of nonpoint sources of pollution.

Second, the State programs will designate categories, subcategories, or particular nonpoint sources that contribute significant pollution to those waters.

Third, the State programs will identify best management practices, so-called BMP's which will be undertaken to reduce pollution in each category or subcategory taking into account the impact of the proposed practice on ground water quality.

Fourth, the programs will include nonregulatory or regulatory measures for enforcement, technical and financial assistance, education, training, technology transfer, and demonstration projects to assist in the development and implementation of BMP's.

Fifth, the programs will include a schedule containing annual milestones for utilization of the measures identified and implementation of the BMP's identified at the earliest practicable date.

Sixth, the programs will contain assurances that existing State laws are adequate to carry out the proposed program or contain a stated intent to seek additional needed authority together with a proposed schedule.

And finally, the State programs will identify Federal financial assistance programs and Federal development projects to be reviewed by the State for their consistency with its proposed program.

The provision that adjoining States may develop proposed programs together is intended to promote cooperative actions among States to deal with water quality problems in downstream States when those problems are, in part, a result of nonpoint source loading in upstream States. Downstream water quality problems may result from transboundary delivery of pollutants that are not sufficient to cause identification of the water body by the upstream State, but which nonetheless contribute substantially to water quality problems in the downstream State. Until those upstream sources of nonpoint pollution are brought into the program, the nonpoint source pollution problem in the downstream State may not be adequately addressed, as no measure of control applied in the downstream State will affect the pollution in the upstream State. In such cases, the upstream State may have little incentive to incur program costs that will result in water quality benefits primarily to the downstream State. The Administrator is given the authority to provide extra funding for such interstate cooperative efforts under the provisions of this act.

A joint or cooperative management program may also be appropriate when the affected water body is shared by more than one State, for instance, an estuary lying in two or more States or a lake or river that forms the boundary between two States.

In the conference, the Senate agreed to a House provision which provides for convening an interstate management conference when nonpoint pollution in one State causes water quality problems in another. Such conference can be convened at the request of a State or by the Administrator acting on information which is available. If the conference reaches any agreement with respect to reducing nonpoint pollution in the upstream State, the program of that State shall be modified to reflect the provisions of the agreement.

This legislation requires each State to identify those waters within its boundaries which, after implementation of point source controls, will not attain or maintain water quality standards or the goals and requirements in the act without controlling nonpoint sources of pollution. The State need not demonstrate that the nonpoint sources of pollution are the sole cause for the water quality standards are not being attained or maintained. The fact that the standards are not likely to be attained or maintained under existing conditions in the reasonably near future, and that there are loadings of pollutants from nonpoint sources of pollution that can reasonably be expected to be contributing to the water quality problems, should suffice for a State to identify such water under this act. In identifying such waters, the State should not focus only on the immediately adjacent waters to nonpoint sources, but also consider downstream segments, lakes, and other water bodies where such pollutants may accumulate and cause water degradation.

The reference both to water quality standards and to the goals and requirements of the Clean Water Act arises from the fact that not all water quality standards yet reflect the act's goals and requirements. In such cases, identification and control of nonpoint sources can contribute to improvement in water quality and upgrading of water quality standards.

In reference to specific nonpoint sources under section 319 the term "significant" is inserted to exclude trivial sources of pollutants or sources of pollutants which are not related to the water quality problems identified by the State program. The term "categories" in this subsection could include sources such as cropland, rangeland, pastureland, forestland, construction sites, industrial sites, mines, residential areas, streets, roads, highways, other developed land, and wild areas. Within each of these categories, subcategories can be defined on the basis of characteristics such as geographical location, type of activity, size of facility, topography, and other factors. The State has broad discretion to establish categories and subcategories that may be useful in terms of the types of nonpoint source pollution problems and the program that the State will implement to control them. However, the categorization must be sufficiently comprehensive to include all significant sources.

Particular nonpoint sources as referenced in this section could be identi-

fied when they, in and of themselves, are significant contributors of pollutants, or in some way are sufficiently unique that they cannot reasonably be included in one of the categories or subcategories.

The term best management practices is left undefined in this bill because of a concern that any definition would limit the States' flexibility and perhaps undercut existing programs in which best management practices have been identified, including conservation tillage, grassed waterways, cover crops, undisturbed field perimeters near waterways, and terracing. The selection of the appropriate BMP's in a particular instance would depend upon soil type, topography, desired crop, costs of implementation, and other factors. Simple and cost-free changes in agricultural practices, such as careful scheduling and application of fertilizer and pesticides, may reduce runoff of these pollutants thereby resulting in cost savings to the farmer.

Best management practices have also been identified for reducing runoff from urban areas including storm water containment structures construction areas including erosion barriers such as straw bales and dikes silviculture areas including careful road placement, culverting, grassing of abandoned roads and skid trails and grazing lands including herd and vegetation management.

States are required to consider the impact of management practices on ground water quality. Because of the intimate hydrologic relationship that often exists between surface and ground water, it is possible that measures taken to reduce runoff of surface water containing contaminants may increase transport of these contaminants to ground water. The State should be aware of this possibility when defining beat management practices especially in aquifer recharge areas.

Mr. President, this legislation allows a State great flexibility to design a management program containing regulatory or nonregulatory components, or a mixture of the two. The list of possible program elements is not intended to be exclusive. It is expected that States will differ in the program strategies they adopt. However, a State program must have a clear purpose which is to achieve implementation of best management practices by the identified sources as soon as practicable so as to reduce nonpoint pollutant loadings and improve water quality within that State. The State is expected to demonstrate that its management program will provide reasonable assurance that appropriate control measure will actually be adopted by the categories, subcategories and specific sources identified in the State's program. Further, the State is required to commit itself to a schedule containing milestones for implementation of BMP's by such source. This is a requirement that the State take responsibility for the effectiveness of its program in terms of implementing the best management practices by sources, as distinct from merely committing to carry out its identified program activities. The Administrator, in awarding subsequent program grants must consider the State's record in meeting these commitments and determine that the State is satisfactory implementing its program.

Milestones for both program implementation and the implementation of best management practices by sources must be established to provide for implementation at the earliest practicable date. This requirement reflects the importance of the nonpoint source pollution problem and is intended to demonstrate congressional intent that BMP's be implemented expeditiously. Consistent with this general requirement, States may establish different milestones for different categories of sources. No single date or statutory schedule is included in order to allow the State to take account of variations in the number and types of sources and pollutant reductions. Similarly, different States may commit to different schedules based on characteristics of the Senate program.

In the new section 319, the term "as expeditiously as practicable" takes into account the current laws of the State or local governments and the schedule for meetings of the legislature, but indicates that, taking account of these factors, the needed authorities will be adopted as soon as possible.

The bill also vests authority with the States to identify Federal financial assistance programs and Federal development projects for which the State will review individual assistance applications and development projects for their effect on water quality to determine if they are consistent with the State's nonpoint source pollution management program.

This subsection is based on the provisions of Executive Order 12372. This Executive order, issued by President Reagan, replaces OMB Circular A-95 and establishes procedures by which State authorities may comment upon applications for Federal assistance and Federal development projects to assure that the federally supported activities and projects are consistent with State needs and objectives. This bill assures that the provisions of the Executive order, as in effect on September 17, 1983, will be applicable to the State's implementation of this review process, with respect to its nonpoint source management program, regardless of any subsequent revisions of the Executive order. The bill also allows States to designate any Federal assistance program or development project listed in the most recent Catalog of Federal Domestic Assistance, rather than just those programs and projects subject to the current Executive Order 12372. The purpose of this provision is to allow the State's to review any Federal program or project that the State determines needs to be reviewed for consistency with its nonpoint management program. This provision builds upon established procedures for State review of Federal activities. It will provide the States with an important tool to assure that proposed Federal assistance and development projects are implemented in a manner which the State deems consistent with its nonpoint source pollution management program.

In developing its program the States may use information developed under other pertinent sections of the Clean Water Act in the development of their programs, particularly the section 208(b) waste treatment management plans, if the State determines those plans to be consistent with the goals and objectives of this new section. States may also cooperate with local agencies or organizations in the development and implementation of their programs. This would include agencies receiving funding under section 205(j) of the Clean Water Act and soil conservation districts.

In many cases, information and institutional relationships developed under the section 208 planning process will be relevant to, and consistent with, the requirements and objectives of this bill. Many States relied upon regional organizations and the section 208 planning process to gather needed data about nonpoint source pollution and to promote local and regional cooperative pollution control efforts. The States are encouraged to build upon these program elements in constructing the program required by this bill. However, the bill does not require the use of section 208 plans or local agencies and organizations because some State programs have evolved well beyond the section 208 planning effort, and also because some States gave inadequate or inappropriate attention to nonpoint sources in their 208 plans. In any case, the State has the flexibility to select the program elements that will most effectively fulfill the requirements and objectives of this bill.

The States are authorized to develop their programs on a watershed-by-watershed basis as is appropriate in a program that focuses on water bodies or segments which are not meeting water quality standards. However, this provision should not result in fragmented programs farmed out to local agencies or organizations. We are establishing State programs in this section and expect central, policy-setting direction from the States in imple-

menting this program. In that regard, Mr. President, I would highlight a significant difference between the House and Senate bills. The House bill would have allowed the States to develop narrow programs for particular watersheds or categories of nonpoint pollution and satisfy the requirements of the legislation. The Senate bill included a broader scope—a full scope—including all water bodies within a State exhibiting nonpoint problems and all categories and subcategories contributing to those problems. The conference adopted the Senate approach.

As with any cooperative Federal-State program this legislation includes procedures for review and approval of the State program. The Administrator shall decide whether to approve or disapprove a State program within a 6-month period after it is received. If the Administrator determines that it does not comply with the requirements of this act, he must notify the State of any modifications necessary to obtain approval. The State is then given 3 additional months to submit a revised program, to be approved or disapproved by the Administrator. If the Administrator determines that a State management program meets certain requirements he will approve the program. Under the Senate legislation the Administrator was to examine the State program to assure that the seven elements which I described earlier are included. Under the House legislation the Administrator was also required to determine that the State program would meet the goals and requirements of the Clean Water Act, would improve water quality within the State, would reduce pollutant loadings from nonpoint sources and that there would be sufficient resources and authority at the State level to implement the program. The conference report adopts both the House and Senate criteria for reviewing and approving or disapproving State programs.

If the Administrator fails either to approve or request modification of a submitted State program within 6 months of receipt, the program is deemed to be approved. Likewise, if the Administrator fails to approve or disapprove a program revised at his request within 3 months of receipt, such a revised program is deemed to be approved. This provision is intended to assure that implementation of programs to control nonpoint sources of pollution are not delayed because of inaction on the part of the Administrator.

In determining whether the proposed program meets the requirements and objectives of the Clean Water Act, the Administrator should take into account any public comments he has received, including those of downstream States that may be affected by the program. The Administrator's review should involve considerably more than a checklist of required program elements. Under the legislation reported by the conference, the Administrator must review submitted programs in light of the goals of the Clean Water Act and the purpose of this new section which is to achieve reduction of nonpoint source pollutant loadings by the implementation of best management practices by sources and to do so at the earliest practicable date. Before approving the program and awarding Federal grants to support its implementation, the Administrator must be persuaded that the program is capable of meeting the objectives.

If a State fails to submit a nonpoint source management program consistent with the new section 319, the Administrator is to carry out some requirements of the act on behalf of that State. The Administrator is thus required to identify waters within the noncomplying State exhibiting nonpoint pollution problems and designate categories or subcategories of significant contributors to that pollution. Any actions of the Administrator pursuant to this subsection shall be reported to Congress.

Subsection (h), (i), and (j) of the new section 319 authorize Federal grants to States to assist in implementing approved management programs and authorizes funds to be appropriated to the Environmental Protection Agency for the administration of this program. The Federal grants are not to exceed 60 percent of the costs of implementing the management program of any State. Non-Federal funds must be equal to at least 40 percent of the costs of each State program. This requirement will ensure adequate State financial involvement while providing necessary Federal financial assistance.

The Senate bill contained a formula for the distribution of the authorized funds. The House bill did not. The conference report deletes the legislated formula. The Administrator is to determine the apportionment of funds among the States according to the needs of the States reflected in reports on the extent of nonpoint pollution problems and the quality and promptness of State programs to control nonpoint sources.

The legislation provides financial incentives to States to implement programs that address particularly difficult nonpoint source pollution problems. In such cases, the environmental benefits from controlling the pollution may be large, but the State may be reluctant to devote a disproportionate amount of its program funds to such problems. The Administrator is expected to use the authorized funds to achieve more effectively the objectives and requirements of this act. Additional funding to States with particularly difficult problems will result in more expeditious implementation schedules and more rapid reduction in nonpoint source pollutant loadings.

Interstate nonpoint source pollution problems may be difficult because the program costs to control the pollution may accrue mostly to the State while the environmental benefits accrue mostly to another. In such cases, the Administrator may supply additional discretionary grants to the appropriate State, or may provide additional funding to a joint or cooperative interstate program.

In addition, these funds may be used to assess the relationship between nonpoint source pollution and ground water quality. The conference report includes a provision of the House amendment which authorizes the Administrator to makes grants to States with approved nonpoint programs to protect ground water resources from nonpoint sources of contamination.

The conference report provides that any funds not obligated in the fiscal year for which they were appropriated shall be reallotted among the States in the following fiscal year.

The new section 319 provides that States may use Federal funds authorized by this bill for financial assistance to persons only insofar as the assistance is related to costs of implementing demonstration projects. These Federal funds are not to be used as a general subsidy or for general cost sharing to support implementation of best management practices by persons. However, a State is not precluded from using or directing other funds for cost sharing or other incentive programs if it so chooses.

The term "demonstration projects" includes projects designed to educate persons about the application of best management practices and to demonstrate their feasibility and utility as well as research projects to establish the feasibility or cost effectiveness of best management practices.

Initial program grants are required to be awarded to States whose programs are approved by the Administrator. Subsequent grants can only be made if the Administrator so determines that the State is satisfactorily implementing its management program consistent with its commitments to schedules and milestones. This annual review and determination is important to assure that States are effectively implementing their programs and that Federal funds obligated under this section are being used to achieve the goals and requirements of this Clean Water Act.

The conference report authorizes four years of funding for the nonpoint program: $70 million for fiscal year 1987; $100 million for fiscal year 1988; $100 million for fiscal year 1989 and $130 million for fiscal year 1990. These funds are authorized to be appropri-

ated for grants to the several States pursuant to the provisions of this section and for the payment of salaries and expenses of the Environmental Protection Agency necessary to administer the Agency's obligations under this new section.

Additional funding for the program is provided through set asides of funds that the States would otherwise receive under title II of the Clean Water Act. One percent or $100,000 of the construction grant funds allocated to each State shall be used to develop and implement this new nonpoint pollution program. In addition, nonpoint source control efforts may be financed by the Governor's discretionary set aside which is 20 percent of the construction grants funds.

The conference agreement requires each State to submit an annual report to the Administrator on its progress in meeting the schedule of milestones in its program and reductions in nonpoint source polluant loading and improvements in water quality resulting from implementation of the management program.

The Administrator is required to transmit to the Office of Management and Budget and appropriate Federal agencies a list of the assistance programs and development projects which each State has identified for review pursuant to the authority of this bill. Beginning no later than 60 days thereafter each Federal agency is required to amend applicable regulations so that individual assistance applications and projects for the identified programs and development projects are submitted for State review. The appropriate agencies and departments of the Federal Government are required to accommodate, according to the requirements and definitions of Executive Order 12372, as in effect on September 17, 1983, concerns the State may express about consistency of assisted projects or activities with the State's Nonpoint Source Pollution Management Program.

The intent of this provision was explained partially in the comments I made a moment ago with respect to State responsibilities under this new section. Where the earlier subsection authorized the State to identify Federal programs and development projects for review, this subsection establishes the Federal responsibilities in response to such identifications by the States.

The purpose of the State review is to assure consistency of these Federal Activities with the State's Nonpoint Source Management Program. If the State expresses a concern about consistency, the Federal agency is required to accommodate the State's concerns according to the requirements and definitions of Executive Order 12372 as in effect on September 17, 1983. The intent, therefore, is not to invent new procedures for Federal/State coordination, but rather to incorporate existing procedures by reference in the Clean Water Act. This is an important provision because, without adequate State review, Federal activities over which the State has no direct authority could undercut its program and its water quality goals, possibly jeopardizing the State's ability to meet its program commitments under this section.

It is important that we clarify the meaning of the term "accommodate" in this context. It is a term of art. It means that any project proposed to be developed by a Federal agency or for which any person is seeking assistance must be in conformance with State views, policies, regulations, and laws. If a State objects to any aspect of a proposed project, then that aspect must be modified to reflect the view communicated by the State. Accommodate means modify to take into account concerns expressed by a State or local government in the review process so as to satisfy and remove those concerns.

The Administrator is to establish an information clearinghouse for information pertaining to the costs and relative efficiencies of best management practices and the relationship between water quality improvement and the implementation of various practices. The purpose of this provision is to promote information sharing among the States and to provide the basis for technical assistance to State programs.

The Administrator is required not later than January 1, 1990, to submit to Congress a report, based on information submitted by the States and such other information as appropriate, describing the management programs being implemented by the States and their experience in adhering to schedules and implementing best management practices. This report must also describe the amount and purpose of grants awarded under this program; identify the progress made in reducing pollutant loads and improving water quality; and indicate what further actions need to be taken to reduce nonpoint source pollution in the context of the program.

The purpose of this report is to give Congress the information it will need to determine whether the approach taken in this legislation is adequate. This report will document the progress made under this approach and will provide information that will help determine the necessity of future statutory revisions.

Mr. President, this new section 319 represents a first step in controlling pollution from nonpoint sources. We have been persuaded to take a path somewhat different from that taken for point sources. States are given flexibility to identify priorities. And based on commitments made in this legislative cycle, it is the expectation of the Congress that this program will result in a significant improvement in water quality and nationwide reductions in pollutant loadings from nonpoint sources. We will, of course, revisit this question in the next legislative cycle on the Clean Water Act. We will not find this program adequate, if real improvement in water quality has not occurred. We are not so much interested in elements of a State program as we are concerned with meeting the goals and objectives of the Clean Water Act.

The bill requires the Administrator to enter into agreements with the Secretaries of Agriculture, Interior, and Army and the heads of other appropriate departments and agencies to provide for the maximum utilization of other Federal laws and programs for the purpose of achieving and maintaining water quality through appropriate implementation of plans approved under section 208 of this act. This amendment would establish the same requirement in terms of management programs developed pursuant to the new section 319. Mr. President, I am especially interested in assuring that EPA and USDA make full use of the authority in this provision. Each year we spend hundreds of millions of dollars through USDA soil and water conservation programs. In the past, these soil conservation efforts have not given sufficient priority to improvements in water quality. It is the expectation of the conference that this provision will give rise to a memorandum of understanding between EPA and USDA which will significantly elevate the priority assigned to water quality protection in projects assisted by the USDA soil and water conservation programs.

As I said a moment ago, Mr. President, the Administrator is directed to reserve 1 percent of a State allocation under section 205(c) or $100,000, whichever is greater for purposes of carrying out the provisions of this nonpoint program in that State. The State may request the use of any amount of the amount reserved by the Administrator. If the State identifies an amount less than the full reserved amount but greater than $100,000, the State may use remaining reserved funds for other purposes under title II of the act. For example, the State would be able to use the funds for direct grants to municipalities for construction of treatment works. The Administrator may establish such administrative and procedural requirements as necessary to assure that funds available to States under this section and section 319 are properly coordinated. Further, the Administrator may require a single application for grants under this section and section 319.

Grants under section 205(j)(5) shall meet the Federal and non-Federal cost-sharing requirement set forth under section 319. In management of funds under this subsection, however, the Administrator shall not withhold any portion of funds to support special programs.

These funds are intended to be a supplement to the funds authorized by section 319, not to replace them. It is essential that adequate section 319 funds be appropriated in order to assure the development of a strong foundation of nonpoint management plans. In the event section 319 funds are not appropriated, the funds reserved under this subsection will permit modest nonpoint programs to be developed. However, the funds made available by this provision alone are too meager to support the level of program development that is needed to effectively and adequately manage nonpoint source pollution.

Mr. President, finally let me say that this new program to control nonpoint pollution is an addition to the Clean Water Act and not a substitute for the point source programs already in place under the act. As a nation we have made great progess in reducing the pollution of our surface waters. Much of the work that remains to be done is on the nonpoint side. And we begin that work here. But this is not an excuse to reduce the effort or relax the requirements on the point source side. Reductions in pollution already achieved through point source controls are to be maintained. Point sources not yet in compliance with the law are to be pursued. And on top of that effort we now have a nonpoint program that will bring us much closer to the goal of the Clean Water Act—to eliminate the discharge of pollutants into the Nation's waters.

STORMWATER RUNOFF

Runoff from municipal separate storm sewers and industrial sites contains significant volumes of both toxic and conventional pollutants. EPA's national urban runoff study found 63 toxic pollutants, including all 13 toxic metals, in the discharge from municipal separate storm sewers. Of these, lead, copper, and zinc were the most pervasive; EPA found these pollutants in at least 91 percent of its samples. The same study also estimated that municipal separate storm sewers discharge 10 times the total suspended solids that the Nation's secondary sewage treatment plants discharge.

Toxic and conventional stormwater contaminants may adversely affect public health, harm fish and other aquatic species, and prevent or retard water quality improvements even if the best available pollution controls are installed on other point sources.

The Federal Water Pollution Control Act of 1972 required all point sources, including stormwater dischargers, to apply for NPDES permits within 180 days of enactment by 1973. Despite this clear directive, EPA has failed to require most stormwater point sources to apply for permits which would control the pollutants in their discharge.

The conference bill therefore includes provisions which address industrial, municipal, and other stormwater point sources. I sponsored this provision because I believe that it is critical for the Environmental Protection Agency to begin addressing this serious environmental problem.

The bill establishes priorities, deadlines, and permit requirements for stormwater point sources. It affords municipal and nonindustrial dischargers some relief from the act's 1973 permit application deadline.

With respect to municipal separate storm sewers, the bill establishes three permitting priorities: First, those systems serving a population of 250,000 or more; second, those which contribute pollutants to a stream segment which does not attain or maintain a water quality standard; and third, those which are a significant contributor of pollutants to any waters of the United States. If a municipal separate storm sewer or storm sewer system meets any of these criteria, EPA or the State, where the State administers the NPDES Permit Program, must require the source to apply for a permit within 3 years of enactment. EPA or the State should use any available water quality or sampling data to determine whether the latter two criteria are met, and should require additional sampling as necessary to determine whether or not these criteria are met.

If a source is required to obtain a permit, EPA or the State must also act to issue or deny the permit application within 1 year of the application deadline. If no permit application is submitted by the deadline, or if the submitted application is denied, EPA or the State must commence immediate enforcement action against the discharger.

A permit for a municipal separate storm sewer may, where appropriate, be issued on a system or jurisdiction-wide basis for example, where all outfalls discharge to the same body of water. In writing any permit for a municipal separate storm sewer, EPA or the State should pay particular attention to the nature and uses of the drainage area and the location of any industrial facility, open dump, landfill, or hazardous waste treatment, storage, or disposal facility which may contribute pollutants to the discharge. Any such permit shall include a requirement to prohibit effectively nonstormwater discharges to municipal separate storm sewers. Any such nonstormwater discharges to municipal separate storm sewers are currently illegal under the act.

In addition, any such permit shall provide for compliance as expeditiously as practicable, but in no event later than 3 years from permit issuance and shall require controls to reduce the discharge of pollutants to the maximum extent practicable. Such controls include management practices, control techniques and systems, design and engineering methods, and such other provisions, as the Administrator determines appropriate for the control of pollutants in the stormwater discharge.

These requirements place EPA on an action program to control municipal separate storm sewers. Within 4 years of enactment or earlier if the water quality data warrants EPA shall commence control of storm sewer systems serving a population between 100,000 and 250,000. The latter provision reflects the continuing need to control these storm sewers, but gives EPA flexibility, in the first 4 years after enactment, to order its permitting priorities around those sources which are believed to be the most significant. However, it should be clear that storm sewer systems serving populations of 100,000 or less must be covered by the first round of permits where they contribute to water quality exceedance or significantly contribute pollutants to waters of the United States.

Finally, after October 1, 1992, all remaining, unpermitted stormwater point sources will return to current law status and will be required to obtain permits under section 402 of this act. Obviously, Congress will be taking another look at this whole question before and will be informed by the experience with stormwater controls which have been established under the provisions we adopt here.

EPA or the State, where appropriate should provide adequate opportunity for public participation in the development of any permit for a stormwater point source.

The bill also requires EPA to submit to Congress a study of any stormwater discharge or class of discharges which are not required to obtain a permit within the first 6 years of enactment. This study must determine, to the maximum extent practicable, the nature and extent of pollutants in such discharges and procedures and methods to control such discharges. This study will enable Congress to determine whether permitting of the remaining stormwater point sources should be expedited beyond the schedule provided in this bill.

GREAT LAKES

Mr. President, the Great Lakes are the heart of our continent. Over the last 200 years they have been the focal point for development of two great nations. They have been the source of food and drinking water. Today 26 million Americans drink water from the

Great Lakes. They are a mode of transportation. They are a reservoir of power and a vast resource for recreation and wildlife; 63 million Americans visit a park on the shores of the lakes each year.

All of these demands have taken their toll. The water quality of the lakes had declined sharply. Unfortunately, the natural unity of the lakes has been overlaid by a fragmentation of State and local governments that have been unable to organize people to protect what nature has provided.

In 1972 and again in 1978, the United States and Canada signed Great Lakes water quality agreements. These agreements require the United States and Canada to provide adequate wastewater treatment facilities for the sewered population on both sides of the border. Canada has met this requirement for 99 percent of its population. At last count, the United States was less than two-thirds of the way there.

In 1982 the General Accounting Office published a report on United States compliance with the Great Lakes Water Quality Agreement of 1978, an agreement with Canada that specifies detailed water pollution control goals. The report concluded that the United States is failing to meet its commitments, especially with respect to toxic chemicals and nonpoint source pollution. This is due in part to the absence of a comprehensive U.S. strategy to implement the Great Lakes Water Quality Agreement. We intend to correct that failing with this provision.

Mr. Presidsnt, the legislation reported by the conference contains at section 104 a new program to restore and maintain the quality of the waters in the Great Lakes. This program owes much to the work of the Senator from Wisconsin, Mr. KASTEN, and was sponsored in committee by the Senator from New York, Mr. MOYNIHAN, and myself.

The conference report contains a statement of purpose. The objective of this new provision of the Clean Water Act is to achieve the goals embodied in the Great Lakes Water Quality Agreement of 1978. The legislation establishes the Great Lakes National Program Office within the Environmental Protection Agency and specifies the duties and responsibilities of the program office.

The program office is to: Develop and implement action plans to carry out the duties of the United States under the Great Lakes Water Quality Agreement of 1978; establish a systemwide surveillance network; coordinate the activities of the Environmental Protection Agency with respect to the Great Lakes; and to work with other Federal agencies to achieve the objectives of the agreement.

The program office will develop a 5-year plan for reducing the amount of nutrients that enter into the Great Lakes and shall incorporate into that plan management programs for nonpoint sources of pollution developed pursuant to the new section 319 of this act.

The program office is to conduct a 5-year study of methods to remove toxic pollutants from the Great Lakes with emphasis on the removal of toxic pollutants from bottom sediments. Certain demonstration projects at specific sites are mentioned in the legislation. These projects are to be given high priority, but the Administrator is authorized to find other projects and this section is not a guarantee that those specific projects will be funded.

The annual budget submission of the Agency to the Congress is to include a line item for the Great Lakes Program Office. At the end of each fiscal year the Administrator is to submit to the Congress a comprehensive report on the achievements of the program office during the preceding fiscal year.

The conference substitute establishes a Great Lakes Research Office in the National Oceanic and Atmospheric Administration. The research office is to identify issues with respect to Great Lakes water quality on which research is needed and is to compile an inventory of ongoing research on those questions. The research office is to develop a comprehensive data base for the Great Lakes System and may conduct research and monitoring activities.

For each fiscal year the program office and the research office are to prepare a joint research program. The head of each Federal department, agency or instrumentality which is engaged in programs or activities which may have an impact on the quality of the Great Lakes shall submit an annual report to the Administrator of the Environmental Protection Agency with respect to those activities and their effect on compliance with the Great Lakes Water Quality Agreement of 1978.

The conference substitute provides an authorization to the Administrator of the Environmental Protection Agency of $11,000,000 for each of the fiscal years 1987 through 1991 to carry out the provisions of this section. Of the amounts appropriated, 40 percent is to be used by the program office to demonstrate the control and removal of toxic pollutants; 7 percent is to be used for nutrient monitoring; and 30 percent is to be transferred to the research office for its programs.

Mr. SIMPSON. Mr. President, I am pleased to support the reauthoriztion package of the Clean Water Act embodied in the conference report. Having been involved in the reauthorization process over the past 2 years, I have been impressed not only by the commitment of Senator CHAFEE, who ably led our work, but also by the willingness of both House and Senate conferees to work hard toward necessary compromises.

This year has been a landmark year for environmental legislation. We have seen the Senate pass a new Superfund, reauthorize the Clean Water Act, and pass an asbestos-in-schools bill. In addition, we have passed and the President has signed a reauthorization of the Safe Drinking Water Act.

I was pleased to be a member of the Clean Water Act conference committee and I trust the White House will sign this bill into law. We have made great progress in the past decade in cleaning up this Nation's streams and lakes. Many waters that were polluted years ago are now fishable and swimmable and we must continue to make diligent efforts to ensure that more lakes and streams are cleaned up and that the pristine waters we have in the West remain pristine.

Of course, the greatest compromise is that which the Congress has now struck with the White House: The administration has won its battle to phase out the predominant Federal role in financing construction grants. This is a major accomplishment on the part of the administration, and I believe it is in the national interest to move toward innovative financing mechanisms deriving their support, as far as possible, from the people who will benefit most directly from the new water treatment works. This bill does just that, and it does so while providing for proper adjustment for communities which may not have taken full advantage of the Federal aid available in the past.

The conference deleted several troublesome provisions, such as the section entitled "preservation of other rights" in the Senate bill, which could have led to some foreseeable as well as perhaps some unintended disruptions of the Nation's State-Federal partnership in water quality control and permitting. There are a number of very delicate yet critical questions concerning intergovernmental relations in water quality regulation, and I am pleased that the U.S. Supreme Court will take an opportunity in this term to wrestle with conflicting circuit court opinions concerning the laws applicable in cases where affected parties in downstream States are alleging harm from permitted discharges in upstream States. Along with other members of the Environment and Public Works Committee, I will anticipate and carefully examine the court's ultimate holding in International Paper versus Quelette, which is to be handed down early next year.

For the first time we have included a provision in the Clean Water Act re-

lated to "nonpoint" source pollution that comes from farm lands, timber operations, and other sources of runoff which are not considered "point" sources. All of us Western and Midwestern Senators worked extremely hard to ensure that we were not beginning a new full fledged regulatory program in this regard. Instead, we provided for a voluntary program were States may participate if they so desire. When States choose to participate in the nonpoint source program they will become eligible for grants to carry out nonpoint demonstration and education programs. If States do not choose to participate in the program the only penalty is the lack of Federal funds for nonpoint demonstration projects.

I believe some clarification is needed for a subsection in the nonpoint provision relating to interstate conferences. The statute allows downstream States to petition the EPA Administrator to convene a management conference of all States affected by pollution from nonpoint sources in another State. However, States are not required to participate in these management conferences. There is no penalty for not participating in such management conferences. If States do choose to participate in a management conference that the Administrator would convene, the States are not required to agree to any changes in their nonpoint source programs. If States do not agree to make changes in their nonpoint source programs, there is no penalty for this inattention of action.

The participation in interstate management conferences is totally voluntary, as are any agreements. The conferees discussed this provision at length and it was determined that management conferences would be provided as a vehicle for States to use in discussing pollution of a nonpoint nature that occurs in adjacent States. The statute is very clear that there is no "forcing mechanism," nor is there a provision for penalties for States that do not wish to participate or for States that participate but do not wish to make agreements with other States.

If a State chooses to reach an agreement with other States it is then expected that changes in that State's nonpoint pollution plan will reflect those agreements in the future. Where States are participating in a Federal nonpoint grant program, in no case will the grant moneys be withheld because a State refuses to participate in a mangement conference, or refuses to reach agreements with other States in such a management conference.

In addition, nothing in any agreements reached at a management conference shall supersede or abrogate rights to quantities of water which have been established by interstate water compacts, Supreme Court decrees or State water laws, nor shall these agreements apply to any pollution which is subject to the Colorado River Basin Salinity Control Act. This would include naturally occurring salts and other solids covered by the Colorado River Basin Salinity Control Act.

The nonpoint source pollution control program was formulated in such a manner that EPA would be granted great latitude in approving State management plans. Nonpoint pollution varies greatly from State-to-State and programs to control this pollution will also vary greatly. Therefore, EPA has the flexibility and authority to approve plans with varying complexity.

It should also be pointed out that the zero discharge goal listed under the Clean Water Act does not apply to nonpoint source pollution since this goal relates to point sources only.

This authorization of the Clean Water Act also contains provisions often referred to as antibacksliding sections. Deletion of House section 402(p)(2)(E) is not intended to prevent permittees that have a zero discharge limitation from successfully having their permits modified to allow discharges if it is found that the operation and maintenance costs of zero discharge were considered and rejected during guideline development as being excessive.

For example, if a general permit required reinjection of produced waters in an oil and gas operation and subsequent promulgated guidelines rejected this technology because its operation and maintenance costs are excessive, such general permits could then be modified based upon new information, such as the operation and maintenance costs. Similarly, if a general permit limitation had the practical effect of prohibiting discharges, such as compliance with overly stringent toxicity limitations on drilling fluids as subsequently promulgated guidelines establish less stringent limitations, this limit could be modified under the act.

The conferees also considered a series of issues related to the role of Indian tribes under the Clean Water Act. On the issue of authority under section 303, there are questions similar to those in the interstate arena, concerning the relationship between water quality standards and permitting by tribal governments and how they might be reconciled, where necessary, with those set by States. Our agreement includes direction to the Environmental Protection Agency to develop a mechanism for dispute resolution in this context, as well as a requirement that certain factors be explicitly included in the disposition of all situations requiring resolution of any unreasonable consequences that may arise as a result of differing water quality standards that may be set by States and Indian tribes on common bodies of water. The factors that must be considered, in addition to other relevant factors, include the effects of differing water quality permit requirements on upstream and downstream dischargers, economic impacts, and present and historical uses and quality of the waters subject to such standards.

As a Senator most deeply involved in developing the conference report language in this area, I am convinced that a workable situation will result from the application of this provision. In addition to the specific factors to be included in the resolution of such cases—factors which I believe will provide assurance to States and citizens concerned with the effects of new authority being granted to tribal Government—we have provided that the mechanism be used to resolve "any unreasonable consequences" that may arise from differing water quality standards adopted by tribal governments. The term "any unreasonable consequences" is necessarily broad, and the intention of the conferees in including this term is to have the dispute resolution mechanism—which includes the specified factors—triggered by a low threshold. This will serve the interests of the tribal governments and others who share in the hope that the Indian tribes provisions in this legislation can be made to work well.

With regard to sections dealing with fundamentally different factors [FDF], I find it curious that the oil and gas industry is being subjected to FDF regularly approaches that are different in different EPA regions. For instance, EPA regions IX and X have issued general permits covering numerous offshore facilities which provide for the discharge of EPA approved muds and additives. While EPA regions IV and VI have also issued general permits, they reject this approach and require muds and additives to meet certain toxicity base limitations. The difference between these approaches is that one sets up an end-of-pipe numeric limitation whereas the other controls what can be put into the pipe and later discharged.

There are other differences between EPA regions as well. Drilling muds and additives are subject to high pressure and temperature conditions down hole and frequently pick up materials from geologic zones drilled through. The existence of these factors and their precise affect upon toxicity results is little known at the present time because of antagonistic and synergistic affects. So we can see that one operator could use certain drilling muds and additives and find out weeks later that his discharge violated the end-of-pipe numeric limits whereas a second operator could use the very same drilling fluids and additives and satisfy the

same limit because of different underground conditions.

My hope is that EPA will correct this unfairness and adopt a logical, consistent, and common sense approach to regulating the discharges such as the approach being implemented by regions IX and X. I know of no persuasive reason why this should not be pursued by other EPA regions or why it should not be an essential element of EPA's soon to be promulgated effluent guidelines for this industry.

With regard to the intent of section 306(c), it appears that subsection (1) excludes from the provisions of 40 CFR, part 418, four facilities located in Louisiana. Subsection (2) requires that EPA expeditiously, but not later than 180 days after the effective date, issue permits based on best professional judgment under section 402(a) of the act for these facilities. If EPA decides, after the date of enactment, to promulgate new effluent limitations guidelines for the facilities subject to the provisions of subsections (1) and (2) the BPJ permits will remain in effect until issuance of new permits under the new effluent limitations guidelines.

In conclusion, I would like to thank my fine friend and dogged worker, Senator CHAFEE for his fine efforts during the Clean Water Act conference. I would also like to thank the very capable Senator BENTSEN for his role in the conference as well. Without the efforts of these two hard working Senators we would not be considering this conference report today.

Mr. ABDNOR. Mr. President, will the Senator yield?

Mr. STAFFORD. I am glad to yield to the Senator from South Dakota.

Mr. ABDNOR. I thank the Senator for yielding.

INDIAN TRIBES AMENDMENT

Mr. HART. Mr. President, I would like to engage several of my distinguished colleagues, including the chairman of the Clean Water Conference Committee, in a discussion of the amendments to this bill intended to help Indian tribes address their water quality problems. There is an urgent need for attention and assistance directed toward correcting problems which exist on a significant number of Indian reservations regarding insufficient sewage treatment works and lack of capability to implement programs to protect water quality. Indian tribes, by reason of their inherent sovereignty, have always had the legal authority to protect their reservation environments but have never truly had access to much needed technical assistance and program funding from the Environmental Protection Agency under the statute to effectuate this authority. This amendment is intended to integrate tribal and village governments within the programs of the act so that Indian and native waters will receive the same protection which is afforded non-Indian waters. Mr. President, I think the United States has a trust responsibility to help the Indian people remedy water quality problems, and that was my primary interest in originally cosponsoring this amendment to the Clean Water Act. I know the Ute Mountain Ute Tribe in my own State of Colorado is very grateful for this much needed amendment and is looking forward to alleviating sewage problems and developing program capabilities in cooperation with the EPA.

Mr. CHAFEE. I agree with my able colleague that we do have such a responsibility to the Indian people and expect that the amendment will focus the efforts of EPA, the Indian Health Service, the Bureau of Indian Affairs and other relevant agencies in aiding Indian tribes and native villages to improve their sewage treatment facilities and to protect the quality of their waters.

Mr. ABDNOR. Mr. President, I believe that significant progress will be made toward these objectives by providing the EPA Administrator the authority to treat Indian tribes as States under the act and to provide such tribes grant and contract assistance to carry out functions provided by this title. The EPA is also given discretion to find an alternative means of meeting the purposes of the act if treating a tribe as a State would be inappropriate. Moreover, consistent with the policy of Indian self-determination, the EPA should encourage the tribes, particularly in the area of construction of waste water facilities, to do as much of the work as is practicable on their own or under contract with the EPA.

The Indian sewage assessment required of EPA will serve as an important foundation of information for determining assistance priorities and charting progress. This survey is to be a thorough accounting of sewage problems for each Indian reservation or community.

Mr. BURDICK. As another of the original cosponsors of these amendments, I believe one of the principal ways in which problems will be effectively addressed is through the provision of grants to tribes to implement the requirements of the act. I want to underscore the fact that the administration is not restricted to matching grants in the case of Indian tribes. The tribes I represent in North Dakota could not afford to develop these problems if they were required to provide matching funds.

Mr. CHAFEE. I thank the Senator from North Dakota for making this point. The conferees recognized that many tribal governments, unlike State governments, do not yet have a regulatory program base, an underlying financial and budgetary foundation or a supporting tax infrastructure which could be used in cost-sharing on these programs. Furthermore, funding assistance priorities should be established according to the severity of the problems identified in the EPA survey.

Mr. BURDICK. Another key aspect of these amendments is the earmarking of construction grants for use by Indian tribes to improve the operation of their sewage systems. One-half percent of these funds are set aside for this purpose.

Mr. CHAFEE. I thank the Senator from North Dakota for his comments and join with him and Senators HART, ABDNOR, and ARMSTRONG in expressing strong interest in seeing that these amendments result in improved water quality for Indian tribes.

Mr. ABDNOR. Mr. President, I also wish to commend Senator MITCHELL and Senator BENTSEN, the distinguished ranking minority members of the subcommittee and full committee, respectively, for their tireless efforts in bringing about this excellent conference agreement. They, too, deserve our thanks.

Mr. President, I rise in strong support of the conference report on S. 1128, the Clean Water Act Amendments of 1986.

As a member of the Committee on Environment and Public Works, I was pleased to participate in the development of this significant environmental legislation. Of special interest to me, and included in this conference report, are vital new provisions to address nonpoint source pollution and water pollution problems on Indian lands.

Additionally, I remain committed to facilitating continued improvement in the quality of our Nation's waters through wastewater treatment grants. In my own State of South Dakota, these grants have proved invaluable to many of the larger communities' efforts to improve their water quality. With the 3-year extension of wastewater treatment grants contained in this conference report, at an authorization level of $2.4 billion per year, a number of South Dakota's smaller communities will now have the opportunity to make similar progress.

Mr. President, we would not be here today were it not for the efforts of the distinguished chairman of the Environmental Pollution Subcommittee, Senator CHAFEE. As the distinguished chairman of the full committee and others have stated, the Senator from Rhode Island is a valued member of our committee. We owe him a debt of gratitude for enabling us to reach this point.

In conclusion, I wish to express my strong support for this conference agreement. It is a balanced, fiscally sound approach to our Nation's water quality needs. I certainly hope Presi-

dent Reagan will agree that this legislation is indeed in the best interest of the American people, and will sign the Clean Water Act Amendments of 1986 at the earliest possible opportunity.

Mr. KENNEDY. Mr. President, I rise in support of S. 1128, the Water Quality Act of 1986. This bill will provide vital funding for communities to initiate and continue projects designed to combat pollution. In the past, insufficient money has been directed to antipollution construction and rehabilitation projects. With the enactment of this bill, communities across the country will have the resources to construct technologically advanced facilities that will address the growing problem of pollution facing cities and towns across our country.

I am especially pleased that the bill contains $100 million for the clean-up of the Boston Harbor. Few cities have a natural resource as magnificent as the harbor of Boston. It is a unique asset that has witnessed a significant part of the Nation's history. With its 180 miles of scenic shoreline, its 30 islands, and its thriving port facilities, it is a priceless economic and environmental treasure for the 3 million citizens of the area. As the city of Boston has prospered economically, the harbor has flourished too—but it has also been vulnerable to abuse and neglect. Today's antiquated sewerage facilities are inadequate to meet the demands of modern industrial and residential growth. The resulting pollution and decay has threatened the natural beauty of the harbor and jeopardized the prospects of future growth. For years, leaders in the city have recognized that a day of reckoning was imminent.

In 1977, I first introduced legislation to establish the Boston Harbor National Recreation Area, in order to revitalize the harbor and preserve it for the use and enjoyment of the public. In the years since then, we have moved closer to the goal of a harbor that is both economically prosperous and environmentally clean.

Now, with the new provision in the Clean Water Act, we have the chance to take another significant step. A clean, beautiful, prosperous harbor is within reach, with lasting benefits for Massachusetts, the Nation, and future generations.

Mr. HECHT. Mr. President, I voted in favor of the conference report on the Clean Water Act, although I have some misgivings about the provision relating to Indian tribes.

As I understand it, the conference report would give Indian tribes the status of States for purposes of setting water quality standards on waters that flow through both Indian and non-Indian land. This sounds good, but could lead to situations where a tribe might set an unreasonable standard in order to get leverage over a city on an unrelated matter, or to force a city to make water quality expenditures that would otherwise be considered unnecessary.

However, the conferees have assured me that the Administrator of EPA would settle any dispute between State and Indian tribe water quality standards, that the Administrator would take the economic consequences into account, and that he would not allow disputes over water quantity to cloud the water quality issue. Neither would the Administrator be expected to simply accept the more stringent of the Indian or State standard.

I further understand that any standard set by a tribe would be subject to judicial review, so a city or State that thought the tribe's standard was unfair, could challenge that standard in the courts.

With these assurances from the conferees, Mr. President, I feel comfortable supporting this measure.

Mrs. HAWKINS. Mr. President, I rise in strong support of the conference report on the Clean Water bill. This legislation is long overdue. The last major changes to the Clean Water Act occurred in 1981 and since then Congress has tried again and again, unsuccessfully, to pass further improvements to the act.

Absent of this reauthorization package, thousands of communities across the country will be unable to finance construction of secondary treatment facilities and will face State and Federal enforcement actions. We need this legislation to continue progress toward achieving fishable and swimmable water levels nationwide.

I am particularly pleased to note that section 317 of the conference agreement identifies Sarasota Bay for priority consideration under the National Estuary Program. This program is designed to identify nationally significant estuaries that are threatened by pollution, development, and overuse and to promote comprehensive planning for and conservation of such water bodies.

Sarasota Bay functions as the principal environmental resource in the Sarasota region. It is the centerpiece of Sarasota's $900 million economy. It contains a wide variety of seagrass and marine life. However, these precious resources are seriously threatened by point source discharges. The bay is a unique, shallow and slow moving estuarine system with little flushing. Pollutants are retained in larger quantities for longer periods of time, thus requiring more detailed management.

Existing sources of pollution in the bay are multifaceted: major urban development along the shoreline; nonpoint runoff from land development upstream; saltwater intrusion; sewage discharge; and boating use.

The management conferences established under the National Estuary Program would develop comprehensive conservation and management plans which recommend priority actions for the control of point and nonpoint sources of pollution in threatened estuarine systems. The conference report provides $12 million annually for these management conferences to conduct research, monitoring and modeling.

Estuaries are sensitive and diverse ecosystems. Their range of fish and wildlife species and their proximity to large urban areas provide numerous recreational and economic opportunities for millions of Americans. This conference report will provide better protection for these delicate resources.

Mr. WEICKER. Mr. President, I would like to take the opportunity to congratulate my colleagues on the Environment and Public Works Committee on their exhaustive efforts to reauthorize one of the most important environmental laws that Congress has ever contemplated. Mr. President, the dream of one day finding our Nation's lakes, streams, and estuaries clean and safe for all could not be realized without such legislation and efforts of the committee.

This bill is a significant renewal of our commitment to fight water pollution. $19.96 billion over the next 8 years is authorized with $3 billion committed for this fiscal year alone. In its traditional mission, a revision to the Sewer Construction Grants Program was agreed to. My own State of Connecticut will continue to receive over $29 million a year to construct treatment plants to protect the rivers of Connecticut from untreated sewage. Creation of construction revolving loan funds will allow funding of treatment plants throughout the country in the future.

With the reauthorization of the Clean Water Act, many new features have been incorporated into the program. For example, the Estuaries Program is established to address the pollution and health threat that is found within our Nation's estuaries. Within Connecticut, it has long been recognized that combined sewer overflows and failures to conduct a coordinated effort in studying and cleaning up Long Island Sound has led to a degradation of Connecticut's rivers and the sound and increased the risk to the States inhabitants. With the work of Senator CHAFEE and others, I feel that a significant step is being made today in focusing efforts on our Nation's estuaries.

Other provisions of the act are particularly noteworthy. This bill authorizes $400 million for a new, State-Federal program to control nonpoint source pollution—polluted runoff from the cities and rural areas of this country. Focus on this form of pollution is especially important since it is esti-

mated that half of all water pollution is from these nonpoint sources. Efforts to cleanup the Nation's lakes will receive $85 million within this reauthorization.

In closing, I would applaud my colleagues' efforts in producing this reauthorization. It is my hope that this bill will be rapidly signed into law to demonstrate congressional concerns for the environment of this country.

Mr. LAUTENBERG. Mr. President, I rise in support of the conference report on S. 1128, the Clean Water Act Amendments of 1986. This legislation, which the House passed by a vote of 408 to 0, is a significant step forward in protecting this Nation's waterways, and deserves our support today. And I commend the conferees for their hard work on this measure.

The bill is supported by environmentalists, water system construction companies, labor, and various industry groups. Unfortunately, however, as is the case with Superfund, there are indications from the White House that a veto may be forthcoming. The administration wrongly asserts that the bill's authorization for construction grants is excessive. These claims ignore the large tasks ahead for cleaning up this Nation's waterways and the fact that the $18 billion authorization is spread over a long period of time.

Mr. President, a veto would be out of step with the will of Congress and of the Nation, and I urge the President to sign this bill.

Indeed this is a nation committed to the principles embodied in this conference report. In the early 1970's the people of this country made a fundamental decision that they wanted a concerted effort to clean up the Nation's waters—waters that are used for fishing, swimming, recreation, and drinking water.

This decision was made because of our growing awareness of and concern about water pollution. News accounts told us about Lake Erie being "dead," the polluted Cuyahoga River in Ohio so filled with oil and debris that it caught fire, millions of gallons of raw wastewaters being dumped into the country's major rivers, such as the Hudson River, and many fish kills and oil spills.

The Congress responded by passing the Federal Water Pollution Control Act Amendments of 1972. This act established a goal—to restore and maintain the integrity of the Nation's waters—which captured the essence of the Nation's desire for clean water.

Mr. President, during the 13 years this act has been implemented, impressive strides have been made in cleaning up our Nation's waters. But much remains to be done. The Clean Water Act Amendments of 1986 include a number of provisions which address problems which are preventing us from achieving the goals of the Clean Water Act. The conference report also addresses a problem on which Congressman HOWARD and I have labored long and hard.

This legislation adopts a provision from a bill I introduced, S. 1838, and which Congressman HOWARD sponsored in the House, that prohibits new entrants from dumping sewage sludge at the 106-mile site, off the coast of New Jersey. This provision will clearly preclude any attempt by Boston to use this site. Although Boston had decided not to pursue this course of action, the court reviewing Boston's sewage disposal procedures had not spoken with finality on the question, and was apparently looking for some action from Congress on this question. Congress has indeed spoken, and Boston's plans, as well as those of any other municipality, to dump sludge off New Jersey's coasts are now clearly and unmistakably off limits.

Also of great importance is future funding for the Construction Grants Program. Since passage of the Clean Water Act in 1972, Federal, State and local sources have invested more than $56 billion in municipal wastewater treatment facilities resulting in the construction or improvement of approximately 3,500 treatment facilities. Properly running sewage treatment facilities are an essential component for cleaning up the Nation's waters. For example, sewage treatment plants in 1983 were removing 65 percent more of the two principal conventional pollutants—suspended solids and biological oxygen demand—than they were a decade earlier.

Yet it is clear that the existing Construction Grants Program is inadequate to meet remaining national needs. According to EPA, eligible construction needs through the year 2000 are $53 billion. Ineligible needs, those needs not eligible for Federal funding under the Clean Water Act, those needs not eligible for Federal funding under the Clean Water Act, are more than $50 billion. According to estimates, New Jersey alone has $4.5 billion in eligible funding needs. New Jersey only receives approximately $100 million per year in existing Federal construction grant funding. Therefore it is imperative that we implement a new method of financing sewage facilities. A creative framework, which had its origins in New Jersey, is the concept of revolving loans.

The Clean Water Act Amendments of 1986 adopted this concept and will move us closer to the goal of providing an adequate source of stable funding for sewage treatment facilities. S. 1128 would authorize $18 billion over 9 years of Federal sewer construction grants and loans. Under the bill, the Federal Government will gradually reduce categorical grants for sewage treatment facilities as it phases in a program of grants for States to capitalize State revolving loan funds.

These funds will provide the capital for municipal wastewater treatment facilities in the future. States can make low or no interest loans available to communities for construction of treatment facilities. As loans are repaid to the State revolving loan funds, the funds will be able to loan money to additional communities.

In addition, Mr. President, this bill will help spur the construction of needed sewerage facilities. In the case of municipalities which proceed to begin construction with their own funds, refinancing is permitted from a State revolving loan fund. Presently, most municipalities wait until it is their turn to receive Federal construction grant funding before they begin constructing needed facilities. This refinancing feature of the Revolving Loan Program would eliminate the disincentive for municipalities to move ahead quickly with construction that now exists with the grants program.

Municipalities are facing a 1988 deadline for installing sewage treatment facilities which provide secondary treatment. EPA has threatened to restrict development in municipalities which are not in compliance with the 1988 deadline. New Jersey imposed sewer bans in many municipalities and has warned others that they face such bans if the discharge from their sewerage plants will not comply with requirments of the Clean Water Act. The reimbursement provisions in the conference report to S. 1128 should stimulate cities to meet the 1988 deadline.

Under the bill, States will have to enact legislation to give a legal entity of the state the powers prescribed in the act. During consideration of S. 1128 in the Environmental Pollution Subcommittee, the committee agreed that this legal entity can be an existing or new State entity or agency. When the States enact legislation to implement State revolving loan funds, they will have the flexibility to determine how the fund will operate subject to the requirements of this provision of the Clean Water Act.

For example, States would be able to establish loan terms based on the financial needs of municipalities with easier loan terms available to poorer municipalities. States can decide to initiate their loan funds prior to fiscal year 1989, the year they are required to do so. When States enact revolving loan legislation, they can determine whether to begin using their construction grant funds to capitalize their revolving loan funds prior to fiscal year 1989 and if so, under what terms.

Mr. President, I believe that the revolving loan concept contained in the bill will provide a stable source of funding for the construction of sewerage facilities while providing states

with the flexibility to minimize the financial burden of these facilities on local municipalities.

The Clean Water Act amendments only slightly revised the allocation formula for construction grants. I would have preferred the Senate approach, which would have provided New Jersey with $15 million more in grant funds. But New Jersey stands to receive approximately the same amount it has been receiving—up to about $100 million—in such funds under the conference agreement.

The conference report to S. 1123 also includes S. 30, the Raw Sewage Abatement Act of 1985. This legislation, which I sponsored, limits the discharge of raw sewage by New York City. At the time I introduced this legislation, New York City was the only major municipality in the country which still discharged raw sewage and wastewater into surrounding waters, without preliminary treatment of its wastes. It did so because of the absence of sewage treatment facilities in two major drainage areas in New York City. Two court ordered deadlines to cease this practice were disregarded by the city.

The provision that I sponsored imposed a cap on raw sewage discharges from the drainage areas in New York City which were without treatment plants, if the city failed to meet the deadlines for achieving advanced preliminary treatment contained in its current consent decree. If these deadlines were met, the cap would be unnecessary because all raw sewage discharges will cease. If the city failed to meet these deadlines, a cap was to be imposed in the drainage area in violation of the decree. It was to stay in effect until the city brought the affected plant on-line and it operated successfully for 6 months.

The imposition of a cap on raw sewage discharges upon a violation of the consent decree in effect said to the city of New York, "You cannot continue to grow without restraint if you cannot treat your wastes."

Upon violation of the cap, the city would be subject to the enforcement provisions in section 309 of the Clean Water Act. These penalties would be addition to those provided for violation of the consent decree. They include tough civil and criminal penalties, and would enable EPA to seek a temporary or permanent injunction against the city, to bring civil actions against the city and to initiate criminal prosecution in cases of negligence or falsificaiton of records.

With the changes adopted in the conference report, to section 309 of the Clean Water Act, a violation of the cap imposed by this amendment could result in substantial penalities of up to $50,000 a day. A violation stemming from a criminal conviction could lead to imprisonment.

Finally, Mr. President, the legislation states that it is the sense of the Congress that EPA should not extend the deadlines in the city's existing consent decree any further.

I am pleased to note that following the adoption of my amendment, New York City come into compliance with court-ordered schedules for construction of its North River and Red Hook sewage facilities. North River is currently on schedule to attain secondary treatment by 1991. Red Hook is on schedule to attain primary treatment by 1989. While Red Hook is on schedule, the fact that it is not operational means that discharge of raw sewage into the East River still continues. This legislation will ensure that New York's facilities stay on present compliance schedules, with no more extensions, and move us toward eliminating the dumping of raw sewage in the waterways of New York and New Jersey.

New Jersey has had its share of water quality problems. But not one New Jersey municipality is discharging raw sewage. Treatment plants in northern New Jersey are all achieving advanced preliminary treatment, and the major plants serving northern New Jersey are achieving secondary treatment.

The New Jersey Department of Environmental Protection has imposed numerous sewer hookup bans in a number of New Jersey municipalities to improve compliance with the Clean Water Act. Several communities may finance the upgrading of their sewage treatment plants to secondary treatment without any Federal or State aid. In some cases, the Department of Environmental Protection in New Jersey required private sector parties to contribute to local efforts to upgrade sewage treatment facilities as the price of securing a sewer hookup permit and proceeding with planned development.

Mr. President, New Jersey and New York do not need to grow at each others' expense. Regional growth is good for both States. By the same token, Mr. President, this growth should be accompanied by appropriate environmental protection. It must not come at the expense of the environment. It must not come at the expense of New Jerseys tourist and commercial and recreational fishing industries.

Mr. President, these provisions in the conference report on S. 1128 will provide strong incentives for New York City to keep complying with its consent decree and bring its sewage treatment plants on line as quickly as possible.

The conference report on S. 1123 contains a number of other provisions which will strengthen this Nation's effort to clean up its water. These include:

Establishing a new program for cleaning up toxic "hot spots"—waters that will not meet water quality goals even after industrial dischargers have installed the best available cleanup technologies required under existing law;

Requiring States to develop plans for combating nonpoint source pollution, such as polluted runoff from city streets and farmland. Conferees agreed on a $400 million authorization to help States implement the plan;

Restricting the use of fundamentally different factor waivers from national discharge standards;

Prohibiting, except in certain narrowly defined circumstances, so-called "backsliding," or weakening of cleanup standards when industrial and municipal discharge permits are renewed or reissued;

Establishing a national estuary program to solve pollution problems in interstate estuaries such as Delaware Bay and the Hudson-Raritan estuary;

Requiring EPA to establish toxic contaminant criteria for sewage sludge use and disposal and to establish a public health and environmental protection basis for these criteria;

Authorizing a total of $85 million for lake water quality activities, including $30 million for the Clean Lakes Program and $15 million for acid mitigation projects; and

Retaining the existing law's requirement that discharge permits be renewed every 5 years. The House bill would have extended the permit term to 10 years for certain discharges.

Mr. President, I believe that enactment of the Clean Water Act Amendments of 1986 represents a positive step in the Nation's effort to clean up its water resources. Again, I commend the conferees that worked so hard to bring this bill to the floor. I urge the President to sign this bill.

Mr. STAFFORD. Mr. President, at this point I ask unanimous consent that the Senate recede from its disagreement to the amendment of the House to the title of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STAFFORD. Mr. President, I am prepared to yield back the remaining time on this side.

Mr. MITCHELL. Mr. President, I yield back the remainder of our time.

The PRESIDING OFFICER. All time has expired.

Mr. STAFFORD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

On this question, the yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

I further announce that, if present and voting, the Senator from Idaho [Mr. SYMMS] would vote "yea."

Mr. CRANSTON. I announce that the Senator from Ohio [Mr. GLENN] and the Senator from Colorado [Mr. HART] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 96, nays 0, as follows:

[Rollcall Vote No. 347 Leg.]

So the conference report was agreed to.

□ 1230

Mr. STAFFORD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The distinguished majority leader.

Mr. DOLE. May we have order?

The PRESIDING OFFICER. The Senate will be in order. The Senators will take their seats. The Senate will be in order. Senators will cease conversations. The distinguished majority leader is recognized.

Mr. DOLE. Mr. President, if I could have the attention of my colleagues, I would like to make some statement on the program.

The PRESIDING OFFICER. The Senate will be in order.

Mr. BYRD. Mr. President, the Senate is not yet in order.

The PRESIDING OFFICER. The Senate is not in order. The majority leader will not proceed until the Senate is in order. He has important announcements to make. We would like to hear about what the program is for the rest of the day.

The distinguished majority leader.

Mr. DOLE. Mr. President, first let me thank the managers of the bill which we just passed. That is another one off the laundry list we have before we can adjourn sine die. It is a major piece of legislation. It was disposed of in less than an hour. As I understand it, we are back on immigration.

The PRESIDING OFFICER. That is correct.

Mr. DOLE. I understand there will be a budget waiver vote on that hopefully almost immediately. Then if we can reach some time agreement on that, we would like to do that.

If not, I promised the distinguished Senator from Iowa that he would be recognized to offer a resolution and an up or down vote. I hope that will not take much debate. At least we will have the vote.

Then we will turn to the continuing resolution. I hope we might be able to complete that rather rapidly. There could be four or five amendments, and maybe more that would require votes. That would leave only the reconciliation package, the debt ceiling, and other matters that may come over, conference reports and maybe other wrap-up matters that we can obtain consent from both sides.

Again, I believe it is possible if we continue to work as we have done since 9 o'clock this morning to really be in a position to tell Members late this evening that we might get out of here tomorrow sometime.

I want to thank all my colleagues for their cooperation.

□ 1240

I sort of sense that people have decided that it is about time to leave. One thing we hope to determine before we do that, of course, is whether or not the Superfund legislation will be signed. Again I would encourage my friends to sign a letter that I have circulated. It would be very helpful.

Mr. HATCH. Will the Senator yield?

Mr. DOLE. I yield.

Mr. HATCH. Under certain circumstances with some of the amendments in disagreement, it may be that that will take a little longer than contemplated. I hope not. I hope we can resolve these difficulties. But the issues are important, as the majority leader suggested.

Mr. DOLE. Let me indicate, I have discussed one particular item with the Senator from Utah, Senator HATCH, and I know of his concern. I hope that can be resolved in a satisfactory way.

Mr. BYRD. Will the Senator yield?

Mr. DOLE. I am happy to yield.

Mr. BYRD. I wonder if we can get a time limitation on the resolution which Mr. HARKIN will call up which will provide for no amendments.

Mr. DOLE. I think last evening he was agreeable to 10 minutes.

I ask unanimous consent that when the resolution of Mr. HARKIN is called up there be 20 minutes, equally divided, with no amendments to be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. I would guess that could be pretty much the same resolution that we had yesterday.

Mr. STAFFORD. Mr. President, while the Senators are here and the leaders are here, I hope we might know the disposition of the White House on the Superfund. I would hope it might be possible for this body to stay in session, possibly pro forma, long enough so that a pocket veto would not occur. I would volunteer to be one of those who would remain around here, if that becomes a necessity.

Mr. LEAHY. Will the Senator yield?

Mr. DOLE. I yield.

Mr. LEAHY. I join with my distinguished colleague from Vermont. The senior Senator from Vermont has put together not only a superb piece of legislation but a bipartisan package. I have signed a letter which he and Senator DOLE have circulated. I would hope that others, Democrat and Republican, would sign the same letter. Then we might be able to get the President to agree to go along with this legislation. If not, I, for one, am prepared to come back for a vote on the veto override.

Mr. EXON. Will the majority leader yield for a question on another important matter, while the senior Senator from Vermont is here? Where are we on the highway bill?

Mr. DOLE. We are in the middle of the road.

Mr. STAFFORD. If the majority leader will yield to me, Mr. President, we are about to meet with the conferees in the House once more on the highway bill. I see my colleague and able Senator from Texas, Senator BENTSEN, is here, and I would say that the two Houses are far apart. We are far apart on demonstration projects, the 85-percent minimum, highway beautification, and one other which escapes me at the moment.

The other one is the speed limits. We are having great difficulty making any progress in those areas.

Mr. EXON. I thank the Senator.

Mr. BENTSEN. We have had an overwhelming majority for the bill in the Senate. We have found that we are getting nowhere at all in the House. I am not at all hopeful.

IMMIGRATION REFORM AND CONTROL ACT OF 1986—CONFERENCE REPORT

Mr. DOLE. Mr. President, a parliamentary inquiry. What is the pending business?

The PRESIDING OFFICER. The motion to waive is the pending business.

Mr. DOLE. The budget waiver has been filed?

The PRESIDING OFFICER. It is pending.

Mr. DOLE. Have the yeas and nays been ordered?

The PRESIDING OFFICER. They have not been ordered.

Mr. DOLE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, we are about to have a vote on waiving the budget point of order. I want to be sure that everybody understands exactly what we are voting on here, not just technically what we are voting on, but what we are committing ourselves to.

Let me begin, Mr. President, by talking about the technical point of order.

The technical point of order here is a 303 point of order and it has to do with creating an entitlement in a year when no budget has been adopted.

The great wisdom of this point of order has been borne out many times in the last 20 years, as Congress has created entitlements in the future only to find when the future arrives that tremendous amounts of money have been obligated without anybody ever taking into account how they are going to pay for the program.

Mr. President, there is an additional point of order that may lie after the continuing resolution is passed if the adoption of this bill pushes us above the aggregate limits set out in the budget; that would be a 311 point of order, which would require 60 votes.

Were it not for the Long exception, there would be a third point of order and that point of order would be that this makes appropriations in a year for which no budget has been adopted.

We have come to a procedure which allows us to circumvent that. But I would ask my colleagues to take into account on this vote that a point of order would lie in 1988 on expenditures committed under this bill, but this bill would already be law. So by waiving the 303 point of order here we are committing ourselves not just to a new entitlement, but to new appropriations in 1988 and beyond.

What kind of money are we talking about here? What kind of decision are we making?

Let me remind my colleagues that we are under a binding constraint in the Gramm-Rudman-Hollings law that requires that the deficit be reduced to $108 billion next year and then reduced in three equal steps to zero in fiscal year 1991, calendar year 1990.

My purpose in asking for this vote is that if we waive this point of order and commit to move ahead with the immigration bill, which we may or may not choose to do, I want our colleagues to be on record. That way no one can come back next year or the year after and say, "Well, we cannot meet the targets of Gramm-Rudman because of the immigration bill."

I want everybody to be on record, if we waive this point of order today, that we know what we are committing to down the road, when a benefit has to be cut from some powerful interest group.

□ 1250

When people who are in need or who have entitlements are denied, or when some come forward and say we have to raise taxes because nobody anticipated what the immigration bill would cost, I want people on record as to where they stand on that issue.

Let me tell you how much money we are talking about, Mr. President. In the immigration bill, we have direct appropriations, appropriating on an authorization bill, of $4 billion in fiscal years 1988, 1989, and 1990; $4 billion in direct appropriations. We also have new entitlement programs which lie under the 303 point of order in addition to that.

In addition to both the new entitlement creation and direct appropriations made by this bill—appropriations that do not have to be contained in legislation adopted in fiscal years 1988, 1989, 1990, or 1991 in order for the taxpayers' money to be expended—in addition to the $4 billion of direct appropriations and the creation of new entitlements, we also have in this bill many actions that will lead to appropriations next year and through 1991 and in the future. In fact, we have had estimates on the cost of this bill overall, just in terms of the assumptions the bill makes—very conservative assumptions. The House bill was estimated to cost as much as $9 billion.

I submit, Mr. President, that we really do not know how much money we are talking about. We know this bill will legalize between 4 and 5 million people who are illegal aliens in the country today.

We are all familiar with the process it sets up, a process that means that if people were here prior to 1982—or can get a sufficient number of people to say they were here—then they move to become permanent resident aliens. Then, they are eligible for some forms of Medicaid, they are eligible for State and local welfare in the Federal portion of some of those programs. They are not initially eligible for AFDC, but they become eligible for AFDC.

However many people out of the initial 4 or 5 million are going to opt for those benefits, how much they are going to cost the taxpayers, I submit, Mr. President, nobody has the foggiest idea.

In addition to the 1982 legalization date, we are committing ourselves to one of the most bizarre proposals that I have ever seen in legislation adopted in my 8 years in Congress. I intend to debate this at great length as we debate the bill itself, but I have to allude to it here because it reflects on this budget figure. If someone worked in New Mexico or Texas or Arizona or California or anywhere else in agriculture only 90 days last year—just 90 days—they are eligible for permanent status. They move on track to become permanent resident aliens; they qualify for certain Medicaid benefits and certain State and local benefits on a faster track, then they ultimately qualify for AFDC.

I submit, Mr. President, that we have not the foggiest idea what that kind of amnesty is going to mean in terms of outlay on this bill. Now, so this is not the point at which I intend to have extended debate on these issues. I do intend to debate them at a later point because I think they are important. I realize that the odds of this bill passing and becoming law are overwhelming, but I am deeply concerned about it, and I think that Members of this body should hear full debate and they will.

The point of order that we will vote on here technically as a 303 point of order is a point of order that relates to new entitlements being created. Because of the Long exception, we are going to look the other way on $4 billion of appropriations in this bill over the next 4 years.

I ask my colleagues on this vote to realize that they are not just voting on this technical 303 point of order. This point of order may be the only one that we get an opportunity to vote on. What we are voting on here is, are we willing today to commit ourselves to waive the budget to commit a minimum of $4 billion in appropriations on this bill alone, without any other action on the part of the U.S. Congress in the future? Are we willing to create entitlements in the future, with

no clean-cut way of measuring what they are? And in addition, are we willing to say that under Gramm-Rudman over the next 4 years, we are going to cut domestic programs to pay for these things as 4 to 5 million people initially move to permanent resident alien status and qualify for some Medicaid benefits, some welfare benefits, and ultimately qualify for AFDC?

No one knows how much that is going to cost. I simply think it is important that we have a vote on waiving the Budget Act so that next year and the year after and the year after, when there are those who stand up and say we cannot meet the requirements of Gramm-Rudman because nobody ever knew what the immigration bill was going to cost, nobody ever told us, we will have it on the record.

Or when the time comes in the future to pay for this, are we going to have to cut the heart out of the family budget by raising taxes because, it will be said, nobody anticipated this, this was an act of the gods—I submit that it is not an act of the gods. It is an act that we are committing here today if we vote to waive 303 of the Budget Act.

I ask my colleagues to look at this bill. This is not a bill that we previously voted on. This is not just a bill that sets up blanket amnesty from 1982 on, no matter what you may think of that. I can assure you the American people do not support it. But this is a new and extraordinary bill that would move toward legalization of people who worked in this country for only 90 days—only 90 days. It has been a long time since I got married, but my guess is that there are some places where it is harder legally to get married than it is to move toward citizenship of this country and toward the benefits produced by the fruits of the labor of the working men and women in this country.

So when asked to vote for this waiver, Mr. President, I am giving people an opportunity to say here and now, whether we are willing to commit ourselves to billions of dollars of expenditures, knowing that under Gramm-Rudman, we will have to cut other benefits for citizens of the country?

Or are we committing ourselves to raise taxes on the working men and women of America as we set aside this budget waiver? I, therefore, ask my colleagues to vote not to waive section 303 of the Budget Act, to stand fast against this commitment of expenditures.

Mr. SIMPSON. Mr. President, I think that we should go to this vote. Senators heard the comments of Senator DOMENICI before. I share with my friend from Texas that I am perfectly willing to support a move to make these entitlement programs subject to the appropriations process. I am committed to that, but we are unable to do that in this conference report.

With that, the yeas and nays have been requested, Mr. President I think it appropriate that we go forward and vote on the waiver. I ask for that vote.

The PRESIDING OFFICER. Is there further debate? There being no further debate, the question is on agreeing to the motion to waive section 303 of the Budget Act.

The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

I further announce that, if present and voting, the Senator from Idaho [Mr. SYMMS] would vote "nay".

Mr. CRANSTON. I announce that the Senator from Ohio [Mr. GLENN] and the Senator from Colorado [Mr. HART] are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 75, nays 21, as follows:

[Rollcall Vote No. 348 Leg.]

YEAS—75

Andrews	Goldwater	Metzenbaum
Baucus	Gore	Moynihan
Bentsen	Gorton	Murkowski
Biden	Grassley	Nunn
Bingaman	Harkin	Packwood
Boren	Hatfield	Pell
Boschwitz	Hawkins	Proxmire
Bradley	Heinz	Pryor
Bumpers	Hollings	Quayle
Burdick	Inouye	Riegle
Byrd	Johnston	Rockefeller
Chafee	Kassebaum	Roth
Chiles	Kasten	Sarbanes
Cranston	Kennedy	Sasser
D'Amato	Kerry	Simon
Danforth	Lautenberg	Simpson
Dixon	Leahy	Specter
Dodd	Levin	Stafford
Dole	Long	Stennis
Domenici	Lugar	Stevens
Durenberger	Mathias	Thurmond
Eagleton	Matsunaga	Trible
Evans	Mattingly	Warner
Exon	McConnell	Weicker
Ford	Melcher	Wilson

NAYS—21

Abdnor	Garn	McClure
Armstrong	Gramm	Mitchell
Broyhill	Hatch	Nickles
Cochran	Hecht	Pressler
Cohen	Heflin	Rudman
DeConcini	Helms	Wallop
Denton	Humphrey	Zorinsky

NOT VOTING—4

Glenn	Laxalt
Hart	Symms

So the motion was agreed to.

□ 1320

If there is no further debate, the question is on the conference report.

Mr. GRAMM. Mr. President, I make a point of order: A quorum is not present.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SIMPSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so orderd.

Mr. SIMPSON. Mr. President, I move to reconsider the vote by which the motion to waive the Budget Act was agreed to.

Mr. SIMON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SIMPSON. Mr. President, let me just make a brief statement.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. SIMPSON. Mr. President, on October 14 of this year a conference committee of the House and Senate favorably reported a compromise version of the immigration bill.

This committee consisted in the House of Congressman RODINO, chairman of the House Judiciary Committee, Congressman HAMILTON FISH, Congressman MAZZOLI, Congressman LUNGREN, Congressman SCHUMER, Congressman PANETTA, Congressman BERMAN, and other five people who have been working diligently and with extraordinary effort toward resolving the issue of illegal immigration.

In the Senate, our fine and respected chairman, Senator THURMOND, was extraordinarily important in his role as chairman of the conference committee. It consisted of Chairman THURMOND, myself, Senator DENTON, Senator METZENBAUM, Senator KENNEDY, Senator MATHIAS, and Senator SIMON.

There were 31 House conferees and 7 of us from the Senate.

I can only assure you that a great many terribly tough issues were confronted there and tough issues were hammered out under the twin hammers of some pretty heavy debate and some spirited discussion.

All of the nine major issues were resolved by the members with dispatch. There were some 91 other differences where staff recommended changes and the members in most cases agreed to them.

The bill reported by the conference—and I assure my colleagues that this is correct—contained the same essential elements that had passed this body, this Senate in years past by a vote of 80 to 19, by a vote of 76 to 18, and by a vote of 69 to 30.

Those essential things are employer sanctions, meaning penalties against those who knowingly hire illegal undocumented persons, a secure system to determine worker eligibility in the United States, an increase in the enforcement resources of the Immigration and Naturalization Service and the border patrol and legalization.

Under this conference committee report the resources of the border

patrol will double together with assuring additional sums for the INS to perform their functions.

We provide a program for agriculture workers and a legalization program.

There were some issues indeed that I felt very strongly about, having worked in the area for so long, and yet I receded on certain segments along with the rest of my Senate conferees because of the strong feelings on the part of the House.

The House had some very strong feelings on extended voluntary departure. They receded there. Congressman JOE MOAKLEY presented his case magnificently and yet did not wish to slow the process of this bill and withdrew that subject to orderly processing of it next year.

Mr. RUDMAN assumed the chair.

Mr. SIMPSON. We have no cutoff date on employer sanctions. There is a legalization. That is very clear. The cutoff date for that was moved up to January 1, 1982.

Let me share with my colleagues that when we started this legislation in 1982, the legalization date was 1980. Now we have slipped the legalization date so that in this year, late 1986, the legalization date is January 1, 1982. I think that is quite fair and yet also more restrictive than what we started with. Because it is called legalization, or amnesty it seems to stick in the craw of Americans. I understand that. I do indeed, having grappled with this issue, as I say, an issue filled with emotion, fear, guilt, and racism.

But let me share with you that the alternative to legalization is to go hunt for them. If you couldn't find them coming in how do you find them to get them out? The alternative to legalization is deportation. And the only way you are going to find the persons to deport is to go find them.

And so I have often said to people who insist that this is a very treacherous thing, I say: Are you going to be part of the group that goes to a Mexican-American in Brownsville and taps on the door and says, "Are you deportable?"

I will skip that procedure. Because if that's what is demanded they can erase my name from this measure. Those that would not allow legalization know the alternative is deportation and hunting for them. That is what we would do. The hunt would be on. That is repugnant to me.

There were some other House provisions that were terribly troublesome to all of us. The House receded on them. The sunset on employer sanctions, extended voluntary departure, which as I said, was deleted. There are also some major provisions that this body has never considered before in as great a detail as we visited in conference.

Senator WILSON, Congressman PANETTA, and Congressman LUNGREN fashioned a proposal for temporary agricultural workers and then permanent resident aliens in agriculture. It grants temporary status to those who have performed 90 man-days of labor in agriculture alone during the previous 3 years in the United States—that must be 3 consecutive years—with the opportunity to convert to permanent residence after that time.

I think it would be interesting for you to know that Mexican nationals who come to the United States and obtain permanent resident alien status—which would then enable them to go into citizenship after 5 years—that the statistics of those who determined to go on to naturalize as U.S. citizens is between 5 and 12 percent. They do not go on to naturalize because they prefer to retain their citizenship of the United States of Mexico and yet have the full labor protection of working in the United States with a green card under permanent resident alien status. So I share that with you if you come to a concern about numbers, that through our history only 5 to 12 percent of these permanent resident aliens with 5 years or more already in toward citizenship ever go on to naturalize.

There is another provision that would create a new antidiscrimination agency in the Justice Department. It will be under the control of the Attorney General. The principal officer will be appointed by the President for a 4-year term. It would handle the issue of citizenship and national origin discrimination. It is very carefully tied down in the statement of managers to the effect that it is not to be a tool for harassment of employers. In no way will it be so. It is not a violation of the EEOC interpretation of title VII. The changes there do not open the door for additional expansion of discrimination based on sex or age or whatever it may be.

Neither of those provisions, I say, Mr. President, were something that I would have suggested or recommended, but it became quite apparent during the House and Senate conference consideration of this legislation that they were quite necessary for final passage.

So there is the package, Mr. President. I want to share with you that it is a work product of Congressman RODINO, who started with the issue in 1972, when he and the House passed employer sanctions without anything else, in an attempt to stop the exploitation of illegal, undocumented persons in the United States. Congressman RODINO and I were on the Select Commission on Immigration Refugee Policy. Senator MATHIAS, Senator DECONCINI, Senator KENNEDY, and myself served 2 years on that commission under the sterling leadership of a lovely friend father Ted Hesbergh of Notre Dame. This is the basic work product of it.

I share with you that there are things in here that cause me concern. There are things that caused the other conferees concern. But, on balance, you have the very absolute, quintessential essence of immigration reform. You have employer sanctions, strong penalties, verification, work authorization, legalization, increased enforcement, and protection of the employer and the employee.

So this is the presentation I make to you. This measure passed the House yesterday, the conference committee report, by a vote of 238 to 173; some 65 votes, having never enjoyed a margin before of that nature. All of the things that are centerpiece of immigration reform are in this bill.

The bill would so significantly improve the status quo with regard to illegal immigration that a failure to act, I think, would be a tragedy. And I am not obsessed by this legislation. I have lots to do around this place. If it should not go, I would wait again and see what we could do the next time. I shared that with my colleagues in the House. But I think this would be a sadly missed opportunity.

I talked to the President of the United States this morning—a marvelous half hour. He has been my greatest ally in this cause. Every time someone would lay the snares and traps, I would say, "I have to talk to the President." He was always there—perceptive, warm, responsive—saying, "We need immigration reform. I am committed to it. I am going to stick with you."

And so it was said again this morning with a condition that we clarify—and Congressman RODINO is doing that in the House at this moment—clarify exactly again what the conference committee determined with regard to the Frank amendment; that it is not a tool of harassment, that it is not something to put depression upon the hearts of the employers of America.

Let me share with you briefly what that is because I think it is very important. There is no intent under the Frank amendment—and I want to commend BARNEY FRANK—for he started with a very critically high spirited piece of legislation 2 years ago and, in the course of it all, he was courteous and understanding enough to watch us amend and yet keep many of the basic things that he wished and yet assure us all that this was not to be a tool of harassment and that it did not change the EEOC and its coverages. And so this is what we are doing. The statement of managers indicates it. The statute indicates it with regard to attorneys' fees, so that if there is a just defense, they are not burdened with attorneys' fees.

There is no intent whatever—and I emphasize this with the body—to permit the use of the special counsel provisions of the bill to harass employers; that is agricultural employers, business employers, or any others.

Let me review with you the statement of managers on this point.

The antidiscrimination provisions of this bill will only provide the broadened protection while the employer sanctions are in effect. It ties it tightly to sanctions. If the sanctions are repealed—and we have a sunset provision here where we can repeal this particular proposal—if they are repealed by joint resolution under expedited procedures the antidiscrimination provisions will also expire. That triggers the expiration because the justification then for that Frank provision will also have been removed.

□ 1340

The antidiscrimination provisions would also be repealed in the event of a joint resolution approving a GAO finding that the sanctions have resulted in no significant discrimination or that the administration of the antidiscrimination provisions has resulted in placing an unreasonable burden on employers.

With this provision we sought to make vividly clear that harassment litigation will not be tolerated. And there are some activist groups in the United States who I think have been off in the wings kind of slavering at the chops, waiting for their opportunity to go find a whole new crew of plaintiffs to begin a whole new exercise against employers in their national efforts. This is wholly discouraged. It will be the subject of the most careful oversight by myself, and by Congressman RODINO.

In this regard the conferees also expect that GAO would specifically inquire into the issue of whether antidiscrimination mechanisms and remedies are being utilized in a manner that is inconsistent with their original purpose, which is of course to guard against employment discrimination based on national origin or citizenship status.

The conferees wish to strongly emphasize that the antidiscrimination provision has been included solely in order to respond to the fears and concerns expressed by some that employer sanctions will result in employment discrimination based on national origin or citizenship status. Thus, this is all so very important.

The antidiscrimination provision does not in itself in any way set any precedent for the expansion of other title 7 priorities, or protections.

Furthermore, nothing in this bill shall prevent the use of language being a bona fide occupational qualification. If employers need only employees who speak English or Spanish, whatever it may be, or Danish that is not affected here.

This is a very narrow provision intended to address only employer sanctions, and not to provide this avenue for activist groups and organizations to harass employers with nuisance suits. We specifically address this possibility in the conference report by providing the sunset provision which would be triggered if the Frank amendment were to create an "unreasonable burden on employers." I want the Senate to hear that and to be very clear or that point.

I see my colleague from Ohio in the Chambers. My colleague from Ohio is on the floor presently. I want to inquire of my friend from Ohio who has served with me as a conferee in two separate conferences. I owe my friend a great deal of gratitude. He has followed the issue more closely than anyone could possibly follow it and not be a member of the subcommittee. The subcommittee consisted of myself, Senator KENNEDY, Senator GRASSLEY, Senator DENTON, and Senator SIMON. It has been a remarkable group to work with. Senator METZENBAUM I think has heard what I have just now been saying about the Frank amendment and the intent of what we were doing, and what we intended to do. And I would inquire as to whether what I have stated is also in full agreement with the understanding of the Senator from Ohio.

Mr. METZENBAUM. It certainly is the understanding. I do not know of any provision that was given more attention, and more time, or more negotiation and more fair consideration by parties on both sides in order to try to craft it in a fair way to all parties concerned.

I have heard the manager of the bill spell out exactly what he understands the antidiscrimination provision to mean, and I think that he reflected the views of all of those who are on that committee and certainly the views of the Senator from Ohio.

Mr. SIMPSON. I thank the Senator from Ohio. I again appreciate his extraordinary work in conference.

With that, Mr. President, I will not go on to say anything further. Asking Senator SIMPSON about immigration reform is like asking Noah about the flood. It may get a long response. So I would not want to get started up fully because the task has been a consuming one for some 6½ years.

It is a topic that has been before us, before Congressman RODINO and I, Congressman MAZZOLI, Congressman FISH. Senator KENNEDY has been most helpful. He has never been able to actually come to the final determination of support but he has been of most extraordinary assistance, and has been always gracious in dealing with the issue since he comes from a State that is just shredded with some of the problems of illegal immigration. I understand his position fully. He has been very accommodating, and very up front.

Senator GRASSLEY has just been an extraordinary sidekick on this issue all the way through.

Senator SIMON is a new member of the subcommittee and has taken it on with great vigor and interest. And Senator DENTON has been so very steady and helpful and has paid particular attention and followed it closely.

As we present that committee effort I cannot help but reflect and comment that Senator STROM THURMOND has been such a marvelous supporter and a most extraordinary proponent. He is the impeller behind me and he never let it sit still. He would often urge, "You have to keep it moving, and you must keep going." He always pressed me on.

Senator BYRD has also been remarkable in this instance. He has rendered me continual encouragement. I commend him for his continuing support.

My courageous and able majority leader has been in my corner from the beginning. He stayed the course. Arranging floor time, offering sage counsel, clearing the path. I owe him more than I can repay. Thanks to them all.

Mr. HATFIELD. Mr. President, I wish to call attention to provision under section 204 of the Immigration Reform and Control Act pertaining to State legalization impact assistance grants. This section not only creates a new entitlement program, but appropriates $1 billion for each of the fiscal years 1988 through 1991.

It is my intention to amend this provision in a subsequent appropriations measure to make this entitlement funding subject to the annual approprations process.

Mr. SIMPSON. I certainly understand concerns that State legalization impact assistance grants be subject to annual appropriations, and that this legislation be in compliance with the Budget Act. At the same time, I stress the President's commitment to sufficient funding for this legislation, and seek assurances that every effort will be made through the appropriation process to provide the amounts required.

Mr. HATFIELD. I wish to express my full support for providing necessary appropriations to fully implement this legislation, and will do all I can to ensure that sufficient funding is made available.

Mr. SIMPSON. With that assurance I thank the senior Senator from Oregon for his support, and assure him of my support for his efforts to make this program subject to annual appropriations.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, I rise to support this piece of legislation which I think might more appropriately be called the ultimate patience bill because I do not think any piece of legislation in my time in the Senate has had more hours spent on it, more tedium, more negotiation, more conferences broken up and then reconvened, or more willingness on the part of the Members to give of themselves in order to bring about this piece of legislation.

I am sure that no immigrant, legal or otherwise, no agricultural employer, or any other kind of employer, no future citizen who is not now legally in this country, whose presence may be legalized by reason of this legislation, will ever appreciate the effort that has gone into crafting this piece of legislation. It is to my mind almost a miracle in happening.

Of course, the one man who has been the miraclemaker, in addition to those on the House side, has been the Senator from Wyoming, who I know from many other dealings with him—and I want him to pay attention to what I am saying—that he is not always so patient, is not always so relaxed, is not always that willing to negotiate, but in this instance you cannot believe how patient he was, how willing he was to work back and forth, how willing he was never to throw up his hands and say, well, that is it, I am walking out.

I think it is a real tribute to him that the House has now passed this bill; and barring any unforeseen developments, which I would not anticipate in view of the vote on the motion to waive the Budget Act, I think it will become law with the President's signature affixed to it.

It is a real tribute to ALAN SIMPSON, and he has a right to stand tall and proud because in addition to all other factors that must be considered we must recognize that this is not a special kind of Wyoming problem. My guess is that there are not 50 votes in Wyoming that are really concerned one way or the other about the passage of this particular piece of legislation, but it was an example of his perseverence, his dedication, and his willingness to work with a host of groups, each one of which had their own position to sell. And he listened to them all, and worked with them all. And he and Congressman RODINO, and so many others on the House side whom he has already mention, have brought about this legislative development.

It was an exceptional effort to craft a bill. In all candor it is not a perfect bill. If you were to ask me to draft a more perfect bill, I think I could do it. But that legislative process is a process of giving and taking. It is a process of compromise.

□ 1350

I stand before this body and say it is not a perfect bill, but it is a good bill, a very good bill under the circumstances. In my view, it is too generous to the Western growers. I think we gave away a lot of the whole ballpark. But that was the price of being able to finally have a bill, and I think the totality is worth far more than some of the component parts.

Political reality is that the growers demanded concessions, and the growers had many spokespersons who were on the conference committee and many in the House, some in the Senate, who were concerned about their problems. I find no fault with their looking out for those growers. But I say for one that I think we went too far. Having said that, I think it is the price we had to pay to get this bill.

I believe that the good provisions outweigh the bad provisions.

I believe in the last analysis, when all is said and done, the crux of the issue, the real issue, is the question of gaining control of our borders, gaining control of our borders so that you will not have, literally, hordes of people coming across in one part of our Nation while others strive so hard to be permitted to enter this country.

I remember when I was down on the Mexican border and I saw people walking across the border. I said, "Is this not incredible? We have people who want to come from other parts of the world who cannot come in. But here are people walking back and forth and you cannot do anything about it, except with employer sanctions."

For once, we will have employer sanctions in place, and they are tough employer sanctions. Those sanctions are a key part of the bill. Without it, I do not think the bill would be worth passing.

But you cannot have a policy of enforcing immigration control in this country unless you have some control over those employers that sign the paychecks for the illegal immigrants who want to work for them.

The bill provides amnesty for those who have been here since 1982. I think that is fair to them. I think it ensures a better quality of life. I think you can make an argument against it; you can make an argument for it. This is the compromise solution that we have been able to bring about which is in the bill, and I think it makes the bill a better bill by reason of it.

The strong antidiscrimination provisions which became one of the most controversial parts of the bill as I have already said were negotiated long and hard. They are in the bill. I think they are fair. I think the Senator from Wyoming has appropriately described those antidiscrimination provisions. I am satisfied that the fear of discrimination is not warranted because of the protections that are now in the bill.

I am frank to say, I am pleased that we have finally taken this step. I think it is a great day for the American people. I think that we have an obligation to do something about illegal immigration in this country. We have been talking about it and talking about it while more and more immigrants, illegal immigrants, poured across our border.

I think finally we are coming to grips with the problem.

Congress has faced up to the issue of controlling our borders in a fair and sensible way, and I hope that shortly we will get on about the job of passing this bill and send it to the President for his signature. It will be a job well done and we will all have a right to be very proud of our achievement.

Mr. GRAMM addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, let me begin by saying that I share many of the opinions expressed. I have a very high regard for Senator SIMPSON and the others who worked on this bill. This is a difficult issue. It is an issue that is emotion charged. It is an issue that will have profound impact on the country. It tries to deal with a problem which is a problem of crisis proportion. And it is an issue that in some way affects all of us, not just economically and socially, but because we are all people who have sprung as children and grandchildren and great-grandchildren of immigrants. My grandfather came to this country right after the turn of the century from Germany. My wife's father came to this country as an indigenous laborer to the sugar plantations, and her grandmother came as a picture bride. So I can identify with people who want to come to America, and I am very blessed, in a sense, as are all the others who are here in this body and many millions in the country, because their grandparents and great-grandparents came before there were any legal bars to coming to America.

My concern about this bill is not a concern about the sincerity of those who have written it. My concern is not a concern about the crisis proportions of the problem we face. The immigration problem is one of the most perplexing, difficult, and important problems in the country. It is a problem of crisis proportion.

Anybody who would assert that there is no problem clearly does not understand the problem.

That is not what we are debating here today. The debate on this bill is not a debate as to whether or not there is an illegal immigration crisis. Nobody knowledgeable of the problem or in their right mind could debate that subject, at least on the side of saying there is not one. The questions that this debate really boils down to

and the questions that I intend to pose as we move to a vote on this bill, are these:

Is this the best bill that can be written? Is there reason to believe that given one more try we cannot do better? Is there reason to believe that our colleagues and, in fact, our employers, the people of America, have their feet set in concrete on the amnesty provision? Is there reason to believe that the people of America really want these amnesty provisions, that they are the price we must pay to try to gain control of our borders?

I hope there are some who are persuaded that the answer is no by what I will have to say here, and hopefully what others will have to say.

The question is, Is this the best we can do?

I hear my colleagues talking about years of work. I have been here for 8 years and I have witnessed that work and I honor it and I respect it. But it reminds me a little of an old theory of value in economics that came into vogue with John Stuart Mills and with David Ricardo. It was called the labor theory of value. The theory was the longer something was worked on, the more labor it embodied, the more valuable it was.

Well, Mr. President, that theory of value was rejected long, long ago.

I ask my colleagues, do not judge this bill based on your respect for the people who did the work. If that were the issue, I would be a proponent of this bill.

Do not judge this bill based on the number of years we have worked on it. That is an indication of how difficult the problem is and how important it is, and, I think, an argument that after all that work we ought not to settle for this bill.

I ask my colleagues to judge this bill based on whether or not it solves the problem; whether or not it is the best we can do.

I would like to begin by talking about the amnesty provisions of this bill.

When we voted on this bill, we had amnesty provisions that sought to deal with a very real problem. What do you do about people who came here illegally, who have been here a long time, who have put down roots, who have become part of the fabric of our society?

The distinguished Senator from Wyoming talks about the alternative being expelling people from the country.

Well, I submit, Mr. President, the question ought to be put more clearly than that. The question is, who has put down roots? How much have they become part of the fabric of society?

Nobody is saying, no matter how we resolve the immigration issue, that there are not going to be some people who came here illegally, who, judged on any kind of individual merit basis, should not be allowed to remain in the country. In fact, we pass private bills every year making people citizens who came here 20, 30, or 15 years ago, who subsequently have served in the Armed Forces with great valor in defense of the Republic. It happens all the time.

No one is proposing, and I would never propose, that there are not any people who came here illegally who, because of their individual merit, because of what they have done since they came here, ought to be given permanent legal status. That is not the question. The question is, how do we decide who gets to stay? Of the people who violated the law in coming, who are in violation of the law by being here, who should get legal sanction to remain in America? That is the question. That is what the whole legalization or amnesty question is about.

I submit, Mr. President, that that is an important question. It is important for a lot of reasons. One of the reasons it is important is, just as was true when my grandfather and when many of your grandfathers came to this country, America is still a giant magnet of opportunity that attracts people to come here because they want to share in what we have. Mostly, they want to share in our freedom.

I thought it would be instructive in this debate to get records from the Immigration and Naturalization Service on how many people as of now have applied to come to America, how many people would like to come here legally if they were given the opportunity. I thought my colleagues would be interested in knowing that as of January 1986, 1,903,475 people from all over the world have sought through the legitimate channels to come to America. Many will have to wait for years, to hope and pray for the opportunity of coming to America under established patterns of immigration; 1,903,475 people. When we pass a bill that sets out a policy for legalization or amnesty, we are saying to these 1,903,475 people that those people who broke the law in coming here, who are here in violation of the law, are going to be given preference and status over you. People who came here illegally and who have stayed here in violation of the law are going to be given benefits that over 1.9 million people who sought to do it the legal way, probably will never have an opportunity to have.

I believe we should not do that. We have to set some standard for people who are already here. Even if we could stop the hemorrhaging of our borders, with millions of people coming across illegally, even if we could deal with the incentives of people to come, we still have to decide what to do about the people who are here.

The question is, Who gets to stay? I could go through a long list of the people who want to come to America. Interestingly enough, there are 366,820 people from Mexico who would like to come to America legally. They are waiting all over Mexico for that opportunity to come. Should those who came illegally, should those who have been here only 90 days be given preference over 366,820 people who sought to come legally? I submit, Mr. President, that if we submitted that to the American people, not 5 percent of the population would say that somebody who came into this country illegally for 90 days last year should be given preference over 366,820 people from Mexico who have been waiting years for an opportunity to come legally, or that they should be given preference over 1.9 million people all over the world who are following the rules—people from Mexico, the Philippines, Korea, Mainland China, Vietnam, Taiwan, Jamaica, the Dominican Republic, Hong Kong, and Pakistan, and the list goes on and on.

Where is fairness? Where is fairness for those who want to abide by the law versus those who have broken the law?

We have heard, Mr. President, that we have to take these blanket amnesty provisions in order to get a bill. Let me first outline what they are. There is great confusion in this body as to what this bill does. We still hear much of the debate on the basis of the bill that was adopted in the Senate or on the basis of moving the legalization date to 1982.

I say to my colleagues that, in the old traditional Southern way of expressing these things, I have prayed over this issue long and hard. If we were simply debating a legalization date of 1980, which was the provision in the Senate bill, or 1982, which was in the House bill, it is very doubtful—and I submit to my colleagues that this is a very difficult issue for me as I know it is for many of you—but it is very doubtful that if the threshold for legalization were having been here since 1980, the vast majority of the American people would say that it was sufficient.

They would say that that is not sufficient when 1.9 million people have been waiting, in many cases for longer than that, to come legally. That is not sufficient to be put on a fast track to become a citizen. But if that is what we were choosing, my guess is I would swallow hard and accept it. But that is not what we are choosing.

We are choosing here one of the most absurd proposals I have ever heard. In fact, try as I may to understand it, I did not. Quite frankly and not in any way trying to impugn the motives of anyone, it is almost as if there were a poison pill to kill the bill, only nobody ever took the pill and we

are on the verge of seeing an absurd proposal become law. I ask my colleagues' indulgence to think through this proposal with me. Let me start with the best parts of it first, the most reasonable parts first. Then I want to get down to the ultimate absurdity in the proposal.

Under the bill, anyone who has been here since 1982 can qualify to become a temporary resident alien, can qualify immediately for certain Medicaid benefits, State and local welfare benefits with some Federal matching, and move toward the receipt of some AFDC benefits after the expiration of a period of time.

(Mr. CHAFEE assumed the chair.)

Mr. SIMPSON. Mr. President, may I ask my colleague if he will yield for a question?

Mr. GRAMM. I shall be happy to yield, but I would like to go through this whole point, because it is the crux of my argument.

Mr. SIMPSON. I could have come over and handed that note to you. There is a message. I shall forget the question. Then you can share the information with your friend [Mr. RUDMAN].

Mr. GRAMM. None of the numbers listed here would be in the ballpark.

Mr. SIMPSON. I see. I thank the Senator very much. I shall save the question for later.

Mr. GRAMM. Mr. President, let me begin with the most reasonable of these new proposals, then go to the most absurd. I ask my colleagues, do we really want to make this the law of the land? Let me start with the most reasonable.

An individual who has worked in agriculture illegally for at least 90 days in each of the last 3 years would be eligible for temporary residency that may be adjusted to permanent residency after 1 year.

□ 1410

A person who has worked in agriculture in the United States illegally for 90 days a year for the last 3 years would be made a temporary resident. That can be adjusted to a permanent resident alien after 1 year, and then that person is on a fast track toward potential receipt of public assistance and citizenship.

This is a substantial departure from the whole argument for amnesty. What is the argument for legalization? I listened to my distinguished colleague from Wyoming, and I am impressed and I am in agreement when he says you cannot just throw out people who have put roots down in America. You have to have some kind of legalization program for people who made a life here.

But who is going to argue that someone who worked in agriculture for at least 90 days for the last 3 years has put roots down in America? Who is going to argue that somebody who has worked in agriculture at least for 90 days illegally is part of the fabric of America? Who is going to argue that they ought to be given preference over 1.9 million people all over the world who dream of coming to America? Nobody would make that argument, nobody in America, or no substantial number of people in America would ever buy that argument, but that is the argument this bill makes. The bill does not ask have you been here since 1982? Not, have you put down roots? Not, have you become a productive member of society? Not, are you gainfully employed? Not, have you had children or gotten married or become part of mainstream America, as many of our parents and grandparents did. But, did you work here for 90 days a year for the last 3 years illegally? What part of mainstream America is that?

I submit to my colleagues that is the best part of the proposal. That is the best part of the proposal. Let me go to the next best part. The next best part begins to border on absurdity. We argue for an amnesty provision to protect the people who have come here illegally, but who become part of America, who put down roots. We are not going to go in and drag people out of their houses and send them back to a foreign land that they have long ago given up. Nobody is for that. I am adamantly opposed to it.

But what does this bill propose? This bill proposes that if last year, if in 1985, you worked illegally in this country for 90 days in agriculture—or you can get somebody to say you did—then you are given preference over 1.9 million people from all over the world who go to bed every night dreaming about coming to America. This bill says that if you violated the law for 90 days last year, or can get somebody to say you did, you are given preference over almost 2 million human beings, some of whom have waited decades to try to come to America.

Now, what is right about that? There is nothing right about that, and everybody in this body knows it. That is an absurd proposal—that because somebody violated the law for 90 days last year we are going to claim that they are part of the fabric of America. That somehow they are being uprooted because they are not going to be given preference over 2 million people, many of whom have waited decades to come and be part of the American dream. That is an absolute absurdity.

Now, this bill may have been worked on for 6 days or 6 months or 6 years or 60 years or 600 years, but I do not care how long it has been worked on; that is an absurd proposal, and if the American people knew that this proposal was in this bill it would be laughed out of the country and laughed out of this body.

But that is not the most absurd proposal.

The PRESIDING OFFICER. The Senate will be in order. The Senator from Texas has the floor.

Mr. GRAMM. Now, Mr. President, I have spoken in very strong words about this proposal, about this 90-day citizenship, but it is not the most absurd part of this proposal. And I hope my colleagues will listen carefully to this one, because if this one does not turn your stomach, then I submit you have a different perspective on this bill than I do.

Mr. DOMENICI. Will the Senator yield?

Mr. GRAMM. I will be happy to yield.

Mr. DOMENICI. Before the Senator goes to the next point, will he tell the Senator from New Mexico—on the 90 days the Senator said they are given preference—will the Senator explain to me, what kind of rights do they receive and do they have any further responsibilities?

Mr. GRAMM. If they have been here for 90 days, then they are eligible to be temporary resident aliens, which may be adjusted to permanent resident aliens after they have been here for 2 years. That is a clear and distinct preference over the 1.9 million people who are waiting to get an opportunity to come to America.

Mr. KENNEDY. Will the Senator yield for a question?

Mr. GRAMM. I want to make my third point because it fits into what I am trying to say.

Mr. KENNEDY. Just on this very point.

Mr. GRAMM. I will be happy to yield.

Mr. KENNEDY. Can the Seantor share with us, how long do they have to remain as a permanent resident alien before they can become a citizen?

Mr. GRAMM. They could become a permanent resident alien in 2 years.

Mr. KENNEDY. Then how long do they have to wait before they can become a citizen?

Mr. GRAMM. I was getting ready to answer the question.

Mr. KENNEDY. Can the Senator tell me now what it is?

Mr. GRAMM. They have to wait 4 years.

Mr. KENNEDY. Five years.

Mr. GRAMM. Five years.

Mr. KENNEDY. I thank the Senator.

Mr. GRAMM. But those 5 years they are here, they are permanent resident aliens. They are eligible for Medicaid, they are eligible for State and local welfare, and they have benefits that these 1.9 million people do not have. So the fact that they have to wait to become citizens for 5 years is largely irrelevant; they are in America.

And let me assure you there are people who come to America to vote but that is fairly low on the priority. Most people come here to get a job, to have freedom, to build a life, to educate their children. Yes, these people have to wait 5 years for citizenship, but so do the people who get the visa to come. They have to wait 5 years, too. So the point is an interesting one but an irrelevant one.

But I have not gotten to the most absurd proposal. I ask my colleagues to listen to this one. Because we anticipate that the people who were here 90 days last year working in agriculture who became temporary resident aliens and then permanent resident aliens and then citizens are going to move on to other jobs, this bill provides a replenishment program.

Because we anticipate that having been legalized, after having been here for 1 year, people are going to move on just like my grandparents did and many of your grandparents did, there is going to have to be a replenishment program for agriculture.

Now, how is this replenishment program going to work? Well, the replenishment program is going to work in the following way: Beginning in 1989, when the people who have come in under this 90-day agreement would qualify to stay if they left agriculture, people will be allowed to come into the country if they work at least 90 days in agriculture for the first 3 years that they enter, and then they are eligible to become permanent resident aliens.

Now, listen to this a minute. If a person comes in under this replenishment program and works 90 days a year for 3 years in agriculture, then they become permanent and they are here legally during that period.

Now, my colleagues, this is reminiscent to me of an indenture. In fact, maybe because of my history and my family's history, it reminds me of the conditions under which my wife's grandfather came to America. Those conditions were basically that the plantation paid for him to come and in return he worked a certain number of years. When they were up, he quit.

□ 1420

Do we really want to go back to indenture of labor in agriculture? Do we really want to go back to a program where people who come to America have to commit to work in a certain industry for a certain period of time?

I am absolutely amazed that people who otherwise support labor laws and guarantees which in some cases go beyond the stretch of the imagination or the limited scope of government are willing to support a proposal that says to somebody who comes to America: "You can come to America, but you don't have the freedom to say where you work. You have to come to America and for 3 years you have to work in agriculture for 90 days, and then you can get the ticket that everybody wants as a permanent resident alien."

Are we going to have physicians coming from Germany, who will say, "I'm willing to work in agriculture for 3 years to get to come to America. I have been waiting. I'm one of these people on this waiting list. I've been waiting for decades to come to America."

Nearly 2 million people have applied to come to America. People who have been here 90 days are going to be given what those people have been waiting a lifetime for. Most of those people waiting will never get it. But we will say: "Because we have the special replenishment program, we are going to let you come: if you work in agriculture for 90 days a year for 3 years, you can be an American like all the rest of us."

Mr. President, one thing I am proud of is that when my grandfather came to this country from Germany, he was an American like everybody else. Nobody told him: "You have to work in a certain industry for a certain number of years before we are going to make you a real American."

This proposal is an absolute outrage—an absolute outrage—that we are going to say that people in this Replenishment Program will come here and will have to work in a specific industry for 90 days a year, for 3 years, in order to be Americans like everybody else.

What we are going to have, I would guess, if it is available to people from other parts of the world, is that people will be writing us from Germany, England, Italy, Mainland China, and Vietnam, saying: "How do we get into this replenishment program? I happen to be a nuclear engineer. I have won a Nobel Prize in engineering, but I want to come to America. I am one of these 1.9 million people. People violated the law last year, and you are giving them what I'm dreaming of having. I have a Nobel Prize, but I'll pick the berries for 3 years, let me come to America."

How absurd is that proposal! I do not understand why that provision was ever adopted. I just cannot believe that anybody meant for that to become law. I have to believe that this was a poison bill that nobody ever swallowed.

I hear my colleagues talking about having been to the border. I assure you that I have been to the border. This year, I went to El Paso and walked up and down between those fences. There were holes cut in the fences, with people ready to dart across at any moment.

We are concerned about how to deal with the problem. Does anybody think this bill is the way to deal with the problem? I submit that it is not.

I ask my colleagues to look at this fact in determining whether or not this is the best we can do.

My point is this: I hear that we have to take these absurd provisions, that we have a replenishment program, that we have to let people who work illegally for 90 days qualify to be here permanently and ultimately to be citizens, because the support for amnesty is so great. I would like to know where it is. I do not see it.

In fact, on October 9, in the House of Representatives Mr. MCCOLLUM, of Florida, offered an amendment, and his amendment was not to simply strike these absurd provisions I have outlined here. That was not what his amendment was. His amendment was to strike the entire legalization program. His amendment was to strike the entire amnesty provisions of the bill.

Our colleagues on the conference tell us that we have to take these provisions or else we cannot have a bill. Well, how strongly did the House feel about it? Not just about the 90-day provision. Not just about the replenishment program, which would turn an iron stomach. That was not what his amendment was.

Out of the clear, blue sky, with nobody lobbying on it, no groups which would support it back home, Representative MCCOLLUM, on October 9, offered an amendment that said strike all the legalization provisions. In other words, nobody who came here illegally will have any status, no matter how deep their roots may be in America.

I do not support that policy. But do you know what the vote was in the House of Representatives on that policy, much less this absurdity that I have been outlining here? The vote in the House of Representatives was 192 Members saying: "Let's strike the whole amnesty provision. Let's strike the whole legalization provision." If somebody has been here 40 years, had five children, two of them died in Korea and one of them in Vietnam and one of them won the Congressional Medal, they would still have no status whatsoever. On a vote on the basic legalization program, 192 said no legalization program; 199 leave the bill as it is, and 41 did not vote.

I submit to my colleagues that that is hardly a great mandate for legalization, much less the kind of absurdity that we are talking about here.

I see no basis of support for these sweeping provisions. I do not believe the American people are in favor of it; and I know that the House of Representatives, by a vote of 192 to 199, with 41 Members not voting, a swing vote of 4, came to the verge of stripping the whole amnesty provision.

Mr. President, this brings me to the fundamental point I want to make, and it is a simple point.

□ 1430

There is no basis of support in this country for those broad sweeping amnesty provisions. Most Americans would heartily reject a blanket amnesty for anybody who has been here illegally since 1980. Most Americans would reject out of hand an absolute blanket amnesty for people who have been here illegally since 1982. Most Americans would reject as absurd providing permanent residency and amnesty for people who worked in agriculture for 90 days a year for the last 3 years. I do not know how many Americans would support——

Mr. SIMPSON. Mr. President, will the Senator yield for a question?

Mr. GRAMM. I am happy to yield.

Mr. SIMPSON. As I recall during the debate on the floor of the Senate the last time I believe the Senator from Texas voted for the Wilson amendment which has a provision for temporary agricultural workers which in effect limited those workers to agriculture. Is that not correct?

Mr. GRAMM. I voted for the Wilson guest-worker program, that is correct.

Mr. SIMPSON. And that did limit those persons to agriculture only, a type of limitation without question binding them to the job?

Mr. GRAMM. Let me respond to that by saying, I voted for a guest-worker program that would have led up to a program that would have advertised in Mexico, that would have provided temporary employment and medical and housing guarantees for people who were willing to come on a seasonal basis and work in this country and then, under the supervision of the Department of Labor and the Department of Agriculture, when the work was done they were paid and they would go back to Mexico. That is certainly correct.

I see no inconsistency between that and the point that I have made here.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. SIMON. Mr. President, will the Senator yield on that point?

Mr. GRAMM. Mr. President, reserving my right to the floor, I yield to the majority leader.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I hate to interrupt this very good discussion, and it is a good discussion. But we need to get on to the continuing resolution.

Much as I dislike setting this aside, I made a promise to the Senator from Iowa that if he would let us clear something early this morning, we would move to his resolution with 10 minutes on the side.

So I ask unanimous consent that we now go to the Harkin resolution.

The PRESIDING OFFICER. Is there objection?

Mr. HATFIELD. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. I wonder, if the majority leader will yield for a question: Could we incorporate that perhaps we will go to the continuing resolution immediately following the Harkin amendment?

Mr. DOLE. Right. We are going to the CR immediately following.

Mr. HATFIELD. I thank the Senator.

The PRESIDING OFFICER. Is there objection?

Hearing none, it is so ordered.

The Senator from Kansas.

Mr. DOLE. As I understand there are 10 minutes on each side.

The PRESIDING OFFICER. The Senator is correct.

REPORT ON POSSIBLE NICARAGUAN INVOLVEMENT

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I have a joint resolution which I send to the desk.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

A joint resolution (S.J. Res. 429) to require a report by the President on possible involvement by U.S. Government personnel in the provision of military support by American citizens to the Nicaraguan democratic resistance.

The Senate proceeded to consider the joint resolution.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, the joint resolution which I offer on behalf of myself and Senators KERRY and KENNEDY is very simple and direct.

My resolution adopted and signed into law would require the President by February 1, 1987, to transmit a report to Congress providing a full and complete accounting of all contacts, including advice, logistical support, and any other assistance to Eugene Hasenfus, Max Gomez, Wallace Sawyer, William Cooper, and all other private American citizens providing military support to the Contras or Nicaraguan democratic resistance.

I want to make it clear this joint resolution would not withhold any of the $100 million in aid that is in the continuing resolution. My resolution does not assign blame, nor does it declare this or that member of the administration provided support or assistance to the Contras and thus violated the law.

My joint resolution does require a full and complete disclosure of all contact, if any, with the United States Government personnel and members of the National Security Council and United States military group and United States Embassy in El Salvador, in the so-called private war in the Contra operation in Nicaragua.

Mr. President, I wish to make it clear that I understand that there will be investigations made into this by the appropriate intelligence committees and by the Foreign Relations Committees of both the House and Senate perhaps. But I believe that those investigations, of course, will be conducted basically on the staff level. It will be staff investigations.

Quite frankly, if you do not ask the right questions you do not get the right answers. That is why I think it is important for us to insist that the President make a full and complete report to Congress so that we can evaluate early next year whether or not any of the laws that were passed by Congress——

The PRESIDING OFFICER. The Senate is not in order.

The Senator is entitled to be heard.

The Senator from Iowa.

Mr. HARKIN. Thank you, Mr. President.

Because by having the administration report to us then we can really evaluate whether or not we have all the complete information that we need to assess whether or not any laws were broken.

I know that in the continuing resolution there is a provision for $100 million for aid to the Contras. My position opposed to that is quite clear. However, Congress has spoken and that I assume will go through.

That does not, however, absolve the administration in any way from having their feet held to the fire on observing the law that was in effect or will be in effect up until the time the continuing resolution is signed into law.

I believe there are a lot of allegations and indications that certain individuals within the administration, within the executive branch, perhaps some in the military branch of the armed services have violated those laws.

I believe it is incumbent upon us as Members of the Senate and House, Members of Congress, that if we are passing laws that we make sure that the administration follows those laws.

I believe that again we need this kind of information that this resolution would require the administration to report.

We have seen the downing of the plane in Nicaragua, the capture of Mr. Hasenfus, who I say I feel sorry for. I have no doubt in my mind Hasenfus thought he was working for the CIA and thought he had the backing of the United States Government and now he is in Nicaraguan hands and no one

knows of him, no one claims him. He is sort of like a man without a country. And the plane, where did the plane come from? No one claims any kind of support for the plane.

I think the administration should be more forthcoming on this incident and let us know all the facts and details surrounding any contacts, advice, any kind of support that may have been provided to this flight, to this mission or to any other missions in and over Nicaragua that were in violation of the laws passed by Congress.

Mr. President, I reserve the remainder of my time.

Could I inquire how much time I have remaining?

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. HARKIN. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

The Senator from Minnesota has 10 minutes.

Mr. DURENBERGER. Mr. President, I rise in opposition to the joint resolution of my colleague from Iowa. I remind my colleague that we had a colloquy here on the floor last night on this subject in which I tried to explore with my colleague from Iowa what might be different or distinctive about his resolution from the activity that is an ongoing activity on the part of either the Intelligence Committee and the Foreign Relations Committee, and I think we heard the answer in his first 5-minute presentation, and that is that he has some feeling that there might be inadequate investigations by either the Intelligence Committee or the Foreign Relations Committee and the suggestion was that we may not at the staff level or whatever be asking the right questions.

I cannot find in a reading of the Senator's resolution what questions ought to be asked. So in each of these cases we are left to ask our own questions.

Because we do not have time I am not going to take the Senator from Iowa through the various laws that are involved that relate to the Neutrality Act, that relate to the Arms Export Control Act and some of the other acts that might possibly regulate activities of American citizens in or against countries with whom we have recognized relations.

I think it might serve a useful end if I did but we do not have the time to go through that.

I will just say to my colleagues that this is no longer as far as I am concerned strictly an Intelligence committee issue. In our oversight functions since 1980 when the administration began its involvement in support of democratic resistance in Nicaragua, the Senate Select Committee on Intelligence and its House counterpart have spent a great deal of their time at the staff level and in particular at the Member level in overseeing the specific activities of the U.S. Government in Nicaragua or in adjacent countries in support of activities by others in Nicaragua.

We had the sad experience in 1984, as I recall it—actually it began in 1983 in July—with a decision in the White House and culminated in January 1984 with the planting of detonating mines in certain harbors in Nicaragua and then finally culminated in a little public explosion over here on the floor of the Senate in which the senior Senator from Massachusetts was a part in April of that year.

□ 1440

And it was sort of a vacuum, if you will, in total oversight during that period of time. And the result was that in June, and I think again in September 1984 the Congress, on behalf of the American people, acted in the best interest of this country to stop the covert, the overt-covert support of paramilitary activity in Nicaragua.

Now, there are some of us that feel that perhaps the administration has not gone far enough in actually stopping what support they could stop, because the President and everyone around the President had done as much as they possibly could to encourage the private involvement of American and other citizens in support of the democratic resistance. There is no question about that.

I am not sure that it was in the spirit of American democracy, as the Assistant Secretary of Latin American Affairs testified yesterday, in the words of de Tocqueville, "when government does not act, the American citizens go about acting," and liken that to the church building and the barn building and so forth that he observed in the 1830's. I think it is an inappropriate comparison.

But the point is that from April 1984 until today the Senate Select Committee on Intelligence and the House Committee on Intelligence have not left the intelligence community side of your Government up off the ground on the issue of their involvement in any way in support of Nicaraguan resistance, which they started but which, by law, they have been prohibited from assisting.

Now is there anybody else in the Government, as the Senator's resolution would suggest? We certainly have an interest on the intelligence side in who else there might be. We have, both of us, on the House and the Senate side, asked the predecessor to the current National Security Adviser of the President to appear before us in person when the allegations came out a year ago that members of the National Security Council were actually directing, supporting, providing some assistance to the Nicaraguan democratic resistance in their supply from the outside. And the adviser to the President came, appeared personally before both committees, and assured us on that occasion that the kind of support that the Senator from Iowa and I and others fear was not being directed in any way from the White House. And I believe him. And I believe the current adviser to the President when he says the same. I believe the President of the United States when he says the same.

Now, if somebody is going to go after some detailed particulars, perhaps somebody in Foreign Relations is going to want to explore that part of it. But on an ongoing basis, both of these committees are concerned about the implementation of national security and foreign policy in this country. They are both concerned, as the Senator from Iowa is, that those policies can be adversely affected by the acts of privateers and particularly if those privateers are being directed in some way from inside the Government.

So I certainly assure my colleagues that institutionally we have come to learn the problems that are involved for all of us in ignoring some of the problems created for all of us by the administration in Nicaragua. We have learned our lesson. We are discharging, I think, appropriately, as best we can, that function.

I do not think that voting for this joint resolution is going to add one piece of information for the American public or anybody here. In fact, probably it would be better if you did not vote for this joint resolution but did leave it to these two committees, which are very bipartisan committees—there are not two more nonpartisan committees in this place than the Intelligence Committee and the Foreign Relations Committee—leave to them the appropriate congressional oversight of who did what to whom as that fact relates to not only the past but in particular to our future. Because, as the Senator said, the future is probably more important today than the past, since we are about to vote for a continuing resolution which will in effect put our $100 million into this kind of activity.

So I would urge my colleagues to vote against this joint resolution. By doing so, you are not voting against an investigation, you are not voting against getting the facts out, you are not voting to not find out exactly what is going on, because you do have an institutional process at the present time that would do much the same.

I reserve my time. I think the chairman of the Foreign Relations Committee may be on his way.

The PRESIDING OFFICER. Who seeks recognition?

Mr. LEAHY. Would the Senator from Iowa yield me 1 minute?

Mr. HARKIN. I yield 1 minute to the distinguished Senator from Vermont.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. LEAHY. Mr. President, I rarely, if ever, disagree with the distinguished Senator from Minnesota because of my respect for him and the way we work together.

I must say, I rise in support of this joint resolution. Senior intelligence officials with whom I have spoken categorically deny any activity by officials from the intelligence community any way helping the private benefactors. I have reported that to the Senate and have those assurances. But the press continues to dig up new information and new allegations. I think just for the sense of credibility of this Government about this operation we ought to have the report asked for by Senator HARKIN.

Mr. President, I rise in support of this resolution to require a report from the administration on the issue of alleged encouragement and cooperation by U.S. officials in private efforts to supply military equipment to the Contra rebels in Nicaragua.

I have been troubled for some time by continuing reports in the United States and foreign press of connections between administration officials, usually with military or intelligence backgrounds, and the various private organizations that are raising money and shipping supplies to the Contras. I have asked questions of senior intelligence officials about reported involvement. In every case, these officials categorically deny any activity by officials from the intelligence community in any way helpful to the private "benefactors."

Nevertheless, the press continues to dig up new information and new allegations. Perfunctory denials by administration spokesmen simply are not answering these disturbing reports.

Mr. President, why should any of us be concerned that U.S. officials may have been working with, advising and helping private supply efforts to the Contras? After all, Congress is on the verge of approving a new $100 million military aid program that takes us directly back into this war. I oppose that program, but it is going to become law very soon.

The reason every Member of this body, whether pro- or anti-aid to the Contras should be deeply concerned is that this alleged activity has been going on while Congress, by law, has banned U.S. assistance, direct or indirect, to the Contras. That ban was modified last year and again this year to allow so-called humanitarian aid, but the prohibition on assisting the Contra insurgency remains on the books.

This resolution by the distinguished Senator from Iowa simply asks for information from the executive branch. Did any U.S. officials, civilian or military, have any connections with the American civilians killed on the recent supply flight to Nicaragua? Were there any connections with Eugene Hasenfus? What about Mr. Gomez and Mr. Medina, whom Eugene Hasenfus named as those in charge of the supply flights? Who is paying for these flights and who is buying the supplies? Are the Neutrality and Arms Export Acts being violated? Are congressional prohibitions on direct or indirect assistance to the insurgency being circumvented?

Mr. President, these are reasonable questions, ones I would hope the administration is already asking of its own officials. Congress has both a right and a duty to find out the facts and to insist on compliance with the law.

I urge all Senators to support this resolution.

Mr. HARKIN. Mr. President, I thank the distinguished Senator from Vermont for his support.

I want to just respond to the points raised by the distinguished Senator from Minnesota. First of all, this joint resolution and report is in no way meant to substitute what the appropriate committees of the Congress are doing on this issue right now. Indeed, it is meant to complement those investigations, to help fill in the holes.

As I said, a lot of times the staff does not know exactly what questions to ask. I believe a report coming from the administration, as outlined in this joint resolution, will complement, not substitute the investigation that is now going on, but be a complement to it.

Second, we have a right to know if the laws have been obeyed by this administration. Now there is a difference. The distinguished Senator from Minnesota said about encouraging private support, the administration has been encouraging private support. Well, that is fine. There is no law against that.

But there is a difference between encouraging private support and actually aiding and abetting and provide funds and support and assistance to those groups that have been operating in and over Nicaragua.

Now the questions I have are not about the Central Intelligence Agency. I will admit openly that I am probably about 95 percent convinced that the Central Intelligence Agency's hands are clean on this. I really believe they did obey the law.

My questions really revolve around the inner workings of the White House and the National Security Council. I would just make the observation that the Intelligence Committees of the Senate and the House have oversight over the CIA, but not the National Security Council. They are not going to come forward unless we make them come forward with this kind of report to tell us what kind of contacts they have had right directly from the National Security Council to these private groups.

So it is not the Central Intelligence Agency that concerns me. It is the National Security Council. And that is why we need this kind of report from the administration.

We do not have to just sit back and hope that somehow we are going to get to the bottom of this. We have got to hold nonelected officials accountable for whether or not they have obeyed the law. We are all held accountable. In a couple of weeks, we will be held accountable in the polls, at least some of us will be. But these nonelected bureaucrats are never accountable. I believe we have to hold them accountable.

I see the distinguished Senator from Minnesota. I just say once again that it is not the Central Intelligence Agency that I am so concerned about. It is the National Security Council. What I am concerned about is that this investigation, either by the Foreign Relations Committee or by the Intelligence Committee, will not probe that area because that is not an area really under their jurisdiction.

This resolution would require the administration to come forward with the report detailing activities not just of the CIA, but of any individuals in the executive branch of Government. I think it is important for us to hold the administration's feet to the fire, to have them report to us so we can know and tell the American people, once and for all, that the administration either did or did not obey the laws.

Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator has 1½ minutes.

Mr. HARKIN. I reserve the balance of that time.

Mr. HATFIELD. Mr. President, they are part of what Assistant Secretary of State Elliot Abrams calls "a kind of old boy network," and their flight was one of many described by the administration as "quite in line with * * * a well established tradition in our country." Three U.S. citizens, part of a murky underworld of counterinsurgency experts, and an unidentified fourth took off last week in a plane loaded with military hardware: automatic rifles, ammunition, and an assortment of other tools of destruction. Their destination? Somewhere in the jungles of Nicaragua, where the rebels we so delicately call "freedom fighters" await their arrival. But before they can deliver, the Nicaraguan Armed Forces shoot the aged C-123 transport plane down. Three of the men perish—a fourth, a Wisconsin man named Eugene Hosenfus, is cap-

tured and quickly paraded around Managua.

As we wonder what to do about the first "unofficial" prisoner of our undeclared war against Nicaragua, Mr. President, the questions far outnumber the answers. Where did the flight originate? Who owns the plane? And who owns the cargo? The administration promises an investigation of these questions.

But, of course, the most important question raised by last week's incident is what degree of involvement the U.S. Government had with these men and their mission. Mr. President, I believe the people of this country have a right to know the answer to that question. Have we spent the past 9 months debating a $100 million assistance package to the Nicaraguan Contras while our Government has been a coconspirator in private efforts to supply them? I believe we ought to know the answer.

The truth is that regardless of whether Mr. Hosenfus and his colleagues were working with, or for, the Central Intelligence Agency or any other agency of the U.S. Government, they are part of what Assistant Secretary Abrams calls "a kind of old boy network." That network, which has been active since the Contra debate first surfaced in 1982 and has supplied the rebels with untold millions worth of both "freedom fighter friendship packs" as well as guns and ammunition, carries with it the tacit endorsement of the administration.

I am not convinced that administration support for, or collaboration with, this network's various organizations does not go far deeper than tacit endorsement. But at the very least, the administration has given those organizations the tacit endorsement, and that alone is too much.

Tacit endorsement means Assistant Secretary Abrams' salute to the heros who died last week. Tacit endorsement means convincing the leaders of Civilian Military Assistance, the organization which owned the helicopter shot down over Nicaragua in 1984 and to which the two United States citizens killed in the incident belonged, to change the group's name to Civilian Material Assistance. And tacit endorsement means looking the other way when potential violations of the neutrality laws are involved.

Mr. President, hostile expeditions of the sort Mr. Hosenfus clearly was a part, against a nation with which the United States is at peace, amount to a private usurpation of congressional authority to declare war, as well as the President's authority as Commander in Chief of the Armed Forces. While selective enforcement of the letter and intent of the neutrality laws in cases like this one may suit the immediate agenda of the administration. Anything short of strict enforcement of Federal authority in all matters of foreign policy ultimately will undermine the integrity of U.S. foreign policy around the globe.

Let me paint the scenario: the United States recognizes the Government of Nicaragua, and is officially at peace with the Sandinistas. And yet for several years, a debate has raged in Congress over the necessity for, and level of, United States military assistance to the Nicaraguan Contras, a motely crew attempting to overthrow that government. The assistance was the brainchild of the administration, and has become a cornerstone of the so-called Reagan doctrine. For several years, Congress resisted administration pressure and approved only so-called humanitarian assistance to the Contras. During that time, a variety of organizations formed in the United States to raise money for the Contras and their guerrilla war. Their members were U.S. citizens, and their warchests soon grew.

Of course the administration did not mind: The Contras were getting weapons and supplies, and just because they said "made in the USA" on the label did not mean congressional intent had been undermined and of course did not mean that the United States was a part of any effort to overthrow the Sandinistas. Now comes congressional approval of $100 million in military assistance to the Contras. We are, of course, still at peace with the Government of Nicaragua and Congress has not been asked to approve the deployment of United States troops. But why dirty the name of U.S. foreign policy—not to mention fight a fierce battle with Congress—with a declaration of war and the involvement of our boys in the jungles of Nicaragua? The private organizations seem more than willing to slide down that slippery slope, just so long as the administration looks the other way.

William Walker has returned, my friends.

Mr. President, there is something desperately wrong with that scenario. The peasants of Nicaragua can hardly be expected to distinguish a private citizen from a U.S. troop when the private citizen walks, talks, and offers his cargo of weapons like the U.S. troop. And the Government of Nicaragua is far too smart to think those private citizens would be free to execute their own foreign policy agendas without a little help from their friends in Washington.

It may not satisfy the de jure requirements, Mr. President, but what we have here is a de facto war against Nicaragua. The only problem is that we were never asked to declare it. Sound familiar? Go ask the four men fasting on the steps outside this Chamber if it sounds familiar to them.

We are entering a no man's land, a land without laws, Mr. President. And whether the Government of this country is directly involved or not, it has in its hands the power to retreat from that all too well trodden path before it is too late.

Mr. President, I support the resolution now before us—not because I believe it will halt United States involvement in Nicaragua but because the people of this country have a right to know just how dirty this little war is.

□ 1450

The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, we are awaiting the arrival of the chairman of the Foreign Relations Committee. We are holding up the $600 billion continuing resolution. I hope we could vote on this mischievous joint resolution. It is just another effort to get at the President of the United States. If we are going to do this, we ought to include finding out who is helping the Sandinista government, Ortega's government, which is supported by Russia and Cuba. If we want to report, and if we want an investigation, let us make it fair and across the board instead of just aimed at those who are trying to fight for freedom and democracy in that part of the world.

I yield back the time on this side.

Mr. HARKIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I am sorry the distinguished majority leaders said this is mischievious. There is nothing mischievious about it. Darn it, if someone is wrong, and disobeys the law we ought to know about it. We ought to demand a full accounting. Sure, we should hold Moscow, Havana, and everybody else accountable. But they are beyond the purview of our laws.

Congress passed laws that they were not to do these things. And yet every indication we get from the press day after day is that individuals high up in the administration, and in the National Security Council, are heavily involved in this.

It is not mischievious to demand a full accounting from any administration—this one or any Democratic administration—as to whether or not they have obeyed the laws passed by the Congress.

I do not believe that is being mischievious, Mr. President.

I yield back the balance of my time.

Mr. BYRD. Mr. President, before the Senator yields his time back——

Mr. HARKIN. I yield to the distinguished minority leader.

Mr. BYRD. Mr. President, I ask unanimous consent to have my name added as a cosponsor of the joint resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARKIN. I thank the distinguished minority leader.

WAR IN NICARAGUA

Mr. BYRD. Mr. President, I strongly support the resolution offered by the distinguished Senator from Iowa, Mr. HARKIN. The resolution requires a full report of the circumstances surrounding the incident which occurred on October 5, 1986, when a C-123 cargo plane was shot down in Nicaragua. As everyone knows, one American was captured, and two died when their plane was shot down after violating Nicaraguan airspace. From any perspective, the violation of Nicaraguan airspace by a plane clearly unfriendly to the Sandinista government was illegal. If Mr. Hasenfus was an employee of the CIA, he was in Nicaragua in violation of United States law. If he was a private individual pursuing his own war against the Sandinista government, he was in violation of another U.S. law.

There are many unanswered questions, allegations, and conflicting reports and assertions concerning this incident. I have withheld making a statement, and a judgment, on the downing of the aircraft. There have been assertions, and one may certainly draw inferences, that the U.S. Government is pursuing an illegal hidden war, not authorized by the Congress. I addressed this question directly in an amendment which I offered to the military construction authorization bill this past August. The amendment failed narrowly, 52 to 48, mainly on party lines.

My amendment would have prohibited all forms of assistance to the Contras except the $100 million authorized by Congress. It sought to prohibit the provision of assistance beyond the $100 million through such devices as bailment, credit, loan, lease, guaranty, insurance, or other services which would have the effect of providing additional unauthorized assistance. The principle behind the amendment was simple: Congress and the American people ought to know, and approve in advance, deepening involvement by the United States in the Central American conflict. Without a consensus behind such involvement, it certainly could not be sustained over the long run.

I withheld reoffering my amendment to the continuing resolution on the strength of assurances by the administration that they, indeed, would not provide additional assistance through the use of such devices. I am not accusing the administration today of doing so, or of planning to do so. But, the latest aircraft incident does raise disturbing inferences, and so, Mr. President, the report required by Mr. HARKIN's resolution will be useful in clearing the air and resolving many of the questions which have been raised regarding the C-123 incident.

In addition, Mr. President, I am today writing the distinguished chairmen of the Senate Foreign Relations Committee and the Senate Intelligence Committee, asking them to pursue vigorous oversight of the administration's program in Central America to ensure that the provision of unauthorized additional assistance is not occurring. In this way, the record of the next few months can be effectively reviewed early in the 100th Congress and appropriate action taken, if need be, expeditiously.

The PRESIDING OFFICER. All time having been yielded back, the question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, and was read the third time.

Mr. HARKIN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The resolution having been read the third time, the question is, Shall the joint resolution pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Nevada [Mr. LAXALT] and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Ohio [Mr. GLENN] is necessarily absent.

The PRESIDING OFFICER (Mr. GRAMM). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 47, nays 50, as follows:

[Rollcall Vote No. 349 Leg.]

YEAS—47

Baucus	Grassley	Mitchell
Biden	Harkin	Moynihan
Bingaman	Hart	Nunn
Boren	Hatfield	Packwood
Bradley	Heinz	Pell
Bumpers	Inouye	Proxmire
Burdick	Johnston	Pryor

Domenici	Mathias	Wilson
Durenberger	Mattingly	Zorinsky
Evans	McClure	

NOT VOTING—3

Glenn Laxalt Symms

So the joint resolution (S.J. Res. 429) was rejected.

□ 1510

Mr. DOLE. I move to reconsider the vote by which the joint resolution was rejected.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONTINUING APPROPRIATIONS, FISCAL YEAR 1987—CONFERENCE REPORT

Mr. DOLE. Mr. President, I submit a report of the committee of conference on House Joint Resolution 738 and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. GRAMM). The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 738) making continuing appropriations for the fiscal year 1987, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 15, 1986.)

Mr. HATFIELD. Mr. President, the conference report on House Joint Resolution 738, the continuing resolution for fiscal year 1987, was adopted by the House last evening by a vote of 235 to 172. According to a letter from OMB Director Jim Miller received yesterday, the administration urges adoption of this conference report while remaining opposed to two of the six amendments remaining in disagreement. Echoing the language of Mr. Miller's letter, Mr. President, I urge adoption of this conference report, and I ask unanimous consent that Mr. Miller's letter be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 15, 1986.

Hon. MARK O. HATFIELD,
Chairman, Committee on Appropriations, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: Based on our preliminary analysis and representations made by the conferees, we urge adoption of the Conference Report.

During the course of negotiations, the conferees made substantial progress toward meeting the objections raised by the Administration. In particular, the Conference

Report reasonably holds the line on most spending; provides funding for defense and foreign assistance that has been agreed on with representatives of the Administration; provides essential aid for Contras and for Central America; and includes the carefully negotiated agreement on arms control.

However, to make the resolution acceptable to the President, I also urge Congress to delete two provisions that are in true disagreement. Both of these provisions—the so-called "Buy American-Outer Continental Shelf" and "Double Breasting" provisions—have been opposed consistently and most strongly by the Administration.

Sincerely yours,

JAMES C. MILLER III,
Director.

□ 1520

Mr. HATFIELD. Mr. President, we all know that this is the largest single appropriation measure ever considered by the Congress. It embraces the funding recommendations and general provisions normally covered in the 13 regular appropriations bills for fiscal year 1987. The conference agreement recommends funding levels of $557.2 billion, more than a half trillion dollars. The conference report and the accompanying statement of managers total more than 1,200 pages, and I might raise it for all to see. Over 8 inches high, it weighs 18¼ pounds. That is the funding mechanism for the coming year. Not to only say that it is a massive piece of legislation, but I agree with those who argue we should not deal with the financing of Government operations in this manner.

I do not know anyone who is happy about this process at this moment. But, Mr. President, notwithstanding where we are historically at this moment, this is a good piece of legislation and a satisfying result to a long and difficult year in the appropriations process. It is the product of a year of hearings by 13 subcommittees, 13 subcommittee markups, 13 full committee markups, 1 week of debate on the floor of the Senate, and 10 full days in conference with the House of Representatives. We have successfully removed from this conference agreement all the provisions of the now famous "A" list of the Office of Management and Budget with the exception of two amendments in true disagreement that we will deal with after adoption of this conference report.

This conference agreement provides funding levels on defense and foreign assistance that are acceptable to the administration, strikes a good balance on nondefense spending in a way that "reasonably holds the line," according to the administration, provides emergency assistance to the Philippines and El Salvador, and carries important provisions on arms control that have been negotiated with all sides. And it does all this, Mr. President, while remaining with the constraints of the budget resolution. This continuing resolution is within our 302(b) allocation under the budget resolution and within our revised subcommittee allocations.

Mr. President, I once again urge the adoption of this conference report. And may I say the manager on the Democratic side, our subcommittee chairman and ranking minority members and I are ready to respond to any questions Senators may have. I hope we can proceed in an expeditious way, adopt the conference report, act on the amendments remaining in true disagreement and conclude congressional action on this continuing resolution. I would like to yield to my very outstanding and treasured comanager and ranking member of the Appropriations Committee, the Senator from Mississippi.

The PRESIDING OFFICER. The Senator from Mississippi is recognized.

Mr. STENNIS. Mr. President, I am sure we all want to thank the chairman for the excellent service he has rendered in the preparation of this bill, which is characteristic of him always, and all the other chairmen of subcommittees and other committees. The amount of work that has been carried on by them and their valuable staffs day and night is amazing. It is unbelievable. I feel they in their talented and dedicated way, with the knowledge they have of the subject matter, have put the parts of this entire matter in place and have a very strong bill, an adequate bill, in my opinion, with adequate funds, and the best selections that could be made.

At the same time, I want to make it clear that I do not approve of the idea of resorting to a method that puts 13 appropriations bills into the same bill before the body for debate and for passage or rejection. I think that will gradually erode and ruin the committee system. The committee system is what the Senate is better known for and its better work is done there.

However, we have a fact here rather than a theory. We have to pass on it. There are a few points where agreement was not reached. They are few and far-reaching. I think we can work out something on that, make the choice and vote on them. I am afraid it would hinder and delay and injure this bill if we do not proceed now to prompt consideration and I hope prompt passage.

I yield the floor.

DEFENSE CHAPTER OF THE FISCAL YEAR 1987 CONTINUING RESOLUTION

Mr. STEVENS. Mr. President, I am pleased to report that the defense appropriations contained in the continuing resolution for fiscal year 1987 are well below the budget resolution targets established in the 302(b) allocation. The new budget authority recommended totals $274 billion compared to $277.1 billion reported to the Senate last month in S. 2827. CBO estimates outlays of $262.5 billion which is well within the allocation for defense.

The original Senate Appropriations Committee recommendations in S. 2827 included $2.96 billion to replace the space shuttle *Challenger.* The conferees on the continuing resolution, however, propose that these funds be made available to NASA for the replacement orbiter, and therefore the HUD-Independent Agencies Appropriations chapter has been increased to reflect this adjustment. By originally proposing that the orbiter be funded in the defense chapter, the Senate successfully raised the issue and cut through several months of bureaucratic haggling over how to fund the orbiter. Now we can get on with the key element of the Space Recovery Program.

The recommendations of the conferees also include a rescission package totaling more than $5.3 billion. This is the first, comprehensive defense rescission package proposed in my tenure as chairman of the Defense Subcommittee. It is designed to achieve two objectives. First, rescinding prior year funds will have the effect of reducing outlays in fiscal year 1987 by $1.5 billion. This significantly contributes to our efforts to comply with, what I consider, the unrealistic outlay targets in the budget resolution. Second, rescinding prior year moneys will go a long way toward clearing the impression that persists that somehow there is a "slush fund" in the Department of Defense. The rescissions are derived from contract savings and lower costs from declining inflation. The rescission package was developed after exhaustive review by a GAO analyst on loan to the committee and the committee staff. By rescinding the money, the image that there is a DOD funding reserve should be put to rest.

Most of the Senate's key provisions pertaining to contract profit policy revisions have been retained. The conferees recommend a 5-percent reduction in progress payment rates, a requirement that defense contractors bear responsibility for 50 percent of the cost of production tooling, and most significantly, the provision contains a requirement that profits be calculated on the basis of investment and contractor risk. The objective of the provision is to reward efficiencies in productivity and reverse the trend of awarding profits based on increasing procurement unit cost.

In full compliance with the agreement struck between Congress and the administration, this bill also includes all the arms control provisions which are also included in the Defense Authorization Act passed last night. Although the appropriations conferees did not negotiate this agreement, it was our understanding that the agree-

71-059 O-87-38 (Pt. 22)

ment should be carried over to the continuing resolution and we have complied with that request.

With regard to other authorization agreements, we must recognize that both the authorization and appropriations bills have been moving concurrently. We've tried to coordinate information and data over the last few weeks to avoid accounting conflicts, but I have no doubt that differences will exist. Without a complete authorization agreement prior to our conference, I can only state that we have tried to minimize the differences. Aside from delaying consideration of the continuing resolution, there was no other alternative available.

In summary, the conference agreements for defense represents the absolute best settlement the Senate could expect. The appropriation levels recommended are adequate to continue the President's strategic modernization programs, support the existing force structure, and continue the high state of readiness which has been achieved over the last few years. It was a difficult task to achieve these results and also comply with the congressional budget requirements to cut $25 billion from defense. Several key programs and production rates had to be trimmed back significantly to meet these targets. In effect, the appropriations levels recommended in the conference agreement represent a "hard freeze" since we are at the same numerical levels as the fiscal year 1986 rate of spending. I am not sanguine that a repetition of this circumstance next year will yield similar results.

AIRPORT SLOT GIVEAWAY

Mr. HOLLINGS. Mr. President, I seek recognition not to offer any legislative proposal, but rather to note for the record one of my sincere disappointments of the 99th Congress. I am referring to the failure of Congress to override one of the most outrageous public policy initiatives ever perpetuated by the Department of Transportation, or for that matter, any Federal agency.

We are all fully aware of our current budgetary woes, being forced to sell off Federal assets, as well as to impose major funding reductions on important Federal programs. Yet, in late 1985, the Department of Transportation acted to willfully give away public assets, without charge, that have earned hundreds of millions of dollars for private companies.

I am referring to the rule allowing airlines to buy and sell, for their profit, landing slots at high density airports. This is a rule which the Senate correctly voted to repeal earlier this year, by an 82 to 12 margin. But unfortunately, time and a lack of action in the House have resulted in our inability to gain final enactment of legislation to remedy this insult to public policy.

I want my colleagues to clearly recall that we are talking about a rule which gave, free of charge, the landing rights at congested airports to the airlines fortunate enough to have been using them last December. The rule further said that after waiting a long and painful 90 days, those airlines could then sell the slots to other not-so-lucky airlines for any amount they can command, which, as it turns out, has amounted to hundreds of millions of dollars. In fact, in May of this year, some $65 million was paid from one airline to another as a part of a single package of landing slots!

How do we explain this generosity to a group of airlines when we stand here day after day making painful cuts to critical Federal programs?

I want to alert my colleagues that I intend to make sure that this rule is repealed as soon as official business begins in the 100th Congress. In fact, I intend to make sure that every piece of aviation legislation that comes out of the Commerce Committee next year will have an amendment on it to repeal this airline windfall profit rule.

This DOT rule is bad public policy. It was overwhelmingly rejected by the Senate. And I am committed to seeing it finally repealed in 1987.

Mrs. KASSEBAUM. As the original sponsor of legislation overturning DOT's "buy/sell" rule, S. 1966, I want to join my colleague on the Commerce Committee in expressing my continuing opposition to that provision. I have stated on a number of occasions that I do not believe that the DOT rule is good public policy or good transportation policy and I continue to feel that way.

There are some 4,200 total slots at the four airports in question. Exact figures as to the real value of these slots remain unknown, as carriers swapping slots are not required to report the value of such transactions. Suffice it to say, however, that these public assets amount to a very large windfall to the airlines that currently claim to own them.

I offered the text of my bill as an amendment to the National/Dulles Airport transfer bill in April of this year, believing that it was appropriate to link the two measures. My colleagues agreed overwhelmingly, both on substance and procedure, as the amendment was adopted by an 82 to 12 margin.

Since that time, the Senate bill stalled in the House of Representatives, forcing proponents of the transfer bill to separate the two measures. While that legislation was attached to the continuing resolution, I deferred, believing that it was inappropriate, at the late hour of this Congress, to add further to the weight of the omnibus funding bill.

Let no one think, however, that our inaction on this bill in this Congress, is a signal that we intend to let this issue die and fade away. On the contrary, I support the comments made by my friend from South Carolina on our need to act early next year, and wish to be associated with them entirely.

Mr. HOLLINGS. I want to thank the distinguished chairman of the Aviation Subcommittee for her statement of support. She has been a strong leader on aviation issues and I am pleased to be working with her on this particular matter.

I would now like to ask my friend, Senator EXON, the ranking Democrat on the Aviation Subcommittee, for his views on this matter. I know he has been a strong advocate of repealing the buy/sell rule, and is particularly concerned with the potential effect it could have on small community airline service.

Mr. EXON. I want to thank my distinguished colleague from South Carolina and join him in his remarks about the flaws of this preposterous regulation. I certainly think this rule will, in the long run, freeze many smaller communities out of any significant access to key airports in this country.

When the Aviation Subcommittee held hearings on this matter early in 1986, we heard testimony from airport executives, State and local officials, general aviation groups, and several airlines, all of whom agreed that small communities will end up the losers in this process.

Can anyone deny the fact, that once an airline pays millions of dollars for access to an airport, it will use those slots to serve the most lucrative markets? I think not. And as a result, the small communities that now rely on airline service to the major airports, will see the airlines take their slots, and begin service to major markets like Miami, Los Angeles, or Dallas.

I want my colleagues to know that I appreciate their intentions to repeal this outrageous rule, and I will be happy to join them in those efforts. Further, I would like to suggest that we consider making such amendments retroactive, so that the public, whose assets are being given away, does not lose out because of congressional inaction.

Finally, I hope that when we do take up legislation next year, we consider asking the Internal Revenue Service for a ruling on the tax consequences of any slot sales that may have been allowed to stand. Considering that the airlines selling the slots obtained them at no cost, I would be interested in hearing the IRS's interpretation of whether these transactions should stand alone for tax purposes, or if an airline should be allowed to expense other costs against these unearned profits and entirely avoid taxation on subsequent slot sales.

Mr. HOLLINGS. I thank my colleague from Nebraska for his comments. And I agree that we should examine the issues that he raises early next year.

Mr. FORD. If the Senator will yield, I would like to join him in his efforts to offer a friendly reminder that our work on this matter is not done. His efforts in ensuring that this issue is not forgotten are to be commended, along with those of the chairman and ranking Democrat of the Aviation Subcommittee.

The Senate overwhelmingly approved Senator KASSEBAUM's amendment to repeal this rule earlier this year. I think that sentiment has not changed, and I look forward to early enactment of similar legislation in the 100th Congress.

Mr. HOLLINGS. Mr. President, I appreciate the opportunity to address this issue here today. And I appreciate the comments made by my colleagues. With that, Mr. President, I yield the floor.

ECONOMIC DEVELOPMENT ADMINISTRATION SECTION OF THE CONTINUING RESOLUTION

Mr. D'AMATO. Mr. President, I rise to provide clarification on the section of the continuing resolution, House Joint Resolution 738, that concerns the Economic Development Administration and funding for projects in the city of New York. This clarification serves to avoid any questions as to the meaning or interpretation of this section of the bill.

Mr. President, at this time audits for approximately 22 projects remain to be closed out, and appeals by the city of New York concerning the disallowance of certain costs for other projects are still pending. Accordingly, the total amount of funds previously authorized and appropriated under title I of Public Law 94-369, but currently obligated and not disbursed, has yet to be finally determined. Such amounts can, and shall, only be determined through established audit close out guidelines, procedures, and practices. These include the city of New York's right of appeal in the event of the disallowance of cost concerning any specific project subject to audit.

In addition, reference was made to the availability of $14.1 million for New York, NY, in report language to accompany section 108(a) of last year's continuing resolution—Public Law 99-190. Such amount was provided the Economic Development Administration as a best estimate prior to audit close out of currently obligated, but undisbursed, funds available for reobligation and expenditure. As clearly indicated in section 108 (a) of last year's continuing resolution—Public Law 99-190—any funds currently obligated and not disbursed shall be available for reobligation and expenditure in New York, NY. Accordingly, the language referring to $14.1 million should not be interpreted to impose a limit on available funds to the city of New York. The total amount of funds shall be determined only through the established audit close out process.

Mr. President, the Economic Development Administration has been directed to provide these funds to the city of New York and to adhere to the purpose and intent of this legislation as stated.

Thank You, Mr. President.

FOREIGN OPERATIONS

● Mr. KASTEN. Mr. President, I would like to take just a few minutes to make some comments about the foreign assistance portion of the continuing resolution which is now before the Senate.

Mr. President, while the conference was deadlocked on the foreign assistance portion of the continuing resolution for several days, I am pleased to report that we were able to finally come to a resolution of our differences and more importantly, we were able to resolve most of those issues along the lines suggested by the Senate, especially with reference to increased funding for such important programs as the Child Survival Fund, the Agricultural Development Program, and the African Development Foundation.

In addition, while the conference did not agree to enact the F.M.S. reforms as passed by the Senate, the compromise agreement goes a significant way in that direction, and in addition, the managers, in the conference report, agree that the Senate proposals on F.M.S. reform have merit and should be considered by the administration and presented to Congress early next year.

This is a good compromise. The conferees recognized the potential problems pointed out by the Senate that something has to be done with the F.M.S. debt situation, or it potentially could cost the American taxpayers significant amounts of money.

Mr. President, I'm not going to go into all of the various items in the agreement, but I would like to point out that we agreed to provide $200 million in additional economic support funds for the Philippines, $50 million for emergency earthquake relief and rehabilitation for El Salvador, and once again this year we agreed to allow military assistance funds which are provided to Israel to be used for their aircraft program.

The language of the agreement with respect to the LAVI provides that not less than $300 million shall be for the procurement of defense articles related to that program in Israel, and for other activities if requested. It is assumed, however, that at least $250 million of the $300 million would be for the LAVI Program, with the potential for all of it being for the aircraft program.

Mr. President, two provisions in the continuing resolution entitled "limitation on development assistance" are intended to assure that obligations for Africa and Central America from fiscal year 1987 development assistance funds will be at least at the same percentage of total development assistance that each region received in fiscal year 1986. This does not preclude the total obligated for either region in fiscal year 1987 from exceeding the percentage that either region received last year.

Mr. President, a number of my colleagues have expressed concern that some of the funding for various programs is too low, but very frankly, with the budget situation, this is the best we can do.

Obviously, in these difficult budget times, foreign assistance must share cuts mandated by Gramm-Rudman-Hollings and the budget resolution.●

GIFT TO JACKSON FOUNDATION

Mr. STEVENS. Mr. President, I want to advise Members of the Senate that the continuing resolution includes an appropriation of $10 million for the Henry M. Jackson Foundation as a memorial to our late friend and colleague. This was proposed by Senator JOHNSTON and warmly endorsed by me and other members of the Defense Appropriations Subcommittee and the full Appropriations Committee.

The Jackson Foundation was established shortly after Senator Jackson's death on September 1, 1983. It has already raised more than $4 million in gifts and pledges from individuals, labor unions, corporations and governments. The Foundation hopes to raise its initial goal of $5 million by Scoop's 75th birthday on May 31, 1987. It has a long-term goal of raising $10 million from private sources.

Although there is no formal matching requirements for the appropriation to the Foundation, it is my hope that this Federal contribution will be viewed by Scoop's friends and supporters not as an end, but rather as a beginning: and that they will redouble their efforts to reach the Foundation's announced goal of $10 million from private sources, thereby matching the appropriation dollar for dollar.

The Foundation's program, focusing primarily on educational activities, sustains the Senator's belief in the basic importance of education in creating better understanding of the forces which shape our world today. It has already financed on an interim basis a chair in Modern Chinese Studies and support for graduate students in Chinese studies at the Jackson School of International Studies at the University of Washington.

Action by Congress in approving this appropriation to the Foundation will enable the Foundation, and its distinguished Board of Governors, to broad-

en its program of helping to educate the next generation of leaders in managing critical world relationships.

● Mr. ROTH. Mr. President, I would like to comment about some of the defense procurement reforms included in the fiscal year 1987 Department of Defense [DOD] appropriations bill, which is part of the fiscal year 1987 continuing resolution conference report.

I want to focus on those defense reforms which are part and parcel of the recommendations of the President's Blue Ribbon Commission on Defense Management otherwise known as the Packard Commission.

Mr. President, it's been 2 years since I went to the White House to recommend the creation of the Blue Ribbon Commission on Defense Management. In urging the creation of the Packard Commission, I set out an agenda of critical management and security issues I believe needed to be explored.

These issues included creating an independent civilian procurement office, ensuring the accuracy of cost estimates, and eliminating excessive defense contractor profits.

Mr. President, after the Packard Commission submitted its final report to the President, I introduced legislation which closely complemented many of the Commission's recommendations. The legislation, S. 2268, would establish in DOD the position of Under Secretary of Defense for Acquisition. It would also increase the efficiency of the management structure of major defense acquisition programs by reducing the number of officials to whom a weapons program manager must report.

It is encouraging to see a number of provisions of my bill incorporated in the fiscal year 1987 DOD appropriations bill that begin to implement the Packard Commission's recommendations. One provision includes creating the position of Under Secretary of Defense for Acquisition. The Under Secretary will be a civilian with significant authority to supervise the entire defense acquisition system. The Under Secretary will also have the responsibility to see that new programs are thoroughly researched, that military requirements are verified, and that realistic cost estimates are made before the start of full scale development.

How would such a proposal help improve the management of the defense acquisition process? It would ensure that someone—the Under Secretary of Defense for Acquisition—is identified and held accountable for the performance and cost of a weapon program. This person would have to answer for the cost increases and technical problems. This person would also enjoy the rewards and recognition of a job well done.

Other provisions in the Defense appropriations bill consistent with Packard Commission recommendations include a strategy for competition among prototypes of major weapons when the weapons are in development. The Packard Commission recommended competing prototypes and testing prototypes under simulated operational conditions, especially weapons systems involving unproven technology.

A third provision requires the Secretary of Defense to submit a plan to Congress on methods to enhance the professionalism, training, and education of acquisition personnel. This is consistent with the Commission's recommendation that DOD must be able to attract, retain, and motivate well qualified acquisition personnel.

Finally, a provision in the bill requires the DOD to establish cost, performance, and schedule data for all major acquisition programs.

There are other provisions consistent with the Commission's recommendations, Mr. President, but these are the ones in defense procurement that I believe are most important.

Mr. President, we've known for some time that DOD is in need of constructive reform. The acquisition process has been examined repeatedly over the years and we are all familiar with most of the many problems cited at one time or another as major factors in cost growth and mismanagement: Poor or overly optimistic cost estimates, "gold-plating", poor testing, lack of competition in contracts and schedule "stretchouts." Whether these are in fact the real causes of cost growth, or just symptoms of the problem, there is little doubt in my mind that 3 years of hearings on acquisition management in my Governmental Affairs Committee have convinced me of that fact.

In outlining the serious problems we face in improving the management of acquisition programs, it becomes apparent to me that the solutions of the past are no longer adequate. I believe we should consider more comprehensive and far-reaching changes which may threaten the status quo, but could help set the stage for real and lasting improvements.

That is why, Mr. President, I am encouraged by the reforms implementing the Packard Commission recommendations. With passage of the continuing resolution and the reforms it includes, we can finally see some action taken for lasting improvements to the defense acquisition system.●

ENERGY AND WATER DEVELOPMENT HIGH-LEVEL WASTE

● Mr. BENTSEN. Mr. President, I am pleased that the conferees resolved their differences on the funding level for the High-Level Waste Repository Program run by the Department of Energy [DOE]. The conferees agreed to a funding level of $420 million, with the possibility of an additional $79 million upon subcommittee approval. The approval is contingent upon DOE meeting the consultation requirements of the Nuclear Waste Policy Act.

This reduced funding level sends a strong signal to the Department of Energy that Congress is dissatisfied with the manner in which DOE has implemented the Nuclear Waste Policy Act. As I have stated repeatedly, Texas has had to bear the brunt of DOE's inability to carry out its responsibilities under the act.

The agreement reached by the conferees acknowledges these problems and puts a halt to site-specific activity at the first and second repository and the monitored retrievable storage facility. Clearly, DOE is prohibited from shutting down just the second repository and funneling the savings to the first repository program. Last May 28 DOE decided to abandon the second repository. Congress in this agreement rejects this determination and instead mandates that the entire High-Level Waste Program be scaled down until all of us have an opportunity to review the situation.

This agreement prohibits any site-specific activity, at first or second round sites. In Texas, this means that there can be no land acquisition, no drilling of bore holes, no sinking of exploratory shafts. The DOE is barred from undertaking any activity at the Deaf Smith County site during this fiscal year.

I plan on monitoring the situation closely to assure that DOE does not attempt again to contravene the will of Congress. As the conference agreement indicates, the concerns about DOE's implementation of the act, such as those I have expressed, are not just parochial concerns, but reflect concerns of the entire Congress. DOE would do well to heed the direction provided by Congress in this legislation.●

FUNDING LEVEL FOR THE DEPARTMENT OF ENERGY'S NUCLEAR WASTE PROGRAM

Mr. SIMPSON. Mr. President, I have just a few brief comments about the provisions contained in this continuing resolution affecting the Department of Energy's Nuclear Waste Program. I have been intimately involved with the nuclear waste disposal issue since virtually the day that I arrived in the Senate in 1979 and assumed my role as a member of the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works, first as ranking minority member and then, beginning in 1981, as chairman of that subcommittee.

In fact, as an original sponsor of the bill that led to the enactment of the Nuclear Waste Policy Act of 1982—the law which establishes the requirements that the Department of Energy must meet in carrying out this most crucial national program—I must say that I am deeply troubled by the

course that the Department of Energy has elected to take in carrying out this law. In May of this year, Mr. President, the Department indefinitely postponed work on the second geologic repository—a decision that is a clear violation of the act.

The provisions in the Nuclear Waste Policy Act requiring the Department of Energy to pursue a program for the development of two repositories were fashioned by the Subcommittee on Nuclear Regulation in 1981—with the leadership and perseverance of my fine friend, the exceedingly capable Senator GORTON—and I am intimately familiar with the delicate political and regional balance that we ultimately had to strike when we reported these provisions from the subcommittee. The basic two-repository structure was retained essentially intact by both Houses of Congress, and is now reflected in the provisions of the Nuclear Waste Policy Act.

A careful analysis of the legislative language makes it abundantly clear that the Department's decision to postpone indefinitely work on the second repository is a blatant violation of the act. In fact, both the General Accounting Office and the Department's own general counsel have advised that the decision taken last May violates the clear language of the Nuclear Waste Policy Act. In short, Mr. President, it is illegal.

I am not speaking today, though, Mr. President to address the question of whether DOE's action was illegal. The answer to that question is clear and I anticipate that, ultimately, the courts will so rule. I rise to address a much more fundamental problem facing DOE today—a problem that I think is reflectd in the decision that we are about to take in approving a substantial reduction in DOE's request for the Nuclear Waste Program. In short, Mr. President, the Congress no longer has confidence in the way that DOE is carrying out this program. It is abundantly clear to me, Mr. President, together with many of my colleagues who I worked alongside in fashioning the Nuclear Waste Policy Act in 1982, that decisions are being made in part—perhaps in very large part—based upon only the basest political ramifications of those decisions, and that, as a result, the entire program has been dangerously undermined and the technical credibility of this effort has been crudely sacrificed.

Accordingly, I endorse the decision reached by the conferees to reduce substantially the funds requested by DOE for carrying out this program, pending an opportunity for DOE to redouble its efforts to address the concerns that have been raised by the States and Indian tribes. Since I was not a conferee on this continuing resolution, though, Mr. President, I should like to ask the Senator from New Mexico, Mr. DOMENICI—who was not only a conferee on this bill, but also serves on both the Environment and Public Works and Energy and Natural Resources Committees, the two committees with jurisdiction over this program—if he could expand on the purpose of this provision and the underlying rationale for taking this drastic step.

Mr. DOMENICI. Mr. President, I certainly concur in everything that my good friend from Wyoming has said about the Nuclear Waste Policy Act, the rationale for requiring DOE to proceed with a program for the development of two repositories, and the purpose of this particular provision. He and I have been laboring in the trenches since the late 1970's on the issue of nuclear waste disposal and it is with great dismay that we are now witnessing the unravelling of this carefully crafted program and the disruption of the delicate political and geographic balance that is so essential to a successful program.

The conferees were deeply concerned about the course that this program is taking and the clear violation of the law as a result of DOE's decision to postpone indefinitely work on a second repository. Accordingly, we have reduced substantially the funds available for DOE in fiscal year 1987. The bill provides for a reduction from DOE's request of $769 million to a level of $499 million, with $79 million of this amount "fenced" until DOE certifies that a good faith effort has been made to comply with the requirements of section 117(c) of the Nuclear Waste Policy Act and both Subcommittees on Energy and Water Development appropriations of the House and Senate approve the expenditure of these funds. In addition, we have prohibited DOE from undertaking work involving the drilling of any exploratory shaft at any site in fiscal year 1987.

The conferees expect, Mr. President, that DOE will dedicate its efforts under this provision to addressing the concerns that the States and Indian tribes have raised, to resolving the pending litigation, and to restoring a strong measure of credibility to this program, rather than to charge forward with business as usual in the flawed course that DOE is now on.

The Continuing Resolution further provides that the funding reduction shall be taken against DOE's entire program effort. It would be my hope, Mr. President, that DOE will ensure that this reduction is applied uniformly to both the First and Second Repository Programs, as well as to all of the other programs, rather than to take disproportionate cuts in some programs, but not others. It is obvious to me, Mr. President, that we need to restore the work previously underway on the second repository program—and this uniform approach to allocating the reduction would enable DOE to move in that direction, by providing greater funding for the Second Repository Program. In fact, Mr. President, I specifically questioned my fellow conferees on this issue around the table at the time that it was discussed about whether the second repository work should move forward, and they all concurred that this effort should proceed in accordance with the requirements and schedules in the act.

In light of the decisions that have been taken by DOE this year, Mr. President, this program is now in deep trouble. Between now and the beginning of next session, DOE has an opportunity within the framework of this provision to restore a measure of credibility and technical soundness to this program, and to get this program back on track. From what I see, though, Mr. President, I am not optimistic—particularly since DOE persists in its view that the decision to postpone indefinitely the work on a second respository is not only legal, but a wise policy decision, even in the face of this program crumbling before their very eyes. Thus, unless fundamental changes are made between now and the beginning of the next Congress, Mr. President, I anticipate that we will see a major effort to reopen the Nuclear Waste Policy Act and that this effort will be successful.

Mr. SIMPSON. Mr. President, I thank the Senator from New Mexico for his comments. I might just add that unless a credible and adequately funded Second Repository Program is restored, I do not think that this program will succeed in the bizarre "one-legged" posture that DOE has it in now. In fact, if we return in the next Congress with no progress to restoring this program to the carefully balanced posture intended by Congress—and confirmed by the legal analyses undertaken by the General Accounting Office and the Department of Energy's general counsel—I intend to lead the effort to reopen the Nuclear Waste Policy Act and revisit the entire question of just how we intend to pursue nuclear waste disposal in this country. We can't duck this one. I trust that no one would find the present situation to be in the best interest of this program, but I see no other option for us in the face of DOE's insistence on heading along what I think is a reckless and shallow course.

DEFENSE SPENDING—MAKING TOUGH CHOICES AND SETTING REALISTIC PRIORITIES

Mr. LEAHY. Mr. President, as the 99th Congress draws to a close, it is important to reflect on what the past 5 years of defense buildup has accomplished. After spending over $1 trillion on defense, we must be stronger, but the question is, how much stronger? Have we made the difficult choices

and set the right priorities? Has an outpouring of the taxpayers' dollars bought us sound, balanced defense forces capable of deterring war or of fighting it if it comes?

Simply put, Mr. President, is our Nation as secure as it should be after the largest defense budgets in history?

Obviously, there have been important improvements. I am extremely pleased, for example, by the outstanding recruitment and retention rates of the All Volunteer Force. In absolute numbers, we have more weapons and more ammunition than 5 years ago. Nevertheless, it is clear that, given the massive resources committed to national defense, it is taking too long to see real gains in the capabilities of our general purpose forces. Our capability to wage conventional war is still well below what is needed to defend U.S. interests from the most likely challenges abroad. We are still far from reducing our excessive and dangerous overreliance on nuclear weapons to offset conventional imbalances with the Soviet Union.

These are not meant to be partisan observations. The roots of the present deficiencies in U.S. conventional forces go back through several administrations. Ultimately, they can be traced to the distortions and dislocations of the Vietnam war. However, a fundamental reason for the disturbing trends of recent years in defense spending priorities is the misplaced emphasis of the current administration on buying extremely costly and complex weapons, both nuclear and conventional, at the expense of conventional force readiness and combat sustainability. Between 1980 and 1985, spending for hardware grew by 95 percent, compared to only 37 percent for operations, training and other support, and a mere 13 percent in military pay. I am gratified that Congress this year has been able to slow down planned weapons purchases and to defer new program starts, while protecting and even increasing somewhat funding for operations and maintenance and for personnel.

Prior to this year, spending on equipment had gone up nearly three times as much as for the nuts and bolts of maintaining and operating the weapons. It had risen seven times as fast as the pay of the men and women who operate them. Congress has finally taken long overdue corrective action in bring weapons procurement and operations, maintenance, training, stockpiles, and pay into a more healthy balance.

Looked at in dollars, investment in new weapons programs has cumulatively totaled more than $470 billion from fiscal years 1981-86. The Pentagon now has unspent balances from prior year appropriations of more than $270 billion, exceeding by far estimates for this year's Federal deficit. Yet, despite this enormous sum, we are actually getting fewer and fewer weapons for more and more money. The Director of the Congressional Budget Office [CBO] recently testified that during the first 4 years of the current defense buildup, the United States spent over 150 percent more for tanks than under the Carter administration, but the number of tanks bought grew by only 30 percent. There are many, many examples of dollars spent yielding little in the way of increased defense capability. Despite 75 percent more dollars in the last 4 years for aircraft procurement than the Carter administration, the Reagan administration has bought 12 percent fewer airplanes. The present administration has bought 23 percent more ships in its first 4 years than the Carter administration, but spent 48 percent more to get them. In the last 4 years, the Army has bought 40 percent more helicopters but has paid 50 percent more for them. After spending over $1 trillion on defense in its first 5-year plan, the Reagan administration has managed to increase our uniformed personnel by only 70,000, while civilian bureaucrats in the Pentagon have mushroomed by nearly double that number.

Nor, unfortunately, have these larger investments resulted in economies of scale. According to the CBO, during the 1981-85 period, actual cost increases per unit for certain major weapons systems were higher than expected by anywhere between 9 to 64 percent. While these higher cost estimates were finally realistically projected in the last 2 years, resulting in a stabilization of prices for at least some systems, there is no doubt that unanticipated cost overruns accounted for a huge share of the tremendous spurt in procurement funding since 1981.

The marked tendency in the early years of the present administration to understate the real procurement costs of major systems led the CBO to conclude that investment accounts in the Pentagon have been underfunded by at least $100 billion—and when the bills came due much of that money was found in readiness, training, spare parts, operations and maintenance, and ammunition accounts. Unlike the big, multibillion-dollar weapons programs, there are no well-paid lobbyists to protect training or operations and maintenance, and these are the first to be sacrificed to pay for procurement.

Despite the huge expenditures of the last 5 years, the Soviets continue to enjoy numerical advantages in many major weapons categories. I am not a believer in the "bean counting" way of comparing military forces. However, the Pentagon's love affair with overengineered, excessively complicated, hard-to-maintain weapons could have very serious consequences for our men on the battlefield. Weapons will break down, replacements will be lacking, and our forces could be overwhelmed by sheer numbers.

After studying the results of the 5-year defense buildup, a defense specialist at the Congressional Research Service put it this way:

> The bottom line under wartime balance is that $1 trillion over the last 5 years did hardly anything to rectify the quantitative imbalance and it did a lot less to keep our technological superiority intact than we would like.

A study recently released by Congressman LES ASPIN, chairman of the House Armed Services Committee, concludes that the total spending on defense research and development had a real increase of 56 percent between 1980 and 1985. Yet, by the Pentagon's own comparison between the United States and the Soviet Union in 15 key military technologies in 1980 and again in 1985, there was no change in the relative standings in 11 of these categories. The U.S. position improved in one and declined in three—indicating, according to Congressman ASPIN, a "modest decline in the relative position of the United States overall despite the huge investment."

Where has all the money gone, or more appropriately, where has it not been spent?

As its first priority, the administration has emphasized the development and deployment of nuclear weapons. CBO estimates the President's strategic modernization program costs over $50 billion a year and will total more than $250 billion over fiscal years 1984-88. In the administration's first term, the share of the defense budget dedicated to strategic nuclear forces had an average annual real growth of 27 percent, compared to only 8.5 percent for general purpose or conventional forces and only 9 percent for the defense budget as a whole.

The 27 percent figure for strategic nuclear forces does not take into account the 15.5 percent average annual growth in the Department of Energy's nuclear warhead programs or the substantial amounts spent for ongoing research and development during the life of a major system such as the B-1 or the MX. It also does not reflect dollars going into the Strategic Defense Initiative or for so-called theater nuclear forces. The CBO estimates that cumulative real growth in spending for strategic weapons between 1980 and 1985 totals 182 percent, compared to 87 percent for conventional forces in that same period—more than twice as much, even though most defense experts agree the Nation's more urgent need is stronger conventional forces.

While the gap in real growth between nuclear and conventional forces has declined somewhat over the last 2 years, the improvements needed in conventional readiness will not be at-

tained without a substantial reordering of administration defense spending priorities.

The President's strategic modernization program has been justified on the basis of closing what he used to call the window of strategic vulnerability. Supposedly, that window was opened in the decade of neglect—the 1970's. That was the decade when the Trident submarine and Trident ballistic missile programs were begun. Five of the nine Trident submarines now operational were deployed before President Reagan took office. In that much maligned decade, the Minuteman II ICBM replaced the Minuteman I, the Minuteman III MIRVed ICBM was deployed, the B-52 began a major modernization program that extended its service life well into the 1990's, and the air-, ground-, and sea-launched cruise missile programs were started. The advanced technology stealth bomber, the most capable and sophisticated strategic system this Nation will have to maintain deterrence into the next century, was inaugurated and expended. The 1970's was the decade when the MX program was begun, a program intended to produce a mobile, survivable replacement to the silo-based and vulnerable Minuteman force. In what has to be one of the most dubious and illogical strategic decisions of the last 20 years, President Reagan has determined that MX will not be mobile and will in fact be placed in vulnerable Minuteman silos.

The hard truth is that neither the administration nor the military services have forced themselves to make difficult choices or set tough priorities in a fiscally restrained era. They continue to plan and budget for defense as though the Nation were not running staggering deficits and as though the national consensus in support of a major defense buildup had not been affected by the urgent need to get Federal spending under control. Rather than being guided by the principle of survivability, the administration has chosen to place first-strike MX missiles in vulnerable silos. That is easier than the painful decision to junk the MX as a costly failure, a dinosaur, from another age. We will spend almost $25 billion to buy 100 obsolete B-1 bombers, even though improved B-52 will remain effective until the 1990's—during which time the highly survivable stealth bomber will become operational. Rather than make the hard choice to kill the B-1 for good, the administration took the easy way out, and bought two new bombers when we need and can afford only one.

Despite the recommendations of the President's own Commission on Strategic Forces, the Scowcroft Panel, the administration is now starting to back away from the small, mobile, single warhead ICBM and is inching toward a bigger, MIRV'd version. But, to follow the Commission's recommendation to put strategic stability over mere warhead numbers is politically hard. So, the administration takes the path of least resistance. Fortunately, many in Congress are determined that our future modernization plans will include this small, single warhead, stabilizing missile, and are fighting hard to protect the program.

Unfortunately, starving conventional forces in order to spend more on nuclear weapons is not the only misplaced priority. Since the President's star wars speech in March 1983, the administration has poured billions into SDI research at the expense of basic technologies which affect the military balance between the United States and the Soviet Union. Massive funding increases for SDI in each of the last 3 fiscal years raise serious questions about the management, feasibility, and direction of this program. In a rare display of determination to resist the administration and the hordes of lobbyists for defense contractors roaming the halls, Congress has voted to cut this year's SDI request from $5.3 billion—a 75-percent increase over last year—to $3.2 billion. If Congress can hang tough next year, we will have gone a long way to getting this runaway money burner under some control.

There is more to the SDI story, and that is the impact it has had on conventional force readiness. Last year, the President exempted SDI from Gramm-Rudman cuts. In protecting SDI from Gramm-Rudman, the Secretary of Defense last year did not exempt readiness, training, spare parts, or ammunition from the cuts. This is a sad illustration of a pronounced bias to shortchange conventional forces in general, and politically unglamorous readiness accounts in particular, in order to protect high visibility programs like SDI.

A comparison of the administration's projections in the fiscal year 1986 defense budget with actual program requests in the fiscal year 1987 budget provides further evidence for just such a tendency.

In the fiscal year 1986 defense budget, the Air Force estimated it would ask for an increase of $2.5 billion in the fiscal year 1987 budget to cover needed initial and replenishment spare parts. However, in the actual fiscal year 1987 budget, that $2.5 billion increase was not requested. Perhaps not coincidentally $2.5 billion was approximately the increase the administration sought for SDI. Funding requested by the Air Force in the fiscal year 1987 budget will meet only 56 percent of replenishment requirements and 58 percent of fiscal year 1988 estimated rquirements. Such trends suggest that the Air Force will not have the spare parts it will need to sustain intensive combat operations for very long.

Looking at the Army, the actual fiscal year 1987 budget request for ammunition was $800 million below what Army planners had estimated in the fiscal year 1986 budget they would need for ammunition stocks. The actual fiscal year 1987 request was $243 million below the level appropriated in fiscal year 1986 for ammunition. In fact, if the current 5-year plan is followed, we will not attain the 1985 funding level for ammunition until 1991. Lawrence Korb, former Assistant Secretary of Defense for Manpower, Installations and Logistics, has publicly conceded that the Army itself has cut back on combat sustainability goals by lowering the requirement for a 60-day ammunition stockpile by 1988 to only a 50-day supply.

Some improvements are being made in munition reserves. CBO estimates that between 1981 and 1985 the Pentagon has spent $46 billion on ammunition stocks of all types. However, according to the CBO, "major gaps still exist between what the services have, and what they say they need." An analysis by the House and Senate Budget Committees, for example, indicates that by the end of 1987, the Army will still meet only 83 percent of its stated munitions requirements, the Navy 35 percent, the Air Force 42 percent, and the Marine Corps 57 percent.

These disturbing munitions shortages are exacerbated by the failure of our NATO allies to come even that close to meeting agreed ammunition stockpile targets, Commenting on the ammunition shortfall among the NATO allies, Lawrence Korb has said: "They don't have enough conventional munitions to fight the way as long as may be necessary to keep it from escalating. In the words of a former Pentagon official, 'ammunition always takes second place, until you get into combat.' "

Moreover, Pentagon officials have publicly questioned whether in a general mobilization U.S. industry would be able to make up for these years of neglect and misplaced priorities. The Pentagon's Assistant Secretary for Logistics, Readiness and Sustainability told Congress last year that "the capacity of U.S. industry is well short of the mobilization requirements."

While the administration takes pride the technological complexity and virtuosity of the equipment it is buying, unfortunately, it cannot justifiably claim that U.S. forces will either have the quantity of weapons required or, equally importantly, the necessary combat sustainability to wage large scale operations very long after the outbreak of a major conventional war.

Mr. President, I think it is fair to say the Defense Department has in large part been able to keep up major weap-

ons procurement even with tightening budgets only by stinting and cutting back on critical programs designed to make the United States capable of fighting and winning a large-scale conventional war. Another source of procurement funding is the so-called inflation dividend, the annual windfall the Pentagon receives thanks to padded inflation assumptions woven throughout the Defense budget. Because the Department of Defense contends that the prices of major weapons systems rise more rapidly than general prices, prior to the fiscal year 1986 budget inflation for such weapons was estimated at a rate 30 percent higher than overall inflation. The result, according to the General Accounting Office, has been the accummulation of a $44 billion slush fund over fiscal years 1982-86, not counting overestimates for the price of fuels.

Last month, Senators PRYOR, GRASSLEY, and I offered an amendment to require the Defense Department to use the same inflation estimates as all other agencies of the Federal Government. This amendment, which was endorsed by the National Taxpayers Union, would have also prohibited use of the Pentagon's special inflation "kicker," which adds on another 30 percent to the inflation adjustments in contracts for major weapons systems.

Mr. President, we simply can no longer afford to allow the Pentagon to conduct business like this. We can and we must control defense budgets better and set clearer spending priorities. We need what I have called a smart-defense philosophy to guide our basic defense spending decisions. The ingredients of a smart defense grow out of the many deficiencies in our current defense policy which I have described thus far.

First, and foremost, our strategic nuclear modernization should be based on three fundamental principles: stability, survivability, and deterrence. In our own security interests, we must avoid programs which depend on hair trigger launch for survivability, which themselves pose a first strike threat, and which are designed to wage rather than to deter nuclear war.

Second, the modernization of conventional forces must be the top national defense priority for a sustained period. The growth in weapons procurement should not outpace spending on key conventional force needs such as training, ammunition, spare parts, and operations and maintenance—and it most certainly should not be maintained at the expense of these programs. Our conventional forces must not only be modern, they must also be manned, maintained, and supplied in a manner which will give us the capability to sustain a major and prolonged conventional conflict without being forced to resort to nuclear weapons to avoid defeat.

Third, we can no longer allow research accounts to be so dominated by the strategic defense initiative. After all the massive spending on research and development since 1980, the technological balance between the United States and the Soviet Union remains essentially unchanged. This is unacceptable, especially when the West continues to rely so heavily on quality of weapons to offset quantitative disadvantages. Funding priorities need to be better balanced, particularly to achieve more progress in technologies which show real promise in improving our conventional capabilities against Soviet armor, artillery, tactical aircraft, attack submarines, and other categories in which they enjoy numerical leads.

Fourth, we should place much greater priority on buying simpler, more durable weapons in greater quantities if our forces are to have a chance of surviving the opening round of a conventional conflict with the Soviet Union. We must look to greater simplicity in weapons designs. For example, spending nearly $20 billion for one larger nuclear aircraft carrier and its supporting battle group makes no sense when, for the same price, we could buy several light carriers armed with Harrier VSTOL-type aircraft to meet our power projection needs. Spending half a billion dollars apiece to reactivate old World War II battleships—plus anywhere up to another billion and a half to arm them with cruise missiles and other weapons—isn't smart. We can get the most modern destroyers and cruisers for that money, without the huge manpower requirements to operate a battleship, and without its near total vulnerability in a major war at sea.

Fifth, the weapons we do buy should be tested under realistic battlefield conditions before they can be purchased in quantity. And, the troops which will have to operate them in combat should help design the tests. Let's stop letting the civilian and military bureaucrats in the Pentagon, helped by the weapons designers themselves, set up the tests. The people who are going to build the weapons should not be the ones to devise the tests the Pentagon will use to make its contract decisions.

Sixth, Congress and the President, in a constructive partnership, must act vigorously against massive waste, fraud, and abuse in the Defense Establishment. Timely implemenation of the Packard Commission recommendations would go a long way toward eliminating the horror stories about $800 hammers and $1,000 coffee pots.

Finally, being smart means having a coherent global defense strategy that matches commitments with capabilities. It means eliminating interservice rivalries over shares of the budget. It means providing the best military advice to the President without regard to parochial service interests. Congress has already taken a major step in this direction by enacting the Defense Reorganization Act under the courageous and enlightened leadership of Senators BARRY GOLDWATER and SAM NUNN.

Mr. President, there have been many improvements in our Nation's defense over the last 5 years—but we can do better, and we must do better so that our country is as secure as it can be.

URANIUM ENRICHMENT "OVERFEEDING"

Mr. SIMPSON. Mr. President, I should like to ask the Senator from New Mexico about a certain provision in the continuing resolution which he worked on in the conference. The provision that I have a question about deals with a practice which the Department of Energy has said it wishes to implement, and some claim they have been doing, at the uranium enrichment complex—a practice referred to as "overfeeding." This is a practice whereby DOE uses stockpile uranium to supplement the uranium delivered by its customers. I believe the Senator from New Mexico addressed this issue in the conference in a manner that prohibits DOE from engaging in this practice. Would the Senator from New Mexico be so kind as to explain to me this particular provision in the continuing resolution?

Mr. DOMENICI. Mr. President, I would be happy to. What we have done in the CR is selectively reject certain of the criteria for operating the uranium enrichment complex which were sent to us in July by the Department. The conferees agreed to restrict the ability of the Department to use stockpile uranium for overfeeding under both the Department's contractual and administrative authorities. In September 1985 when the Department found that the uranium mining and milling industry was not viable, the Secretary of Energy informed the Senate that he was going to postpone the Department's plans to do this overfeeding for 1 year. What we have done, in effect, is continue that moratorium on this practice. I will include the letter of the Secretary in the RECORD if that would be a help and I ask unanimous consent that it be included.

Mr. SIMPSON. I thank the Senator for his explanation.

The letter follows:

THE SECRETARY OF ENERGY,
Washington, DC, September 26, 1985.

Hon. GEORGE BUSH,
President of the Senate,
Washington, DC.

DEAR MR. PRESIDENT: Pursuant to the requirements set forth in section 170B of the Atomic Energy Act of 1954, 42 U.S.C. 2210b, I am transmitting the annual determination of the viability of the domestic uranium mining and milling industry.

Section 170B directs me to make an annual determination for the years 1983 to

1992. The attached determination covers calendar year 1984. The determination has been made in accordance with the criteria established by regulation (10 C.F.R. §§ 761.1-.8 (1984)). The annual assessment of the industry's condition, prepared by the Energy Information Administration, is also enclosed. This study, "Domestic Uranium Mining and Milling Industry: 1984 Viability Assessment," September 1985, provides the underlying information and analysis for this determination.

I have determined, in accordance with the provisions of the Act and the regulations, that for calendar year 1984 the domestic uranium mining and milling industry was not viable. In view of this determination, I have authorized the Department of Energy to offer its customers for enriched uranium an option that, if exercised, could have the effect of increasing domestic uranium sales. I have also directed the Department to postpone for one year a plan to feed some of its own uranium stockpile into enrichment plants.

In addition, I have requested the United States Trade Representative to examine this situation with a view to determining the appropriate available courses of action under U.S. trade laws. The Trade Representative has been requested to provide preliminary recommendations within three months.

Yours truly,

JOHN S. HERRINGTON.

DEPARTMENT OF ENERGY'S URANIUM ENRICHMENT REGULATIONS

Mr. SIMPSON. Mr. President, I am so very pleased to commend my good friend and colleague from the State of New Mexico, Senator DOMENICI, for the yeoman work that he has undertaken and the perseverance that he has shown in this bill in fashioning an approach that starts us down a most important road—the road to restoring our domestic uranium industry to a healthy, competitive position.

The provision contained in this bill addressing the Department of Energy's uranium enrichment criteria represents a most important step by this body in our efforts to get America's uranium industry back on its feet—for it is the first time that the Congress has acted since the Department of Energy declared that our domestic uranium industry is no longer viable. More importantly, it constitutes a firm message to the administration that we will not stand idly by as the Department of Energy presides at the funeral services for our domestic uranium industry.

Mr. President, it is time for the Congress to move forward swiftly and decisively to address the very serious problems that the domestic uranium industry faces today. Over the past 6 or 7 years, we have seen a steady and dramatic decline in the health and vitality of the uranium industry in this country. Wyoming employment in the industry has dropped to all-time lows, as mines and mills have been closed down, and we are on the verge of seeing this most valuable domestic resource go untapped or be regulated out of existence and lost indefinitely to foreign-supplied uranium.

In Wyoming, we have gone from over 5,000 employed in our mines and mills back in 1980 to only a few hundred toay. In fact, Mr. President, the State of Wyoming, which was once among the world leaders in production of yellowcake, now has only one uranium mill still in operation.

We cannot afford to continue down a road of ever-increasing reliance on foreign sources of energy. I have no legislative history as a protectionist, Mr. President, but our uranium industry is so vital to our country's efforts to achieve energy independence, as well as to assure our national security, and we must take all necessary steps to turn this grave situation around.

The provisions in this conference report constitute a solid beginning toward getting Wyoming's uranium industry back on its feet and Wyoming miners and millers back to work. We are prohibiting the use of uranium from the stockpile—a practice referred to as "overfeeding"; we are requiring the Department of Energy to offer its customers a free choice of transaction tails in the 0.2 percent to 0.3 percent range; We are prohibiting DOE, as they had proposed, from collecting the unrecouped costs associated with the enrichment enterprise, and declaring that Congress, not DOE, will make that determination; and we are sending a strong message of concern about DOE's approach to the enrichment of foreign origin uranium—the Department is under an obligation under section 161(V) of the Atomic Energy Act to address the ever-increasing flood of imported uranium.

This provision, Mr. President, is but a modest step—but I do think that it is an important step. Much work remains to be done, and I will continue to work for the enactment of the comprehensive package that Senator DOMENICI and I introduced in this Congress, S. 1004, so that we may get on with resolving many of the vexing and troublesome problems facing this vital domestic industry, ranging from the cleanup of the active uranium mill tailings sites, to the issue of imported uranium, to the issue of DOE's enrichment program. I commend my courageous colleague from New Mexico for the fine work that he has done on this provision before us today, and I look forward to a continued alliance with him as we seek to restore the domestic uranium industry to a healthy, competitive position.

Mr. McCLURE. Mr. President, the measure we are addressing today is not a provision to "Buy America" but an attempt by one industry to prop themselves up at the expense of another.

Nobody feels worse than I about the current situation of our domestic steel industry. I have been a strong proponent of our industrial and natural resource industries, especially as they relate to our national security. However, it makes little sense to use the argument that this provision will aid the steel industry and increase employment, when in fact it will do just the opposite.

The provision says that 50 percent of the materials and supplies on structures used for exploration and production activities on the Outer Continental Shelf [OCS] be of domestic origin and these structures be built in the United States.

A major purpose of the proposal is to protect domestic steel producers and fabricators of structures used in offshore production from foreign competition. However, the oil industry already purchases many of the most costly components of offshore platforms from domestic firms. And, over the life of a project, 90 percent of the total project cost is spent domestically, even if the jackets and piles are produced offshore.

As a result of this proposal, many marginal oil prospects will be abandoned, especially at today's oil prices, because the additional cost of the rig could not be justified in a benefit or cost ratio. For example, last year a major contract bid came in for a project offshore California in which the domestic bid of $200 million for the jacket and piles, was twice that of the nearest foreign bidder. Contrary to what many would like to believe, an additional $100 million in costs will cause most if not all oil companies to abandon even the best prospects for future development.

In addition, reduced offshore drilling and production would reduce employment directly in the oil and gas industry and indirectly in industries that supply inputs to petroleum drilling and production. According to a Battelle Pacific Northwest Laboratories study prepared for API in June 1985, up to 56,000 workers would be displaced by the year 2000 if "Buy American" requirements were imposed on OCS activities.

The ramifications of this provision are far reaching, not only affecting the worthy and necessary objectives of income and employment in other domestic industries, but also the U.S. exports of goods and technology and the national security objectives of offshore development of oil and gas resources.

To quote former Deputy Secretary of the Department of Energy, Kenneth Davis, at the recently held World Energy Conference in Cannes, France, "the oil outlook in the United States is bleak," the level of U.S. proved oil reserve additions is now just 600 million barrels a year, or roughly one-fifth of the country's annual production rate. Because of low oil prices, worldwide exploration investment is down consider-

ably. Spending on development has dropped another 20 percent this year and the number of exploration engineers has been cut by 10 to 20 percent.

The new "oil frontiers" are offshore. We cannot afford greater reliance on foreign sources by cutting off access to our own reserves.

Where would our steel industry be if we were to impose this so-called "Buy America on them? Let me tell you—while the increased cost of domestically produced jackets and piles to the oil industry would amount to $400 million to $500 million from 1986 to 2000—this represents 20 new planned platforms times the additional average costs of $20 to $25 million per platform—the cost to steel companies would be an additional $7 billion for domestic ferroalloys that are now imported over the same period of time at 1985 prices. This does not include the cost of imported metallurgical coal or coke which steel companies now use to process steel.

I do not use this example to suggest that I would support such an imposition on the steel industry any more than I support the proposal before us today. But I ask you, Mr. President, why should we be less concerned with the impact of this provision on our oil industry and the future of our domestic oil supply?

I implore my colleagues to vote with me in opposition to this ill-conceived provision.

URANIUM ENRICHMENT CRITERIA

Mr. GARN. On July 24, 1986, DOE submitted proposed new uranium enrichment criteria, as required by section 161v of the Atomic Energy Act, to relevant congressional committees for their consideration. I understand that two House committees and the Senate have disapproved the criteria as a package, and that now the joint conferees have enacted a section of the continuing resolution funding Government operations that withholds funds for implementation of some aspects of the criteria. As the Senator knows, I am extremely concerned about the adverse impact of the criteria on the domestic uranium industry; especially in light of the statutory requirement that DOE assure the maintenance of a viable domestic uranium industry and in view of DOE's acknowledgment that the industry is nonviable. What exactly have the joint conferees done?

Mr. DOMENICI. The Senate has now twice passed resolutions formally expressing its disapproval of DOE's proposed new criteria. As early as August of this year, the Senate passed section 612 of the House Joint Resolution 668, increasing the public debt limit. This section formally disapproved the criteria. More recently, the Senate adopted an amendment to continuing resolution House Joint Resolution 738 that prohibited the use of public funds for implementation of the criteria.

On the House side, both the House Committee on the Interior and the House Committee on Energy and Commerce passed resolutions with language similar to the language embodied in the Senate version of Senate Joint Resolution 699 rejecting the DOE criteria. It now appears that in Congress' rush to adjournment, a floor vote on the House resolution disapproving the criteria, much less coordination with the Senate, will not be possible.

As an interim measure, the conferees on the continuing resolution have today adopted a provision that prohibits use of Government funds for implementation of certain specific aspects of the enrichment program. Under the continuing resolution, Government funds will not be used to implement: First, unrestricted enrichment of foreign source uranium, except until such time as the pending court litigation on the proper interpretation of section 161v is resolved, at which time Government funds can be used for this purpose only if and to the extent such use is in accordance with the court's decision; second, limitations on free choice of transaction tails assays from 0.2 percent to 0.3 percent U-235 or imposition of an additional charge for selections in that range; third, the provision of the criteria purporting retroactively to validate enrichment contracts permitting unrestricted enrichment of foreign-source uranium for domestic end-use even in the event of a contrary court decision; fourth, any provision of the criteria that permits or results in reduction of feed material provided to DOE for enrichment by means of reduction of Government stockpiles; and fifth, any provision of the criteria that purports to determine the level of unrecouped costs that must be returned to the Treasury by the Enrichment Program.

Mr. GARN. How, if at all, does this affect the pending litigation between the domestic uranium industry and the Department of Energy?

Mr. DOMENICI. This legislation was intended to be neutral as far as the ongoing litigation goes—that is to say, we wish the court to resolve the litigation as if DOE had not issued its new criteria. The legislation allows the DOE to continue to run the Enrichment Program, with certain restrictions, pending the outcome of the litigation. It also allows DOE to continue to enrich foreign-source uranium for domestic end-use until the U.S. Court of Appeals for the Tenth Circuit rules on that issue. The legislation recognizes that the decision concerning the proper interpretation of section 161(v) is now pending before the court. But it makes very clear that Congress will allow DOE to continue such a practice only until the tenth circuit rules on the issue, and if the tenth circuit decides that section 161v requires restrictions on enrichment foreign source uranium, then DOE must abide by that judgment, and no Government funds may be used in any way inconsistent with that judgment.

As one who has been close to the section 161(v) issue for many years, and who was a cosponsor of the legislation that became section 170B of the Atomic Energy Act, I personally have no doubt that DOE's position that it has unfettered discretion under section 161v to withhold enrichment restrictions on foreign-source uranium for domestic end-use even if the domestic industry is nonviable is wrong as a matter of law. I believe that the plain language of section 161v, its legislative history, and prior administrative interpretation are very clear on this point. Indeed, as I've previously stated, section 170B was intended to reinforce DOE's obligation to take some action restricting enrichment of foreign-source uranium by requiring a formal annual viability determination to trigger such action in the event of a determination of nonviability.

Mr. GARN. I concur in the Senator's interpretation of sections 161v and 170B. Is there some sort of "legislative stay" provision in this legislation that could allow DOE to continue unrestricted enrichment of foreign-source uranium even in the event of a contrary ruling from the tenth circuit pending the time DOE could petition the Supreme Court to review that ruling?

Mr. DOMENICI. No, the language of section ——— is very clear. It says that Government funds may continue to be used to enrich foreign-source uranium for domestic end-use only "until final judgment or dismissal in the pending litigation." This means that, if the tenth circuit decides that section 161v requires imposition of enrichment restrictions on foreign-source uranium, DOE must impose those restrictions and cannot continue to use Government funds for unrestricted enrichment of foreign-source uranium.

Of course DOE would be free to petition the Supreme Court for certiorari, and could petition for stay of the tenth circuit decision pending disposition of its petition for certiorari.

Mr. GARN. Is the conference action in any way intended to alter the requirements of section 161v?

Mr. DOMENICI. No. We do not intend to alter section 161v, on the requirement that DOE assure the maintenance of a viable domestic uranium industry. This amendment should assure that the DOE cannot simply come in through the backdoor and overturn the legal requirement to have a viable domestic uranium industry. The district court in Colorado has

recognized this fact by its decision of last June.

Mr. GARN. I thank the Senator.

S. 2181 AND H.R. 281, THE CONSTRUCTION INDUSTRY LABOR LAW AMENDMENTS OF 1986

Mr. ABDNOR. Mr. President, I note with regret that the House of Representatives has again voted to support the inclusion of the Construction Industry Labor Law Amendments of 1986 in the continuing resolution for fiscal year 1987.

As a member of the conference committee working on the continuing resolution, I have strongly resisted all efforts to include this harmful measure in any funding bill.

That amendment would have far-reaching consequences for construction workers and could be easily extended beyond just this segment of workers.

Supporters of this legislation say that it simply clarifies current construction labor law. I don't equate clarification with mandatory union membership and this is exactly what this amendment would do. It would force thousands of construction workers across the Nation into joining a union in order to gain work.

One target of this measure is employers who operate both union and nonunion businesses under separate entities. This measure would make legitimate dual shops illegal, thereby eliminating "double breasting."

This amendment would also allow common situs picketing. A labor dispute with any subcontractor could result in the shutdown of the whole construction site. Clearly the sole purpose of this provision is to enhance the power of union leadership.

An even more dangerous weapon would be the legitimization of multisitus picketing. This would permit unions to strike a contractor, say in New Jersey, in response to a labor dispute with the same contractor in South Dakota. In other words, out of State pressure exerted by Eastern labor bosses could be used in any State to force both employers and employees into dealing with a union.

Enactment of this amendment would be tantamount to Federal repeal of State right to work laws. No worker in his right mind would refuse to join a union knowing he would be at its mercy under a union shop. His ability to freely choose the conditions of employment would be sharply restricted if not destroyed.

The people of South Dakota strongly support the right to work concept. They do not want South Dakota's right to work law, which expresses their will, compromised by legislation dictated by giant labor bosses. They do not want strikes and labor disputes encouraged by interests outside our State.

This amendment would also expand the use of compulsory union dues for political purposes by forcing union membership on these construction workers. Americans have always honored and treasured the principle of freedom of choice. This legislation would deny this right to thousands of workers across the Nation and set the stage for even larger union power grabs in the future.

I urge my colleagues in the Senate to resist the efforts of union bosses to force this legislation on the workers of our Nation.

CLARIFY THE LABOR/HHS APPROPRIATIONS CONFERENCE REPORT

Mr. WEICKER. Mr. President, I rise today to clarify a vital point regarding the Title Ten Family Planning Program. This issue was raised by House conferees to the Labor/HHS appropriations bill and I believe it merits further explanation.

As happens all too often around here, the administration—in this case, the Office of Population Affairs at the Department of Health and Human Services—is proposing significant changes to a program it would probably kill if it had the chance. Especially troubling to this Senator was the announcement of these changes just days before the scheduled adjournment of the 99th Congress.

First, as most of my colleagues know well, title 10 of the Public Health Service Act is the major family planning effort of the Federal Government. At a time when teenage pregnancy is at epidemic proportions, at a time when grinding poverty is the guaranteed lot of thousands of unwanted children each year, title 10 family planning is the linchpin of Federal involvement. Programs that receive Federal money in this effort are successful precisely because they offer what many non-Federal programs do not: That is, a full range of medically expert counseling and referral for such things as proper prenatal care, contraception and options for unintended pregnancy, including abortion. The importance of this full range of medical information is not just a good idea according to Congress, it's considered essential by the American College of Obstetricians and Gynecologists.

There has been a tremendous amount of activity regarding title 10 in the 99th Congress. Last year, the Senate Labor and Human Resources Committee passed unanimously a 3-year reauthorization of the program, which is currently on the Senate Calendar. If the bill was to come to the floor tomorrow, I know there would be serious and well-meaning attempts to change the Federal role in this area. I'm confident we could defeat those amendments, but apparently the time involved would be too great according to the leadership. That's unfortunate. The Senate should be permitted to address the issues covered under title 10 and I'm confident it will in the 100th Congress.

In the House of Representatives, two committees—the Committee on Appropriations and the Committee on Education and Labor—rejected by overwhelming margins efforts to restrict information available to women under title 10.

Now, despite defeat in the House and unanimous committee support of longstanding title 10 services in the Senate, the Department of Health and Human Services has decided to accomplish administratively some of the very changes opponents of the title 10 program have been unable to make legislatively.

First, without consulting Congress and providing only the barest information, the Department reportedly will make certain types of counseling optional for programs of family planning that want to receive Federal money. For the first time, agencies that refuse to mention abortion when counseling a woman with an unintended pregnancy could receive Federal money for this sort of so-called family planning service.

Second, HHS is proposing to change the title 10 funding allocation formula, a change that will benefit some regions, while hurting others, and is certain to produce a major disruption in family planning services in the interim. It would be one matter, Mr. President, if this funding change was proposed for fiscal 1988 and subject to review or comment, but it is not. It is instead to be made now in fiscal 1987. Again this is a change made unilaterally by the Department. Congress and constituents of family planning services were kept completely in the dark.

The conference report for the Labor/HHS appropriations bill contains language urging that the title 10 program be left intact pending action on the reauthorization bill, and directing the Secretary of HHS to administer the entire program for fiscal year 1987 in the same manner, and under the same allocation formula which governed program operations during fiscal year 1986.

As chairman of the House-Senate conference, I joined with my colleagues from the House in directing the Secretary to refrain from making any change—in either the guidelines or the allocation formula—at this time. If substantive changes are to be made in the Family Planning Program, the reauthorization bill is the place to make them, not through the back door by administrative fiat as the Department is attempting.

Mr. HATCH. Mr. President, as we turn to consideration of the continuing resolution, I would like to ask my friend and colleague, Senator WEICKER, for a clarification concerning the use of funds made available to

reduce the demand for new drugs. When the statement of the managers was written to accompany the continuing resolution, changes were being further refined to reflect a different distribution of the funds. This is why today I seek clarification that it is the intent of the managers of the conference that the authorizing legislation supersedes the language for distributing the new funds for treatment, rehabilitation, prevention, and education program.

Mr. WEICKER. That is certainly my understanding. We have every intention that the most recent agreements made between the House and the Senate shall be the method by which the funds appropriated shall be expended. There was no effort to proscribed the method by which these new funds should be distributed. As consideration of the continuing resolution proceeded, the authorization, a snapshot of the authorizing legislation as we believed it to exist at that time, is what is contained in the statement of the managers. Our intent is now, and has been, that the funds appropriated should follow the method of allocation outlined in the authorization.

Mr. HATCH. Thank you. There has been great concern expressed about this language and I appreciate your willingness to clarify this point.

Mrs. HAWKINS. Mr. President, I also want to thank my colleagues for clarifying that the authorizing legislation will indeed supersede the conference agreement to the continuing resolution. I appreciate my colleagues' willingness to increase the appropriation levels for the treatment and prevention provisions in our war against drugs. Certainly additional funds will provide the tools that the Federal Government and the States need to deliver essential services.

Mr. CHILES. Mr. President, I would like to join my colleagues in expressing concern about the conference report language accompanying the continuing resolution for the drug abuse education, prevention, treatment, and rehabilitation funds.

It was my understanding when we acted on title II, chapter IV to fund the programs to reduce the demand for drugs, that we were simply appropriating $200 million for the Department of Education and $241 million for the Department of Health and Human Services, leaving all the decisions on the purpose and allocations of those funds, and the shape and structure of those programs, to the authorizing process.

It is my understanding that report language was meant to be broadly descriptive of the types of activities and very general. My concern is that the language might be construed as prescriptive and allocating the funds along the lines of the House-passed version. And at the very time the conferees were adopting this on the continuing resolution, negotiations and movement toward a compromise on the issues were going on between the House and the Senate.

I would like to clarify two things with the leadership and the floor managers of this resolution:

First, that our legislation authorizing the demand reduction programs—education, prevention, treatment, and rehabilitation—supercedes and transcends the conference report accompanying the continuing resolution for these programs upon enactment; and

Second, that the report language is not the most current or authoritative documentation of congressional intent for the use of funds considering subsequent legislative activity.

Mr. CRANSTON. Mr. President, as I indicated when this omnibus drug legislation was first before the Senate and in separate remarks yesterday on the revised compromise version, I feel it is important that the Senate insist on providing for the VA's ongoing drug and alcohol treatment programs a reasonable amount of the drug and alcohol treatment funds that are being appropriated in this resolution. That is why I proposed the earmarking of funds that was adopted by the Senate both in its version of the continuing resolution and in the omnibus drug bill—$11 million in the former and $12 million in the latter—out of the additional treatment funds being provided for ADAMHA. Unfortunately, through a series of misadventures, specific provision for these VA treatment funds has fallen out of the conference report on the continuing resolution, but, as has just been made clear, it is intended and contemplated that the transfer of funds to the VA that is included in the most recent agreement on the omnibus drug bill is intended to be carried out—pursuant to section 2107 of the Public Health Service Act (42 U.S.C. 300aa-6) or other applicable authority—from the additional appropriations to ADAMHA contained in the continuing resolution.

I thank the Senators for this clarification.

Mr. DOLE. Mr. President, the conference report before us contains a 105 per centum limitation on per pupil payments under Public Law 81-874 to so-called super "A" districts. However, due to the fact the authorizing statute contains special provisions relating to the 5 school districts which are coterminous with military installations, including Fort Leavenworth, KS, as well as districts deemed eligible for sections 3(d)(2)(B) and 3(d)(3)(A) of Public Law 81-874, it is my understanding the payment cap is not intended to apply to the calculation of fiscal year 1987 payments to these categories of federally impacted school districts.

Mr. WEICKER. The distinguished majority leader is correct. The payment cap contained in this conference report is not intended to supercede the special provisions in the authorizing statute as amended relating to the calculation of payments made to coterminous districts and districts deemed eligible for payment under section 3(d)(2)(B) or section 3(d)(3)(A) of Public Law 81-874. Thus, the language in this conference report is not intended to reduce in any manner payments made to these heavily impacted local educational agencies.

Mr. DOLE. I thank the distinguished chairman of the Appropriations Subcommittee on Labor, Health and Human Services, and Education and Related Agencies for clarifying this important matter.

OKLAHOMA UNIVERSITY ENERGY CENTER

Mr. NICKLES. Mr. President, I would like to ask the distinguished chairman of the Energy and Water Appropriations Subcommittee about the status of the Oklahoma University Energy Center project.

Mr. HATFIELD. Mr. President, I have assured my good friend from Oklahoma that I would assist him in securing a grant of up to $9 million to match 20 percent of the $34 million already committed by private sources and the State for construction of the remaining portion of the University of Oklahoma Energy Center.

Unfortunately, because of reasons beyond our control, it was not possible to appropriate additional money for this purpose during the conference on the continuing resolution.

However, I would like to assure my distinguished colleague from Oklahoma that we intended that the Department of Energy be encouraged to use up to $9 million from existing funds appropriated by this bill, if available, to provide for construction and capital equipment for the energy research center at the University of Oklahoma in Norman.

We realize the financial strain the industry and the people of Oklahoma have had from the oil downturn and want DOE to do all it can to help this fine project.

Mr. NICKLES. I thank the distinguished chairman of the Energy and Water Appropriations Subcommittee.

RIVERTON, WYOMING INACTIVE URANIUM MILL TAILINGS SITE CLEANUP

Mr. SIMPSON. Mr. President, I should like to ask the distinguished manager of this resolution, the Senator from Oregon, a question about the funding level provided in this bill for the Department of Energy's Uranium Mill Tailings Remedial Action Program. For some time now, DOE and the State of Wyoming have been engaged in extensive discussions with regard to the Susquehanna inactive uranium mill tailings site near Riverton, WY. This site, Mr. President, is one of the nine high-priority sites that

have been identified for priority attention by DOE. As I understand it, the State of Wyoming and DOE, after considerable effort and work by both sides, are near agreement on a remedial action plan for the Riverton site. If agreement is reached on an appropriate remedial action plan and if DOE and the State resolve the remaining questions on the appropriate cost-sharing arrangement, all parties should be in a position to proceed with remedial action in fiscal year 1987. Is it the understanding of the chairman of the Appropriations Committee that, within the overall funding level agreed upon by the conferees for DOE's remedial action program, this bill provides sufficient funding to undertake the remedial action work at the Riverton site?

Mr. HATFIELD. Yes, Mr. President, within the funding level agreed to by the conferees, we fully expect that the Department of Energy will be able to carry out those remedial actions contemplated in fiscal year 1987, if the State and DOE reach agreement on a remedial action plan. In fact, as one of the nine high-priority sites, we would expect DOE to allocate sufficient funding from the amount appropriated under this resolution to undertake remedial action involving the Riverton site in fiscal year 1987.

Mr. SIMPSON. I thank the Senator for his explanation.

URANIUM ENRICHMENT CRITERIA SUBMITTED BY THE DEPARTMENT OF ENERGY

Mr. HELMS. Is provision (iii) intended to modify existing utility service contracts between utilities and the Department of Energy?

Mr. DOMENICI. Provision (iii) is not intended to modify existing utility contracts. We are aware that numerous utility service contracts presently exist between U.S. utilities and the Department of Energy. It is our intention to stay neutral on the issue of contracts pending the judgment from the 10th Circuit Court of Appeals.

Mr. HELMS. Is it the intent of this provision to maintain the status quo of utility service contracts until such time as the present litigation concerning utility service contracts is resolved?

Mr. DOMENICI. It is the intent of this provision to remain neutral on the validity of utility service contracts. The validity of these contracts is presently being challenged in the Federal courts. It is not our intent to prejudge that litigation.

Mr. HELMS. Is provision (v) intended to declare congressional approval that a prior unrecouped Government cost exists and that the Department of Energy is entitled to recover such cost?

Mr. DOMENICI. It is not the intent of provision (v) to approve the Department of Energy's position that a prior unrecouped Government cost exists. This is a matter that has received a great deal of attention and should be determined by Congress next year.

Mr. HELMS. Is it the intent of this provision to prejudge litigation presently pending before the U.S. court of appeals questioning the appropriateness of the prior unrecouped Government cost provision of the Department of Energy's uranium enrichment criteria?

Mr. DOMENICI. It is not the intention of provision (v) to prejudge any litigation challenging the prior unrecouped Government cost provision. As noted above, this provision in the Department of Energy's uranium enrichment criteria drew a great deal of attention and has of yet not been resolved. This provision in no way should be viewed as resolving the matter, but rather indicates that the issue has been set aside until it can be taken up next year.

Mr. STEVENS. Mr. President, I would like to engage in a colloquy for a technical clarification in the continuing resolution provision allowing eligible Rural Electrification Administration [REA] borrowers to prepay all their REA-related debt.

A sentence in this provision which deals with direct or insured loans states that, "No guarantee or other financial assistance shall be available to the borrowers to refinance outstanding loans prepaid hereunder."

I would ask Senator ABDNOR, the chairman of the Subcommittee on Treasury and Postal Service Appropriations, to inform me that my understanding that the use of the word "hereunder" in the forementioned sentence refers only to the prepayment of direct or insured loans, and not to prepayment of guaranteed loans which are covered elsewhere in the provision.

Mr. ABDNOR. Mr. President, the Senator is correct in his understanding. The use of the word "hereunder" in the sentence he references, refers only to the prepayment of direct or insured loans.

REA PRIVATIZATION DEMONSTRATION PROGRAM

Mr. STEVENS. Mr. President, the continuing resolution, as agreed to by the conference committee Wednesday morning, would establish a Privatization Demonstration Program" for Rural Electrification Act [REA] borrowers. Under the conference committee's demonstration program, REA electric cooperatives with REA-guaranteed Federal Financing Bank [FFB] loans have the option of electing to prepay their high interest loans, without penalty. If refinancing is necessary, private capital must be used, and a 90-percent loan guarantee is made available.

In return, REA cooperatives choosing to participate in the demonstration program would be required to pay off all of their REA obligations, including their direct and insured loans from the REA revolving fund, and to forgo any future eligibility for REA loan programs.

The intent of this demonstration program as approved by the conference committee is twofold: First, to encourage and assist REA cooperatives to move into private capital markets for financing needs; and second to provide financial benefits through prepayment of high interest loans to the consumers of participating cooperatives.

The demonstration program amendment has the support of the administration. They were actively involved with my office in negotiations leading to its development. Loans prepaid under the demonstration program would result in significant outlay savings. These savings would be in addition to the $2 billion estimate for Federal Financing Bank refinancing by REA borrowers under the refinancing provisions reconciliation bill for needy cooperatives.

Mr. President, I ask unanimous consent that an October 14, 1986, letter on the demonstration program from the Director of the Office of Management and Budget be printed in the RECORD at the conclusion of my remarks.

Mr. President, I was extremely disappointed that late last night the House of Representatives adopted an amendment which would limit the demonstration program to REA Cooperatives in the State of Alaska. The House of Representatives' Alaska amendment will permit a demonstration by the Chugach Electric Association should Chugach decide to participate in the program. It is unfortunate, however, that the House will deny the benefits of this demonstration program to other cooperative utilities in other States.

I expect Congress and the administration next year to carefully review the results of this demonstration program, with an eye toward its expansion. The demonstration program is a very good idea that should result in very substantial outlay savings to the Federal Government and to consumers in the service area of participating utilities.

I and others eagerly await the privatization demonstration program's implementation and its results.

Mr. President, I ask to have printed in the CONGRESSIONAL RECORD a letter of October 14 from Chugach Electric Association, a fact sheet on the demonstration program, and a letter from the National Rural Electric Cooperative Association [NRECA] supporting this provision as modified by the House.

The letter follows:

EXECUTIVE OFFICE OF THE PRESIDENT,
OFFICE OF MANAGEMENT AND BUDGET,
Washington, DC, October 14, 1986.

Hon. TED STEVENS,
Committee on Appropriations,
U.S. Senate, Washington, DC.

DEAR TED: The Administration supports the amendment you sponsored to the Continuing Resolution which would establish a privatization demonstration program for electric and telephone Rural Electrification Administration (REA) borrowers with outstanding REA guaranteed Federal Financing Bank (FFB) loans. This program will provide an option to such borrowers to repay all outstanding REA-guaranteed FFB loans, without a prepayment premium, providing certain conditions are met.

Borrowers electing this option would be required to repay all outstanding REA insured and guaranteed FFB loans and to forgo future REA program eligibility. Under the demonstration program, any outlay savings would be in addition to the $2 billion estimate for FFB refinancing by REA borrowers under the Reconciliation bill.

We believe that your amendment provides an important opportunity for REA borrowers to make the voluntary transition from reliance on REA lending assistance to private capital markets. Under current law, this opportunity is virtually nonexistent. We therefore urge adoption of your amendment.

Sincerely yours,

JAMES C. MILLER III,
Director.

CHUGACH ELECTRIC ASSOCIATION, INC.
Anchorage, AL, October 14, 1986.

DEAR MEMBER OF CONGRESS: Chugach Electric Association strongly supports the provisions contained in the Reconciliation Act and in the Continuing Resolution [CR] permitting Rural Electrification Act [REA] borrowers to refinance their Federal Financing Bank [FFB] loans. These provisions are similar in purpose and operation and are deserving of the support of the Administration, the Congress, the public and the beneficiaries of REA loan programs.

By way of background, you will recall that the Supplemental Appropriations Act which became law on July 2, 1986, contained a provision which permitted all electric and telephone cooperatives to refinance their high interest loans from the FFB using private sector capital and without prepayment penalties. This provision of law was rendered ineffective when the Treasury Department issued implementing regulations on August 12, 1986, which, by their terms, disqualified all electric and telephone cooperatives except those which were bankrupt or virtually bankrupt.

The response of the Congress to this blatant failure of the Department of the Treasury to faithfully implement the law as enacted was twofold.

First, a provision was negotiated by some Members of Congress with the Administration in the Reconciliation Bill. This provision permitted, on the basis of "need," as determined by the Administrator of the REA, some REA borrowers to prepay their high interest loans with the FFB and to refinance these loans in the private sector using the Section 306 loan guarantee. This provision has a $2 billion "floor." However, in light of the refusal of the Administration to implement the language and policy contained in the Supplemental Act, it is abundantly clear that the legislative "floor" is also an Administration "ceiling."

Second, a further provision was negotiated by other Members of Congress with the Administration in the Treasury Appropriations Title of the Continuing Resolution [CR]. This provision extended to some REA borrowers the right to prepay, without penalty, all their high-interest loans with the FFB. This option would require those borrowers to prepay, using private sector capital, with a reduced 90 percent Section 306 loan guarantee. However, any REA borrower which chooses to exercise this option must also agree to other conditions: (1) the utility must refinance all of their loans, including two or five percent direct or insured loans, within one year of the first loan's prepayment; and (2) after once exercising this option, the utility is no longer eligible, at any time in the future, for any new loan under the REA program.

These provisions are consistent in purpose and constitute sound economic and public policy. While they do not achieve the full objectives Congress proposed in the earlier Supplemental Appropriations bill, it appears that they go as far as this Administration can be stretched in agreeing to a new option for refinancing federal loans to REA cooperatives.

The Reconciliation Bill provides important refinancing benefits to the nation's most needy electric utilities in the REA program. The CR provision opens this window a little further to give some other REA utilities with high interest FFB debt the one-time option to have the benefits of refinancing if they agree to forego all further loans under the REA program.

We urge your support for both of these measures. They provide important benefits and new refinancing options which will directly benefit the ratepayers of the nation's electric and telephone cooperatives.

Enclosed is a fact sheet on this subject for your use and information.

Sincerely,

RICHARD D. NEWLAND,
General Manager.

FACT SHEET

NEW REFINANCING OPTION FOR REA BORROWERS

The Treasury and Post Office Appropriations Title of the fiscal year 1987 Continuing Resolution adds a new Section 311 to the Rural Electrification Act (REA). This section permits electric and telephone borrowers the option to repay, without penalty, but with private capital, all of their high interest Federal loans. REA borrowers under this option must agree, however, to refinance all of their existing loans within one year and to forego any future access to REA loan programs.

Background information and the major elements of this new optional program, which enjoys the active support of the Administration, are set forth below:

The Supplemental Appropriation Act of July 2, 1986 would have permitted all REA borrowers to prepay Federal Financing Bank (FFB) loans without penalty and to refinance using private capital and the REA loan guarantee;

Implementing regulations issued by the Department of the Treasury on August 12, 1986, however, rendered this provision of law ineffective and would enable only bankrupt or near bankrupt REA borrowers to refinance;

The new program in the Continuing Resolution is totally optional for any utility borrower with REA-guaranteed FFB debt;

The optional program in the Continuing Resolution is similar in purpose and consistent with language contained in the pending Reconciliation Bill, which would permit the "neediest" REA borrowers to prepay and refinance their high interest FFB loans;

The optional program does not affect in any way the FFB refinancing provisions in the Reconciliation Bill. Any funds utilized under the optional program will be in addition to the $2 billion-plus authorized for refinancing of FFB debt by REA borrowers under the Reconciliation Bill and will reduce outlays;

Under the optional program, REA-guaranteed loans must be refinanced with private capital and will carry a Federal guarantee on only 90 percent of the outstanding balance refinanced. The 90 percent guarantee is not otherwise limited in its transferability or assignability;

REA direct or insured loans must also be prepaid under the optional program. Borrowers will be allowed to prepay their direct or insured loans at the lesser of the outstanding principal balance or at a discounted rate to be set by the Administrator of the REA. No Federal guarantee will be available for refinancing direct or insured loans;

The impacts of the optional program will be minimal on the REA revolving fund, from which direct and insured loans are made. This is because eligibility is restricted to those with outstanding high interest FFB debt guaranteed by REA. Only a few of these borrowers, which are mostly generation-and-transmission cooperatives, have any direct and insured loans. Similarly, relatively few distribution cooperatives have any guaranteed loans to qualify under the optional program. Refinancing that does occur under the optional program would result in an initial inflow of cash to the Revolving Fund, with little impact thereafter and would provide a tremendous benefit to the ratepayers of the eligible cooperatives.

Where a generation-and-transmission [G&T] borrower elects to prepay under the program, that G&T's distribution cooperative members would still be eligible for REA loan assistance for their retail consumer;

Borrowers electing to prepay under the program may still participate with eligible REA borrowers in joint projects, so long as the prepaying borrower uses private capital for its share of a project;

Borrowers prepaying under this program could, for example, sell power to a non-prepaying borrower, and could purchase REA-financed facilities with private capital; and

Prepaying borrowers could purchase power from non-paying borrowers for periods of up to 10 years.

NATIONAL RURAL ELECTRIC COOPERATIVE ASSOCIATION,
Washington, DC, October 16, 1986.

Hon. TED STEVENS,
U.S. Senate,
Washington, DC.

DEAR SENATOR STEVENS: As I'm sure you are aware, NRECA has been intensely involved in efforts during this Congress to secure an opportunity for rural electric systems to reduce the interest cost burden on their consumer-members through the replacement of high-cost debt owed to the Federal Financing Bank with private capital. We are especially sensitive to the particular problems of rural electric systems in Alaska in this regard.

At the same time, we believe it is vital that the financing programs administered by REA be maintained and protected from those who would dismantle them if given any opportunity to do so.

We believe that the language you have proposed to amend the Rural Electrification Act through the creation of a "Privatization Program" is a reasonable approach to the rather unique and specific situation faced by the Alaska systems. We have serious concerns, however, about the implications it would have if applied nationally.

The clarifying amendment (House Amendment No. 59) offered last night by Chairman Whitten and others adequately addresses our concerns about the privitization proposal by specifically limiting its applicability to Alaska cooperatives only. NRECA therefore will not oppose the privitization language, so long as the clarifying House amendment is included therein.

Very truly yours.

JOHN B. DAVENPORT, Jr.,
Director of Government Relations.

Mr. HATFIELD. Mr. President, if there is no further debate, I urge adoption of the conference report.

The PRESIDING OFFICER. Is there further debate?

Mr. GOLDWATER. Mr. President, are we going to have a chance for amendments?

Mr. HATFIELD. We are adopting the conference report. Then we will take up the amendments.

The PRESIDING OFFICER. Is there further debate on the conference report? If not, the question occurs on agreeing to the conference report.

Mr. METZENBAUM. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Ohio.

There is no unanimous-consent request pending. Does the Senator wish the floor?

Mr. METZENBAUM. I do.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Do I understand the question at the moment is concurrence in all of the House amendments?

Mr. HATFIELD. No. No. The procedure is that when a conference report is received, we adopt the conference report and then go to the amendments in disagreement.

Mr. METZENBAUM. I thank the manager for his clarification.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the conference report was agreed to.

Mr. STENNIS. I move to lay that motion on the table, Mr. President.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I would ask for the first amendment to be read by the clerk.

The PRESIDING OFFICER. The clerk will report the first amendment in disagreement.

The legislative clerk read as follows:

The House recedes and concurs with amendment to Senate amendment numbered 19.

The text of amendment in disagreement follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered nineteen to the aforesaid bill, and concur therein with an amendment as follows:

Strike out the matter stricken by said amendment, and insert:

and

Activities authorized by the "Construction Industry Labor Law Amendments of 1985" as passed by the House of Representatives on April 17, 1986.

Mr. STEVENS. Will the Senator yield for a moment?

Mr. HATFIELD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I move to table the House amendment to the Senate amendment numbered 19.

Mr. D'AMATO. Mr. President, I rise today to support an important amendment, added by the House, to the pending legislation. This amendment is the Construction Industry Labor Law Amendments of 1985, or H.R. 281. It is also known as the anti-double breasting bill. The Senate struck this amendment from House Joint Resolution 738, however the House yesterday voted to retain it in the final conference report.

H.R. 281 was the subject of hearings in the Subcommittee on Labor-Management Relations on May 21, 1985. The full Committee on Education and Labor reported the bill favorably last October. It was later amended on the House floor and passed by a vote of 229 to 173 on April 17, 1986. On March 11, I introduced S. 2181, which is identical to H.R. 281 before it was amended and passed by the House.

In response to growing claims of unfair practices in construction industry labor relations, this legislation was drafted to increase the stability of collective-bargaining in the building and construction industry. This amendment would change the National Labor Relations Act (NLRA) to effectively end the practice of setting up so-called "double-breasted" operations by construction firms seeking to avoid the application of collectively-bargained agreements. It defines a single employer in the following manner:

In the construction industry, any two or more business entities performing or otherwise conducting or supervising the same or similar work, in the same or in different geographic areas, and having, directly or indirectly—

(A) substantial common ownership;

(B) common management; or

(C) common control;

shall be deemed a single employer.

The practice of "double-breasting" by contractors undermines the fundamental right of workers to join a union and to gain collective-bargaining protection. This amendment would prohibit contractors from setting up dual-shop operations for the express purpose of circumventing their union agreements.

Sometimes employers set up separate subsidiary corporations for the purpose of bidding on construction work on both a union and nonunion basis, and the two divisions may compete against each other for the same work. Under these circumstances, employers can shift work previously performed under a collective-bargaining agreement to the nonunion affiliate corporation. When employers form a nonunion subsidiary to perform exactly the same work as a unionized subsidiary and in competition with that unionized subsidiary, the company violates current law if it is a "single employer" and it refused to apply the collective-bargaining agreement to both operations. The House amendment does not alter this basic principle of fair play. It simply makes the burden of proof easier and allows corrective action, if necessary, to be obtained in a more timely fashion.

I believe that this legislation has been misrepresented by some opponents who argue that it will authorize common situs picketing, cause union contractors to close their doors and operate exclusively on an open-shop basis, and erode union benefit and retirement funds. These individuals incorrectly say that this amendment is unconstitutional, and that it will coerce millions of individuals—both employers and workers—into unwanted collective-bargaining agreements.

This, of course, is wrong. I believe that when a construction contractor signs a collective-bargaining agreement with a union that both parties to that contract have a right to expect that it will be honored. It's that simple. I don't think it's unconstitutional to expect that people mean what they say when they enter into contracts. However, by cleverly setting up double-breasted companies with union and nonunion components, contractors are able to avoid their collective-bargaining agreements. These "alter-ego" companies perform the same work in the same areas—the only difference is that workers are not receiving the union wages and benefits that were agreed to by the contractors.

A construction worker who goes from one job to another during the year may not be fully aware that some jobs are controlled by the nonunion part of a "double-breasted" contractor. That worker is in for a rude awakening when he files a claim for medical benefits and finds out that he did not have the coverage he thought he had. This amendment does not seek to do

any more than to pierce the legal veil of separation between companies that really are one and the same.

The amendment also amends section 8(F) of the NLRA to grant lawful, prehire agreements in the construction industry the binding status of agreements reached with a majority representative. Under current law, prehire agreements may be repudiated by employers after they have taken full advantage of their benefits. These agreements enable employers to learn labor costs for placing bids in advance, and provide them with a readily available supply of skilled workers from hiring halls. It is unfair for contractors to reap the benefits of signing these agreements and then disregard them. Unions must now go through the time-consuming process of proving majority support at every job site. By the time this is accomplished and certified by the National Labor Relations Board, the jobs are often completed and the workers have moved on to other jobs.

Under the NLRA, as amended, prehire agreements recognizing the union as the collective-bargaining representative for the workers and establishing wages and working conditions may be signed before the workers to be covered by the contract are hired. There are logical reasons for this. The transient nature of construction work differs, for example, from factory work performed by a stable set of employees in a fixed location over long periods of time. Due to the very nature of construction projects, workers may work on several different projects for several different employers in a given year.

Problems, however, have arisen. Entering a prehire agreement is strictly voluntary. If the agreement is not recognized by the employer, then the union must seek recognition by petitioning the NLRB for an election. Since many projects last only for a few months. The NLRB often will not conduct a representation election. Further, NLRB and the courts have permitted employers to repudiate their prehire agreements. This amendment is necessary to fulfill the congressional intent of Federal labor law provisions for collective bargaining in the building trades industry. Prehire agreements were permitted in the construction industry because of the unique characteristics of the industry. This amendment will make enforcement of prehire agreements more equitable and workable.

Finally, this amendment provides for phased-in effective dates. For contracts entered into by an employer before, the date of enactment of the legislation, the new provisions will take effect 1 year after being signed into law. In the case of contracts entered into after the date of the enactment of this legislation, the provisions will take effect on the date on which the contract is signed. Provisions relating to prehire agreements would take effect upon the date of enactment of the legislation.

The PRESIDING OFFICER. The question is on agreeing to the motion to table the House amendment to Senate amendment numbered 19.

The motion was agreed to.

Mr. HATCH. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. HATFIELD. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD. Mr. President, I ask the Chair to lay before the Senate amendment numbered 59 in disagreement.

The PRESIDING OFFICER. The clerk will report the next amendment in disagreement.

The legislative clerk read as follows:

The House recedes and concurs with an amendment to Senate amendment numbered 59.

The amendment of the House to Senate amendment numbered 59 is as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 59 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 115. GENERAL SERVICES ADMINISTRATION.

FEDERAL BUILDING FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

The revenues and collections deposited into the Fund established pursuant to section 201(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)), shall be available for necessary expenses of real property management and related activities not otherwise provided for, including operation, maintenance, and protection of federally owned and leased buildings; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation and transfer of space; contractual services incident to cleaning or servicing buildings and moving; repair and alteration of federally owned buildings, including grounds, approaches and appurtenances; care and safeguarding of sites; maintenance, preservation, demolition, and equipment; acquisition of buildings and sites by purchase, condemnation, or as otherwise authorized by law; conversion and extension of federally owned buildings; preliminary planning and design of projects by contract or otherwise; construction of new buildings (including equipment for such buildings); and payment of principal, interest, taxes, and any other obligations for public buildings acquired by purchase contract, in the aggregate amount of $2,385,856,000 of which (1) not to exceed $125,548,000 shall remain available until expended for construction of additional projects as authorized by law at locations and at maximum construction improvement costs (including funds for sites and expenses) as follows:

New Construction:

Alabama:

Jasper, Federal Building, $3,376,000

New Jersey:

Paterson, Federal Building (site and design), $1,500,000

New Mexico:

Columbus, Border Station, $2,680,000

Pennsylvania:

Wilkes-Barre, Federal Building (Social Security Administration), $20,672,000

South Carolina:

Columbia, Federal Building, Courthouse, Claim, $1,057,000

Construction Projects, less than $500,000, $1,000,000

Purchase:

New York:

Wellesley Island, Border Station, $1,925,000

Other Selected Purchases, including options to purchase, $93,338,000:

Provided, That each of the immediately foregoing limits of costs on new construction projects may be exceeded to the extent that savings are effected in other such projects, but by not to exceed 10 per centum: *Provided further*, That all funds for direct construction projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date: *Provided further*, That claims against the Government of less than $50,000 arising from direct construction projects, acquisitions of buildings and purchase contract projects pursuant to Public Law 92-313, be liquidated with prior notification to the Committees on Appropriations of the House and Senate to the extent savings are effected in other such projects; (2) not to exceed $270,222,000, which shall remain available until expended, for repairs and alterations: *Provided further*, That funds in the Federal Buildings Fund for Repairs and Alterations shall, for prospectus projects, be limited to the amount by project as follows, except each project may be increased by an amount not to exceed 10 per centum unless advance approval is obtained from the Committees on Appropriations of the House and Senate for a greater amount:

Repairs and Alterations:

Arizona:

Phoenix, Federal Building, $762,000

California:

San Diego, Old Federal Building, $1,576,000

San Diego, Federal Building, Courthouse, $1,178,000

San Francisco, Post Office, Courthouse, $1,683,000

San Francisco, Burton Federal Building, $20,000,000

Colorado:

Denver, Federal Building, Courthouse, $8,540,000

District of Columbia:

Federal Building, New Post Office, $1,700,000

Federal Building #6, $1,213,000

Federal Building #8, $1,886,500

Federal Building #9, $1,712,500

Federal Building #10A, $1,121,000

General Accounting Office, $3,552,000

Justice, $599,000

State, $2,765,000

Steam Distribution System, $8,796,000

Hawaii:

Honolulu, Kalanianaole Federal Building, Courthouse, $1,850,000

Illinois:

Chicago, Railroad Retirement Board, $5,200,000

Kentucky:
Louisville, Post Office, Courthouse, $1,500,000
Missouri:
Kansas City, Federal Building, $4,408,000
St. Louis, Federal Building (Mart), Phase I, $20,000,000
Kansas City, 601 E. 12th, $997,000
Kansas City, 1500 Bannister, $2,560,000
St. Louis, 4300 Goodfellow, $2,176,000
Nevada:
Las Vegas, Federal Building, Courthouse, $2,197,000
Oregon:
Portland, Federal Building, $12,069,000
Texas:
Dallas, Federal Building, $1,600,000
Dallas, Terminal Annex, $4,600,000
Utah:
Salt Lake City, Post Office, Courthouse, $675,000
Virginia:
Arlington, Pentagon, $7,000,000
Wisconsin:
Milwaukee, Federal Building, Courthouse, $2,799,000
Wyoming:
Casper, Federal Building, Courthouse, $1,923,000
Minor Repairs and Alterations, $141,584,000:

Provided further, That additional projects for which prospectuses have been fully approved may be funded under this category only if advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further,* That all funds for repairs and alterations prospectus projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date; (3) not to exceed $131,442,000 for payment on purchase contracts entered into prior to July 1, 1975; (4) not to exceed $985,000,000 for rental of space; (5) not to exceed $753,219,000 for real property operations; (6) not to exceed $57,090,000 for program direction and centralized services; and (7) not to exceed $63,335,000 for design and construction services which shall remain available until expended: *Provided further,* That for the purposes of this authorization, buildings constructed pursuant to the Public Buildings Purchase Contract Act of 1954 (40 U.S.C. 356), the Public Buildings Amendments of 1972 (40 U.S.C. 490), and buildings under the control of another department or agency where alterations of such buildings are required in connection with the moving of such other department or agency from buildings then, or thereafter to be, under the control of the General Services Administration shall be considered to be federally owned buildings: *Provided further,* That none of the funds available to the General Services Administration shall be available for expenses in connection with any construction, repair, alteration, and acquisition project for which a prospectus, if required by the Public Buildings Act of 1959, as amended, has not been approved, except that necessary funds may be expended for each project for required expenses in connection with the development of a proposed prospectus: *Provided further,* That funds available in the Federal Buildings Fund may be expended for emergency repairs when advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further,* That amounts necessary to provide reimbursable special services to other agencies under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)(6)) and amounts to provide such reimbursable fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control as may be appropriate to enable the United States Secret Service to perform its protective functions pursuant to 18 U.S.C. 3056 as amended, shall be available from such revenues and collections: *Provided further,* That the Administrator of General Services is authorized under section 210(h) of the Federal Property and Administrative Services Act of 1949, to acquire a building not to exceed 250,000 sq. ft. constructed or acquired by or on behalf of the State of Florida or a political subdivision thereof, by lease not to exceed 30 years, in Miami, Florida, on such terms and conditions as he deems appropriate. These terms and conditions may include an option to permit the Federal Government, if the Administrator deems that it is in the best interest of the Federal Government, to execute a succeeding lease: *Provided further,* That the Administrator of General Services is authorized under section 210(h) of the Federal Property and Administrative Services Act of 1949, to acquire a building not to exceed 600,000 sq. ft. constructed or acquired by or on behalf of the State of Illinois or a political subdivision thereof, by lease not to exceed 30 years, in Chicago, Illinois, on such terms and conditions as he deems appropriate. These terms and conditions may include an option to permit the Federal Government, if the Administrator deems that it is in the best interest of the Federal Government, to execute a succeeding lease. *Provided further,* That revenues and collections and any other sums accruing to this fund during fiscal year 1987 excluding reimbursement under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(f)(6) in excess of $2,385,856,000 shall remain in the Fund and shall not be available for expenditure except as authorized in appropriation Acts: *Provided further,* That notwithstanding this or any other provision of this Act, Section 623 of the Treasury, Postal Service, and General Government Appropriations Act as contained in this Act shall apply only to the rural electrification program in the State of Alaska.

Mr. HATFIELD. Mr. President, I move that the Senate concur in the House amendment to the Senate amendment No. 59.

Mr. ABDNOR addressed the Chair.

Mr. STEVENS. Will the Senator yield for just a moment.

I would like to ask my good friend a question. I am sorry to say that I did not understand that first request, that first motion to table on the first House amendment. Could we have a little more time to understand what the procedural aspects of this bill are? I think that was rather fast handling of that one amendment and I intended to make some remarks on it. As I understand, that was the double-breasting amendment that was just tabled?

The PRESIDING OFFICER. The Senator is correct.

Mr. HATFIELD. The Senator is correct.

Mr. President, let me say that I am happy to yield to any Senator at any time for any questions, as I indicated, or any comments. No one is attempting to cut off any debate on any issue. I have made a motion to concur in the House amendment to Senate amendment numbered 59. I will yield to my subcommittee chairman, the Senator from South Dakota.

□ 1530

AMENDMENT NO. 3476

Mr. ABDNOR. Mr. President, I move that the Senate concur in the House amendment to Senate amendment numbered 59 with an amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota [Mr. ABDNOR] proposes an amendment numbered 3476.

Mr. ABDNOR. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

Mr. METZENBAUM. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will read the amendment.

The legislative clerk read as follows:

In lieu of the matter proposed by said amendment, insert the following:

SEC. 115. GENERAL SERVICES ADMINISTRATION.

FEDERAL BUILDINGS FUND

LIMITATIONS ON AVAILABILITY OF REVENUE

The revenues and collections deposited into the Fund established pursuant to section 210(f) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f), shall be available for necessary expenses of real property management and related activities not otherwise provided for, including operations, maintenance, and protection of federally owned and leased buildings; rental of buildings in the District of Columbia; restoration of leased premises; moving Government agencies (including space adjustments) in connection with the assignment, allocation and transfer of space; contractual services incident to cleaning or servicing buildings and moving; repair and alternation of federally owned buildings, including grounds, approaches and appurtenances; care and safeguarding of sites, maintenance, preservation, demolition, and equipment; acquisition of buildings and sites by purchase, condemnation, or as otherwise authorized by law; conversion and extension of federally owned buildings; preliminary planning and design of projects by contract or otherwise; construction of new buildings (including equipment for such buildings); and payment of principal, interest, taxes, and any other obligations for public buildings acquired by purchase contract, in the aggregate amount of $2,279,862,000, of which (1) not to exceed $120,672,000 shall remain available until expended for construction of additional projects as authorized by law at locations and at maximum construction improvement costs (including funds for sites and expenses) as follows:

New Construction:
Columbus, Border Station, $2,680,000
Pennsylvania:

Wilkes-Barre, Federal Building (Social Security Administration) $20,672,000
South Carolina:
Columbia, Federal Building, Courthouse, Claim, $1,057,000
Construction Projects, less than $500,000, $1,000,000:
Purchase:
New York:
Wellesley Island, Border Station, $1,925,000:
Other Selected Purchases, including options to purchase, $93,338,000:

Provided, That each of the immediately foregoing limits of costs on new construction projects may be exceeded to the extent that savings are effected in other such projects, but by not to exceed 10 per centum: *Provided further,* That all funds for direct construction projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or other funds have been obligated in whole or in part prior to such date: *Provided further,* That claims against the Government of less than $50,000 arising from direct construction projects, acquisitions of buildings and purchase contract projects pursuant to Public Law 92-313, be liquidated with prior notification to the Committees on Appropriations of the House and Senate to the extent savings are effected in other such projects; (2) not to exceed $180,166,000, which shall remain available until expended, for repairs and alterations: *Provided further,* That funds in the Federal Buildings Fund for Repairs and Alterations shall, for prospectus projects, be limited to the amount by project as follows, except each project may be increased by an amount not to exceed 10 per centum unless advance approval is obtained from the Committees on Appropriations of the House and Senate for a greater amount:

Repairs and Alterations:
District of Columbia:
Federal Building #6, $1,213,000
Federal Building #8, $1,886,500
Federal Building #9, $1,712,500
Federal Building #10A, $1,121,000
General Accounting Office, $3,552,000
Justice, $599,000
State, $2,765,000
Steam Distribution System, $8,796,000
Missouri:
St. Louis, Federal Building (Mart), Phase I, $20,000,000
Kansas City, 601 E. 12th, $997,000
Kansas City, 1500 Bannister, $2,560,000
St. Louis, 4300 Goodfellow, $2,176,000
Minor Repairs and Alterations, $141,584,000:

Provided further, That additional projects for which prospectuses have been fully approved may be funded under this category only if advance approval is obtained from the Committees on Appropriations of the House and Senate. *Provided further,* That all funds for repairs and alterations prospectus projects shall expire on September 30, 1988, and remain in the Federal Buildings Fund except funds for projects as to which funds for design or o ther funds have been obligated in whole or in part prior to such date; (3) not to exceed $131,442,000 for payment on purchase contracts entered into prior to July 1, 1975; (4) not to exceed $985,000,000 for rental of space; (5) not to exceed $753,219,000 for real property operations; (6) not to exceed $57,090,000 for program direction and centralized serives; and (7) not to exceed $52,273,000 for design and construction services which shall remain available until expended. *Provided further,* That for the purposes of this authorization, buildings constructed pursuant to the Public Buildings Purchase Contract Act of 1954 (40 U.S.C. 356), the Public Buildings Amendments of 1972 (40 U.S.C. 490), and buildings under this control of another department or agency where alterations of such buildings are required in connection with the moving of such other department or agency from buildings then, or thereafter to be, under the control of the General Services Administration shall be considered to be federally owned buildings: *Provided further,* That none of the funds available to the General Services Administration shall be available for expenses in connection with any construction, repair, alteration, and acquisition project for which a prospectus, if required by the Public Buildings Act of 1959, as amended, has not been approved, except that necessary funds may be expended for each project for required expenses in connection with the development of a proposed prospectus. *Provided further,* That funds available in the Federal Buildings Fund may be expended for emergency reparis when advance approval is obtained from the Committees on Appropriations of the House and Senate: *Provided further,* That amounts necessary to provide reimbursable special services to other agencies under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 490(f)(6)) and amounts to provide such reimbursable fencing, lighting, guard booths, and other facilities on private or other property not in Government ownership or control as may be appropriate to enable the United States Secret Service to preform its protective functions pursuant to 18 U.S.C. 3056 as amended, shall be available from such revenues and collections: *Provided further,* That revenues and collections and any other sums occruing to this fund during fiscal year 1987 excluding reimbursements under section 210(f)(6) of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 490(f)(6)) in excess of $2,279,862,000 shall remain in the Fund and shall not be available for expenditure except as authorized in appropriation Acts: *Provided further,* That not withstanding this or any other provision of this Act, Section 623 of the Treasury, Postal Service, and General Government Appropriations Act, as contained in this Act shall apply only to the rural electrification program in the State of Alaska.

□ 1540

Mr. ABDNOR. Mr. President, I am offering an amendment.

The PRESIDING OFFICER. The Senator from South Dakota is recognized.

Mr. ABDNOR. Mr. President, I am simply offering an amendment to Amendment No. 59. The amendment, Mr. President, is relatively simple even though it took a long time in reading. Most of the words that were just spoken have nothing more than the generic form we use on any appropriation bill relating to Federal public buildings.

Let me tell you what this does very simply.

It will fund the Federal buildings fund at a level lower than the level presented by the other body by including only those new construction and repair and alteration projects which have been authorized by both the House Committee on Public Works and Transportation and the Senate Committee on Environment and Public Works.

It seems to me only a very reasonable request inasmuch as we do have the authorizing committee on public works which I happen to be on, as well as the Appropriations Committee that feel very strongly that they should do the authorizing before we do the appropriating.

Mr. President, I assume many of my colleagues will want to know why I am offering this amendment. I would like to give the Senate a little background.

The conferees met several times on this issue and could not agree on a compromise. The President's budget submission did not include any major new construction projects for fiscal year 1987. The General Services Administration testified that its budget for this and the next 2 years would devote a substantial amount of funds for repair and alteration of Federal buildings, with a special emphasis on removal of asbestos, PCB's, and fire safety, something that should have been done long ago and we are trying to play catchup now and renovate and repair these buildings that we own all over the United States that have been sorely neglected.

The Public Works Committee in the other body chose to fund four new construction projects. In an effort to keep the Federal buildings fund solvent, they chose not to authorize several repair and alteration projects. Quite understandably, the Appropriations Committee has provided money for those projects on the other side.

Mr. President, my debate is not with my counterparts on the Treasury Subcommittee, for I have acted in the same manner by providing funding for projects authorized by the Senate Public Works Committee. The problems I have come with the fact that the House Public Works Committee authorized funding to begin construction on four new buildings. In the case of three of those buildings, money was provided for only site acquisition and design—not to fund the entire amount of construction at this time. The site acquisition and design totals over $36 million. Maybe this does not sound like a huge sum of money to you, but the General Services Administration tells me that site and design usually accounts for approximately 10 percent of the total cost of a project.

I use the figure once again that totals this year $36 million which is 10 percent of what we think it will be.

Mr. President, if that is true—these buildings alone will take $360 million out of the Federal buildings fund in future years. This kind of impact will

further delay the much needed safety issues which must be addressed.

Mr. President, the other body has not included funding for two of these projects—Chicago and Miami—but have opted to provide funding through a 30-year lease purchase agreement.

Mr. President, this makes the package a bit more palatable, but I do not believe it addresses the fundamental problem that the other body is funding a building in Chicago that will eventually cost nearly $300 million.

It has not been requested and it takes a considerable amount of money out of our building fund every year for the next 30 years. The GSA indicates they have not had an updated assessment of needs in Chicago for at least 5 years. The Senate Public Works Committee has not held any hearings at all on this project.

Quite frankly, Mr. President, I cannot believe that this is the way to legislate. Construction in Chicago may well be necessary, however, I cannot, in good conscience, approve of funding of this magnitude without having these and other questions answered.

Mr. President, I would, therefore, urge my colleagues to approve the substitute I am offering, which funds only those projects which have been reviewed and authorized by both the House and the Senate.

In addition, Mr. President, I also want to say this includes identical language which has been adopted in the other body last night with regard to the election of rural electric cooperatives in Alaska to seek prepayment and refinancing on loans.

Mr. President, this, to me, is a major issue that we need to decide. Are we going to do the work that the General Services does feel that needs to be done with a limited amount of dollars? As you know, these dollars do come out of the Federal building funds from the charges that we assess against them. That is all that we use to repair, to maintain, and operate our buildings—the heat, the light—that we have to do. Particularly, I think the time has come it is felt in the judgment at least of our committee and I think of GSA and most others that we should do the necessary things first.

They do have a priority list. And the buildings that I speak of that have not been authorized by the Senate Public Works Committee are extremely low and at the very bottom of the priority list.

So I do hope that the Senate will find it possible to go along with our recommendation and adopt this amendment.

The PRESIDING OFFICER. The Senator from Nebraska.

Mr. EXON. Mr. President, I would like to put a question to the managers of the bill with regard to the REA, Rural Electrification Administration. I do not know whether the REA provision is tied in with or has anything whatsoever to do with the amendment which has just been offered by the Senator from South Dakota. But I understand that there were a whole series of negotiations going on, and I simply want to ask this question.

As to the motion that was made by the chairman of the Appropriations Committee to recede to the House provision with regard to REA, do I understand that to correctly mean that if we recede to the House's position on REA, specifically that language that I understand was offered by JAMIE WHITTEN, with regard to REA, would that be the position that REA would find itself in should we recede to the House as the chairman of the Appropriations Committee has moved?

Mr. ABDNOR. Yes, it is. This provision stands regardless of what we do here. If we totally concur in the House amendment or accept my amendment to that amendment, it would contain the REA provision.

Mr. EXON. May I ask this question then—I will be glad to address my remarks to the Senator from South Dakota—could he clarify for this Senator if there is any connection whatsoever between the possible partial or otherwise privatizing REA? Is there any connection with that and the amendment being offered by the Senator from South Dakota?

□ 1550

Mr. ABDNOR. Yes, only in Alaska.

Mr. EXON. Would you restate that?

Mr. ABDNOR. I said yes, it is, and it is only in Alaska that this language applies.

Mr. EXON. In other words, if I understand it, the way the continuing resolution would provide is that there would be one REA project in Alaska that would be allowed to be privatized if that were acceptable to the REA in Alaska; is that correct?

Mr. ABDNOR. That is correct.

Mr. EXON. And that it would not in any way, shape, or form be used as an instrument or an excuse, nor would it authorize any other privatizing of REA in any other place in Alaska or in the Continental United States; is that correct?

Mr. ABDNOR. That is correct.

Mr. EXON. I appreciate my friend's direct answer. And that basically was my question.

The amendment being offered by the Senator from South Dakota, as I understand it, has to do with the construction of a building someplace, that it is an amendment that you are offering to the Whitten language with REA that would allow the privatizing of one REA project in Alaska, is that correct?

Mr. ABDNOR. You heard the original amendment. This was brought back in disagreement because of the building differences that we have between the two bodies. But we had no difference of opinion with the REA language.

I am substituting my language. I guess it was necessary because of that to put the REA provision back into my amendment so it stays in its original form.

Mr. EXON. I have not heard the debate on the proposition that the Senator is offering with regard to the building of a building, but just so there is a clear understanding, whether the amendment of the Senator from South Dakota is adopted by the Senate or whether it fails, it would have no adverse effect on the understanding between the House and the Senate with regard to the REA matter, is that correct?

Mr. ABDNOR. That is absolutely correct.

Mr. EXON. I thank my friend from South Dakota.

Mr. ABDNOR. Again, I would point out for those who have not heard the discussion, this simply would permit the carrying through of the appropriations for those projects that have been authorized by both the House and the Senate. Of course, it would mean doing away with the four projects that the Senate Public Works Committee had not given authorization to.

I would ask for your support. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. GOLDWATER. I object.

The PRESIDING OFFICER. The Senator has requested the yeas and nays. Is there a sufficient second?

Mr. GOLDWATER. I object.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. GOLDWATER. I objected.

The PRESIDING OFFICER. So far as the Chair is aware, there is no way one can object to the request for the yeas and nays.

There is not a sufficient second.

Mr. ABDNOR. Mr. President, I am sorry there was not.

I ask unanimous consent that Mr. DECONCINI be listed as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I rise in strong support of Senator ABDNOR's proposal for dealing with the House amendment on the Federal building fund within GSA, and I urge the support of my colleagues.

Mr. President, Senator ABDNOR's proposal is fair and equitable. It treats everybody fairly without being partisan or parochial. He is recommending that only those projects—both construction and repair and alterations—that have been approved by both Houses be funded in fiscal year 1987. Nothing more, nothing less. Let me quickly add that the Senator from Arizona loses a $762,000 project under the Abdnor

plan, as does the chairman of our full Appropriations Committee, Senator HATFIELD. But I am willing to give up an important repair project in my State for the principle that my subcommittee chairman is establishing on the floor with his amendment.

Mr. President, let me briefly outline what the House-passed proposal does. First, it knocks out eight repair and alteration projects that have been tabbed by GSA as projects that could either slip into fiscal year 1988 or be reduced in fiscal year 1987. Those projects are:

REPAIR AND ALTERATION PROJECTS ONLY

Los Angeles Federal Building: $7.8 million.
Miami, Federal Building: $11.5 million.
Boston, Kennedy Federal Building: $13.5 million.
Trenton, Federal Building: $2.1 million.
New York City Customs House, $8 million.
Asheville, NC, Federal Building: $7.8 million.
San Antonio Post Office, Courthouse: $6.1 million.
Cut $5 million from a D.C. Steam Distribution System project, leaving $8.8 million.

Second, the House would fund all new construction projects funded in both the House and Senate Treasury, Postal Service bills. They are:

Jasper, Federal Building: $3.4 million (Alabama).
Paterson, NJ, Federal Building site and design: $1.5 million.
Columbus, NM, Border Station: $2.7 million.
Wilkes-Barre, PA, Federal Building (Social Security): $20.7 million.
Columbia Federal Building, SC (and Courthouse): $1.1 million.
New York, Wellesley Island, Border Station: $1.9 million.

The House would also fund all of the repair and alteration projects in both bills, with the exception of those I have outlined above. And finally, the House would fund a new Chicago, IL, Federal Building and a new Miami Federal Building through a lease/purchase plan, with size limitations placed on both buildings.

Mr. President, frankly, this House plan is somewhat better than what they were insisting on during our conference on the continuing resolution, but it still is unacceptable to this Senator. Let me try to explain why.

First, the House plan funds a number of Federal building projects that are so bad that they are not even in the top 50 percent of the General Services Administration list of priority capital improvements. And not making GSA's priority list means that your project must be a real stinker. Probably the worst project in this barrel of bad apples is the proposed Federal Building in Chicago, IL. The House is recommending $32 million just for site and design work on this monumental project. By the most conservative estimates, this building, if approved will cost $240 million and probably much closer to GSA's estimate of $343.5 million. I am informed that the site and design funding for the Chicago Federal Building is larger than the design work planned for refurbishing the Pentagon. I am also informed that the only requirement for additional Federal office space in Chicago is for the courts—a requirement that could be totally fixed with $25 million for the whole project.

Furthermore, GSA tells us that the only posible future requirement that could surface in Chicago for Federal employees, other than the courts, is for approximately 300,000 square feet of space once current leases expire in existing space around the city, We do not need a $300 million building to house 300,000 square feet of space. That would translate into $1,000 a square foot—rather exhorbitant even by Washington, DC, or Chicago standards:

Mr. President, let me briefly outline where some of the new construction and repair and alteration projects stack up in the GSA priority list:

(NC=NEW CONSTRUCTION—R&A=REPAIR AND ALTERATION)

Jasper, AL, NC, 44th out of 50 projects.
Miami, FL, NC, 45th.
Chicago, IL, NC, 46th.
Paterson, NJ, NC, 43rd.
Phoenix, AZ, R&A, 37th.
Honolulu, HA, R&A, 34th.
Casper, WY, R&A, 33rd.

In other words, none of the projects that the House insisted must stay in the package were of high priority. On the other hand, all of the projects contained in the Abdnor proposal are in the top 50 percent of the GSA priority list, with the one exception of Wilkes-Barre, PA, Social Security building project.

Senator ABDNOR's plan is fair and sets a good standard for both this continuing resolution and future deliberations with the House on these controversial public buildings. Every year the Appropriations Committee is whipsawed by the authorizing committees for moving ahead with Federal buildings projects that have not been authorized. On the other hand, the authorizers seem to be first in line at the Appropriations Committee table to take care of their little projects that somehow have not made it through the process. And I am not just talking about the authorizers on Public Works Committee: I am referring to authorizers on all committees who exercise their "turf" prerogatives until those "principles" conflict with their own personal piece of pork or legislation. Senator ABDNOR's proposal would set the standard that no one would misunderstand: "If it ain't authorized, it ain't built."

Now, Mr. President, I have been as guilty as the next guy around here in trying to tack on legislation or project that, for whatever reason, has not made it through the normal legislative approval process. And if this Federal buildings procedure is not adopted by the Senate today, I very well may try again in the future to take care of projects that are important to my constituents. But I am also willing to join with Senator ABDNOR now to set those ground rules with regard to Federal buildings projects and send that message back to the House.

Mr. President, we need to set this important precedent and take the burden off of the Appropriations Committee and put it back where it belongs: on the Public Works Committee. That committee has not done its job and should not expect our committee to bail them out. I urge the adoption of the Abdnor proposal.

I ask unanimous consent that a 1987 capital project priority list be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

FISCAL YEAR CAPITAL PROJECT PRIORITY LIST OCT. 7, 1986)

[In thousands of dollars]

	Project	Type	Remarks	Construction award	Fiscal year 1987			
					Construction cost	D&C cost	Total cost	Cumulative cost
1	Columbia SC Claim	NC	Required to pay claim		1,057	0	1,057	1,057
2	Small Construction Projects	NC	US/Canada agreement		1,000	350	1,250	2,307
3	St Louis, MO 4300 Goodfellow	R&A	Remove PCB health hazard	10/30/86E	2,176	163	2,339	4,646

Mr. DIXON. Mr. President, will my friend from South Dakota yield for a question?

Mr. ABDNOR. Yes.

Mr. DIXON. I must apologize to my colleague, since I was not on the floor and my staff has just apprised me of what I think is taking place here.

Am I correct in inquiring of my distinguished friend from South Dakota that he is suggesting the elimination of a county building in the city of Chicago from this continuing resolution?

Mr. ABDNOR. Yes, that is correct, along with several others.

Mr. DIXON. Mr. President, that is going to cause a great deal of difficulty around here, I am afraid. I wonder if my colleague would explain to me his reasons for entering into this kind of a dialogue at this particular juncture since there has been no suggestion beforehand that this was going to take place.

Mr. ABDNOR. I do not understand the question, but I will say this: If I did not offer my amendment to the suggestion of the chairman of the Appropriations Committee that we concur in the House amendment, then this building will be fully authorized and allowed to go ahead with the construction. I pointed out that none of the buildings I am objecting to have ever been approved by the Senate Public Works Committee. As a matter of fact, we have no idea what the buildings are going to be like. I did mention that they usually tell us in GSA that site and planning usually amount to about 10 percent of the total cost of a building. In this case, we are allowing, I think it is, $32 million for site and preparation, $32.087 million.

Well, they finally agreed to go along. In fairness, I will say this: They do not know how they are going to do it. They do not have any plans for a building. They have not found the site. But they are going to go ahead in the House now under a lease provision.

I guess the city of Chicago would build a building to the specifications of the GSA, would limit it to 600,000 square feet.

But the point remains, whether it is a leased building or whether it is constructed by the Federal Government, it takes dollars out of the building fund. And GSA has implicitly told us constantly that they want these dollars to carry on some very much needed projects for repair and alterations; I am not sure, maybe even in your city. They have been neglected over the years. They are serious things like fire hazards, asbestos hazards, PCB's. They want to do that.

If you are going to put this money into buildings, then they have got that much less to go ahead and do the repair that is necessary. There is so many dollars in that Federal building fund and that comes from the rent that all these agencies pay into the building fund account.

Mr. DIXON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

□ 1600

Mr. GOLDWATER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. EVANS). Without objection, it is so ordered.

AMENDMENT NO. 3477

(Purpose: To prohibit funds for the T-46 trainer aircraft)

Mr. GOLDWATER. Mr. President, I have determined from the Parliamentarian that an amendment that I propose to offer can only be attached to the amendment being offered by the distinguished Senator from South Dakota. So I want to proceed, and I have to get the amendment on his amendment. Otherwise, I cannot submit my amendment.

I send the amendment to the desk, ask that it become a part of the amendment from the Senator from South Dakota, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Arizona [Mr. GOLDWATER] proposes an amendment numbered 3477 to amendment No. 3476.

Mr. GOLDWATER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the amendment add the following:

Notwithstanding any other provision in this or any other Act, none of the funds appropriated by this or any other act shall be available for the procurement of T-46 trainer aircraft. No funds appropriated to or for the use of the Department of Defense for fiscal year 1986 may be obligated or expended for the procurement of T-46 trainer aircraft until the Secretary of the Air Force has complied with all requirements relating to the T-46 aircraft contained in section 202(e) of the Department of Defense Authorization Act 1987.

Mr. GOLDWATER. Mr. President, I rise to offer an amendment to the continuing resolution that would prohibit the appropriation of funds in fiscal year 1987 for the procurement of T-46 trainer aircraft. Furthermore, my amendment would prohibit the expenditure of funds appropriated in fiscal year 1986 for the procurement of T-46 aircraft until after the Air Force has complied with all requirements of the fiscal year 1987 Defense Authorization Act relating to the T-46 aircraft.

Mr. President, I am fully aware of the unusual nature of this amendment. And I am fully aware, that by offering this amendment, the ultimate passage of the continuing resolution may be delayed. However, this is a very unusual issue and I am not going to sit quietly and allow billions of dollars to be committed to a program which the administration and the Pentagon say they do not want and which the Senate has voted overwhelmingly not to support.

Mr. President, let me explain briefly the action taken in the defense authorization conference regarding the T-46. In the Senate, we were firmly opposed to any funding for the T-46. The House, on the other hand, largely for political reasons, added $151 million for the procurement of the T-46. The House/Senate conferees reached a compromise on language that will do the following:

Prohibit the expenditure of fiscal year 1986 funds for the procurement of T-46 aircraft until after the completion of a fly-off competition among all the suitable candidate aircraft (the existing T-37, an upgraded T-37, and Navy's T-34C, T-45, and others).

Furthermore, the conferees agreed that no funds shall be authorized to be appropriated in fiscal year 1987 for the procurement of T-46 aircraft.

Mr. President, I think that our conference resolution on this issue was a good one. It recognized the fact the administration had not requested any money for the procurement of the T-46—but instead of terminating the program outright, we allowed for a competition that would keep the future of the T-46 viable. I think that was a pretty substantial compromise on the part of the Senate conferees, particularly when you consider that the Air Force has said repeatedly: They don't want the aircraft, they don't want the aircraft, they don't want the aircraft.

The appropriations conferees however, decided to go much further. What they have done in this continuing resolution, is the following:

They have made $170 million in fiscal year 1986 appropriations available only for the procurement of the T-46.

They have made $150 million in fiscal years 1987 available only for the procurement of the T-46.

They have prohibited the expenditure of any funds for the lot II production contract which effectively cancels a competitively negotiated contract favorable to the Government.

And they have directed in the statement of managers language that the Air Force proceed with the T-46 program, and that existing contracts be renegotiated thereby releasing the manufacturer from his current contract obligations.

Mr. President, I am outraged at this blatant attempt to commit billions of the taxpayers dollars to suit the selfish, parochial interests of a small group of politicians. It's wrong, it's wrong, it's wrong.

I say again, the administration requested no funds for this program and the Congress has authorized no funds for the program. I remind my colleagues, that as stewards of the taxpayer's dollars, our constitutional responsibility is to provide for the requirements of our national defense. We are not empowered to spend those precious dollars just to suit the interests of one State or one congressional district.

Mr. President, I am not going to debate the merits of the aircraft. I have flown it. I am not going to debate the test results or some of the minor faults that the aircraft had at the outset; only to say as a pilot that all new aircraft have little things wrong with them.

I only am going to debate the fact that the Air Force does not want the airplane, in fact the last Chief of Staff told me if we bought them, he would put them in the boneyard out in Tucson, AZ.

I ask unanimous consent, Mr. President, that a letter of September 24 from the current Commanding General of the Air Force, General Welch, be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE AIR FORCE,
OFFICE OF THE SECRETARY,
Washington, DC, September 24, 1986.

Hon. BARRY M. GOLDWATER,
Chairman, Committee on Armed Services, U.S. Senate, Washington, DC.

DEAR MR. CHAIRMAN: You have asked for our position on the T-46 issue as you enter the final phases of the FY 87 Authorization process.

As you are well aware, the T-46 was not included in the FY 87 President's Budget because of program schedule delays, manufacturing problems, and lack of affordability. The rationale behind this budget decision was discussed in testimony before both Armed Services Committees and both Defense Appropriation Subcommittees. Throughout the intervening months we have continued to review the program but nothing has changed to alter our decision.

In summary, we have carefully reviewed the programmatic and fiscal status of the T-46 program and we remain steadfast in our recommendation not to continue with the program.

We hope this information is useful. If we can provide any further information please let us know.

Sincerely,

TIDAL W. MCCOY,
Acting Secretary of the Air Force.
LARRY D. WELCH,
General, USAF, Chief of Staff.

Mr. GOLDWATER. Mr. President, what my amendment will do is bring the continuing resolution into compliance with the authorization legislation regarding the T-46. I believe it is the responsible thing to do, and I urge my colleagues to join me in this effort.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

□ 1610

Mr. D'AMATO. I have heard some of the most irresponsible charges made in regard to the T-46 going back many months ago. I heard some charges that this plane was dangerous, that it would not fly. I heard certain people say they would never fly in it. Yet the same people flew in it.

I have heard more concocted stories supposedly coming from the Air Force denigrating this plane, and yet when you actually go to the people who fly the plane, who are in charge of the command, they say the plane is good. They say we need the plane.

Do you want to talk about political pressure? Do you want to talk about partisan politics?

Well, let us understand where it is coming from. This plane won fair and square in a competition. There were some people who said the plane does not meet up to the standards, it does not meet up to the specifications.

"Let us get a GAO study. Let us see whether it does."

They sent for the GAO study.

"All this is going to finish the T-46, this will finish it."

But when they get the report of the GAO, what does it say? It says that

the plane meets the specifications and even exceeds.

I am going to suggest to my colleagues that we will read this report word by word, line by line. I am prepared to do it.

Let me read to you a letter that I have from General Osway. He is one of the pilots. He is not manipulated by the Defense Department. He is not told what to say and how to say it because of who is behind this and who wants this.

He says:

Dear Senator D'AMATO.

I never met the general. We sent a letter to him asking about the T-46.

Requirement for the replacement trainer for the T-37 is as valid today as it was when the mission needs statement was forwarded to the Air Force mission staff in 1979.

They requested a new trainer in 1979. We are talking about a trainer that is 30 years old. When people begin to say that for parochial, political interests we ask for the T-46, that is hokum. That is nonsense. That is irresponsible.

Maybe when certain generals do not get their way, or when former generals are not employed by certain companies, then something that looks pretty good all of a sudden does not look so good. Let us get to the bottom of it.

If we want to talk about partisanship, about patriotism, ask for the record.

When you ask for the General Accounting Office study, it says the T-46 meets the needs. This is not partisan. This is not politics. This does not come out of a committee because we want to make a chairman of a committee happy or someone else, or because the plane will be built someplace else.

I am sorry to have these statements made that it is a parochial interest. If you want to start engaging in that, this Senator is prepared to do that as well.

General Osway's letter says:

I have flown the T-46, as have many of my staff. Without exception all have said that it is a good training platform. The decision to cancel the T-46 was precipitated by manufacturer problems and budgetary restrictions. Many of Fairchild's problems have been corrected. The airplane is meeting our expectations in the test program.

They are meeting the expectations and that is exactly what the General Accounting Office says.

Let us talk about high-pressure politics. Where is it coming from? It is not coming from this Senator. But I will be darned if you think I have been sent to come down here and to be rolled because I am not going to be, not when the facts are as the General Accounting Office said, not when the need is still there, not when you have a 30-year-old plane that has to be rewinged or retooled and will cost the taxpayers billions of dollars.

Let me see what else he says:

Many of Fairchild's problems were corrected.

They were corrected. But you would not know that. They were corrected months ago when I had to endure a tirade on this floor and I did not say a word, a tirade in which I was told I was parochial, that this plane was not needed, that it was a waste of the taxpayers' money.

What are we going to do about a 30-year-old aged trainer that does not meet the needs of today? I would like to know.

Well, the problems have been corrected.

Due to the budgetary constraints, the Air Force is unable to afford the program, but the requirement still exists. I say this for a number of reasons. One, the T-46 is a good airplane which meets our needs: two, the T-37 is running out of time, and has many operational deficiencies.

What do we do when we have our first structural failure and it takes 6 to 7 years to get a plane into production?

Three, modification of the T-37 is not a long-term solution. It does not solve the operational problems and a replacement will be more expensive 5 to 10 years from now.

Talk about saving taxpayers money. Under the Defense Department, and under the Air Force, and, OK, we will find that there will be some who can say, "We can rewing, we can retool this, we can save money."

It is a stopgap measure and will not meet the needs of the Air Force and it is going to wind up costing the taxpayers billions of dollars.

Four, to date we have spent a half billion dollars on this program, if the 1986 funds are included.

What he is saying is we are going to lose a half billion dollars. Five hundred million dollars that was spent will be lost.

What about the taxpayers? Are we really talking about the taxpayers or are we talking about political considerations? Are we talking about friends and doing their business and their bidding? Or are we really talking about the interest of this country?

Mr. President, I am going to read the U.S. General Accounting Office report, because this Senator is going to put all that should be in the record into the RECORD, even if it takes the time of my colleagues in this body.

This report was requested. U.S. General Accounting Office, May 20, 1986.

Honorable ROBERT DOLE, U.S. Senate.

Mr. DOMENICI. May we have order, Mr. President?

□ 1620

The PRESIDING OFFICER. The Senate will be in order. Will those conversing in the back of the Chamber, please cease their conversations?

Mr. D'AMATO. I thank the Chair.

DEAR SENATOR DOLE: This report is in respcnse to your February 6, 1986, request to review certain aspects of the Air Force T-46A aircraft program. Specifically, you requested that we provide (1) a history of the contract difficulties associated with the T-46A program, (2) information on the current status of production, (3) data about the quality of aircraft from a performance and production standpoint, and (4) information on the extent that fiscal year 1986 funds are being expended.

In July 1982, the Air Force awarded the Fairchild Republic Company a fixed price incentive contract with a target price of $104 million to develop the airframe of the next generation trainer aircraft—the T-46A. The contract included priced production options for up to 65 aircraft. At the same time, the Air Force awarded the Garrett Turbine Engine Company a fixed price incentive contract with a target price of $121.2 million for development and initial production of the F-109 engine for the trainer. The T-46A was to replace the Cessna T-37B as the Air Force's primary trainer aircraft. As many as 650 new trainers with a total acquisition cost of over $3 billion were expected to be acquired over the life of the program.

In November 1984, the Air Force exercised the first production option for 10 aircraft, including support equipment and a data package at a price of $58.1 million. One development aircraft has been completed and is being flight tested. A second development aircraft is nearing completion. Ten production option aircraft are being produced.

Fairchild has experienced cost and schedule difficulties since shortly after the award of the T-46A development contract. An Air Foce Contract Management Division review of contractor operations at Fairchild in June 1985 identified major problems and numerous deficiencies. Fairchild has taken or is in the process of taking corrective actions. The Secretary of the Air Force, citing these problems and budget constraints, has decided not to continue the T-46A acquisition program. The Air Force withheld fiscal year 1986 funding for lot 2 production of 33 aircraft. The President did not request any T-46A production funding in the fiscal year 1987 budget. The Air Force states that sufficient funding has been provided to fulfill its financial obligations in completing T-46A development and production of the first 10 aircraft.

The Air Force states that it intends to extend the life of the T-37B approximately 5 years beyond its original life expectancy. Air Force Air Training Command officials state that there is a shortage of T-37B's in the inventory. During the next several months, the Air Force will explore options to meet its future trainer aircraft needs. Among its options are to resume or recompete the T-46A production.

The results of our review are summarized below and discussed in more detail in the appendixes.

CONTRACT DIFFICULTIES

Within several months of the 1982 award, Fairchild's actual costs were more than budgeted and its work was behind schedule. Although some milestones were met, several key milestones were completed later than originally scheduled. For example, first flight was completed 6 months later than originally scheduled. Air Force concerns about schedule delays led to a mutually agreed upon contract modification in late 1985 that extended milestone and delivery dates.

Air Force reviews during 1985 found many areas of Fairchild's operations to be unsatisfactory. Following an extensive contractor

operations review that reported 279 findings, the Air Force, in August 1985, began withholding 50 percent of Fairchild's progress payments. Air Force officials stated that the findings were not graded as to significance, and that the number of deficiencies found were not unusual for such reviews. However, they also stated that Fairchild was the first contractor to be rated unsatisfactory in all eight management areas reviewed.

On April 21, 1986, the Air Force, citing Fairchild's substantial progress in correcting these deficiencies, restored half of the withheld progress payments. Fairchild officials stated that corrections to all the prior deficiencies would be essentially completed by September 1986. See appendix II for discussion of contractor operations review findings and corrective actions taken.

The Air Force cost estimate as of December 31, 1985, for Fairchild to complete T-46A airframe development and the first production lot of 10 aircraft was about $122 million more than the Air Force is obligated to pay Fairchild under the terms of the contract. Fairchild will absorb those costs if the development and first production lot programs are completed.

STATUS OF T-46A PRODUCTION

The first T-46A test aircraft is undergoing flight testing. The second test aircraft is undergoing preliminary ground testing before beginning flight tests in July 1986. The first 10 production aircraft are being manufactured with delivery of the first aircraft scheduled for November 1986. However, Air Force program office officials believe the delivery of the first production aircraft will not be accomplished until early 1987. On March 28, 1986, the Secretary of the Air Force announced his intention not to exercise the option for the second production lot of T-46A's.

PRODUCTION QUALITY

The Air Force has made six assessments of Fairchild production capability since 1982. These reviews identified numerous deficiencies relating to or impacting production quality that needed corrective action. However, the reviews generally concluded that Fairchild was capable of manufacturing the T-46A. The three reviews conducted by the Air Force T-46A program office recommended that the production program be continued. In late 1985 the Air Force noted that Fairchild's manufacturing operations had improved.

So, Mr. President, I think that it is important to point out that after the Air Force made its most critical reviews, the General Accounting Office points out that the Air Force, by its own reviews, conducted in regard to the manufacturing and performance schedules of the T-46A, recommended that production be continued.

QUALITY OF AIRCRAFT PERFORMANCE

As of March 31, 1986, the first T-46A developmental aircraft had been flown about 110 hours during 74 of 221 planned test flights. Air Force and Fairchild officials said flight tests results have been very successful to date. The T-46A is expected to meet or exceed most of the Air Force Air Training Command's original performance requirements. However, it is not expected to meet some of the more stringent contract performance requirements.

Again, Mr. President, I point out that this is not an observation or conclusion reached by this Senator or by those who look to come out with a particular conclusion that would please them. I think the language is worthwhile going over.

It says:

As of March 31, 1986, the first T-46A developmental aircraft had been flown. * * * The T-46A is expected to meet or exceed most of the Air Force Air Training Command's original performance requirements."

That is not a statement that I solicited. I did not go and ask someone to make this finding. But I suggest that there have been lots of statements that have come forth indicating, well, we do not know if we need it; we can put it off as a result of the inquiries coming in a certain particular manner from certain department officials, with a predesigned concept for what they wanted to be answered.

If you ask the Air Force, what is your first requirement; we are going to give you fast, speedy fighter jets or a trainer, they are always going to come down on the side of fighter jets.

That is not the issue here. If you tell them, well, if you take this money, we are going to take it from someplace else, do you want the money? You preprogram your conclusion of what the answer is going to be. That is what is taking place. But if you look to see the performance of the plane, the need for the plane, it has never been controverted that we need this plane.

□ 1630

Flight testing has identified problems in aircraft drag, lack of adequate stall warning, primary flight controls, and speed break buffeting. Air Force officials said these types of problems are not unusual. * * *

So when we identify the problems, the Air Force says to the General Accounting Office people that these are not unusual problems, as we were led to believe when people came and said, "My gosh, this plane is dangerous." They said:

* * * at this stage of development and that they can be solved without major aircraft modifications and within the scope of the development contract. An Air Force training command official said that based on actual flights by their personnel, the T-46A's performance was exellent, * * *

They say it was excellent.

* * * met the command's needs for a modern trainer and—

something worth noting—

* * * would save millions of dollars in yearly maintenance cost.

So, unlike that which has been suggested, that this would be a costly boondoggle to the taxpayers of the country, here we find in a General Accounting Office report, "Air Force command says we need this modern trainer and that it would save millions of dollars in the yearly maintenance costs."

Mr. WARNER. Will the Senator yield for a question at an appropriate time?

Mr. D'AMATO. Yes, I will yield at the appropriate time for a question.

USE OF FISCAL YEAR 1986 FUNDS

As of April 30, 1986, about 51 percent of the $49.9 million appropriated for fiscal year 1986 research, development and testing funds for the T-46A had been committed to be obligated. The $169.9 million appropriated for T-46A production lot 2 in fiscal year 1986 has not been released to the program. The Air Force does not plan to request additional production funding for the T-46A program at this time.

After all, we heard that there were problems, so it is fair to say what actions were undertaken to correct these problems.

Fairchild has developed and is implementing actions to correct the deficiencies identified in the Air Force's contractor operations review. Corrective action has been completed and submitted to the Air Force for approval on 83 percent of the deficiencies. The Air Force has approved 61 percent of those actions as of March 31, 1986.

In conducting our work, we reviewed cost data, contract files, flight test data, correspondence files, and production readiness reports. We also interviewed officials from the Office of the Secretary of Defense and Air Force headquarters in Washington, DC; the T-46A System Program Office, Wright-Patterson Air Force Base, Ohio; Air Force Plant Representative Office at Fairchild Republic Company, Farmingdale, New York; Air Force Contract Management Division, Kirtland Air Force Base, New Mexico; Air Force Operational Test and Evaluation Center, Kirtland Air Force Base, New Mexico; Air Force Flight Test Center, Edwards Air Force Base, California; and Air Training Command, Randolph Air Force Base, Texas. We also obtained data from and interviewed officials of the T-46A airframe development contractor—Fairchild Republic Company, Farmingdale, New York.

It would seem that the GAO was rather thorough in taking a rather exhaustive review not only of documents but of those people in the production area, those people in the flight area, those people in the testing area, those people in the operational area. They did a pretty good job. Now, their findings again may not have come out as certain people maybe thought or as, given the benefit of the doubt, certain indications from Air Force may have led one to believe with respect to deficiencies, but their findings, nevertheless, were based upon exhaustive study, exhaustive, time-consuming study, the king of time-consuming introspection that we are going to do, my colleagues, with respect to this issue, because we are going to look at it very, very, very, very closely and we will take as much time as necessary, regardless of the fact that there are many who have pressing engagements in their home States. I have a pressing engagement in my home State, but I feel strongly about this matter, and I may not be able to see the Mets play

the Boston Red Sox there Saturday evening, notwithstanding my desire to do so. It may take us that long to examine all of the ramifications of this matter, and I may miss the Sunday evening game and the games to follow in the following days. So I would like to say that here we have an example of that kind of exhaustive review. Maybe people are not satisfied with this document from the General Accounting Office, but I think before we consider voting on the matter that is so important all of our Members should have the opportunity to review it and those who are busy doing other things, well, they will have their squawk boxes on and they can listen as we continue.

As agreed with your office—

This is the General Accounting Office people now setting up the parameters of their review, and this letter is in response to a legitimate inquiry from one of our Senators. It says:

As agreed with your office, we did not review the Garrett Turbine Engine Company's development, testing, and production of the F-109 engine used in the T-46A aircraft, or the development of the operational flight trainer by the Reflectone Company. Nor did we evaluate possible alternatives to fulfill Air Force trainer needs.

Mr. DOMENICI. Will the Senator yield for a question without losing his right to the floor?

Mr. D'AMATO. Certainly.

Mr. DOMENICI. If the Senator is going to stay here and talk until Saturday night, would he give me his ticket to the Mets game? He can stay here and I will go.

Mr. D'AMATO. If the Senator will go with my two sons, that will be the condition, yes.

Mr. DOMENICI. We have a deal.

Mr. D'AMATO. The Senator will have three tickets.

Mr. DOMENICI. The Senator can stay here and talk and I will go. All right.

Mr. WARNER. Mr. President, is it timely for me to ask a question of my good friend?

Mr. D'AMATO. Yes. I yield for purposes of a question.

Mr. WARNER. Mr. President, we all admire the courage with which our distinguished colleague from New York speaks and we cannot help but be envious that in fact, indeed, the plane in large part would be built in New York State and therefore we understand the Senator's interest. But my question is, Does the Senator happen to know where the corporate headquarters of the company that will build the plane is located?

Mr. D'AMATO. I believe that the corporate headquarters is in Maryland.

Mr. WARNER. No, the corporate headquarters is in Virginia.

Mr. D'AMATO. Virginia?

Mr. WARNER. Yes.

Mr. D'AMATO. That is a wonderful thing.

Mr. WARNER. That would lead the Senator——

Mr. D'AMATO. A great State.

Mr. WARNER. That would lead the good Senator to believe that I would be up here joining him.

Mr. D'AMATO. Oh, no. I know better.

Mr. WARNER. Then if I said I supported the amendment of the Senator from Arizona, I could not be doing it for political purposes, could I? Because I am committing suicide.

Mr. D'AMATO. Let me suggest that the great and distinguished Senator from Virginia undertakes his either support of an amendment or his opposition of an amendment based upon those matters which he feels are important, both those matters intrinsic to the development of the particular plane and those that go beyond.

Mr. WARNER. Mr. President, the next question I would have, having I think established credentials to speak on this in a nonpartisan way, would be, of course, the Senator is aware of the fact that for many years, 5, I was head of one of the military departments and familiar with the manner in which decisions are made to buy military aircraft, and I ask the Senator how many Secretaries of the Air Force approved the purchase of this plane?

As a matter of fact, I will answer the question. Three consecutive Secretaries of the Air Force—and, mind you, in the Pentagon these decisions are under civilian control, not military control—three successive Secretaries declined to put this aircraft into major production. In 1986 there was a limited buy of 10. But the current Secretary is opposed to it. And as the distinguished Senator from Arizona pointed out, the current Chief of Staff—he happens to be the second of two Chiefs of Staff—stated that he did not want to buy the plane.

□ 1640

Mr. D'AMATO. If the Senator is asking a question as to whether or not the Secretary of the Air Force, presently, or his predecessor, was in favor of continuing production, I am well aware of that, as the Senator is. That does not obviate the necessity or eliminate the necessity for a new trainer. It does not answer the question with regard to the outmoded trainer we have.

It does not answer the fact that initially the charges were made that this plane would not fulfill the mission, when that has never been true. We have been propagandized—this body and others—the most incredible propaganda about the deficiencies, when we have had, after careful examination, the fact that that has been refuted, and not by those of us on the floor but by a study requested, an impartial study, that I could not control nor anyone else could control. If the Defense Department had its way, there is no doubt that this study would not have come about with these results.

Mr. STEVENS. Mr. President, will the Senator yield for a question?

Mr. WARNER. And are we not asking the Senate to overrule the decision of three service Secretaries and two Chiefs of Staff?

Mr. D'AMATO. Since when has that become something this body is governed by?

Mr. STEVENS. Mr. President, will the Senator yield for a question?

Mr. D'AMATO. I yield for a question.

Mr. STEVENS. I would not want the Senator from Virginia to leave the wrong impression.

From 1981 to 1985—and the Senator from New York was on the Appropriations Committee—every representative from the Air Force who came before our committee supported the T-46, including the then Chief, Kelly Burke.

Mr. D'AMATO. If I may respond, that happens to be the case. Not only is the Senator from Alaska correct in that, not only have we had it testified to, as to the quality of the T-46, but also, I have a book that says that the T-37 was very old. That was the testimony of Secretary of the Air Force, Vernon Orr, to the Senate Appropriations Committee, February 28, 1984.

The planes did not get any younger. The planes did not get any better.

The T-46 met the mission and met the requirements. Ask the General Accounting Office.

I suggest that some people, maybe for their own reasons, have seen a different way to come about this problem.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. D'AMATO. I yield for a question.

Mr. GOLDWATER. Is it not true, as I told the Senator, that I do not debate the merits of this airplane? It is a pretty good airplane. But the Air Force does not want it. Now answer that.

Mr. D'AMATO. I will be glad to answer it.

Mr. MOYNIHAN. Mr. President, will the Senator yield for a question?

Mr. D'AMATO. I think that is an important observation Senator GOLDWATER made. He said it is a pretty good plane, and the Senator has told me privately, as he said here, that if the Air Force were to sign off—the Air Force has a different agenda, and it has been told why it does or does not like this plane.

The fact is that when you have a Secretary of the Air Force who says we need this plane in 1984 and now we do not need it—we had moneys that were appropriated, and never before

have we taken moneys that were appropriated and rescinded them from a program.

I suggest to you that we have seen some pretty heavy-handed maneuvering by the Defense Department as it relates to this plane.

My colleague from New York had a question, and I yield to him for a question.

Mr. MOYNIHAN. Mr. President, in that respect, I think the Senate would want to know—I am sure the Senator from New York would agree—that that is quite so, that the headquarters of the company involved here is located in Virginia.

While the plane is to be assembled in New York, is it not the case that the aircraft engine, which is the GA-100 turbofan, is to be manufactured in Arizona, and the original contract from the Air Force, the contract for the development to Fairchild in 1982, was $104 million? The contract for $121 million was for the larger component.

Is it not the case, I ask my friend, that under the regime of Gramm-Rudman, as was predicted on this side of the aisle with great explicitness, when the time came, the funds available to the Armed Forces, the Department of Defense, have been going down? In 1985, fiscal 1985, pre-Gramm-Rudman, the budget authority of the Department of Defense was $286.8 billion.

Mr. D'AMATO. I think my colleague would be correct——

Mr. MOYNIHAN. May I finish my question?

The PRESIDING OFFICER. The Senator from New York has the floor. Does he yield for a question?

Mr. MOYNIHAN. He had yielded for a question. I have another sentence.

Mr. D'AMATO. I yield for a question.

Mr. MOYNIHAN. In 1985, the budget authority of the Department of Defense was $286.8 billion. In 1986, it was $278 billion. That was the first decline since 1970–1971. The current provision is somewhat higher than last year but still not as high as 1985.

What we are seeing here, would he agree, is a decision driven by budget matters, not by Air Force matters, in that respect, a judgment which we could very well disagree with?

Mr. D'AMATO. I say to my learned and distinguished senior Senator from New York that it is as a result of the funding not increasing, as anticipated, that both the Air Force and other services are faced with choices of making appropriate adjustment.

Having said that, the kinds of things we have been faced with is that this plane was being built and being supported because it comes from a particular State or region, and I suggest that that is not why those of us who are here on the floor saying let us look at the record are here doing it. Yes, it happens to be in my hometown. But the fact of the matter is that the record amply demonstrates the need nationally.

I point out that Senator CHILES does not represent New York, where a good part of the plane is being manufactured, or the corporate headquarters.

So what we see is a political type of dimension being added, which is unfortunate. That is why I say let us look at the record. If we look at the record, we will see that this plane was supported by the Air Force, was supported by Vernon Orr, is supported by the men in the field.

We have tried to work out compromises, but we have had some people say that we are going to defeat this plane and we will either go out for a new plane or rebid this or retool it and rebuild an existing plane, notwithstanding the Air Force itself says it is going to cost a lot more money and I will try to get an Air Force official to say it now after the Pentagon has taken a particular position.

□ 1650

It gets pretty tough to get some general to say we want this as opposed to the F-15 or F-16 or to make another recommendation, particularly when a Secretary of Defense and others have taken a strong position in opposition.

But in any event, I would like to continue with this.

As agreed with your office, we did not review the Garrett Turbine Engine Company's development, testing, and production of the F-109 engine used in the T-46A aircraft, or the development of the operational flight trainer by the Reflectone Company. Nor did we evaluate possible alternatives to fulfill Air Force trainer needs. Also, as agreed with your office, we did not request official agency comments on this report. However, the views of Air Force and contractor officials were obtained and incorporated where appropriate.

So here we have in this report, which I say it is kind of like the Bible. You would have to take my statements with a grain of salt. There would be some who would say, after all, you have a parochial interest. This is manufactured in New York; therefore, that is a parochial interest.

I would suggest to the body that if I was convinced that this plane was not necessary, I would not take this position, I would not seek the time, the energy, of my colleagues in deciding this issue.

As a matter of fact, if Fairchild had not corrected the deficiencies as they did, I would not be here.

But I also suggest that that might not be plausible or believable for a number of my colleagues.

So do not take my word but let us look at some things or someone, not someone who may be attempting to bring about a different result for whatever reason but someone who was asked, an impartial group, the U.S. General Accounting Office, the GAO who was solicited. I did not solicit them. I did not set the conditions for their study. I did not tell them what to examine. The General Accounting Office after talking to everyone, interviewing them, the production people, the line people, the pilots who tested the plane, the command, they made their report and that is why we have to listen to it. We may not like it, but I am going to present it here in every graphic detail.

Fairchild officials advised us that the report is an accurate and balanced presentation. They observed, however, that because of the essentially historical nature of the questions, the report does not emphasize the motivation and professional character with which the company is operating today.

We conducted our work from February 1986 through April 1986 in accordance with generally accepted government auditing standards. We plan no further distribution of this report until 5 days after its issue date unless you publicly announce its contents earlier.

That is a general standard practice when one requests a report.

At that time, we will send copies to the House and Senate Committees on Appropriations and on Armed Services; House Committee on Government Operations; Senate Committee on Governmental Affairs; the Secretaries of Defense and Air Force; the Director, Office of Management and Budget; and other interested parties.

By the way I would note that the T-46-A has been approved by two of those committees. As a matter of fact, three of those committees—the House Committee on Appropriations, the Senate Committee on Defense Appropriations—and unfortunately we are mired in this situation—and the Senate Committee on Governmental Affairs, the Secretary of Defense has seen this, the Secretary of Air Force, the Director of Office of Management and Budget, and other interested parties.

Signed by Frank C. Conahan, Director.

I will skip the table of contents at this time and go to page 7, appendix A. Requested information——

Mr. GOLDWATER. Mr. President, will the Senator yield for a question?

Mr. D'AMATO. Yes, certainly.

Mr. GOLDWATER. Has the Air Force approved this aircraft?

Mr. D'AMATO. Have they approved it?

Mr. GOLDWATER. Yes.

Mr. D'AMATO. To the extent I have indicated——

Mr. GOLDWATER. I am talking about the headquarters over the Potomac River.

Mr. D'AMATO. You mean did the Air Force say they want it?

Mr. GOLDWATER. The Commander of the Air Force.

Mr. D'AMATO. Well, when I spoke to them they have indicated recently

that for budgetary reasons they would not ask for the airplane. However, I would note that there have been more than one occasion——

Mr. GOLDWATER. Will the Senator yield for another question?

Mr. D'AMATO. Certainly.

Mr. GOLDWATER. Do you think that it is proper for a legislative body to tell any part of our armed services what weapons we are going to buy them?

Mr. D'AMATO. Oh, certainly. We do it regularly.

Mr. GOLDWATER. We do?

Mr. D'AMATO. Yes.

Mr. GOLDWATER. No, we do not do it regularly.

Mr. D'AMATO. Well, Senator——

Mr. GOLDWATER. No, we do not.

Mr. D'AMATO. With great respect and admiration, I have seen it in both the committee you chair, I have seen the number, the quality, the volumes, and disciplines, and I have seen it on the Defense Appropriations Committee and to suggest this time we do not——

Mr. GOLDWATER. You do not. Your subcommittee does a lot of foolish stuff.

Mr. D'AMATO. I see the Senator from Virginia laughing. I do not know if it is a result of my remark or absurdity of the proposition that we do not suggest to the military what they should buy at various times.

Mr. GOLDWATER. We might suggest it but we do not buy it.

Mr. D'AMATO. You know a suggestion from the Senator from Arizona carries a great deal of weight and might be interpreted as more than just a suggestion, almost an order.

Mr. GOLDWATER. Well, I disagree with the Senator.

Mr. D'AMATO. I think you are being too modest.

Mr. GOLDWATER. I still want the Senator to make the point. It is not the aircraft. I do not argue with him on the aircraft.

Mr. D'AMATO. You mean the suggestion it meets its needs.

Mr. GOLDWATER. They have not completed all the deficiencies. That is not important. The important thing is the Air Force does not want it.

Mr. D'AMATO. I think again my distinguished colleague from Arizona, someone for whom I have deep respect, makes a point again that this plane is not the older plane that it was made out to be. When I was here on this floor, when I heard my colleagues come up to me and say, "ALFONSE, how could we support this plane, when it is so dangerous, when it is so deficient," that is not the case. People were given a bill of goods. They were told and we had memoranda coming out of the Air Force that was suggesting that this plane could not fly and it should not fly.

That is from the same people who we are now supposed to rely on them, I told them that.

I think we have to worry about their reliability.

But I do believe this General Accounting Office report. I say to my colleagues if you are going to put stock in it, do not take my word for it, but certainly not those of the generals who have been programmed to come down to say we do not want it at this time. What kind of credibility do they have, when for 7 years they lobbied, for 7 years they come forth and testified before our committee we need it, we need it, put it out, bid it, we need this plane desperately. And then they come before this body and say, oh, no, we don't need it.

Then they go to the extent and say the plane is dangerous and it does not fly.

When you check into those reports you find out from the guys there doing it they say they send the letters—it meets our needs; we do need it. If we do not have it, it is going to be a terrible deficiency.

You want to talk about what happens to the American public. You wonder why they begin to say they lose credibility in which direction we are going to go. We need it one day. The next day we do not need it, we do not want it.

That is an oversimplification.

REQUESTED INFORMATION ON T-46A PROGRAM

In July 1982 the Fairchild Republic Company was awarded a fixed price incentive contract for the design, development, testing, and delivery of two T-46A trainer aircraft with support equipment and a data package.

I think that is interesting. In July 1982, after exhaustive studies, after exhaustive competition and bid the Air Force said go ahead. So we needed it then. The Secretary of the Air Force signed off then. The Secretary of Defense signed off then. We needed a new trainer not because it was being built in Long Island but because of the need that we had a 30-year-old trainer. So let us get that through once and for all because again I resent those implications that because someone is going to stand up and say let us look at the record, you are doing it to protect the parochial interest. The fact of the matter is if the same situation were taking place in any other place I would expect my colleagues who had particular knowledge to stand up and do the same thing I am doing here now.

We need it in 1982. So we put it out.

The contract included two fixed priced options for the production of up to 65 aircraft.

We said at that time we had a need for at least 65 planes.

Fairchild was selected for the contract award following the evaluation of competitive proposals from five companies.

So this was not a situation where the Senator from New York said give it to Fairchild or anyone else. You have an exhaustive competition from five companies.

□ 1700

The proposal evalution criteria, in order of importance, were (1) operational utility, (2) readiness and support, (3) life-cycle cost, (4) design approach, and (5) manufacturing/program management. The Secretary of the Air Force, in making the selection, stated that Fairchild's proposal offered significant advantages over the other proposals.

I did not say it. My colleague from New York did not say it. The Secretary of the Air Force said, after looking at these components, these five components—operation utility, readiness and support, life-cycle cost, design approach, and manufacturing/program management—I should have read this General Accounting report with more thoroughness before. He said:

Fairchild, you offer significant advantages over the other proposals.

And he specifically stated Fairchild's proposal "provided the best aircraft in terms of training effectiveness, operational safety, reliability, maintainability, and availability."

Now, that is a pretty strong endorsement. I would suggest that that endorsement came down in July 1982 absent those factors that would suggest that somehow the planes that should have been replaced in 1982 that we saw the need for, somehow that situation has changed and it would be valid today.

Now we are here in 1986, 4 years-plus later. Are we going to suggest to the American people that the trainer that 4 years ago was considered obsolete, aging, that should be taken out of service, that should be replaced for the training of our men and women, our pilots, that somehow that aged plane has gotten better in 4 years, that there is less of a need today after, by the way, we spent a half of a billion dollars? Incredible; absolutely.

"Its design met or exceeded all Air Force requirements." Here is the Secretary. He says:

Its design met or exceeded all Air Force requirements and (3) its manufacturing approach made it the leader in this area.

Contract difficulties.

Were there problems? Of course. But we were made to believe that these problems were somehow unique to Fairchild, to the trainer, that we do not see these problems in any new start-up program.

Within several months of the 1982 award, Fairchild began experiencing cost, schedule, and other difficulties. These problems and other events led to a 1985 restructuring of the contract delivery schedule, reduced progress payments, and a major contractor effort to correct identified problems in 1985.

COST DIFFICULTIES

At the time the development fixed priced incentive contract was awarded, both Fairchild and the Air Force recognized that Fairchild's cost proposal was optimistic; that is, lower than expected actual costs. Fairchild officials said their cost proposal had been influenced by the Request for Proposal which specified funding limitations.

The contract had an original target price of $104 million and a ceiling price of $125.3 million. Any costs beyond the ceiling price must be fully absorbed by the contractor. Contract modifications can result in increases to the target price and ceiling.

In October 1982, several months after the contract award, an Air Force independent cost estimate showed that the T-46A development and production estimates prepared by the Air Force program office were reasonable and considerably higher than the contractor estimate.

Beginning in September 1982, Fairchild started reporting cost variances in its monthly cost performance reports. Fairchild recognized in its September 1983 cost performance report that the estimated completion cost would exceed budgeted costs. Between September 1983 and July 1984, Fairchild increased its estimated completion costs several times from $116 million to $139.1 million, which at that time exceeded the July 1984 contract ceiling price of $127.1 million. Since that time, the contract ceiling price has increased due to contract modifications.

With cost estimates continuing to increase, Fairchild officials said they realized that the scope of work was greater than expected and that managing the program within the amounts in the original contract would not be possible.

Mr. HATFIELD. Will the Senator yield for a question?

Mr. D'AMATO. Certainly.

Mr. HATFIELD. I appreciate the Senator from New York yielding for a question. I would like to inquire of the subcommittee chairman of the Appropriations Committee, who has worked very hard on this continuing resolution, brought it thus far, if he could give us some indication as to when we might reach a point of disposing one way or the other of the Goldwater amendment that is an amendment to the Abdnor amendment that is hanging on amendment 59 in disagreement with the House.

Why I pose the question is, as the Senator from New York knows, we have run out of money for the Federal Government's operation. And this continuing resolution is going to have to go back to the House because we have already made one change in that, amendment 19. Therefore, it will have to go back to the House for their consideration and possibly it would have to come back here yet again. The White House, I know, is very anxious to give some signals to the Federal employees whether they should come to work tomorrow. And all of these things are sort of hanging in a very delicate balance.

And as the subcommittee chairman and I know, speaking as the chairman of the full committee, there are times when we have to get the institution moving to comply with our constitutional duties that are before us to keep this Government going.

Now all I am asking, basically, is to establish upon my question to set it in the context of the anxiety I am beginning to feel in the pit of my gut as to when we are going to get this bill moving back to the House. Would the Senator accommodate my request?

Mr. D'AMATO. Mr. President, speaking not as the subcommittee chairman, but as a member of that subcommittee——

Mr. HATFIELD. And a very excellent member who has upheld his duty in a very, very admirable fashion.

Mr. D'AMATO. I appreciate the Senator's comments.

I would suggest that the manner by which we could proceed expeditiously, immediately, would be if the Senator from Arizona would withdraw his amendment. Notwithstanding that, this Senator, and I know that at least four others, at least four others, will be making their points for an extended period of time. In consideration to the distinguished chairman and my dear friend, I would suggest that there would probably be no vote for quite a period of time.

So rather than the onus being placed on those of us who say this is not the appropriate vehicle or the time to undertake this action, I would suggest and hope that we could debate it and discuss it at another time on another vehicle.

But if those who propose this amendment continue to push for its consideration, then at least this Senator, and I do not mean to speak for others, but again I know of at least four others who will continue to deliberate before there is any action taken.

□ 1710

Mr. MOYNIHAN. Mr. President, will the Senator yield?

Mr. GOLDWATER. Would the Senator yield so I might comment?

Mr. D'AMATO. I yield to the Senator from Oregon for a question.

Mr. HATFIELD. I thank the Senator for responding to my question. It is not the answer that I would like to have heard to be very frank about it. It still does not remove us from the exigencies of this moment and the dire consequences of having to deal with an issue that transcends either New York State or Oregon or any other single State. It transcends even the institution of the Senate and the House of Representatives because it moves to the very heart of all our Government. That is why I am putting the question to the Senator in such a way that I am sure the Senator realizes that it is a fundamentally important issue to the State of New York. But I think there are times when I have found fundamentally important issues to the State of Oregon that I have had to have my day in court and move on.

Mr. D'AMATO. Mr. President, if I might suggest, I have not propounded this amendment. So if we come to the question of impeding the business of the institution, or that which faces the Nation, I would have to respectfully suggest that there are a number of ways to deal with that. One, and I am not suggesting but of course there are alternatives that the Senator is aware of what should be done to eliminate that. This Senator would then sit down.

Second, there is a question, if we wish to continue on the other parts of the bill, to lay this aside, and I would not object to that so we could continue on the other parts of the bill. Then if we could come back, that might provide a method, and I know tactically it may yield some advantage but we do not seek to unduly impede this body.

However, I think in all due regard to everyone's feelings that it would have been naive to think that this Senator or the senior Senator from New York or other Senators would not have taken this position that I am taking now.

So those who propose it who did not think that this would take place, obviously or if they wanted to make a point, I understand that. Sometimes we offer amendments to make points to indicate our displeasure.

Mr. HATFIELD. Would the Senator yield for one other question?

Mr. D'AMATO. Certainly.

Mr. HATFIELD. Would the Senator consider then, since he has this opportunity with the floor being in his possession and all, if the Senator from New York would try to bring this to some kind of conclusion by making a tabling motion on the Goldwater amendment, and at least getting a consensus or at least getting a decision made on that on the pending amendment, at least bring it to a point where we can make a judgment?

Mr. D'AMATO. I would suggest, given the facts as they presently exist in the overwhelming body, regardless of my attempting to rectify, they would still believe they would be voting if they did not vote to table or if they voted in opposition to tabling for some kind of a flying wreck that would endanger the lives of the young men and women that it is supposed to train—that somehow this flew in the face of the Defense Department's legitimate needs, and I do not believe that suggests that a matter which is so important to this project, this is life or death. There is no recall. There is no looking at this program next year. There is no reevaluating. There is no saying, all right, we will continue with part of a line, and then we will refurbish part or we will do something. This is a killer amendment that closes

that manufacturing facility down that recaptures those dollars, that for all time ends this institution, this industrial complex, and I suggest that flies in the face of the facts as presented by the General Accounting Office. That is why——

Mr. HATFIELD. Would the Senator yield for a third question?

Mr. D'AMATO. Yes, certainly.

Mr. HATFIELD. Would the Senator yield to the possibility—with the size of this bill that we have, and therefore he could have a good look into it. It is not going to escape him—that if we could get unanimous consent to temporarily lay aside this committee amendment and move on with the other amendments, the Senator has not lost any advantage that he now has because this bill is still going to have to be acted upon. Would the Senator consider yielding to a unanimous consent? I do not mean that he is the only person that I have to ask this question to. But I would like to propound that question, move on with the other committee amendments in disagreement, and then, obviously we have to come back where we are now.

Mr. D'AMATO. I am wondering at this point if we might not have an opportunity to consider this with those others who are involved in this matter. There are a number of my colleagues, and I would like to consult with them as I indicated.

I would yield with this proviso, that if this matter were to come back that I would have unanimous consent that I would be entitled to the floor on our return to it and that I still have to be entitled to two speeches, that I have not waived one of those two speeches, and that I would be recognized first on our return to it.

Mr. GOLDWATER. Reserving the right to object, Mr. President, the Senator from New York has not debated this subject. I said at the outset I am not going to debate the aircraft. I am the only one in this body that has ever flown it. I admit it is a pretty nice airplane. I am not going to go into the trouble we had at the outset with it. I am not going into the financial trouble of the corporation. I just asked the question, the Air Force does not want it.

Mr. D'AMATO. I might——

Mr. GOLDWATER. Wait a minute. Let me finish. I am talking right now.

If the Senator can give me a good reason why we should buy that airplane in spite of the fact that the Chief of Staff of the Air Force has said we do not want it, and one Chief told me if you buy it I am going to put them out in the dogpile out——

Mr. D'AMATO. He should be out in the dogpile for making a statement like that, Senator. Let me tell you why.

Mr. GOLDWATER. Wait a minute. You have not debated this thing. You want to talk about the airplane. It is very interesting. I read that book. I have read all the books.

Mr. D'AMATO. Senator, I have heard you on the floor before take this plane apart, hook by hook, piece by piece, and convince this body that the plane could not even fly.

Mr. GOLDWATER. You are out of your head.

Mr. D'AMATO. And you said it. I will read the record.

Mr. GOLDWATER. Read it. I never said that airplane would not fly.

Mr. D'AMATO. You said you would not fly it yourself.

Mr. GOLDWATER. I flew it.

Mr. D'AMATO. You said you would not, though, before you did.

Mr. GOLDWATER. I flew it.

Mr. D'AMATO. All right. Let me say this.

The PRESIDING OFFICER. The Senators are reminded not to refer to each other in the third person in the debate.

Mr. D'AMATO. Mr. President, I would like to make a point. That is in the meetings I have had with the Air Force Chief of Staff, I met with them, General Gabriel, and I was assured by him that if the Congress provided the funds, he would not ask for them, but the Air Force would support the T-46.

What we are seeing is a catch-22. Members of the Congress here said, "Oh, the Air Force doesn't ask." The Air Force says, "If the Congress gives us the funds, we will support it."

Mr. GOLDWATER. They do not have the funds.

Mr. D'AMATO. That is what we do.

Mr. GOLDWATER. Where do you get it?

Mr. D'AMATO. We provide the funds.

Mr. GOLDWATER. Where are you going to find all that money?

Mr. D'AMATO. Again, responding to the distinguished chairman, I do not think at 2 o'clock in the morning or 3 o'clock in the morning or 4 o'clock in the morning if we were going to return to this issue it is going to be any better. But what I do see is that there are going to be more cantankerous spirits, the Senate is going to be viewed as a greater obstructionist to the progress of this body now, and if we want to make progress on this bill, there is a manner in which to do it. That is to pull down this amendment.

Mr. HATFIELD. Would the Senator yield for a question?

Mr. D'AMATO. Yes. I will.

Mr. HATFIELD. I would like the Senator to yield to a proposal of a unanimous consent that I would like to propound that we have a brief quorum call after which the Senator would not have lost his right to the floor, just for a very brief time that I might consult with the Senator.

Mr. President, I do propound that unanimous-consent request, that we have a brief quorum call, that the Senator from New York not lose his right to the floor.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

□ 1720

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MCCONNELL). Without objection, it is so ordered.

Under the previous order, the Senator from New York has the floor.

Mr. D'AMATO. Mr. President——

Mr. HATFIELD. Mr. President, I am about to propound a unanimous-consent request that we temporarily lay aside the pending amendment and move on to dispose of the other committee amendments which will then bring this amendment back to the situation we basically are in now.

The PRESIDING OFFICER. Is there objection?

Mr. GOLDWATER. I object. Reserving the right to object, and I will, I do not like to hold this bill up, but I did not offer this amendment at the Appropriations Committee. My good friend from Alaska did it after I begged him not to do it because we have been all through this thing in the authorization hearings. We have settled it. And here it comes again. I am going to have to object to that. I do not want to sit around here all night any more than anybody else. But this is not of my making. The Senator from New York has been reading out of a book, reading a lot of statistics that I agree with. But somebody has to call the Chief of the Air Force and tell him to pick up the phone and call GOLDWATER. Then I will go for it.

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. D'AMATO. Mr. President, I think perhaps I will call him. I have spoken to him.

Mr. GOLDWATER. Go ahead.

Mr. D'AMATO. They keep saying that the money put in there for this program they will use. We have a question of, as some say, of testing the wills. I do not call it that. I do not see why you have a good, valid, bona fide contract, where everyone says it is necessary, the Air Force, the generals, the personnel up and down the line in 1982, in 1983, and 1984, "We need the plane because we have an aged trainer," and now somehow we do not need it. This need has dissipated.

I will tell you something. I am not going to sit by and allow that company to be closed because there is more at work than whether or not we need a new trainer. We need it. Senator

GOLDWATER himself has said the plane is a good plane. He says the Air Force said they do not want it. What are they going to do?

Are we going to rework the old plane? How long does that take? If we begin to rework it, how much more is that going to cost the taxpayers? Hundreds of millions. How many billions more 5 years from now when we start with a new trainer will it cost the American taxpayer? Whose interest have we met?

I am not arguing strictly from the point of view that this is a company in my State.

Were I not to do it, I would be remiss. Something would be wrong. The people there would say, "Why is it, Senator, that you are so quiet?" When it came to getting rid of a toxic dump, I stood up and said we have to appropriate some moneys and see to it that an agreement that a prior administration entered into in terms of West Valley in New York was completed.

It is nothing new for this Senator to go to the floor when he feels strongly. I will say let the record speak for itself, that there have been very few occasions, less than on one hand for this Senator, when this Senator has taken this kind of position in my 6 years here. I have not unduly taken the time of my colleagues. I have not thwarted the will of the majority. I have not used those important prerogatives that should be used very carefully in terms of taking the floor and using that which is a very important right for the minority but should not be unduly abused.

When I do, I do it out of a feeling of conviction. The record speaks for itself.

Why should we not look at the merits of the plane? What this amendment does is it kills the plane. It says that the plane is not necessary. It says that the plane is deficient or defective or we have a better way to deal with an obvious deficiency in our military arsenal now.

What is that better way? I think the people of the United States have a right to know. How are you going to meet the deficiencies of seeing to it, where you have a 30-year-old trainer, that you are going to give our young men and women a better deal?

Mr. GOLDWATER. Will the Senator yield?

Mr. D'AMATO. For a question, yes.

Mr. GOLDWATER. Does the Senator know that the T-38, which is our hottest jet fighter trainer, is going to go to the year 2010 and is already planned for that? Aircraft do not wear out because of age. They are not like us.

Mr. D'AMATO. I am wondering, if that is the case, why was it in 1979, 1980, and 1981 when the Air Force, the Defense Department, and all those who are involved in the procurement of new weapons systems and aircraft in particular, did not say, "Let us rework this plane" at that time.

Are we saying today, given life cycle costs that this report addresses, in terms of saving money, are we saying that the T-46 trainer is not necessary today because we found a better way to handle the T-37 that is very old and was old then, that Secretary Orr testified many of the generals said we need?

I wonder.

The question was asked of those who testified before the Appropriations Committee: "Is the T-37 extension viable?"

This, by the way, was before the House Armed Services Committee in March 1986. The answer was: "The number of available T-37B aircraft will not be sufficient to meet the projected pilot production rates beyond 1987."

What about additional moneys?

This was the general commander of the Air Training Command, General Osway.

□ 1730

He said, "Pouring any money into the T-37 is like pouring money into a rat hole."

I suggest the only thing that has changed is that the rat hole has gotten deeper and bigger and older. It has not improved.

I wonder why it is that the general's remarks then are something that we disregard now.

Mr. GRAMM. Would the distinguished Senator yield? I know he has been talking a long time.

Mr. D'AMATO. No; I will not yield.

Mr. GRAMM. If he would let me respond, perhaps I could answer his question.

Mr. D'AMATO. No; I will not yield. I have yielded a couple of times already. I think I am going to make some points that are appropriate and necessary because we have had about 1 year of a constant barrage and bombardment from the Defense Department, from the Air Force, and from others that would make one believe that obviously, this plane must have been designed by the politicians from New York; that somehow, we discovered a need for this; that we said you need a plane, a T-37; that we put the contract together; that we said it is the best and most efficient and it meets all these needs.

This was the Air Force doing it. I wonder why they changed their minds? It would be interesting to get the good general over and say, "General, you really don't need a new trainer? You can still keep flying this old, 30-year-old plane? How much is it going to cost to rewing it, to put new engines in, to bring it up to specifications? Are you really going to put a pressurized cabin in?

"Why, when we asked the question back in the early eighties and the seventies, didn't you say you could rewing that plane, and how is it you have changed your mind, and who has talked to you, and who has talked to the Defense Department? And why did the Defense Department come to those conclusions?"

Those are the questions, and when you look at the report, no one wants to discuss the merits of the report. You know why? Because the report said very simply that the T-46 is a good plane that exceeds the contract standards and we should really be doing the business of the people and continuing this instead of attempting to assert that one is scrapped or one is right for bona fide reasons.

Now, beginning on page 8:

APPENDIX I

Beginning in September 1982, Fairchild started reporting cost variances in its monthly cost performance reports. Fairchild recognized in its September 1983 cost performance report that the estimated completion cost would exceed budgeted costs. Between September 1983 and July 1984, Fairchild increased its estimated completion costs several times from $116 million to $139.1 million, which at that time exceeded the July 1984 contract ceiling price of $127.1 million. Since that time, the contract ceiling price has increased due to contract modifications.

With cost estimates continuing to increase, Fairchild officials said they realized that the scope of work was greater than expected and that managing the program within the amounts in the original contract would not be possible. Air Force officials said that the T-46A engineering, test, and manufacturing effort was underestimated and that Fairchild was not applying the required resources (personnel and funds) to complete development on schedule. Fairchild has been providing additional resources since January 1985.

I call to my colleagues' attention that this is a very well balanced report. The Senator from New York does not disagree. It points out the deficiencies. It points out the problems that Fairchild encountered. It also demonstrates where the company moved to correct those deficiencies.

Projected cost overruns resulted in the Air Force Plant Representative Office (AFPRO) reducing Fairchild's progress payments on the development portion of the contract in August 1984 and on the first production lot in January 1985. These reductions were made in accordance with procurement regulations to more closely match the progress payments with work progress.

As shown in table I.1, Fairchild's cost performance reports and Air Force cost performance data as of December 31, 1985, show that the estimated final cost for both T-46A development and first production lot will be substantially greater than the contract ceiling price.

TABLE I.1—T-46A COST ESTIMATES, DEC. 31, 1985

[In thousands of dollars]

Program phase	Contract		Estimate at completion	
	Target price	Ceiling price	Fairchild	Air Force
Development	111,832	134,354	220,308	220,308
Lot I production	58,053	64,241	91,521	100,441
Total	169,885	198,595	311,829	320,749

So that we can see even there the differentiations were not ones of extraordinarily large amounts but well within that which is experienced in other times.

Under the terms of the contract, the Air Force is obligated to pay up to the ceiling price or $198.6 million. Based on the Air Force estimate, Fairchild would absorb $122.2 million in excess of the ceiling.

SCHEDULE DIFFICULTIES

In addition to cost difficulties, the T-46A contractor experienced a number of missed schedule milestone dates. The T-46A development contract with Fairchild contained 10 demonstration milestones ranging from completion of preliminary design review on February 1, 1983, to first flight on April 15, 1985. As shown in table I.2, Fairchild did not meet the original scheduled date for 5 milestones, including first flight. The first flight milestone, originally scheduled for April 15, 1985, was made 6 months later, on October 15, 1985. Two milestone dates to begin structural testing were extended by contract modifications.

Table I.2: T-46A Contract Demonstration Milestones.

There are 10 milestones. I shall go over them.

Air vehicle preliminary design review (PDR) complete. The original contract date was February 1, 1983; the accomplished date was February 1, 1983.

So it was on time.

The air vehicle critical design review complete. Its original contract date was August 1, 1983. This is the review of the air vehicle preliminary design. It was modified in September 1983 and it was actually completed September 13, 1983, so it was 1 month behind its original contract date. Not too bad.

Organizational and Intermediate Support Equipment [PDR] Complete. Original contract date December 1, 1983. Actual date completed December 15, 1984. Not too good, 12 months behind.

First Test Aircraft Major Assembly Started. The original contract date was March 1, 1984. The date of completion, actual, was March 1, 1984; months behind, none.

□ 1740

Escape System Qualification Started: Original contract date, July 15, 1984; actual accomplished date, July 15, 1984. Months behind, it was on time.

Depot Support Equipment PDR Complete: Original contract date, December 1, 1984; accomplished date, December 1, 1984. Months behind, zero.

Start of Full-Scale Static Testing: December 1, 1984; modified, October 31, 1985. Actual date completed, October 31, 1985. Not too bad. That is 11 months behind.

First Test Aircraft Empennage (Tail) and Wing Assembly Delivered: Contract date, January 1, 1985. Accomplishment date, December 31, 1984. So it was right on time.

Start of Full-Scale Durability Testing: Here they ran into a little problem. The original date was January 1, 1985. It was modified to July 31, 1986. And they were 19 months behind. Estimated completion time, July 31, 1986.

First Flight: Estimated April 15, 1985. They moved that to October 15. It was actually accomplished October 15, 1985, so that is was 6 months behind.

Mr. President, I am wondering if I could not ask for order.

The PRESIDING OFFICER. The Senate will be in order.

Mr. EXON addressed the Chair.

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. EXON addressed the Chair.

Mr. D'AMATO. Mr. President, the Air Force concern—let me give a recapitulation of that table: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10—10 contract items. We are talking about milestones. These are important, critical elements in weighing this. Out of those, No. 1 was on time. No. 2 was virtually on time; it was 1 month behind. No. 3 ran into a problem; it was 1 year behind. No. 4, first test, was OK. No. 5 was OK. No. 6, on time. We have actually 1, 2, 3, 4 out of the 10 ran into some time problems, some as little as 1 month, some as much as 5 months. One a little longer, the start of full-scale durability testing and for a number of reasons but that was 19 months. Not unusual. Not unusual. And yet we were led to believe from the Air Force that this was a situation that at certain times they felt would possibly never be rectified.

Now we talk about the Air Force concerns resulted in contract modification.

The Air Force concerns about the overall progress of the T-46A program and the missed first test flight milestone led to a modification of the Fairchild contract on October 1985.

In a January 29, 1985, letter to Fairchild, the Air Force T-46A Systems Program Office (SPO) stated that it was becoming increasingly concerned about Fairchild's progress in several areas of manufacturing and testing. The SPO stated that schedule delays appeared to be endangering the first flight milestone of April 15, 1985, and requested Fairchild to review the situation and provide a realistic revised schedule. On February 19, 1985, Fairchild responded and stated that its review indicated a revised first flight date of April 30, 1985.

On February 11, 1985, the first test aircraft was rolled-out. Air Force officials said that required parts were missing from the aircraft and some of the installed parts were not flight worthy. The roll-out was not a contractual requirement.

In an April 17, 1985——

By the way, Mr. President, I might add I was there at that time and that was not a very happy occasion for Fairchild. And I must say that the Air Force was absolutely correct in being annoyed—in being more than annoyed, being angered in terms of Fairchild's not meeting its responsibility and, more than that, attempting to conceal from the Air Force some of the problems that it encountered.

That was wrong. I told Fairchild that. I told them I was not going to support them in those kinds of efforts, that you do not try to deceive those, particularly the Government, that you have entered into contractual relations with, and I think they learned from that. That was a sorry time. I felt taken advantage of, and I must admit, to come to a rollout and find out later that some of the items of manufacture were indeed not as they should be, was, I think, a low point in the relationship.

Nonetheless, you do not take a mistake that someone makes and hold it against them forever. You see whether or not they are capable of curing that deficiency, and if they have the kind of people who are going to do the job.

In an April 17, 1985, letter to Fairchild, the SPO identified several schedule delinquencies, including the missed first flight milestone, which would severely affect the remainder of the development and production program. The SPO requested Fairchild to revise its schedule for accomplishing contract milestone requirements. During the next several months, the SPO and Fairchild discussed several schedules. These discussions culminated in an October 7, 1985, bilateral modification to the contract.

The contract modification listed seven contract requirements that Fairchild had not complied with, including not meeting several demonstration milestones established in the original contract, and not delivering the two development aircraft on schedule. The contract restructuring did not affect the target price but it did make the following changes.

So here they are attempting to deal with the deficiencies.

Established new demonstration milestone dates for conducting the first flight and starting full scale static and durability testing.

Established four new management milestones for measuring Fairchild's progress during the remaining development program.

Extended the planned date for exercising the second production option from December 1, 1985, to March 1, 1986. The Air Force also reserved the right to extend the exercise date for that option for a period equivalent to the longest period of delay experienced by Fairchild in meeting any of the demonstration milestones established in the original contract.

Extended the delivery date for the first development aircraft from March 1985 to August 1985 and the second aircraft from June 1985 to April 1986.

On February 28, 1986, the Air Force unilaterally extended the planned date for exercising the second production option from March 1, 1986, to May 3, 1986. However, the Air Force on March 28, 1986, announced its intention not to exercise that option.

There were contract or management difficulties, and we will go into those, and this report goes into those.

I hope that staff is getting me the additional appendices, so that when I conclude these, we have those to put into the RECORD.

If you have not sent for them, I hope you will send for them.

Air Force reviews in May and June 1985 found that a number of Fairchild's management systems and procedures were unsatisfactory.

In May 1985 the SPO conducted a Cost Schedule Control System Criteria Subsequent Application Review to determine if Fairchild's Management Control Information System was being properly applied to the T-46A production program. The review rated Fairchild's procedures unsatisfactory.

Again, I think this is interesting. Here is a report—and I say to my colleagues, take a look at it. It is fair; it is balanced. It does not come with a prejudice but, rather, a requirement to report truthfully and directly its findings, and it found management problems.

Mr. HATFIELD. Mr. President, will the Senator yield for a question?

Mr. D'AMATO. I yield.

Mr. HATFIELD. I wonder if the Senator would permit me to propound a unanimous-consent request that would permit us to have a brief quorum call and the Senator would not lose his right to the floor.

Mr. D'AMATO. Provided this would still be a continuation of my first speech.

Mr. HATFIELD. I would incorporate that in my request.

The PRESIDING OFFICER. Is there objection?

Mr. EXON. Mr. President, reserving the right to object, will the Senator state his request?

Mr. HATFIELD. My request would be to have a very brief quorum call so that I might confer with the Senator from New York, and that when the quorum call is ended, the Senator would not have lost his right to the floor, and his speech would not constitute a second speech.

Mr. EXON. At the end of that quorum call, the Senator will have the right to the floor?

Mr. HATFIELD. The Senator would.

Mr. EXON. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from New York.

Mr. D'AMATO. The Air Force review that I referred to definitely came after that with various procedures that were found to be unsatisfactory.

For example, the report noted that estimated completion costs appeared unrealistic and material performance measurements were questionable. The SPO requested, and Fairchild agreed to implement, corrective operating procedures by May 30, 1986. Corrective procedures have since been agreed upon and implemented or are in the process of being implemented by Fairchild.

So it points out that there were deficiencies and indicates steps being taken to correct those deficiencies, and it then goes into those processes implemented by Fairchild.

In June 1985 the Air Force Contract Management Division conducted a detailed contractor operations review (COR) at Fairchild. This review, which focused on eight management areas, reported a total of 279 findings in the areas of manufacturing, industrial material management, contract management, industrial safety and fire protection, subcontract management, engineering, quality assurance, and product integrity.

Mr. HATFIELD. Mr. President, will the Senator yield for a question?

Mr. D'AMATO. I yield.

Mr. HATFIELD. I would like to now propound my unanimous-consent request once more, that the Senator from New York not be denied his second speech and that he would have the right to the floor following a very brief quorum call.

The PRESIDING OFFICER. Is there objection?

Mr. PRYOR. Mr. President, reserving the right to object, I ask the distinguished Senator from Oregon if it would serve the Senator's purpose that he is attempting to accomplish if, during that period of a quorum call—say, not to exceed 7 minutes—I may be allowed to speak, without the Senator from New York losing his right to the floor at its conclusion. I do not want to complicate matters.

Mr. HATFIELD. I have no objection. I am trying to get to the point where I can have a private discussion with the Senator from New York.

Mr. PRYOR. I was trying to give the Senator from Oregon that opportunity.

Mr. HATFIELD. Mr. President, I withdraw my unanimous-consent request, and I ask unanimous consent that the Senator from Arkansas might be recognized for 6 minutes——

Mr. PRYOR. Let us say 8 minutes, and maybe I can yield back a couple of minutes.

Mr. HATFIELD. Eight minutes. And then the floor be returned to the Senator from New York, without a quorum call.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. PRYOR. Mr. President, I rise today to make a few remarks within the category of "observations" or "food for thought."

The Senate is a very great institution, composed of dedicated people, and to have served here for these few years is a great honor for me that few people have been accorded.

I am one Member of this body, and I believe there are many more, who sincerely believes that the Senate can be a better place. I do not speak of "a better place" in terms of what some have characterized as an absence of "quality of life," but I speak of "a better place" in terms of an institution which can better serve the American people.

My observations today do not reflect on any individual or well-meant procedures we have adopted. I speak only of a system, Mr. President, which, for one reason or another, has strayed from its original purpose and intent.

Mr. President, the budget process has broken down. In its original inception in 1974, the new process was intended to bring about order, discipline, and efficiency into the budgetary system.

□ 1800

The Budget Act was intended not to substitute or to supplant the historic authorizing and appropriations process envisioned by our constitutional framers but rather to strengthen it.

Mr. President, let us admit it. The process has failed. It is not working and today I ask in public what many of us have been asking in private. Should we repeal the Budget Act of 1974? Should we change it or should we modify it?

Mr. President, I respectfully submit that the four massive steps in our budget process has brought us to a point of institutional overload. To have each calendar year a budget resolution, authorization, appropriations, reconciliation, and add to it Gramm-Rudman is at best an invitation to a legislative nightmare.

Yes, I know what some who favor the present budget process may argue, that what would be the deficit. The deficit cost today would be larger if we did not have a resolution and reconciliation procedure. Who would establish the ceiling of expenditures?

The fact is, Mr. President, for some 30 years prior to the Budget Act of 1974, the Senate Appropriations Committee, with one exception, funded fewer dollars than the President's request called for.

In fact, as a matter of history, our budget deficit in 1974, the very year that our budget system was adopted, our budget deficit was somewhere in the neighborhood of 6 billion. Today it is $200 billion.

The system was preposterously complicated. It is redundant to the point of absurdity. The process of authorization and appropriation has merged today into almost an identical twin.

Mr. President, could we have order in the Chamber, please?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from Arkansas.

Mr. PRYOR. In the past 9 years we have failed time and time again to meet the budget resolution guidelines. In 1978 and 1979, we missed the May 15 deadline imposed by law by only 2 days. However, in 1985 we were 105 days late. In 1986, 68 days late. This year we held our respective noses and voted for a reconciliation bill that many felt figures had been cooked to avoid the deep canyon of Gramm-Rudman. To add a debt ceiling bill each few months, that has not become a legislative vacuum cleaner sucking up all the leftovers from the Senate floor, has created yet another budget albatross around our necks.

Here we are, Mr. President, on October 16 and on the respective desks is yet another 18-pound white monument to our own failure and a system encumbered with institutional overload. I speak of a continuing resolution weighing 18 pounds containing most of the appropriations of our federal system. This year not one appropriation bill has passed and has been signed by the President to this date. The continuing resolution is instant government. It is a strained stew, not cooked on a stove but hastily put into a microwave. Many items contained here were never debated. Many were never the subject of committee hearings or discussion, and we are just hearing a debate today on an airplane that we understand the Air Force does not even want.

Mr. President, this continuing resolution represents the worst of our legislative process. I have no problem and certainly only respect for the distinguished chairman of the Appropriations Committee, Mr. HATFIELD, and the Appropriations Committee. But our system has made them a captive to the process.

In 1970, before the Budget Act was implemented, that Senate that year had 170 rollcall votes on budget related items. By 1975, 246 budget related votes in the Senate were cast. In 1981, 344 budget related votes were cast. In 1985, 67 percent, 67 percent of all of the rollcalls in the Senate were on budget related items.

Mr. President, the Senate has become a giant committee on the budget, overcome and overwhelmed by procedures that originally had a noble intent but ultimately has almost made a mockery of the authorization and appropriation process.

This year, Mr. President, the Senate has spent 43 hours on a continuing resolution. It has cast 27 votes on a continuing resolution. One hundred eleven motions and amendments were decided up or down. On the 1987 budget resolution, we have spent 11 days, 71 hours to be exact, with 42 votes, 44 motions and amendments.

The Senate this year has spent on the debt ceiling alone, Mr. President, 8 days, 41 hours of debate and quorums, 11 votes and 37 motions and amendments.

Once again, Mr. President, institutional overload.

As to this creature called a continuing resolution, since the 1974 Budget Act let us look at how we have treated appropriations.

Considering the 13 major appropriations bills in 1986, we have passed none. In 1985 we have passed five; in 1984, four; in 1983, one; in 1982, zero; in 1981, one; in 1980, three. Every year since the budget system that we now employ has been adopted fewer and fewer appropriation bills and more and more opting out for one more continuing resolution to keep the Government afloat.

Each year we say it is going to be better, Mr. President, and each year it gets worse.

Yes, Mr. President, we have stumbled through another year. We are not at the end. Next year I hope that we will resolve to do better. Maybe we should repeal the Budget Act. Maybe we should modify it. Maybe we should start over.

Whatever the course of action we choose, Mr. President, I hope that we will admit that this institution has a very severe problem and I hope that we will face that problem.

I respectfully submit that the worst thing we can do is to do nothing.

Our system is broken down and now we must fix it.

The PRESIDING OFFICER (Mr. BOSCHWITZ). The Senator's time has expired under the previous order.

Mr. PRYOR. If I could have 30 more seconds, Mr. President, I ask unanimous consent to proceed for 30 more seconds.

The PRESIDING OFFICER. Is there objection?

Mr. D'AMATO. Do I yield time?

Mr. PRYOR. I am asking for 30 more additional seconds.

Mr. D'AMATO. Without objection, that I have the continued arrangement that I keep the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas.

Mr. PRYOR. Thank you, Mr. President.

Procedures are one thing, but the absence of will is another. Hopefully, Mr. President, 1987 will reinforce that will.

Mr. CHILES. I yield the Senator those 30 seconds. I like that. I like his closing statement.

The PRESIDING OFFICER. Under the previous order, the Senator from New York is recognized.

Mr. D'AMATO. Mr. President, as I left off in my talk and review of the General Accounting Office report and finding, aircraft procurement development and production issues concerning the T-46A aircraft, we had reached appendix I, page 10. I listed five areas and then the contractor management difficulties that had been developed and the fact that Fairchild had indeed undertaken procedures to deal with these deficiencies.

In June 1985 the Air Force Contract Management Division conducted a detailed contractor operations review (COR) at Fairchild. This review, which focused on eight management areas, reported a total of 279 findings in the areas of manufacturing, industrial material management, contract management, industrial safety and fire protection, subcontract management, engineering, quality assurance, and product integrity.

As I indicated, they reported 279 findings in the area of manufacturing, industrial material management, contract management, industrial safety, fire protection, subcontract management, engineering, quality assurance, and product integrity. Quite an exhaustive study.

The major COR concerns in the contract management area were inadequacies in (1) contract administration procedures to assure compliance with the terms of the T-46A contract, (2) cost schedule control systems, criteria and procedures to provide accurate cost and schedule information, and (3) the estimating system to produce current, accurate, and complete data. The COR also identified a number of concerns in the subcontract management area.

As a result of the COR, the Air Force Administrative Contracting Officer advised Fairchild on August 29, 1985, that a 50-percent withholding in progress payments would be instituted and would remain in effect until satisfactory correction of the identified deficiencies. Fairchild has taken a number of actions to correct these problems, many of which have been accepted by the Air Force. On April 21, 1986, the Air Force plant representative at Fairchild, citing progress in correcting deficiencies restored half of the withheld progress payments.

□ 1810

So, as I have indicated before, there were problems, some serious, some distressful even to this Senator. But the fact of the matter is that the Air Force representatives themselves indicated that these deficiencies were being dealt with and to restore those payments.

The corrective actions taken by Fairchild in response to the COR, their current status, and Air Force views on these actions are discussed in appendix II.

PRODUCTION STATUS

Development aircraft

Two development test aircraft will be acquired for the T-46A flight test program. The flight test program will determine how well the aircraft meets performance, maintenance, and reliability requirements.

The first T-46A was delivered in August 1985 and has been undergoing flight testing at Edwards Air Force Base, California, since October 1985. This development test aircraft will be used to test air worthiness,

flying qualities, and other performance requirements.

The second development aircraft is being built. As of mid-March 1986, it was undergoing flight load calibration at Fairchild and was about a week ahead of the July 1, 1986, first flight schedule. The aircraft is scheduled to be flown to Edwards Air Force Base, California, in July 1986 for flight testing scheduled to begin on August 4, 1986. This development test aircraft will be used for air loads and climatic testing.

I hope I have the results of those tests because I think they would be interesting. We could put them into the RECORD so that we would again dispel the fact that this plane does not meet standards and is not a plane that should indeed be in the arsenal of America.

PRODUCTION AIRCRAFT

The first T-46A production lot is in various stages of manufacture and assembly. Fairchild noted that tooling for production is in place. The contractor's production schedule for the first production aircraft shows that the aircraft is basically on schedule to meet the contractually required delivery date of November 30, 1986. The remaining nine aircraft are to be delivered between December 1986 and July 1987. Although Fairchild representatives said that they would meet the delivery dates for the first production lot, Air Force officials believe the first aircraft delivery may not be accomplished until early 1987.

Under the terms of the contract, the second production lot option gives the Air Force the right to acquire between 22 to 44 aircraft at specified prices. The contract also gives the Air Force the right to extend the option exercise date in the event Fairchild failed to meet certain original contractual demonstration milestones. The Air Force had extended the second lot option exercise date to March 1, 1986, because, among other reasons, Fairchild had not started the full-scale durability testing and had not made the first flight by April 15, 1985, as required. Effective February 28, 1986, the Air Force unilaterally extended the option date by an additional 3 months, to May 31, 1986. Fairchild representatives told us that if the Air Force did not order the second production lot by the end of March, Fairchild would experience a break in production. The contractor also explained that if the third production lot was not included in the Air Force budget for fiscal year 1987, it would seriously impact the production program.

Mr. FORD. Mr. President, would the distinguished Senator from New York allow me 5 minutes without losing his right to the floor?

Mr. D'AMATO. Mr. President, if that were propounded as a unanimous-consent request and I would not lose my right to the floor and this would be considered my first speech, I would have no objection.

Mr. FORD. I ask unanimous consent that that be granted, Mr. President.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request? If not, it is so ordered.

The Senator from Kentucky.

Mr. FORD. Mr. President, I thank the distinguished Senator from New York for allowing me this time. The reason I ask for it is the fact that my distinguished friend from Arkansas, Mr. PRYOR, made a statement relating to the continuing resolution and to our budget process.

HERE WE GO AGAIN

Mr. President, President Reagan is noted for a now famous phrase used in his debates with former President Carter—"There you go again!"

At the end of several sessions of Congress now, I have made a special point of calling attention to our failed annual appropriation system and the need for a change to a 2-year budget and appropriation system. On these occasions, and again now, I have said, "Here we go again!"

Primarily because of lack of time, we are now into a new fiscal year without any of our regular appropriation bills enacted. Again, we will struggle to produce an acceptable continuing resolution—now the largest money bill in the history of the Congress—to provide the funds needed for the Government to continue to operate.

Again, we will expose ourselves to the dangerous and costly process of legislating on the continuing resolution appropriation bill. If we are lucky, and members act with restraint, we will avoid serious harm. But only if we are lucky.

Certainly we cannot thank our annual appropriation process. It has long since failed to serve our needs. The time to move to a 2-year budget and appropriation cycle has passed, and I hope my colleagues now share this realization.

If the good people of Kentucky in November do me the honor of renewing my membership in this great institution, I shall again, at the beginning of the 100th Congress, re-introduce my bill to establish a 2-year budget and appropriation process. I hope this time most of my colleagues will join me in this effort.

The first time I introduced the bill, I had four or five that went along with me. This last time we had 20-some Senators that signed on and several tried to pick a bill and go forward as if it was theirs. I have no pride of authorship. I would just like to see this Senate move forward in a way where we can do our business in the best interests of our country.

As I have said before, repeatedly, a 2-year budget cycle will not alone solve or even lessen many of our most severe budget and fiscal problems. It will, however, relieve us from several serious dangers, and it will provide us with additional time—and that is what we need, additional time—to devote to those most severe obstacles that now drive us deeper and deeper into debt.

The 2-year budget process is not a gimmick or panacea. It is a simple means of providing Congress with the time it needs to do a reasonable and responsible job of planning, authorizing, budgeting, and appropriating.

Without it, in my opinion, we will continue to fail and continue to depend on unreliable last minute continuing resolutions. With it, we will at least give ourselves a fighting chance to climb out of this great dark hole of public debt in which we find ourselves, and which continues to grow deeper and darker.

□ 1820

Mr. President, several of our colleagues have been talking about the 2-year budget. Last year appropriations were not enacted until December 19. And the budget reconciliation bill for fiscal year 1986 was not passed until about half the fiscal year was over, by which point the fiscal year 1987 debate was well underway. Many of the States, 22 I believe, at last count, use biennial budgeting. The White House Chief of Staff, Donald Regan, told reporters in August that reform of the budget process——

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. FORD. I ask unanimous consent for 2 more minutes under the same procedure.

Mr. STEVENS. Five. We would like to have a little colloquy.

Mr. FORD. Five minutes, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. White House Chief of Staff Donald Regan told reporters in August that reform of the budget process, which he called "a crazy hodgepodge," will be a priority for the Administration, and mentioned a 2-year budget process as a possibility. Perhaps more significantly, Senate Budget Committee chairman PETE V. DOMENICI, recently gave the idea a strong endorsement.

It would seem to me if we want to really send some signals to our Members and to our people that we are organized in a way which is calculated to get the business done, we ought to have one budget resolution that is good for two years and that can be modified simply about every six months, and we ought to do away with annual appropriations and have them once every two years, and we ought to let Members of Congress spend a year doing other business and a year doing the business of the fiscal policy of the nation.

That was a statement of the distinguished chairman of our Budget Committee. And he also said, "I see no reason why we couldn't do it all on a 2-year cycle."

Defense Secretary Caspar W. Weinberger has said that biennial defense budgeting would save "a tremendous amount of time and resources," and Congress, bowing in that direction, has now required the Pentagon to submit 2-year budgets.

Our distinguished colleague from Arizona has been one of those that has pushed it.

Alice M. Rivlin, a former director of the Congressional Budget Office who is now with the Brookings Institution, is a leading advocate of biennial budgeting as part of a broad simplification of congressional fiscal procedures.

The idea behind 2-year budgeting is to clear out time every other year to get something besides the budget done. Agencies would plan 2 years at a time.

We would give our communities and our counties an opportunity to plan. Those States that receive Federal funds would have an opportunity to plan and know what was coming down the pike. They in turn could do a better job of getting more cents from a dollar.

Such planning goes on anyway; a spokesman for the Office of Management and Budget said that the second-year numbers in the President's budget are as precisely worked out as for the fiscal year at hand and serve as the ceilings for the next year's budget request.

So we are almost in that cycle.

Mr. President, I ask unanimous consent that a copy of the National Journal column "Washington Update" be included in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From National Journal, Sept. 27, 1986]

WASHINGTON UPDATE—BIENNIAL BUDGETING TAKING ROOT

(By Jonathan Rauch)

As most people have probably figured out by now, the fiscal year lasts 12 months. Funny thing, though, about Washington's yearly budget cycle—it takes more like 14 months, counting the time the President needs to put his fiscal proposal together. Sometimes the cycle takes longer, and rarely does Congress manage to finish its budgeting until the fiscal year at issue is well under way.

"You don't have time to catch your breath," Garland E. Ferrell, Indiana's deputy budget director, observed. "You're just going from one budget cycle to another."

It's all too true. Congress begins fighting over the budget in February, when the President sends his fiscal plan up to Capitol Hill, and the battling continues until well into the fall, when the last full-year appropriations measure is finally signed. Not long after Congress returns from the Christmas holidays, the whole process begins again. Last year appropriations weren't enacted until Dec. 19. And the budget reconciliation bill for fiscal 1986 was not passed until about half the year was over, by which point the fiscal 1987 debate was well under way.

Many of the states—22, at last count—use biennial budgeting as an alternative to seemingly unremitting budget wrangling, and recently Congress has shown a few signs, although only in the most preliminary way, of giving thought to a similar approach.

White House chief of staff Donald T. Regan told reporters in August that reform of the budget process, which he called "a crazy hodgepodge," will be a priority for the Administration, and mentioned a two-year budget process as a possibility. Perhaps more significantly, Senate Budget Committee chairman Pete V. Domenici, R-N.M., recently gave the idea a strong endorsement.

"The people of this country can't possibly know what we're doing," he said in July remarks before a Senate committee. "I mean, continuing resolutions confused with budget resolutions confused with appropriations bills, ad nauseum.

"It would seem to me if we want to really send some signals to our Members and to our people that we are organized in a way which is calculated to get the business done, we ought to have one budget resolution that is good for two years and that can be modified simply about every six months, and we ought to do away with annual appropriations and have them once every two years, and we ought to let Members of Congress spend a year doing other business and a year doing the business of the fiscal policy of the nation."

About 90 percent of the annual appropriations process, which controls about half of government spending, is a repetition of the previous year's work, Domenici said. "I see no reason why we couldn't do it all on a two-year cycle," he said.

Defense Secretary Caspar W. Weinberger has said that biennial defense budgeting would save "a tremendous amount of time and resources," and Congress, bowing in that direction, has now required the Pentagon to submit two-year budgets. (See this issue, p. 2302.) Weinberger and others argue that two-year budgets would allow the Defense Department to buy weapons and do other planning more efficiently.

Over the years, Members of Congress have filed a variety of bills to set up multiyear—usually biennial—budgeting, so far without getting anywhere. The idea is likely to keep appearing, given that the annual budget cycle has seemed to become almost interminable in recent years.

Currently, after the President submits his budget, Congress takes months to agree to a budget resolution, which is a fiscal plan setting targets for subsequent tax and spending legislation and, when necessary, requiring deficit cuts. It then takes months longer to approve annual appropriations bills and other budget bills that implement the resolution's goals. To call the process time-consuming or inefficient hardly does it justice.

Alice M. Rivlin, a former director of the Congressional Budget Office who is now with the Brookings Institution, is a leading advocate of biennial budgeting as part of a broad simplification of congressional fiscal procedures. "We spend enormous amounts of time going over the same decisions," she said. "In recent years, there hasn't been time for anything else."

The idea behind two-year budgeting is to clear out time every other year to get something besides the budget done. Agencies would plan two years at a time, and, Rivlin said, "They'd have to learn that if they make a mistake, they know they're going to eat it."

Such planning goes on anyway; a spokesman for the Office of Management and Budget said that the second-year numbers in the President's budget are as precisely worked out as for the fiscal year at hand and serve as the ceilings for the next year's budget request. In other words, the fiscal 1988 budget numbers in the President's fiscal 1987 budget proposal become the basis for the fiscal 1988 budget.

Biennial budgeting at the legislative level is an old idea that would take such planning a step further. And it is a familiar idea to many states. For some of them, it is a requirement of biennial legislative sessions; others use it to make budgeting less cumbersome and to force planning.

Smaller, more rural states tend to be the ones that use biennial budgeting, executive director Gerald H. Miller of the National Association of State Budget Officers said, although some big ones—Florida, Ohio, Texas and Wisconsin—also enact two-year budgets. The states take various approaches, many of them using an off-year adjustment process and reserve funds to take care of unforeseen spending.

Indiana, for example, sets aside emergency funds, and the legislature comes back for a shorter session in off years to take a second look at the budget. The whole budgeting process, Indiana's Ferrell said, takes about five months. "Having to go through the budget on an annual basis just takes forever," he said. "If it took us as much time as Congress, we'd need a full-time legislature."

Miller rejects categorically the assertion that the relative complexity of federal spending would make biennial federal budgets impractical; these days, he said, many states' budgets are every bit as complex. "If you properly measure the man-hours Congress takes on the budget this year, I believe biennial budgeting would reduce it significantly," he said. "It would be a positive step, not only for the federal government, but also for the states that have to deal with the federal government." For entities that rely on federal money, the annual last-minute scrambles to pass spending bills make planning difficult, he and many others have complained. (See NJ, 7/12/86, p. 1713.)

Others point to potential problems, though. The Appropriations Committees have never been crazy about the idea. A senior staff member of the Senate Appropriations Committee said that the appropriators' attitude has by and large been negative. "The proposed solution may not cure anything," he said.

In off years, he said, Congress might simply find most of its usual budget headaches transferred to massive tussles over supplemental spending bills, which might grow correspondingly bigger and more complex than they are now. Furthermore, he said, "If you give the executive branch two-year money, they can make more mischief." In many portions of the budget, the Appropriations Committees try to keep a tight rein on what can be spent when. Almost inevitably, he said, letting the President allocate bigger pots of money over longer periods would cost Congress some control.

Miller, of the state budget officers' group, said, "I would tend to agree that [a two-year budget] tends to give the executive more power, more influence, or whatever." But Rivlin, among others, questions whether it would really make much difference.

Another objection may be more fundamental: You can't cure political problems with procedural revisions. The Senate Appropriations staffer said, "We can tinker with the system all we want to, and it won't reform these guys."

On the other hand, it is hard to see how a biennial budget might slow things up much. You would have to work pretty hard, Miller

observed, to come up with a more convoluted and time-consuming system than the current one.

Mr. STEVENS. Would the Senator yield?

Mr. FORD. I would be delighted to yield.

Mr. STEVENS. I am delighted to have the comments of my good friend from Kentucky. I would hope he would also include in his recommendations, and he will have I am sure a similar thought to mine; that is, the feeling that we must have a reorganization of the Senate itself in order to achieve this goal. We addressed this once before before the Rules Committee. I hope next year the Senate will take the time to readjust and reform the Senate jurisdiction so it will eliminate some of the duplication.

My good friend from Arizona knows how we feel about the problems between the authorization committee and the Appropriations Committee on defense, for instance. This year for 5 years out of 6 we have presented an appropriations bill before the authorization bill was presented. That leads to just confusion all across the board. It comes also from the budget process because we have been through this in the budget process. It did not finalize the authorization process.

Mr. FORD. If the Senator will yield for just a moment, in the October 12, 1986 Washington Post, the distinguished Senator from Arizona [Mr. GOLDWATER] had an article printed, and one idea presented there says we should replace the current annual budgeting process with a more manageable 2-year budget. So he has seen this for some time and now proposes it. I think with what is happening in the Defense Department with these things, it is appropriate. I say to my distinguished friend from Alaska, I expect to be back here. I will be active on the Rules Committee. I surely will be working in the next session to get the 2-year budget in place, and to work with the Senator from Alaska to to do the restructuring necessary to make this a well-functioning Chamber.

The PRESIDING OFFICER. The Senator's additional time has expired.

Mr. FORD. Mr. President, I thank my distinguished friend from New York [Mr. D'AMATO], for allowing me to present my statement at this time.

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. D'AMATO. Thank you, Mr. President.

Mr. President, the area the report takes us to is the area of production quality.

The Air Force has conducted six assessments of Fairchild's production capability before and during development and initial production. These assessments identified a number of deficiencies relating to or impacting production quality that required corrective actions. The three assessments conducted by the Air Force T-46A program office recommended that the production program be continued. The other three assessments did not contain recommendations regarding program continuation. The results of these reviews are summarized below.

PRE-AWARD CONTRACT ASSESSMENT

In February 1982, prior to contract award, an Air Force Aeronautical Systems Division review team evaluated the Fairchild facilities in Farmingdale, New York, and Hagerstown, Maryland. The team concluded that Fairchild was qualified to produce a high quality trainer aircraft within the proposed cost and schedule. Although the team found that Fairchild met or exceeded minimum requirements in 12 of the 13 production areas reviewed, there was concern that Fairchild was not adequately considering producibility requirements during the design stage of the aircraft. A SPO official noted that extensive Fairchild producibility studies since contract award could result in cost savings.

PRODUCTION READINESS REVIEWS

In June 1983 and September 1984, T-46A SPO personnel conducted Production Readiness Reviews at Fairchild. The June 1983 review was performed at Fairchild's Farmingdale and Hagerstown facilities. SPO personnel evaluated Fairchild's manufacturing and quality assurance systems and assessed the adequacy of Fairchild's overall planning efforts to meet the T-46A production requirements. The SPO identified a number of deficiencies that required corrective action but recommended continuation of development.

So once again, we say that yes, there were problems. We acknowledge that there were problems. The Air Force knew that there were problems. And they said corrective action can deal with these problems, and development should be continued.

□ 1830

The September 1984 review was conducted only at Fairchild's Farmingdale plant to assess Fairchild's capability to begin low-rate production.

It identified a number of deficiencies that needed corrective action but concluded that they were not critical enough to delay funding approval for the first or second production lot. The review noted, among other deficiencies, that design instability was affecting manufacturing and procurement and that the development schedule was success oriented with no reserve time. It noted, however, that application of additional Fairchild resources could make it achievable. Fairchild officials stated that such additional resources were provided starting in January 1985.

INDEPENDENT MANUFACTURING ASSESSMENT REVIEW

From December 20, 1983, to January 10, 1984, the Aeronautical Systems Division assessed Fairchild's manufacturing and production quality. It did not find any manufacturing issues which would delay long lead funding for initial T-46A production.

I think that is important, very important, because, again, it was stated, implied, and otherwise, with these kinds of statements or innuendos, in some cases outright statements, that these areas of concern could not be dealt with.

However, there were concerns about the potential manufacturing cost and schedule impact of design changes that might be necessary to control system weight growth or to accommodate an engine inlet relocation. The contractor was required to and has taken corrective actions regarding these concerns.

Once again we see a concern and we see the contractor responding to that concern.

CONTRACTOR OPERATIONS REVIEW

As stated earlier, the Air Force's June 1985 COR at Fairchild identified major concerns in manufacturing, industrial material management, contract management, industrial safety and fire protection, subcontract management, engineering system, quality assurance, and product integrity. All eight functional areas reviewed were rated unsatisfactory.

Concerns in the product integrity area included failure to flow down contractual requirements to drawings and instructions; lack of accept/reject criteria for soldering; an excessive amount of nonconforming products being produced and not detected by inspection, failure to record nonconformances; and an apparent lack of consideration for the consequences of manufacturing debris and potential foreign object damage in electrical/mechanical and fuel compartments and systems.

Fairchild has since developed and begun implementing an extensive corrective action plan.

So once again we have a situation where there were acknowledged deficiencies, and what does the company do? Not by the company's own statements but by the findings of the General Accounting Office they implement an extensive correction action plan to deal with the deficiencies.

In developing this plan Fairchild identified seven underlying causes to its problems. These included reduced investment levels in plant facilities and equipment and inadequate emphasis on quality, safety, and schedule. This plan and Fairchild's progress is discussed in detail in appendix II.

I have been assured that I have appendix II and we will be able to go over that in detail and share it with you because I know you will be interested in hearing how we have dealt with these deficiencies.

MANUFACTURING ASSESSMENT REVIEW

In December 1985 SPO personnel conducted a manufacturing assessment review at Fairchild's Farmingdale plant. They evaluated Fairchild's development and initial production performance and their readiness to continue producing the T-46A. They identified high-rate production and manufacturing risks which could be expected to adversely affect schedules and costs. Program personnel evaluated a total of 20 areas in 5 categories. The team rated 10 areas satisfactory, 7 marginal, and 3 unsatisfactory. One of the three unsatisfactory ratings was rescinded, the other two areas were engine/manufacturing design interface and manufacturing engineering. The review team found that these risks and weaknesses could be reduced or negated if the contractor implemented the corrective actions recommended. They concluded, however, that Fairchild was adequately prepared to continue low-rate production and that the manufacturing effort was not at risk technologi-

cally. A SPO official said that Fairchild has made many production quality improvements since the review was conducted.

So once again, even in those areas where there is a question, where there is a deficiency, we find the Air Force review team saying, "Fairchild has made production quality improvements."

On a lot of weapon systems, we wonder about whether or not there have been the same kind of improvements when deficiencies have been pointed out in respect to their operation and their production and their cost overrun and their delay. Here we have a company that just attempted to get its product off the line and runs into these kinds of problems generally attendant with a new program, and even those who criticized have to admit they have taken corrective action to deal with those impediments and they have made quality improvements since the review.

What about the quality of the aircraft performance? That seems to me to be something that is rather important. We are going to get into the turkey. Do you know what the turkey is? The turkey is not the T-46A. The turkey is the T-37. We should be ashamed of it.

We have some reports over here: Hearings by the House Subcommittee on Defense Appropriations. We will talk about the T-37. All of a sudden we hear people saying it should be able to be permitted to fly until the year 2010.

It is interesting how we can come up with these performances and these figures. It is rather interesting.

□ 1840

What about the quality of aircraft performance? "As shown in table 1.3 below, Fairchild's predicted performance for the T-46A exceeds seven of the eight performance requirements established by the Air Force Air Training Command."

Let me say it again so we can listen, because I heard on this floor how bad this plane was. When I asked colleagues to support it, they said, "I am sorry, we can't support it because it is a bad plane, it is a turkey, it doesn't go."

This Senator gets rather annoyed, even at this point. I have been talking about 4 hours and when I see this, in light of what we saw before—and it is one thing to look at it with rather mythical—I want to tell you, we are not going to vote.

"Fairchild's predicted performance for the T-46A exceeds seven of the eight performance requirements established by the Air Force Air Training Command."

That is not what I heard. That is not what my colleagues were subjected to. We were told by everyone, "We don't want the plane, it is a bad plane, it doesn't work, it is dangerous, people take their life in their hands."

Is the GAO report inadequate? Is it wrong? Is it a bad plane? Or does it exceed those things that were asked for? And it does exceed.

I am sorry that I might have to take the time and a lot more time of my colleagues. We are going to do it.

However, Fairchild does not expect to meet six of the more demanding contract performance requirements. The more demanding contract requirements were proposed by Fairchild when competing for the T-46A contract. The table also shows that the Air Force's predicted T-46A performance is somewhat different than Fairchild's. Both are preliminary and based on early test data.

Whether or not it is this Senator who makes these statements or someone else, I want to say that it is going to be said in any event.

The T-46A began first test flights on October 15, 1985, at the Air Force Flight Test Center, Edwards Air Force Base, California. The aircraft is being used to test flying qualities and other performance requirements. The second aircraft, expected to be delivered in July 1986, will be used for air loads and climatic testing beginning in August 1986.

Mr. President, I understand that there are colleagues of mine who would like me to finish up. I am making my statement for one of them, but if I yield the floor, there are at least six other Senators, and I think it is fair to say that until this matter, the underlying amendment, is taken down, whether it is myself or someone else, we are going to continue. So it is not to belabor the issue but it is a fact. Se we shall continue.

The Air Force SPO and Flight Test Center officials, as well as the contractor test pilot, said that the T-46A's performances tests have been successful.

We were not led to believe that. It was said this was a terrible plane, the Air Force does not want it, it is a turkey, it is a bad one; we jeopardize the lives of the people. Those are the kinds of things we are led to believe.

Mr. ANDREWS. Mr. President, may we have order in the Senate? There is not order.

The PRESIDING OFFICER. The Senator is correct. The Senate will be in order. The staff will cease its conversations. Senators will retire to Cloakrooms.

Mr. D'AMATO. Quoting some more:

They also said that technical tests have been outstanding and reliability and maintainability significantly better than predicated. They believe the T-46A's air worthiness is excellent.

My gosh, I wonder who wrote this?

Did my staff? You did not write this? My staff did not write this. I did not write this. General Accounting Office did. Incredible.

I wonder how many of our weapons systems have exceeded the standards that the military asked them for. Exceeded them.

Mr. HATFIELD. Would the Senator yield for a question?

Mr. D'AMATO. Certainly, for a question.

Mr. HATFIELD. So I might propound a unanimous-consent request that the Senator yield for the purpose of a motion to challenge the germaneness of the amendment and the Senator can have his vote on it.

Mr. D'AMATO. Certainly, and I will continue thereafter as if——

Mr. HATFIELD. In the second speech.

Mr. D'AMATO. On the first speech.

Mr. HATFIELD. The first speech.

The PRESIDING OFFICER. Is there objection?

The Senator from Oregon is recognized.

Mr. HATFIELD. I propound that request.

The PRESIDING OFFICER. Is there objection?

Mr. HATFIELD. Has the Chair ruled on my request?

Mr. President, let me propound my request.

The PRESIDING OFFICER. Without objection, it is so ordered that the Senator may propound his request.

Mr. HATFIELD. I have propounded such a request.

The PRESIDING OFFICER. Without objection.

Mr. METZENBAUM. Mr. President, objection.

The PRESIDING OFFICER. The Senator will suspend for a moment.

Has the Senator made his request on germaneness?

Mr. HATFIELD. I have not made that point. I have been waiting for the Chair to grant unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered that the Senator may make that request.

Mr. HATFIELD. I thank the Chair.

Now, Mr. President, I do raise the question of germaneness on the Goldwater amendment (No. 3477) now pending before the Senate.

The PRESIDING OFFICER. Under rule XVI, questions of germaneness are submitted directly to the Senate without debate.

Mr. HATFIELD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is, Is the amendment (No. 3477) of the Senator from Arizona germane? The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. BROYHILL], the Senator from New Hampshire [Mr. HUMPHREY], the Sen-

ator from Nevada [Mr. LAXALT], the Senator from Pennsylvania [Mr. SPECTER], the Senator from Idaho [Mr. SYMMS], and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

On this vote, the Senator from Idaho [Mr. SYMMS] is paired with the Senator from Wyoming [Mr. WALLOP].

If present and voting, the Senator from Idaho would vote "nay" and the Senator from Wyoming would vote "yea".

Mr. CRANSTON. I announce that the Senator from Delaware [Mr. BIDEN], the Senator from Ohio [Mr. GLENN], the Senator from Vermont [Mr. LEAHY], and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

I further announce that, if present and voting, the Senator from Rhode Island [Mr. PELL] would vote "yea".

The PRESIDING OFFICER (Mr. HECHT). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 69, nays 21, as follows:

[Rollcall Vote No. 350 Leg.]

YEAS—69

Abdnor	Exon	Mattingly
Armstrong	Ford	McConnell
Baucus	Garn	Melcher
Bentsen	Goldwater	Metzenbaum
Bingaman	Gorton	Mitchell
Boren	Gramm	Murkowski
Boschwitz	Grassley	Nickles
Bradley	Harkin	Nunn
Bumpers	Hart	Pressler
Burdick	Hatch	Proxmire
Byrd	Hecht	Pryor
Chafee	Heflin	Quayle
Cohen	Heinz	Rockefeller
Cranston	Helms	Roth
Danforth	Hollings	Rudman
Denton	Inouye	Simon
Dixon	Kassebaum	Simpson
Dodd	Kasten	Stafford
Dole	Kennedy	Thurmond
Domenici	Kerry	Trible
Durenberger	Levin	Warner
Eagleton	Long	Wilson
Evans	Lugar	Zorinsky

NAYS—21

Andrews	Hawkins	Packwood
Chiles	Johnston	Riegle
Cochran	Lautenberg	Sarbanes
D'Amato	Mathias	Sasser
DeConcini	Matsunaga	Stennis
Gore	McClure	Stevens
Hatfield	Moynihan	Weicker

NOT VOTING—10

Biden	Laxalt	Symms
Broyhill	Leahy	Wallop
Glenn	Pell	
Humphrey	Specter	

□ 1910

The PRESIDING OFFICER. The amendment is germane.

Mr. D'AMATO addressed the Chair.

The PRESIDING OFFICER. The Senator from New York is recognized.

Mr. D'AMATO. Mr. President, while we have some of my colleagues here in the Chamber, let me suggest to you that not only this Senator but a number of others feel very strongly on this issue, so strongly because there have been two things created.

No. 1, the illusion that this plane is not a good plane and the Air Force does not want it.

The PRESIDING OFFICER. The Senate is not in order.

Mr. D'AMATO. I would ask my colleagues to bear with me and, of course, if they do not care to bear with me now maybe at 2 o'clock or 3 o'clock or 4 o'clock in the morning they will feel more apt to do it.

Mr. DOMENICI. Could we have order, Mr. President?

The PRESIDING OFFICER. Will the Senators please take their seats?

The Senate is not in order.

The Senator from New York.

Mr. D'AMATO. Mr. President, I am referring to a General Accounting Office report about the T-46. I am wondering how my colleagues can vote in good conscience to do away, to kill the planning that has taken place over 7 years when the Air Force said they wanted this plane, they needed this plane, it was necessary; the General Accounting Office, and I am quoting them:

The Air Force SPO and Flight Test Center officials, as well as the contractor test pilot, said that the T-46A's performance tests have been successful. They also said that technical tests have been outstanding and reliability and maintainability significantly better than predicted. They believe the T-46A's air worthiness is excellent.

That is not AL D'AMATO. That is the General Accounting Office.

I want to tell you something. I understand the nature of the pressure that has brought us to this point and the amendment that has been offered and, that is why this is the first time in 6 years that I have taken to the floor and used that right which is guaranteed to protect the minority view. It may be a minority view and there may be some who can say, "Look, I don't want to vote against the chairman," and I understand that. If I had a chairman who had the distinguished record and service of our chairman now, I would be reluctant to do so had I not become so involved in this particular issue.

So I am saying to my colleagues and my friends we are going to continue and because there may be those who say, "Senator, you are risking keeping us in an awful long time." There are those who want to do other things. There are those who want to finish the business of the people and then get back to their States.

I would like to do the same thing. I have a personal life, I have a family back at home, and there are things I would like to do, but I want to tell you right now I am not going to see this program, as far as I am concerned, killed on the altar of political expedience, and that is what it is, and when we go through the records, the records will substantiate that. The records will substantiate that, maybe not the Air Force now, but the rhetoric.

You know I think it is interesting when we say what does the Air Force want. It is interesting. The Air Force did not want reorganization, but they got it. So they do not always get what they want. That is a fact.

Now, all of a sudden for the first time we say what does the Air Force want? Why do we not recognize it for what it is? The Air Force all too often says what do those in the Defense Department want, what do they say, and they respond to this political body and other political bodies.

So all of a sudden to begin to say we will have the Air Force tell me that we want it, I had the very same Air Force Chief of Staff tell me that if we put the money in they would use it. I have the people out there on the front line and this report testifies to it that says we need the T-46 and we will examine the turkey of the T-37 that some would like us to rewire, rewing, retool, spend hundreds of millions of dollars and eventually billions of dollars more of taxpayers' money without regard to the consequences, the safety of our pilots now or what is best for the Air Force at this time.

So, Mr. President, we are going to continue this exercise if need be.

According to Air Force and contractor officials, T-46A test flights have produced some results which exceed expectations. For example, Air Force flight test personnel originally believed 20 hours of flight testing per month to be optimistic. However, because of rapid turnaround and high aircraft availability, they now believe it is possible to complete 26-29 hours of flight testing per month. Also eight maintainability and reliability parameters are expected to be exceeded, including maintenance hours per flight hour, a key measure of maintenance performance.

A Fairchild summary of an Air Force preliminary report on the T-46A testing, issued in December 1985, shows the aircraft performed well. The Air Force reported ease of flight, take-off, landing, and ground handling.

So we have a plane that is exceeding the standards, exceeding the parameters in area after area after area. Why do we want to kill it? Why? Are we going to be able to utilize the T-37? No. We are going to have to reengineer the T-37. We are going to have to spend hundreds of millions of dollars on the T-37.

Is anyone suggesting that the T-37 is not in need of substantial modifications costing hundreds of millions of dollars and then the question of how long will it be functional?

Will we get another 5 to 10 years? What about the initial reports, when the Air Force said putting additional money into the T-37 is like putting it into a rathole? Do we throw that out the window? That is not correct any more—and you expect me to fold up my tent and go away? Well, I am not,

and it is wrong and it is wrong not because I bring it up; it is wrong because it is not in keeping with what the record is and attempting to distort the record at this time to say the Air Force does not want it is to turn back and wipe out the pages of history where the Air Force lobbied for it, worked for it, built a case to substantiate its need, its necessity, and where the contractor has come forward and has exceeded, exceeded the expectations called for, when the Fairchild summary and the Air Force preliminary program demonstrates that quite clearly.

□ 1920

An Air Force Training Command official stated

and this is again, in the General Accounting Office report—

stated that the T-46 meets its needs for a modern trainer.

So, when we talk about need, when we talk about whether or not this plane is meeting the standards, again, turn to page 18, appendix I of a General Accounting Office report, Air Procurement, Development and Production Issues Concerning the T-46A Aircraft.

My staff did not reprint this. Maybe we reprinted it, but we did not print it. This is the GAO. It says:

An Air Force Training Command Official stated that

I wonder if they got in any trouble for stating what they stated—

the T-46 meets its needs for a modern trainer.

Maybe they should be censured. We should get ahold of them and find out who those Air Force officials are who dare utter the truth, who said in 1986 that it is a good plane and it meets its needs.

But I want to tell you something. I will not forget the night and the day we were here on this floor and I looked at some of my colleagues and they did not vote in support of this plane. They voted to trash this plane. And it was not in the last minute, it was months ago when they did not want to stand up and say, "No, it is wrong to turn our backs on this now," and they voted the other way.

An Air Force Training Command official stated that the T-46A meets it needs for a modern trainer. He also stated that based on logistic readiness and maintenance experience to date, the T-46A would save millions of dollars in yearly maintenance cost.

Page 18, the General Accounting Office report. How about it? It meets the needs and it saves money.

Well, let us throw it away. Let us bury it. Let us bury that industrial base, let us throw 7,000 people, both directly and indirectly, who are in the production of this out on the streets.

And what about our young men and women? Are we doing what is best for them?

So there are those who say, "I don't want to discuss the merits of this now if the Air Force does not want it."

There are lots of things the Air Force did not want that this body and the Congress did because they felt it was necessary.

Although test results have been good, several problems have emerged. An Air Force official said the number and type of deficiencies were not unusual in testing a new development aircraft. Furthermore, both Air Force and Fairchild officials believe that these problems can be readily solved without major aircraft changes or modifications and within the scope of the contract. The deficiencies are discussed below.

The most significant problem is the aircraft's drag which is higher than the Air Force desires and could impact aircraft performance and fuel consumption. Fairchild is developing changes which could be incorporated into the production line to reduce this problem. Air Force officials believe this condition can be reduced and are closely monitoring Fairchild's corrective action.

The T-46A does not give an adequate warning to the pilot when the air speed reduces to a point where the aircraft may stall. Many aircraft shake or vibrate when they are close to a stall situation. This serves as a warning to the pilot to take necessary action to prevent the stall. Although required by the specifications, the T-46A does not give timely warning to the pilot.

T-46A flight testing is continuing with its mild stall warning because experienced pilots are flying the aircraft. A more adequate stall warning is needed for use in student flight training. Fairchild plans to solve this deficiency by installing a warning device on the aircraft. The T-37B, the Air Force's current primary trainer, has such a device on it.

The Air Force is concerned with the primary flight controls, such as roll trim which involves the flight stability of the aircraft. Fairchild is studying trim devices which could be added to the aircraft to correct the residual trim problems.

The Air Force is concerned about the aircraft's speed brakes because when extended to slow the aircraft they create unacceptable buffet levels that shake the aircraft. Although this problem has not been totally solved, Air Force officials believe there are possible solutions which should be effective. Fairchild has proposed a solution which it plans to start testing in April 1986.

The expected weight of the first production T-46A is expected to be about 900 pounds more than Fairchild originally estimated. Air Force officials said this is not unusual for a new aircraft. Fairchild has a weight reduction program to reduce the weight of production aircraft. SPO officials said there is no specification weight for the T-46A but it is important to keep weight at a minimum because of the impact on other performance requirements.

USE OF FISCAL YEAR 1986 FUNDS

For fiscal year 1986, the Congress appropriated $169.9 million for the second production lot of T-46A airframes and engines as well as for advance purchases for the third lot of airframes and engines. Since the Air Force decided not to request additional T-46A procurement funding for fiscal year 1987, the production funds appropriated for fiscal year 1986 have been withheld from the program. According to an official of the Office of the Secretary of Defense, those funds have been placed in an account entitled "Resources Available for Reprogramming."

I wonder where they would be reprogrammed to. I wonder how many other meritorious programs will seek those dollars, if any.

Air Force program office information as of April 31, 1986, showed that for fiscal year 1986, $48.7 million of the $49.9 million research, development and testing appropriation for the T-46A airframe and engine had been released to the program office. These amounts reflect reductions mandated by the Balance Budget and Emergency Deficit Control Act of 1985. About $25.4 million of the funds released have been committed to be obligated. This left an uncommitted balance of $23.3 million. The program office plans for the uncommitted balance are shown in table I.4.

TABLE I.4.—*Planned Use of Uncommitted T-46A Research and Development Funds for 1986*

[Dollars in millions]

Use	*Amount*
Airframe contract—Fairchild	$3.9
Engine contract—Garrett	14.6
Mission support	1.9
Government furnished equipment	0.6
Test centers	2.3
Total	23.3

Air Force program office information as of January 31, 1986, shows the following status for the T-46A airframe and engine production funds.

TABLE I.5—STATUS OF T-46A PRODUCTION FUNDS

[In millions of dollars]

Fiscal year	Funds released to program office	Obligated funds	Committed to be obligated	Uncommitted balance
1984	$6.1	$6.1		(1)
1985	126.0	97.2	$8.6	$20.2

[1] Less than $100,000.

AIR FORCE CONTRACTOR OPERATIONS REVIEW OF FAIRCHILD MANAGEMENT

From June 3 to 14, 1985, the Air Force Contract Management Division, Kirtland Air Force Base, New Mexico, conducted a detailed contractor operations review (COR) at Fairchild's Farmingdale, New York, plant. This review was made to evaluate the overall effectiveness of Fairchild's management systems and the capability of these systems to meet contractual requirements.

As stated earlier the review identified 279 findings in the eight functional areas reviewed. Fairchild did not agree with 60, or about 22 percent, of the findings. However, in response to the COR results, Fairchild has developed and is implementing actions to correct all items reported.

In developing corrective action plans, Fairchild identified 218 specific causes and 7 underlying causes. An analysis of the 218 specific causes showed that about one-third represented inadequate procedures and two-thirds represented noncompliance with existing procedures.

The seven underlying causes included:

High turnover rate of senior management and organizational changes.

Reduced reinvestment levels in recent years in plant facilities, equipment, and centralized capabilities.

Deteriorated employee morale and dedication in recent years.

Mr. President, who would not have deteriorated employee morale if as it went along it saw its very future being threatened on almost a regular basis between the various actions by the Air Force in delaying the funding, and in the attempt to reprogram the dollars that had been provided for it by the Congress? So why should we not expect that there would be a lack of morale or a morale problem at the facility? Why would we not expect to see a high turnover of senior management when the course of action that has been undertaken would directly contribute to those problems?

Inadequate emphasis on quality, safety, and schedule in some products and systems.

Failure at most levels in the work force to meet productivity targets.

Optimism in forecasting, particularly in new program proposals, has caused overruns and schedule delays from the onset.

Failure to follow management development and succession plans.

STATUS OF CORRECTIVE ACTIONS

The contractor has established a continuous process to plan, implement, and resolve all COR related findings under the direction of a vice president who reports directly to the company president and interfaces with the AFPRO commander.

According to Fairchild the following corrective actions have been taken:

Appointed a new company president experienced in running an aerospace company.

Promoted capable employees from within.

Sold $200 million of corporate assets to provide funds.

Invested an additional $46 million in the T-46A program.

Devoted additional personnel to the program.

Ordered some new major equipment items.

Improved communication from top management to middle management.

Increased skills and supervisory training.

Increased emphasis on quality, safety, and schedule rather than on cost only.

Strengthened the quality function.

Corrective action plans have been submitted by Fairchild to AFPRO. The status of corrective actions as of March 31, 1986, are shown in the following table.

Fairchild corrective actions completed and submitted No. 231. That is 83 percent corrective actions in process, 48 and 17 percent. So that out of all of the problem areas corrective action completed and submitted, 83 percent, and the other 17 percent they were in the process of dealing with. That is 100 percent.

Correction actions approved and completed, AFPRO corrective actions, again approved and completed 61 percent, corrective actions in process, another 39 percent, again 100 percent.

So we are talking about a company that has had problems and has undertaken the proper steps necessary to deal with those problems and to eliminate them.

The report goes on to say that:

We noted that AFPRO approvals were about 60 to 90 days behind Fairchild submissions. An AFPRO official said that this represented the time needed to schedule and perform its review and an allowance of time after implementation to be sure Fairchild's correction was still in effect.

Fairchild representatives said that correction programs have been instituted and significant progress made in correcting all deficiencies. They said resolution of 97 percent of all deficiencies should be completed by September 30, 1986.

Mr. President, I would suggest that if one were to carefully, impartially review this report, and have no stake or interest or was not aware of the name Fairchild, had no interest in it, they would have to come up with the conclusion that the product they are turning out is a good one, that it is a necessary one, that it meets the standards and exceeds the standards in many different cases including costs, including maintenance, including overall cost cycle, and that it will save the American people millions of dollars annually, and that it is a much better product, and a much better plane than that which is probably being used by our young fliers.

So for all the reasons, Mr. President, it would seem apparent to me that there is something gone amiss. There is something gone amiss when the Air Force now says, well, we do not need this. We do not want this. I wonder how and why this has come about.

According to certain Air Force sources, the decision to terminate the T-46 was an emotional one made by Secretary Orr. Since then Assistant Secretary Cooper had said that canceling the T-46 was a mistake.

Now I do not think he would say it now. In An official Air Force document prepared by the Secretary for the Air Force shows that to extend the life of the T-37 and not bring on a new trainer until fiscal year 1999 will cost $1.96 billion more than it cost to build at T-46.

If that is correct, if we are talking about extending the life to the year 2000 and beyond, at a cost of $1.96 billion more than the cost of building the T-46, I wonder how that is that we could come to that point.

Mr. President, let me turn to some hearings, hearings before the subcommittee on appropriations, House of Representatives, 99th Congress, 2d Session.

Mr. President, I could turn to the question of the safety of the T-37. In the hearing before the House Appropriations Defense Subcommittee in March of this year, the safety record of the T-37 is brought to light.

□ 1940

Let us take a look at that safety record.

First we will start at page 65 of the report entitled "T-46 Program."

Mr. Chappell said:

The Secretary of the Air Force report states that the current Air Force primary trainer, the T-37, has recognized operational deficiencies and safety concerns. It also states that you proposed to cancel the T-46 which is to replace the obsolete T-37 due to fiscal constraints.

Dr. Cooper, why is the Air Force apparently willing to continue using a trainer, the T-37, which has operational deficiences and safety concerns?

That is the question.

Dr. Cooper. We are going to use the T-37 for some period of time regardless of whether or not we buy the T-46. We will continue to train safely. Aside from the T-46, if we went forward with the T-46, we are going to continue to use the T-37 for some period of time because there is a lag time between your budget for funds for the T-46 and bringing it into operational inventory. I believe the statement made by the Air Force in the past relative to the T-37 still stands today.

Dr. Cooper continues.

I need to point out to the committee that we did not recommend canceling the T-46 because of our view that the T-37 has suddenly changed.

So it changed. He goes on to say:

We recommended it not be funded in '87 and beyond because of budgetary pressures and also when we looked at the program made last year it was experiencing some technical difficulties. I think you are aware of the contractor operations review that was conducted at the facility.

Mr. CHAPPELL. I understand those have been corrected. I understand they have changed management. Fairchild has acted positively to bring back the program. They have cleaned up the shop and modernized the plant to do these things. I looked at the plant not too long ago myself and the impression I received from your Air Force officer who was on the spot was to the effect that while everything had not been completely straightened out that they were certain most of the things had been repaired.

Dr. Cooper then responds:

They have improved over where they were in the July time frame last year. There was an awful lot of room for improvement. The trend has gone up.

Mr. CHAPPELL. I initially proposed that program.

Dr. COOPER. I remember your question on the T-37.

Mr. CHAPPELL. You guys made a case for the tremendous deficiencies of the T-37. It could not climb out fast enough, therefore cutting down on training time, and you had to get out where you could get to instrument areas, work through the patterns, and you had to get out and back, and the T-37 just wouldn't do it. It was horrible. There was a tremendous necessity for change. You had to have this trainer. Were you telling us accurately then or now?

Dr. COOPER. I was not here. The Air Force will stand by those statements, Mr. Chairman, about the T-37. The T-37 is not the optimum trainer in the future for the Air Force. We would prefer to have a new trainer.

Mr. President, I think that statement puts it about as forthrightly and fairly as anyone could without going into whether or not the Air Force wants it or does not want it. They campaigned for it. It wanted it. It stated before the Armed Services Com-

mittee and the Defense Appropriations Committees of both Houses that it needed it. Now we get into some budgetary constraints.

Now we say it is the money. Yes, there are programs that have to be curtailed, cuts that have to be made, but when you make a cut in an area that will immediately necessitate a reprogram, an expenditure of hundreds of millions of dollars over and above—and as the figures indicate in order to keep the T-37 flying a cost effectiveness of $1.9 billion over what it would cost for a new plane—something is wrong, it smells, it is not right.

Mr. CHAFEE addressed the Chair.

The PRESIDING OFFICER. Will the Senator yield?

Mr. D'AMATO. No.

Mr. CHAFEE. I wonder if the Senator will yield without losing his right to the floor?

Mr. D'AMATO. Without it being a second speech.

Mr. CHAFEE. It not being a second speech. For 5 minutes.

The PRESIDING OFFICER. Without objection, the Senator from Rhode Island.

The remarks of Mr. CHAFEE appear elsewhere in the RECORD under Statements Introduced Bills and Joint Resolutions.

□ 1950

Mr. D'AMATO. Mr. President, an aspect of Dr. Cooper's testimony is rather important. Again, in talking to Mr. Chappell, he said, "Mr. Chairman, the T-37 is not the optimum trainer in the future for the Air Force. We would prefer to have a new trainer."

Then Representative DICKS says, "This has very serious safety problems."

Dr. Cooper says, "No, sir, Mr. DICKS. We will have to spend money on the T-37, though."

That is exactly the point I have been attempting to make. There will be some who would have us think that we are going to come out ahead of this process by killing the T-46 trainer. I say to my colleagues, that is not the case. We are not going to come out ahead. You are not voting for America. You are not voting to save money; you are not voting against a bad system. You are voting against a superior system that is going to save money. You are voting to maintain a bad system. That is the record, not the rhetoric.

I would like to see the record show me otherwise.

Oh, I get the Air Force that says, "We don't need it now for budgetary reasons," after they needed it, wanted it, campaigned for it and said we needed it for six or seven years.

Now, "Oh, no, we don't need it."

They don't need it because Cap called up and said, "Cut it." That's why you are going to cut it.

Are you going to save money? No. You are going to have to start spending hundreds of billions of dollars to take the plane that the general called the rat hole.

I did not call it the rat hole.

Where is O'Keefe? Where is that rat hole statement? I have it here someplace. We shall dig it out. I guess he had to take a little break. We are going a little long here. I do not know where he is. But we will dig out that statement where the general said to take the T-37 and to put more money in in 1984 is like pouring money down a rat hole.

But that is what you are going to have to do. And you all voted for it. Hooray, horray; we voted to put the money down a rat hole. That is great.

You did not vote against a bad system, you did not vote against a system we do not need. You voted against a superior plane, a superior training plane in terms of performance, in terms of cost, in terms of maintenance, in terms of safety for an old, beat-up plane that we are going to have to spend hundreds of millions of dollars on.

I want that general's statement where he talks about the rat hole. I want to hold it up here. I want to submit it as part of the RECORD because I do not think it should go in just on the altar of my record.

General Osway, who made the statement to the committee in 1984—which committee? The Appropriations Committee on Defense. He said, "Pouring any money into the T-37 is like pouring money into a rat hole." That was the general, commander of the Air Training Command. He made that statement. When did he make that statement? March of 1986? I do not believe that is correct. In any event, we will get a date and substantiate it and put it into the RECORD.

Let us continue. We have Mr. Dicks. He says, "This is a safety problem."

Dr. Cooper says, "No, sir, we will have to spend money on a T-37."

Mr. Chappell continues. He says, "General Randolph."

Oh, I know General Randolph. He does not want this plane.

"General Randolph, we have some correspondence you sent to the Chief of Staff of the Air Force, who was 'shocked' to learn that only 86 percent of the 100 ejections from the T-37 aircraft have been successful, unsuccessful means fatalities."

Gentlemen, are you hearing that? When you talk about a trainer, you have a trainer in operation today where 87 percent of the ejections are safe and the balance are not.

□ 2000

(Mr. MATTINGLY assumed the chair.)

Mr. D'AMATO. I do not know what kind of plane you want the boys to be flying in, but they are going to rewing this and retool this. General Randolph says, "I don't remember those numbers." Not much. I talked to Randolph. He is marching to a different drummer. He says, "But you are right the ejection seats"—here is General Randolph talking about the T-37. You want to keep it. You want to rewing it. You want to spend $2 billion more. Well, let us do it. Let us win one for the gipper. "But you are right, the ejection seats do have problems, and by the way, Dr. Cooper would agree with me, we are not saying there are not safety problems." They are saying, "Oh, there are safety problems."

"But we believe that it is not an unsafe airplane to fly. That is two different things." Mr. Chappell says "The T-37 crew is out of the ejection envelope 20 to 70 percent of the time, depending on the mission." Do we know that? They are out 20 to 70 percent of the time. "Is that true or not? Dr. Cooper." He is the great expert. He says, "I don't know, Mr. Chairman."

I do not know. I hope when you all have another chance to vote on this thing you will think about it. Maybe there will be some young man training over there. It will be one of those 20 times, 20 percent of the time that he has to use that ejection and it just does not go off because it only operates 86 percent of the time. Think about it.

General Randolph, here is what he says. Any by the ways, this is this year, 1986, before the committee. Here is what Randolph says. He will say whatever the powers want him to say. I have talked to him. He says, "I will have to check those numbers. It flies out of the envelope but I don't recall the specific numbers."

Would it not be good if we could call him up on the telephone. You are going to be here. You have some time. I would ask one of your staff to see if they can get him, find out if I am making this up. Find out, on the ejection, whether or not it is safe. Find out what they have to do to fix it, what they are going to have to do with it, how long will it take.

General RANDOLPH. I will have to check those numbers. It flies out of the envelope but I don't recall the specific numbers, but I can recheck that for the record and provide it, Mr. Chairman.

[The information follows by way of letter obviously]. And I will give you the information. This reminds me of my school days. I had not cracked a book. I would be undertaking a course, taking an exam the next day and I would start getting into it and I would say, "My gosh, this is interesting; why didn't I look at this before." This is absolutely fascinating. I am finding this more and more fascinating. And I find that I have a little more vigor. Do you

know why? Because the case for doing away with the T-46 is more outrageous as you begin to get the facts, absolutely more outrageous.

The general says:

Your information is correct. Since its introduction, the T-37 has had 110 ejections; 95 of those were successful. This number equates to the 86 percent rate you referred to.

In regard to your question on the amount of time the T-37 is out of the ejection envelope, 20 to 70 percent is also correct. This percentage is dependent on the mission being flown (pattern only where the percentage is high vs high altitude aerobatics where it is lower) and the climate conditions experienced at that time (hot days degrade aircraft performance which directly affects the ejection envelope).

Dr. COOPER. Mr. Chairman, if the issue is, would the Air Force rather have a T-46, if it was bought and paid for, in our inventory as opposed to a T-37? There is no question if that aircraft performs as advertised we would rather have a T-46.

Notice how carefully he has to answer the question because he will be on the carpet if it performs as advertised. He knows it performs. He understands. He rejects Osway's statements that it performs better than contract. He does not want to even acknowledge that. He has seen a copy of the General Accounting Office reports. So he has got to be very careful because this way when the big boys say to him, "What did you answer that way for? Why did you say that? You know we don't want that plane," he says, "Well, I qualified it. I said if it performs as advertised. Obviously it hasn't met the specifications." But the facts, not the rhetoric, indicate that it has met its specifications.

So when we vote here again—and I guess we will have a chance to vote here again because at the very least there will be a tabling motion—I wonder if we are going to have the same kind of vote. Maybe we will have a vote even worse. Maybe we will get less than 21, but I will tell you something. I would not vote for this no matter what. And the more I find out about it the more certain I am that this is a quick shuffle, a quick shuffle.

What does Mr. CHAPPELL say? He says, "Let me ask you about the test program. How is it going forward? How many airplanes have been delivered?"

He is now talking about the T-46.

Dr. COOPER. One.

Mr. CHAPPELL. How many hours have you flown the aircraft?

Dr. COOPER. I will supply that for the record.

The information comes as follows and it is:

As of March 12, 1986, the T-46 has completed 46 flight test sorties and amassed over 98 hours of productive flight test.

Dr. COOPER. We think we are probably about a year behind on the test program. We believe that the T-46 is fundamentally sound. Like all test programs, there have been some minor problems.

That is a far different statement than we have heard in the past. We were led to believe that there were significant problems. We were told that there were problems that really went to the core and the essence of whether or not the plane was flyable. Here is Dr. Cooper saying, no, it is fundamentally sound. And he says:

We see no show stoppers, and we think that the T-46 will perform as advertised. It is behind schedule, over cost, in terms of the full-scale development program, and there is a limit to Government liability on that chart, it has a ceiling on it, so to the extent it goes beyond that ceiling, Fairchild has to pay that bill. And it is substantial. I believe we estimated——

And then here is where General Randolph jumps in:

almost $200 million.

Dr. COOPER. About $65 million is out of their pocket. Our concern, though, is last year when our budget was cut, and it goes back to the point Mr. DICKS made where we see the budget going—we are going to have to live with some less than optimum solutions in the Air Force on some programs.

What we said about the T-46 in the past is still true. We would rather have it. It is just a budget program.

And so for those who have suggested that the Air Force does not want the plane, that is a vast oversimplification. That is not the case.

For those who suggest that I am impeding the progress of this body, let me suggest that I did not introduce this amendment. Let me suggest also that I did not introduce the underlying amendment. Let me also suggest that they would have to be somewhat naive to think that the very Senators in the States who are very much concerned about the underlying amendment are not going to do at least what I have done, and I understand the nature of their political training. And I would ask people to wake up and to see that even if we were to dispose of this amendment, that is, the second-degree amendment, which I am not inclined to do, the fact is I do not see any guarantee—and I see a long, protracted area of discourse and development on the underlying amendment.

Now, the reason I am mentioning this, Mr. President, is because I do not want to have for those who say, "You are delaying the orderly process of this body," that onus placed upon me without saying it did not introduce the underlying amendment. I certainly did not introduce the second-degree amendment and it would have been naive on the part of my colleagues to think they would not have done exactly what I am doing now.

□ 2010

I served fair notice. I did not do this by way of around the bush at the last minute. I did not indicate that I would do anything less than totally oppose and use all the means given to those of us in this body to protect the position that I am advocating. That is the retention of the T-46. I say so respectfully.

I hope that you understand that. Sometimes we cannot all agree. I have attempted to come together, and I have been more often than not on issue of importance, on issues concerning the well-being of this body, and issues in which I have subjected my own position to the legitimate concern of others, maybe things I did not necessarily agree with. That is one of the problems we face here.

I would like to suggest that if people would like some comity, there is a way to arrange it. I they want to proceed, we will proceed.

The more I look into this, the more convinced I am of the rightness of my position. I am not suggesting to you that you have to advocate every cause you feel is right, at the expense of others in the body. But I think that works two ways, and that is what we are suggesting here.

Although I feel badly about it—I do; I do not feel good about it—I am going to continue to press, and I will take the burden and I will take the responsibility and I will take the admonitions of those I admire and respect.

I hope there could be a way to work out of this, not only for this year but for the future of the program. I am not suggesting that a compromise cannot be reached. To cut down and turn out that program and that plant, I think, would be the wrong thing, and to do it in the manner which has come about.

Dr. Cooper says:

Dr. COOPER. About $65 million is out of their pocket. Our concern, though, is last year, when our budget was cut, and it goes back to the point Mr. Dicks made, where we see the budget going, we are going to have to live with some less than optimum solutions in the Air Force on some programs.

What we said about the T-46 in the past is still true. We would rather have it. It is just a budget problem.

Mr. CHAPPELL. General, have you flown this aircraft?

General RANDOLPH. No, sir, I have not flown the airplane. I was out at Andrews, sat in the cockpit. General Skantze, the Commander of Air Force Systems Command, flew the airplane and his report back to me was that it flies quite well.

He was quite satisfied with it. By the way, you asked how is the test program going. It is, of course, behind, but the test program itself is going quite well, quite smoothly.

Mr. CHAPPELL. That is what I understand, going very well, with no major bugs.

General RANDOLPH. There is one problem, and that is the drag count is much higher than it is supposed to be, and Fairchild is working that quite vigorously right now, but that is the only serious problem that I know about in the test program.

Mr. CHAPPELL. How much money have we spent on this program so far?

General RANDOLPH. As of the end of this year, with the monies that we have in the R&D program, but assuming that we do not

press forward with block two, which is still an open issue, $470 million.

My friends, we have spent almost a half a billion dollars and I doubt if we are going to retrieve very much of that R&D if we abandon this program now. But they would have us do it and then say that we are saving the American taxpayers money. Hokum. Nonsense. Maybe saving some people some pride, but we are not saving the American people money.

Mr. Chappell continues:

Mr. CHAPPELL. That you spent so far?

General RANDOLPH. Yes, sir.

Mr. CHAPPELL. What is the total program intended to be?

General RANDOLPH. It is about $5 billion when you buy all the airplanes, and the support equipment, et cetera.

T-37 PERFORMANCE DEFICIENCIES

Mr. CHAPPELL. I have a paper that comments on the T-46, dated June 26 of 1979, six years ago. I read you a pertinent part under paragraph five, page 6 of that report on constraints.

A, affordability and relative priority. The sophistication and capabilities of Air Force weapons systems beyond fiscal year 1987 dictate the need for a fully supportive undergraduate pilot training program. The modification and replacement of the T-37, a key element of that program, must be considered a priority, no less than equal to producing the prime weapons systems. Modernization to the primary undergraduate system can be accomplished within 1 percent of current level—budget funding on an annual basis over the life of the program.

Here is Congressman CHAPPELL pointing out the Air Force's absolute commitment in a paper which says it is necessary to see that this be accomplished. It points out how critical this thing was in the beginning. Now we are talking about abandoning it. If you start over again, you talk about slippages and that sort of thing. It does not make sense to me. I cannot see it.

Those are Congressman CHAPPELL's words, and I think he is correct, and I wonder how we deal with that. We say we are not dealing with the merits of the plane, of the system, of the T-46. What about the deficiencies of the T-37? What about that? What about the cost attendant to keeping it? Let us keep it all going. We do not want to rock the boat.

Mr. CHAPPELL. Tell us whether that is true or not.

General RANDOLPH. We will check that, and it is not a bad airplane. The performance—there are performance deficiencies, and there are things that we would like to improve, and the T-46 does that, but the decision was made as has already been stated.

[The information follows:]

As General Randolph stated, deploying the T-46 would resolve T-37 performance deficiencies. However, primarily because of budgetary constraints, we deleted T-46 funding from the FY 87 budget. Alternatives to address current trainer aircraft deficiencies are under review. One option is the modification of the T-37 aircraft to extend its service life, increase its performance and solve related safety concerns under a wider range of temperatures and flight regimes. In the interim, we will continue to stress the safety programs which have resulted in the excellent Air Training Command accident rate of 0.4 mishaps per 100,000 flying hours for the last five years. As a comparison, the Air Force overall average for 1985 was 1.5 mishaps per 100,000 hours which was the safest year in Air Force history.

Mr. CHAPPELL. The current Air Force five-year plan is to buy 1590 new fighter aircraft, and these are high-performance sophisticated aircraft, and increase of 258 aircraft from last year's plan.

How can the Air Force afford to buy more fighters which cost at least three times as much as trainers, but no trainer aircraft for the pilots flying these sophisticated aircraft, and need to have the best training they can to give them the best capability?

I can't follow the logic.

Dr. COOPER. Your numbers are relative to the numbers a year ago on the tactical fighter roadmap. I would like to take you back to two years ago. As I mentioned earlier, it is a very high priority in the Department of Defense, and you may disagree with those, but it is a very high priority to both modernize and build to 40 tactical fighter wings in the tactical fighter force.

That is why those numbers increased. Again——

Mr. CHAPPELL. I am not fussing about it. I am making some comparisons. How many dollars are we talking about if we go forward with this year's program, rather than cutting it off.

How many dollars would be necessary to sustain this program as you had planned during this fical year?

Dr. COOPER. If you wanted to resurrect the program, how much money?

Mr. CHAPPELL. Yes, sir.

Dr. COOPER. I don't have a number off the top of my head. Last year at this time, we told you that in the 1987 budget, we were going to be asking for $569 million.

Mr. CHAPPELL. Obviously with the slippages, so forth, it can't be anything like that to get us through this year?

Dr. COOPER. You could probably use fewer dollars this year.

Mr. CHAPPELL. It you got any corrections, you gave us a lot of information on the cost of operating the T-37, the cost of maintaining that T-37 as compared to what you intended to have, and tell us where those figures were in error then, if they were, and what they realistically should have been, and compare it with this aircraft, the T-46, compare it for us, and let's see, the facts have not been matching.

Maybe the Air Force doesn't need a trainer, period?

□ 2020

Dr. Cooper says: "I don't think we have changed our facts on the T-37.

And, of course, at this point I would like to interject not much. First they say it is like pouring money into a rat hole, that it is unsafe, that we need a new plane, that it is not fair to deploy, and they build that rhetoric for 7 years and then they have you think that this plane was the optimum.

Oh, well, we could do, you know, with a new plane but it is really not necessary.

Well, maybe the Air Force does not need a new trainer, period. Dr. Cooper says, "I don't think we changed our facts on the T-37. This decision was made independent of the T-37. We can continue with the T-37 with relatively modest investments."

Very interesting the way they can change from how something is very costly on one hand and takes so much money, how you are wasting money to attempt to modernize it, and then on the other hand just simply say, "Oh, we can do it for a modestly small sum."

"In fact, we are going to continue because the T-46 wasn't going to hit the ramp for some period of years."

Of course, Cooper and company fought like the devil to stop it. They worked their tail off to stop it. They testified in front of us. I mean, this was a decision to impede the progress of the T-46 and then they say it is not going to hit the ramp for some time. That is in the vernacular some in New York call chutzpah. It really is incredible. You wonder about the morale in the plant and the high turnover in the plant, and yet you threaten to destroy the plant, the manufacturing facility, and you wonder why people do not have high morale. You wonder about the delays. When you fence off the money, you say you cannot use the money, and then you wonder why they do not have any production.

That is incredible. That takes something. And then you say, "Well, you know, we would have to keep the T-37 because they are behind and they would not hit the ramp for a period of time, probably 5 or 6 years."

More accurately, if Dr. Cooper responded, he would have said, "Probably never if we get our way."

"Beyond that, we will start to have to make relatively major investments in the T-37 to extend its operational life. That can be done."

So now he is saying, in essence, that they are not going to have to make major investments in the T-37, if they can keep it flying for 5 years without any major investments. They are not going to make any major investments and sometime 5 years from now they are going to start making investments. That is what the essence of their argument is and it is a lot of nonsense. It does not bear out with the facts and it does not bear out with their prior argument.

He said, "Beyond that, we start to have to make relatively major investments."

"Will it be done as good as the T-46?" is the question, Mr. CHAPPELL asks, and he says, "No, it will not be as good as a T-46, and at some point regardless of what you do to the T-37 you will run out of useful life, maybe 10 years from now."

We have Dr. Cooper saying that we will have to make major investments, maybe 5 years from now. He said it is not going to be as good as the T-46

and we would get a life increase of maybe up to 10 years.

Now, I suggest to my colleagues I am wondering what you are voting on. Do you really want to vote to do that? Is that really what you are saying? Do you really want to put a plane up there that is operationally deficient at the present time, continue it with all of its problems and say maybe we can get by for 5 years when the test is that we cannot get by and only have to put in modest sums and I would like to know what we call modest sums and 10 years from now we will have to have a new plane.

That really makes sense, and that is where the cost comes into $1.9 billion more for the taxpayers, and that is when we say about your throwing away half a billion dollars worth of money, and then there are those who will say to me you are being partisan, you are parochial. This company is located in New York. It just seems to me no matter where the company is located you should be concerned and you are darn right I am partisan and concerned when I see it taking place unfairly to an installation that is in my home town.

Will it be done as good? No. At some point regardless, regardless, at some point, he says we are going to have to do away with the T-37 and it runs out of a useful life maybe 10 years from now.

Well, if you want to vote for it, vote for it.

But he says, "I would like to make sure with you the environment we were in when we made the decision on the T-46"

Now he is going to tell you the rationale why he came out with the decision.

Verne Orr, Secretary of the Air Force, and I am not speaking for Russ Rourke right now, he has called for a major review very shortly, and he wants to take an independent look at it. . . .

Well, that is interesting. Verne Orr is going to take an independent look at it.

. . but at the same time the cut was made, Verne Orr and Charlie Gabriel decided rather than stretch out programs which we have been admonished to not do, they were going to make a couple of vertical cuts, to cut back on the programs.

The T-46 had its head up above the foxhole because of technical reviews, the confluence of those two things, the fact that the T-46 was on its back, and we were not happy with what we saw at that plant and the budget pressures, . . .

Of course, they were not happy because a certain general when he came there was not received with the ordinary and customary tradition and the people at the plant were pretty silly in not receiving a four-star general as they should have, but they were silly and the plant was amiss and they did have problems and he was pretty ticked off when he came and visited and he was kept waiting 40 minutes. He was darn annoyed. Nobody was there to meet him or show him.

After all he would have been proud. He advocated this contract. The whole Air Force advocated this contract.

He took that as a good swift kick you-know-where and he did not like it. I did not blame him. He went back and he decided he was going to show these people who was boss. He promptly reported that this was the worst operation he had ever seen, and this is the genesis for the beginning of this problem. The people went ahead and did some darn right silly things. They fired some people they should not have fired. They compounded the problem.

Boy, now we really got the pot boiling. Now we begin to see this is an easy program to kill. We do not have to bring this T-46 on. We have the general mad and I spoke to him and he admitted there were deficiencies. He said they got it cleared up. Once they got the ball rolling there were other forces that began to push it on.

□ 2030

And push they did, push to the point that you are going to vote to keep a turkey T-37 flying that should be replaced. We should be ashamed of ourselves. Twenty-one votes; incredible.

Well, people will do anything to get home sometimes. So we will consider it again and again.

The T-46 had its head up above the foxhole because of technical reviews, the confluence of those two things, the fact that the T-46 was on its back, and we were not happy with what we saw at that plant and the budget pressures, back in the October-November time frame, caused this to be a casualty.

I don't paint such a rosy picture for the T-46. I think it is improved, but it will be over ceiling.

Of course, if you hold up a plane production for 2 years, what do you think will happen? This is going to happen. That is nothing new. I want to know what program have we seen come under ceiling here.

. . . and we know Fairchild is going through the ceiling by about $88 million on the FSD program, and will come out of their pocket, and go through ceiling on lot one, we know that, and we suspect they will go through ceiling on lot two.

That is what the language which was carefully crafted in the Appropriatons Committee was designed to handle. It was designed to handle something because the authorizing committees did not want to do it. They wanted to kill this program and handle it in a way in which the taxpayers' dollars would be protected, in which there was a ceiling, in which there was reasonable renegotiations on lot one or on lot two, certainly on lot two.

We have contracts in hand. That means the contractor has to bear that burden. In lot three, we were open, in an open negotiated position. Our concern is that that cost will continue to go up, so it is the confluence of all those things that caused the T-46 to be a casualty.

That is why the House and Senate Defense Appropriations Committees arrived at language that would provide a ceiling upon which no one could intrude, a ceiling and call for negotiations. That is nothing new.

Mr. CHAPPELL. Why don't you put in the record your best estimate of the program, and what is wrong with it at the present time?

Dr. COOPER. Yes, sir, there will be a program review that comes in within a week, so we will report back to you on that.

[The information follows:]

The flight test program has confirmed our judgment that the T-46 will be an excellent flying training platform. It has pointed out the need for augmented stall warning, reduced speed brake buffet, and reduced drag from the current design. These are significant but manageable problems.

That almost sounds like the General Accounting Office talking.

More significant are the schedule delays and contractor cost growth we have seen recently on the program. The program is now about a year behind schedule for delivery of the second test aircraft, and similar delays are occurring in the first production lot that we ordered in December 1984. No near term schedule recovery appears achievable. Contractor cost performance has also caused us concern. Costs well above ceiling in development, but more importantly in initial production, cause us concern for our cost estimates for the total program. The contractor will have to implement aggressive cost reduction efforts in production to assuage this concern.

Why, he could not begin to do that unless he began to get the cooperation of the Air Force, instead of the steady drumbeat that we are going to put you out of business.

Mr. CHAPPELL. Mr. Miller.

Mr. MILLER. Talking about aircraft capability

Well, now we are getting into the C-17

Mr. President, I have another report on the T-46 by the Congressional Budget Office that basically found that the T-46 operating and support costs also are far below the Cessna T-37 alternative. I would like to share that with my colleagues as well.

CBO finds the T-46 O/S costs far below T-37 alternatives.

I think when we begin to say we are going to kill the T-46, we better look to see what the alternative is. Nobody here has suggested that we are not going to improve the present plane. So let us take a look at it because I know you are all concerned about the issue.

A Congressional Budget Office study has found that the Fairchild Republic T-46A trainer would have twenty-years operating and support (O/S) costs far below the Cessna T-37 alternatives.

The higher O/S costs of the T-37 alternatives in turn push the total cost of the alter-

natives' programs to comparable levels with the T-46A, while demanding major modifications or extended utilization of the aging T-37.

In 1986 dollars, discounted at four percent, the total 20-year costs of the T-46 is estimated at $6.1 billion. By making major modifications to the T-37 and adding some new aircraft, the twenty-year cost of the T-37 program is estimated at $6.2 billion.

So here we have the Congressional Budget Office making a study—not me, not my office, not Fairchild, but the CBO—and what do they come up with? They say you can keep an aging, inferior plane, a plane that has been admitted to by the Air Force, they would like to have a different plane, but they say in the lifetime cycle of retooling this plane, keeping an inferior plane, it will cost you approximately the same, $6.2 billion as compared to $6.1 billion. Now, we will concede it is approximately the same.

In an assessment of the alternatives, at a three percent discount rate, the costs, in 1986 dollars, of the T-46 for a twenty-year program is $2.4 billion in investment, $4.0 billion in operating and support, for a total of $6.4 billion. By modifying the T-37 to extend its service life through the year 2006 (the T-37 has been in the Air Force inventory since 1956).

It is a 30-year-old plane.

The costs would be $0.7 billion for investment and $5.3 billion for operating and support, for a total of $6.0 billion for a twenty-year life cycle.

If the T-37 is modified and reengined, the costs are $1.4 billion, $5.1 billion, and $6.5 billion. If modified, reengined, and upgraded, the T-37 costs are $1.7 billion, $5.1 billion, and $6.8 billion.

So we begin to get a cost factor that if we are talking about reengining, modifying, it is going to cost more money, anywhere from $700 million to $900 million more for the T-37. So if we want to talk about economies, why, the T-46 is the area of economy.

Now, CBO explains—and we will get into this because this is an interesting report. It has taken them quite a bit of time and I would not want you to just believe me and take my analysis. We have some staff workpapers here that we wish to share with you in some detail. It says:

CBO explains: "If funds are stringent over the next few years, Air Force needs could be met at least partially through less extensive modifications of the T-37, such as modifications necessary to extend the life of the aircraft or those plus new engines. While these alternatives would be 35 to 69 percent cheaper in terms of total investment than continuing with the T-46 or making major modifications of the T-37, they would be only three percent to twelve percent cheaper in terms of two-year costs as lower investment costs are offset by higher operating costs. Moreover, in the long run, past the 20 years of this analysis, the advantages of lower investment costs would be outweighed by higher operating costs for these alternatives. Also these more limited modifications would not provide the improvements in safety and utilization that the Air Force believes are important." Also these more limited modifications would not provide the improvements in safety and utilization that the Air Force believes are important."

MANNED HYPERSONIC ESCAPE SYSTEM SOUGHT

Exploratory development and evaluation of concepts for crew escape systems for vehicles capable of hypersonic flight in the upper atmosphere as well as in space is called for in an RFP to be issued March 28 by the Air Force Aeronautical Systems Division. The concepts developed are to provide emergency escape and recovery for man throughout the vehicles' total mission from launch to landing.

□ 2040

We have heard from the Congressional Budget Office, March 10 memo, from Bob Hale; subject: analysis of Air Force trainer alternatives.

Unless otherwise noted, all years referred to in this paper are fiscal years.

Details in the text, tables, and figures of this report may not add to the total because of rounding.

All costs expressed in current dollars use the Administration's February 1986 economic assumptions.

Should the Congress add funding for the Air Force's new primary trainer, the T-46? Or would modifications to the current trainer, the T-37, suffice? How would such a decision affect the cost and capabilities of the trainer fleet? These will be important questions as the Congress continues debate over the Department of Defense budget for 1987. This analysis by the Congressional Budget Office (CBO) assesses the costs and effects of alternative procurement or modification profiles that could result from these decisions. The study was done at the request of the House Committee on Armed Services. In keeping with CBO's mandate to provide objective analysis, the study contains no recommendations.

Lane Pierrot, of CBO's National Security Division, and William P. Myers, of CBO's Budget Analysis Division, prepared the analysis under the general supervision of Robert F. Hale and John D. Mayer, Jr. Robert Kornfeld, of CBO, provided extensive assistance during the study's preparation. The authors gratefully acknowledge the contributions of Wayne Glass, Diane Griffith, Rebecca J. Kees, and Francis Pierce.

RUDOLPH G. PENNER,
Director.

Each year the U.S. Air Force trains about 2,100 new pilots. Early phases of that training currently take place in a T-37 aircraft. But the T-37 is old and lacks features the Air Force believes are important. So in 1982 the Air Force contracted with Fairchild Republic Company to produce a new trainer aircraft, the T-46. Fairchild, however, has suffered major losses due to cost overruns and management problems in developing the T-46. The Air Force has also had to hold down its planned spending. For these and possibly other reasons, the Air Force has not put any money into its 1987 budget for further purchases of the T-46 and is considering alternatives.

This paper analyzes the costs and effects of several alternative approaches that meet Air Force trainer needs, including:

Continued procurement of T-46 aircraft;

Major modification of existing T-37 aircraft coupled with purchases of some additional trainer aircraft other than the T-46;

Minor modifications of the T-37 coupled with purchases of other aircraft.

THE T-46 APPROACH

The T-46 would meet Air Force needs for a new trainer with a new, more capable aircraft. It would have a better engine than the existing T-37, a pressurized cockpit allowing flight at higher altitudes less congested with civilian aircraft, better bad-weather capability, improved ejection seats for safety, and other advantages like improvements in reliability and maintainability. These improvements, the Air Force argues, would allow the T-46 to provide better training for more hours per month than the existing T-37 but at less operating cost per hour.

Costs to design and buy 650 T-46s would total about $2.6 billion, more than the costs to modify the T-37s. Costs to operate the T-46 would, however, be lower than the T-37. Thus 20-year costs for the T-46 would total about $6.1 billion (see the Summary Table and Alternative I in the text). These costs include investment and costs to operate the fleet for 20 years (1987-2006), discounted at an annual real rate of 4 percent. (Alternative discount rates of 3 and 5 percent do not alter the relative rankings of the options considered in most cases.)

I think that is important.

There is considerable risk of growth in T-46 investment costs, however. These investments costs reflect the funding that was included in the 1986 budget submission. Fairchild's cost difficulties in lot 1 of production suggest that actual investment costs could be higher than those assumed here, though it is difficult to assess the amount of the increase.

MAJOR MODIFICATION OF THE T-37

An alternative approach would buy no more T-46s and instead make major modifications of the T-37 to give it many of the same capabilities as the T-46. These would include altering it to extend its service life into the next century, providing a new engine, pressurizing its cockpit, and improving its ejection seat and up-grading its avionics. In addition, this approach entails buying 100 of a new trainer to offset the limited size of the T-37 fleet. For specificity in costing, the new trainer is assumed to be additional purchases of the TTB trainer aircraft that the Air Force already plans to buy for other missions.

This option would eventually meet all Air Force requirements for training capacity with a modified T-37 designed to be nearly as capable as the T-46. It is not, however, identical in capability to the T-46 approach. Most importantly, this approach would not meet all needs until the mid or late 1990s because of the time needed to design and implement modifications and to buy the new TTB aircraft. The T-46—if it stays on the schedule assumed in last year's budget—would avoid most near-term shortfalls.

Given Air Force assumptions about the "utilization" hours that modified T-37s would be flown each month, total costs of this approach would be similar to those for the T-46, though investment costs would be less. This approach would cost much less in investment over the next five years that continuing to buy the T-46 because it would take more time to accomplish the modifications and buy TTB aircraft than to buy new T-46s that are already designed and under construction. Total investment costs for this option would also be less than for the T-46 by 23 percent. Twenty-year costs, however, would be 2 percent higher because invest-

ment savings are offset by higher operating costs.

□ 2050

So, Mr. President, we come down to the point once again, you can keep an older plane flying and the cost over the 20-year life cycle will be more for keeping the older plane flying.

I did not come up with this budget report. This is the Congressional Budget Office. We can continue to move ahead on this, to examine it. I will conclude on this:

On the other hand, if the Air Force obtained improvements in utilization similar to those it expects for the T-46, this option would be substantially cheaper in terms of total investment (46 percent) and in terms of 20-year costs (16 percent). Currently, the Air Force believes that the T-46 can be operated 60 hours per month, but tht the T-37—even though extensively improved—could not get above its current level of 45 hours per month.

Once again we find it makes no sense to continue to make these improvements.

What about the minor modifications in the T-37?

If funds are stringent over the next few years, Air Force needs could be met at least partially through less extensive modifications of the T-37, such as modifications necessary to extend the life of the aircraft or those plus new engines. While these alternatives would be 35 to 69 percent cheaper in terms of total investment than continuing with the T-46 or making major modifications of the T-37, they would only be 3 percent to 12 percent cheaper in terms of 20-year costs as lower investment costs are offset by higher operating costs. Moreover, in the long run, past the 20 years of this analysis, the advanatges of lower investment costs would be outweighted by higher operating costs for these alternatives. Also, these more limited modifications would not provide the improvements in safety and utilization that the Air Force believes are important.

Mr. President, I hope we have begun to make some kind of impact about my commitment to this issue. Some would characterize it as parochial. I would ask others, maybe even those who say it is taking a step backward, or maybe putting themselves in the position that I find myself in, ask what would they really do? Would they really handle it differently? I have suggested some alternatives, a compromise. I met with the Air Force. Their hands are tied. There is no doubt in my mind that they are tied. So we find ourselves at 9 o'clock on a Thursday evening with this amendment that would once and for all, I believe, commit us to a course that is not prudent, a course that would wind up in retaining an outmoded plane that would have to be modified, that would cost the taxpayers more in the long run, and would deprive the Air Force of the plane that they wanted, that they have certified meets their needs. Not only have they certified, but the Congressional Budget Office has indicated it meets its standards, and the General Accounting Office has indicated meets their standards.

While I yield the floor at this time, understand that I have just begun. I would hope that some reason would find its way into this situation.

Mr. President, I yield the floor.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am not going to take much time, but I thought I would outline why this issue is before the Senate. Several Members have inquired of me, as the Senate's representative on the conference committee from the majority, as to why we did put the compromise language in the continuing resolution that authorizes the funds for the production of the T-46 aircraft.

First, let me say I think it ought to be clear to everyone concerned that we had no authorization bill when we in the committee. We had repeatedly requested an authorization bill. We did everything we could to urge the authorization committee to complete its action and withheld action on our conference report until the very last minute so that we could get that authorization bill.

Our committee and the Appropriations Committee have been very slow to support the T-46. Beginning in 1981 we had a request for what was then called the next generation trainer, and the NGT was a subject of great concern to us.

The committee requested the Air Force to review all options before we committed to this new trainer. We urged that the Air Force consider using the trainer that the Navy was using at that time to try and find a common aircraft for a trainer. It was after that that the Air Force persuaded all four committees that dealt with this subject in the House and Senate that it was essential the Air Force have its own primary trainer.

The Air Force has requested funds each year from 1981 through 1986 for the T-46. To date, we have appropriated almost three-quarters of a billion dollars and spent $500 million on this aircraft. It is once again to me a question of having been involved in pursuit of a goal, and having been very skeptical about that goal. But we were finally convinced and committed the money. Now in the fall of 1985 the Air Force, under rather severe pressure, has decided to abandon its goal for this next generation trainer and it will have a concept of upgrading, refurbishing, the T-37.

In 1982 we asked the Secretary of the Air Force if this was possible. It was not possible.

I have a series of quotes beginning in 1981. In 1981, the Air Force said, "Extending the T-37 service life will not correct any of the aircraft's operational deficiencies nor will it overcome fleet insufficiency."

In 1983 we inquired again, and again the Air Force said, "We need to replace the aging T-37 as quickly as possible. The T-37 introduced in the 1950's is fast approaching the end of its service life. In addition to being old and difficult to maintain, the T-37 has several operational deficiencies."

In 1984, the Air Force told us, "The T-46 has an excellent single engine performance in comparison with the T-37. We have to restrict the T-37 today in terms of flying in certain weather conditions at high altitude air fields or on hot days."

In 1984, when we suggested we ought to make certain what was going on, the Air Force said, "The operational impact of delaying even by 1 year extends beyond the obvious delay in the initial operational capacity, the IOC, and would require an undesirable extension of the phaseout of the cost inefficient and operationally deficient T-37's."

We have pursued through this whole period of time a concept of why we needed a T-46. It was the authorization committee in both the House and the Senate that insisted that we go ahead, that we pursue the T-46.

In 1982 we had the GAO review this and the GAO reviewed the contract and said the source evaluation and selection was done according to the Department of Defense and Air Force instructions.

□ 2100

In 1983, again, we had the GAO review the Air Force plans to buy the T-46. They concluded the program schedule called for a considerable overlap between production and development. They predicted delays and problems would increase costs and they were right.

The Air Force said to us again in 1984, the T-37 is not pressurized, the T-46 can operate at higher altitudes. The T-46 is more fuel efficient. The T-46 had safety features that the T-37 did not have.

The T-46 is a new design versus 1950 technology of the T-37. And most importantly to our committee, the T-46 would meet EPA and FAA noise standards that the T-37 does not meet. This is an operational aircraft for training jet pilots at home, in our country. We were seeking to have the Air Force comply with EPA and noise standard restrictions.

The T-46 they told us would be less expensive to operate and maintain. Again in 1985, all four committees—the authorization committee of the House, the authorization committee of the Senate, the two Appropriations Committees, one in the House and one in the Senate—approved the first lot production of the 10 aircraft, T-46.

The fiscal year we are in right now, all committees approved the continuation of this production. But in April, the Air Force canceled the contract. They cited schedule delays. We have had the GAO report read to us tonight by the Senator from New York and they concluded that there was still a requirement for the new trainer.

This T-46 contract has been on hold since April 1986. Our problem in our conference was to determine whether it could go forward under the circumstances and stay within the original bid requirement. So let me emphasize the language that is before us in the bill, that the Senator from Arizona seeks to delete.

That language provides that none of the funds provided in this or any prior act may be used for the T-46 airframe production contract which existed on October 1, 1986, for other than the lot one production.

In other words, there must be a competition. There must be at least a new contract, which assures that the maximum production unit cost for each aircraft will be what it was estimated to be in 1986 dollars and that the total cost of the aircraft program will be the limit originally set.

That total cost, Mr. President, includes the moneys already made available for expenditure.

Now, Mr. President, I think this is fiscally sound. We know we are going to have to have a new trainer. What is being suggested now is that we abandon this program which has been underway since 1981, that we just flush three-quarters of a billion dollars down the drain again. It is the same story we have heard on so many systems: After it has gone along for a while, someone questions it and on the basis of political pressures from somewhere else in the country, the system is put down and a new aircraft will come along.

We have an absolute demand for a new aircraft. We cannot maintain our proficiency in jet aircraft without a new trainer. Everyone knows that. If we abandon this one, what is it going to be? Is it going to be the Hawk that the Navy uses that is built in Great Britain? Is it going to be the de Saulte trainer that I flew when I was in France 2 years ago? It is a very good trainer, and it is available to us.

Where is the next generation trainer that is built in the United States, if it is not the T-46? Because the T-37 certainly is not a next-generation trainer. If we put this kind of money that people are suggesting into the T-37 to upgrade it and try continuous utilization, we will have at most a plane that will last for 2 or 3 years. This plane will last for 15 or more years. If we go ahead with it, we will not have lost the three-quarters of a billion dollars we have made available already.

I am sad to see us in this dispute once again. It is unfair, however, for those involved in the authorization process to come here in October and tell us, is this not sad, the Appropriations Committee once more is seizing the direction of the Air Force or the Department of Defense and they are trying to tell us what to do.

All we needed was an authorization bill. Had we had an authorization bill and these funds not been in there, we had agreed and we absolutely agreed we would live up to the authorization limitations this year. We pleaded with them to get us a bill.

Now, here we are. That authorization bill has not become law. This is not something that is subject to limitations. As a matter of fact, I am told now the authorization bill is not even going to be submitted to the President until this bill is signed by the President. So, as a matter of fact, there will be no authorization for any single unit in this bill when it passes.

Let me repeat that, Mr. President: There is no problem here about authorization because this bill will be the authorization bill at the time it passes until that other one is submitted to the President.

There have been problems with this trainer, there has been no question about it. But we have been the ones in the appropriations process who, all along, have urged that this be totally examined and once we were convinced, we made the moneys available. After we become convinced and made the moneys available, the authorizing committee started to shut off the supply and questioned this trainer.

No one in this body, as I have said before, has greater love or admiration for our good friend from Arizona. He knows that. This is not something personal between us. We are both pilots. He has flown it. He had flown the T-46 and I remember the day he came back and told me it is a good airplane.

It is not a question of whether it is a good airplane. It is a question of whether or not the Air Force wants it. I say to the Senate now that the Air Force, before our Appropriations Committee, has never, never denied the desire to have the T-46. Even this year, Dr. Cooper said, if you buy it and you pay for it, we want it; certainly, we want it more than the T-37 upgrade.

When you look at this today, I tell you, Mr. President, we cannot have the best-trained pilots in the world unless we are willing to provide them with the best fighter trainer that is available. This is the best one, the best one that is available.

The question now is not whether it should be made available, because we have already put up money for 10 of them. We already put up $500 million for R&D. Now, we are asked to abandon that and go off and start a new competition, a competition which will include at least a plane from Brazil, another one from Israel, another one from France and Germany, another one from England, and I say we should keep to the commitment we made at the time we made the original commitment for production. GAO has examined into this. And even with the mistakes and the problem it has, the contractor can go ahead with this plane. I think any further delay in making the funds available to assure its construction will, in fact, cause severe difficulties for the contractor. I do not know any defense contractor who is not in that position after having been strung out as this one has been.

Our compromise language before the Senate ensures that program costs for the T-46A will not increase. If they do increase, the Air Force must in fact do what the authorizers seek now. They must recompute the contract.

I think we cannot expect our pilots to be able to defend this country unless they have the best training available. We cannot afford to turn loose new pilots, trainees, in F-16's and F-17's and F-18's. The difference in cost is very great. They need this trainer, in my opinion. I urge the Senate, despite what it has repeatedly done here, to reconsider.

Let me say this in closing, Mr. President. Some people have said why is it that this was the last item agreed to in conference, the last item agreed to in the conference with the House on this continuing resolution in the defense portion of the bill. The reason is obvious. This is a provision the House wanted most. I think anyone who was there knows that. Although there was not one member of that conference from the State of New York, the House Appropriations Committee has been committed to the T-46. They told us in the beginning of the conference they had to have the T-46. That was their desire.

In order to make sure that we gained the Senate's position on some things—and I challenge anyone to look at this bill from the point of view of the Senate's position. We substantially prevailed in terms of the Senate position, in terms of the systems and the funds we thought were necessary for defense for the fiscal year 1987.

My good friend from Mississippi found a saving in the Navy shipbuilding account and, by virtue of the changes that he made, instead of building a new destroyer, we are building a new cruiser and taking advantage of those funds. That was a Senate change in the whole process. Everyone now has admitted that that was a very, very good suggestion.

□ 2110

We have had a series of other compromises that were made, primarily to

carry out the Senate position. The T-46 was an item the House insisted had to be in this bill. It was put in there, if you look at the debate on the floor over in the other body last night, with the full approval of the appropriations and authorization committees. And now at the last minute we are told, "No, do not do this, do not put up the money for the T-46. Go ahead, waste three-quarters of a billion dollars. Do not proceed."

Mr. GOLDWATER. Will the Senator yield?

Mr. STEVENS. I do yield. Again I say it is with great respect and extreme reluctance that I oppose the amendment of the Senator from Arizona, because I know no one in the Senate who wants a strong Air Force and a strong defense more than I unless it be the Senator from Arizona.

Mr. GOLDWATER. I thank my friend. I would like to remind my good friend from Alaska that when we started this—I do not know how many hours ago it was—I said to the Senator from New York that I did not want to debate the merits of the airplane; I wanted to talk about the fact that the Air Force does not want this airplane.

Now, if somebody will get the commanding general of the Air Force to call me and say, "I want it," I can make more noise in favor of it than anybody here. But the Air Force does not want it.

I have never run into a situation like this. I do not know what we do when we run into a commander of a unit of our military who says he does not want this particular weapon. I do not think the Congress should ever, ever get in the position of buying weapons for our military that the military does not want.

This is a good airplane. I wanted the Senator from New York to yield when he had a little question about the stall characteristics. It had admirable stall characteristics, but the GAO is not a particularly well-noted group of test pilots, so they do not understand those little things.

I just wanted to tell my friend from Alaska that that is still the problem. Nobody is arguing about the merits of the airplane. We are arguing about the fact that the Air Force said no. And I do not know what to do about it. It would be like the Navy calling over and saying, "We are not going to take that submarine if you build it," or the Army saying, "We are not going to take that tank if you build it."

Well, here we have an airplane that all of us, including myself, thought the Air Force was going to take, but that is the word. And until you fellows can change the mind of the Air Force, I do not know what we can do. We can let my friend from New York stand here and talk until 10 o'clock tomorrow morning. He can deny pay for every civil employee in this country and every man in uniform, but that is up to him. We are not solving the problem. If my friend from Alaska wants to call the general and ask him to come over here and sit in the room and talk, maybe we can bend his arm. I do not know if you can. But I just wanted my friend from Alaska to know we are not debating an airplane's merits or lack of merits. We are debating the fact that a military organization in this country just says, "We do not want it." It is a hard thing to overcome.

Mr. MOYNIHAN addressed the Chair.

The PRESIDING OFFICER (Mr. ABDNOR). The Senator from New York.

Mr. MOYNIHAN. Mr. President, I would like to respond at some length if necessary to the very careful, very thoughtful remarks of the Senator from Arizona, a treasured friend, as he knows. We have been associated in many of these enterprises.

Might I first say, Mr. President, with respect to the situation we find ourselves in, it is a quarter past 9 o'clock on a day when the continuing resolution that keeps the Government in operation this 15 days past the outset of the fiscal year expires at midnight, and we well know that. There has been some question in the Chamber, and it is understandable, why would the Senators from New York—and there will be other Senators speaking—wish to push the body to that midnight moment of crisis over such a specific issue.

May I even so say that we gave in my view fair notice of this matter. Yesterday early evening, speaking on the Defense Authorization Act, I noted that the continuing resolution provided funds for the T-46 trainer, as the Senator from Alaska has made clear. I said, if I may quote: "Mr. President, the continuing resolution which we will be dealing with tomorrow," as I hoped we would do and as indeed we have done, and are doing, "provides funds in the amount of $151 million for the production of the trainer, the T-46, in fiscal year 1987 and specifically provides for the release of $169.9 million that had already been appropriated for fiscal 1986 but have not yet been released. That is the continuing resolution. That is a measure we will pass and it will become law," as indeed we will pass this measure and it will become law.

I then said, Mr. President, and again I quote: "I hate to say something I have not ever before said, I believe, on the floor of the U.S. Senate, which is that the continuing resolution must pass as it is now written or I cannot anticipate the time when we will be able to vote on it."

If I could say again, Mr. President, I said, as we passed the defense authorization bill, "A bill is not likely to become law which contains a prohibition on the funds for the T-46 trainer." "And as we looked forward the next day to the continuing resolution which provides funds for the present fiscal year and unfences, as the term is, the funds from the last fiscal year, I said that "It must pass as it is now written or I cannot anticipate the time when we would be able to vote on it."

That, of course, is what is happening this evening. The Senator from Alaska noted the great specific concern on the House side that the funding for the T-46 contained in this measure go through. The Senator from Alaska noted that it was the last measure agreed to in the conference committee, it was something the House wanted and which year after year in one form or another the Senate has agreed to provide funds for, in all, some six-tenths of a billion dollars in funds just in the development of this plane, which plane is clearly needed and which clearly is going to be built. The question is when and where and by which company.

Now, what is our problem? Not to understand our problem in the large is not to give us any opportunity to resolve it in the detail. Our problem, Mr. President, is that the funds for defense in the U.S. budget have now commenced to decline. They have commenced the inexorable decline which a number of us stood on this floor during a long week in October, then November, and then still later December 1985 and said would happen were the Gramm-Rudman legislation to be enacted. The steady path of increase in defense budget authority and outlays which began in the late 1970's would come to an end and we would go through a crunching experience of cutting, of doing without, of choosing between equally undesirable choices, of facing the prospect of putting out of mind $600 million for the development of a necessary military vehicle. Here are the numbers, Mr. President.

□ 2120

In fiscal year 1985, the budget authority for the Department of Defense was $286.8 billion. That was its peak—fiscal 1985, which of course began in calendar year 1984. The next year, fiscal 1986, budget authority dropped to $278.4 billion.

Mr. President, this is not an unimportant event. The decline in defense budget authority between 1985 and 1986 was the first such decline since 1970–71, at the effective end of the Vietnam war. We have had a nominal dollar increase every year since that time.

In 1970, our budget authority was 74.1. It dropped to 71.2 on 1971. We have now begun to decline again. This year, we rise a little bit from 1986 to $282 billion, but we are still not at the level of fiscal year 1985. The much

heralded return to a steady path—and I do not think I will be contradicted—which has left us in the 5-year budget projection of President Carter, in 1981, has come to an end, just as Senator HART and I and others said it would do. We asked during the initial debates on Gramm-Rudman-Hollings if that ought to be allowed, to the sometimes derisive responses that "surely nothing like that would happen," and yet that is exactly what has happened.

I am moved, Mr. President, and distressed to read the lead story on the front page of today's Los Angeles Times. I show it to the Presiding Officer, my good friend from South Dakota [Mr. ABDNOR]. It says:

> Congress okays 3 percent Pentagon spending cut. Votes $292 billion for defense. Avoids arms confrontation.

The story, by Sarah Fritz, a Times staff writer, datelined Washington, says:

> Congress stepped back from a confrontation over President Reagan's arms control policy in the wake of the Iceland summit when it passed a $292 billion defense spending bill that provides for a three percent real reduction in Pentagon spending.

Let us be clear—a 3-percent real reduction in Pentagon spending.

I skip a paragraph, and it goes on:

> The smaller Pentagon bill is the last hurrah for retiring Chairman Barry Goldwater, who noted that for the second consecutive year, Congress has failed to increase defense spending enough to account for inflation.

If I may repeat that paragraph, it ought to sink into the heads of each of us in this body:

> The smaller Pentagon bill is the last hurrah for retiring Chairman Barry Goldwater, who noted that for the second consecutive year, Congress has failed to increase defense spending even enough to account for inflation.

As I read that, I realize that when I first read the paragraph, I left out the word "even"—"even enough to account for inflation."

The Los Angeles Times quotes Senator GOLDWATER:

> We are cutting too much from defense. Now, let's not kid ourselves. Anyone who thinks we can go on cutting the defense budget to the point where we actually have declining growth rates of more than 3 percent a year without undermining our defense posture is indulging in a happy but unrealistic delusion. I have a terrible sense that we are returning to the irresponsible policies of the late 1970's.

I know that my dear friend will not mind if I say that it was the early and mid-1970's he was talking about. In the late 1970's, the present path of growth commenced and had continued until 2 years ago. I see that, with his unfailing sense of fairness and his complete grasp of these matters, he is nodding in agreement with me.

BARRY GOLDWATER, in his last statement to the Nation about defense, said this:

> We are cutting too much from defense. Now, let's not kid ourselves. Anyone who thinks we can go on cutting the defense budget to the point where we actually have declining growth rates of more than 3 percent a year without undermining our defense posture is indulging in a happy but unrealistic illusion. I have a terrible sense that we are returning to the irresponsible policies of the 1970's.

I edit it to leave out the word "late."

That is what is happening. That is what was destined to happen the moment the U.S. Senate and the House and the administration, in the early part of this decade, commenced to incur enormous deficits, commenced to spend moneys we did not have at levels never known in our history, and doubled the national debt in 5 years.

It took 39 Presidents to reach a $1 trillion debt, and in little more than one Presidential term we went to $2 trillion. Tomorrow, we will have to provide yet another increase in the debt ceiling, a debt now grown so large that it begins to immobilize the American Government.

The elemental numbers are that the Federal Government spends about 24 percent of the gross national product each year.

□ 2130

Our revenues are about 19 percent. On a long glidepath from the mid-1950's when the operating revenues of the Federal Government were at about 15.5 percent of GNP, they are now down to 12.6 percent.

The revenues of the Social Security Trust Funds have grown, and those are dedicated taxes for dedicated purposes, but what we have to run the rest of our Government with goes down and down.

The largest item in our budget today is the defense program. If you leave Social Security aside, the second largest item is debt service—interest payments on the $2 trillion debt.

It is now about $150 billion and gaining on the defense program. You could reach a point in time not 10 years out where we will be paying more in interest payments than we have in defense outlays. We will not be paying them to ourselves as we once did when the debt, no matter what its size, was owed to Americans.

It increasingly is owed abroad and increasingly will have to be paid abroad.

We have put this Nation on a course——

Mr. GRAMM. Mr. President, could we have order?

The PRESIDING OFFICER. The Senator is correct. There will be order in the Senate. Those who wish to visit will have to step into the Cloakroom.

There will be order in the Senate.

Mr. MOYNIHAN. Mr. President, the result of this fiscal policy and the extraordinary legislation we adopted in 1985—legislation which the well-known and well-regarded columnist George Will has called the most irresponsible act enacted by the Congress since the Missouri Compromise which led so inexorably to the Civil War—has been the decline of the defenses of the United States.

We have first in our outlays the defense budget, then, excluding Social Security which is funded by a dedicated tax, interest payments. As these interest payments grow, the defense budget has commenced to decline: down 3 percent in real terms this year, down for the first time in 1986 since 1971.

And that is the context in which this present crisis arises. It is in the context in which a dozen and a dozen dozen crises will arise in the years ahead of us.

Here is the particular and specific set of circumstances surrounding the present condition of the T-46 program.

The fiscal 1986 continuing resolution states that the Air Force has testified on the need to replace obsolete training aircraft operated by Training Command. Congress has responded to this need and ratified this requirement by providing over $600 million in T-46 research and development and procurement funds to date.

The conferees to the continuing resolution agreed to provide not only full funding for fiscal year 1986 T-46 procurement, except for a minor inflation adjustment, but also the $151 million needed to procure T-46 aircraft through fiscal year 1987.

The conferees expected the Air Force to budget for and procure the T-46 aircraft in fiscal year 1987 and in subsequent years to meet this critical and well-justified requirement.

Mr. President, there is not any sensible person who will doubt the need for a new trainer. The one we now train our Air Force pilots on was put in service 25 years ago. Since that time, a whole new generation of fighter craft have come on line—a whole new Air Force has developed. We are still training with a small plane developed in the 1950's. A new one has been developed. It will be in use until the 21st century and this plane, Mr. President, will be built. There is no question about what plane the Air Force wants, when it can make the choice to procure it. That is what happened after Gramm-Rudman.

Given the force reductions which we talked about on this side of the aisle hour after hour, day after day during the debate on Gramm-Rudman-Hollings, to the indifference or derision of many Members of this Chamber—and, as I recall, we got 24 votes in opposition—the next thing, less than 1 year later in August 1986, the Air Force was told to cut approximately $30 billion from the 5-year defense plan and $6

billion from the immediately present fiscal 1987 budget.

The Secretary of the Air Force indicated that the T-46 should be considered as a budget-cutting candidate. The air staff subsequently proposed that the program be eliminated.

This is budget cutting. This is not defense planning. This is Gramm-Rudman. This is not a realistic approach to what the Air Force needs and if the Air Force needs it the country needs it.

In September the 5-year defense plan carried the T-46 at zero. The program would be cut after producing just two prototypes.

The Air Training Command found that to continue with the T-37, even with modification, would yield high operating costs and pilot safety would remain in question.

Mr. President, my colleague from New York has spoken at length about the operating qualities of the existing trainer and the Senator from Arizona who has flown the new plane has said, as he has repeatedly said, "If I could only get a telephone call from the Secretary of the Air Force to build the plane, I will build it."

And anyone who suggests there is anything personal about his decision is going to have to answer to this Senator on the floor because there has never been a thing, in his unparalleled career in the U.S. Senate, that BARRY GOLDWATER has made a personal decision about national defense, not 1 minute, not one thing.

If there is one person in this Chamber who suggests as much let him stand right now and say so. I will say again if there is one person who thinks that BARRY GOLDWATER has made a personal decision about national defense let him stand. I look about me, Mr. President. I wish the cameras could look about me. There is not a person standing. There is not a person who would not be ashamed to do so. Indeed, this is a body that with pride would reject any such proposal.

But when Senator HART of Colorado said this was what was going to happen to the defense program in those long weeks at the end of 1985 he was right. It is happening now.

These are choices forced upon us by our indecision about budget matters. Indecision which has led to this incredible mass of the largest spending bill in history.

If you would drop it out of an Air Force plane, even pre-World War II, it could do great damage to most enemies just by virtue of its size. But it does most damage to us in its incomprehensibility and the need to make decisions such as this, which we know we should not be making.

Funding for the T-46 is an investment, an elemental investment in the training of pilots.

It has been on line for a good decade, and $600 million has been spent developing it. Only because of the rigidities this Congress has imposed on the Air Force are they now saying they have to have fuel and they have to have rations and they have to have maintenance and they will put this off until, they hope, a better day comes.

Is there anyone in this Chamber who would say to me that if in the aftermath of the Gramm-Rudman legislation the Air Force had not been told to cut $30 billion from its 5-year defense plan, they would not today be asking to continue the T-46 program as it was in place and indeed a decision already made, settled, done?

Is there anyone who wishes to say they would not?

Mr. GOLDWATER. Mr. President, will the Senator yield at that point?

Mr. MOYNIHAN. I am happy to yield for a question.

Mr. GOLDWATER. What the Senator has just said is really the guts of this whole problem. The Air Force, as you know, cut the T-46 and when they started cutting the military budget the first one was $18 billion and then it was a few more billion and then it got up to $30 billion, and the Air Force at that time had to start reneging and they reneged on the T-46 for the simple reason and they stated it at that time they did not have the funds.

□ 2140

I honestly believe that is the trouble today. And, as the Senator has pointed out, we have had a minus 3-percent situation in the defense budget. And, as he correctly said, if we continue in this direction—and I do not see any reason to think it is going to stop, because we have too many people in the other body that think the military can take all the cuts. We cut $30 billion this year and in domestic programs added about $17 billion or $18 billion.

If we are going to start cutting, it has got to be across the board, not just cut the military, but cut everything. If we ever have the courage to do that, we can start balancing budgets and cutting down the deficit.

Mr. MOYNIHAN. I think once again the Senator from Arizona spoke the truth. He knows the language. He makes the point that the Congress has, of necessity, in the continuing resolution before us, cut $30 billion in defense budget authority from the requested amount from the Executive, from the President—$30 billion.

I have served in the executive branch of this Government when the entire defense budget was $50 billion and now we are getting to the time when we will have to cut it by that much. And, again, we knew this was coming. We ask: Is this a sensible decision? Is this an equitable one?

Now, I know, Mr. President, there is a question of parochialism, of State interests here. And I grant that there is. But might I make a statement here, because in the past, over the years, the Senator from Arizona has been very open and very generous-minded in this regard.

I represent New York State, as does my distinguished associate, Senator D'AMATO. For a very great many years, we have found ourselves sending a very great deal more money to Washington than we receive back. And the real source of disparity is in the defense area.

The State of New York, with some 7.5 percent, rounded, 8 percent of the population, never receives much more than 5 percent of the total defense outlays in the country. We had 5 percent in 1976 and 5.8 in 1977 and averaged 5.4 for the last second half of that decade. In the first half of this decade, it has gone down to 5.0 percent. In 1985, we dropped below the 5-percent mark, to 4.9 percent.

Our contracts are not all that bad. It is basically in salaries and wages where we lose out. In 1985, for example, the State of New York had 1.7 percent of all the defense salary and wages. We understand that in some measure. I mean, having fought three Pacific wars, over one, or if you like, two generations, we are going to have a great many naval bases in the Pacific, the climate being what it is. The Army installations tend to be in the sunnier parts of the world.

Although I can recall in 1977, not perhaps knowing whether I would be anticipating more than I knew, I remarked that if you looked at the deployment of the U.S. Army in the continental United States, the lower 48, you would think we were planning to fight the next war in Nicaragua. I said, "You know, there are parts of the world where sometimes it snows and even freezes."

I am happy to say the Army has responded by deploying the newly formed 10th Mountain Division in northern New York State.

We understand those things. But we also understand a decision being driven by budgetary considerations, all together extraneous to Air Force concerns or needs, a decision forced upon them, which would have the effect of closing an honored and valuable defense contractor on Long Island: Fairchild Republic. Its corporate headquarters, in this, the world of mergers, is now to be found in Virginia. The engine for this plane is built in Arizona.

And note in particular, Mr. President, that this engine is built in Arizona and the man doing what he feels to be his responsibility in this Chamber is from Arizona. That is another aspect of the qualities of BARRY GOLD-

WATER. I do not know another person in this body who would do it.

But we ask: Does it make sense? Are we letting our mistakes about budget and fiscal policy drive us into yet a further mistake with respect to defense policy? And we say we think we are.

I see my distinguished friend, the chairman of the Budget Committee, has risen. If he would like me to yield for a question, I would be happy to do so.

Mr. DOMENICI. I would be delighted if you would yield for a question without losing your right to the floor.

Mr. MOYNIHAN. I am happy to do so.

Mr. DOMENICI. Provided you permit a bit of liberty. My question may be slightly lengthy, maybe not more than 3 or 4 minutes. Is that all right with the Senator?

Mr. MOYNIHAN. His remarks can scarcely be more lengthy than the continuing resolution.

Mr. DOMENICI. Let me just say this. I do not want the Senator from New York to answer this question, but I doubt very much if the U.S. Senate or the U.S. House, with or without Gramm-Rudman-Hollings, would add $30 billion to the defense budget. What are we talking about? Gramm-Rudman-Hollings cut the defense budget $30 billion over the President's request. That is absolutely incredible.

Are we suggesting that, if we did not have the targets of Gramm-Rudman-Hollings, this year we would have given the President his entire budget request on defense? We have not done it since 1981. We did not do it in 1982. We did not do it in 1983. We did not do it in 1984. We did not do it in 1985.

As a matter of fact, over the course of recent years we cut about $190 billion in budget authority from the President's budget request on defense and Gramm-Rudman-Hollings was not even around. Gramm-Rudman-Hollings does not have anything to do with it.

Now let me talk about this document that we might drop from an airplane and would cause an explosion. Is it reasonable to say that there is something wrong with this bill because it is gigantic, 13 total appropriation bills. But there is nothing wrong with a tax bill that is three times as big, with 14 other things waiting around for us to read later, not driven by the Gramm-Rudman-Hollings budget processes. It is good legislation and we ought to pass it quickly and we can understand it. Why, everybody knows that is not the truth.

Let we tell you what I think about this continuing resolution. I think it is almost high time that the U.S. Congress have one appropriations bill. As a matter of fact, this is not the continuing resolution. This is an excellent experiment in one omnibus appropriations bill. And it is not bad. I tell you, it is not any worse than if you had 13 shots at it. As a matter of fact, it is better.

We got to put far less goodies on it. We did not amend it with everyone's requests, because those requests were out of order under the new budget procedures. If you offered them, you had to cut something. And we did not find one single one that succeeded, as I recall. As I recall, not one.

Now, let me tell the good Senator from New York and those others who have spoken about it is high time we cut the rest of Government, not only defense, let me tell you this: This is as fine a year in terms of fiscal responsibility—let me repeat—as fine a year in terms of fiscal responsibility across the board since when? Since 1955. Dwight David Eisenhower's balanced budget is the only time in the last 30 years that the entire budget of the United States grew less year after year than this budget.

This year, this budget will be negative 2.3 percent in terms of real growth. This means it will not even grow as much as inflation. Inflation is 2.9 percent and, in nominal terms, the budget this year will grow only about one-half of 1 percent.

Mr. MOYNIHAN. I wonder if the Senator would tell me what his question is.

Mr. DOMENICI. My question will be here soon, I say to my friend from New York.

Now let me tell you something else, and we will put this one in the record. For those who think this year we are only cutting defense, let me tell you this is a phenomenal year. In terms of the chairman of this Appropriations Committee, he deserves absolute, unequivocal congratulations.

□ 2150

Let me tell you what this budget does to the expenditures of the United States for those who think it is only defense that is getting cut. Let us just look at outlays. That is what counts. National defense will go up minus seven-tenths of 1 percent in real terms. It will not even be growing at the rate of inflation.

Entitlements, Mr. President, about which we have been complaining forever because they are growing so much. They have declined this year like defense; they are down 0.5 percent in real terms. That means that even with cost-of-living indexes built in, the reforms in these programs has caused entitlements to grow at less than inflation by a substantial margin.

What about the nondefense discretionary accounts? We hear everyone saying those appropriators ought to cut more. We hear the President of the United States saying when are they going to cut the budget? Well, let me tell you about it. These programs are declining 5.4 percent in real terms. Where is the growth? There is not any.

I repeat, the expenditures in this budget are as restrained as any budget since 1955. And is Gramm-Rudman-Hollings working? Well, it might be coincidence, but this is the first year when we had the threat of a sequestration and we achieved this restraint. What is the next best year we have had?

Mr. MOYNIHAN. Could I ask my friend once again what is his question?

Mr. DOMENICI. It will get there. Thirty seconds. My distinguished leader asks that I ought to ask you what the time is.

Mr. MOYNIHAN. It is 30 seconds from the time you are going to stop talking. [Laughter.]

Mr. DOMENICI. Now I have another question. Let me just finish this. Let us talk about the next best year in terms of growth reduction in the Federal budget. You might have said it was 1981 that the revolution began. That is not right. You might have said it was 1982. That is not right. You might have said 1985. We were really busting the bank when we should have enacted cuts. Not at all. In fiscal year 1985 Federal spending grew 7½ percent on the plus side in real terms. What year was that? The year preceding Gramm-Rudman-Hollings. You know what it grew the next year? One point seven percent and declining.

So for those who are wondering when will we reduce the expenditures enough to get a balanced budget, we will not unless you are prepared to cut defense of the United States by 10 percent. It only declined seven-tenths in real terms this year. You have to cut it to 10 percent or more. You will have to cut the real spending in the discretionary accounts not 5 percent, which we already did this year, but you will have to cut them 25 percent or more. Then you will have to take the entitlements, Social Security, Medicare, pensions, and you will have to cut real spending for these programs 15 percent. Then you will get a balanced budget.

Mr. MOYNIHAN. Five, four, three, two, one.

Mr. DOMENICI. All I had to say was I cannot believe anybody would seriously say we are in some kind of a jam over this trainer aircraft because of Gramm-Rudman-Hollings, unless they are prepared to say that we were really going to give the President everything in defense he has asked for. It was not in the cards. Whether you had Gramm-Rudman-Hollings or not, you had to begin to restrain the military.

Mr. MOYNIHAN. Mr. President, who has the floor?

Mr. DOMENICI. And they must make the choices here.

I thank the Senator for yielding.

Mr. MOYNIHAN. I thank him for his remarks. I hope, if we are going to hear talk about how we had to cut the defense budget, and we have cut this, we have cut that, and particularly the defense budget, these remarks will be remembered the next time it becomes the routine to return to the rhetoric of the last 30 years.

I listened to the Senator from New Mexico. Perhaps he would have the kindness to listen to me.

Mr. DOMENICI. Indeed.

Mr. MOYNIHAN. He is my friend, and he is my chairman. He said this. No growth in this budget. There most surely is. Interest payments continue to grow. They were $129 billion in fiscal 1985; they are about $143 billion in fiscal 1986; and the President's budget contemplated about $148 billion in 1987. I earlier rounded that to $150 billion—gaining on defense, passing everything else save Social Security. That is the result of borrowing $1 trillion from the Japanese and giving a party in the 1980's.

That is what we have done, Mr. President. The plain fact is the CBO-OMB estimate of the deficit for the coming year is about $154 billion. That includes the expectation that a reconciliation bill will still be passed by us tomorrow of perhaps another $13 odd billion, an expectation that is not necessarily to be consummated in which event we would be $25 billion over the nominal Gramm-Rudman target of $144 billion. That is scarcely discipline. But increasingly this body will find itself incapable of discipline without bankruptcy because we have borrowed so much it commences to consume us. All that talk about America, strong again, back on its feet, and here we are presiding over a real reduction in defense of 3 percent this year, following a reduction in fiscal year 1985, a very tiny increase in fiscal year 1986. We are going down that slope again which we heard so much about with such anguished concern from the other side of the aisle. But it goes on and on.

Now, what we said would happen is happening. All kinds of talk are going on about how it does not matter, or it might be a good thing. The Senator from Arizona said nothing of the sort. He did not explicitly say a statute was responsible but he said to me in my clear understanding, and I am always willing to be corrected by him, that if the Air Force had not been forced to take the $30 billion out of its programs, of course it would be asking to continue with this existing established sensible program—a program to replace a 25-year-old trainer plane with a new one. I mean, the most ordinary sensible thing, a matter in which six-tenths of a billion dollars has already been sunk.

We throw these numbers around, a billion, a trillion. there is a nice number, if you like, Mr. President. A billion minutes ago St. Peter was 17 years dead. A billion is a large number, and six-tenths of a billion is a large number as well.

We are asking, will we not, in fact, be throwing away the money? I think we will be just wasting a good portion of it.

Mr. DECONCINI. Mr. President, will the Senator yield for a question?

Mr. MOYNIHAN. Mr. President, I am happy to yield for a question.

Mr. DECONCINI. Mr. President, I ask unanimous consent that I may ask the Senator from New York a question without this being considered my first speech on this subject matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. Mr. President, I ask my good friend from New York from what I hear went on, the Senator, my distinguished colleague from Arizona, says the defense budget has had to take a cut of some $30 billion.

Mr. MOYNIHAN. Yes, from the President's request.

Mr. DECONCINI. The Senator from New York has very, I think, eloquently explained that the Gramm-Rudman legislation had a lot to do with that, that this trainer and other national security needs might not be subject to the cuts we are having to witness today and go through this effort tonight in trying to restore as some of us believe we should.

My question to the Senator from New York is what would happen? Does the Senator from New York know what would happen if Gramm-Rudman caused this kind of cut next year or as I understand it might be even greater if we go into 1988 with Gramm-Rudman on the books and having to cut our national security any further?

□ 2200

Does the Senator care to comment on what he believes may happen to not only this trainer and other items that have been cut but other weapons systems as well?

Mr. MOYNIHAN. I am a little bit beyond my precise knowledge, but if we were to go down to the prescribed legal budget deficit which I understand to be $108 billion in this coming fiscal year—am I correct?

Mr. DECONCINI. I believe that is correct.

Mr. MOYNIHAN. To get to that deficit level from where I think we will be, with a deficit this year, which I estimate will come out to about $180 billion, I think we would have a simple solution to the question of the Senator from Arizona. He very accurately portrays that if we are going to follow Gramm-Rudman-Hollings next year, instead of eliminating the Air Force trainer we may simply eliminate the Air Force or some large fraction of it.

Mr. DECONCINI. If the Senator will yield, and I appreciate his answer, it seems to me if we are talking about a $70 billion cut across the board, the defense budget being $29 billion-some and likely to be at least that much requested and approved for 1988. You are talking about a heck of a chunk of money out of the defense and national security because of Gramm-Rudman.

Mr. MOYNIHAN. I see no alternative but to say that is my understanding. You know, we can talk about abolishing the Marine Corps and pick up, I am sorry to say, only about $8 billion that way. You have to start thinking, can we do without an Air Force? That may give us a hidden insight into the negotiations in Reykjavik.

Mr. President, the desperation of our public financing is on display—Mr. President, may we have order?

The PRESIDING OFFICER. Let us have order in the Senate so the Senator from New York can be heard.

Mr. MOYNIHAN. I thank my friend.

I want to say that the question we have before us, as the junior Senator from Arizona makes so clear in his question, is we have in small detail, an example of a problem we are going to have to deal with in massive proportions in the years ahead if we give ourselves a situation where we cannot raise revenues. We must pay ever increasing debt service, which is eating us alive, and the necessary and desirable functions of government—and I think they are distinguishable—will slowly commence to erode.

The senior Senator from Arizona pleaded on the front page of the Los Angeles Times this morning, "Do we realize what we are doing?"

He was not one to ask for a sufficient defense simply when he was in opposition. He has asked for a sufficient defense when he is in the majority, and he has been right. He has had to see this inexorable machine slicing away at matters no one in the defense establishment, no one in the Senate, would reasonably ask to happen had we not created this condition of necessity in our own financing. We created the crisis and we thought we could get out of it by having a machine do it. We thought, as the distinguished senior Senator from Maryland has said, we could do all these cuts by "anonymous consent," that a machine would do it, the Comptroller General would do it. When the Supreme Court said that was not constitutional, we were faced with the most bizarre proposition of all, which is that the President's Office of Management and Budget would do it. Everyone would do it but us, we who have the constitutional responsibility.

Instead, we find ourselves dealing with measures such as the one before us.

Mr. President, I do not think the Senate should behave this way.

Here we are, and our primary responsibility is the power of the purse. For 5 centuries and more, the British Parliament struggled with the King to establish the fact that only the place of representative government could levy taxes and authorize expenditures. In 5 years we want to give those powers back to the crown in the person and in the institution of the Executive on the eve of the 200th anniversary of the Constitution. We lapse into a passive attitude of letting somebody else make the decision which we are constitutionally sworn to make but institutionally seemingly incapable of doing.

Mr. DECONCINI. Will the Senator yield for another question?

Mr. MOYNIHAN. I am happy to yield.

Mr. DECONCINI. I ask unanimous consent that I may ask a question without the Senator's losing his right to the floor.

The Senator from New York is pointing out that what is going to happen, in accordance with what our discussion was in the last question I asked, if there would be as much as a $70 billion need to try to satisfy the budget reduction. But as this thing proceeds down the path that the legislation calls for, we may not make that judgment. That judgment may be made by the fact that there is certain legislation on the books now and that means that the cuts come, and in defense they will take the biggest share of the cuts because they are the biggest share of the budget, and you and I and the rest of this body will not have the chance to cut on that. Is that what the Senator is saying?

Mr. MOYNIHAN. I think it is the hope of many that we will not have to vote on it, but we can say somebody else did it. That is the day when this institution, the United States Senate, which has grown over two centuries, will have somebody else make the decision, and we will thus ignore our constitutionally sworn duty.

Mr. DECONCINI. This is the legislative balancing of the budget which we are into, which will cause, if it comes about, real damage to our national security just as I feel today the T-46 cut causing damage to our national security which the Senator said will cause us to talk about wiping out the whole Air Force or at least half of it. Where are we going to be? Somebody else will make that decision. I have to agree with the Senator from New York, that that is not what this Senator feels. I appreciate his comments.

Mr. MOYNIHAN. I appreciate the comments of the Senator from Arizona.

Mr. President, we do not believe in this decision. The Senate is capable of providing funds for operations we deem necessary, but we have put ourselves into a form of passive acceptance of rules that have no real relation to reality, and then we come up against absurdities, such as taking a clearly necessary event—the development after a quarter of a century of a new training plane for the Air Force, after having spent a half-billion dollars on it—and saying, "Stop, stop, we cannot afford it."

Of course you are going to do it. You have to do it. You cannot afford not to. The training of Air Force pilots is the beginning and the absolutely indispensable condition of having manned aircraft in the Air Force. Here we are saying we cannot do that.

How do we get to this condition? How do we get to the circumstance where, as the first time since 1970, we break all the steady momentum, the necessary progressivity of a defense budget restoration which does not have to go on forever—indeed, should not go on forever—but ought to reach a steady state somewhere in the 1990's? Exactly as we predicted, it is being broken in mid-flight, and the consequences are going to be great and they are going to be enduring, and they are going to be denied. I will repeat that. They are going to be grave, they are going to be enduring, and they are going to be denied.

I look forward to a new variety of friend here in the Chamber who having spent the first half of their political lives in trying to resolve inadequacies of the defense policies of others by not providing enough will now proclaim the superiorities of their own policies which provide even less.

That will not work. The time will come when we will ask, "what happened and who did it?"

What happened is that in this body, in this decade, probably irresponsible mistakes were made, or if mistakes were made and then recognized and not changed, a profoundly irresponsible decision was made not to rectify them.

We are all capable of mistakes. It is one thing that is necessary to do, to recognize them and acknowledge them, and not to glory in them.

□ 2210

None of us desire that, nor should we.

Mr. President, the hours pass. It is now 10 minutes after 10 p.m. I see the distinguished chairman of the Committee on Appropriations is on the floor. I wonder if there is any possibility that we shall have some resolution of this matter before we enter a situation which would be critical and which need not be if we simply take this amendment down. I would like it if, without losing my right to the floor, I could yield to the Senator from Oregon. He is engaged in colloquy with the distinguished minority leader.

Seeing the Senator from Oregon, the chairman of the Committee on Appropriations, on the floor, I ask if, without yielding my right to the floor, he had some thoughts as to how we might proceed.

Mr. HATFIELD. Mr. President, I respond to the Senator from New York by saying that we are hopeful that in the next few minutes, we shall have an alternative, an option to what we are now considering.

Mr. MOYNIHAN. Well, that is good news. I hope by "the next few minutes," he means something like an hour and 47. Otherwise we will find ourselves in the sad situation of seeing the official existence of the U.S. Government expire, which we would not want to have happen and should not have happen and we will not have happen. We should be able to work this out. I have not known of a situation in which the Senator from Oregon was involved, in which there were strongly-held views, conflicting views which he could not somehow accommodate us.

The Senator from Mississippi, the master of that great art of accommodation, is present. So while we wait for that resolution, I would like to speak just a little more about this particular airplane that we are discussing.

The U.S. Air Force, in the most normal and professional manner, in the 1970's began to anticipate the need for a trainer to succeed the one which had begun development in the mid-1950's. The next generation trainer would be deployed in the late 1980's and early 1990's and would be in service well into the next century. The concerns about the T-37 were genuine, were professional. At that time, Lt. Gen. Kelly Burke, who was Deputy Chief of Staff of the Air Force for Research, Development, and Acquisition, testified before the House, in 1981, that "it worries us because we cannot predict with great precision when an aircraft is going to wear out."

The Senator from Arizona earlier today pointed out that aircraft have a long life and they have many more replacement parts than we do as individuals. Even so, there are stress factors, metal fatigue and things of that kind which are so structural to the aircraft that you did not want to put——

Mr. STENNIS. Mr. President, will the Senator yield to me so I can make a brief announcement?

Mr. MOYNIHAN. Yes, with great happiness, without yielding my right to the floor.

Mr. STENNIS. I thank the Senator.

Mr. President, we have had quite a few calls. Senators are waiting. Several have been waiting here concerning the pending matter, this bill that we have up. I think there has been some

progress made in getting some adjustments made there. If we could get to those now, I believe it would pay off very generously in time saved and sound suggestions, too. Of course, that would be handled by the Senator from Oregon. It would be well if we could send out the word.

Mr. MOYNIHAN. If I could say to my friend, the distinguished Senator from Mississippi, I understand the chairman of the Appropriations Committee to say that a resolution seemed about to be at hand and he will have something to say shortly, in a few minutes.

Mr. STENNIS. Well, he is making a trial run on something.

Mr. MOYNIHAN. Whatever he wishes, I shall be happy to accommodate him.

Mr. STENNIS. I thank the Senator and I thank the Senator from Oregon, too.

He is tied up in another way now.

Mr. MOYNIHAN. Well, that is what he is supposed to be doing.

Mr. STENNIS. Mr. President, I yield the floor.

Mr. MOYNIHAN. Mr. President——

Mr. DOLE addressed the Chair.

Mr. GRAMM addressed the Chair.

(Mr. DANFORTH assumed the chair.)

Mr. MOYNIHAN. Mr. President, I yielded the floor to the Senator from Mississippi. I am happy to yield to the majority leader.

Has the majority leader asked that I yield for a question without losing my right to the floor?

Mr. STENNIS. I thought they were ready, Mr. President, but it seems like it will take a little more time.

Mr. DOLE. I did not want to make a speech, but I do want to make a comment.

Mr. MOYNIHAN. Without losing my right to the floor——

Mr. DOLE. I wanted to announce that we are making progress. It is fairly hard to discern that. We are not certain ourselves, but we are going to announce that we are making progress.

I do believe we have worked out reconciliation. That has been completed now. So that is the remaining biggie that we have. I understand it has been worked out with Senator PACKWOOD and the chairman of the Ways and Means Committee, Mr. ROSTENKOWSKI, the Presiding Officer, and others. We appreciate that.

It is my understanding that we are going to set this aside at the appropriate time and try to go to other matters in disagreement. That is progress. I want my colleagues who may be wondering what we are doing and why we have not voted to know that it is still the intention of the chairman and the ranking member that we wind this up. I indicate that they are right. At midnight, the Government technically will close. That would not really happen, I guess, until tomorrow noon, according to OMB.

I am also of the impression that the House does not intend to send us any more short continuing resolutions. They can change their minds, but they would like to go home tomorrow. That is a funny thing, but they would like to go home. They may be a little reluctant to send us another extension. I hope we keep that in mind while we continue here.

I thank the Senator from New York.

Mr. MOYNIHAN. I thank the majority leader. The Senator from New York has four tickets for the World Series on Saturday night and two sons and one daughter-in-law. He would like, if not to go home, at least to go to New York for that occasion.

The Presiding Officer indicates—it is not the first indication I have had in these last few days—that perhaps he might be there or perhaps he would like provisions that make it possible for him to be there.

All these things are possible. As a matter of fact, the sooner we resolve this matter in favor of New York, the more box seats there are going to be available without any question. How can we doubt that a grateful State will want to respond with the courtesies that we like to think we are associated with and on occasion, we are?

I am holding the floor, Mr. President, in the absence of my colleague from New York and my colleague from Arizona—not for any purpose of prolonging this discussion, but rather awaiting the expected proposal.

Mr. GRAMM. Will the Senator yield?

Mr. MOYNIHAN. The Senator will not yield. He will yield for a question without losing his right to the floor.

Mr. GRAMM. Mr. President, the question is that there are others waiting to speak on this subject; I would like to ask unanimous consent that at the end of those speeches, the Senator have the floor back unless he just wants to control the floor for the remainder of the debate.

Mr. MOYNIHAN. The Senator wants to control the floor until his colleague from New York comes to the floor and his colleague from Arizona, who has not spoken and I do believe wishes to speak and is preparing himself to do that.

Mr. HATFIELD. Will the Senator yield for a question?

Mr. MOYNIHAN. I am happy to do that.

□ 2220

Mr. HATFIELD. The Senator indicated a while ago that he was waiting for perhaps another option to what we are now considering. I would inform the Senator if he would be willing to yield the floor for a unanimous-consent request——

Mr. MOYNIHAN. I am happy to.

Mr. HATFIELD.—I think we can then move to other matters that we must dispose of. Then we will return to this subject where the Senator from Arizona, the Senator from New York, and others have agreed to his procedure and will be in a position to make their comments.

Mr. MOYNIHAN. Mr. President, how can I propound a unanimous-consent request that would be in accordance with the distinguished chairman's proposal?

Mr. President, I ask unanimous consent that if I now could yield the floor so that we move to other amendments in disagreement, I believe that would be the case—is that the intention of the chairman?

Mr. GRAMM. Reserving the right to object——

Mr. MOYNIHAN. Why does the good Senator from Texas not let me make the request and then decide whether he wishes to object?

Mr. HATFIELD addressed the Chair.

Mr. MOYNIHAN. Mr. President, could I just continue?

The PRESIDING OFFICER. The Senator from New York has the floor.

Mr. HATFIELD. Will the Senator from New York yield to me to make a unanimous-consent request?

Mr. MOYNIHAN. Without yielding my right to the floor subsequently.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, before I ask unanimous consent, let me briefly explain what the overall strategy is at this time so as to explain more clearly why I am asking for this unanimous consent.

The Senate has acted on one of the five amendments that are in disagreement with the House of Representatives. We have four remaining, obviously. It is the expectation that we can dispose of these other amendments rather expeditiously, perhaps having at least one rollcall on one of these amendments that has been requested, and we can get that out of the way very quickly.

And then we would return to where we are now, but in returning to where we are now in terms of the current amendment No. 59, as amended by Senator ABDNOR, as amended by Senator GOLDWATER, that vehicle would remain then the vehicle for I know of two amendments, one by the Senator from Ohio, one by the Senator from Montana, and there may be others that I am not aware of who want to offer an amendment, and then that vehicle would be open at appropriate times as we dispose of one of those amendments to the amendment that is pending presently.

So that no one is being precluded from offering an amendment on other matters, they will have that vehicle.

As you know—Mr. President, if I am not correct, please correct me—no Senator is in a position at this moment to offer an amendment on another subject because the Goldwater pending amendment has to be disposed of, which then opens the Abdnor amendment for another secondary amendment from any other Senator.

So we are not foreclosing any possibility of other amendments being considered. But it would, I think, perhaps assist the body as a whole to move to some kind of a compromise and to resolve the issue at hand.

Mr. MOYNIHAN. Could I ask my friend just one question.

Mr. HATFIELD. Yes.

Mr. MOYNIHAN. Would it be possible for him to include in his request that at that point when the amendments in disagreement other than the one we are on have been disposed of, and we return to the one we are on, that I receive the floor again for the simple purpose basically of seeing that my friends from Arizona and New York have an opportunity to speak as well?

Mr. HATFIELD. Mr. President, I would include that but at the same time I might observe, if I am not mistaken, that there would be no way to accommodate Senators unless the Senator from South Dakota [Mr. ABDNOR] withdrew his amendment, which would bring down the Goldwater amendment, opening up everything.

Mr. METZENBAUM. Will the Senator from Oregon make the assurance to the Senator from Ohio which I previously had indicated that there will be a vehicle, if the Senator from South Dakota will not be taking down his amendment, so that those of us who wish to offer an amendment will not be put in the position——

Mr. HATFIELD. The Senator from South Dakota has assured me that he is going to insist on his amendment until it is disposed of in one way or another.

Mr. DECONCINI. Will the Senator from Oregon yield for a question?

Mr. HATFIELD. Yes, I will be happy to yield for a question.

Mr. DECONCINI. It is my understanding that the Senator is proposing a unanimous-consent request that we set aside the Abdnor-Goldwater amendments?

Mr. HATFIELD. In effect yes, but I am going to phrase it using amendment No. 59, which is the basic amendment that is being used as the vehicle on which to build these others.

Mr. DECONCINI. Now, if that is accomplished, then if the Senator from Ohio or someone else wanted to offer amendments they could do it to these other amendments in disagreement; is the Senator from Arizona correct?

Mr. HATFIELD. That is correct.

Mr. DECONCINI. And therefore if we come back to amendment No. 59 and the Goldwater and Abdnor amendments, we will just be where we are now?

Mr. HATFIELD. When we come back we are still on the Goldwater amendment that will have to be disposed of one way or another.

Mr. MOYNIHAN. And the Senator from New York will then assume the floor once again.

Mr. DECONCINI. Yes. If the Senator will yield for a further question, if I understand the request of the Senator from New York as part of the unanimous consent, when we come back on amendment No. 59 and the Goldwater-Abdnor amendments, the Senator from New York would then be recognized to have the floor and it would still be considered his first speech on the subject matter?

Mr. MOYNIHAN. This Senator has no desire other than to assure his colleague from New York and his colleague from Arizona have an opportunity to speak.

Mr. EXON. Reserving the right to object——

Mr. HATFIELD. I have not made the request yet.

Mr. EXON. Does the Senator want me to state what my potential objection would be if he does propound it?

Mr. HATFIELD. I would be happy to hear the Senator, yes.

Mr. EXON. Since 4 o'clock this afternoon this place has been tied up, and I do not know that anyone is trying to prevent either one of the Senators from New York or the Senator from Arizona or any other Senator from pursuing their interests, legitimate or otherwise, to protect defense industries in their States. But I do feel, since no one has been trying to shut off debate that I know of, that it might be appropriate to recognize some of us who do not happen to agree with their proposition. And I for one may object to the fact that we have been going through a charade here for a long, long time that is about to be successful in the Senate caving in, as it usually does, to unnecessary spending in defense or somewhere else, and I therefore, when the Senator propounds the request, may object only from the standpoint that the Senator from New York be recognized again for his stated purpose of attempting to turn the floor back to only one side of this debate. So I thought it would only be appropriate for this Senator to state what his objection might be.

Mr. HATFIELD. I thank the Senator for alerting me to the problem.

Mr. President, I will suggest the following, and I would ask hopefully that the Senator from New York would understand that we are trying to expedite as well as protect every other Senator and not deny any Senator any right.

Mr. President, I will propound two unanimous consent agreements hoping that one of them will be accepted, and I am asking for the most generous outpouring of spirit on all sides to the issue.

First, I would propose a unanimous consent request that we temporarily lay aside the amendment No. 59, which is the current amendment under consideration, as amended, in order that we may proceed to the consideration of the other remaining amendments, and that the Senator from New York be recognized when we return to the current amendment that would be set aside.

Mr. GRAMM. Reserving the right to object.

The PRESIDING OFFICER. The Senator from Texas.

Mr. GRAMM. Mr. President, I will object, because I have waited here for 2 hours to have an opportunity to respond while others are not being denied a voice. Nobody is trying to bring this to a vote, but I think for Members to continually hold the floor while entering into long dialogs, blaming the death of this poor plane that nobody wants to buy on Gramm-Rudman, is simply an abuse of the basic courtesies that we extend to each other.

□ 2230

I am going to object until I have simply 5 minutes—not 2 hours. I do not need equal time to respond to that argument. But until I have 5 minutes to respond to these arguments, I intend to object to all unanimous-consent requests, and I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HATFIELD. Mr. President, I now propound a second unanimous-consent request, and that is that we temporarily lay aside the current pending amendment, No. 59, in order that we may proceed to the consideration of the other amendments in disagreement.

Mr. GRAMM. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. HATFIELD. I have not included the Senator from New York's——

Mr. GRAMM. Will the Senator restate the request?

Mr. HATFIELD. I asked that we temporarily lay aside the pending amendment, No. 59, in order that we may proceed to the consideration of other amendments.

Mr. GRAMM. I withdraw my objection.

Mr. MOYNIHAN. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. MOYNIHAN. I can make another proposal. The Senator from

Texas asked that he have 5 minutes to speak on this matter. I would be happy, when we return to the subject, if I can have the floor, and the first thing I would do is ask unanimous consent to yield to the Senator from Texas 5 minutes or as much time as he wants.

Mr. HATFIELD. Mr. President, I ask unanimous consent that we temporarily lay aside the pending amendment, No. 59, in order that we may proceed to the consideration of other amendments; and that when we return to No. 59, the Senator from New York will be recognized as having the floor, and immediately thereafter the Senator from Texas would be yielded to by the Senator from New York for 15 minutes.

Mr. GRAMM. Five.

Mr. HATFIELD. Five minutes for his presentation.

Mr. MOYNIHAN. Without the Senator from new York losing his right to the floor.

Mr. HATFIELD. Certainly.

Mr. RUDMAN. Mr. President, reserving the right to object——

Mr. EXON. Mr. President, reserving the right to object——

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. RUDMAN. I object to an arrangement of any type. We are here now on a matter of importance to the country—this continuing resolution. I have heard a number of people on this floor—and I say this with the utmost respect to the Democratic leader, whom I respect deeply—talk about the management of time, and I have agreed with him on occasions, probably to his surprise.

Nobody is filibustering this except the Senators from New York. No one is saying that they cannot speak all night and into next week. But, quite frankly, I will take my direction from the President of the United States Senate, not from any Senator, as to my right to speak.

I do not like unanimous-consent agreements at this time of night, at the last hour, in which I have to, at my sufference, get permission to speak. So I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from New York.

Mr. HATFIELD. Mr. President, I have run out of unanimous-consent requests.

Mr. MOYNIHAN. Mr. President, we have had observations about the defense program generally in the course of this conversation this evening. I had not thought I would be speaking. I have not anything further to say in anticipation of a resolution which the Senator from Oregon said may shortly be at hand, and indeed it may shortly be at hand, in any event. But I would like to go back to a statement——

The PRESIDING OFFICER. If the Senator will withhold, the Senate is not in order.

The Senator from New York.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, I should like to go back, in the spirit of conciliation and in the hope that we are going to see this resolved, to make the point I did at the outset, when I referred to my comments yesterday in this regard. I said:

> I hate to say something I have not ever said before, I believe, on the floor, but the continuing resolution must pass as it is now written, or I cannot anticipate the time when we will be able to vote.

That was certainly a good faith statement. In 10 years in this Chamber, I have never made one such, that I am aware of, and I find myself speaking now, not out of any desire to prolong these activities—rather, in the expectation that we may be resolving them—but because others have made it impossible.

I see that the Senator from Arizona is on his feet.

Mr. President, would I be correct in saying that if I yield the floor—there are three Senators on their feet now. I would hope that I might allow the Senator from Arizona—not me allow; only the Presiding Officer can do that—but I hope he can contribute to the debate. He has been patiently waiting for that to be done since 9 o'clock.

In the expectation that goodwill will prevail, I yield the floor.

Mr. DECONCINI addressed the Chair.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. DECONCINI. I thank the Chair, and I thank the distinguished Senator from New York.

Mr. President, let me say that I have been here for an hour. The Senator from New York has been discussing at great length the economic problems this country faces as it relates to the T-46, but also as it relates to our defense.

Although I missed the first few minutes of the Senator's remarks, I compliment him on what he has laid out, because I think it has been excellent to understand why we are even discussing tonight the T-46.

Mr. President, amid all the discussions and debate on the T-46, there are several facts about which there can be no disagreement.

First, the Air Force needs something other than the present fleet of T-37 aircraft to meet its current and future training requirements.

Second, a new generation trainer was defined by the Air Force some years ago. A competition was held, and the Fairchild T-46 emerged the clear winner. That was the competitive basis, not sole sourcing. I should note here that the GAO substantiated the results of that competition.

Third, while there is no dispute about the facts that the program in its formative stage was troubled in a number of ways, it is equally clear that the manufacturer has taken the steps necessary to eliminate virtually all those problems.

Fourth, there can be no doubt that the economics of the situation—from the standpoint of what the American taxpayer has already invested in this program, as well as the projected relative costs of the alternatives—all reflect favorably on the T-46.

I would like to elaborate on each of these facts, the sum total of which is an extremely compelling argument for the T-46.

First, the Air Force needs something other than the T-37 trainer.

In 1979, during the Carter administration, the Deputy Secretary of Defense approved an Air Force Mission Element Needs Statement for a T-37 replacement. The replacement was accorded a "priority no less than equal to producing the prime weapons systems."

The T-37 shortcomings cited in this and subsequent Air Force statements remain valid today as they did in 1979. Among the deficiencies was that it was approaching the end of the service life with pilot shortfalls after 1988—that is a short time away, a year and a half—excessive fuel consumption and related high costs; excessive maintenance and related high costs; engine noise double that allowed by Federal aviation regulations; limited range/endurance; limited to altitudes below 25,000 feet; limited weather capability. That plane has flown in Arizona a lot. We do not have a lot of problem weather, but our pilots once they are trained have to be able to fly in all kinds of weather; out dated instruments. That was part of the problem of the T-46.

I would submit to my colleagues that one could hardly make a more comprehensive case for replacing the T-37 than that needs study that was put out by the Air Force and demonstrated that the T-37 had seen its day.

Second, the T-46 won the original competition for the replacement and is still the answer to the Air Force's training problem.

This statement requires no further elaboration, for as the following remarks illustrate, the T-46 test flight program is proving that the next generation trainer aircraft can meet or exceed the ambitious programmatic and financial goals set out for it. To quote the Congressional Research Service: "Both the Fairchild T-46 and Cessna T-37 are twin-engine, two-seat aircraft with the side-by-side seating of instructor and trainee that the Air Force prefers (in contrast to the Navy's preference for front-to-back

tandem seating). The T-46 has better performance capabilities than the T-37 in many respects, with a range of 1,200 vs. 500 nautical miles (nmi), a speed of 430 vs. 370 knots (nmi/h), and an altitude of 47,000 vs 25,000 ft. In contrast to the T-37, the T-46 has a pressurized cockpit, improved ejector-seats and avionics, and the more fuel-efficient F-109 turbofan engine."

Third, manufacturer has overcome early difficulties. The Commander of the Air Force Contracts Management Division, Major General Weiss, recently noted the remarkable turnaround at Fairchild. This resulted from substantial corrective actions—actions initiated and paid for by the company. They did a number of things and let me cite some of them. They appointed a new company president. Any of us who have been involved in the corporate world know that is not something easy and is just not done overnight. They promoted capable employees from within that have proven capacity.

They sold $200 million of corporate assets to provide needed funds so that they could complete this project. They invested over $110 million of stockholder funds in the T-46A Program. They devoted additional personnel to the program. They ordered new major equipment. They improved communication from top to middle management.

They increased skills and supervisory training.

They increased emphasis on quality, safety, and schedule rather than on cost only.

They strengthened the quality analysis function as part of their whole operation.

This effort resulted in a highly favorable GAO report on the T-46 Program. Defense News boldly stated: "A Clean Bill of Health." Defense Daily headlined, "GAO Issues Favorable Report on Fairchild T-46A." The New York Times reported, "Cancelled Jet Apparently Met Air Force Needs."

Mr. HATFIELD. Mr. President, will the Senator yield for a question?

Mr. DECONCINI. I am happy to yield.

Mr. HATFIELD. The Senator will yield so I might propound a unanimous-consent request without the Senator losing his right to the floor and following the request and the approval of the request hopefully the Senator would have the floor back.

Mr. DECONCINI. And still be considered as a first speech on the subject matter.

Mr. HATFIELD. Yes.

Mr. President, I propose the unanimous-consent request that we temporarily lay aside the amendment No. 59, the current pending amendment, in order that we may take up other amendments on this list and that when we return to No. 59, the Senator from Arizona will have his right to the floor.

Mr. DECONCINI. The Senator will add, it will still be considered the first speech on the subject matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I thank the Chair and I thank the Senator from Arizona.

AMENDMENT IN DISAGREEMENT TO NO. 117

The PRESIDING OFFICER. The clerk will report the next amendment in disagreement.

The assistant legislative clerk read as follows:

The House recedes and concurs with an amendment in Senate amendment No. 117.

The amendment of the House to Senate amendment numbered 117 follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 117 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

SEC. 155. Section 5 of the Outer Continental Shelf Lands Act (43 U.S.C. 1334) is amended (without regard to the limitation contained in section 102) by adding at the end the following new subsection:

"(j)(1) Any rig, platform, or other structure used for the purpose of exploration or production of oil and gas on the Outer Continental Shelf south of 49 degrees North latitude shall be built—

"(A) in the United States either by a United States chartered corporation or a joint venture between a United States chartered corporation and a foreign corporation, with at least 50 percent of total man hours expended in the United States; and

"(B) from articles, materials, or supplies at least 50 percent of which by cost, shall have been mined, produced, or manufactured, as the case may be, in the United States.

"(2) The requirements of paragraph (1) shall not apply to any rig, platform, or other structure which was built, which is being built, or for which a building contract has been executed, or on before October 1, 1986, and shall expire with respect to any rig, platform, or other structure for which either the bidding or award process has commenced on or after September 30, 1991.

"(3) The Secretary may waive—

"(A) the requirement in paragraph (1)(B) whenever the Secretary determines that 50 percent of the articles, materials, or supplies for a rig, platform, or other structure cannot be mined, produced, or manufactured, as the case may be, in the United States; and

"(B) the requirement in paragraph (1)(A) upon application, with respect to any classification of rigs, platforms, or other structures on a specific lease, when the Secretary determines that at least 50 percent of such classification, as calculated by number and by weight, which are to be built for exploration or production activities under such lease will be built in the United States in compliance with the requirements of paragraph (1)(A).".

Mr. HATFIELD. No. 117 is the amendment the Chair will report.

The PRESIDING OFFICER. That is correct.

Mr. HATFIELD. Mr. President, I am now going to ask for a unanimous consent request that has been again cleared by the major parties, that we have a 20-minute time agreement to be equally divided under control of the two managers of the bill on No. 117 that has now been reported and that I would then respond to the request of a number of Senators that we have a rollcall vote.

I would have that as a vote on a tabling motion that I will make on No. 117.

So that is the strategy that I want to lay out clearly for any questions before I either propound the request for time agreement or before I would make a motion to table the amendment.

Mr. HEINZ. Mr. President, will the Senator yield for an inquiry?

Mr. HATFIELD. I am happy to yield for a question.

Mr. HEINZ. Is amendment 117 the so-called Buy America offshore drilling amendment?

Mr. HATFIELD. The Senator from Pennsylvania is correct and had informed me that he wished to be heard on the amendment. That is why I am asking for the 20 minutes to be equally divided.

Mr. HEINZ. It is the view of the Senator from Pennsylvania that that should be an adequate amount of time, and I appreciate the Senator from Oregon's willingness to insure that there be a vote on it. I appreciate that very much.

Mr. CHAFEE. Mr. President, will the Senator yield?

Mr. HATFIELD. I am happy to yield for a question. I am going to hold the floor.

Mr. CHAFEE. Yes; a question. I would like to be heard in opposition to the Buy America amendment for, say, 4 minutes.

Is there going to be adequate time for that in what you propounded, 20 minutes equally divided?

Mr. HATFIELD. Mr. President, 20 minutes equally divided, and I do not want to cut anyone off and, again, if we have to go further, certainly we would have unanimous consent to go further than that time. I would not object to a reasonable extension.

Mr. CHAFEE. Except you cannot guarantee that you are going to get the unanimous consent. I notice that the Presiding Officer would like some time. It is my understanding he would like 4 minutes also.

Mr. McCLURE. He said 3.

Mr. HATFIELD. We seek to accommodate everyone in a reasonable timeframe to be heard on this subject. We will not make that broad invitation for Senators to come to be heard.

Mr. CHAFEE. We are not expecting an invitation this time of night. People

have to move forward. Those who are awake are welcome to be heard.

Mr. HATFIELD. Did the Senator understand, too, there will be a motion to table this and the yeas and nays will be asked on that?

Mr. CHAFEE. May I understand this: the motion will be to table the House amendment.

As long as the manager will guarantee this Senator 4 minutes, the Presiding Officer 3 minutes, that is all I have to ask at this time.

Mr. HATFIELD. I will guarantee only within the timeframe I will be allowed under the unanimous-consent request. If a Senator at that point wanted to extend it he will ask his own unanimous consent and I will not object to 2 or 3 minutes more.

Mr. CHAFEE. Let me ask of this manager, does he know of any other Senator who desires to speak?

Mr. HATFIELD. No.

I only know of one Senator, the Senator from Ohio, who I believe wanted to say a few words briefly.

Mr. CHAFEE. In opposition or favor of the amendment?

Mr. METZENBAUM. If I speak it will be in the same side as the Senator from Pennsylvania, in favor if I speak.

Mr. CHAFEE. Who is going to control the time in opposition?

Mr. HATFIELD. The two managers of the bill, or I would be very happy to designate Senators on my side, the Senator from Ohio, for instance, who wants to speak in favor of it, the Senator from Rhode Island wants to speak in opposition. I will be very happy to suggest to the manager that we yield the time to those two Senators.

Mr. CHAFEE. Mr. President, I ascertain that there are two others.

Mr. HATFIELD. A half hour. Would the Senator feel more confortable with a half hour equally divided?

Mr. CHAFEE. I think that would be fair.

Mr. DOMENICI. Good.

Mr. HATFIELD. Now, Mr. President, if there is no other request about this unanimous consent request on time.

□ 2250

Mr. President, I now ask unanimous consent that on amendment No. 117 debate the limited to one-half hour, equally divided between the Senator from Ohio and the Senator from Rhode Island.

Mr. BYRD. Mr. President, I reserve the right to object. I do have a Senator who wishes to speak. We are trying to inquire as to how much time he would want. Therefore, I could not agree at the moment. I wonder if the Senator could proceed and be speaking on the amendment.

AMENDMENT IN DISAGREEMENT TO NO. 124

Mr. HATFIELD. Mr. President, may I ask unanimous consent to temporarily lay aside No. 117 in order that we may go to No. 4 on the list?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The House recedes and concurs with an amendment to Senate amendment No. 124.

The text of the amendment in disagreement follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 124 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert:

TITLE VI—METROPOLITAN WASHINGTON AIRPORTS

SEC. 6001. SHORT TITLE.

This title may be cited as the "Metropolitan Washington Airports Act of 1986".

SEC. 6002. FINDINGS.

The Congress finds that—

(1) the two federally owned airports in the metropolitan area of Washington, District of Columbia, constitute an important and growing part of the commerce, transportation, and economic patterns of the Commonwealth of Virginia, the District of Columbia, and the surrounding region;

(2) Baltimore/Washington International Airport, owned and operated by the State of Maryland, is an air transportation facility that provides service to the greater Metropolitan Washington region together with the two federally owned airports, and timely Federal-aid grants to Baltimore/Washington International Airport will provide additional capacity to meet the growing air traffic needs and to compete with other airports on a fair basis;

(3) the Federal Government has a continuing but limited interest in the operation of the two federally owned airports, which serve the travel and cargo needs of the entire Metropolitan Washington region as well as the District of Columbia as the national seat of government;

(4) operation of the Metropolitan Washington Airports by an independent local agency will facilitate timely improvements at both airports to meet the growing demand of interstate air transportation occasioned by the Airline Deregulation Act of 1978 (Public Law 95-504; 92 Stat. 1705);

(5) all other major air carrier airports in the United States are operated by public entities at the State, regional, or local level;

(6) any change in status of the two airports must take into account the interest of nearby communities, the traveling public, air carriers, general aviation, airport employees, and other interested groups, as well as the interests of the Federal Government and State governments involved;

(7) in recognition of a perceived limited need for a Federal role in the management of these airports and the growing local interest, the Secretary has recommended a transfer of authority from the Federal to the local/State level that is consistent with the management of major airports elsewhere in the Nation;

(8) an operating authority with representation from local jurisdictions, similar to authorities at all major airports in the United States, will improve communications with local officials and concerned residents regarding noise at the Metropolitan Washington Airports;

(9) a commission of congressional, State, and local officials and aviation representatives has recommended to the Secretary that transfer of the federally owned airports be as a unit to an independent authority to be created by the Commonwealth of Virginia and the District of Columbia; and

(10) the Federal interest in these airports can be provided through a lease mechanism which provides for local control and operation.

SEC. 6003. PURPOSE.

(a) IN GENERAL.—It is therefore declared to be the purpose of the Congress in this title to authorize the transfer of operating responsibility under long-term lease of the two Metropolitan Washington Airport properties as a unit, including access highways and other related facilities, to a properly constituted independent airport authority created by the Commonwealth of Virginia and the District of Columbia, in order to achieve local control, management, operation, and development of these important transportation assets.

(b) INCLUSION OF BWI NOT PRECLUDED.—Nothing in this title shall be construed to prohibit the Airports Authority and the State of Maryland from entering into an agreement whereby Baltimore/Washington International Airport may be made part of a regional airports authority, subject to terms and conditions agreed to by the Airports Authority, the Secretary, the Commonwealth of Virginia, the District of Columbia, and the State of Maryland.

SEC. 6004. DEFINITIONS.

In this title—

(1) ADMINISTRATOR.—The term "Administrator" means the Administrator of the Federal Aviation Administration.

(2) AIRPORTS AUTHORITY.—The term "Airports Authority" means the Metropolitan Washington Airports Authority, a public body to be created by the Commonwealth of Virginia and the District of Columbia consistent with the requirements of section 6007.

(3) EMPLOYEES.—The term "employees" means all permanent Federal Aviation Administration personnel employed on the date the lease under section 6005 takes effect by the Metropolitan Washington Airports, an organization within the Federal Aviation Administration.

(4) METROPOLITAN WASHINGTON AIRPORTS.—The term "Metropolitan Washington Airports" means Washington National Airport and Washington Dulles International Airport.

(5) SECRETARY.—The term "Secretary" means the Secretary of Transportation.

(6) WASHINGTON DULLES INTERNATIONAL AIRPORT.—The term "Washington Dulles International Airport" means the airport constructed under the Act entitled "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770), and includes the Dulles Airport Access Highway and Right-of-way, including the extension between the Interstate Routes I-495 and I-66.

(7) WASHINGTON NATIONAL AIRPORT.—The term "Washington National Airport" means the airport described in the Act entitled "An Act to provide for the administration of the Washington National Airport, and for other purposes", approved June 29, 1940 (54 Stat. 686).

SEC. 6005. LEASE OF METROPOLITAN WASHINGTON AIRPORTS.

(a) AUTHORITY TO ENTER INTO LEASE.—The Secretary is authorized to enter into a lease of the Metropolitan Washington Airports with the Airports Authority for a 50-year term and to enter into any related agreement necessary for the transfer of authority and property to the Airports Authority. Authority to enter into a lease and agreement under this section shall lapse two years after the date of the enactment of this title.

(b) PAYMENTS.—

(1) LEASE PAYMENTS.—The lease shall provide for the Airports Authority to pay to the general fund of the Treasury annually an amount, computed using the GNP Price Deflator, to equal $3,000,000 in 1987 dollars. The Secretary and the Airports Authority may renegotiate the level of lease payments attributable to inflation costs every ten years.

(2) RETIREMENT OBLIGATIONS.—

(A) DISCONTINUED SERVICE.—Not later than one year after the lease takes effect, the Airports Authority shall pay to the Treasury of the United States, to be deposited to the credit of the Civil Service Retirement and Disability Fund, an amount determined by the Office of Personnel Management to represent the actual added costs incurred by the Fund due to discontinued service retirement under section 8336(d)(1) of title 5, United States Code, of employees who elect not to transfer to the Airports Authority.

(B) UNFUNDED LIABILITY.—Not later than one year after the lease takes effect, the Airports Authority shall pay to the Treasury of the United States, to be deposited to the credit of the Civil Service Retirement and Disability Fund, an amount determined by the Office of Personnel Management to represent the present value of the difference between (i) the future cost of benefits payable from the Fund and due the employees covered under section 6008(e) of this title that are attributable to the period of employment following the date the lease takes effect, and (ii) the contributions made by the employees and the Airports Authority under section 6008(e). In determining the amount due, the Office of Personnel Management shall take into consideration the actual interest such amount can be expected to earn when invested in the Treasury of the United States.

(c) MINIMUM TERMS AND CONDITIONS.—The Airports Authority shall agree, at a minimum, to the following conditions and requirements in the lease:

(1) OPERATION OF AIRPORTS AS A UNIT.—The Airports Authority shall operate, maintain, protect, promote, and develop the Metropolitan Washington Airports as a unit and as primary airports serving the Metropolitan Washington area.

(2) AIRPORT PURPOSES.—The real property constituting the Metropolitan Washington Airports shall, during the period of the lease, be used only for airport purposes. For the purposes of this paragraph, the term "airport purposes" means a use of property interests (other than a sale) for aviation business or activities, or for activities necessary or appropriate to serve passengers or cargo in air commerce, or for nonprofit, public use facilities. If the Secretary determines that any portion of the real property leased to the Airports Authority pursuant to this Act is used for other than airport purposes, the Secretary shall (A) direct that appropriate measures be taken by the Airports Authority to bring the use of such portion of real property in conformity with airport purposes, and (B) retake possession of such portion of real property if the Airports Authority fails to bring the use of such portion into a conforming use within a reasonable period of time, as determined by the Secretary.

(3) AIP REQUIREMENTS.—The Airports Authority shall be subject to the requirements of section 511(a) of the Airport and Airway Improvement Act of 1982 and the assurances and conditions required of grant recipients under such Act as of the date the lease takes effect. Notwithstanding section 511(a)(12) of such Act, all revenues generated by the Metropolitan Washington Airports shall be expended for the capital and operating costs of such airports.

(4) CONTRACTS.—In acquiring by contract supplies or services for an amount estimated to be in excess of $200,000, or awarding concession contracts, the Airports Authority shall obtain, to the maximum extent practicable, full and open competition through the use of published competitive procedures. By a vote of seven members, the Airports Authority may grant exceptions to the requirements of this paragraph.

(5) CONTINUATION OF REGULATIONS.—

(A) IN GENERAL.—Except as provided in subparagraph (B), all regulations of the Metropolitan Washington Airports (14 C.F.R. part 159) shall become regulations of the Airports Authority on the date the lease takes effect and shall remain in effect until modified or revoked by the Airports Authority in accordance with procedures of the Airports Authority.

(B) EXCEPTIONS.—The following regulations shall cease to be in effect on the date the lease takes effect:

(i) section 159.59(a) of title 14, Code of Federal Regulations (relating to new-technology aircraft); and

(ii) section 159.191 of title 14, Code of Federal Regulations (relating to violations of Federal Aviation Administration regulations as Federal misdemeanors).

(C) OPERATIONS.—The Airports Authority may not increase or decrease the number of instrument flight rule takeoffs and landings authorized by the High Density Rule (14 C.F.R. 93.121 et seq.) at Washington National Airport on the date of the enactment of this Act and may not impose a limitation after the date the lease takes effect on the number of passengers taking off or landing at Washington National Airport.

(6) TRANSFER OF RIGHTS, LIABILITIES, AND OBLIGATIONS.—

(A) IN GENERAL.—Except as specified in subparagraph (B) of this paragraph, the Airports Authority shall assume all rights, liabilities, and obligations (tangible and incorporeal, present and executory) of the Metropolitan Washington Airports on the date the lease takes effect, including leases, permits, licenses, contracts, agreements, claims, tariffs, accounts receivable, accounts payable, and litigation relating to such rights and obligations, regardless whether judgment has been entered, damages awarded, or appeal taken. Before the date the lease takes effect, the Secretary shall also assure that the Airports Authority has agreed to cooperate in allowing representatives of the Attorney General and the Secretary adequate access to employees and records when needed for the performance of functions related to the period before the effectiveness of the lease. The Airports Authority shall assume responsibility for the Federal Aviation Administration's Master Plans for the Metropolitan Washington Airports.

(B) EXCEPTIONS.—The procedure for disputes resolution contained in any contract entered into on behalf of the United States before the date the lease takes effect shall continue to govern the performance of the contract unless otherwise agreed to by the parties to the contract. Claims for monetary damages founded in tort, by or against the United States as the owner and operator of the Metropolitan Washington Airports, arising before the date the lease takes effect shall be adjudicated as if the lease had not been entered into.

(C) PAYMENTS INTO EMPLOYEES' COMPENSATION FUND.—The Federal Aviation Administration shall remain responsible for reimbursing the Employees' Compensation Fund, pursuant to section 8147 of title 5, United States Code, for compensation paid or payable after the date the lease takes effect in accordance with chapter 81 of title 5, United States Code, with regard to any injury, disability, or death due to events arising before such date, whether or not a claim has been filed or is final on such date.

(D) COLLECTIVE BARGAINING RIGHTS.—The Airports Authority shall continue all collective bargaining rights enjoyed before the date the lease takes effect by employees of the Metropolitan Washington Airports.

(7) AUDITS.—The Comptroller General of the United States may conduct periodic audits of the activities and transactions of the Airports Authority in accordance with generally accepted management principles, and under such rules and regulations as may be prescribed by the Comptroller General. Any such audit shall be conducted at such place or places as the Comptroller General may deem appropriate. All books, accounts, records, reports, files, papers, and property of the Airports Authority shall remain in possession and custody of the Airports Authority.

(8) CODE OF ETHICS.—The Airports Authority shall develop a code of ethics and financial disclosure in order to assure the integrity of all decisions made by its board of directors and employees.

(9) RESTRICTION ON USE OF CERTAIN REVENUES.—Notwithstanding any other provision of law, no landing fee imposed for operating an aircraft or revenues derived from parking automobiles—

(A) at Washington Dulles International Airport may be used for maintenance or operating expenses (excluding debt service, depreciation, and amortization) at Washington National Airport; or

(B) at Washington National Airport may be used for maintenance or operating expenses (excluding debt service, depreciation, and amortization) at Washington Dulles International Airport.

(10) GENERAL AVIATION FEES.—The Airports Authority shall compute the fees and charges for landing general aviation aircraft at the Metropolitan Washington Airports on the same basis as the landing fees for air carrier aircraft, except that the Airports Authority may require a minimum landing fee not in excess of the landing fee for aircraft weighing 12,500 pounds.

(11) OTHER TERMS.—The Secretary shall include such other terms and conditions applicable to the parties to the lease as are consistent with and carry out the provisions of this title.

(d) SUBMISSION TO CONGRESS.—The Secretary shall submit the lease entered into under this section to Congress. The lease may not take effect before the passage of (1) 30 days, or (2) 10 days in which either

House of Congress is in session, whichever occurs later.

(e) ENFORCEMENT OF LEASE PROVISIONS.—The district courts of the United States shall have jurisdiction to compel the Airports Authority and its officers and employees to comply with the terms of the lease. An action may be brought on behalf of the United States by the Attorney General, or by any aggrieved party.

SEC. 6006. CAPITAL IMPROVEMENTS, CONSTRUCTION, AND REHABILITATION.

(a) IMPROVEMENTS.—It is the sense of the Congress that the Airports Authority should—

(1) pursue the improvement, construction, and rehabilitation of the facilities at Washington Dulles International Airport and Washington National Airport simultaneously; and

(2) to the extent practicable, cause the improvement, construction, and rehabilitation proposed by the Secretary to be completed at both of such Airports within 5 years after the earliest date on which the Airports Authority issues bonds under the authority required by section 6007 of this title for any such improvement, construction, or rehabilitation.

(b) SECRETARY'S ASSISTANCE.—The Secretary shall assist the three airports serving the Washington, D.C. metropolitan area in planning for operational and capital improvements at those airports and shall accelerate consideration of applications for Federal financial assistance by whichever of the three airports is most in need of increasing airside capacity.

SEC. 6007. AIRPORTS AUTHORITY.

(a) POWERS CONFERRED BY VIRGINIA AND THE DISTRICT OF COLUMBIA.—The Airports Authority shall be a public body corporate and politic, having the powers and jurisdiction as are conferred upon it jointly by the legislative authority of the Commonwealth of Virginia and the District of Columbia or by either of the jurisdictions and concurred in by the legislative authority of the other jurisdiction, but at a minimum meeting the requirements of this section.

(b) PURPOSE.—The Airports Authority shall be—

(1) independent of the Commonwealth of Virginia and its local governments, the District of Columbia, and the Federal Government; and

(2) a political subdivision constituted solely to operate and improve both Metropolitan Washington Airports as primary airports serving the Metropolitan Washington area.

(c) GENERAL AUTHORITIES.—The Airports Authority shall be authorized—

(1) to acquire, maintain, improve, operate, protect, and promote the Metropolitan Washington Airports for public purposes;

(2) to issue bonds from time to time in its discretion for public purposes, including the purposes of paying all or any part of the cost of airport improvements, construction, and rehabilitation, and the acquisition of real and personal property, including operating equipment for the airports, which bonds—

(A) shall not constitute a debt of either jurisdiction or a political subdivision thereof; and

(B) may be secured by the Airports Authority's revenues generally, or exclusively from the income and revenues of certain designated projects whether or not they are financed in whole or part from the proceeds of such bonds;

(3) to acquire real and personal property by purchase, lease, transfer, or exchange, and to exercise such powers of eminent domain within the Commonwealth of Virginia as are conferred upon it by the Commonwealth of Virginia;

(4) to levy fees or other charges; and

(5) to make and maintain agreements with employee organizations to the extent that the Federal Aviation Administration is so authorized on the date of enactment of this title.

(d) CONFLICT-OF-INTEREST PROVISIONS.—The Airports Authority shall be subject to a conflict-of-interest provision providing that members of the board and their immediate families may not be employed by or otherwise hold a substantial financial interest in any enterprise that has or is seeking a contract or agreement with the Airports Authority or is an aeronautical, aviation services, or airport services enterprise that otherwise has interests that can be directly affected by the Airports Authority. Exceptions to requirements of the preceding sentence may be made by the official appointing a member at the time the member is appointed, if the financial interest is fully disclosed and so long as the member does not participate in board decisions that directly affect such interest. The Airports Authority shall include in its code developed under section 6005(c)(8) of this title the standards by which members will determine what constitutes a substantial financial interest and the circumstances under which an exception may be granted.

(e) BOARD OF DIRECTORS.—

(1) APPOINTMENT.—The Airports Authority shall be governed by a board of directors of 11 members, as follows:

(A) five members shall be appointed by the Governor of Virginia;

(B) three members shall be appointed by the Mayor of the District of Columbia;

(C) two members shall be appointed by the Governor of Maryland; and

(D) one member shall be appointed by the President with the advice and consent of the Senate.

The Chairman shall be appointed from among the members by majority vote of the members and shall serve until replaced by majority vote of the members.

(2) RESTRICTIONS.—Members shall (A) not hold elective or appointive political office, (B) serve without compensation other than for reasonable expenses incident to board functions, and (C) reside within the Washington Standard Metropolitan Statistical Area, except that the member appointed by the President shall not be required to reside in that area.

(3) TERMS.—Members shall be appointed to the board for a term of 6 years, except that of members first appointed—

(A) by the Governor of Virginia, 2 shall be appointed for 4 years and 2 shall be appointed for 2 years;

(B) by the Mayor of the District of Columbia, 1 shall be appointed for 4 years and 1 shall be appointed for 2 years; and

(C) by the Governor of Maryland, 1 shall be appointed for 4 years.

(4) REMOVAL OF PRESIDENTIAL APPOINTEES.—A member of the board appointed by the President shall be subject to removal by the President for cause.

(5) REQUIRED NUMBER OF VOTES.—Seven votes shall be required to approve bond issues and the annual budget.

(f) BOARD OF REVIEW.—

(1) COMPOSITION.—The board of directors shall be subject to review of its actions and to requests, in accordance with this subsection, by a Board of Review of the Airports Authority. Such Board of Review shall be established by the board of directors and shall consist of the following, in their individual capacities, as representatives of users of the Metropolitan Washington Airports:

(A) two members of the Public Works and Transportation Committee and two members of the Appropriations Committee of the House of Representatives from a list provided by the Speaker of the House;

(B) two members of the Commerce, Science, and Transportation Committee and two members of the Appropriations Committee of the Senate from a list provided by the President pro tempore of the Senate; and

(C) one member chosen alternately from members of the House of Representatives and members of the Senate, from a list provided by the Speaker of the House or the President pro tempore of the Senate, respectively.

The members of the Board of Review shall elect a chairman. A member of the House of Representatives or the Senate from Maryland or Virginia and the Delegate from the District of Columbia may not serve on the Board of Review.

(2) TERMS.—Members of the Board of Review appointed under subparagraphs (A) and (B) of paragraph (1) shall be appointed for terms of six years, except that of the members first appointed, one member under each of subparagraphs (A) and (B) shall be appointed for a term of two years and one member under each of subparagraphs (A) and (B) shall be appointed for a term of four years. Members of the Board of Review appointed under subparagraph (C) shall be appointed for terms of two years. A vacancy in the Board shall be filled in the same manner in which the original appointment was made. Any member appointed to fill a vacancy before the expiration of the term for which his or her predecessor was appointed shall be appointed only for the remainder of such term.

(3) PROCEDURES.—The Board of Review shall establish procedures for conducting its business. The procedures may include requirements for a quorum at meetings and for proxy voting. The Board shall meet at least once each year and shall meet at the call of the chairman or 3 members of the Board. Any decision of the Board of Review under paragraph (4) or (5) shall be by a vote of 5 members of the Board.

(4) DISAPPROVAL PROCEDURE.—

(A) SUBMISSION REQUIRED.—An action of the Airports Authority described in subparagraph (B) shall be submitted to the Board of Review at least 30 days (or at least 60 days in the case of the annual budget) before it is to become effective.

(B) ACTIONS AFFECTED.—The following are the actions referred to in subparagraph (A):

(i) the adoption of an annual budget;

(ii) the authorization for the issuance of bonds;

(iii) the adoption, amendment, or repeal of a regulation;

(iv) the adoption or revision of a master plan, including any proposal for land acquisition; and

(v) the appointment of the chief executive officer.

(C) 30-DAY DISAPPROVAL PERIOD.—If the Board of Review does not disapprove an action within 30 days of its submission under this paragraph, the action may take effect. If the Board of Review disapproves any such action, it shall notify the Airports

Authority and shall give reasons for the disapproval.

(D) EFFECT OF DISAPPROVAL.—An action disapproved under this paragraph shall not take effect. Unless an annual budget for a fiscal year has taken effect in accordance with this paragraph, the Airports Authority may not obligate or expend any money in such fiscal year, except for (i) debt service on previously authorized obligations, and (ii) obligations and expenditures for previously authorized capital expenditures and routine operating expenses.

(5) REQUEST FOR CONSIDERATION OF OTHER MATTERS.—The Board of Review may request the Airports Authority to consider and vote, or to report, on any matter related to the Metropolitan Washington Airports. Upon receipt of such a request the Airports Authority shall consider and vote, or report, on the matter as promptly as feasible.

(6) PARTICIPATION IN MEETINGS OF AIRPORTS AUTHORITY.—Members of the Board of Review may participate as nonvoting members in meetings of the board of the Airports Authority.

(7) STAFF.—The Board of Review may hire two staff persons to be paid by the Airports Authority. The Airports Authority shall provide such clerical and support staff as the Board may require.

(8) LIABILITY.—A member of the Board of Review shall not be liable in connection with any claim, action, suit, or proceeding arising from service on the Board.

(g) CERTAIN ACTIONS TO BE TAKEN BY REGULATION.—Any action of the Airports Authority changing, or having the effect of changing, the hours of operation of or the type of aircraft serving either of the Metropolitan Washington Airports may be taken only by regulation of the Airports Authority.

(h) LIMITATION ON AUTHORITY.—If the Board of Review established under subsection (f) is unable to carry out its functions under this title by reason of a judicial order, the Airports Authority shall have no authority to perform any of the actions that are required by paragraph (f)(4) to be submitted to the Board of Review.

SEC. 6008. FEDERAL EMPLOYEES AT THE METROPOLITAN WASHINGTON AIRPORTS.

(a) EMPLOYEE PROTECTION.—Not later than the date the lease under section 6005 takes effect, the Secretary shall ensure that the Airports Authority has established arrangements to protect the employment interests of employees during the 5-year period beginning on such date. These arrangements shall include provisions—

(1) which ensure that the Airports Authority will adopt labor agreements in accordance with the provisions of subsection (b) of this section;

(2) for the transfer and retention of all employees who agree to transfer to the Airports Authority in their same positions for the 5-year period commencing on the date the lease under section 6005 takes effect except in cases of reassignment, separation for cause, resignation, or retirement;

(3) for the payment by the Airports Authority of basic and premium pay to transferred employees, except in cases of separation for cause, resignation, or retirement, for 5 years commencing on the date the lease takes effect at or above the rates of pay in effect for such employees on such date;

(4) for credit during the 5-year period commencing on the date the lease takes effect for accrued annual and sick leave and seniority rights which have been accrued during the period of Federal employment by transferred employees retained by the Airports Authority; and

(5) for an offering of not less than one life insurance and three health insurance programs for transferred employees retained by the Airports Authority during the 5-year period beginning on the date the lease takes effect which are reasonably comparable with respect to employee premium cost and coverage to the Federal health and life insurance programs available to employees on the day before such date.

(b) LABOR AGREEMENTS.—

(1) ADOPTION.—The Airports Authority shall adopt all labor agreements which are in effect on the date the lease under section 6005 takes effect. Such agreements shall continue in effect for the 5-year period commencing on such date, unless the agreement provides for a shorter duration or the parties agree to the contrary before the expiration of that 5-year period. Such agreements shall be renegotiated during the 5-year period, unless the parties agree otherwise. Any labor-management negotiation impasse declared before the date the lease takes effect shall be settled in accordance with chapter 71 of title 5, United States Code.

(2) CONTINUATION.—The arrangements made pursuant to this section shall assure, during the 50-year lease term, the continuation of all collective bargaining rights enjoyed by transferred employees retained by the Airports Authority.

(c) RIGHTS OF TERMINATED EMPLOYEES.—Any transferred employee whose employment with the Airports Authority is terminated during the 5-year period beginning on the date the lease under section 6005 takes effect shall be entitled, as a condition of any lease entered into in accordance with section 6005 of this title, to rights and benefits to be provided by the Airports Authority that are similar to those such employee would have had under Federal law if termination had occurred immediately before such date.

(d) ANNUAL AND SICK LEAVE.—Any employee who transfers to the Airports Authority under this section shall not be entitled to lump-sum payment for unused annual leave under section 5551 of title 5, United States Code, but shall be credited by the Airports Authority with the unused annual leave balance on the date the lease under section 6005 takes effect, along with any unused sick leave balance on such date. During the 5-year period beginning on such date, annual and sick leave shall be earned at the same rates permitted on the day before such date, and observed official holidays shall be the same as those specified in section 6103 of title 5, United States Code.

(e) CIVIL SERVICE RETIREMENT.—Any Federal employee who transfers to the Airports Authority and who on the day before the date the lease under section 6005 takes effect is subject to subchapter III of chapter 83 of title 5, United States Code, or chapter 84 of such title shall, so long as continually employed by the Airports Authority without a break in service, continue to be subject to such subchapter or chapter, as the case may be. Employment by the Airports Authority without a break in continuity of service shall be considered to be employment by the United States Government for purposes of such subchapter and chapter. The Airports Authority shall be the employing agency for purposes of such subchapter and chapter and shall contribute to the Civil Service Retirement and Disability Fund such sums as are required by such subchapter and chapter.

(f) SEPARATED EMPLOYEES.—An employee who does not transfer to the Airports Authority and who does not otherwise remain a Federal employee shall be entitled to all of the rights and benefits available under Federal law for separated employees, except that severance pay shall not be payable to an employee who does not accept an offer of employment from the Airports Authority of work substantially similar to that performed for the Federal Government.

(g) ACCESS TO RECORDS.—The Airports Authority shall allow representatives of the Secretary adequate access to employees and employee records of the Airports Authority when needed for the performance of functions related to the period before the date the lease under section 6005 takes effect. The Secretary shall provide the Airports Authority access to employee records of transferring employees for appropriate purposes.

SEC. 6009. RELATIONSHIP TO AND EFFECT OF OTHER LAWS.

(a) OTHER LAWS.—In order to assure that the Airports Authority has the same proprietary powers and is subject to the same restrictions with respect to Federal law as any other airport except as otherwise provided in this title, during the period that the lease authorized by section 6005 of this title is in effect—

(1) the Metropolitan Washington Airports shall be considered public airports for purposes of the Airport and Airway Improvement Act of 1982 (49 App. U.S.C. 2201 et seq.); and

(2) the Acts entitled "An Act to provide for the administration of the Washington National Airport, and for other purposes", approved June 29, 1940 (54 Stat. 686), "An Act to authorize the construction, protection, operation, and maintenance of a public airport in or in the vicinity of the District of Columbia", approved September 7, 1950 (64 Stat. 770), and "An act making supplemental appropriations for the support of the Government for the fiscal year ending June 30, 1941, and for other purposes", approved October 9, 1940 (54 Stat. 1030), shall not apply to the operation of the Metropolitan Washington Airports, and the Secretary shall be relieved of all responsibility under those Acts.

(b) INAPPLICABILITY OF CERTAIN LAWS.—The Metropolitan Washington Airports and the Airports Authority shall not be subject to the requirements of any law solely by reason of the retention by the United States of the fee simple title to such airports or by reason of the authority of the Board of Review under subsection 6007(f).

(c) POLICE POWER.—The Commonwealth of Virginia shall have concurrent police power authority over the Metropolitan Washington Airports, and the courts of the Commonwealth of Virginia may exercise jurisdiction over Washington National Airport.

(d) PLANNING.—

(1) IN GENERAL.—The authority of the National Capital Planning Commission under section 5 of the Act of June 6, 1924 (40 U.S.C. 71d) shall not apply to the Airports Authority.

(2) CONSULTATION.—The Airports Authority shall consult—

(A) with the National Capital Planning Commission and the Advisory Council on Historic Preservation before undertaking any major alterations to the exterior of the main terminal at Washington Dulles International Airport, and

(B) with the National Capital Planning Commission before undertaking development that would alter the skyline of Washington National Airport when viewed from the opposing shoreline of the Potomac River or from the George Washington Parkway.

(e) OPERATION LIMITATIONS.—

(1) HIGH DENSITY RULE.—The Administrator may not increase the number of instrument flight rule takeoffs and landings authorized for air carriers by the High Density Rule (14 C.F.R. 93.121 et seq.) at Washington National Airport on the date of the enactment of this title and may not decrease the number of such takeoffs and landings except for reasons of safety.

(2) ANNUAL PASSENGER LIMITATIONS.—The Federal Aviation Administration air traffic regulation entitled "Modification of Allocation: Washington National Airport" (14 C.F.R. 93.124) shall cease to be in effect on the date of the enactment of this title.

SEC. 6010. AUTHORITY TO NEGOTIATE EXTENSION OF LEASE.

The Secretary and the Airports Authority may at any time negotiate an extension of the lease entered into under section 6005(a).

SEC. 6011. SEPARABILITY.

Except as provided in section 6007(h), if any provision of this title or the application thereof to any person or circumstance, is held invalid, the remainder of this title and the application of such provision to other persons or circumstances shall not be affected thereby.

SEC. 6012. NONSTOP FLIGHTS.

PERIMETER RULE.—An air carrier may not operate an aircraft nonstop in air transportation between Washington National Airport and another airport that is more than 1,250 statute miles away from Washington National Airport.

Mr. HATFIELD. Mr. President, I move that the Senate concur in the House amendment to Senate amendment No. 124.

Mr. METZENBAUM. Mr. President, would the Senator be good enough to tell us what that is?

Mr. HATFIELD. This is the amendment on the Dulles-National Airport.

Mr. BYRD. Mr. President, who has the floor?

The PRESIDING OFFICER. The Senator from Oregon.

Mr. BYRD. Would the Senator put in a quorum so that we can get a Senator on the phone?

Mr. HATFIELD. Mr. President, may I then ask unanimous consent to temporarily lay aside No. 124? I so make that request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The clerk will report the next amendment.

The assistant legislative clerk read as follows:

The House insists on its disagreement with Senate Amendment No. 23.

Mr. HATFIELD. Mr. President, No. 23 is the amendment dealing with a cap on farm payments that was insisted on by the House. I now move that the Senate recede from its amendment which would then, in effect, establish the House position.

The PRESIDING OFFICER. The question is on the motion.

Mr. CHAFEE. Could I ask the manager of the bill, what are these caps? What is the limitation?

Mr. HATFIELD. The limitation is $250,000.

Mr. CHAFEE. Per recipient?

Mr. HATFIELD. That is correct.

Senator COCHRAN is the chairman of the subcommittee.

Mr. COCHRAN. Mr. President, if the Senator will yield, the chairman has accurately answered. It is payment limitation put on the CR by the House of Representatives.

Mr. CHAFEE. Are there any provisions preventing people from setting up all sorts of, if you want to call them, dummy corporations so that they can get multiple payments of $200,000 or one-quarter of a million dollars? Any limitation?

Mr. COCHRAN. There is no limitation except that for individual payment benefit purposes there is a $50,000 payment limitation that is a matter of law in the 1985 farm bill. This amendment does not seek to amend that in any respect. An entity is defined as a person or a partnership or a corporation.

So, to respond to the Senator's question, this amendment does not seek to reform or impose any new restrictions or redefine entities entitled to those benefits.

Mr. ANDREWS. Would my colleague yield?

Mr. COCHRAN. The Senator from Rhode Island has the floor.

Mr. CHAFEE. I am not sure I understand. Currently in the law there is a $50,000 payment limitation for individuals.

Mr. COCHRAN. The Senator is correct.

Mr. CHAFEE. For cotton, wheat payments. What is the $250,000 cap?

Mr. COCHRAN. If the Senator will yield, this is a limitation on payments defined very elaborately by the House in an amendment that we recommended be rejected and has been rejected all along by the Senate. It is loosely defined. And I will say to the Senator, if he is looking for an amendment to support that would seek to restrict, as I know he would like to restrict, these payments, this is not it. It has been estimated that this is going to reduce the cost of the Farm Program by about $26 million.

So you can see, by comparison of that figure with the total cost of $30 billion, that there is not going to be much restriction on payments.

Mr. CHAFEE. It is pretty loose.

Mr. ANDREWS. Would my colleague yield?

Mr. CHAFEE. Yes.

Mr. ANDREWS. What we are trying to do, however, is to get away from these multimillion dollar payments we are reading about in the papers. As my colleague, the Senator from Mississippi points out, this in no way changes the $50,000 payment limitation for payments that we now have. It does put a $250,000 overall cap on the assemblage of payments that have been giving us all these newspaper headlines. I think it would do us a lot of good in the farm country to make sure that these abuses that have been written up time after time cease, which is the reason we hope we can get this amendment agreed to.

Mr. CHAFEE. Thank you.

The PRESIDING OFFICER. The question is on the motion.

Mr. BYRD addressed the Chair.

The PRESIDING OFFICER. The minority leader.

Mr. BYRD. Mr. President, I yield to the distinguished Senator from Nebraska.

Mr. EXON. Could I inquire as to what the motion is?

The PRESIDING OFFICER. The motion is to recede from the Senate amendment No. 23.

Mr. EXON. Mr. President, I see that the filibuster has paid off once again. I have been on this floor for most of the last 5 or 6 hours. I am going to take about 10 or 15 minutes to explain to the Senate why they are making the wrong move.

It is always clear, is it not, that if we can just hang on long enough and talk long enough about what we need to do to take care of a certain constituency, we can get the job done in the U.S. Senate, regardless of what it does to the defense program.

Now, there have been speeches made on this floor that the U.S. Air Force has indicated that if we buy this airplane for them, the airplane we are talking about here, that all kinds of negotiations are going on about, that if we buy this airplane, what they are going to do is they would put it in the boneyard; they would not use it.

Well, when we get back to this matter of the trainer airplane, I would hope that the Members of the U.S. Senate would understand that under the constraints that we are going to be under in the years to come on the whole matter of procurement for the Air Force, the Navy, the Army, the Marines, and the other departments of our armed services, we are going to have to start exercising some restraint on how they do things. If we go ahead and cave in on the T-46, as we seem to be moving toward slowly but surely, we are going to continue to authorize the use of three trainer planes for beginning pilots. The T-37 and the T-46 for the Air Force, the latter the Air Force says they do not want, do not need, will not use and put in a boneyard if we buy it for them. Meanwhile, the Navy goes merrily ahead with their T-46, the Navy trainer.

We are talking about the basic training aircraft the pilots of our services go into in the initial instance. It seems to me that what we should do when we get back to the trainer matter—and I throw this in now for consideration for those who are making the compromise that we are or are not going to accept—that this would be a good time for us to say no. This would be a good time for us to say, "Let us not do anything more with the T-46 now. Let us direct the Pentagon, the Secretary of Defense, the Secretaries of the various services, to come forth within the next 6 months and agree on one trainer aircraft, one trainer aircraft, that could be used for the beginning trainer of all of the various services." What is wrong with that?

□ 2300

I do not think there is anything wrong with it except the Congress has not had the courage to stand up to the various demands of the various services. They all want a trainer aircraft built only to their specifications. I do not know what aircraft Tom Cruise used in portraying that great pilot in the popular movie today called Top Gun, but whatever that trainer was, it must have been a pretty good one if they turn out the Tom Cruises of the world to serve the national defense needs of the United States of America.

I would simply hope that we would realize and recognize that because of the various pressures that are brought to bear in the Congress that we have had great evidence of here tonight to protect every defense industry in every State in the Union, we have so proliferated our defense expenditures and our procurement policies, both as a Congress to the extent that even the executive branch and the Pentagon itself cannot stop any kind of a program whether they want it or not, and whether they say they are going to send it right to the boneyard, if I can believe, and I do believe, my distinguished friend from Arizona, the chairman of the Armed Services Committee.

I would simply say, Mr. President, that this is the time maybe for a historic turn in the U.S. Senate.

If we could have a little order, Mr. President.

This is a time, Mr. President, when we turn to the consideration of this trainer aircraft for the U.S. Senate to take a historic move and say enough is enough is enough. We do not need three trainer aircraft for the training of beginning pilots. We only need one. And you, Pentagon, come forth and tell us which one you want. Maybe it is the T-46. I do not have any serious feelings about that one way or the other. Maybe the Air Force will change their mind and decide not to send it to the boneyard.

Maybe we should put whatever trainer we come up with and under whatever specification, put it up for bid to all of the possible contractors so we can get the cost down. If we could do that, we would save billions and billions and billions of taxpayers' dollars because not only would we buy the airplanes cheaper, but we would not have to buy the expensive simulators, the hundreds of simulators that we have to train the pilots on the simulators before they get into the three different trainers we have.

Mr. President, I simply say that I think the discussion on the T-46 tonight indicates that there is hardly any kind of a defense program that we cannot develop enough constituency for and if we cannot develop the constituency for it we can always handle it through a filibuster in the U.S. Senate, supposedly the most deliberative body in the world.

I will not take any more time now. I have been patiently waiting to make these brief remarks that I hope a few people will listen to. While the discussions are going on to hurry through this, and get the CR passed which I agree is necessary, I hope maybe for just once, maybe just once, Mr. President, we would say let us not go ahead and authorize a T-46 for expenditures when the measure was not authorized by the authorizing committee; namely, the Armed Services Committee.

I yield the floor.

The PRESIDING OFFICER. The question is on the motion.

Mr. HARKIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSE AMENDMENT TO SENATE AMENDMENT NO. 124

Mr. HATFIELD. Mr. President, I ask unanimous consent that we temporarily lay aside the current pending amendment No. 23 in order that we may go to amendment No. 124 which has now been cleared on both sides of the aisle.

Mr. BYRD. Yes. Mr. President, that amendment a little while ago I had to clear with two Senators. That has been done. So there is no objection.

Mr. METZENBAUM. Mr. President, would the Senator tell us——

Mr. HATFIELD. This is the airport one.

Mr. METZENBAUM. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

The assistant legislative clerk read as follows:

The House recedes and concurs with Senate Amendment No. 124, with an amendment.

Mr. HATFIELD. Mr. President, I move the Senate concur in the House amendment to Senate amendment No. 124.

The motion was agreed to.

Mr. DOLE. I move to reconsider the vote by which the motion was agreed to.

Mr. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF THE HOUSE TO SENATE AMENDMENT NO. 23

Mr. HATFIELD. Mr. President, I ask unanimous consent that the Senate turn to the consideration of amendment No. 23.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report.

Mr. HATFIELD. Mr. President, would the Chair state the motion that is now pending on this amendment at the current moment?

The PRESIDING OFFICER. The clerk will report the amendment first.

The assistant legislative clerk read as follows:

The House insists upon its disagreement with the Senate amendment No. 23.

The PRESIDING OFFICER. The Senator's motion is to recede from the Senate amendment.

Mr. HATFIELD. I thank the Chair.

Mr. HARKIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Iowa.

Mr. HARKIN. Mr. President, parliamentary inquiry: Is the motion to recede to the House position?

The PRESIDING OFFICER. It is a motion to recede from the Senate position.

Mr. HARKIN. Mr. President, I rise in support of the motion to recede to the House position in this matter of the payment limitation of $250,000 which the House had put on, a cap on payments to farmers under the present farm bill.

I want to point out, Mr. President, that under the existing payment cap and listening to part of the debate in my office, there is some confusion as to why there is a $50,000 payment limitation, and yet farmers are getting upwards of maybe 50——

Mr. STENNIS. Mr. President, the Senate is not in order.

The PRESIDING OFFICER (Mr. STEVENS). The Senator is correct. The Senate is not in order.

The Senator will suspend.

The Senator from Iowa.

Mr. HARKIN. Mr. President, thank you.

There is some confusion I think among those who have not been around the farm program for a long time as to why we have a $50,000 payment limitation, and yet, we read stories about large farms getting as much as $15 or $20 million in payments. That is because in the last farm bill that passed the Congress a number of provisions were added which opened a lot of loopholes to get around the $50,000 payment limitation. I would just read a list of those again just to inform Members as to how they get around these payment limitations.

The following payments that go to farmers that are not included in the $50,000 payment limitation: deficiency payments and land diversion payments, No. 1; disaster payments, No. 2; the so-called Findley payments, No. 3; inventory reduction payments, No. 4; gain from marketing loans, No. 5; loan deficiency payments, No. 6; resource adjustment and public access payments, No. 7; also No. 8, nonrecourse loans.

Mr. President, the amendment added on the House side would effectively cover all of those eight exemptions that I just mentioned with one exception. That exception is a loophole that can be big enough to drive a Mack truck through. That is the exception for the nonrecourse loans.

Mr. President, again I am supporting the Senate's position in receding to the House because I believe it is better than what we have right now.

□ 2310

But I do not want any Senator to believe that adopting the House position is going to limit payments to every farmer to a maximum of $250,000 because it simply will not do that.

I do not want anyone to think they are going to vote for this and say, "Well, that is the end of it, no farmer can get more than $250,000."

What will happen is that the loophole that is left is the nonrecourse loans.

Normally I would not be in favor of limiting nonrecourse loans at all. However, under the new program in the farm bill, the nonrecourse loan program is being used as a payment program, especially when you couple it with the marketing loan program.

Therefore, the nonrecourse loan program really becomes a payment program and not a loan payment as it was first envisioned.

I know to many Senators that may sound very convoluted, but I wanted to make the record on this point, that the $250,000 cap is not an absolute cap. It will take care of about seven of the exemptions that are in the bill now. That is a big step in the right direction.

But the big culprit is the nonrecourse loan coupled with the marketing loan program, which is allowing many of these large farms to get these $15 and $20 million payments.

Again, it is, as I said, a step in the right direction.

I know the hour is late and I know that Senators want to get on to other business and bring this continuing resolution to a close, but there is one other issue that I want to bring up because it closely correlates with these huge payments that farmers are getting.

I am one of those who believe very strongly that come next year, early next year, we are going to be under the gun in trying to save anything resembling a farm program.

One of the reasons is because we are going to see headlines next month, the month after, December and January, when the final payments come in, we are going to see the Boswell Farm in California getting a payment of $20 million; we are going to see other farms getting $15, $5, $6 million. People will say, "What do you mean farmers are going broke? Farmers are not going broke. Look, they are getting multi-million-dollar payments."

I think adopting this amendment will not solve the problem this year but at least it will help solve the problem next year, as we go into next year.

One other thing I think is going to hurt us is the use of PIK certificates and the way they are being used right now.

As I say, this is not directly into this amendment but it strongly correlates to this amendment.

We have a situation right now in the countryside where farmers are making more money by rolling PIK certificates around than from selling their crops. Yesterday corn was selling in Iowa for $1 a bushel.

What farmers are doing is they are going into the local ASCS office and getting the loan rate of $1.85 and then they are buying PIK certificates, let us say at $1.55. They are using the PIK certificates to pay off their loan and they are walking out of the ASCS office with 30 cents a bushel in their pocket and they still have all the grain which they are going to dump on the marketplace at the present prices.

This is not the time or place to debate that issue but I only wanted to bring it up to point out that we are going to see a plethora of stories between now and next January about big deficiency payments to farmers, and we will hear more about farmers who walk into an ASCS office and 10 minutes later walk out with $30,000 in their pockets and still have all the grain.

It is a scam of the worst sort. It is depressing the marketplace prices. It is doing nothing to resolving the problems that we have out there. We will march right down the same road next year.

I make these comments only to alert Senators that early next year we are going to have to make some very drastic changes in the existing farm bill, some drastic changes.

The PRESIDING OFFICER. Will the Senator withhold? The Senate is not in order.

The Senator from Iowa.

Mr. HARKIN. I thank the Chair.

Again I say that we have to take these steps. We have to take this first step of receding to the House, but we are going to have to take some next steps early next year to make some drastic changes in the farm bill if we hope to preserve anything at all of any kind of a farm program for our beleaguered farmers in the countryside.

I will sum up by saying this, that the $250,000 payment limitation is a big step in the right direction, but I do not want any Senator to believe that no farmer will ever receive a payment of over $250,000 because they will, because there is one big loophole left in it which is the nonrecourse loan coupled with the marketing loan program. Hopefully, maybe next year we can take the step to close that loophole also.

Mr. ANDREWS. Mr. President, I totally agree with what my colleague has said. I think it ought to be pointed out that my colleague and I in the Appropriations Committee meeting, discussed this proposed payment limitation that had a few more teeth in it. My amendment, as amended by the Senator from Iowa, ended up being an amendment that would have had those teeth that he talks about now, but it failed by a one-vote margin.

So this is what we have, and it is, as the Senator from Iowa points out quite properly, a step in the right direction because if these excessive payments continue, we are going to see it extremely difficult to hold a farm program of any type next year.

Mr. HARKIN. If the distinguished Senator will yield, I thank the Senator for making those comments. I only want to make it clear here that it was the distinguished Senator from North Dakota who really first proposed this in committee. I did join with him in that effort to try to get that done. It was the Senator from North Dakota who first pointed out quite clearly the different loopholes that existed, those seven or eight loopholes that existed in the law. We attempted, as the distinguished Senator from North Dakota said, or he attempted, to get more teeth into it. He lost it, if I am not mistaken, by, I think, one vote.

The distinguished Senator from North Dakota has really done yeoman's work on this in bringing this to the attention of the Senate. I want to thank him publicly for all of his efforts in this regard, to bring some sanity to this kind of payment pro-

gram. I compliment the Senator from North Dakota for his actions in this regard.

Mr. ANDREWS. I appreciate the comments of the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. HATFIELD. Mr. President, I am now informed by one of our colleagues that he would request a rollcall on this amendment, the Senator from Arkansas.

So, Mr. President, in order to alert those Senators who may not be on the Hill at the moment that a rollcall will be taken on this amendment, I would like to suggest a procedure by which we lay this aside temporarily and go back to take up an agreement that we will propound on the No. 117, the Buy America, which has now been cleared on both sides of the aisle for a unanimous-consent request.

Therefore, I ask unanimous consent that we—I wonder if I can have the attention of the Senator from Arkansas.

Would the Senator from Arkansas like to put the request in for the yeas and nays now or wait until after we return to the amendment?

Mr. BUMPERS. It is absolutely immaterial to me, Mr. President. I will defer to the chairman.

Mr. HATFIELD. I suggest that we ask for the yeas and nays at this time.

Mr. HARKIN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Senator from Iowa has the floor. Does he yield for that purpose?

Mr. HATFIELD. I will not put that request at this time.

Mr. METZENBAUM. Will the Senator yield?

Mr. HATFIELD. I yield.

Mr. METZENBAUM. He knows he will have a rollcall on the Buy America amendment. Does the Senator think he can work it out so that both of those rollcalls can be one after another?

Mr. HATFIELD. That is precisely what we are attempting to do. I believe that most of the comments have been made on the pending amendment No. 23, the agriculture amendment. I am told that there will have to be a period of time given for alerting Senators off the Hill before any rollcall can begin.

Therefore, not to waste that time, we would like to move now to the half-hour request for the Buy America, which we can now give the alert in, take that half hour that is required to make that alert possible, and then have this amendment of Buy America and move back to amendment 23.

Mr. METZENBAUM. I thank the Senator.

□ 2320

Mr. HATFIELD. Mr. President, I believe I have made a unanimous-consent request to temporarily lay aside amendment No. 23 and take up No. 117.

The PRESIDING OFFICER. Is there objection to the Senator's request to temporarily lay aside this amendment and take up the amendment that deals with Buy America concepts?

Is there objection to the Senator's request?

Mr. EXON. Reserving the right to object, Mr. President, does this mean that we are closing off debate on the farm amendment?

The PRESIDING OFFICER. There is no such request pending before the Chair.

Mr. EXON. So if we want some additional time to debate the farm amendment, we could come back to that, is that correct?

Mr. HATFIELD. Yes, Mr. President.

Mr. EXON. I have no objection.

The PRESIDING OFFICER. Is there objection to the Senator's request? Without objection, it is so ordered.

This amendment (No. 23) is temporarily laid aside.

We will take up amendment numbered 117.

HOUSE AMENDMENT TO SENATE AMENDMENT NUMBERED 117

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The House concurs with an amendment to Senate amendment numbered 117.

Mr. HATFIELD. Mr. President, I ask unanimous consent that a half-hour time limit be agreed to, to be equally divided between the Senator from Ohio [Mr. METZENBAUM] and the Senator from Rhode Island [Mr. CHAFEE].

The PRESIDING OFFICER. Is there objection to the Senator's request? Hearing no objection, it is so ordered.

Mr. HATFIELD. Mr. President, I inquire of the Chair at this time, it is my intention to offer a tabling motion with the yeas and nays. I would like to make that motion now, if I understand the situation, but still provide for the debate.

The PRESIDING OFFICER. That would take unanimous consent. That would not be in order until all time has been used or yielded back.

Mr. HATFIELD. I ask unanimous consent that I may make such a motion.

The PRESIDING OFFICER. Is there objection to the request? Hearing no objection, it is so ordered.

Mr. HATFIELD. Mr. President, with the understanding that debate will proceed, I now move to table the House amendment to the Senate amendment numbered 117.

The PRESIDING OFFICER. Does the Senator wish for the yeas and nays?

Mr. HATFIELD. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. There are 30 minutes' time on this amendment. Who yields time?

Mr. CHAFEE. Mr. President, I yield myself 4 minutes.

Mr. President, the Buy America provision in the House-passed continuing resolution regarding offshore oil rigs is bad for American trade. If put into effect, this provision could amount to a complete ban on imports of vessels and platforms used for oil exploration and production on the Outer Continental Shelf. While in the short term, accepting this provision may result in more contracts for a few American firms, in the long run, it undoubtedly will hurt our international trade. Also, Mr. President, I want to stress this: It undoubtedly will lead to retaliation on the part of our international trading partners. In the long term, this provision will hurt, not help, American business.

Mr. President, I think we have been down this track before and clearly, by taking an action such as is proposed in the reconciliation measure, we are going to hurt, not help, American jobs. That is what we are trying to do, provide for more American jobs. The Buy America legislation of this sort is a violation of our obligations under the General Agreement on Tariffs and Trade, the so-called GATT. A likely consequence of this protectionist legislation is the prospect of mirror legislation by our trading partners. And why should they not?

This quickly becomes a vicious circle. If the United States were to pass this measure, other governments such as the United Kingdom, Norway, the Netherlands, and Denmark, all of which have offshore rigs, would have little choice but to reciprocate by excluding or severely limiting United States exploration or production equipment in their respective countries.

This legislation does not help American industry. On the contrary, retaliation will reduce business opportunities abroad and set a dangerous precedent for other restrictive procurement practices. So I urge my colleagues to join with me in striking this provision from the continuing resolution.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, does the Senator from Pennsylvania wish to be recognized?

Mr. HEINZ. Mr. President, I ask for 4 minutes.

Mr. METZENBAUM. I yield 4 minutes to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized for 4 minutes.

Mr. HEINZ. Mr. President, let me describe very briefly what the House amendment is that we are debating. It is an amendment to give American firms, American labor, American materials a preference in the construction of offshore drilling rigs, the kind of rigs and platforms that we use to explore and complete wells off the continental United States. This is extremely important technology. It is very sensitive, important technology. It is vital to our national security.

The problem is a very simple one. We have not been able to win an award of a drilling rig since 1982. Since 1979, there has been a total of 10 oil rigs awarded. We have won exactly one of them. The Japanese won six, the Koreans have won five. Two of them have been in other parts of the world.

You might ask, why should we worry about this? If the Koreans or the Japanese are making these rigs more cheaply, if they can sell them to our people more cheaply, what is the problem? The problem is that they are cheating. The problem is that they are dumping and subsidizing. And you do not have to take my word for it. Ten months ago, I said that it was my judgment that there were subsidies and dumping by the Japanese and the Koreans, the two suppliers. I could not prove that case last year when we debated this same amendment. Today, I can prove that case because Japan has been found to be dumping; Korea has been found to be dumping. A hefty 22 percent dumping of subsidy margin has been determined.

Mr. President, fair is fair. But when two countries engage in the kind of unfair trading practices that, for all intents and purposes, wipe out not only these jobs, not only these purchases vital to many industries, but wipe out our ability to replicate this technology, it is time to do something about it. That is the purpose of the House amendment.

Let me make one last point—two points. I heard an argument that there would be something improper about this. I direct my colleagues' attention to article 21 of the GATT, which contains a specific national security exemption for issues of this kind. It has also been argued that were we to prevail with this amendment, somebody would retaliate against us. Mr. President, there are essentially only two countries that are selling us these rigs. Let me just say there are no United States drilling rigs being sold to Japan and Korea. And if, by some stretch of the imagination, they should ever find oil off of Japan or off of Korea, if anybody thinks the Japanese or the Koreans would ever let the Americans, the French, the British or anybody else bid on these platforms, they have another think coming.

□ 2330

I thank my colleague from Ohio for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. JOHNSTON. Mr. President, will the Senator yield me 3 minutes?

Mr. CHAFEE. Which side is the Senator going to be on?

Mr. JOHNSTON. Against Buy America.

Mr. CHAFEE. I yield 3 minutes to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for 3 minutes.

Mr. JOHNSTON. Mr. President, ordinarily I would be on the side of Buy American because I think this country has been made a chump in a lot of its trade policy. But, Mr. President, I wonder if all of my colleagues from all of the country recognize how sick this oil industry really is. It is on its very last legs. There are no wells being drilled offshore at this particular time. There is one rather rich area off California, probably the richest area in the country. But there is no real competition off California. You still have Exxon and Chevron and Standard Oil that are interested in that area. Shell has withdrawn from the area because they say it is, No. 1, too expensive; No. 2, too big a pain to fool with the Californians and all their regulations, so they have withdrawn altogether.

Now, what we do, Mr. President, by putting in a Buy American provision is double the cost of drilling offshore. Why do I say doubling the cost? Because an API study indicates that the cost of a platform is one-half the cost of offshore exploration. A full one-half of the cost is the cost of that platform. Now, last year Exxon purchased two offshore platforms for $100 million. They actually got a bid from Kaiser Steel which was for $200 million. So that the cost from Kaiser was exactly twice what it was to buy those platforms offshore.

Mr. President, what you have is half the cost is the cost of the platform. If you put in this Buy American provision, you are going to double the cost.

Well, now that sounds like a pretty good deal because we will create American jobs, right? Wrong. All you are going to do is drive these people out of the country and what last prospect there is for drilling off the Outer Continental Shelf of the United States is going to be gone, just as simple as that, because without this Buy American provision you have already had Shell Oil Co., one of the biggest international oil companies in the world, that has withdrawn altogether.

Mr. President, the point has been made, but it bears repeating, that this would violate the GATT agreements and it would call for retaliation under GATT by other countries against us.

This is the one area, probably the only area I know of where our trade agreements are working. Last year ITA ruled——

The PRESIDING OFFICER. The Senator's time has expired.

Mr. JOHNSTON. One minute.

Last year ITA ruled for the steel industry and enacted tariffs from 9 to 21 percent against Koreans and others. So this is one area where the trade laws are working.

One final point, Mr. President, and this I think ought to be the real clincher. That is that this is a category one veto bait item. The President has indicated that this, and I think one other item, will cause a veto of this bill. Now, if we want to put ourselves through the self-flagellation of a late night session, enacting a bill and having to come back tomorrow, Friday or Saturday or whenever the vetoed bill returns, then this is the way to do it. Let us do the right thing and kill this Buy American provision.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

Mr. METZENBAUM. I yield 4 minutes to the Senator from Pennsylvania.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized for 4 minutes.

Mr. SPECTER. Mr. President. I rise in support of this Buy American provision. The propriety of this provision, Mr. President, I think is established because it is the U.S. Government which is doing the leasing. There are property rights which inhere in our Government and it is fair and appropriate for the Government to make a determination as to the circumstances of the drilling and to impose this Buy American provision.

I associate myself with the remarks of my distinguished colleague from Pennsylvania, Senator HEINZ, on the very basic point that we need a Buy American provision to achieve fundamental justice.

The Koreans and the Japanese and others who are commanding these contracts at the present time are engaging in subsidies and in dumping, and when the distinguished Senator from Louisiana comments about having the price one-half, that is because these other countries are engaging in predatory pricing practices. Free tade means fair trade and that is the cost of production plus a reasonable profit. Korea and Japan in gaining these contracts are not engaging in fair trade practices or in free trade practices. That is why the Congress of the United States ought to insist that these Buy American provisions be inserted.

Mr. President, this is one issue of a larger program. We have not taken an appropirately rough stand in our dealings in international trade to insist on two basic propositions consistent with free trade principles. One is that there ought to be reciprocity. If Japan wants access to United States markets, we ought to have equal access to Japanese markets, and we do not have that access. The second point, again consistent with free trade principles, is that we ought not be victimized by subsidies and dumping which are costing tens of thousands of jobs in the steel industry, of one, a subject about which Senator HEINZ and I, as Senators from a steel-producing State, or once a steel-producing State, are very much concerned.

If we had a trade policy which gave basic justice to the steel industry and which did not allow the steel industry to be victimized by these predatory pricing practices, then it might not be necessary to come in on this kind of a specific item and insist on a Buy American provision. But until that is done, our only recourse is a step at a time to insist on Buy American, and that is why this provision provides for fundamental justice and ought to be adopted. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. I yield 4 minutes to the Senator from Missouri.

Mr. DANFORTH. Mr. President, first, in answer to the Senators from Pennsylvania, this provision in the House bill has nothing whatever to do with unfair trade practices—nothing. This is directed at fair trade, not unfair trade. We have already had a successful antidumping case against Japanese and Korean offshore jackets and piles. That was the successful case against unfair trade practices, against dumping. This Buy American provision is aimed at shutting out fair trade, not unfair trade.

A second point that should be made is that if we agree to the House provision, this would mark the first time in the history of our country we have had a Buy America requirement that has extended beyond requirements on Government to the private sector. So this is truly a breakthrough in protectionism if we do it. It is special interest legislation in the extreme. It would benefit a handful of west coast steel companies, having no effect on the rest of the steel industry, at least no positive effect. At the very most it would increase domestic steel production by one-twentieth of 1 percent.

Now, Mr. President, there is a zero sum gain in trade. There is never any situation where there is a pure victory, and the losers, as the Senator from Louisiana has pointed out, are the oil producers. This is a measure which is designed to help a few steel companies at the expense of the oil industry. I would suggest that if there is one beleaguered industry in this country right now, it is oil.

It is projected that the effect of adopting this provision would be the loss of somewhere between 16,000 and 25,000 American jobs.

As domestic oil production becomes less attractive, as it becomes more expensive because of this provision, so Government revenues would decline by an estimated $2 billion over the next 15 years from less money paid to the Federal Government for offshore leases.

□ 2340

It was pointed out earlier that this is a clear violation of the General Agreement on Tariffs and Trade. There is absolutely no question about it. It would make the United States vulnerable to retaliation, to compensation to other countries. They would not even have to retaliate. They have an absolute right, under GATT, to be compensated by the United States, and that would cost American jobs.

Also, Mr. President, at a time when the United States is making so much noise about unfair trade practices in other countries, certainly the power of such an argument would be reduced very significantly if the United States now were to lead the way in GATT violations.

The PRESIDING OFFICER. The time of the Senator has expired.

Who yields time?

Mr. CHAFEE. Mr. President, I reserve the remainder of my time.

Mr. METZENBAUM. Mr. President, how much time does each side have?

The PRESIDING OFFICER. The Senator has 8 minutes and 22 seconds, and the opposition has 4 minutes and 54 seconds.

Mr. METZENBAUM. I yield myself 4½ minutes.

The PRESIDING OFFICER. The Senator is recognized for 4½ minutes.

Mr. METZENBAUM. Mr. President, I think the issue is well stated by the Senator from Missouri. It is not a question of unfair trade; it is a question of fair trade. I think the question is what really is fair about this entire matter.

The Senator from Louisiana has talked about how sick the oil industry is. As a matter of fact, it was only yesterday that about an hour was spent on the floor of the Senate during which Members pointed out the problems of the oil industry. Although I have had my differences with the oil industry on more than one occasion, I make no bones about it, that I think it is an imperative that we all join together in protecting the oil industry and seeing to it that we have an oil industry in the future.

So, too, I am concerned about the steel industry. I would hate the day to arrive in the country when there no longer was a viable steel industry.

Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. The Senator is entitled to order. Time will stop running.

Will the Senators and staff in the rear of the Chamber withdraw from the Chamber, please?

Mr. METZENBAUM. I thank the Chair.

I cannot think of an industry that is hurting more than the steel industry in this country. I think we have to recognize that we need an oil industry and we need a steel industry, and I hope the day never comes in this country when either of them is nonexistent. But the fact is that we do not want to have an oil industry at the price of the steel industry.

Since 1978, Korean and Japanese producers have all but obliterated the west coast market for offshore production of rigs and platforms used for energy development on the United States Outer Continental Shelf, costing this country literally tens of thousands of domestic jobs. Thirteen out of fourteen west coast platform construction contracts have been issued to Japan and Korea since 1979.

That trend has now extended into the gulf coast as well, where two out of the last five deck houses were awarded to Korea since 1983 alone.

In May 1986, the United States International Trade Commission ruled unanimously that Korean and Japanese dumping of offshore platform jackets had seriously injured the American offshore fabrication industry. The ITC also ruled that American industry had been injured by dumping of platform pilings and as a result of Korean subsidies.

Frankly, I believe in the basic proposition of free trade, and that has been a longstanding position I have taken. But I have seen what has happened to American industry as we have supported free trade in this country, and free trade has developed into a posture of unfair trade throughout the world. It is a reality. We have not been permitted to compete on an equal basis with the Korean steel companies, with the Japanese steel companies; and, as a consequence, our own steel industry is hurting and it is costing us jobs in Ohio. It is costing us jobs in Pennsylvania. It is costing us jobs in every part of the Nation where there is a steel industry.

Let us take a look at this whole situation. The regulations for the Outer Continental Shelf leasing program, as promulgated by the Minerals Management Service, permit issuance of leases—that is a preferential basis, and listen to this—only to U.S. citizens and nationals, aliens with permanent resident status, and U.S. corporations.

I do not take issue with that, nor do I take issue with the fact that the Jones Act requires the use of U.S.-built ships and U.S. crews and extends the crew requirement to include offshore platforms operating on the U.S. Outer Continental Shelf. If we are going to provide that kind of preference with respect to the matter of obtaining the leases, is it not only fair and reasonable that we expect that U.S. companies will be permitted and in a position to sell their steel?

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. METZENBAUM. I yield myself 1 more minute.

I think the Buy American provision that is provided in the house amendment is right. It is proper. It is in the best interests of our country, and I do not think we ought to call upon the American steel industry to stand back on behalf of the oil industry, notwithstanding the fact that I think all of us in this body agree we want to do everything possible to help the oil industry as well as the steel industry.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I will say that everybody obviously has their parochial interests to represent, and we have heard from one parochial section of the country.

The point has been well made by the Senator from Missouri—that for the first time we are saying to private individuals, "You must buy American." We are not going through the normal tariff procedure. We are not going through a normal quota procedure. In tariffs, the tariffs go to the Government.

We are saying to a private individual, those who buy oil equipment, "You can't buy oil rigs unless 50 percent of that steel has come from the United States." We previously tried that with Government: The U.S. Government must buy American. But we have not tried it before with private individuals.

I think these are dangerous waters. Clearly, they are contrary to GATT, and clearly they are going to invite retaliation and will hurt one sector of the country—namely, the oil business.

Mr. President, I yield 1 minute to the Senator from Idaho.

Mr. McCLURE. I thank the Senator.

Mr. President, the measure we are addressing today is not a provision to "Buy America" but an attempt by one industry to prop themselves up at the expense of another.

Nobody feels worse than I about the current situation of our domestic steel industry. I have been a strong proponent of our industrial and natural resource industries, especially as they relate to our national security. However, it makes little sense to use the argument that this provision will aid the steel industry and increase employment, when in fact it will do just the opposite.

The provision says that 50 percent of the materials and supplies on structures used for exploration and production activities on the Outer Continental Shelf [OCS] be of domestic origin and these structures be built in the United States.

A major purpose of the proposal is to protect domestic steel producers and fabricators of structures used in offshore production from foreign competition. However, the oil industry already purchases many of the most costly components of offshore platforms from domestic firms. And, over the life of a project, 90 percent of the total project cost is spent domestically, even if the jackets and piles are produced offshore.

As a result of this proposal, many marginal oil prospects will be abandoned, especially at today's oil prices, because the additional cost of the rig could not be justified in a benefit/cost ratio. For example, last year a major contract bid came in for a project offshore California in which the domestic bid for $200 million for the jacket and piles, was twice that of the nearest foreign bidder. Contrary to what many would like to believe, an additional $100 million in costs will cause most if not all oil companies to abandon even the best prospects for future development.

In addition, reduced offshore drilling and production would reduce employment directly in the oil and gas industry and indirectly in industries that supply inputs to petroleum drilling and production. According to a Battelle Pacific Northwest Laboratories study prepared for API in June 1985, up to 56,000 workers would be displaced by the year 2000 if "Buy American" requirements were imposed on OCS activities.

The ramifications of this provision are far reaching, not only affecting the worthy and necessary objectives of income and employment in other domestic industries, but also the U.S. exports of goods and technology and the national security objectives of offshore development of oil and gas resources.

To quote former Deputy Secretary of the Department of Energy, Kenneth Davis, at the recently held World Energy Conference in Cannes, France, "the oil outlook in the United States is bleak," the level of U.S. proved oil reserve additions is now just 600 million barrels a year, or roughly one-fifth of the country's annual production rate. Because of low oil prices, worldwide exploration investment is down considerably. Spending on development has dropped another 20 percent this year and the number of exploration engineers has been cut by 10 to 20 percent.

The new oil frontiers are offshore. We cannot afford greater reliance on foreign sources by cutting off access to our own reserves.

Where would our steel industry be if we were to impose this so-called Buy America on them? Let me tell the Senate. While the increased cost of domestically produced jackets and piles to the oil industry would amount to $400 million to $500 million from 1986 to 2000—this represents 20 new planned platforms times the additional average costs of $20 to $25 million per platform—the cost to steel companies would be an additional $7 billion for domestic ferroalloys that are now imported over the same period of time at 1985 prices. This does not include the cost of imported metallurgical coal or coke which steel companies now use to process steel.

I do not use this example to suggest that I would support such an imposition on the steel industry any more than I support the proposal before us today. But I ask you, Mr. President, why should we be less concerned with the impact of this provision on our oil industry and the future of our domestic oil supply?

I implore my colleagues to vote with me in opposition to this ill-conceived provision.

Mr. President, I ask unanimous consent to have a letter in connection with this subject, from Mr. Clayton Yeutter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE U.S. TRADE REPRESENTATIVE,
EXECUTIVE OFFICE OF THE PRESIDENT,
Washington, DC, October 16, 1986.

Hon. JAMES A. McCLURE,
U.S. Senate,
Washington, DC

DEAR JIM: I am writing in regard to the Outer Continental Shelf "Buy America" amendment which is contained in the House-passed FY 1987 continuing resolution. This provision, if retained, would require that 50 percent of the materials and supplies on vessels and structures used for exploration and production activities on the Outer Continental Shelf be of domestic origin and these structures be built in the United States. I expressed opposition to this provision last year when it was offered as part of the fiscal year 1986 Interior Department Appropriations bill and the Omnibus Budget Reconciliation bill. My position has not changed.

First, It will result in significantly increased costs for exploration and development of offshore oil and gas resources. Drilling activity has already fallen to historic lows in the United States. This further negative factor will exacerbate the problem with implications for our energy supply security in the future. Furthermore, the waiver provision contained in section 6901 of Subtitle J appears to be an ineffective way to provide relief to the domestic petroleum industry. Moreover, I believe that existing U.S. trade laws provide effective recourse for domestic industries injured from unfair competition. In addition, as you know, the U.S. International Trade Commission rules in May that industries in the

United States are materially injured by imports from Korea and Japan of offshore jackets and piles. Consequently, the U.S. Department of Commerce imposed a dumping margin of 17.34 percent for Korea and 8.8–9.1 percent for Japan on these products.

Second, it is possible that the amendment, if adopted, could lead to foreign retaliation which could affect other sectors of the U.S. economy. U.S. oil producers already face potential "buy national" laws which are under consideration in the United Kingdom, Norway, the Netherlands and Denmark. If the United States were to adopt a "Buy America" provision, foreign governments would be less willing to resist similar provisions, and would be likely to retaliate against U.S. products. Such retaliation would hurt other sectors of the U.S. economy, since any retaliation would not be confined to the old equipment sector.

Third, this kind of "Buy America" legislation is contrary to United States obligations under the General Agreement on Tariffs and Trade (GATT). Under Article III.4, the United States is committed to maintaining national treatment for products covered by the agreement. Eliminating foreign access to the U.S. market for any product used by domestic oil companies in connection with exploration activities on the Outer Continental Shelf would violate this agreement and could ultimately require the United States to compensate injured parties in sectors not related to drilling. We cannot expect our trading partners to uphold their obligations in the face of blatant violations such as those represented by this amendent.

Finally, I am concerned that enactment of such legislation will undermine the U.S. position of leadership in expanding and strengthening the international trading system. We are currently engaged in an effort to renegotiate the Government Procurement Code, with the goal of improving the competitive process by which governments procure goods and expanding the coverage of the Code. If successful, these efforts will provide even greater access for American goods, and the jobs which support them, to foreign markets. However, our credibility would be sorely tested if we are put in the position of calling for greater access to foreign markets while, at the same time, placing new restrictions on access to our own markets.

In summary, the Administration believes the potential negative economic and employment consequences of this amendment are overwhelming and far outweigh the intended benefits of the amendment. For these reasons, the Administration is strongly opposed to this "Buy America" provision. I appreciate your taking the time to consider these concerns and urge that the "Buy America" provision be rejected.

Should this provision be included in the continuing resolution which reaches the President, I would strongly recommend a veto.

The Office of Management and Budget advises that, from the standpoint of the President's program, there is no objection to the submission of this report to the Congress.

Sincerely,

CLAYTON YEUTTER.

Mr. McCLURE. Mr. President, I support the motion, but I will make two points that have not been made. I hope I will not be repetitious.

The Senator from Ohio says that we are in a cruel dilemma of choosing between oil and steel, sacrificing steel in order to help oil. Unfortunately, that is not the choice, because if this provision is enacted, it kills both, not at the expense of one or the other. It hurts both because you do not get more jobs in this instance by increasing the cost of operation. You simply kill the economic activity that creates the jobs.

□ 2350

There will be no increase in jobs in the steel industry in this country, unfortunately, I would say.

So if you want to help the steel industry this is not the way to do it. It will not help the steel industry and it will hurt oil exploration.

If you want us to be more dependent upon foreign oil, adopt this amendment. I hope we will not.

I thank the Senator for yielding.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, will the Senator yield me 1 minute?

Mr. METZENBAUM. Certainly.

Mr. HEINZ. I want to make three quick points.

The first is when we are talking about jobs here they do not involve just one region of the country. It is not just Ohio and Pennsylvania, but it is Indiana, Illinois, Louisiana, Alabama, California, Colordao, and Utah, and a lot of other States. Whether those are steel jobs or oil rig worker jobs, they are both important.

Second, there was an argument made about the cost of this amendment. The fact is that even if the argument of the Senator from Louisiana were accurate—and I dispute his figures—that this amendment would double the cost of oil rigs, even with that inflated assumption, the fact is that the cost of oil would rise a maximum of 6 cents a barrel, that is one-seventh of a cent of a gallon.

Finally, may I have 30 seconds?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. HEINZ. May I have 30 seconds?

Mr. METZENBAUM. Yes.

Mr. HEINZ. Finally, the politics of this issue are fairly clear. People who are against this amendment are the oil companies. As has been referred to a moment ago, we only let U.S. corporations, U.S.-led joint ventures, and U.S. persons bid on oil leases. The oil companies have to buy America for their oil leases, and I do not think we should allow them to have their cake and eat it too.

The PRESIDING OFFICER. The Senator has 1 minute.

Mr. METZENBAUM. The Senator from Pennsylvania may conclude if he wishes.

Mr. HEINZ. No, I have concluded.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I yield myself 1 minute.

The statement was recently made by the Senator from Pennsylvania that those who are against this amendment represent the oil interests. I can assure everybody here, there is not a drop of oil to be found under the surface in the State of Rhode Island. We tried offshore. We have not succeeded in getting anything.

So any suggestion that this is oil versus fair trade or steel or whatever you want to call it is completely off the mark.

The point is those of us who are opposed to this are concerned about the trade situation in the United States and we are concerned about the trade situation in the world in which the United States is the leader.

We do not want to get started down that spiraling path of retaliation versus retaliation which surely legislation like this will incur.

We are for free trade. We are for open trade. If those who are opposed feel that the Koreans or the Japanese are bringing—30 seconds more, Mr. President—are bringing in steel, they can bring dumping cases and indeed they have brought them and in connection with this. But they cannot succeed in those measures so they are going around sideways and trying to come in through legislation like this.

Finally, I reiterate what the Senator from Louisiana said and the Senator from Oregon would say if he were here, the floor manager of this measure, that this is clearly veto bait.

The PRESIDING OFFICER. Fifty seconds remaining.

Mr. CHAFEE. If this amendment remains in the bill, the dangers of the President vetoing the whole measure are extreme.

So I would hope that we would join with the Senator from Oregon and table this amendment.

Mr. CRANSTON. Mr. President I reluctantly support this amendment.

I support it because I believe the Federal Government has an obligation to act in a meaningful and effective way once it has found that illegal and unfair foreign trading practices are devastating American industries.

I have always been, and will continue to be an advocate of the freest possible trade. But to be free, trade must be fair.

We must not unilaterally disarm in the face of blatantly unfair foreign trading practices. And we have an obligation to our citizens to act when an industry is being systematically cannibalized and destroyed.

I reject illogical and excessive retaliation. But I support a specific trade response that seeks to provide justice.

And that is precisely what the amendment before us seeks to accomplish.

Illegal dumping is a serious problem. The United States has yet to come to terms with an economic reality in which effective targeting strategies, often advanced by unfair trading practices by foreign countries, are the the primary industrial development strategy in the postwar period.

I believe we are now in danger of losing our domestic market for offshore production of rigs and platforms used for energy development because of blatantly illegal dumping. No U.S. company has built a mobile oil rig since 1982. In May 1986, the U.S. International Trade Commission ruled unanimously that Korean and Japanese dumping of offshore platform jackets had seriously injured the American offshore fabrication industry. The ITC also ruled that American industry had been injured by the dumping of platform pilings, and by Korean subsidies.

So our Government is clearly on record saying the foreign practices are unfair and illegal. The only question before us is whether we are going to do nothing, or whether we are going to prescribe specific and effective action to defend American businesses and workers who have come to us for relief. We have seen repeatedly that the penalties imposed in dumping rulings have proven to be too little, too late. I fear that unless Congress acts, this might now be the case with offshore oil rig production. In many cases, U.S. industry has been irreversibly injured before any action was taken by our Government.

I believe a better solution would be to address the problem of dumping in a broader way since many, many industries are being adversely effected by these illegal trade practices. To permit these unfair trading practices to continue without an effective response is unconscionable. That is why my colleague, Senator BAUCUS, and I introduced legislation earlier this year to deter this practice. We proposed dramatically increasing penalties for repeat offenders of dumping. Our measure would allow U.S. companies to seek compensation for damages they suffered due to illegal dumping practices.

The United States is a victim of foreign dumping practices time and time again. We either respond too late—or in some cases, we don't respond at all. The lack of an effective response to the escalating trade deficit and the lack of our ability to enforce and to strengthen our own trade laws to deal with blatantly unfair trade practices jeopardizes free trade around the world. It is becoming increasingly difficult to promote free trade when foreign countries flagrantly and defiantly violate our own laws. And we let them get away with it time and time and time again. We have sacrificed too many jobs already. We must act now.

Mr. HEINZ. Mr. President, this amendment addresses an issue that has significant implications for both our national security as well as significant benefits in terms of the domestic economy.

The issue is that of the development of offshore oil and gas deposits on the U.S. Outer Continental Shelf. This issue comes before us now as amendment 117 to the continuing resolution as passed by the House of Representatives.

It is no surprise, Mr. President, that the development of our offshore oil and gas deposits is a vital component of U.S. national security. In 1983, offshore production represented 13.7 percent of total U.S. crude petroleum production. The maintenance of the technology necessary for this development—a technology developed in the United States—is therefore critical to U.S. energy independence.

Since 1979, however, 13 of 14 fixed platform projects on the west coast have been awarded to Japan and Korea. No new mobile offshore drilling rigs have been constructed in this country since 1982. And again, Mr. President, as we have seen in countless other situations involving our basic industries, dumping and subsidization have played a major role in the flow of offshore projects overseas and in the subsequent erosion of the domestic jobs base.

In fact, in May of this year, the U.S. International Trade Commission, in a case filed by Kaiser Steel Corp., ruled unanimously that Japanese and Korean dumping of offshore platform jackets had seriously injured the American offshore fabrication industry. The ITC further ruled that American industry had been injured by dumping of offshore platform pilings and as a result of Korean subsidies. As a result, new duties on offshore platform jackets and pilings are being assessed on imported platforms in addition to a 6-percent duty required by existing trade law.

Despite the ITC decision, the dominance of Korean and Japanese producers of offshore oil equipment in the U.S. market is expected to continue, if not accelerate. Already, our Asian trading partners have made significant inroads into the gulf coast area in terms of the deck house portion of platforms—traditionally a domestic market stronghold—with two out of the last five decks having been awarded to Korea.

So again, we are faced with the prospect of losing another basic industry—one critical to this Nation's ability to effectively develop and produce the energy resources that lie within our territories. The sophisticated engineering skills and production techniques, along with the manufacturing capacity, are quickly being eroded. Further, the potential loss of our capability to design and construct structures to meet future challenges in offshore oil and gas exploration and production could seriously undermine our ability to respond to a national energy emergency.

In addition to exporting the offshore projects overseas, we are also exporting the OCS-related jobs so critical to the Offshore Leasing Program. The equipment necessary for OCS energy development can translate to roughly 1,000 to 1,300 jobs for a production platform and up to 1,500 jobs for a mobile drilling unit, with some $200 million in revenue generated for the domestic economy.

In closing, let me suggest to my distinguished colleagues that the Buy American amendment to the continuing resolution is no more protectionist than the OCS leasing program already approved and implemented by our Government. In fact, this provision is entirely consistent with the current national orientation of the policy governing the U.S. Outer Continental Shelf. The regulations for the OCS leasing program, as promulgated by the Minerals Management Service—30 CFR 256.35 [b] [2] and [4]—permit issuance of leases only to U.S. citizens and nationals, aliens with permanent resident status, and U.S. corporations.

Further, the Jones Act requires the use of U.S.-built ships and U.S. crews between coastwise points, and extends the crew requirement to include offshore platforms operating on the U.S. Outer Continental Shelf.

Further, the oil produced and developed in conjunction with the OCS leasing program can only be used domestically unless specifically stated by the President.

This amendment, then, merely represents a logical extension of the OCS leasing program into the manufacturing sector of this country. Our opponents charge that this is protectionist. So is the entire OCS leasing program. Perhaps our opposition would prefer that we seek an amendment opening the OCS leases to bids from foreign companies? I doubt they would.

I ask my colleagues to vote to maintain the same level of consistency in the OCS leasing program for the manufacturing sector as already enjoyed by other sectors involved in our offshore energy development and to please join me in supporting this amendment.

Mr. WILSON. Mr. President, the provision before us is one that has many facets to it. It is not a simple matter, for while superficially a question of protectionism versus free trade, we really are presented with an issue of national security.

We do not now allow and, presumably, will not allow foreign companies

to bid for offshore oil leases. This is a clear result of the decision that the control of our offshore oil deposits is a matter of national security, and we do not want foreign entities controlling any aspect of our national security.

Mr. President, it makes no sense to say that for purposes of national security we must control our offshore oil fields and yet put under foreign control our ability to get to the oil. Yet, the present situation is leading us to that very situation. If we do not maintain a domestic industry capable of building drilling rigs, not only will we have a blatant contradiction in our energy policy, we will have put our energy security at risk.

Mr. President, it may be in order to review our present energy security policy and its impact on our leasing policy. But, I believe that the restrictions on leasing tracts only to U.S. companies makes sense, and for the same reasons I support the House amendment.

Mr. BYRD. Mr. President, the question this amendment presents is very straightforward: do we want to rely solely on foreign oil rig production, or do we want at least half of each oil rig to be made in the United States? Do we want to maintain the capacity to assure that we can exploit our own energy resources, or are we content to rely on imported oil rigs?

The House amendment before us provides that our offshore oil rigs must be built in America from materials 50 percent of which, by cost, have been produced in this country. Let us be clear about what is happening to our capacity to produce oil rigs. In the past several years, Japanese and Korean firms have become the dominant force in oil rig production. Thirteen out of 14 west coast platform construction contracts have been issued to Japan and Korea since 1979. On our gulf coast, two of the last five contracts for equipment went to Korean firms.

This is part of a pattern of growing foreign dominance over our domestic steel market. It is a trend that has broad-ranging consequences for American security, and nowhere are those consequences more apparent than in the offshore oil rig area.

Why is the problem so serious? Mr. President, the Government has recognized the importance of a strong domestic capacity to develop our coastal resources in several ways. We have required that offshore oil leases be issued only to U.S. persons and corporations. We have, through the Jones Act, required the use of U.S.-built ships and of U.S. crews between coastwise points, and extended that crew requirement to include offshore oil rigs.

Why this concern? Because we recognize the importance of American independence in oil production. We are not alone in the world in doing so. Britain and Mexico both maintain "buy national" requirements for offshore development activity.

A nation needs to have its own capacity to develop its strategic resources. As it is, foreign producers are garnering a growing share of the U.S. oil rig market. If we wake up and find ourselves without the capacity to make these rigs, we have compromised our independence.

Now, what would the House amendment do to address this problem? It will require that any rig or structure used to develop resources on our continental shelf, pursuant to Federal leasing, must be built in the United States from materials 50 percent of which have been produced in this country. That is the meaning of "Buy America" here.

What will it mean for the American worker, and the American steel industry? Construction of each of these huge platforms would generate between 1,000 and 1,300 jobs. Each platform costs between $80 million and $300 million, and at least half of that amount would be kept in this country, giving our steel industry much-needed business.

What is this amendment going to cost? Based on figures that oil companies themselves have developed, it may add around 6 cents to the price of a barrel of oil. That is a small price to pay when he consider that we are talking about the very survival of this important segment of our steel industry. The price is small indeed when we look at the issue of how this domestic production capacity contributes to our energy independence.

If we fail enact this legislation, we not only suffer the immediate job loss, but we set ourselves up for a permanent loss of engineering skills, production techniques, and manufacturing capacity. If we put an industry or a segment of an industry out of business through reliance on imports, we no longer train people or teach those skills in this country. We—as a people—forget how to perform that job.

I support the House provision, and I urge my colleague to join with me. This is a clear question of national security. It has domestic employment benefits, to be sure. But the real benefit of the House provision is to be found in the fact that it offers an insurance policy for our future.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, I yield myself the remainder of the time.

Mr. President, I am not going to get into this discussion of whether the President will or will not veto it. I have a lot of confidence that if we keep this measure in as the House passed it we provide for buying American steel that Ronald Reagan is about the last President I could possibly imagine who would veto a bill because it had a "Buy American" provision in it.

I am just not willing to concede that point. I think we ought to either adopt or defeat the amendment based on the merits but not on the concern of whether the President will or will not veto it.

I am prepared to yield back the time I have.

The PRESIDING OFFICER. The proponents have 35 seconds and opposition 29 seconds remaining.

Mr. CHAFEE. I yield back my time.

Mr. METZENBAUM. I yield back my remaining time.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the motion to lay on the table the House amendment to Senate amendment numbered 117.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from North Carolina [Mr. BROYHILL], the Senator from Utah [Mr. GARN], the Senator from Nevada [Mr. LAXALT], and the Senator from Idaho [Mr. SYMMS] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Vermont [Mr. LEAHY] and the Senator from Rhode Island [Mr. PELL] are necessarily absent.

The PRESIDING OFFICER (Mr. SIMPSON). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 63, nays 31, as follows:

[Rollcall Vote No. 351]

YEAS—63

Andrews	Gorton	McConnell
Armstrong	Gramm	Mitchell
Baucus	Grassley	Murkowski
Bentsen	Hart	Nickles
Bingaman	Hatch	Nunn
Boren	Hatfield	Packwood
Boschwitz	Hawkins	Pressler
Bradley	Hecht	Pryor
Bumpers	Heflin	Quayle
Chafee	Helms	Roth
Chiles	Humphrey	Rudman
Cochran	Inouye	Simpson
Cohen	Johnston	Stafford
Danforth	Kassebaum	Stennis
Denton	Kerry	Stevens
Dole	Lautenberg	Thurmond
Domenici	Long	Trible
Eagleton	Lugar	Wallop
Evans	Mathias	Warner
Exon	Mattingly	Weicker
Goldwater	McClure	Zorinsky

NAYS—31

Abdnor	Glenn	Moynihan
Biden	Gore	Proxmire
Burdick	Harkin	Riegle
Byrd	Heinz	Rockefeller
Cranston	Hollings	Sarbanes
D'Amato	Kasten	Sasser
DeConcini	Kennedy	Simon
Dixon	Levin	Specter
Dodd	Matsunaga	Wilson
Durenberger	Melcher	
Ford	Metzenbaum	

NOT VOTING—6

Broyhill	Laxalt	Pell
Garn	Leahy	Symms

So the motion to lay on the table the House amendment to Senate amendment No. 117 was agreed to.

□ 0005

Mr. CHAFEE. Mr. President, I move to reconsider the vote by which the motion to table was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HATFIELD addressed the Chair.

SENATE AMENDMENT NO. 23

The PRESIDING OFFICER. The question recurs on the motion of the Senator from Oregon to recede from the Senate amendment No. 23.

Mr. BUMPERS. addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BUMPERS. Is the amendment No. 23 to put a cap on the farm——

The PRESIDING OFFICER. May we have order, please?

Mr. BUMPERS. Mr. President, I wanted to get into a discussion, if I may, with the chief opponent of this move to recede, the Senator from Iowa, and to find out in light of some of the Senators of farm States here as to exactly——

The PRESIDING OFFICER. The Senate is not in order.

Will staff please retire to the Chambers?

Mr. BUMPERS. Mr. President, the Senate is still not in order.

The PRESIDING OFFICER. The Senator is correct. The Senate is not in order. Will Senators please retire to the cloakroom? The Senate will not proceed until the Senators clear the aisle and are retired to the cloakrooms.

The Senator may proceed.

Mr. BUMPERS. Mr. President, you will recall that the Senate voted on an amendment of the Senator from Iowa when the continuing resolution was before the Senate, when we attempted to put a $500,000 cap on all governmental payments to any farm unit and the Senate on a germaneness question by a vote of about 54 to 40 rejected it and accepted the germaneness argument. So his amendment was ruled out of order.

The House in their continuing resolution had put a $250,000 limit on payments but as I understand it, either that amendment or the one that is now before us in this resolution did not include nonrecourse loans.

Could the Senator from Iowa verify that?

Mr. HARKIN. If the distinguished Senator will yield, I will respond by saying that the amendment, the House provision that the distinguished chairman of the Appropriations Committee wants us to recede to, does not include nonrecourse loans in the payment limitation of $250,000. It does not include nonrecourse loans.

Mr. BUMPERS. The amendment that the Senator offered here which was defeated on a germaneness ruling did include nonrecourse loans; is that correct?

Mr. HARKIN. That is correct.

Mr. BUMPERS. I want to go through a scenario with the Senator and ask him if he can tell us how it would apply to this particular provision because let me tell you something. I am very apprehensive about amending something as important as this on a continuing resolution at 12:15 a.m. without knowing more about it. I think most of the Senators here, particularly from farm States, had better be paying attention here.

No. 1, the Senator from Iowa is representing to this body that the Department of Agriculture says that if this amendment passes, the total savings to the Government is $20 million; is that correct?

Mr. HARKIN. If I remember right, they said something like over 4 years, about $23 million. That sticks in my mind, something like that, between $20 and $25 million over a 4-year period. Someone else may have a different figure.

Mr. BUMPERS. Are you talking about an annual savings?

Mr. HARKIN. No.

Mr. BUMPERS. You are talking about total cost of $23 million over a 4-year period.

Mr. HARKIN. I believe I am correct. I would yield, if anyone else has any different information. But I think it was over a 4-year period of time, somewhere between $20 and $25 million. I think the exact figure was $23 million for the 4 years.

Mr. BUMPERS. Could the Senator from Mississippi, Mr. COCHRAN, enlighten us on that? Is that his understanding?

Mr. COCHRAN. Mr. President, if the Senator would yield, I was distracted by my friend from Minnesota.

Mr. BUMPERS. My question of the Senator from Iowa was, and he has said yes—I would like to know if he could verify the total cost of savings this amendment would yield to the U.S. Treasury over a 4-year period is $23 million. Is that the Senator's understanding?

Mr. COCHRAN. Mr. President, if the Senator would yield, my understanding is the Department of Agriculture has estimated that it would run about $26 million. That is my recollection.

Mr. BUMPERS. Over a 4-year period?

Mr. COCHRAN. That is right. To put it in perspective, you calculate the cost of the entire farm program over that period of time and you are talking about maybe $50 billion, compared with $26 million savings. So you are really not making a major reform although I agree with the Senator from Arkansas. It is an unfortunate way to legislate change in the farm bill.

I, along with the Senator, have voted in the Appropriations Committee against it and here on the floor—that it was not germane. I still have that view. But the Senator is correct. The cost is minimal. It is a lot different in the way it will apply to the farm programs than the amendment that was offered here in the Senate by the distinguished Senators from Iowa and North Dakota when we first discussed this issue.

Mr. BUMPERS. The final question, I want to be sure of, and of course the answer is obviously no if these savings are correct, because you are talking about roughly $6 million to $7 million a year which, by the scale of the kind of expenditures we are putting out on the farm programs is not very much. I want to be sure that this is absolutely on the record and that everybody understands what we are voting or not voting on here this evening depending on whether we ask for a rollcall. And it is this: Let us take in the case of rice. The loan price of rice is $7.20 a hundred. The world market price right now is about $3.50.

□ 0020

That is the floor. It may be a little lower than that, but that is the floor on the world market price, as far as the Department of Agriculture is concerned. So the loan price is $7.20, and the world market price is $3.50, so there is $3.70 a hundredweight.

My question is, when a farmer takes his rice and puts it in the loan program, he gets $7.20. If he does not want to redeem it, and in 99 percent of the cases he will not, he will just forfeit it. In that case what he has gotten, that $3.70, will not apply toward the $250,000 cap. Is that correct?

Mr. HARKIN. Yes.

Mr. BUMPERS. Let us assume further that under the Loan Marketing Program he has a chance to sell his rice for a little more than the world price of $3.50. Let us assume he has a buyer overseas who will pay $4 per hundredweight for it. He can go down and redeem that rice at the world price of $3.50. Is that not correct?

Mr. HARKIN. It would be $2.40.

Mr. BUMPERS. No. I am saying that the world market price is $3.50. If he forfeits it, he keeps his $7.20 that he got for his loan, but if he wants to redeem it, he can redeem it at the world price of $3.50. Is that correct?

Mr. HARKIN. That is correct.

Mr. BUMPERS. My point is I do not want him to get caught in a technical-

ity. If he redeems it, that still would not count. The difference between what he got on loan and the redemption price, that difference will still not apply on this cap. Is that not correct?

Mr. COCHRAN. Mr. President, if the Senator would yield, I would argue in behalf of that producer that he had a nonrecourse loan, that the marketing loan is a nonrecourse loan. It may be subject to dispute, as to whether or not the $250,000 limitation or cap would apply to him.

I would argue that it should not, even under this amendment of the House. I do not think it is clear by the terms of the amendment itself what the answer would be. I think it is going to be subjected to litigation, to lawsuits.

The Senator has certainly pointed out what could be a technicality that adversely affects our effort to market aggressively and competitively rice in the international marketplace, and if we adopt this it will undermine our efforts to be competitive again.

If we adopt this, will it get us back into the world market? I don't like the amendment, but I do not think we can get a better deal out of the House.

Mr. BUMPERS. It occurs to me that the Department of Agriculture certainly does not intend that to be the case. Otherwise, this $26 million you can see is just peanuts compared to what I am talking about. It is my impression that the Department of Agriculture, if they say this cap of $250,000 will only save $26 million over a 4-year period, could not possibly be anticipating that if this farmer redeems that rice so that he can sell it in the world market for a little bit more, they certainly would not intend for him to be penalized on a technicality simply because he redeemed his rice. In addition to that, you would totally torpedo one of the major provisions of the farm bill that we passed just 1 year ago, which set up the world loan marketing arrangements in the first place.

Does the Senator agree with that?

Mr. COCHRAN. If the Senator will yield, I do agree with him. He makes a good point. I hope that those who will have to interpret and apply this amendment, if it becomes law, will listen to that kind of argument and interpret it that way, that a nonrecourse marketing loan should not be subject to that cap.

Mr. BUMPERS. I yield the floor, Mr. President.

Mr. PRYOR addressed the Chair.

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. Mr. President, the hour is late and I will not speak over 60 seconds.

The worst thing about this amendment, I say, Mr. President, is that even though Senator COCHRAN of Mississippi knows as much about the agricultural program as any person in this body, none of us can say with any degree of certainty what this amendment sent from the House actually does. It is, in fact, an undoing of what we did in 1985.

All of us are sitting here at 12:30 at night trying to see how this is going to impact rice, cotton, wheat, or any other crops. Since we have no information about this item, I hope the House amendment will not prevail.

Mr. BOREN. Mr. President, I agree with what has been said by other Senators. I think we are not talking about the impact of this amendment. I have heard the discussion on the floor between the Senator from Mississippi and the senior Senator from Arkansas. I think it is not absolutely clear as to the impact of this amendment. I would agree with what the Senator from Mississippi has said. The likely anticipated saving would appear to be the intent. The language is not exactly clear. I think it is unwise to be legislating in this manner.

I would also point out that there is no fairness between the various commodity groups under this amendment. There are payment limitations that apply to certain commodities of wheat, cotton, and rice that do not apply to dairy, sugar, and tobacco. There is not the necessary equity here between the various commodities.

We also have to consider what happens to the price of commodities like cotton. We do not know what will happen, really, over the next few months in terms of what will develop in the cotton price. A lot of this depends on what goes on in China, for example,

If the cotton prices were to go down substantially, you are talking about impacting farms that are much smaller. If the price goes down significantly, deficiency payments will go up and that means that you are talking about cotton farms, for example, particularly like in areas in western Oklahoma where irrigation is practiced. You are talking about catching farmers that are very small and perhaps discouraging the Marketing Loan Program.

To put the loan program into effect, we told producers they would not have to bear the cost of seeing the loan rate fall further down to lower than whatever the world price is.

Now we are talking about putting on limitations that at least potentially could penalize the farmer if the Government makes the decision to further lower the rate under a marketing program.

So we are making significant changes in a farm program that was just passed this year. We are not applying the changes to all commodities across the board, to tobacco, for example, to dairy, or to other essential commodities.

I just think it is unwise for us to be doing that.

I have heard the debate among my colleagues on and off the floor about whether or not we should seek a rollcall of this matter. I was wondering about it. I think the Senator from Mississippi has pointed out that we do know how the House would react. It is possible that we could have an even more damaging provision or one that is even less clear than this provision in return if we send it back to the House.

I do want to go on record as saying that I think it is unwise for us to take the leap in the dark and not know the full impact or the full meaning of this provision at this time.

If we have a voice vote, I certainly intend to vote against it. I want to be on record at this point as being in opposition to it and thinking this is not the place to do it, this is not the hour to make this kind of change. It deserves careful study.

We need to know what size farms are impacted before we do it. I hope that we would not keep this provision in the bill.

Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

Mr. BOSCHWITZ. Mr. President, I will be very brief. Very often I have heard it said on the floor that the Farm Program is making payments only to the very large farmers and we are not really helping the family farmers. I would point out to my colleagues that while I think the estimates by the Department of Agriculture are terribly low, the savings in 4 years of $23 million would indicate that indeed most payments do go to reasonably-sized family farms and that these large payments that are always hyped in the press really only occupy a very small portion of the overall Farm Program.

I say that because this figure is $23 million over a 4-year period. I think that is low.

But even if the figure were perhaps more realistic, and I have heard one of my colleagues say $200 million over 4 years, it still would not be 1 percent of the overall program. I just make that by way of observation and I yield the floor.

□ 2430

The PRESIDING OFFICER. Is there any further debate? If not, the question is on agreeing to the motion to recede.

The motion to recede was agreed to.

Mr. HATFIELD. I move to reconsider the vote by which the motion was agreed to.

Mr. COCHRAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MORATORIUM ON PREPAYMENTS OF SECTION 515 MORTGAGES

Mr. DOLE. Mr. President, I would like to ask the distinguished Senator from Mississippi [Mr. COCHRAN] a question about a provision in the continuing resolution that provides for a moratorium on prepayments of section 515 Farmers Home Administration mortgages.

Mr. COCHRAN. I would be happy to respond to the majority leader.

Mr. DOLE. As I understand the provision, it is designed to give time to review the impact of prepayments of this type on the availability of low-cost housing intended to be encouraged by the 515 program. However, I am somewhat concerned that the effective date might be construed to adversely impact some transactions that are not abusive by any reasonable definition of the term.

For instance, I am concerned that this amendment might inadvertantly affect refinancings that have already occurred where there will be no resulting changes in rents or the policy for the running of a project. May I ask the distinguished Senator from Mississippi if a mortgage were refinanced, the closing on the mortgage to prepay the FmHA mortgage occurred today and the mortgagee had assured the Farmers Home Administration that, among other items, all existing leases would continue to be honored and the applicable rent subsidy agreement would remain in effect, would the new provision apply in the event that the actual discharge of the Farmers Home Administration mortgage does not occur until several days from today?

Mr. COCHRAN. It would seem to me that a refinancing under the facts presented by the majority leader would not be affected by the moratorium contained in the continuing resolution.

AMENDMENT NO. 3477

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Arizona, amendment No. 3477.

Mr. HATFIELD. Mr. President, let me describe for a moment the situation. I shall then ask unanimous consent to temporarily lay aside a certain matter.

We are now back to the one remaining amendment, amendment No. 59, relating to the funding for Federal buildings.

This amendment has been amended by the Senator from South Dakota [Mr. ABDNOR] in the first degree. It has been amended by the Senator from Arizona [Mr. GOLDWATER] in the second degree. We are now locked into a situation where no other amendment is possible—and I believe the Senator from Montana and the Senator from Ohio have other amendments that they wish to offer.

We are still in the process of trying to work out a compromise on the matter of the amendment relating to the subject of the amendment offered by the Senator from Arizona [Mr. GOLDWATER]. If we could get unanimous consent agreed to at this moment to lay aside temporarily the amendment in the second degree, the amendment of Mr. GOLDWATER, then the amendment pending by Mr. ABDNOR would be subject to another second-degree amendment, which would open up the opportunity for the Senators who wish to offer amendments on this continuing resolution.

I believe we could handle those two, and I am not aware of others. There may be, but I would hope to be able to handle those two amendments that are going to be presented by the Senators from Ohio and Montana and dispose of them. Then I would defer to the leadership as to what our decision would be after that. There is a possibility then, if we have not arrived at some kind of agreement on the compromise on the Goldwater amendment, there may be some possibility of setting that over until tomorrow morning. But I would certainly like to clear the deck tonight of all other amendments that may be offered in the second degree that would be possible after we set aside the Goldwater amendment.

If there are questions, I would like to respond to them. If not, I shall set the point into issue.

I ask unanimous consent to set aside temporarily the second-degree amendment by Senator GOLDWATER in order that other Senators may offer their amendments in the second degree to the pending Abdnor amendment.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. DOLE. Mr. President, I do not know of any objection. The distinguished Senator from Arizona is meeting right now with Senators D'AMATO, MOYNIHAN, DECONCINI, the Chief of Staff of the Air Force, the Air Force Secretary, several colonels, privates, to see if they can work out something. But this would expedite the matter. I just make that note that this would not prejudice the right of Senator GOLDWATER to reoffer the second-degree amendment.

Is that correct, Mr. President?

The PRESIDING OFFICER. The amendment would recur.

Mr. DOLE. Regardless of the disposition of the second-degree amendments.

The PRESIDING OFFICER. That is correct.

Mr. CHAFEE. Mr. President, I would like to ask what the amendments are that we can expect. The Senator mentioned one from the Senator from Montana and one from the Senator from Ohio. What are they?

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, in a moment, I shall be prepared to offer the so-called compromise on the RICO amendment. If the Senator from Rhode Island needs further description, I shall be happy to provide it.

Mr. HATFIELD. Mr. President, I would like to pose a question to the Chair.

By temporarily laying aside the Goldwater amendment, that in no way prejudices any of the parties to that amendment, because it would automatically come back at the complete of any intervening amendments that might be offered. Is that correct?

The PRESIDING OFFICER. The Senator is correct. And the amendment would recur automatically as each amendment is disposed of unless a complete substitute were to be offered for the Abdnor amendment.

Mr. METZENBAUM. Mr. President, is the Senator from Utah [Mr. HATCH] on the floor? He has an interest in this amendment. I indicated I would make every effort to protect him so he might be called to the floor.

Will the Senator from Oregon yield for a question?

Mr. HATFIELD. Yes, Mr. President.

Mr. METZENBAUM. Is the floor now open and would he make his unanimous-consent request so I may offer the amendment?

Mr. HATFIELD. I say to the Senator from Ohio that we are delaying momentarily to make one final check before I propound that unanimous-consent request. Then I shall be very happy to yield the floor, and it will be open for the Senator from Ohio to offer an amendment.

Mr. METZENBAUM. Has the majority leader sent word to Senator HATCH?

Mr. DOLE. Yes.

Mr. METZENBAUM. I thank him.

Mr. DOMENICI. Mr. President, I wonder if the distinguished chairman would mind if I took a few minutes with reference to the budgetary effects of the 13 appropriations bills?

Mr. HATFIELD. I shall be happy to do that.

Mr. DOMENICI. Mr. President, I rise in support of the conference report on the continuing appropriations bill. As my colleagues know, this bill contains all 13 regular appropriation bills which the Congress has been unable to pass separately. It also funds the new bipartisan antidrug legislation.

This bill provides $559.6 billion in budget authority and $353.5 billion in outlays to fund all activities of the Federal Government for fiscal year 1987.

When outlays from prior-year budget authority and other adjustments are taken into account, the bill

is $4.9 billion in budget authority and $0.1 billion in outlays under the Senate Appropriations Committee's overall 302(a) allocation.

DRUG BILL FUNDING

Mr. President, it is important to note that these totals include funding for the bipartisan antidrug bill. The continuing resolution provides $1.7 billion in budget authority and $0.8 billion in outlays in fiscal year 1987 to combat the flow and use of drugs in the United States.

Although funding for the drug control initiative was not part of the budget resolution, the Appropriations Committee has brought back a conference report that is under the overall budget resolution levels. The distinguished chairman and members of the committee should be congratulated on this considerable achievement.

OTHER DOMESTIC APPROPRIATIONS

Mr. President, I also want to commend my colleagues for their work on the domestic side of the continuing appropriations resolution, other than the drug bill. The subcommittees has to make many hard choices on which programs to fund and which to cut.

Many of the nondefense subcommittees completed action consistent with their 302(b) allocation, and I congratulate them on their fine efforts. For the few subcommittees that will require a revised section 302(b) allocation, I know what difficult constraints they had to work under, and I am pleased that such adjustments can be accommodated within the overall budget totals for the Appropriations Committee.

Much of the credit for the overall budget reductions we are achieving belongs to Chairman HATFIELD and the Appropriations Committee. This continuing resolution continues to hold the line on spending for nondefense discretionary programs, which has declined by 25 percent under the able chairmanship of my good friend and distinguished colleague, Senator HATFIELD.

FOREIGN ASSISTANCE

The foreign assistance title is consistent with both the subcommittee 302(b) allocation and the budget resolution assumptions.

The conference agreement begins much needed reform of financing for foreign military sales by discontinuing treasury-rate loans in favor of increased grants and low-interest loans.

The conferees agreed to add $50 million for disaster and reconstruction assistance to victims of the recent earthquake in San Salvador; additional amounts may be requested later when damage assessments are completed.

I believe it should also be noted that economic assistance for Central America is expected to be no lower than the fiscal year 1986 level, and it is specifically exempted from the conference provision that no region may receive a greater percentage of global assistance totals in fiscal year 1987 than it did in fiscal year 1986.

Overall, funding for foreign aid in fiscal year 1987 is 6 percent less than the fiscal year 1986 level. I am concerned that congressional decisions to increasingly earmark amounts for individual countries and activities does more to hamper foreign policy than the scarcity of resources.

In this regard, I am pleased that the conferees accepted an amendment by Senator KASSEBAUM, requiring the administration to submit new legislation restructuring U.S. foreign aid programs to more effectively utilize diminishing resources.

DEFENSE

The conference agreement provides $268.8 billion in budget authority for the Department of Defense. When the other function 050 portions of the continuing resolution are included, the total appropriation for defense activities is approximately $284 billion in budget authority and $277 billion in outlays.

The funding levels for the overall defense function are under the targets in the budget resolution by $8 billion in budget authority and $2 billion in outlays. This makes defense a major "bill payer" in the continuing resolution.

I support the continuing resolution, but I would have preferred a higher level of funding for our nation's defenses.

CONCLUSION

Mr. President, this first year of complying with the mandates of the Balanced Budget Act has been challenging. But I am greatly encouraged by the final continuing resolution before us today. I sincerely congratulate the distinguished chairman and ranking member of the Appropriations Committee for the outstanding job they have done.

Mr. President, I ask unanimous consent that tables showing the relationship of the reported bill to the Appropriations Committee's section 302(a) allocation, the President's request, and the Senate-and House-passed levels, and summaries of total appropriations action to date and congressional action to date, be printed in the RECORD at the conclusion of my remarks.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

APPROPRIATIONS COMMITTEE CONTINUING APPROPRIATIONS FOR FISCAL YEAR 1987 SPENDING TOTALS—CONFERENCE AGREEMENT

[Dollars in billions]

	Fiscal year 1987	
	Budget authority	Outlays
Outlays from prior-year budget authority, permanent and advance appropriations, and other actions completed this session	12.7	205.5

[1] Less than $50 million.
[2] In addition to the bill, includes outlays from budget authority enacted in prior years, possible later requirements, adjustments to conform mandatory items to budget resolution level, and other adjustments.
Note.—Details may not add to totals due to rounding.

Mr. COCHRAN. Mr. President, would the distinguished manager of the bill yield?

Mr. HATFIELD. I yield.

AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES

Mr. COCHRAN. Mr. President, the Agriculture, Rural Development, and Related Agencies Act for fiscal year 1987 (H.R. 5177), is included in its entirely in amendment No. 1 in the conference report on the continuing resolution.

As chairman of the subcommittee with jurisdiction over that bill, I am proud to report to the Senate that the agriculture section of the conference agreement is within the subcommittee's original 302(b) allocation for outlays. This was a difficult task in this time of budget constraints, given the current economic conditions facing our farmers.

As Senators will recall, the House version of the continuing resolution included, by reference, the House-passed version of H.R. 5177. The Senate amended the continuing resolution to include, by reference, H.R. 5177, as reported to the Senate by the Appropriations Committee on September 11, 1986. When the continuing resolution was considered, there were a number of amendments adopted in both the House and the Senate which would alter H.R. 5177 or existing laws related to agriculture. The conferees included most of these provisions in the text of amendment No. 1 in order to consolidate the various agriculture amendments which were scattered throughout the continuing resolution. I will highlight some of the conference agreements on H.R. 5177 and related provisions of the continuing resolution.

The feeding program for women, infants, and children [WIC] will be funded at $1,663,497,000 for fiscal year 1987. This is an $8 million increase over the Senate bill and a $43 million increase over current services. Also included is a provision which prohibits the implementation of regulations which were proposed in September which would alter the WIC funding formula. The conference agreement does, however, require implementation of regulations concerning this issue in time for States to conform to the new regulations by the beginning of fiscal year 1988.

For Public Law 480 title II programs, the conferees agreed to increase the amount provided in the Senate bill by approximately $100 million. As a supporter of the Public Law 480 programs, I was pleased that we could provide this increase and remain within our 302(b) allocation.

For the Commodity Credit Corporation, the House insisted that we provide a direct appropriation for net realized losses, rather than a current, indefinite appropriation as proposed by the Senate. We provide a total of $19.8 billion, including $3 billion which shall be available only to the extent that an official budget request is transmitted to the Congress. This will allow reimbursement for any advance deficiency payments which the Secretary may choose to make in 1987.

The House bill included limitations on CCC spending for certain programs. The conferees agreed to those limitations with two exceptions upon which the Senate conferees insisted: First, the limitation on borrowing by the Federal Crop Insurance Corporation was increased from $100 million to $375 million; and second, the limitation on the Conservation Reserve Program was increased from $550 million to $700 million.

The conferees agreed to include a disaster provision in the bill. During the appropriations Committee's markup of the agriculture appropriations bill, the Senator from Georgia, Senator MATTINGLY, offered an amendment designed to alleviate the devastating effects of the drought which plagued the Southeast this past summer. During floor consideration of the continuing resolution, the Senator from Georgia expanded that amendment to include assistance for all farmers who suffered from not only the drought, but also floods and hail storms in other parts of the country. The conference agreement includes those amendments, as well as $20 million for emergency conservation measures, and other discretionary provisions related to the Farmers Home Administration.

The conference report on the continuing resolution includes the full text of the conference agreement on amendments to the Child Nutrition and School Lunch Acts, commonly known as H.R. 7. One adjustment to that conference report is an amendment which was in the House version of the continuing resolution and which will eliminate the cap on tuition which schools may charge and still participate in the School Lunch Program.

Mr. President, there is one provision upon which the conferees were not able to agree. This provision was a matter included in the House version of the continuing resolution and it was deleted by the Senate. It involved a limitation on payments which farmers may receive under the various programs authorized in the 1985 farm bill. The Senate conferees in the subconference on agricultural issues in the continuing resolution voted 7 to 2 to reject the House provision. Because the House conferees insisted on their position, the amendment was reported from the conference in true disagreement. The House further insisted on that position last night during consideration of the amendment in disagreement. Thus, we will be faced with that issue later.

Mr. President, I support the conference report on the continuing resolution and I recommend its immediate adoption.

Mr. President, in subconference and in the full conference, we prevailed in many of the positions that the Senate had taken in the markup of the bill.

□ 0040

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATFIELD. Mr. President, I ask unanimous consent further proceeding under the quorum call be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, I believe we have clearance from all parties on both sides of the aisle and therefore I would propound a unanimous-consent request that we temporarily lay aside the Goldwater amendment in the second degree to the Abdnor amendment in the first degree without prejudicing the rights of any parties thereto in order for other Senators to be free to offer amendments in the second degree.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. Mr. President, one comment. I want to say, without addressing the merits of any amendment—and I want to be very straightforward—the order of the business that we have before us is to complete the continuing resolution. We have disposed now of four of the five amendments. I will move to table any other business of the Senate that is attempted to be put on this continuing resolution, just as a matter of course, in order to get this appropriation completed. Again, I say that without any derogation of the merits of any issue that any Senator may wish and has every right to raise. But I also want to be very clear we are not here to do the legislative business of the past session. We are not here to try to pick up the unfinished agendas. We are not here to try to work out the final compromises.

I am saying this without any prejudice to any Senator or impinging upon the right of any Senator, but I will move to table any amendment that is offered.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I am about to send to the desk an amendment which reforms the Racketeer Influence and Corrupt Organizations Act, more commonly known as RICO. RICO was originally enacted to fight organized crime but it has been used to attack legitimate business practices. The amendment I am offering is very similar to S. 2907, a measure I introduced on October 3 of this year. This amendment is identical to the bill passed by the House overwhelmingly 371 to 28.

Now, that has to do with the RICO portions of the bill. It is not identical in connection with two add-ons to my amendment which will be more fully described by the Senator from Utah, and I will not attempt to describe that portion of the amendment but will yield the floor to him in order that he may do so at an appropriate time.

The purpose of the RICO amendment, not including the Hatch add-ons, is to make sure RICO is still a powerful tool for attacking corporate abuse but that it is not used—may we have order in the Senate?

Mr. HATCH. Will the Senator yield?

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Let us not add the Hatch add-ons. I will be happy to speak in favor of the amendment for just a minute when the Senator finishes. We will not add on anything. I do have a great deal of sympathy with the distinguished Senator from Oregon about adding legislation on the bill. The RICO add-on would be a very good thing and I will speak to that, but let us not add the other two.

Mr. METZENBAUM. Whatever the Senator from Utah wants. As he well knows, I was adding it at his request. I will not add it also at his request.

Now, RICO has mushroomed into a litigation explosion and frankly we need to put some fair and sensible limits on it. The American business community is being harassed by RICO lawsuits and I am frank to say to my colleagues that originally there were those who proposed that we practically throw out the entire RICO legislation.

Mr. President, there is not order in the Senate.

Mr. HATFIELD. Mr. President, I move to table the amendment.

Mr. BUMPERS. Mr. President, will the Senator withhold for just a moment? I want to be added as a cosponsor to this amendment.

Mr. METZENBAUM. I am happy to have the Senator from Arkansas as a cosponsor.

Mr. HATFIELD. Mr. President, I will withhold the motion to table the amendment, but I would like to make that motion as soon as possible. The Senator from Utah and any other Senator who wishes to speak, I will not try to foreclose them.

Mr. METZENBAUM. I was still speaking but I asked for order in the Senate.

Mr. HATFIELD. I am sorry; I did not understand. I thought the Senator yielded the floor and I was given recognition.

Will the Senator indicate how much time he needs?

□ 0050

Mr. METZENBAUM. Three or four minutes. I do not intend to keep this body long on this issue.

In essence, all the amendment is all about is the fact that we are providing to this bill—the Senator from Oregon has some merit to his proposition as to whether this is the proper place to add it. The fact is that there are so many abuses occurring today under RICO that the American business community, major portions of it, is crying out for relief.

It is fair to point out that they would like more relief than is provided in this bill. But the fact is that the accounting profession, the securities profession, many of the largest corporations in America, have been around these halls saying "We need this bill."

I would not be totally frank with this body if I did not indicate that there is some objection, because some segments of the business community feel that it does not go far enough. But nobody says that it is not a major step in the right direction.

This amendment reforms the Racketeer Influenced and Corrupt Organizations Act, more commonly known as RICO.

The amendment I am offering is very similar to S. 2907, the measure I introduced on October 3 of this year. This amendment is identical to the bill

passed by the House overwhelmingly, 371 to 28.

The purpose of this amendment is to make sure RICO is still a powerful tool for attacking corporate abuse, but that it is not used against legitimate business practices.

RICO has mushroomed into a litigation explosion; we need to put some fair and sensible limits on it.

The amendment retains RICO as a strong tool for Government criminal and civil actions; it limits the use of RICO in business litigation cases where other remedies are available; and it retains the opportunity for consumers to obtain punitive damages in cases where the conduct has been particularly bad.

The amendment retains strong remedies for harm to individual consumers. And it reduces the incentives to use RICO for ordinary commercial disputes. In order to accomplish this objective, the bill divides RICO cases into three basic categories, each with different remedies.

First, in the case where the defendant has been convicted of criminal offenses, the current provisions for treble damages and attorneys fees to successful plaintiffs is retained. There is also no change in the case of civil or criminal actions by the Government.

Second, in the case where individual consumers have been harmed in the purchase or lease of a product, service, or investment, the purchase of real property, and the purchase of a contract, including an installment sales contract or other extension of credit, for their own use, the remedy would be actual damages, attorneys fees, and discretionary damages up to twice the level of actual damages, depending on the seriousness of the conduct. This approach means that in the case of the most egregious conduct by a defendant, treble damages could still be awarded. However, in the case where the conduct is less egregious, punitive damages would be much less.

Finally, for other cases, the remedy would only be actual damages plus attorneys fees. This last category of cases would include commercial disputes which now make up the great majority of RICO legislation. By reducing the remedy to actual damages, the incentive to use RICO would be greatly reduced.

A cause of action under RICO, whether brought under the civil or criminal provisions of the statue, is predicated on violations of other Federal or State statutes. RICO does not, however, allow a plaintiff to recover treble damages, attorney's fees, and costs if he successfully proves only a violation of these underlying Federal or State causes of action. Instead, a successful suit under RICO must prove the existence of a "pattern" of criminal violations committed in relation to an enterprise. It is thus inaccurate to state that the U.S. statute displaces or evades other Federal or State causes of action. RICO offers enhanced penalties because its provisions are violated by especially egregious behavior.

While the amendment does eliminate the award of automatic treble damages in certain cases, it does not alter current law concerning entitlement to costs and a reasonable attorney's fee in all cases. *See Aetna Cas. & Ins. Co.* v. *Liebowitz*, 730 F.2d 905 (2d Cir. 1984). This entitlement is mandatory, not discretionary.

The amendment divides civil RICO plaintiffs into four categories: Government plaintiffs, private plaintiffs who sue persons who have been convicted of an illicit activity or a violation of RICO, consumer plaintiffs, and nonconsumer plaintiffs.

The first two categories of plaintiffs are readily understandable. The last two categories need further explanation.

Recent statistics of the U.S. Department of Justice estimate that white-collar crime costs American citizens $200 billion annually. Civil RICO is currently consumers' best defense against this crime wave since it allows them to seek compensation for their losses. The amendments are designed to preserve the use of civil RICO for consumers who are victimized by ongoing criminal behavior, including criminal frauds. Thus, any person who suffers RICO cognizable injury in connection with a contract for personal or household use or investment, or the purchase or lease of a product, service, investment, or other property for personal or household use or investment may bring an action for damages, costs, attorney's fees, and punitive damages up to twice the level of actual damages. This remedy is available to all persons who meet the criteria in the amendments, whether or not they are unsuspecting and highly vulnerable or impoverished. The set of facts underlying *Gregory* v. *Atlantic Permanent Savings and Loan Ass'n.*, No. 84-620-N (E.D. Va. 1984) is just one example of the many circumstances in which a plaintiff would be able to maintain a civil action under RICO as a consumer. Other fact situations, for example, arising in connection with an extension of credit, refinancing, or any consumer transaction are meant to qualify for punitive damages under the amendment.

The provision that punitive damages are available if "neither State nor Federal securities laws make available an express or implied remedy for the type of behavior on which the claim of the plaintiff is based" is meant to preclude a plaintiff from recovering under the punitive damages section of the amendments if he or she is eligible to recover damages under the securities laws based on the facts underlying the civil RICO case and if the civil RICO case were filed under the securities laws instead. It is not designed to insure that no punitive damages are available as long as the securities laws regulate the conduct, whether or not the plaintiff himself or herself would have standing to press the claim.

Behavior is done in "wanton" disregard of the plaintiff's rights if it is done in reckless or callous disregard of the rights of the plaintiff. The term is intended to be applied as it is traditionally applied and is not intended to require a different standard of proof than in traditional cases involving other Federal and State courses of action.

A plaintiff who meets the requirements for eligibility to recover punitive damages need not prove viciousness or egregiousness in order to recover punitive damages. Nor is it the intent of the amendments that substantial punitive damages should be reserved only for the most extreme cases of misconduct because all wanton and willful conduct is extreme, vicious, and egregious. *See, e.g., Phillips* v. *Hunter Trails Community Ass'n.*, 685 F.2d 184 (7th Cir. 1982), *Meyer* v. *Nottger*, 241 N.W.2d 911 (Iowa 1976), *Stroud* v. *Denny's Restaurant, Inc.*, 271 Ore. 430, 532 P.2d 790 (1975), *General Motors Acceptance Corp.* v. *Froelich*, 273 F.2d 92 (D.C.Cir. 1959), *Woodard* v. *City Stores*, 334 A.2d 189 (D.C.App. 1975).

The factors which the trier of fact should consider in establishing the level of punitive damages are aggravating, not mitigating, factors. The purpose of listing solely aggravating factors is to make sure that the trier of fact has proper guidance on the kinds of factors that should be considered in the award of punitive damages. The second factor, the "degree of disparity of bargaining power" means that the trier should consider the difference in bargaining power between the plaintiff and the defendant. It does not mean that the punitive damage award should be affected only if the disparity was so great that the defendant's actions were unconscionable, although an unconscionable disparity is certainly a fact that the trier of fact should consider. The other factors should also be interpreted in light of common meaning and understanding and in the light most favorable to the award of double actual damages for the plaintiff.

The scope of suits for which punitive damages are available should be interpreted liberally in favor of the plaintiff.

The pattern definition in the amendment should be interpreted in light of footnote 14 in *Sedima, S.P.R.L.* v. *Imrex Co., Inc.*, 105 S.Ct. 3275 (1985). The word "episode" in the statute was specifically selected and should not be

confused with "scheme" or "transaction." *United States* v. *Buscaro*, 742 F.2d 1335 (11th Cir. 1984), *cert. denied*, 105 S.Ct. 3476 (1985), and *Holmberg* v. *Morrisette*, 2 Civil RICO Rptr. No. 15, p. 4 (8th Cir. 1986), for example, are rejected. The reasoning of *United States* v. *Moeller*, 402 F.Supp. 49 (D.C.Conn. 1975) is adopted.

The statute of limitations starts to run from when the "cause of action accrues," "the conduct causing injury to the plaintiff terminates," or the date of the criminal conviction. The "conduct" refers to the pattern of illicit activity. The result of *Bowling* v. *Founders Title Co.*, 773 F.2d 1175 (11th Cir. 1985) is not possible under the amendment. The running of the statute of limitations is tolled during the pendency of a governmental civil or criminal action. It also includes the usual rules about bars, such as tolling for fraud and duress.

The requirement of pleading with particularity should be interpreted in light of rule 9 of the Federal Rules of Civil Procedure. Probable cause pleading is not required.

The amendment does not address the issue of respondeat superior or derivative liability nor is it intended to affect current law on this issue.

The amendment I am offering is the result of extensive discussions with business groups, labor, consumer representatives, and many others. It is supported by a wide spectrum of groups and individuals who have a strong interest in how RICO is reformed. A number of provisions were adopted in a spirit of compromise in order to bring all sides closer to consensus. I believe it represents a fair and sensible compromise, and I urge its adoption.

I particularly appreciate the cooperation of Senator LEAHY, who contributed substantially to the final drafting and who played a major role in helping achieve consensus, Congressman RODINO, chairman of the House Judiciary Committee; Congressman BOUCHER, who introduced legislation on this subject, and others who cooperated in these discussions.

This identical bill passed overwhelmingly in the House. I strongly urge the Senate to pass it as well.

I hope that at this late hour the U.S. Senate will see fit to adopt this amendment. It may not be all that some would like it to be, but I believe that it is good legislation and would help the American business community, would help many segments of it. I think we would be remiss if we did not take advantage of this opportunity.

Mr. HATCH. Mr. President, I will take very little time on this, because I understand the ordeal that the Senator from Oregon is under; and I hope my colleagues will start to recognize that ordeal.

Since the distinguished Senator from Ohio has brought this up, as to the RICO bill—which is what this amendment is—it would be better had we had a broad-based bill that would take care of all the injustices that are going on under civil RICO in this country today.

This bill basically takes care of accountants and securities dealers. It does not take care of bankers. It does not take care of insurers. It does not take care of a whole raft of others who nobody ever contemplated would be sued under the racketeering laws of this country. We all know that these laws have been used to extort throughout this country. Banks are sued, and they pay settlements because they do not want to be called racketeers. Nobody ever thought this was going to happen.

Whether this passes tonight or not, I intend to do everything I can to resolve the civil RICO problem next year. I mean that we need to resolve it across the board, not just in specialized cases, as this will be.

The distinguished Senator from Ohio knows that the people in the House will not take anything else. This is the best we can do this year. Therefore, I recommend that we vote for this bill, and I hope it will be the last legislative amendment offered to this continuing resolution. I feel duty bound to support it.

I have sympathy for the Senator from Oregon. I understand what the distinguished Senator from South Carolina is going to say: If they take the word "security" out, it would be broad-based and would take care of everybody. But I understand that the House will not take it.

I support the Senator from Ohio. I hope we will vote this bill through in this form, and I hope everybody will consider helping us to do it next year on a fair basis, for all businesses.

Mr. BIDEN. Mr. President, No. 1, the Senator from Ohio is being much too modest. This is not just an OK bill. This is a significant bill. This is a very good bill.

I know that most of my colleagues, unless they serve on the Judiciary Committee, probably do not know RICO from "SHMICO," any more than I would know some of the farm programs or some of the programs in the tax bill.

RICO is in fact a significant weapon that the Justice Department has available to it, and the civil application of RICO is important, notwithstanding the criticisms that have been made of it.

We have been trying to negotiate this proposal for two years. It was not until the Senator from Ohio decided that he would take it on essentially full time, along with the Senator from Utah, that we got this far. It is a very significant piece of legislation.

Those of you who are concerned about whether or not the American business community is being unfairly treated should understand that although they may not have called you on it, you will be called if you vote to table, because this is a big, big, big deal to a big segment of the American business community, as it should be. There is nothing wrong with that.

The reason why the Senator from Ohio—and I do not deign to speak for him—but I suspect, being able to read his mind, as I always am able to do, that the reason he wants to do it tonight is that this is something that is without controversy on the House side. If you all had a chance to look at it in detail, it probably would be without controversy here.

This is not an inappropriate vehicle to put it on. It will go through like a hot knife through butter if you let it. Just keep in mind that if you do not, there will be a lot of people upset, with good reason, who have worked a long time.

Mr. CHILES. Mr. President, will the Senator yield?

Mr. BIDEN. I yield.

Mr. CHILES. Will the Senator tell the Senator from Florida, if this bill is so noncontroversial and everybody wants it and the House has passed the measure and sent it over here, what is to prevent the Senate, on a unanimous-consent agreement, from taking up the House measure and passing that?

We are dealing now with a conference report. A conference report, the Senator from Florida always felt, you voted yes or no. The only reason to hold a conference is to bring the parties together and to force some resolution.

We had the continuing resolution here, and we worked on it for days. Anybody who had an amendment had a shot at putting it on. The Senator from Florida had some; the Senator from Delaware had some.

Mr. BIDEN. The Senator from Delaware is probably the only person here in 14 years who not one time had an amendment to a continuing resolution, and I will tell the Senator why now. The reason why now is that a few Senators just saw the light a half hour ago.

Mr. CHILES. If they saw the light a half hour ago, why do not those same Senators that the Senator from Delaware is talking about, with the power of the Judiciary Committee—why does not somebody from the Judiciary Committee stand up and say: "I have a unanimous-consent agreement; I want to take the House bill off the calendar; and let's take it up and pass it as a freestanding bill"?

Mr. BIDEN. Mr. President, do I have the floor?

The PRESIDING OFFICER (Mr. WILSON). The Senator from Delaware has the floor.

Mr. BIDEN. Mr. President, I ask unanimous consent that we temporarily set aside the continuing resolution, and I ask unanimous consent that we take the RICO bill off the desk and that we pass it. That is my unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

Mr. D'AMATO. Mr. President, reserving the right to object——

Mr. HATFIELD. Mr. President, reserving the right to object, under what time limitation?

Mr. BIDEN. Twenty seconds.

Mr. D'AMATO. Mr. President, will the Senator yield for an inquiry?

Mr. BIDEN. I yield.

Mr. D'AMATO. I share the Senator's thought with respect to RICO and its misapplication. We have a great deal of concern in the city of New York, and that relates to whether or not they would be precluded—they being the city or any other municipalities—from bringing an action where there is no conviction, a civil action where there is no conviction.

I believe that is the case in the House bill. If it is, I would suggest that it would be appropriate to amend that to give those municipalities a 2-year grace period so that they could obtain legal authority from their legislatures and not be precluded from actions they are contemplating or undertaking at the present time. I hope we can deal with that deficiency.

Mr. BIDEN. I will answer the question by suggesting that I do not think we begin to amend any of this. I respectfully suggest that if the unanimous-consent request cannot be agreed to, we withhold that until immediately when we get back here.

□ 0100

The Senator from Utah or the Senator from South Carolina or the Senator from Massachusetts will be chairman of the Judiciary Committee next year, and I can assure you that they will likely bring that up. So I would not want to do that.

Mr. CHAFEE. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The distinguished manager, the Senator from Oregon.

Mr. HATFIELD. I move to table the Metzenbaum amendment.

Mr. THURMOND. Give me one-half minute.

The PRESIDING OFFICER. The amendment has not yet been offered.

Mr. HATFIELD. Mr. President, the Senator asked for 1 minute.

Mr. METZENBAUM. A slight detail.

The PRESIDING OFFICER. The Senator will suspend.

Mr. HATFIELD. I believe the Senator has not even submitted the amendment.

Mr. METZENBAUM. I believe that is right, a slight detail.

Mr. HATFIELD. Does the Senator intend to submit the amendment?

Mr. METZENBAUM. Yes; I do. I have every intention to.

AMENDMENT NO. 3479

Mr. METZENBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio [Mr. METZENBAUM] proposes an amendment numbered 3479.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Add at the end of the pending amendment:

SECTION 1. PATTERN OF ILLICIT ACTIVITY.

(a) CHAPTER 96 HEADING.—The heading for chapter 96 of title 18, United States Code, is amended by striking out "RACKETEER INFLUENCED AND CORRUPT ORGANIZATIONS" and inserting in lieu thereof "PATTERN OF ILLICIT ACTIVITY."

(b) SECTION 1961.—Section 1961 of title 18, United States Code, is amended—

(1) in paragraph (1), by striking our "racketeering" the first place it appears and inserting "illicit" in lieu thereof;

(2) in paragraph (5), by striking out "racketeering" each place it appears and inserting "illicit" in lieu thereof;

(3) in paragraph (7) by striking out "racketeering" each place it appears and inserting "criminal" in lieu thereof; and

(4) in paragraph (8)—

(A) by striking out "racketeering" the first place it appears and inserting "illicit activity" in lieu thereof; and

(B) by striking out "racketeering" the second place it appears and inserting" criminal" in lieu thereof.

(c) SECTION 1962.—Section 1962 of title 18. United States Code, is amended by striking out "racketeering" each place it appears and inserting "illicit" in lieu thereof.

(d) SECTION 1963.—Paragraph (3) of section 1983(a) of title 18, United States Code. is amended by striking out "racketeering" and inserting "illicit" in lieu thereof.

(e) SECTION 1968.—Section 1968 of title 18, United States Code, is amended—

(1) in subsection (a), by striking out "a racketeering investigation" and inserting "an illicit activity investigation" in lieu thereof;

(2) in subsection (b), by striking out "racketeering" each place it appears and inserting "illicit activity" in lieu thereof;

(3) in subsection (c), by striking out "racketeering" each place it appears and inserting "illicit activity" in lieu thereof; and

(4) in subsection (f)—

(A) by striking out "racketeering" the first, second, and fifth places it appears and inserting "criminal" in lieu thereof;

(B) by striking out "racketeering" each other place it appears and inserting "illicit activity" in lieu therof; and

(C) by striking out "racketeer" and inserting "illicit activity" in lieu thereof.

Subsection (c) of section 1964 of title 18, United States Code, is amended to read as follows:

"(c)(1)(A) A governmental entity whose business or property is injured by conduct in violation of section 1962 of this title may bring in any appropriate United States district court, a civil action against the person who engaged in such conduct to recover threefold the actual damages that the governmental entity sustained by reason of such injury, and the costs of the civil action, including a reasonable attorney's fee.

"(B) A civil action under subparagraph (A) of this paragraph must be brought by—
